267. PRINCIPLE.

See IDENTITY, IN PRINCIPLE.

Principle — *Defined*, §§ 4942-4945. *Its patentability*, §§ 4946-4968.

§ 4942. An abstract principle is unpatentable. *Evans v. Eaton*, Pet. C. C., 322.

§ 4943. A principle is not patentable. *Smith v. Ely*, 5 McL., 76.

§ 4944. A principle is an elementary truth, and is not patentable. *Barrett v. Hall*, 1 Mason, 447.

§ 4945. A principle, in the abstract, is a fundamental truth, and is not patentable. *Le Roy v. Tatham*, 14 How., 156.

§ 4946. The discovery of a new and abstract principle in science or mechanics is not patentable. *Tilghman v. Werk*, 1 Bond, 511; *Morton v. New York Eye Infirmary*, 5 Blatch., 116.

§ 4947. A principle is not patentable. The means of applying and using it are patentable. *O'Reilly v. Morse*, 15 How., 62.

§ 4948. A new principle, without reference to any mode or method of enforcing it, is not patentable. *Smith v. Downing*, 1 Fish., 64.

§ 4949. An abstract principle is patentable only when applied to produce some beneficial result. *Le Roy v. Tatham*, 22 How., 132.

§ 4950. A principle is not patentable, but the embodiment and application of the principle is. *Wintermute v. Redington*, 1 Fish., 239.

§ 4951. A principle is not patentable; but the discovery of a principle and a mode of operation, the mode of carrying the principle into effect, is patentable, and he is an infringer who takes substantially the principle and mode, though he vary the form. *Singer v. Wabnesley*, 1 Fish., 558.

§ 4952. A patent cannot be valid for a principle merely, but must be for the application of a principle to some practical and useful purposes. *Bell v. Daniels*, 1 Bond, 212.

§ 4953. A newly discovered principle or property of matter may be patented, provided a new and useful result has been obtained from the application of it, and the specification describes how the result is to be obtained. *Mitchell v. Tilghman*, 19 Wall., 287.

§ 4954. An idea is not patentable, but a new device by which this idea may be made practically useful is. *Rubber Tip Pencil Co. v. Howard*, 20 Wall., 498.

§ 4955. A principle, when made available by a method whereby it is put to practical use, is patentable as a process. *Andrews v. Carman*, 13 Blatch., 307.

§ 4956. Mere philosophical or abstract theory is unpatentable; it must be reduced to practice in a particular structure or combination to become patentable. *Lowell v. Lewis*, 1 Mason, 182.

§ 4957. A new use of a principle previously applied for the same purpose is not patentable. A new application by new mechanical contrivances and apparatus, by means of which a new and beneficial result is produced in the use of the article to which it has been thus applied, is patentable. *Foote v. Silsby*, 1 Blatch., 445.

§ 4958. What is to be protected is not an abstract or isolated principle, but the embodiment of a principle into a machine or manufacture, as described in the specification; and it is the invention in conformity with that embodiment or representation of its working which the act of congress will protect. *Smith v. Downing*, 1 Fish., 64.

§ 4959. A patent cannot be granted for a principle or for an idea, or for any abstraction whatever. But when the idea is applied to a material thing, so as to produce a useful effect or result, it ceases to be abstract and becomes a proper subject to be covered by a patent. *McComb v. Brodie*, 1 Woods, 153.

§ 4960. There can be no patent for a principle; but for a principle so far embodied and connected with corporeal substances as to be in a condition to act and to produce effects in any trade, mystery or manual occupation, there may be a patent. *Andrews v. Carman*, 13 Blatch., 307.

§ 4961. The most important part of an invention may consist in the conception of the original idea, in the discovery of the principle in science, or of the law of nature, stated in the patent, and little or no pains may have been taken in working out the best manner of practically applying that principle to the purpose set forth in the patent. Still, if the principle is stated to be applicable to any special purpose, so as to produce any result previously known in the way and for the purpose described, the patent is good. *Burrows v. Witherill*, 1 MacA. Pat. Cases, 315.

§ 4962. A well known principle or truth of natural science, as well as a newly discovered one, is patentable to the one who first applies it to the useful arts; but having been once made known and applied, any subsequent application of it, even though more perfect, must, to insure a patent, rest upon the new machinery or combination of machinery, and not upon the principle the novelty of which has been exhausted. *In re Henry*, 1 MacA. Pat. Cases, 467.

§ 4963. The doctrine that a discovery of a fact or principle, when practically applied to produce some new and useful effect in the arts, is patentable, is modified by the condition that the new effect must be produced by means that are new, by some *invention*, some contrivance, or the production of something that did not before exist. *In re Kemper*, 1 MacA. Pat. Cases, 1.

§ 4964. There cannot be a patent for a principle nor for the application of a principle, nor for an effect. Two persons may use the same principle and produce the same effect by different means without interference or infringement, and each would be entitled to a patent for his own invention. *Bain v. Morse*, 1 MacA. Pat. Cases, 90.

§ 4965. The discovery of a new principle is not a new invention, but its application to a practical purpose in the new construction, operation or effects of machinery or composition of matter is a "discovery," "invention" or "improvement" within the act of congress. *Whitney v. Emmett*, 1 Bald., 303.

§ 4966. Where the invention is a *machine*, a patent will not be granted for a "principle," "mode of operation," or an "idea." *Burr v. Duryee*, 1 Wall., 531.

§ 4967. When a specification endeavors to monopolize an idea, a function of the vital system, or any quality of objects in nature, it is void for undue generality, unless cured by disclaimer. *Cushing's Opinion*, 8 Op., 270.

§ 4968. The word "principle" in a claim construed and limited. *Stanley v. Hewitt*, 17 Frank. Jr., 2d Series, 165.

See *Inventor*, § 3729. *Process*, §§ 5051, 5073.

Principle — *Of an invention, defined*, §§ 4969-4972. *Of a machine, defined*, §§ 4973-4979.

§ 4969. Whatever is essential to the result to be obtained by the discovery, independent of mere form and the proportions of the thing used for the purpose, may generally be considered as the principle of the invention. *Treadwell v. Bladen*, 4 Wash., 703.

See *Identity*, §§ 2676-2709.

§ 4970. The word "principle" means the operative cause by which a certain effect is produced, the combination of certain mechanical powers, the mode of operation. *Olcott v. Hawkins*, 2 Am. L. J., 317.

§ 4971. The word *principle* of an invention construed to mean *modus operandi*. *Sickles v. Gloucester Mfg. Co.*, 1 Fish., 222.

§ 4972. The principle of a machine is its peculiar or constituent parts. *Barrett v. Hall*, 1 Mason, 447.

§ 4973. The principle of a machine is its *modus operandi*. *Whittemore v. Cutter*, 1 Gall., 478; *Latta v. Shawk*, 1 Bond, 259.

§ 4974. The "principle" of a machine is its "mode of operation," or that peculiar combination of devices which distinguishes it from other machines. *Burr v. Duryee*, 1 Wall., 531.

§ 4975. The principle of a machine has reference to its mode of operation, not to any abstract principles involved in its proportions or motion. *Judson v. Cope*, 1 Bond, 327.

§ 4976. The principle of a machine, or improvement of a machine, is the peculiar mode, manner or device by which the proposed result or effect is produced. *Pitts v. Wemple*, 1 Biss., 87.

§ 4977. The true legal meaning of the principle of a machine with reference to the patent act is the peculiar structure or constituent parts of such machine. The principles of two machines may be very different, though their external structures may have great similarity. *In re Boughton*, 1 MacA. Pat. Cases, 275.

§ 4978. The principle of a machine is the operative cause by which a certain effect is produced. *Brooks v. Jenkins*, 3 McL., 432.

§ 4979. The word principle, as applied to mechanics, is where two machines or things are made to operate substantially in the same way so as to produce a similar result; they are considered the same in principle. *Roberts v. Ward*, 4 McL., 565.

Principle — Infringement of — *Particular cases*, §§ 4980-4985.

§ 4980. Principle. Improvement in, is no infringement. *Park v. Little*, 3 Wash., 196.

§ 4981. *Semble*, that the new application of the principle by means of mechanical contrivances constitutes of itself a part of the invention; and that any different or improved mode of application is but an improvement upon the discovery, and not available without consent. *Foote v. Silsby*, 1 Blatch., 445.

§ 4982. A chance operation of a principle, unrecognized at the time, and from which no information of its existence and no knowledge of a method of its employment is derived, will not be sufficient to defeat the claim of him who first discovered the principle and put it to a practical and intelligent use. *Andrews v. Carman*, 13 Blatch., 307.

§ 4983. A patent which set forth a naked discovery simply — the production of insensibility to pain by sulphuric ether — *held* not to be for patentable subject-matter, and void. *Morton v. New York Eye Infirmary*, 5 Blatch., 116.

§ 4984. There can be no patent for a mere principle. The discoverer of a natural force or scientific fact cannot have a patent for that; but if he invents for the first time a process by which a certain effect of one of the forces of nature is made useful to mankind, and fully describes and claims that process, and also describes a mode or apparatus by which it may be usefully applied, he is entitled to a patent for the process of which he is the first inventor, and is not restricted to any particular form of mechanism or apparatus by which he carries out that process. *American Bell Telephone Co. v. Dolbear*, 15 Fed. Rep., 448.

§ 4985. Another person, who afterward invents an improved form of apparatus embodying the same process, may indeed obtain a patent for his improvement; but he has no right to use the process in his own or any other form of apparatus without the consent of the first inventor of the process. *Ibid.*

See *Claim, Construction of*, §§ 723, 776, 780. *Construction of Patents*, § 1217.

274. PRIOR PUBLICATION.

See PUBLICATION, PRIOR.

275. PRIOR PUBLIC USE.

See USE, PRIOR PUBLIC.

276. PRIOR USE, RECOVERY FOR.

See RECOVERY, FOR PRIOR USE.

277. PRIORITY OF INVENTION.

See DELAY, §§ 1878-1882. REDUCTION TO PRACTICE, §§ 5241-5247.

Priority of invention — *Diligence in reduction to practice as between two inventors*, §§ 4986-4996.

§ 4986. Priority of conception, followed by reduction to practice, gives priority of right. *Sayles v. Hapgood*, 2 Biss., 189.

§ 4987. Whoever first perfects a machine capable of useful operation is entitled to a patent. *Agawam Co. v. Jordan*, 7 Wall., 583.

§ 4988. In a race of diligence between two independent inventors, he who first reduces his invention to a fixed, positive and practical form has a priority of right to a patent. *Many v. Jagger*, 1 Blatch., 372; *Parkhurst v. Kinsman*, 1 Blatch., 488; *Reed v. Cutter*, 1 Story, 590; *Ellithorp v. Robertson*, 4 Blatch., 307.

§ 4989. In the race of diligence, he must be held to be the first inventor who, having started later in his experiments than the other two inventors, arrived first at the goal, and first made the completed, successful invention, and followed it up by his patent. *Taylor v. Archer*, 8 Blatch., 315.

§ 4990. In a race of diligence between two independent inventors, he who invents first has the prior right if he is using reasonable diligence in reducing it to practice, although the second inventor is the first to reduce it to positive form. *Reed v. Cutter*, 1 Story, 590.

§ 4991. In a race of diligence between rival inventors, the one who first perfects an invention and embodies it in a distinct form is entitled to priority. *Reeves v. Keystone Bridge*, 1 O. G., 466.

§ 4992. Of two inventors who have conceived of the same invention at the same time, he who first reduces it to practice is entitled to priority. *Siebert Cylinder Oil Cup Co. v. Phillips Lubricator Co.*, 10 Fed. Rep., 677.

§ 4993. Where patentee has used reasonable diligence in perfecting his discovery, he is entitled to priority over those who have intervened between his discovery and the grant of the patent. *Johnson v. Root*, 1 Fish., 351.

§ 4994. Of two original inventors the first will be entitled to a patent unless the other puts the invention into public use more than two years before the application for a patent. *Webster Loom Co. v. Higgins*, 105 U. S., 580.

§ 4995. The determination of the fact of diligence is not to be reached by comparison of the diligence of the two inventors. If the first to conceive of the invention was reasonably diligent in perfecting his idea, it does not matter that the second inventor was exceedingly diligent and made more rapid advances. *Electric R. R. Signal Co. v. Hall R. R. Signal Co.*, 6 Fed. Rep., 603.

§ 4996. Although a third party had conceived of the invention before the plaintiff, and had made some progress toward completing a model, yet, if he then suspended his labors, and, before he resumed them, the plaintiff had perfected the invention and had embodied it in a practical working machine, his patent will be sustained. *Smith v. O'Connor*, 2 Saw., 461.

Priority of invention — Reduction to practice constitutes, §§ 4997-5006.

§ 4997. Reduction to practice is essential to priority of invention in order to defeat a patent. *Parkhurst v. Kinsman*, 1 Blatch., 488.

§ 4998. In order to defeat a patent, it is necessary that another should first have discovered the thing and reduced it to actual practice. *Cox v. Griggs*, 1 Biss., 362.

§ 4999. In order to invalidate a patent, the similar machine which is alleged to have existed previously must have been actually used and successfully operative. *Seymour v. Marsh*, 2 O. G., 675.

§ 5000. A subsequent inventor who reduces his invention to practice will not be defeated by a prior invention which has never been so reduced. *Bedford v. Hunt*, 1 Mason, 302.

§ 5001. A prior application for a patent alone, without evidence to show that such a lantern as is described therein was ever constructed, is not sufficient to defeat a patent. *Adams v. Howard*, 19 Fed. Rep., 317.

§ 5002. An imperfect description, coupled with an incomplete drawing, is insufficient to invalidate a patent. *New Process Fermentation Company v. Koch*, 21 Fed. Rep., 580.

§ 5003. The mere making of a model of an invention held not to constitute invention, as against a patent subsequently granted to another for the same thing. *Stilwell & Bierce Manufacturing Co. v. Cincinnati Gas Co.*, 7 O. G., 829.

§ 5004. A crude and imperfect experiment held insufficient to prove priority of invention over a patent. *Potter v. Wilson*, 2 Fish., 102.

§ 5005. Experiment alone is not sufficient to constitute priority of invention. *Many v. Sizer*, 1 Fish., 17.

§ 5006. An invention relating to machinery may be exhibited as well in a drawing as in a model, so as to lay the foundation of a claim to priority, if sufficiently plain to enable those skilled in the art to understand it. *Webster Loom Co. v. Higgins*, 105 U. S., 580.

Priority of invention — In general, §§ 5007-5010. *Evidence*, §§ 5011, 5012. *Patent office decision*, § 5013. See *Invention, Prior*, §§ 3697-3717. *Interference*, §§ 3435-3474. *Interfering Patents*, §§ 3475-3504. *Publication*, § 5134.

§ 5007. Upon the issue of priority of invention, the question is not whether one of the parties obtained better results than the other, but rather which of the parties first invented or discovered the subject-matter in controversy. *Matthews v. Wade*, 1 MacA. Pat. Cases, 143.

§ 5008. On the question of priority of invention the court cannot, as a matter of law, be required to pronounce upon the identity or diversity of the several inventions described in the patents produced. *Bischoff v. Wethered*, 9 Wall., 812.

§ 5009. Though the defense of prior invention ought to be set out in the answer, yet if the omission to set it out is not objected to at the proper time in the court below, it cannot be objected to in the supreme court. *Webster Loom Co. v. Higgins*, 105 U. S., 580.

§ 5010. In the contest for priority, the date of the patent will be considered as relating back to that of the original discovery. *Dixon v. Moyer*, 4 Wash., 68.

See *Bill, to Obtain Patent*, §§ 638, 639, 644, 646.

§ 5011. Upon an issue of priority of invention in an interference proceeding, it is not true that the machines themselves are the best evidence, and must be produced or their absence satisfactorily accounted for before parol testimony can be admitted to prove their character and construction, and that otherwise the parol testimony is inadmissible. *Screw Co. v. Sloan*, 1 MacA. Pat. Cases, 210.

§ 5012. The question of priority of invention having been determined in a suit in one circuit, the record of such suit is admissible as evidence in a suit in another circuit, and is conclusive as to such question when the defendant in the later suit employed the counsel and paid the expenses in the prior, though not a party thereto. *U. S. & Foreign Salamander & Felting Co. v. Asbestos Felting Co.*, 18 Blatch., 312.

See *Date of Invention*, § 1736. *Infringement*, § 2833.

§ 5013. When on appeal to the judge it appears from the testimony submitted in an interference proceeding between an applicant for a patent and a patentee that the applicant is debarred from receiving a patent by reason of the public use of his invention, it is unnecessary to determine the question of priority of invention. *Justice v. Jones*, 1 MacA. Pat. Cases, 635.

Priority of invention — *Particular cases*, §§ 5014-5023.

§ 5014. That defendant accepted a rejection on his application for patent in the patent office in view of another (plaintiff's) patent, without asking for an interference, is of weight to show that he did not claim priority. *Fay & Co. v. Allen*, 32 O. G., 1355.

§ 5015. The evidence of prior invention is usually entirely within the control of the party asserting it, and so wide is the opportunity for deception or mistake that the authorities are almost unanimous in holding that it must be established by proof clear, positive and unequivocal—nothing must be left to speculation or conjecture. *Thayer v. Hart*, 20 Fed. Rep., 693.

§ 5016. It being found that no one of the principal circumstances relied on by the complainant is free from perplexity, either its own date being uncertain or there being difficulty in connecting it with the invention, the doubt is created which the authorities hold must be absent from the mind of the court, and it follows that the bill must be dismissed. *Ibid.*

§ 5017. Where, on a question of date of invention, patentee testified directly, there being no contradictions or doubts, and delay in applying for the patent was explained, such date was allowed to prevail over a patent prior to hers but subsequent to such date of invention. *McDonald v. Blackmer*, 4 B. & A., 78.

§ 5018. Where a patentee showed, but disclaimed in his original patent, matter shown and claimed by a prior applicant, but on reissue claimed such disclaimed matter, *held*, that the burden was upon him to overcome such facts in order to show priority of invention as against the patent subsequent in date to his granted the prior applicant. *Smith v. Allen*, 2 Fish., 572.

§ 5019. Where the question was one of priority of invention, and the alleged prior invention was testified to after twenty years' uninterrupted use of the valuable patented invention, *held*, that the presumption arising from science, where there was so much interest to assert in favor of the patented invention, had far more strength than any preponderance in the number of witnesses. *Smith v. Fay & Co.*, 6 Fish., 446.

§ 5020. Where, of two interfering patents, the prior inventor was also the one to use diligence in securing his patent, his patent was sustained, and that of the subsequent inventor declared void. *Lockwood v. Cleveland*, 18 Fed. Rep., 37.

§ 5021. Where the patent was attacked on the ground of priority of invention, it being a fact that patentee had not reduced his idea to practice before his application, *held*, that it was necessary to show not only prior conception, with drawings, models and experiments, but also reduction to practice prior to date of patentee's application. *Electric Railroad Signal Co. v. Hall Railroad Signal Co.*, 6 Fed. Rep., 603.

§ 5022. Where, of two interfering applications, it was shown that the prior in date of invention had delayed nine years after perfecting it before applying for his patent, it was held abandoned, and the patent issued to the latter inventor, who had shown reasonable diligence. *Rowley v. Mason*, 2 Am. L. T. (U. S.) R., 106.

§ 5023. W. and T. having filed applications for patents showing substantially the same device, at the respective dates March 31 and April 21, 1868, were rejected. T. persisted in his claim, and upon appeal secured his patent, while W. amended his application, excluding from his claim the common device, and thus, without appeal, obtained a patent of narrow scope. Subsequently, learning of T.'s patent, he filed a second application, broad enough to include the device previously omitted, and in the consequent interference proceedings with T. was adjudged the prior inventor, and thereupon obtained a broad patent. *Held*, in a suit brought by T. against W., that W.'s second application was the commencement of a *new proceeding*, and that alone upon which the patent granted in pursuance of it depends; and, therefore, that the presumption, as regards priority of invention, was with T. *Pelton v. Waters*, 7 O. G., 425.

278. PRIVATE PROPERTY.

See GOVERNMENT. PATENTS.

279. PRIVIES.

§ 5024. Complainants are chargeable with the laches of the former owners of the patent, having succeeded only to the rights of such former owners. *Spring v. Domestic Sewing Machine Co.*, 16 O. G., 721.

§ 5025. Where suit was brought by patentee and his assignee against the assignee of an undivided interest in an interfering patent, which interest had been acquired subsequent to the commencement of the suit on the interference, but prior to rendition of judgment from the party to such suit, *held*, that the defendant in the existing suit was privy to the defendant in the

prior suit, and would be bound by its decision within section 16, act 1836. *Tyler v. Hyde*, 2 Blatch., 308.

§ 5026. Where there is a privity or connection between the different defendants, they are jointly liable upon a bill for infringing a patent. *Wells v. Jaques*, 5 O. G., 364.

§ 5027. Where patentee sued A., B. and C. separately for infringement, and suit against A. went as a test case to final hearing, in which the patent was sustained and infringement found, and A. appealed, but at plaintiff's instance and for a consideration abandoned the appeal, and the other cases were dismissed, since when C. continued the use of the patented device; *held*, in suit brought against C. for infringement that he was not bound by the decision in A.'s case. *McMillan v. Conrad*, 16 Fed. Rep., 128.

See *Parties*, §§ 4489-4545. *Purchaser*, § 5184. *Title*, § 6316.

CORNING v. BURDEN.

(15 Howard, 252-271. 1853.)

ERROR to U. S. Circuit Court, Northern District of New York.

Opinion by MR. JUSTICE GRIER.

STATEMENT OF FACTS.—Peter A. Burden, who is assignee of a patent granted to Henry Burden, brought this suit against the plaintiffs in error for infringement of his patent. The declaration avers that Henry Burden was "the first inventor of a new and useful machine for rolling puddle balls," for which a patent was granted to him in 1840, and that the defendants, Corning and Winslow, "made, used, etc., this said new and useful machine in violation and infringement of the exclusive right so secured to plaintiff."

The defendants below, under plea of the general issue, gave notice that they would prove on the trial that Henry Burden "was not the first and original inventor of the supposed new and useful machine for rolling puddle balls, etc.;" that the machine of the plaintiff and the principle of its operation was not new, and that the common and well known machines called nobbling rolls, which were in use long before the application of Burden for a patent, embraced the same invention and improvements used for substantially the same purpose. And after setting forth many other matters to be given in evidence, affecting the novelty of plaintiff's machine, the notice denies that the machine used by the defendants was an infringement of that patented by plaintiff, and avers that the machine used by them was described in a patent issued to the defendant, Winslow, in December, 1847, "for rolling and com-

pressing puddlers' balls," differing in principle and mode of operation from that described in the plaintiff's patent.

To support the issue in his behalf, the plaintiff gave in evidence a patent to Henry Burden, dated 10th of December, 1840, for "a new and useful machine for rolling puddlers' balls and other masses of iron in the manufacture of iron;" and followed it by testimony tending to show the novelty and utility of his machine, and that the machine used by the defendants was constructed on the same principles, and there rested his case. The defendants then offered to read in evidence the patent of Winslow for his "new and useful improvement in rolling and compressing puddlers' balls." The plaintiff objected to this evidence as irrelevant, and the court sustained the objection and overruled the evidence. This ruling of the court forms the subject of defendants' first bill of exceptions.

The defendants then proceeded to introduce testimony tending to show want of originality in the plaintiff's machine; and also that the principle and mode of operation of the defendants' machine was different from that described in the plaintiff's patent; and finally called a witness named Hibbard. This witness gave a history of the various processes and machines used in the art of converting cast-iron into blooms or malleable iron. He spoke of the processes of puddling, shingling and rolling, and attempted to define the difference between a process and a machine. The introduction of this philological discussion seems at once to have changed the whole course of investigation, to the entire neglect of the allegations of the declaration and of the issues set forth in the pleadings, in support of which all the previous testimony had been submitted to the jury. The defendants' counsel then proposed the following question to the witness: "Do you consider the invention of Mr. Burden, as set forth in his specification, to be for a process or a machine?" This question was objected to, overruled by the court, and a bill of exceptions sealed.

The counsel for the defendants then offered to prove by this witness "that the practical manner of giving effect to the principle embodied in the machine used by the defendants was entirely different from the practical manner of giving effect to the principle embodied in Mr. Burden's machine; that the principles of the two machines, as well as the practical manner of carrying out those principles, were different; and that the machine used by the defendants produced, by its action on the iron, a different mechanical result, on a different mechanical principle, from that produced in Mr. Burden's machine." To the introduction of this testimony the plaintiff's counsel objected, and it was overruled by the court, and, at the defendants' instance, a bill of exceptions sealed.

The defendants' counsel then proposed to prove "that the machine used by the defendants differed in point of mechanical structure and mechanical action from the machines described in the plaintiff's specification." This testimony was also overruled and exceptions taken.

After some further examination of witnesses, the learned judge announced his intention of instructing the jury, in the three following propositions, upon which the defendants' counsel declined to give further testimony, and excepted to his instructions:

"1. The letters patent to Henry Burden, which have been given in evidence by the plaintiff, are for a new process, mode or method of converting puddlers' balls into blooms, by continuous pressure and rotation of the ball between converging surfaces; thereby dispensing with the hammer, alligator jaws, and

rollers accompanied with manual labor, previously in use to accomplish the same purpose. And the said letters patent secure to the patentee the exclusive right to construct, use and vend any machine adapted to accomplish the objects of his invention as above specified, by the process, mode or method above mentioned."

"2. The machines for milling buttons, milling coin and rolling shot, which have been given in evidence by the defendants, do not show a want of novelty in the invention of the said patentee, as already described, if the processes used in them, the purposes for which they were used, and the objects accomplished by them, were substantially different from those of the said letters patent."

"3. That the machine used by the defendants is an infringement of the said letters patent, if it converts puddlers' balls into blooms by the continuous pressure and rotation of the balls between converging surfaces, although its mechanical construction and action may be different from those of the machines described in the said letters patent."

As the first instruction of the court contains the most important point in the case, and a decision of it will dispose of most of the others, we shall consider it first in order. Is the plaintiff's patent for a process or a machine?

§ 5028. *A process, as distinguished from a machine, is patentable, and comes under the terms "useful art" in the patent law.*

A process, *eo nomine*, is not made the subject of a patent in our act of congress. It is included under the general term "useful art." An art may require one or more processes or machines in order to produce a certain result or manufacture.

§ 5029. *"Machine" includes every mechanical device or combination of mechanical powers and devices to perform some function and produce a certain result.*

The term machine includes every mechanical device or combination of mechanical powers and devices to perform some function and produce a certain effect or result.

§ 5030. *A "process" is a mode, method or operation by which a result or effect is produced by chemical action, by the operation or application of some element or power of nature, or of one substance to another.*

But where the result or effect is produced by chemical action, by the operation or application of some element or power of nature, or of one substance to another, such modes, methods or operations are called processes.

§ 5031. *A patent is not issuable for a result, but for the process or machine which produces the result—and the result must be useful.*

A new process is usually the result of discovery; a machine, of invention. The arts of tanning, dyeing, making water-proof cloth, vulcanizing india-rubber, smelting ores, and numerous others, are usually carried on by processes, as distinguished from machines. One may discover a new and useful improvement in the process of tanning, dyeing, etc., irrespective of any particular form of machinery or mechanical device. And another may invent a labor-saving machine by which this operation or process may be performed, and each may be entitled to his patent. As, for instance, A has discovered that by exposing india-rubber to a certain degree of heat, in mixture or connection with certain metallic salts, he can produce a valuable product or manufacture; he is entitled to a patent for his discovery, as a process or improvement in the art, irrespective of any machine or mechanical device. B, on the contrary, may invent a new furnace or stove, or steam apparatus, by which this process

may be carried on with much saving of labor, and expense of fuel; and he will be entitled to a patent for his machine, as an improvement in the art. Yet A could not have a patent for a machine, or B for a process; but each would have a patent for the means or method of producing a certain result or effect, and not for the result or effect produced. It is for the discovery or invention of some practicable method or means of producing a beneficial result or effect that a patent is granted, and not for the result or effect itself. It is when the term process is used to represent the means or method of producing a result that it is patentable, and it will include all methods or means which are not effected by mechanism or mechanical combinations.

But the term process is often used in a more vague sense, in which it cannot be the subject of a patent. Thus we say that a board is undergoing the process of being planed, grain of being ground, iron of being hammered or rolled. Here the term is used subjectively or passively as applied to the material operated on, and not to the method or mode of producing that operation, which is by mechanical means, or the use of a machine, as distinguished from a process. In this use of the term it represents the function of a machine, or the effect produced by it on the material subjected to the action of the machine.

§ 5032. *A patent will not issue for the function or abstract effect of a machine, but only for the machine.*

But it is well settled that a man cannot have a patent for the function or abstract effect of a machine, but only for the machine which produces it. It is by not distinguishing between the primary and secondary sense of the term "process," that the learned judge below appears to have fallen into an error. It is clear that Burden does not pretend to have discovered any new process by which cast-iron is converted into malleable iron, but a new machine or combination of mechanical devices by which the slag or impurities of the cast-iron may be expelled or pressed out of the metal, when reduced to the shape of puddlers' balls. The machines used before to effect this compression were tilt hammers and alligator's jaws, acting by percussion and pressure, and by nobbling rolls with eccentric grooves, which compressed the metal by use of the inclined plane in the shape of a cyclovolute or snail cam. In subjecting the metal to this operation, by the action of these machines, more time and manual labor is required than when the same function is performed by the machine of Burden. It saved labor, and thus produced the result in a cheaper if not a better manner, and was therefore, the proper subject of a patent.

In either case the iron may be said, in the secondary sense of the term, to undergo a process in order to change its qualities by pressing out its impurities, but the agent which effects the pressure is a machine or combination of mechanical devices. The patent of Burden alleges no discovery of a new process, but only that he has invented a machine, and, therefore, correctly states the nature of his invention.

The patent law (5 Stats. at Large, 119) requires that "every patent shall contain a short description or title of the invention or discovery, indicating its nature and design," etc. The patent in question recites that: "Whereas Henry Burden, of Troy, New York, has alleged that he has invented a new and useful machine for rolling puddle balls, or other masses of iron, in the manufacture of iron, which he states has not been known or used before his application; has made oath that he is a citizen of the United States; that he does verily

believe that he is the original and first inventor or discoverer of the said machine," etc.

The specification declares that his improvement consists in "the employment of a new and useful machine for rolling of puddlers' balls;" again, he calls it "my rolling machine," and describes his "machine as consisting of a cast-iron cylinder," etc. In fine, his specification sets forth the "particulars" of his invention, in exact accordance with its title in the patent, and in clear, distinct, unequivocal and proper phraseology.

§ 5033. *The construction of the patent should be favorable to the patentee.*

It is true that the patentee, after describing his machine, has set forth his claim in rather ambiguous and equivocal terms, which might be construed to mean either a process or machine. In such case, the construction should be that which is most favorable to the patentee, *ut res magis valeat quam pereat*. His patent having a title which claims a machine, and his specification describing a machine, to construe his claim as for the function, effect or result of his machine would certainly endanger, if not destroy, its validity. His claim cannot change or nullify his previous specification with safety to his patent. He cannot describe a machine which will perform a certain function, and then claim the function itself, and all other machines that may be invented to perform the same function. We are of opinion, therefore, that the learned judge of the court below erred in the construction of the patent, and in his first proposition or instruction to the jury. And as the second and third instructions are based on the first, they must fall with it. Taking the bills of exception to rejection of evidence in the inverse order, it is clear that the last two rulings, being founded on the erroneous construction of the patent, are, of course, erroneous. The testimony offered was directly relevant to the issues trying, and should have been received.

§ 5033a. *Testimony of experts, when admissible.*

The refusal of the court to hear the opinion of experts as to the construction of the patent was proper. Experts may be examined as to the meaning of terms of art on the principle of *cuique in sua arte credendum*, but not as to the construction of written instruments.

It remains only to notice the first bill of exceptions, which was to the rejection of the defendant's patent. This is a question on which there may be some difference of opinion. In some circuits it has been the practice, when the defendant has a patent for his invention, to read it to the jury without objection; in others, it is not received, on the ground that it is irrelevant to the issue, which is a contest between the machine of the defendant and the patent of the plaintiff, and that a posterior patent could not justify an infringement of a prior one for the same invention.

By the patent act of 1793 (1 Stats. at Large, 318), any person desirous of obtaining a patent for an alleged invention, made application to the secretary of state, and received his patent on payment of the fees, and on a certificate of the attorney-general that his application "was conformable to the act." No examination was made by persons qualified to judge whether the alleged invention was new or useful, or had been patented before. That rested wholly on the oath of the applicant. The patent act of 1790 (1 Stats. at Large, 109) had made a patent *prima facie* evidence; but this act was repealed by that of 1793, and this provision was not re-enacted in it. Hence a patent was not received in courts of justice as even *prima facie* evidence that the invention

patented was new or useful, and the plaintiff was bound to prove these facts in order to make out his case.

§ 5034. *Under the acts of 1836 and 1839, by reason of tests and examinations of competent officers, a patent is prima facie evidence of the novelty and utility of the thing patented.*

But the act of the 4th of July, 1836, introduced a new system, and an entire change in the mode of granting patents. It provided for a new officer, styled a commissioner of patents, to "superintend, execute and perform all acts and things touching and respecting the granting and issuing of patents," etc. The commissioner was authorized to appoint a chief clerk, and three examining clerks, machinist, and other officers. On the filing of an application the commissioner is required to make, or cause to be made, an examination of the alleged invention, in order to ascertain whether the same had been invented or discovered by any other person in this country, prior to the application; or whether it had been patented in this or any foreign country, or had been on public use or sale, with the applicant's consent, prior to his application; and if the commissioner shall find that the invention is new and useful, or important, he is authorized to grant a patent for the same. In case the decision of the commissioner and his examiner is against the applicant, and he shall persist in his claim, he may have an appeal to a board of examiners, to consist of three persons, appointed for that purpose by the secretary of state, who, after a hearing, may reverse the decision of the commissioner in whole or in part. By the act of 1839 (5 Stats. at Large, 353), the chief justice of the District of Columbia was substituted to the board of examiners.

§ 5035. — *and the defendant in a suit for infringement was entitled to read his patent as evidence of novelty and utility, on the trial, at least as evidence of good faith to reduce damages.*

It is evident that a patent, thus issued after an inquisition or examination, made by skilful and sworn public officers, appointed for the purpose of protecting the public against false claims or useless inventions, is entitled to much more respect, as evidence of novelty and utility, than those formerly issued without any such investigation. Consequently such a patent may be, and generally is, received as *prima facie* evidence of the truth of the facts asserted in it. And in cases where the evidence is nicely balanced, it may have weight with a jury in making up their decision as to the plaintiff's right; and if so, it is not easy to perceive why the defendant who uses a patented machine should not have the benefit of a like presumption in his favor, arising from a like investigation of the originality of his invention, and the judgment of the public officers that his machine is new, and not an infringement of the patent previously granted to the plaintiff. It shows, at least, that the defendant has acted in good faith, and is not a wanton infringer of the plaintiff's rights, and ought not, therefore, to be subjected to the same stringent and harsh rule of damages which might be justly inflicted on a mere pirate. It is true the mere question of originality or infringement generally turns on the testimony of the witnesses produced on the trial; but if the plaintiff's patent in a doubtful case may have some weight in turning the scale in his favor, it is but just that the defendant should have the same benefit from his; *valeat quantum valeat*. The parties should contend on an equal field, and be allowed to use the same weapons.

We are of opinion, therefore, that the court erred in refusing to permit the defendants' patent to be read to the jury. The judgment of the circuit court is therefore reversed, and a *venire de novo* awarded.

MOWRY v. WHITNEY.)

(14 Wallace, 620-653. 1871.

APPEAL from U. S. Circuit Court, Southern District of Ohio.

Opinion by MR. JUSTICE STRONG.

STATEMENT OF FACTS.—The defenses set up to the complainant's bill for an infringement are, that the patent is void for want of novelty in the invention, and for want of utility, and also that it has not been infringed by the defendant.

To determine how far these defenses are sustained it is important to have a clear apprehension of the state of the art when the patent was granted, and of the invention which it was intended to secure to the patentee. Prior to the 2d of August, 1847, cast-iron railroad wheels had been cast, and cast in chills, that is, they had been cast in sand moulds with an outer circumference of iron. The effect of this outer circumference was to produce a more rapid chill on the periphery of the wheel, thereby crystallizing and hardening it, so that the wheel was made stronger, and more capable of resisting the friction of the rails. But the parts of the wheel were of different thicknesses. The hub and the rim were much thicker than the plate which connected them, and of course they cooled after casting more slowly than the plate. The consequence of this unequal cooling was to produce a strain between the thick and thin parts that greatly impaired the strength of the wheel. Various devices had been made to guard against or to remedy the mischief resulting from this inherent and inevitable strain, caused by unequal contraction in cooling. The most common of these, perhaps, was casting the wheel with the hub in sections, in order that the sections might accommodate themselves to the contraction of the plate. But this was expensive. It required the open space between the sections to be filled up with other metal, and generally it required the hub to be hooped. It is unnecessary, however, to describe these devices. It does not appear that in any of them the idea existed of making a car-wheel with chilled tread, straight plates and solid hub, *annealed* and cooled so as to leave it uninjured by the strain attendant upon the unequal cooling of the thick and thin parts. Annealing some kinds of castings was known and practiced before 1847. This is abundantly proved by the witnesses, and various modes of annealing plain castings had been described by scientific writers both in this country and abroad before that time.

But there is no evidence that we have been able to discover that cast-iron car-wheels had ever been subjected to an *annealing* process, in connection with slow cooling, before the process was discovered or invented by Whitney. In all the experiments made for annealing other castings the object sought was different, and in them all, as well as in the process described in the publications given in evidence, the effect upon the annealed metal or glass was not to leave them in the condition in which it was sought to bring car-wheels, with the crystallization or chill of the periphery unimpaired, and the plate or thin part unaffected by strain. Cast-iron railroad wheels are castings of a peculiar kind. The methods of slow cooling, or of annealing and slow cooling, which were applied to other castings before 1847, were not adapted to their peculiarities or to what they needed. They are not homogeneous throughout. They are of different thickness in their several parts, and hardened at the tread, while the plate and hub are not crystallized, but are soft and tough. These different qualities of the different parts it is necessary to preserve, and what

was needed when Whitney's invention was made, was to preserve them, and at the same time relieve against any strain, caused by unequal cooling, which might impair the strength of the wheel.

§ 5036. *No. 5531, April 25, 1848, granted A. Whitney, for "an improvement in the process of manufacturing cast-iron railroad wheels," was for a process, not for a combination, and a new result was obtained by his method.*

If now we proceed to inquire what Whitney's alleged invention was, as described in his specification and claim, it will be seen that it was a process, not to make a car-wheel, or to destroy any of the advantages which had already been secured, but to add another. Its avowed object was to obtain a new value, or rather exemption from imperfection. It was to remedy the evil of strain resulting from the more rapid cooling of one part of the wheel than the cooling of the other parts. And this was sought to be accomplished by a process that insured the cooling of all parts, both the thick and the thin, with equal slowness. The process consists of several parts. The first is taking the wheels from the moulds after the melted iron has been run into the moulds, before they become so much cooled as to produce strain on any part sufficient to impair their ultimate strength. The second is placing the wheels, immediately after their removal, in a furnace or chamber previously heated to about the temperature of the wheels when taken from the moulds, the heat in the furnace being subject to control. The third is applying heat until the temperature of all parts of the wheels shall again be raised to the same point (indefinitely said to be a little below that at which fusion commences). The fourth and last stage in the process is allowing the wheels, after they have been thus reheated, to cool so fast as, and no faster than, is necessary for every part of each wheel to cool and shrink simultaneously together, and no one part before another.

It is therefore a patent for a process, not for a combination. Neither as a whole or in parts can it be considered without reference to the ultimate object in view, which was to retard cooling by a second application of heat supplied until all parts of the wheel are raised to the same temperature, and then permit the heat to subside so gradually that the cooling of the parts shall not only commence at the same point of temperature, higher than that where hurtful strain begins, but shall continue equable till all artificial heat ceases. The removal from the moulds to the furnace or chamber, the removal at the time described, before the incipient strain has become permanently hurtful, and to a place where more heat may be applied, and where the heat can be under control, are parts of the process to secure equable cooling during the time when cooling without such appliances is likely to produce strain and consequent weakness. It is apparent that this is more than a process for *annealing*. That is included, it is true, but it is only a small part. It is applying foreign heat to a hot chilled wheel, at the point of time when it has reached a particular stage of cooling, by means of such foreign heat bringing the whole casting up to a higher and uniform temperature, and maintaining an equable abatement of heat in a furnace or chamber under the control of the operator. We have sought in vain through the proofs submitted in this case for any satisfactory evidence that this process was known before 1847, when Whitney commenced it, or that anything equivalent to the process was known. Certainly nothing of the kind had ever been applied to cast-iron railroad wheels, and, as we have seen, they are castings of a peculiar character, not admitting of the treatment that may be applied to other castings. What they needed was (what was sub-

stantially described by one of the witnesses), the discovery of the fact that the chilled cast-iron, constituting one part of the wheel, could be subjected to heat less than that which would cause fusion, without producing any material effect upon its hardness, while the cooling of other parts of the wheel could be so prolonged by applying that heat externally, as to enable all parts to cool without being subjected to the strain attendant on unequal contraction, and, in addition to the discovery, they needed the invention of a process by which it could be practically carried out. Such a discovery and such a process were needed for no other castings.

The novelty of the patentee's invention is not therefore disproved by evidence that glass, or speculum metal, or even other iron castings, had been annealed and slow-cooled, prior to the time when it was made. Of this there is very considerable evidence both in the testimony of witnesses and printed publications. The specification disclaims invention of annealing iron castings done in the ordinary mode. It claims annealing when applied to cast-iron railroad wheels, in the mode or by the process described. It is not, therefore, merely an old contrivance or process applied to a new object, a case of double use. A new and previously unknown result is obtained, namely, the relief of the plate of the wheels from inherent strain without impairing the chilled tread, a result which, though anxiously sought, had not been obtained before Whitney's invention. We are therefore of opinion that the defense set up, that the patent was void for want of novelty of invention, is unsustainable.

§ 5037. *Although the chill which has been obtained upon an iron casting will be destroyed at a heat greatly below the point of fusion, but is not affected by the degree of heat at which one part fails to exert an injurious strain upon other parts in consequence of their different thickness and cooling unequally, yet a patent for a process for annealing cast-iron car-wheels by heating them to the latter degree, among other things, is not void for uncertainty in the description of the process because the specification contains a direction that the temperature of the casting "be raised to the same point (say a little below that at which fusion commences)," since those experienced in these matters know that a chill is indispensable in a car-wheel, and the object of the process will be attained with a heat much below that which would destroy the chill. Neither is the patent void for want of utility.*

The validity of the invention is next assailed for the reason that the process described in it, and claimed, is denied to be useful, because it would destroy the hardness of the rim, or tread of the car-wheel known as the chill, and thus greatly detract from the durability and usefulness of the wheels. It is undoubtedly true that a chilled periphery or tread is essential to the usefulness of a car-wheel. Indeed, the evidence is that, whenever car-wheels are spoken of, wheels with chilled tread are meant, and any process which destroys the chill must render them valueless for the purposes for which they are needed.

It is also true that the fusing point of cast-iron is in the neighborhood of two thousand seven hundred and eighty-six degrees of Fahrenheit, twelve or fifteen hundred degrees above the point at which, according to the evidence, the chill of the tread of a car-wheel would be destroyed. If, therefore, the process patented to Whitney requires, after the removal of the wheel to the heated furnace or chamber, the application of a degree of heat closely approximating the point of fusion, it must be conceded that, instead of being beneficial, it is positively hurtful. And this is what is contended by the appellant. The objection seems to be aimed at the sufficiency of the description

of the patentee's invention, which it is abundantly proved he practiced successfully through many years, rather than at its utility. Whitney conceived a process and practiced it. That process may have been a highly useful invention, and therefore patentable, and yet he may have failed so to describe it as to teach the public how to practice it.

§ 5038. *A specification for a process should not mislead those skilled in the art, but may leave something for their skill to supply in applying it, and it may be sufficient, although those who are inexperienced may not be able to understand it.*

The law requires every inventor, before he can receive a patent, to furnish a specification or a written description of his invention or discovery, and of the manner and process of making, constructing, using and compounding the same, in such full, clear and exact terms, avoiding unnecessary prolixity, as to enable any person skilled in the art or science to which it appertains, or with which it is most nearly connected, to make, construct, compound and use the same. The specification, then, is to be addressed to those skilled in the art, and is to be comprehensible by them. It may be sufficient, though the unskilled may not be able to gather from it how to use the invention. And it is evident that the definiteness of a specification must vary with the nature of its subject. Addressed as it is to those skilled in the art, it may leave something to their skill in applying the invention, but it should not mislead them. The objection here is that, in describing the degree of heat to be applied after the wheels have been deposited in the heated chamber, the patentee states it to be such that the temperature of all parts of the wheels "may be raised to the same point (say a little below that at which fusion commences)," and the defendant insists that this amounts to a direction to raise the heat to a degree that must destroy the chill of the tread, and thus render the casting valueless as a railroad car-wheel. But it is obvious that only vague and uncertain directions could have been given respecting the extent to which the heat is necessary to be raised. It must differ with the difference in the progress of cooling which has taken place before the wheels are removed from the moulds. The process requires this removal before they have become so much cooled as to produce such inherent strain on any part as to impair its ultimate strength. Precisely when such a strain begins cannot be known. Cooling commences the instant the casting is made, and with cooling commences contraction, and strain must soon follow. Plainly it is impossible to describe the point of time when the strain has proceeded so far as to impair the ultimate strength of any part of the wheel. That, in the nature of things, must be left to the judgment of the operator. But before that time the strain may be checked, and this is what is contemplated by raising the temperature of all parts of the wheel to the same point or degree. The moment that is done the strain ceases, and the primary object of the patentee's process is accomplished. The state of things is reproduced which existed before the contraction and attendant strain began, when the slow cooling is allowed to follow in an atmosphere so heated and regulated that each part of the wheel loses its heat at an equal pace with all others.

§ 5039. *Specifications in an application for letters patent, though vague or indefinite, should be read with reference to the object they have in view; and should experts then be able to discover what is intended, the same will be sufficient in law.*

Now, any one skilled in making cast-iron railroad car-wheels in view of this

specification must see that the object of the process is to relieve from and guard against hurtful strain, without destroying the chill, and that heat is applied only for that purpose. It requires no particular science or skill to enable an operator to perceive that the moment all parts of the wheel are raised from a point above where serious strain begins, and where yet the thick and thin parts are in different stages of cooling, to a stage where the degree of temperature of all parts is the same, and above the degree where serious strain commenced, the thing sought has been attained. Then the avowed purpose of the inventor has been accomplished. It would be most unreasonable to read the directions of the specification without reference to the object which they profess to have in view. The evidence is that the chill is formed while the casting is in the mould, and that the hurtful strains commence after the formation of the chill. Indeed, it is manifest there can be no strain until the chill is complete. It must be, therefore, that all the heat which is needed to relieve from the strain is that which suffices to raise the temperature of the thin part, or plate, to the degree at which the strain commenced — a lower temperature than that which existed when the chill was formed. Hence an operator, in following the directions of the specification, would be taught by his practical knowledge that the instant all parts of the wheel had been heated to that temperature no more heat was needed.

And we do not think it a fair construction of the patentee's language to hold that it requires the heat to be raised in all cases to a degree only a little below the point of fusion. He does not attempt to give any more definite direction than that all parts of the wheel must be raised to the same temperature, suggesting in a parenthesis ("say, a little below that at which fusion commences"). He fixes a *maximum*. The heat must not reach the point of fusion; and the prescribed *minimum* is that degree where the heat of the different parts of the wheel is equal. Within those limits the degree is left to the judgment of the operator, and within those limits it is clear from the evidence that the process may be applied without injury to the chill. The proof is that it has been successfully applied in the manufacture of a vast number of wheels, and that failure has been very rare.

There are some witnesses who have testified that the Whitney process, as they understand it, would destroy the chill of the wheel. But they explain their understanding to be that the wheels are to be reheated to a degree far beyond what is required to relieve from strain, and thus heated for no purpose. They keep in sight the *maximum* limit, and approach near to that, overlooking entirely the *minimum*, and disregarding the single object of the process, namely, relief of the plate, or thin part of the wheel, from the strain caused by unequal contraction. We are, therefore, of opinion that the patent is not void for want of utility, and that the specification sufficiently describes the process invented and claimed.

§ 5040. *To take car-wheel castings from the mould as soon as they are cool enough to allow their removal, and place them in a pit surrounded with charcoal, where they are heated by the charcoal taking fire, and then cooled very slowly, is an infringement of a patent for taking such castings from the mould at the same stage and heating them in a furnace, where they are then slowly cooled, both processes being intended to effect the same purpose.*

The remaining defense is a denial that the process conducted by the defendant is an infringement of Whitney's patent. What the process of the defendant was is clearly set out in a patent which he obtained on the 7th of May, 1861.

It consists in placing in a pit the wheels as they are turned out of the moulds red hot, with a layer of charcoal beneath the lowest wheel, and a layer between each wheel as well as above the uppermost, and covering the pit with a perforated metal plate. The charcoal is ignited by the hot wheels, and just sufficient air is admitted to effect combustion of the coal. Thus the wheels are reheated and permitted gradually to cool. There are some minor details which it is unnecessary to mention. So far as relates to reheating the wheels and retarding the cooling by the application of additional heat, it is obvious that the process is substantially the same as that covered by the complainant's patent. The object is the same, and the mode of attaining it is in substance the same. The purpose of the charcoal interlaid with the wheels is avowed to be to heat them in the pit to a proper temperature, prolonging the heat and permitting them to cool gradually in a given time, said to be seventy-two hours, more or less, as may be found necessary for the annealing operation. The rapidity of combustion of the charcoal is regulated by a damper in the flue. And this process is followed, as the specification explains, that the different parts of the wheels may adjust themselves to each other, and accommodate the unequal contraction which results from the process of chilling. It is under this patent, and in accordance with its directions, that the defendant has prepared his car-wheels for market. As the object of the patentees is the same, relief from the strain incident to unequal contraction, the only inquiry is whether the object is attained by substantially the same means.

The idea of Whitney was undoubtedly arresting contraction before any remediless strain had commenced, and regulating the progress of cooling so that all parts of the wheel may maintain an equal temperature at all stages of cooling. Manifestly the process of the defendant embodied the same idea, and carried it out by means identical in principle. It reheats the wheels when removed from the moulds to the chamber or pit. It prolongs the cooling in connection with the reheating, and it subjects the rapidity of cooling to control of the operator. The form or structure of the furnace, chamber or pit is not claimed by either patentee.

It hardly seems necessary to resort to the opinions of experts in order to reach the conclusion that the process of the defendant is only formally different from that of Whitney, while the essential element of the two processes is the same. But the testimony of the experts examined, taken as a whole, clearly supports such a conclusion. It is true some of the witnesses testify that in their opinion the processes are different, but when they attempt to describe the difference they point out only matters which are merely formal, only variances in the mode of using the same process. On the other hand, several witnesses, entirely competent to apprehend the principle of the invention, and the devices for practically using it, have testified that the processes of the defendant and of the complainant are substantially the same in principle, mode of operation, and in the effect produced. We must, therefore, conclude that the charge of infringement made in the bill has been sustained, and that the complainant was entitled to a decree for an injunction and an account.

We come next to the consideration of the account stated by the master and confirmed by the circuit court. The master reported that Mowry, the defendant, used Whitney's process in the manufacture of nineteen thousand eight hundred and nineteen wheels, and the account has been stated on that basis.

For the use of the process in making these wheels the defendant has been charged with \$91,501.86 as profits made by him (more than \$4.60 on each wheel), besides \$19,984.21 interest upon such profits to the 1st day of August, 1868, and the further sum of \$10,980.22, being interest from August 1, 1868, to August 1, 1870.

It is very obvious, in view of what the patentee himself stated, under oath, in 1862, when applying for an extension of his patent, that the account has been erroneously stated. If he was correct in this statement the profits arising from the use of his patent in manufacturing nineteen thousand eight hundred and nineteen wheels (valuing iron at the price proved to have been paid for it by the defendant) must have been less than \$5,500, instead of over \$91,000, decreed in the circuit court — about thirty cents per wheel, instead of \$4.60. It is not an unfair presumption that if the profit to the patentee was no greater than he claimed it was, it could not have been more when the invention was used by an infringer.

§ 5041. *Accounting for infringement of a process.*

Now, it is clear that Whitney is not entitled to receive more than the profits actually made in consequence of the use of his process in the manufacture of the nineteen thousand eight hundred and nineteen wheels. It is the additional advantage the defendant derived from the process — advantage beyond what he had without it — for which he must account. But he has been held liable far above this. The master reported, in the first instance, the difference between the cost of the wheels and the price for which they were sold as the profits realized by Mowry, thus charging him the profit obtained from the entire wheel, instead of that resulting from the use of Whitney's invention in a part of the manufacture; and this, though he found at the same time and reported that Mowry had built up his business before he commenced the use of Whitney's process; that the use of the process did not diminish the cost of making wheels, but increased it; that while he used the process he used the same quality of iron that he had used before, and made no difference in the weight or form of the wheels, or in their price, and that the wheels made by him before he commenced the use of Whitney's invention, and since he has abandoned it, have sold as readily and at the same prices as those manufactured by that process.

Exception was taken to the charge of the profit made by the entire manufacture of the wheel, including not only the selection and mixing of the iron, but its melting, pouring into moulds, forming the chill, removing from the moulds, and cleaning, as well as annealing and slow cooling; and the case was again sent to the master with instructions to inquire: *First*. Whether the wheels made and sold by the defendant had or could have been made to have any market value without being subjected to the process patented to Whitney; and, *Second*. If they had or could have been made to have such value by any annealing or slow-cooling process, outside of the Whitney patent, how much additional value, if any, they derived from being subjected to that patented process.

Upon the findings made by the master on this order, the court decreed against the defendant the entire profits made by him in the manufacture and sale of the wheels from beginning to end, not only the profits resulting from the reheating and regulated slow cooling in connection, but also those which may have resulted from mixing and melting the iron, casting in moulds, mak-

ing the chill, and from the possible advance on the iron above its cost, with interest on the whole. This we think was an error. The findings of the master justified no such decree. It must be conceded that the findings are incomplete, obscure, and in some particulars incongruous, but it is not a legitimate construction of them taken together, that the benefit which the defendant derived from the use of the complainant's invention was equal to the aggregate of profits he obtained from the manufacture and sale of the wheels as entreties, after they had been completed.

§ 5042. *It is as true of a process invented as an improvement in a manufacture, as it is of an improvement in a machine, that an infringer is not liable to the extent of his entire profits in the manufacture.*

It is as true of a process invented as an improvement in a manufacture, as it is of an improvement in a machine, that an infringer is not liable to the extent of his entire profits in the manufacture. *Jones v. Morehead*, 1 Wall., 155; *Seymour v. McCormick*, 16 How., 480. If the wheels made by the defendant would have had no market value above that of cast-iron if they had not been annealed and slow cooled, the same may be said if they had been cast without a chill. The same principle, therefore, which gives to the complainants the aggregate profits of the entire manufacture would give the same profits to a patentee of the process of chilling, if there were one, and as there are many processes in the manufacture, for each of which it is conceivable there might be a patent, and as every one of the processes is necessary to make a marketable wheel, an infringer might be mulcted in several times the profits he had made from the whole manufacture. We cannot assent to such a rule.

§ 5043. *An infringer is responsible only for the profits arising from the benefit derived from the use of the patentee's process over that arising from other processes open to the public.*

The question to be determined in this case is, what advantage did the defendant derive from using the complainant's invention over what he had in using other processes then open to the public and adequate to enable him to obtain an equally beneficial result. The fruits of that advantage are his profits. They are all the benefits he derived from the existence of the Whitney invention. It is found that there were other processes by which the inherent strain caused by unequal cooling could be and was prevented, counteracting which strain was the sole object of the complainant's invention, and a car-wheel could be prepared for similar service, valuable in the market, and salable at a price not less than was obtained for those which the defendant manufactured. The inquiry then is, what was the advantage in cost, in skill required, in convenience of operation, or marketability, in bringing car-wheels by Whitney's process from the condition in which they are when taken hot from the moulds to a perfected state, over bringing them to the same state by those other processes, and thus rendering them equally fit for the same service? That advantage is the measure of profits. It is quite unimportant what name was given to the products of the processes, whether one could be called annealed wheels and the other could not, except so far as affected their marketability.

The record shows that the court overruled the alternative finding of the master, that if there is no infringement of the complainant's patent unless the wheels are subjected to the process of reheating — that is to say, if the process of slow cooling used in connection with reheating is old, and not a part of the complainant's invention, no part of the profit derived by the defendant

from the manufacture and sale of the wheels was due to the use by him of that invention.

§ 5044. *A patentee of a process, the result of two or more constituents, some not being patented by him, cannot claim the exclusive use of the latter used singly.*

One exception taken to this finding was that not only the entire process described in the patent, but each part of such entire process, was the invention of the complainant, and the use of any material, substantial and essential part of such entire process, the slow cooling being a substantial and material part, whereby only an improved chilled cast-iron railroad wheel could be made, and beneficial effects the same in kind if not in degree attained, that were attained by the complainant's entire process, is an infringement of complainant's patent, and the profits derived from the use of such material, substantial and essential part should be accounted for in this case. This exception the court sustained, and thereby held that the defendant is chargeable with the profits he derived from slow cooling alone. We cannot assent to this. The patent is for an entire process, made up of several constituents. The patentee does not claim to have been the inventor of the constituents. The exclusive use of them singly is not secured to him. What is secured is their use when arranged in the process. Unless one of them is employed in making up the process, and as an element of it, the patentee cannot prevent others from using it. As well might the patentee of a machine, every part of which is an old and known device, appropriate the exclusive use of each device, though employed singly, and not combined with the others as a machine. The defendant was not, therefore, responsible for slow cooling alone, or for the profits he derived from it. He was liable to account for such profits only when he used slow cooling in connection with reheating in the manner described in Whitney's claim substantially, or when extraneous heat was employed to retard the progress of cooling. We have said that slow cooling is not claimed in the specification as the invention of the patentee. And it is found by the master that there are other modes of slow cooling, and even other modes of relieving against the inherent strain caused by unretarded cooling, than that practiced by the complainant and claimed by him. Though, therefore, slow cooling is an essential part of the complainant's process, it is an equally essential part of other processes which the defendant was at liberty to use in preparing his car-wheels for market.

§ 5045. *Where infringement is not wanton, interest on the profits, called more truthfully unliquidated damages, recoverable against the infringer, will not be given.*

We add only that in our opinion the defendant should not have been charged with interest before the final decree. The profits which are recoverable against an infringer of a patent are in fact a compensation for the injury the patentee has sustained from the invasion of his right. They are the measure of his damages. Though called profits, they are really damages, and unliquidated until the decree is made. Interest is not generally allowable upon unliquidated damages. We will not say that in no possible case can interest be allowed. It is enough that the case in hand does not justify such an allowance. The defendant manufactured the wheels of which the complaint is made under a patent granted to him in 1861. His infringement of the complainant's patent was not wanton. He had before him the judgment of the patent office that his process was not an invasion of the patent granted to the

complainant, and though this does not protect him against responsibility for damages, it ought to relieve him from liability to interest on profits.

Decree reversed, and the cause remanded with instructions to proceed in accordance with the rules laid down in this opinion.

TILGHMAN *v.* PROCTOR.

(12 Otto, 707-735. 1880.)

APPEAL from U. S. Circuit Court, Southern District of Ohio.

Opinion by MR. JUSTICE BRADLEY.

STATEMENT OF FACTS.—This case involves a consideration of the same patent which was the subject of litigation in the case of *Mitchell v. Tilghman*, reported in 19 Wallace, 287. The evidence in the present case, which is quite an unwieldy mass, is much the same as in that, being supplemented, however, by the testimony of the patentee respecting the nature of his original experiments and the practicability of using profitably the coil apparatus described in the patent, together with certain exhibits relating to the novelty of the alleged invention. Upon the renewed consideration which has been given to the subject, the court is unanimously of opinion, contrary to the decision in the *Mitchell* case, that the patent of Tilghman must be sustained as a patent for a process, and not merely for the particular mode of applying and using the process pointed out in the specification, and that the defendants have infringed it by the processes used by them.

The patent in question relates to the treatment of fats and oils, and is for a process of separating their component parts so as to render them better adapted to the uses of the arts. It was discovered by Chevreul, an eminent French chemist, as early as 1813, that ordinary fat, tallow and oil are regular chemical compounds, consisting of a base which has been termed glycerine, and of different acids, termed generally fat acids, but specifically stearic, margaric and oleic acids. These acids, in combination severally with glycerine, form stearine, margarine and oleine. They are found in different proportions in the various neutral fats and oils; stearine predominating in some, margarine in others, and oleine in others. When separated from their base (glycerine) they take up an equivalent of water, and are called free fat acids. In this state they are in a condition for being utilized in the arts. The stearic and margaric acids form a whitish, semi-transparent, hard substance, resembling spermaceti, which is manufactured into candles. They are separated from the oleic acid, which is a thin, oily fluid, by hydrostatic or other powerful pressure, the oleine being used for manufacturing soap and other purposes. The base, glycerine, when purified, has come to be quite a desirable article for many uses.

The complainant's patent is dated the 3d day of October, 1854, and relates back to the 9th day of January of that year, being the date of an English patent granted to the patentee for the same invention. It has but a single claim, the words of which are as follows: "Having now described the nature of my said invention, and the manner of performing the same, I hereby declare that I claim, as of my invention, the manufacturing of fat acids and glycerine from fatty bodies by the action of water at a high temperature and pressure."

In the case of *Mitchell*, the majority of the court was of opinion that in the application of the process thus claimed, the patentee was confined to the

method of using the process particularly pointed out in the specification, and as, by that, it was proposed to produce a very rapid separation of the fatty elements by the use of a high degree of heat, the operation being effected in the space of ten minutes by forcing the fat, mixed with water, through a long coil of strong iron tube passing through an oven or furnace where it was subjected to a temperature equal to that of melting lead, or six hundred and twelve degrees Fahrenheit; it was concluded by the court that the producing of the same result in a boiler subjected to only four hundred degrees Fahrenheit, and requiring a period of several hours to effect the desired separation, was not an infringement of the patent, although the process by which the effect was produced — namely, the action of water, in intimate mixture with the fat, at a high temperature and under a sufficient pressure to prevent the formation of steam — was undoubtedly the same. On further reflection, we are of opinion that, in the case referred to, sufficient consideration was not given to the fact that the patent is for a process, and not for any specific mechanism for carrying such process into effect.

§ 5046. *History of the art.*

In order to have a clearer understanding of the question, it is necessary to advert briefly to the history of the art, and then to examine the terms of the patent in greater detail. It is conceded by the complainant that two different processes for effecting a decomposition of fats into their component elements had been in practical operation prior to his invention. These processes were called respectively the alkaline saponification process, and the sulphuric-acid distillation process. The first consisted of the manufacture of the fat into soap by the use of lime or other alkali; and then, of the decomposition of the soap so produced, into the fat acids by the aid of hydrochloric or dilute sulphuric acid. The decomposition of the soap was, by a subsequent improvement, effected by distillation in an atmosphere of steam. The other process, called the sulphuric-acid distillation process, consisted of the direct saponification of fat by means of concentrated sulphuric acid, and the subsequent distillation over of the resulting fatty acids. By this process, however, the glycerine was destroyed.

The first of these processes was patented by Gay Lussac and Chevreul in 1825, but was not brought into successful operation in the manufacture of stearic candles, until improved by De Milly in 1831. The second process was proposed and developed between 1840 and 1850. It was extensively used during and after that period by the large manufacturing firm of E. Price & Co., of London, and their successors, Price's Patent Candle Company. Mr. G. F. Wilson, one of the shareholders in that establishment, and apparently a man of accurate knowledge on this subject, read various papers illustrative of the history of the manufacture before learned societies in England, extracts from which are contained in the record, and throw considerable light on the matter. It appears from his statements that the distillation of the saponified fat, whether saponified by an alkali or by sulphuric acid, was often accompanied by prejudicial effects from the access of atmospheric air to the contents of the still. To remedy this, he and his associates adopted and patented the introduction of superheated steam into the still or vat containing the fat acids, which excluded atmospheric air, and carried over the fatty vapors into the receiver in a more perfect condition than they had before been able to obtain them. These patents were taken out in 1843. In the following year, the same parties, Gwynne and Wilson, found what Dubrunfaut had found two or

three years before, that palm-oil, which is very fusible and manageable, can be distilled in its crude state, in the manner last described, that is, by the introduction of steam into the still, without the intervention of saponification; and the distilled product being then steam-boiled in water, acidulated with sulphuric acid, and the water allowed to settle and separate, the resulting substance would be a fat acid. It is not shown that this process was ever carried into successful operation prior to Tilghman's patent; and judging from what was done by the Price Patent Candle Company in the way of improvement immediately after becoming acquainted with Tilghman's process, it is to be inferred that the steam-distillation process (without saponification) was still an unsuccessful experiment when his patent was issued. This experiment, however, must be regarded as the nearest approach to the process of Tilghman of anything done in the art prior to it.

§ 5047. *Where a product was accidentally made, and the process by which it was formed never fully understood, and no hint was derived therefrom as to a practical process for the formation of the same product, it was not regarded as an anticipation of the patented process.*

We do not regard the accidental formation of fat acid in Perkins' steam cylinder from the tallow introduced to lubricate the piston (if the scum which rose on the water issuing from the ejection pipe was fat acid) as of any consequence in this inquiry. What the process was by which it was generated or formed was never fully understood. Those engaged in the art of making candles, or in any other art in which fat acids are desirable, certainly never derived the least hint from this accidental phenomenon in regard to any practicable process for manufacturing such acids.

The accidental effects produced in Daniell's water barometer and in Walther's process for purifying fats and oils preparatory to soap-making, are of the same character. They revealed no process for the manufacture of fat acids. If the acids were accidentally and unwittingly produced, whilst the operators were in pursuit of other and different results, without exciting attention and without its even being known what was done, or how it had been done, it would be absurd to say that this was an anticipation of Tilghman's discovery.

Nor do we regard the patent of Manicler, which was taken out in 1826, as anticipating the process of Tilghman. It is true that he directs a mixture of fat with about one-quarter of its weight of water to be placed in a boiler, and subjected to a heat sufficient to create a pressure equal to one atmosphere above the natural atmospheric pressure (or about two hundred and fifty degrees Fahrenheit); the boiler being provided with a safety-valve which would secure that degree of pressure. But, subject to this pressure, the patent directed that the mixture should be made to boil, and of course that the water should be converted into steam; the words are, "Apply fire to this digester to melt and digest the contained tallow or fat and water, and keep up a rapid ebullition during about six hours." It is probable, therefore, that any decomposition of the fat which may have been produced by this process was due to the steam formed and passing through the fat, as no means appears to have been adopted for keeping up the mixture of the fat and water. But we have no evidence that the process was ever successful in practice. One of the defendants' witnesses testifies that he tried it, and though he got some results, he adds this pregnant observation: "To transform all the fat in this way at so low a temperature would have required many days." He only pretends

that the sample which he obtained showed by its appearance, as well as by its acid action, that the separation had commenced. Evidently, therefore, this was but an abandoned experiment, since we never hear any more of it from 1826 down to the trial of this cause.

It is unnecessary to examine in detail other alleged anticipations of Tilghman's process. We believe that we have specified the most prominent and reliable instances. Tilghman's discovery was made in 1853, and was in brief this: "That the fat acids can be separated from glycerine, without injury to the latter, by the single and simple process of subjecting the neutral fat, whilst in intimate mixture with water, to a high degree of heat under sufficient pressure to prevent the water from being converted into steam, without the employment of any alkali or sulphuric acid, or other saponifying agent; the operation, even with the most solid fats, being capable of completion in a very few minutes when the heat applied is equal to that of melting lead, or six hundred and twelve degrees Fahrenheit; but requiring several hours when it is as low as three hundred and fifty or four hundred degrees Fahrenheit. The only conditions are, a constant and intimate commixture of the fat with the water, a high degree of heat, and a pressure sufficiently powerful to resist the conversion of the water into steam. The result is, a decomposition of the fatty body into its elements of glycerine and fat acids, each element taking up the requisite equivalent of water essential to its separate existence, and the glycerine in solution separating itself from the fat acids by settling to the bottom when the mixed products are allowed to stand and cool. In this process a chemical change takes place in the fat in consequence of the presence of the water and the active influence of the heat and pressure upon the mixture.

We are satisfied that Tilghman was the original discoverer of this process. His priority was acknowledged at the time by those most interested to question it. Mr. Wilson, to whose statements reference has been made, and who is perhaps more justly entitled than any one else to claim an anticipation of Tilghman's discovery, makes no such pretension, but, on the contrary, concedes Tilghman's right to priority; and, indeed, Price's Patent Candle Company, of which Mr. Wilson was a member and director, took a license under Tilghman's English patent.

As having some bearing upon the proper construction of the patent in suit (which will presently be more particularly examined), it is proper to observe that Tilghman's actual invention, as demonstrated in his experiments made in 1853, before making any application for a patent, was not confined to the use of a coil of pipe in a heated chamber or furnace for effecting the process which he claims, but was frequently exhibited by using a simple digester, filled nearly full with a mixture of fat and water, and heated in a gas stove, or in a vertical position over a gas lamp; the mixture of fat with the water being kept up by a loose metallic rod or jumper, which thoroughly mixed the contents when the digester was shaken. Sometimes the digester was heated in a horizontal position, and, being provided with thin copper partitions fixed inside, was made to revolve in order to cause a more perfect mixture of the materials. In using the digester, it not being provided with a safety-valve, a small space was left at the top for the formation of sufficient steam to prevent, by its elasticity, the vessel from exploding.

In making these experiments Tilghman not only varied the apparatus, but applied different degrees of heat in the operation. The following is his account of some of these proceedings. He says: "Before applying for my pat-

ent I had made many experiments in decomposing by water at temperatures below melting bismuth, sometimes in the coil form of apparatus, but most frequently in digesters. The lowest temperature tried by me was three hundred and fifty degrees Fahrenheit (350° F.), or one hundred and twenty pounds pressure continued for four hours. The digester was as usual in a vertical position, but the heat was in this case given by an oil-bath. I obtained both fat acids and glycerine in this experiment, but in such small quantities as to prove that though the decomposition did go on at that heat, yet it was very slow compared with the higher heats. I find notes of another experiment, July 15, 1854, in the coil apparatus, with palm-oil, made at the melting point of tin, four hundred and forty degrees Fahrenheit, three hundred and sixty pounds pressure. It was pumped through the coil very slowly, so as to give about thirty minutes' heat, and found to be partly decomposed, so that it was returned to the inlet end of the apparatus and pumped through a second time at the same rate and heat, which produced perfect decomposition of the palm-oil into fat acids and solution of glycerine. Ten minutes' exposure would have perfectly decomposed palm-oil at the heat of melting bismuth, five hundred and ten degrees Fahrenheit. Yet I found seventy degrees lower heat required six times as long to produce the same effect. I had often decomposed tallow at five hundred and ten degrees Fahrenheit before taking out my patent, not in the coil apparatus, but in the simple vertical digester. In this case I had to allow increased time on account of the imperfect contact of the fat and water in addition to that required by the diminished temperature."

In the course of his testimony, Tilghman explains why, in his patent, he specially recommended the use of the high temperature of melting lead in applying his process to practical use. He says: "Many experiments had shown me that at these higher temperatures the decomposition was carried on with the greatest economy of fuel and cost of apparatus. When in London in 1847, I had found Perkins' house-warming apparatus, consisting of coils of hundreds of feet of pipe, containing water at the temperature of melting lead, had long been in extensive domestic use there. On returning to London in 1853, I found the same apparatus largely used for heating bakers' ovens. As I thus found such heats and pressures were perfectly practical and safe, as well as economical, I thought I was bound to describe my invention in what I then believed to be the best mode of carrying it out, and that, as I was the discoverer of the chemical fats, I could then claim broadly as my process the use of water highly heated and under pressure to decompose fats, no matter what temperature or apparatus was used."

And being asked for his present view as to the practicability, economy and safety of the higher temperatures as compared with lower temperatures, he said: "I think the high pressure apparatus is much more economical, both in the first cost and in the expense of working. Its principal disadvantage is that ordinary engineers are not familiar with its management, and consequently dislike it."

In December, 1853, Tilghman, having completed his experiments to his own satisfaction, filed a caveat in the patent office preparatory to taking out a patent for his invention. In this caveat he says: "The invention consists in subjecting animal and vegetable fatty and oily substances containing glycerine to a high temperature and pressure in close vessels, mixed with different agents, according to the effect desired to be produced upon the fatty matter. Thus, when I wish to convert the neutral fatty substances into fatty acids and

glycerine, I pump a mixture of the fat and water, under great pressure, through a series of strong metal tubes, kept at about the heat of melting lead, and provided with a cooling-worm and safety-valve at its outlet. The neutral fatty substance is decomposed by the process, and the fat acid and solution of glycerine which issue through the safety-valve separate by settling."

Tilghman soon after repaired to England and took out a patent there, dated the 9th day of January, 1854, and sealed the 25th of March. He immediately put in operation an apparatus for exhibiting his process on a small scale. Mr. Wilson, before mentioned, witnessed his experiments, and thus speaks of them in a paper communicated to the Journal of the Society of Arts, January 25, 1856:

"In January, 1854, Mr. Tilghman, an American chemist, who has studied all that has been published here and in France on the subject of acidification and distillation of fatty bodies, obtained a patent for exposing fats and oils to the action of water at a high temperature and under great pressure, in order to cause the combination of the water with the elements of the neutral fats, so as to produce at the same time free fat acids and solution of glycerine. He proposed to effect this by pumping a mixture of fat and water, by means of a force pump, through a coil of pipe heated to about six hundred and twelve degrees Fahrenheit, kept under a pressure of about two thousand pounds to the square inch; and he states that the vessel must be closed, so that the requisite amount of pressure may be applied to prevent the conversion of water into steam. This is, all must admit, a beautiful, original, chemical idea, well carried out; it has yet to prove how far it can compete successfully with distillation. We have made an arrangement with Mr. Tilghman which will give us the means of testing its commercial merits."

Mr. Wilson goes on to state that this process of Tilghman suggested to them the idea of distilling fats by passing steam into them at a high temperature whereby to resolve them into glycerine and fat acids. They found the plan successful, and that the glycerine distilled over with the fat acids, but no longer combined with them; and, in July, 1854, they took out a patent for that process. In a paper read before the Glasgow meeting of the British Association for the Advancement of Science, in September, 1855, Mr. Wilson thus refers to the course of discovery which took place in this branch of manufacture:

"By our first improvement in separating the fat acids from neutral fats, the glycerine was decomposed by the direct action of concentrated sulphuric acid at a high temperature, and all that remained of it was a charred precipitate. A new process for decomposing neutral fats by water under great pressure coming under our notice" [referring to Tilghman's process] "led us to look again more closely into our old distilling processes, and the doing this showed, what we had often been on the brink of discovering, that glycerine might be distilled."

"In our new process the only chemical agents employed for decomposing the neutral fat, and separating its glycerine, are steam and heat; and the only agents used in purifying the glycerine thus obtained are heat and steam; thus all trouble from earthy salts or lead is escaped."

"Distillation, however, purifies the impure glycerine of the old sources."

"On the table is a series of products of palm-oil, which will serve to illustrate the process. Steam, at a temperature of from five hundred and fifty degrees to six hundred degrees Fahrenheit, is introduced in a distillery apparatus

containing a quantity of palm-oil. The fatty acids take up their equivalents of water, and the glycerine takes up its equivalent; they then distil over together. In the receiver the condensed glycerine, from its higher specific gravity, sinks below the fat acids."

We quote more fully from this paper, because it is a contemporary acknowledgment, made by a man who stood in the front rank of those who understood, and whose interest it was to understand, the most advanced process of resolving fats and oils into their component parts, that Tilghman's "process for decomposing neutral fats by water under great pressure" was "a new process;" and who, with his associates, took hints from it for making new departures and improvements in the art. The statements of Mr. Wilson on this subject are corroborated by other witnesses. Indeed, nearly all those competent to speak on the subject state, or admit, that the process of decomposing fats into glycerine and fat acids by mixing them with water, and subjecting the mixture to a high degree of heat under a pressure sufficient to prevent the conversion of the water into steam, was not known in the arts prior to Tilghman's discovery. The testimony of some experts to the contrary is based upon their construction of certain patents and publications produced in evidence, the most important of which have already been adverted to.

The question then arises, Has Tilghman secured the exclusive right to the process of which he was thus the inventor?

§ 5048. *Patent No. 11,766, R. A. Tilghman, October 3, 1854, purifying fat bodies, examined.*

An examination of the patent itself, which the preceding remarks will enable us better to understand, will show, we think, that it was intended to and does cover and secure to the patentee the general process which has been described, although only one particular method of applying and using it is pointed out. The specification describes the invention as follows:

"My invention consists of a process for producing free fat acids and solution of glycerine from those fatty and oily bodies of animal and vegetable origin which contain glycerine as their base. For this purpose, I subject these fatty or oily bodies to the action of water at a high temperature and pressure, so as to cause the elements of those bodies to combine with water, and thereby obtain at the same time free fat acids and solution of glycerine. I mix the fatty body to be operated upon with from a third to a half of its bulk of water, and the mixture may be placed in any convenient vessel in which it can be heated to the melting-point of lead, until the operation is complete. The vessel must be closed and of great strength, so that the requisite amount of pressure may be applied to prevent the conversion of the water into steam.

"The process may be performed more rapidly and also continuously by causing the mixture of fatty matter and water to pass through a tube or continuous channel, heated to the temperature already mentioned; the requisite pressure for preventing the conversion of water into steam being applied during the process; and this, I believe, is the best mode of carrying my invention into effect. In the drawing hereunto annexed are shown figures of an apparatus for performing this process speedily and continuously, but which apparatus I do not intend to claim as any part of my invention."

The specification then goes on to describe, by the aid of the drawing referred to, the particular device mentioned. But it is evident, and, indeed, is expressly announced, that the process claimed does not have reference to this particular device, for the apparatus described was well known, being similar to that used

for producing the hot-blast and for heating water for the purpose of warming houses. It consists of a coil of iron pipe, or other metallic tubing, erected in an oven or furnace, where it can be subjected to a high degree of heat; and through this pipe the mixture (of nearly equal parts of fat and water), made into an emulsion in a separate vessel, by means of a rapidly vibrating piston, or dasher, is impelled by a force-pump in a nearly continuous current, with such regulated velocity as to subject it to the heat of the furnace for a proper length of time to produce the desired result; which time, when the furnace is heated to the temperature of six hundred and twelve degrees Fahrenheit, is only about ten minutes. The fat and water are kept from separating by the vertical position of the tubes, as well as by the constant movement of the current; and are prevented from being converted into steam, by weighting the exit valve by which the product is discharged into the receiving vessel, so that none of it can escape, except as it is expelled by the pulsations produced by the working of the force-pump. Before arriving at the exit valve, the pipe is passed in a second coil, though an exterior vessel filled with water, by which the temperature of the product is reduced. After the product is discharged into the receiving vessel, it is allowed to stand and cool until the glycerine settles to the bottom, and separates itself from the fat acids. The latter are then subjected to washing and hydraulic pressure in the usual way.

After describing this apparatus it is added: "Although the decomposition of the neutral fats by water takes place with great quickness at the proper heat, yet I prefer that the pump should be worked at such a rate, in proportion to the length or capacity of the heating tubes, that the mixture, while flowing through them, should be maintained at the desired temperature for ten minutes before it passes into the refrigerator or cooling part of the apparatus."

It is evident that the passing of the mixture of fat and water through a heated coil of pipe standing in a furnace is only one of several ways in which the process may be applied. The patentee suggests it as what he conceived to be the best way, apparently because the result is produced with great rapidity and completeness. But other forms of apparatus, known and in public use at the time, can as well be employed without changing the process. A common digester or boiler can evidently be so used, provided proper means are employed to keep up the constant admixture of the water and fat, which is a *sine qua non* in the operation. Tilghman himself, as we have seen, often used such digesters in making his experiments before applying for his patent; and, in putting up machinery for his licensees after his patent was obtained, he did the same thing when the parties desired it. Yet surely the identity of the process was not changed by thus changing the form of apparatus. No great amount of invention was required to adapt different forms of well-known apparatus to the application of the process. The principal difficulty would be in providing an internal arrangement in the boiler or digester, for successfully keeping up the intimate commixture of the fat and water. It is evident that this could be accomplished by means of revolving reels armed with buckets, or of a force-pump constantly transferring the heavy stratum of water from the bottom of the mass to the top, aided by horizontal diaphragms partially sectionizing the digester. These devices were resorted to by Tilghman and others, when they used a boiler instead of a coil of pipe.

Whilst Tilghman in his patent recommends the high degree of heat named, he does not confine himself to that. It had been fully developed in his experiments, and was well known to him, that a lower degree of heat could be em-

ployed by taking longer time to perform the operation; and this would be necessary when boilers or digesters of considerable size were used instead of the coil of pipe, on account of the decreasing power of large vessels to resist the internal pressure. The specification, after describing the use of a metallic coil of pipe, proceeds to add:

“The melting-point of lead has been mentioned as the proper heat to be used in this operation, because it has been found to give good results. But the change of fatty matters into fat acid and glycerine takes place with some materials (such as palm-oil) at or below the melting point of bismuth [five hundred and ten-degrees Fahrenheit]; yet the heat has been carried considerably above the melting-point of lead without any apparent injury, and the decomposing action of the water becomes more powerful as the heat is increased. By starting the apparatus at a low heat, and gradually increasing it, the temperature giving products most suitable to the intended application of the fatty body employed can easily be determined.”

Now, when we find it stated, as we do in this specification, that the patentee subjects “fatty or oily bodies to the action of water at a high temperature and pressure, so as to cause the elements of those bodies to combine with water;” that “the mixture may be placed in any convenient vessel in which it can be heated to the melting-point of lead, until the operation is complete;” that “the vessel must be closed and of great strength, so that the requisite amount of pressure may be applied to prevent the conversion of the water into steam;” that “the decomposition of the neutral fats by water takes place with great quickness at the proper heat;” that “the melting-point of lead has been mentioned as the proper heat to be used in this operation, because it has been found to give good results;” that “the change of fatty matters into fat acid and glycerine takes place with some materials at or below the melting-point of bismuth;” that “the decomposing action of water becomes more powerful as the heat is increased;” that “by starting the apparatus at a low heat and gradually increasing it, the temperature giving products most suitable to the intended application of the fatty body employed can easily be determined;” and when we then find that the patentee categorically claims, in general terms, as his invention, “*the manufacturing of fat acids and glycerine from fatty bodies by the action of water at a high temperature and pressure;*” and being satisfied that he was, in fact, the inventor of the general process described and bodied forth in the specification,—how can we, by any fair rule of construction, circumscribe this claim in such a manner as that it shall only cover the process when applied in the use of a coil of pipe heated to six hundred and twelve degrees Fahrenheit? Or, if we allow it to embrace any “convenient vessel,” and do not confine it to a coil of pipe, how can we confine it to a particular degree of heat? What did Tilghman discover? And what did he, in terms, claim by his patent? He discovered that fat can be dissolved into its constituent elements by the use of water alone under a high degree of heat and pressure; and he patented *the process* of “manufacturing fat acids and glycerine from fatty bodies by the action of water at a high temperature and pressure.” Had the process been known and used before, and not been Tilghman’s invention, he could not then have claimed anything more than the particular apparatus described in his patent; but being the inventor of the process, as we are satisfied was the fact, he was entitled to claim it in the manner he did.

§ 5049. *A patent for a process, irrespective of the particular mode or form of apparatus for carrying it into effect, is admissible under the patent laws of the United States, and it is clearly an art within the meaning of the law.*

That a patent can be granted for a process there can be no doubt. The patent law is not confined to new machines and new compositions of matter, but extends to any new and useful art or manufacture. A manufacturing process is clearly an art within the meaning of the law. Goodyear's patent was for a process, namely, the process of vulcanizing india-rubber by subjecting it to a high degree of heat when mixed with sulphur and a mineral salt. The apparatus for performing the process was not patented and was not material. The patent pointed out how the process could be effected, and that was deemed sufficient. Neilson's patent was for the process of applying the hot-blast to furnaces by forcing the blast through a vessel or receptacle situated between the blowing apparatus and the furnace, and heated to a red heat; the form of the heated vessel being stated by the patent to be immaterial. These patents were sustained after the strictest scrutiny and against the strongest opposition.

On the subject of patents for processes, Mr. Justice Grier, in delivering the opinion of this court in *Corning v. Burden*, said: "A process *eo nomine* is not made the subject of a patent in our act of congress. It is included under the general term 'useful art.' An art may require one or more processes in order to produce a certain result or manufacture. The term 'machine' includes every mechanical device or combination of mechanical powers and devices to perform some function or to produce a certain effect or result. But where the result or effect is produced by chemical action, by the operation or application of some element or power of nature, or of one substance to another, such modes, methods or operations are called processes. A new process is usually the result of a discovery; a machine of invention. The arts of tanning, dyeing, making water-proof cloth, vulcanizing india-rubber, smelting ores, and numerous others, are usually carried on by processes as distinguished from machines. One may discover a new and useful improvement in the process of tanning, dyeing, etc., irrespective of any particular form of machinery or mechanical device. And another may invent a labor-saving machine, by which the operation or process may be performed, and each may be entitled to his patent. As, for instance, A. has discovered that by exposing india-rubber to a certain degree of heat, in mixture or connection with certain metallic salts, he can produce a valuable product or manufacture, he is entitled to a patent for his discovery, as a process or improvement in the art, irrespective of any machine or mechanical device. B., on the contrary, may invent a new furnace, or stove, or steam apparatus, by which this process may be carried on with much saving of labor and expense of fuel, and he will be entitled to a patent for his machine as an improvement in the art." 15 How., 252, 267 (§§ 5028-35, *supra*).

§ 5050. *Neilson's patent reviewed.*

Neilson's patent above referred to had some features very similar to those of Tilghman's. The strong objection urged against the latter is that the particular apparatus described in the specification is not that which is generally used, and that it cannot be used with much profit or success in large manufacturing operations; whereas the slower method of dissolving fats in a common boiler or digester, at a lower temperature even than that of melting bismuth,

which is not described in the specification, is the one which is generally adopted. Precisely this circumstance existed in reference to the patent of Neilson. The specification directed that the blast or current of air produced by the blowing apparatus should be passed into an air-vessel or receptacle heated to a red heat, and from thence into the furnace. Then, after stating that the air-vessel or receptacle should be increased in size according to the size of the forge or furnace to be supplied, the specification adds: "The form or shape of the vessel or receptacle is immaterial to the effect, and may be adapted to the local circumstances or situation." Now, the most simple and natural form of an air-vessel for heating the blast, as here directed, would be a box or chamber, or a cylindrical vessel; but it turned out in practice that a receptacle of this kind would answer the purpose but very imperfectly, and that the best and most useful method was to heat the blast in a series of tubes placed in a heated oven. This was held to be no ground for invalidating the patent, or for preventing it from covering intermediate tubes, as well as an intermediate box or chamber, the jury being of opinion that a man of ordinary skill and knowledge in the construction of blowing and air-heating apparatus would be able, from the information contained in the specification, to erect a machine which would answer some beneficial purpose in the application of the process, and would not be misled and prevented from so doing by the declaration that the form or shape of the vessel or receptacle was immaterial to the effect. In this view of the subject the patent was sustained after very great consideration.

§ 5051. *Principle and process distinguished.*

Some question has, indeed, been made whether Neilson's patent was sustained as a patent for a process. The court of exchequer, in reviewing the proceedings at the trial, and answering the objection that it was a patent for a principle, said: "It is very difficult to distinguish it from the specification of a patent for a principle, and this at first created in the minds of some of the court much difficulty; but, after full consideration, we think that the plaintiff does not merely claim a principle, but a machine embodying a principle, and a very valuable one. We think the case must be considered as if, the principle being well known, the plaintiff had first invented *a mode of applying it* by a mechanical apparatus to furnaces; and his invention consists in this — *by interposing a receptacle for heated air between the blowing apparatus and the furnace*. In this receptacle he directs the air to be heated by the application of heat externally to the receptacle, and thus he accomplishes the object of applying the blast, which was before of cold air, in a heated state to the furnace." Web. P. C., 275, 371.

In this passage, we think that the court of exchequer (who spoke through Baron Parke) drew the true distinction between a mere principle, as the subject of a patent, and a process by which a principle is applied to effect a useful result. That a hot-blast is better than a cold-blast for smelting iron in a furnace was the principle or scientific fact discovered by Neilson; and yet, being nothing but a principle, he could not have a patent for that. But having invented and practically exemplified a process for utilizing this principle, namely, that of heating the blast in a receptacle between the blowing apparatus and the furnace, he was entitled to a patent for that process, although he did not distinctly point out all the forms of apparatus by which the process might be applied,—having, nevertheless, pointed out a particular apparatus for that purpose, and having thus shown that the process could be practically and usefully

applied. Another person might invent a better apparatus for applying the process than that pointed out by Neilson, and might obtain a patent for such improved apparatus; but he could not use the process without a license from Neilson. His improved apparatus would, in this respect, stand in a relation to the process analogous to that which an improvement on a patented machine bears to the machine itself.

That Neilson's patent was regarded as for a process is apparent from what is said by the judges who had it under consideration. Thus Baron Parke at the trial had said: "The specification and patent together make it clear what the discovery was: it was the introduction of hot air by means of heating it before it was introduced into the furnace, between the blowing apparatus and the furnace." Web. P. C., 275, 312. And when the matter came before the house of lords, after a trial in Scotland, Lord Campbell said: "After the construction first put upon it [the patent] by the learned judges of the court of exchequer, sanctioned by the high authority of my noble and learned friend now upon the woolsack, when presiding in the court of chancery, I think the patent must be taken to extend to all machines, of whatever construction, whereby the air is heated intermediately between the blowing apparatus and the blast furnace. That being so, the learned judge was perfectly justified in telling the jury that it was unnecessary for them to compare one apparatus with another, because, confessedly, that system of conduit pipes was a mode of heating air by an intermediate vessel between the blowing apparatus and the blast furnace, and therefore it was an infraction of the patent." Id., 715.

This case of the hot-blast was commented upon in the great case of *O'Reilly v. Morse*, and is there recognized and approved in the opinion of this court delivered by Chief Justice Taney. After quoting the remarks of Baron Parke in the court of exchequer, cited above, the chief justice says: "We see nothing in this opinion differing in any degree from the familiar principles of law applicable to patent cases. Neilson claimed no particular mode of constructing the receptacle, or of heating it. He pointed out the manner in which it *might* be done; but admitted that it might also be done in a variety of ways, and at a higher or lower temperature; and that all of them would produce the effect in a greater or less degree, provided the air was heated by passing through a heated receptacle. . . . Whoever, therefore, used this method of throwing hot air into the furnace used the process he had invented, and thereby infringed his patent, although the form of the receptacle of the mechanical arrangements for heating it might be different from those described by the patentee. For whatever form was adopted for the receptacle, or whatever mechanical arrangements were made for heating it, the effect would be produced in a greater or less degree, if the heated receptacle was placed between the blower and the furnace, and the current of air passed through it. . . . The patent was supported because he [Neilson] had invented a mechanical apparatus by which a current of hot air, instead of cold, could be thrown in. And this new method was protected by the patent. The interposition of a heated receptacle of any form was the novelty he invented." 15 How., 62, 115, 116.

§ 5052. *Morse's eighth claim considered.*

We have quoted these remarks of the chief justice more fully because they show most clearly that he put the same construction upon Neilson's patent that was put upon it by Lord Campbell, and that he fully acquiesced in the legality and validity of a patent for a process. Yet it has been supposed that

the decision in *O'Reilly v. Morse* was adverse to patents for mere processes. The mistake has undoubtedly arisen from confounding a patent for a process with a patent for a mere principle. We think that a careful examination of the judgment in that case will show that nothing adverse to patents for processes is contained in it. The eighth claim of Morse's patent was held to be invalid, because it was regarded by the court as being not for a process, but for a mere principle. It amounted to this, namely, a claim of the exclusive right to the use of electro-magnetism as a motive power for making intelligible marks at a distance; that is, a claim to the exclusive use of one of the powers of nature for a particular purpose. It was not a claim of any particular machinery, nor a claim of any particular process for utilizing the power; but a claim of the power itself,—a claim put forward on the ground that the patentee was the first to discover that it *could* be thus employed. This claim the court held could not be sustained.

That this was the true ground of the decision will be manifest from the following observations of the chief justice in the opinion already quoted from. He says: "He [Morse] claims the exclusive right to every improvement where the motive power is the electric or galvanic current, and the result is the marking or printing intelligible characters, signs or letters at a distance. If this claim can be maintained, it matters not by what *process* or *machinery* the result is accomplished. For aught that we now know, some future inventor, in the onward march of science, may discover a mode of writing or printing at a distance by means of the electric or galvanic current, without using any part of the process or combination set forth in the plaintiff's specification. . . . In fine, he claims an exclusive right to use a *manner and process* which he has not described, and indeed had not invented, and therefore could not describe when he obtained his patent. The court is of opinion that the claim is too broad, and not warranted by law. . . . It is the high praise of Professor Morse that he has been able by a new combination of known powers, of which electro-magnetism is one, to discover a method by which intelligible marks or signs may be printed at a distance. And for the method or process thus discovered he is entitled to a patent. But he has not discovered that the electro-magnetic current, used as a motive power, in any other method, and with any other combinations, will do as well." After reviewing the statutes and decisions bearing upon the subject, the chief justice makes a summary conclusion of the whole matter, as follows: "Whoever discovers that a certain useful result will be produced, in any art, machine, manufacture or composition of matter, by the use of certain means, is entitled to a patent for it; provided he specifies the means he uses in a manner so full and exact that any one skilled in the science to which it appertains can, by using the means he specifies, without any addition to or subtraction from them, produce precisely the result he describes. And if this cannot be done by the means he describes, the patent is void. And if it can be done, then the patent confers on him the exclusive right to use the means he specifies to produce the result or effect he describes, and nothing more. And it makes no difference, in this respect, whether the effect is produced by chemical agency or combination; or by the application of discoveries or principles in natural philosophy, known or unknown before his invention; or by machinery acting altogether upon mechanical principles. In either case he must describe *the manner or process* as above mentioned, and the end it accomplishes. And any one may lawfully

accomplish the same end without infringing the patent, if he uses means substantially different from those described." *Id.*, 119.

§ 5053. *A process is a "means" of producing a useful result in an art which will entitle to a patent; an act or a mode of acting.*

It seems to us that this clear and exact summary of the law affords the key to almost every case that can arise. "Whoever discovers that a certain useful result will be produced in any art by the use of certain means is entitled to a patent for it, provided he specifies the means." But everything turns on the force and meaning of the word "means." It is very certain that the means need not be a machine or an apparatus; it may, as the court says, be a *process*. A machine is a thing. A process is an act or a mode of acting. The one is visible to the eye,—an object of perpetual observation. The other is a conception of the mind, seen only by its effects when being executed or performed. Either may be the means of producing a useful result. The mixing of certain substances together, or the heating of a substance to a certain temperature, is a process.

§ 5054. *What is a sufficient description of a process.*

If the mode of doing it, or the apparatus in or by which it may be done, is sufficiently obvious to suggest itself to a person skilled in the particular art, it is enough, in the patent, to point out the process to be performed, without giving supererogatory directions as to the apparatus or method to be employed. If the mode of applying the process is not obvious, then a description of a particular mode by which it may be applied is sufficient. There is, then, a description of the process and of one practical mode in which it may be applied. Perhaps the process is susceptible of being applied in many modes and by the use of many forms of apparatus. The inventor is not bound to describe them all in order to secure to himself the exclusive right to the process, if he is really its inventor or discoverer. But he must describe some particular mode, or some apparatus, by which the process can be applied with at least some beneficial result, in order to show that it is capable of being exhibited and performed in actual experience.

§ 5055. *Tilghman's claim is not for a mere principle.*

Let us apply these principles to the present case. In the first place, the claim of the patent is not for a mere principle. The chemical principle or scientific fact upon which it is founded is that the elements of neutral fat require to be severally united with an atomic equivalent of water in order to separate from each other and become free. This chemical fact was not discovered by Tilghman. He only claims to have invented a particular mode of bringing about the desired chemical union between the fatty elements and water. He does not claim every mode of accomplishing this result. He does not claim the lime-saponification process, nor the sulphuric-acid distillation process, and if, as contended, the result was accomplished by Dubrunfaut, Wilson and Scharling, by means of steam distillation, he does not claim that process. He only claims the process of subjecting to a high degree of heat a mixture continually kept up of nearly equal quantities of fat and water in a convenient vessel strong enough to resist the effort of the mixture to convert itself into steam. This is most certainly a process. It is clearly pointed out in the specification, and one particular mode of applying it and carrying it into effect is described in detail. But it is not the particular apparatus described which Tilghman desires to secure by his patent. Having pointed out the process

and suggested a particular mode of applying it, he claims as his invention "*the manufacturing of fat acids and glycerine from fatty bodies by the action of water at a high temperature and pressure.*" The true construction of this claim is to be sought by comparing it, as we have already done, with the context of the specification; with the statement of the patentee that his "invention consists of a *process* for producing free fat acids and solution of glycerine from those fatty and oily bodies of animal and vegetable origin which contain glycerine as a base;" that, "for this purpose, he subjects these fatty and oily bodies to the action of water at a high temperature and pressure, so as to cause the elements of those bodies to combine with water, and thereby obtain at the same time free fat acids and solution of glycerine;" that he "mixes the fatty body to be operated upon with from a third to a half of its bulk of water, and the mixture may be placed in any convenient vessel in which it can be heated to the melting point of lead" [which is afterwards explained to be only desirable for a quick result, not essential]; that "the vessel must be closed and of great strength, so that the requisite amount of pressure may be applied to prevent the conversion of the water into steam." This is the process which the patentee claims to have invented; and this description of it gives the proper construction and qualification to the claim. It is objected that the particular apparatus described in the patent for carrying the process into effect cannot be operated to produce any useful result. We have examined the evidence on this point, and are satisfied that it shows the objection to be unfounded. A recapitulation of this evidence is not necessary. The testimony of Tilghman himself, of Professor Booth and of Mr. Wilson is directly to the point.

§ 5056. *The infringement considered.*

It only remains that we should express our views on the question of infringement. The defendants advance several reasons for the purpose of showing that their process does not conflict with that of Tilghman. First, because they do not use the apparatus described in the complainant's patent, but use a boiler in which the charge of fat and other materials is placed and heated; and do not mix the fat and water in the manner pointed out in the specification of the patent, but, on the contrary, have inserted in the boiler a pump which forces the water as it settles to the bottom upwards to the top of the mass, and pours it upon the upper surface, whence it again finds its way down through the fat, thus keeping up a constant mixture. It is unnecessary to add anything further on the subject of the form of the apparatus used. The patentee is not confined to a metallic coil of pipe heated in a furnace; but his patent extends to and embraces any convenient vessel for holding the mixture, which is strong enough to sustain the pressure necessary to prevent the water from being converted into steam. The defendants use such a vessel, and use it for the purpose indicated and pointed out in the patent. The vessel which they use has the requisite strength to prevent the water from being converted into steam, and does effect that object. And as to the defendants' using a different method from that suggested in the patent for keeping up the mixture of fat and water, that is of no consequence. The keeping up of the mixture is the important thing. That is a necessary part of the process. They employ such a device for effecting this as is adapted to the form of vessel in which they heat the material. Using a boiler instead of a coil of pipe for this purpose, they are obliged to employ an additional or modified means for keeping up the mixture. They only employ such means as, in view of the

change adopted in the form of the heating apparatus, and of the known appliances in use in analogous processes, would naturally suggest themselves to a mechanic skilled in the art. Or, if the mode of effecting the continued mixture adopted by the defendants should be deemed a new and useful improvement, they might perhaps have a patent for that peculiar device without being entitled to use Tilghman's process, on which it is but an improvement.

Another ground on which the defendants argue that they do not infringe the patent is, that they do not, in their process, use water alone in admixture with fat, but use also some portion of lime; that they formerly used seven per cent. of lime, and now use four per cent. But they do not use lime in the manner and to the extent in which it is used for dissolving fats by the saponifying process. That requires twelve or fourteen per cent. Even if the saponifying process partly takes place, they use Tilghman's process for effecting the balance of the operation. They use water in admixture with fat, heated to a high degree, far above the boiling point, and yet subjected to such pressure as to prevent the water from being converted into steam; and though they may also use other things at the same time, which other things may facilitate the operation, or render a less degree of heat necessary than would be required when water alone is used, and thus actually improve the process of Tilghman, yet this process is included in their operation, and forms the basis of it. It is idle, therefore, to say that they do not infringe Tilghman's patent. It is unnecessary to determine what precise part the lime used by the defendants plays in their process; whether, as the complainant contends, it saponifies the fat to a certain extent, leaving the remainder to be acted upon by the water alone, purely after the process of Tilghman; or whether, as the defendants contend, the lime produces a more perfect and active commixture of the fat and water, or predisposes the fat to unite with the requisite elements of water necessary for producing glycerine and the fat acids,—in either case the process of Tilghman, modified or unmodified by the supposed improvement, underlies the operation performed in the defendants' boilers.

§ 5057. *The introduction of an improvement gives no right to use the primary invention improved upon.*

Another ground assumed by the defendants to avoid the charge of infringement is, that they do not heat the mixed mass in the manner pointed out in Tilghman's specification; but, instead of heating the containing vessel by an outside application of heat, they heat the contents by the introduction of super-heated steam. But we think that this does not alter the essential character of the process. The heating by steam is clearly an equivalent method to that of heating by an external fire. The patent does not prescribe any particular method of applying the heat, except when using the pipe and coil apparatus described in the specification; and, even in the use of this apparatus, the outward application of the heat to the pipe is suggested incidentally and as a matter of convenience rather than as an essential requisite. The patentee showed one method in which the heat could be applied. That was all that was necessary for him to do. If it could be applied in any number of different methods, it would not affect the validity of the patent as a patent for a process. The method of heating the mixture by the introduction of steam may be attended with some beneficial results, in producing an agitation, or automatic circulation helpful to the perfection of the admixture of the water and fat; and so far it may be an improvement on heating from without. Sup-

pose this to be so, as before said, the introduction of an improvement gives no title to use the primary invention upon which the improvement is based.

§ 5058. *Variations in the degree of heat in the infringement of a process.*

Finally, the defendants argue that they only use a low degree of heat and pressure compared with that pointed out by the patent, namely, only about three hundred and ten degrees Fahrenheit instead of six hundred and twelve degrees. The precise degree of heat, as we have seen, is not of the essence of the patent. The specification only claims that a high degree of heat, such as would be sufficient to melt lead, is most effective and rapid in producing the desired result; but suggests a trial of the apparatus employed with different degrees of heat so as to ascertain that which is best for each particular kind of fat. "By starting the apparatus," the language is, "at a low heat, and gradually increasing it, the temperature giving products most suitable to the intended application of the fatty body employed can easily be determined." It is probably true, as contended for by the defendants, that by the use of a small portion of lime, the process can be performed with less heat than if none is used. It may be an improvement to use the lime for that purpose; but the process remains substantially the same. The patent cannot be evaded in that way. The matter may be stated thus: Tilghman discovers a process of decomposing fats by mixing them with water, and heating the mixture to a high temperature under a pressure that prevents the formation of steam. It is a new process, never known before. The defendants seeing the utility of the process, and believing that they can use a method somewhat similar without infringing Tilghman's patent, put a little lime into the mixture, and find that it helps the operation, and that they do not have to use so high a degree of heat as would otherwise be necessary. Still, the degree of heat required is very high, at least a hundred degrees above the boiling point; and a strong boiler or vessel is used in order to restrain the water from rising into steam. Can a balder case be conceived of an attempted evasion and a real infringement of a patent?

And as to the low degree of heat used in the operations of the defendants, this must also be said: that, with the reduction of the temperature, the time of perfecting the operation is more than proportionally increased. Tilghman was aware of this result, and pointed it out in his patent. He expressly says: "The decomposing action of the water becomes more powerful as the heat is increased." What can be done in minutes by the application of a very high degree of heat requires hours to do at the temperature used by the defendant. But the process is still the same, and the defendants fail to evade the patent.

We pass by the fact that the defendants first took a license from the patentee, and under it and under his directions erected substantially the same apparatus which they are yet using. Receiving what they regarded as additional light, they refused to continue the payment of a royalty, and put the complainant to his legal remedy. It is our opinion that the patent is for a process, that it is a valid patent, and that the defendants infringe it.

We have considered the case entirely upon its merits. It is unnecessary to bestow much discussion upon the technical objections that have been raised. They have not been pressed in the argument, and are probably not seriously relied on. One of them is, that no replication was filed in the case. To this it may be answered, that the parties have throughout treated the case as though it were regularly at issue. The various stipulations into which they have entered, with regard to the admission of evidence to be heard on the trial of the

cause, are totally inconsistent with the idea that the case was to be heard merely on bill and answer.

§ 5059. *Antedating of patent and foreign patent.*

Another objection is, that the patent was dated more than six months prior to the filing of the application for it. But under the law then in force (1854) with regard to the antedating of patents where a foreign patent had been obtained, this was admissible. The sixth section of the act of March 3, 1839, entitled "An act in addition to an act to promote the progress of the useful arts," expressly declared "that no person shall be debarred from receiving a patent for any invention or discovery . . . by reason of the same having been patented in a foreign country more than six months prior to his application: *Provided*, that the same shall not have been introduced into public and common use in the United States prior to the application for such patent: *And provided, also*, that in all cases every such patent shall be limited to the term of fourteen years from the date of publication of such foreign letters patent." Now, we know by the proceedings on the application in this case that the attention of the commissioner of patents was expressly called to the fact of the issuing of the English patent, and that the question of the date of the patent in suit was submitted to and considered by him. Under the laws then in force, he determined that the patent ought to be antedated as of the date of the English patent. It must be presumed that his decision was right according to the facts of the case, at least until the contrary is shown; and nothing has been shown to the contrary by any evidence in the cause to which our attention has been called.

The decree of the circuit court will be reversed, and the cause remanded with directions to enter a decree in conformity with this opinion; and it is so ordered.

Process — *Defined*, §§ 5060-5065. *Validity*, §§ 5066, 5067. *Patentability*, §§ 5068-5083. See *Art*, §§ 382-397.

§ 5060. In the language of the patent law, a process is an art. *Cochrane v. Deener*, 4 Otto, 781.

§ 5061. By a process is meant the application or operation of some element or power of nature, or of one subject to another. *Boyd v. Cherry*, 4 McC., 70.

§ 5062. When the result or effect is produced by chemical action, or by the application of some element or power of nature, or of one substance to another, such modes, methods or operations are called processes. *Piper v. Brown*, 1 Holmes, 20.

§ 5063. A process is a mode of treatment of certain materials to produce a given result, an act or a series of acts performed upon the subject-matter to be transformed and reduced to a different state or thing, and, if new and useful, it is patentable. *Cochrane v. Deener*, 4 Otto, 781.

§ 5064. "Mode," when referring to something fugitive, means a method, which may mean engine, contrivance, device, process, instrument, mode and manner of effecting the purpose. *Whitney v. Emmett*, 1 Bald., 303.

§ 5065. The mere operation of a machine does not constitute a patentable process. It is not a chemical process, nor any other, for transforming the subject of it into another state. *New v. Warren*, 22 O. G., 587; *Reay v. Raynor*, 19 Fed. Rep., 308.

§ 5066. It is not essential to the validity of a process patent to state the chemical change, the philosophy of the process. *Cahill v. Beckford*, 1 Holmes, 48.

§ 5067. It is essential to the validity of the process as an invention to show how it may be adapted to practical use. *Piper v. Brown*, 1 Holmes, 20.

§ 5068. A principle, when made available by a method whereby it is put to practical use, is patentable as a process. *Andrews v. Carman*, 13 Blatch., 307.

§ 5069. The intellectual conception of a possible process, without a potential working of it out, is not patentable. *Union Mfg. Co. v. Lounsbury*, 2 Fish., 389.

§ 5070. When the discoverer of a natural force is entitled to a patent for a process. *American Bell Telephone Co. v. Dolbear*, 15 Fed. Rep., 448.

§ 5071. Extent and scope of such a patent. *Ibid.*

§ 5072. A novel and successful process or method of applying known instrumentalities to a practical use is the proper subject of a patent. *Roberts v. Dickey*, 4 Brewster, 260.

§ 5073. The production of insensibility in the human system by anæsthetic agency or otherwise, and the performance of surgical operations during such insensibility, is not patentable as an art in contradistinction to a principle, function or quality of matter. *Cushing's Opinion*, 8 Op., 270.

§ 5074. The process requires that certain things should be done with certain substances and in a certain order; but the tools to be used in doing this may be of secondary consequence. *Cochrane v. Deener*, 4 Otto, 781.

§ 5075. A process *eo nomine* is not made the subject of a patent in the act of congress. . . . It is for the discovery or invention of some practical method or means of producing a beneficial result or effect that a patent is granted, not for the result or effect itself. "Process" and "method," when used to represent the means of producing a beneficial result, are in law synonymous with "art," provided the means are not effected by mechanism or mechanical combinations. *Piper v. Brown*, 1 Holmes, 20.

§ 5076. A patent may be for a mode or method of doing a thing. *Whitney v. Emmett*, 1 Bald., 303.

§ 5077. The patentability of a process is entirely independent of the instrumentalities employed, and it is immaterial whether or not the machinery pointed out as suitable to perform the process be either new or patentable. *Cochrane v. Deener*, 4 Otto, 781.

§ 5078. The elements of a process may be old, but when combined for the purpose of putting to practical use a new idea they constitute a new and useful process within the meaning of the patent law. *Andrews v. Carman*, 13 Blatch., 307.

§ 5079. A new process producing a useful product is patentable. *Goodyear v. Wait*, 5 Blatch., 468.

§ 5080. The inventor of a new method or process which produces a well known product can patent his process only. *Goodyear v. The Railroad*, 2 Wall. Jr., 356.

§ 5081. Though the product may not be new the process may be new, useful and patentable. *Wood-Paper Patent*, 23 Wall., 566.

§ 5082. If a chemical product is not new it is not patentable, even if extracted from a new substance; but the process of extraction, if new and useful, is patentable. *Ibid.*

§ 5083. A process as well as the product may both be new, and in that case each may be patented independently. *Rubber Co. v. Goodyear*, 9 Wall., 788.

See *Invention*, § 3637. *Specification*, §§ 6023-6026, 6070. *Scope of Patent*, § 5969.

Process — As to novelty, §§ 5084-5086.

§ 5084. In support of a claim for a new method or process, it must appear that the result produced is an improvement in the trade — using those words in a commercial sense, as meaning the manufacture of the article as good in quality and at a cheaper rate, or better in quality at the same rate, or with both of these consequences partially combined. *Jones v. Witherill*, 1 MacA. Pat. Cases, 409.

§ 5085. Upon a claim for a process, it is unnecessary to inquire as to the novelty or utility of the arrangement of machinery described in the specification; for however novel or useful the arrangement or combination may be, if it be not the ground of claim, and relied on as such, no patent will be issued for it upon such a claim. *In re Henry*, 1 MacA. Pat. Cases, 467.

§ 5086. The patent being for a process, to deprive complainant of the benefit of his invention it is not sufficient to show that any previous existing apparatus could have been used to practice his process. *Piper v. Brown*, 1 Holmes, 20.

See *Combination*, § 919. *Novelty*, § 4396.

Process — Infringement of, §§ 5087-5101.

§ 5087. *Semble*, that where a patent is obtained without a claim to the invention of the machinery, through which a valuable result is produced, a precise specification is required; and the test of infringement is whether defendants have used substantially the same process to produce the same result. *Le Roy v. Tatham*, 14 How., 156.

§ 5088. Where an individual has discovered a new principle and a process by which it is made practical and operative, his patent covers all modes and processes by which the principle of his invention is made operative in practice, and is infringed by adopting the principle to an available or practical extent. *Tilghman v. Werk*, 1 Bond, 511.

§ 5089. It seems that the use of a new process, involving patented machinery, must be by the license or permission of the patentee or his assigns. *Jones v. Witherill*, 1 MacA. Pat. Cases, 409.

§ 5090. In considering the question as to the infringement of a process, it is immaterial whether defendant's machinery is the same as that described by plaintiff, as that forms no part of the invention; the inquiry is, does defendant, whatever his machinery is, produce the same result according to plaintiff's process. *Tilghman v. Mitchell*, 2 Fish., 518.

§ 5091. Doubted whether an action will lie for the infringement of a machine used in a combination, when the grant is for the art and not for the individual machines. *Evans v. Eaton*, Pet. C. C., 322.

§ 5092. Construing the claim in question as for a process, every successive step enumerated must be regarded as an essential part, and must be employed by defendants to render them liable for infringement. *Hammerschlag v. Garrett*, 10 Fed. Rep., 479.

§ 5093. A process consisting of one stage is not avoided by using a process of two steps, one of which is the same as that of the patented process. *American Wood Paper Co. v. Fibre Disintegrating Co.*, 6 Blatch., 27.

§ 5094. If the process described in a patent is an infringement of a prior patent, it will not protect those who practice the process from the charge, although it disclaims all that is shown and described in the prior patent. *Tilghman v. Morse*, 9 Blatch., 421.

§ 5095. The use of a process which omits one of the essential parts of that patented, and does not employ a chemical equivalent in its place, is not an infringement. *Dittmar v. Rix*, 1 Fed. Rep., 342.

§ 5096. Where defendant's process is not the patented process, but omits a patented step, and in its stead includes one which the patentee intended to avoid, it is not an infringement. *Cotter v. New Haven Copper Co.*, 23 O. G., 740.

§ 5097. A patent for a chemical process is not infringed by a different process, although the same article is produced by it. *Rumford Chemical Works v. Lauer*, 10 Blatch., 122.

§ 5098. Where a claim embraced a complete method, of which part only was used, *held*, that it was not infringed. *Byam v. Farr*, 1 Curt., 260.

§ 5099. Where the defendant did not vary the process or the mode of working, or its essential conditions, but applied a new solution, worked in the same way and under the same conditions as the solution of the plaintiff, it is an infringement of plaintiff's claim. *United Nickel Co. v. Pendleton*, 15 Fed. Rep., 739.

§ 5100. Where the same process was used, for the same purpose and with the same result, although with a higher degree of heat, it was held an infringement of the patented process. *Cary v. Wolff*, 32 O. G., 257.

§ 5101. Where a patent stated that a certain process conducted at a certain pressure and temperature would involve the saving of a certain quantity of the chemical used, which saving would increase with an increase of pressure, it was held infringed by a process employing heat and pressure below the minimum given. *American Wood Paper Co. v. Heft*, 3 Fish., 316.

See *Substitution*, § 6207.

Process — Generally, §§ 5102-5104. See *Claims, Construction of Particular*, §§ 780-785, 787, 791, 796. *Equivalent, Chemical*, §§ 2132-2138. *Reissue*, §§ 5335, 5551-5562. *Specification*, §§ 6023-6026.

§ 5102. If the process consists of a chemical combination by which the particular result is produced, that does not prevent another inventor from making a mechanical combination which produces the same result. *New Process Fermentation Co. v. Maus*, 20 Fed. Rep., 725.

§ 5103. The patent for a process will include every application of the principle that involves the use of the process described and claimed by the patentee, and this does not include the particular machine or apparatus described by the patentee, but the mode of operation which is carried out by means of the apparatus. *Ibid.*

§ 5104. This process puts to a practical use the new principle of forcing water, in the water-bearing strata of the earth, from the earth into a well-pit by the use of artificial power applied to create a vacuum in the manner described. This idea or principle, though new, is not by itself patentable. The idea, when made available by a method whereby it is put to a practical use, is patentable as a process, and is thus secured to the person who has conceived the idea and invented the process. *Andrews v. Carman*, 13 Blatch., 307.

See *Claims, Construction of*, § 741. *Damages and Profits*, §§ 1670-1672.

SMITH *v.* GOODYEAR DENTAL VULCANITE COMPANY.

(3 Otto, 486-502. 1876.)

APPEAL from U. S. Circuit Court, District of Massachusetts.

Opinion by MR. JUSTICE STRONG.

STATEMENT OF FACTS.— A brief review of the history and nature of the patent which the complainants allege has been infringed will aid materially in solving the questions presented by this appeal. On the 14th day of May, 1852, Dr. John A. Cummings, a dentist of Boston, filed in the patent office a caveat to protect an invention he claimed to have made, of certain new and useful improvements in the setting and plates of artificial sets of teeth. The description accompanying the caveat indicated with very considerable clearness what the alleged invention was, and the objects sought to be gained by it. The improvement was declared to “consist in forming the plate, and also the gums in which the teeth are inserted, of rubber, or some other elastic substance so compounded with sulphur, lead and other similar substances as to form a hard gum or whalebone gum rigid enough for the purposes of mastication, and pliable enough to yield a little to the mouth.” “By this improvement,” the caveator said, “the teeth can be easily baked into the gums, which form one piece with the plate.” Subsequently, on the 12th of April, 1855, he applied for a patent, reciting in his application that he had previously entered a caveat. His accompanying specification declared the invention to consist in “forming the plate and gums to which the teeth are attached of rubber, or some other elastic material so indurated as to be rigid enough for the purpose of mastication, and pliable enough to yield a little to the motions of the mouth, and in one piece, the teeth being embedded in the elastic material while the material is in a soft condition, and then baked with the gums and plate, so that the teeth, gums and plate will all be connected, forming, as it were, one piece.”

This application for a patent was rejected on the 19th of May next following; and the applicant was referred to two printed publications, one suggesting the use of gutta-percha as a base for artificial sets of teeth, and the other suggesting pastes, analogous to porcelain paste, as well as gutta-percha. Cummings then amended his specification by striking out all reference to gutta-percha or other merely elastic material, disclaiming the use of gutta-percha and any material which is merely rendered plastic by heat and hardened by cooling, and he claimed the improvement in sets of mineral or other artificial sets of teeth which consists in combining the teeth with a rubber plate and gums, which, after the insertion of the teeth, are vulcanized by Goodyear's process or any other process, forming thereby a cheap, durable and elastic substitute for the gold plates theretofore used. This amendment, however, proved ineffectual. The application for a patent was again rejected;

and a third rejection followed, a reconsideration for which the applicant had asked. This third rejection was on the 3d day of February, 1856. From that time onward for several years, indeed, until the patent was finally granted, the evidence very satisfactorily shows that Dr. Cummings was in a condition of extreme poverty, utterly unable to bear the necessary expenses of prosecuting his case further. But he did not withdraw his application. He did not ask for a return of part of the fee he had paid, nor by any act of his did he indicate acquiescence in the unfavorable action of the patent office. On the contrary, he continued to assert his expectation of ultimately obtaining a patent, formed plans for his own action after it should be obtained, and complained of what he supposed to be the negligence of his solicitor. The proof of his extreme poverty is ample. His ill-health interfered with his working successfully in the line of his profession, and his family was subjected to great privations. He seems never to have had any considerable money. He borrowed, sometimes, small sums to purchase underclothing for himself. He made frequent applications to his friends for advances to enable him to prosecute his application for a patent, offering as a compensation for such advances sometimes one quarter and sometimes one-half of the patent when obtained. He appears never to have remitted his efforts until, in 1864, he induced Dr. Flagg, who had been his partner in former years, and Dr. Osgood, to advance, first, \$100, and afterwards \$720, by means of which the patent was obtained. Even then he had not the \$20 necessary to be paid when it was allowed. For the assistance he thus received he gave one quarter of his invention. Before this time, between the third rejection of his application and his obtaining the advances mentioned, everything was done which was within his power.

In February, 1859, in the midst of his pecuniary embarrassments, his solicitor applied to the patent office, not for a return of any portion of the fee paid, nor for a withdrawal of the application, but that the specification and one drawing might be sent to him. This request was refused. An attempt was then made for an appeal to the board, but that not being allowed by the commissioner, nothing further was done in the patent office until the applicant was enabled, by the funds obtained from Drs. Flagg and Osgood, to renew his endeavors. Then, on the 1st of March, 1864, he presented a petition for the grant of a patent to himself for the same invention which he had endeavored to secure in 1855 (the application for which remained in the office unwithdrawn), and accompanied his petition with a specification and drawings corresponding exactly with those he had previously made. This final effort was successful. The office practically acknowledged that the prior rejection had been an error, and declared that, in justice to his rights as an inventor, the admission of his claim, limited to the use of hard rubber or vulcanite, as he had before limited it, would not be objected to. Accordingly the patent was granted on the 7th of June, 1864, and by sundry conveyances it subsequently became vested in the complainants. Two surrenders and reissues have since been made, the last dated March 21, 1865, and it is for an alleged infringement of this second reissue that the present suit has been brought. The bearing of this history upon the merits of the controversy will appear as we proceed to examine the several defenses set up.

§ 5105. *Reissue No. 1904, March 21, 1865, of original patent No. 43,009, J. A. Cummings, June 7, 1864, artificial gums, construed.*

Among these the one perhaps most earnestly urged is the averment that the device described in the specification was not a patentable invention, but that

it was a mere substitution of vulcanite for other materials, which had previously been employed as a base for artificial sets of teeth,—a change of one material for another in the formation of a product. If this is in truth all that the thing described and patented was, if the device was merely the employment of hard rubber for the same use, in substantially the same manner, and with the same effect, that other substances had been used for in the manufacture of the same articles, it may be conceded that it constituted no invention. So much is decided in *Hotchkiss v. Greenwood*, 11 How., 248. But such is not our understanding of the device described and claimed. In the specification it is declared that the invention “consists in forming the plate to which the teeth, or teeth and gums, are attached, of hard rubber, or vulcanite, so called, an elastic material, possessing and retaining in use sufficient rigidity for the purpose of mastication, and at the same time being pliable enough to yield a little to the motions of the mouth.” This is immediately followed by a description of the manner of the proposed use; that is, of making the hard rubber plates; and the claim, as stated, is “the plate of hard rubber, or vulcanite, or its equivalent, for holding artificial teeth, or teeth and gums, substantially as described;” that is, plainly, formed as described. The invention, then, is a product or manufacture made in a defined manner. It is not a product alone separated from the process by which it is created. The claim refers in terms to the antecedent description, without which it cannot be understood. The process detailed is thereby made as much a part of the invention as are the materials of which the product is composed.

We shall not quote at large the description of the mode of making the plate. Such a quotation would unnecessarily prolong this opinion. It plainly shows a purpose of the inventor to secure what had not been secured before,—a combination of a plate with artificial teeth, or with gums and teeth, in such a manner as to be free from the objections and defects or inconveniences attending the method before practiced, of attaching such teeth to a metallic plate fitted to the roof of the mouth. Some of these objections are stated; such as expense, hurting the mouth, impeding mastication, and obstruction to perfect articulation. In carrying out the purpose proposed, the materials employed were all old. The teeth, the wax, the plaster, the moulds, the soft rubber, and the hard rubber, were none of them new. It is also true that the steps in the process were not all new. Plaster had been used for formation of moulds. The process of forming a plate by the use of such moulds was well known, and so was the process of converting a vulcanizable compound into vulcanite by heating it and allowing it to cool in moulds. But the process of Dr. Cummings extended beyond the use of known materials and the employment of the processes mentioned. It was vulcanizing soft rubber in a mould, and in contact with artificial teeth inserted in place into it while it remained in a soft condition. It was well described by the circuit judge as “the making of a vulcanite dental plate out of a vulcanizable compound, into which the teeth were embedded in its plastic condition, and the rubber compound, with the teeth thus embedded in it, afterwards vulcanized by heat, so that the teeth, gums and plate should be perfectly joined without any intervening crevices, and the plate should possess the quality of hard rubber or vulcanite.”

The combination thus resulted in a manufacture which was “one piece.” If, then, the claim be read, as it should be, in connection with the preceding part of the specification, and construed in the light of the explanation which that gives, the invention claimed and patented is “a set of artificial teeth as

a new article of manufacture, consisting of a plate of hard rubber, with teeth, or teeth and gums, secured thereto in the manner described in the specification, by embedding the teeth and pins in a vulcanizable compound so that it shall surround them while it is in a soft state, before it is vulcanized, and so that when it has been vulcanized the teeth are firmly and inseparably secured in the vulcanite, and a tight joint is effected between them, the whole constituting but one piece." It is evident this is much more than employing hard rubber to perform the functions that had been performed by other materials, such as gold, silver, tin, platinum, or gutta-percha. A new product was the result, differing from all that had preceded it, not merely in degree of usefulness and excellence, but differing in kind, having new uses and properties. It was capable of being perfectly fitted to the roof and alveolar processes of the mouth. It was easy for the wearer, and favorable for perfect articulation. It was light and elastic, yet sufficiently strong and firm for the purposes of mastication. The teeth, gums and plate constituting one piece only, there were no crevices between the teeth and their supporters into which food could gather, and where it could become offensive, and there could be no such crevices so long as the articles lasted. They were unaffected by any chemical action of the fluids of the mouth. Besides all this, they were very inexpensive as compared with other arrangements of artificial teeth. To us it seems not too much to say that all these peculiarities are sufficient to warrant the conclusion that the device was different in kind or species from all other devices. We cannot resist the conviction that devising and forming such a manufacture by such a process and of such materials was invention. More was needed for it than simply mechanical judgment and good taste. Were it not so, hard rubber would doubtless have been used in the construction of artificial sets of teeth, gums and plates long before Cummings applied for his patent. To find a material, with a mode of using it, capable of being combined with the teeth in such a manner as to be free from the admitted faults of all other known combinations, had been an object long and earnestly sought. It had been a subject for frequent discussion among dentists and in scientific journals.

The properties of vulcanite were well known; but how to make use of them for artificial sets of teeth remained undiscovered, and apparently undiscoverable, until Cummings revealed the mode. But when revealed its value was soon recognized, and no one seems to have doubted that the resulting manufacture was a new and most valuable invention. The eminent dentists and experts examined in this case uniformly speak of it as such. Not one has ventured to testify that it was not an invention. They speak of it as "a novel and desirable thing;" as "the greatest improvement in dentistry" made in many years; and as an invention which is "a great benefaction to mankind, whereby both health and comfort are promoted." The evidence also shows that it has wrought a revolution in dental practice, and that many thousands of operators are using it in preference to older devices. All this is sufficient, we think, to justify the inference that what Cummings accomplished was more than a substitution of one material for another; more than the exercise of mechanical judgment and taste,—that it was, in truth, invention.

§ 5106. *That a device has gone into general use, displacing all other devices, is evidence that it is patentable.*

Undoubtedly the results or consequences of a process or manufacture may in some cases be regarded as of importance when the inquiry is whether the

process or manufacture exhibits invention, thought and ingenuity. Webster, on the subject-matter of patents, page 30, says: "The utility of the change, as ascertained by its consequences, is the real practical test of the sufficiency of an invention; and, since the one cannot exist without the other, the existence of the one may be presumed on proof of the existence of the other. Where the utility is proved to exist in any degree, a sufficiency of invention to support the patent must be presumed." We do not say the single fact that a device has gone into general use, and has displaced other devices which had previously been employed for analogous uses, establishes in all cases that the later device involves a patentable invention. It may, however, always be considered; and, when the other facts in the case leave the question in doubt, it is sufficient to turn the scale.

§ 5107. *The substitution of one known material for another, the result being greater cheapness merely, is not invention.*

We have, therefore, considered this branch of the case without particular reference to *Hotchkiss v. Greenwood*, 11 How., 248. The patent in that case was for an improvement in making door and other knobs for doors, locks and furniture, and the improvement consisted in making them of clay or porcelain, in the same manner in which knobs of iron, brass, wood or glass had been previously made. Neither the clay knob nor the described method of attaching it to the shank was novel. The improvement, therefore, was nothing more than the substitution of one material for another in constructing an article. The clay or porcelain door-knob had no properties or functions which other door-knobs made of different materials had not. It was cheaper and perhaps more durable; but it could be applied to no new use, and it remedied no defects which existed in other knobs. Hence it was ruled that the alleged improvement was not a patentable invention. The case does decide that employing one known material in place of another is not invention, if the result be only greater cheapness and durability of the product. But this is all. It does not decide that no use of one material in lieu of another in the formation of a manufacture can, in any case, amount to invention, or be the subject of a patent. If such a substitution involves a new mode of construction, or develops new uses and properties of the article formed, it may amount to invention. The substitution may be something more than formal. It may require contrivance, in which case the mode of making it would be patentable; or the result may be the production of an analogous but substantially different manufacture. This was intimated very clearly in the case of *Hicks v. Kelsey*, 18 Wall., 670, where it was said: "The use of one material instead of another in constructing a known machine is, in most cases, so obviously a matter of mere mechanical judgment, and not of invention, that it cannot be called an invention, unless some new and useful result, as increase of efficiency, or a decided saving in the operation, be obtained."

But where there is some such new and useful result, where a machine has acquired new functions and useful properties, it may be patentable as an invention, though the only change made in the machine has been supplanting one of its materials by another. This is true of all combinations, whether they be of materials or processes. In *Crane v. Price*, 1 Webst. Pat. Cases, 393, where the whole invention consisted in the substitution of anthracite for bituminous coal in combination with a hot-air blast for smelting iron ore, a patent for it was sustained. The doctrine asserted was, that if the result of the substitution was a new, a better, or a cheaper article, the introduction of

the substituted material into an old process was patentable as an invention. This case has been doubted, but it has not been overruled; and the doubts have arisen from the uncertainty whether any new result was obtained by the use of anthracite. In *Kneass v. Schuylkill Bank*, the use of steel plates instead of copper for engraving was held patentable. So has been the flame of gas instead of the flame of oil to finish cloth. These cases rest on the fact that a superior product has been the result of the substitution,—a product that has new capabilities and that performs new functions. So in the present case the use, in the manner described, of hard rubber in lieu of the materials previously used for a plate, produced a manufacture long sought but never before obtained,—a set of artificial teeth, light and elastic, easily adapted to the *contour* of the mouth, flexible, yet firm and strong, consisting of one piece, with no crevices between the teeth and the plate, impervious to the fluids of the mouth, unaffected by the chemical action to which artificial teeth and plates are subjected when in place, clean and healthy,—peculiarities which distinguish it from everything that had preceded it. These differences, in our opinion, are too many and too great to be ascribed to mere mechanical skill. They may justly be regarded as the results of inventive effort, and as making the manufacture of which they are attributes a novel thing in kind, and consequently patentable as such.

§ 5108. *A patent is prima facie evidence that the patentee is the inventor, and the burden of proof is upon the infringer.*

A second objection urged by the defendant against the validity of the complainant's patent is alleged want of novelty of the invention; and a strenuous effort has been made to convince us, that, although hard rubber had not been used in the manner described for the production of the manufacture, equivalent materials and processes had been, and that a plate substantially the same as that of Dr. Cummings had been made before his improvement. We are not, however, convinced. The patent itself is *prima facie* evidence that the patentee was the first inventor; at least it casts upon him who denies it the burden of sustaining his denial by proof. We do not find such proof in the case. Though the patent was not granted until June 7, 1864, the invention was completed at least as early as April 12, 1855, when the application for a patent was made. Indeed, as we have noticed, a caveat to protect it was filed on the 14th of May, 1852, which clearly foreshadowed the invention. Yet taking the spring of 1855 as the time when it was completed, we find nothing in the proofs to justify a conclusion that Dr. Cummings was not the first inventor. It would answer no good purpose to review the voluminous evidence supposed to bear upon this branch of the case. We shall refer only to that which is deemed most important, and which has been most pressed upon us in this argument. Of the English patent of Charles Goodyear it is enough to say, that, though the provisional specification was filed March 14, 1855, the completed specification was not until the 11th of September following. It was, therefore, on the last-mentioned date that the invention was patented.

The experiments made by George E. Hawes, it must be admitted, closely resembled the process described in the reissued patent to the complainants. He cast in moulds sets of teeth on a tin base, in a manner very like that in which the vulcanite plate is formed by the Cummings process. But the experiments resulted in nothing practical. Hawes cast sets of teeth for the lower jaw only, the weight of the metal making the plate unfit for the upper. In consequence of the shrinkage of the metal in cooling, a tight joint could not

be obtained between the teeth and the base. The sets were, therefore, liable to become offensive in consequence of deposits of food and the secretions of the mouth in the crevices. The shrinkage also prevented a close fitting of the plate to the roof of the mouth, and the tin base was affected by the chemical action of the secretions. In consequence of these and other objections the manufacture was soon abandoned, and it may properly be considered an abandoned experiment. It not only was not the same manufacture as that of Cummings, but it was not suggestive of it; and Dr. Hawes, who cast the tin plates, testifies that the use of vulcanite for dental purposes is the greatest improvement in his profession that he knew of in twenty-five years. He adds, "that vulcanite may be used by dentists in many ways which could not be accomplished by tin or platinum." In his opinion, therefore, the cast-tin base was not substantially the same thing as the Cummings manufacture. So, also, Dr. Royce, who cast plates of tin for artificial teeth in a manner very similar to that of Dr. Hawes, testifies that the solid tin base was found practically unfit for the purpose, except in rare instances. He made but a few sets, none after 1850, and adopted the vulcanite, agreeing to pay for a license to use it in manufacturing dental plates.

We need go no farther into a consideration of the various devices and publications offered to show that the manufacture patented was known before Cummings invented it. Suffice it to say, that none of them, in our opinion, suggest or exhibit in substance such a manufacture. The defense of want of novelty is, therefore, not sustained.

§ 5109. *What presumptions arise in favor of a reissued patent from the action of the commissioner in reissuing it.*

It is further insisted by the defendant that the reissued patent on which this suit is founded is not a patent for the same invention which was described in the specification of the original patent, and, therefore, that the reissue is unauthorized and void. To sustain this position the defendant must overcome the presumption against him arising from the decision of the commissioner of patents in granting the issue; and this he can do only by showing, from a comparison of the original specification with that of the reissue, that the former does not substantially describe what is described and claimed in the latter. This must plainly appear before we can be justified in pronouncing the reissued patent void. But this, in our judgment, does not appear. The first specification describes a set of artificial teeth having a hard-rubber plate made by a process substantially the same as that indicated in the later patent. The description of the process is not quite so minute; but it is sufficiently full to be understood, and to enable an operator to make the manufacture. Certainly it is not another process; and as its result is the same, it is impossible to hold that the reissued patent is for a different invention from the one protected by the original patent. It is true, the specification of the reissue describes also another process not described in the specification of the first,—namely, a mode of making the moulds,—but that is not claimed as a part of the invention.

§ 5110. *When a renewed application for a patent may be held a continuation of an older and rejected one.*

The remaining defenses to the bill rest mainly on the assumption that the new petition presented to the patent office in 1864 cannot be regarded as a continuation of the application made for a patent on the 12th of April, 1855. But this cannot be conceded. The history of the application, as we have given it, forbids such an assumption. No act of Cummings' amounted to a with-

drawal of his first petition, or to an acquiescence in its rejection. It is true, he filed a second petition in 1864; but he accompanied it with substantially the specification that remained in the office, and with the same drawings. It was a mode of procuring another consideration of his rejected claim; and the commissioner regarded it as such. The act of March 2, 1861, gave him authority thus to regard it. He replied to the application, that his claim was embraced in an application filed by him in 1855, and rejected for want of novelty, admitted that it had been improperly rejected, and suggested an amendment to make it correspond with his former amended claim. It is impossible, in view of these facts, to regard the effort to obtain a new patent in 1864 as a new and independent application, disconnected from the application made in 1855. It was but one stage in a continuous effort. In *Godfrey v. Eames*, 1 Wall., 317, the first application was actually withdrawn, and a new petition was presented at the time of the withdrawal, with a different description of the invention; but as the thing patented under the second might have been engrafted as an amendment of the first, it was ruled that all the proceedings constituted one application. This court said: "If a party choose to withdraw his application for a patent, and pay the forfeit, intending at the time of such withdrawal to file a new petition, and he accordingly does so, the two petitions are to be considered parts of the same transaction, and both as constituting one continuous application." We are not aware that filing a second petition for a patent, after the first has been rejected, has ever been regarded as severing the second application from the first, and depriving the applicant of any advantage he would have enjoyed had the patent been granted without a renewal of the application. The contrary was decided by the circuit court for the southern district of Ohio, in *Bell v. Daniels*, 1 Fish., 372, and in *Blandy v. Griffith*, 3 id., 609; and these decisions are founded in justice and sound reason.

If, then, as we think it must be held, the proceeding to obtain the patent was a continuous one from 1855 until it was granted; if the application of 1855 is not severable from the proceedings of 1864,—there is no foundation whatever for the allegation that the invention was abandoned to the public, and that it was in public use or on sale for more than two years before the inventor's application. The first use of it proved, by any other than Dr. Cummings, was in 1859; and there is no evidence that this was with his consent. And the proof respecting his health and pecuniary condition, together with his constant efforts to obtain the necessary means to prosecute his right, rebuts all presumption that he ever abandoned, actually or constructively, either his invention or his application for a patent. That he never intended an abandonment of his invention is perfectly clear; and it was not his fault that granting the patent was so long delayed.

The conclusion of the whole matter is, that the patent is a valid one; and, therefore, that the decree of the circuit court should be affirmed.

Decree affirmed.

Dissenting opinion by Mr. JUSTICE BRADLEY, JUSTICES MILLER and FIELD concurring.

I dissent from the judgment of the court in this case, on the ground that the patentee, having duly made his application for a patent in 1855, and the same having been three times rejected, must be considered as having abandoned the same, inasmuch as no further effort was made to obtain a patent until eight years afterwards, without any pretense that the patentee was en-

gaged in perfecting his invention, and in the meantime the invention which he claims as his had come into general public use. The application for a patent made in 1864 was a new and independent application, and should be treated as such. As the public had enjoyed the use of the invention for more than two years prior to this application, the patent should be declared invalid. Great injustice will, in my judgment, be done to the public to allow a patent obtained under such circumstances to stand. The public had a right to suppose that no further application would be made. The levy of a tribute now on all the dentists of the country who have brought the plate into public notice and use seems to me a species of injustice. The delay of the patentee, in fact, is made to operate to his benefit instead of his prejudice, his patent being made to run eight years longer than it would have done had it been granted when first applied for; so that the public is still further injured by sustaining the patent as finally granted. It is too common a case that associated companies, in order to maintain some valuable monopoly, look about to see what abandoned invention or rejected application, or ineffective patent, can be picked up, revamped, and carried through the patent office, and by the aid of ingenious experts and skilful counsel succeed in getting the desired protection. I think that the courts ought to be strict in maintaining the rights of the public in such cases. And the present case seems to me to be one in which we ought to hold the patent invalid as against those rights.

MERRILL *v.* YEOMANS.

(4 Otto, 568-574; 11 Official Gazette, 970. 1876.)

APPEAL from U. S. Circuit Court, District of Massachusetts.

Opinion by MR. JUSTICE MILLER.

STATEMENT OF FACTS.—The appellant in this case, who was complainant in the circuit court, obtained a patent, in May, 1869, for a new and useful invention, which relates to the heavy hydrocarbon oils, and he sued the appellees, who were defendants in that court, for an infringement of his patent.

§ 5111. *A patent for a process is not infringed by the sale of an article similar to that produced.*

The defendants were dealers in oils and not manufacturers of them. If the appellant's patent was for a new oil, the product of a mode of treating the oils of that character which he describes in his application, the defendants may be liable, for they bought and sold, without license or other authority from him, an oil which is proved to be almost, if not quite, identical with the one which he produced. If, however, appellant's patent is only for the mode of treating these oils invented and described by him—in other words, for his new process of making this new article of hydrocarbon oil—then it is clear the defendants have not infringed the patent, because they never used that process, or any other, for they manufactured none of the oils which they bought and sold. The counsel for appellant here maintain that his patent is for the new article, and is not for the process, though he describes it fully, by which that article is produced. The appellees insist with equal earnestness that the patent is exclusively for the process by which the new oil is made.

§ 5112. *Patent No. 90,284, of Merrill, May 18, 1869, hydrocarbon oils, construed to have claimed a process and not a product.*

The issue thus presented must be decided solely upon a correct construction of the plaintiff's patent, and the accompanying specifications, in which, as

required by the act of congress, he makes the statement of his invention. No such question could have arisen if appellant had used language which clearly and distinctly points out what it is that he *claims* in his invention.

§ 5113. *The claims in a patent are to be considered as distinct from the description contained in the specification, and as representing what part of the matter described the patentee claims as his invention, and for which he asks protection.*

We use the word claim as distinct from description. It must be conceded that the appellant's specification describes with minuteness and precision both the instrumentality and the process by which he makes the oil in question. And in regard to a part of the apparatus which he uses he makes a distinct claim for its invention, and that is not in dispute here. He also describes with fullness and accuracy the process of distillation by which he produces this oil. He gives the temperature to be used, the mode of heating, the degree of rapidity or delay to be used in distilling, the introduction, and the advantage of that introduction, of superheated steam into contact with the oils to be distilled during the process. He also describes, though in short terms, the article produced, the main feature of which he declares to be its freedom from the offensive odor which, before his invention, seemed to be an inseparable quality of those oils; and he mentions some of the more important uses to which this deodorized oil is applicable in the arts.

It is fairly to be inferred from this statement that if all which is described as new in these specifications is really so, the inventor has a right to a patent for three inventions: 1. For a modification or improvement in the distilling apparatus. 2. For a new process or mode of distilling heavy hydrocarbon oils, by which they are deprived of their offensive odors. 3. For the product of this new process of distillation, namely, the deodorized heavy hydrocarbon oils fitted for use in the arts.

When a man supposes he has made an invention or discovery useful in the arts, and therefore the proper subject of a patent, it is nine times out of ten an improvement on some existing article, process or machine, and is only useful in connection with it. It is necessary, therefore, for him in his application to the patent office to describe that upon which he engrafts his invention, as well as the invention itself, and in cases where the invention is a new combination of old devices he is bound to describe with particularity all these old devices, and then the new mode of combining them, for which he desires a patent. It thus occurs that in every application for a patent the descriptive part is necessarily largely occupied with what is not new, in order to an understanding of what is new. The act of congress, therefore, very wisely requires of the applicant a distinct and specific statement of what he claims to be new, and to be his invention. In practice this allegation of the distinct matters for which he claims a patent comes at the close of the schedule or specification, and is often accompanied by a disclaimer of any title to certain matters before described, in order to prevent conflicts with pre-existing patents. This distinct and formal claim is, therefore, of primary importance in the effort to ascertain precisely what it is that is patented to the appellant in this case.

In this part of his application he makes two separate claims, the second of which relates to a modification of the distilling apparatus, and is not in dispute here. Turning our attention to the first claim, we are compelled to say that the language is far from possessing that precision and clearness of statement with which one who proposes to secure a monopoly at the expense of the

public ought to describe the thing which no one but himself can use or enjoy without paying him for the privilege of doing so. It is as follows: "I claim the above described new manufacture of the deodorized heavy hydrocarbon oils suitable for lubricating and other purposes, free from the characteristic odors of hydrocarbon oils, and having a slight smell like fatty oil, from hydrocarbon oils, by treating them substantially as is hereinbefore described."

The word manufacture in this sentence is one which is used with equal propriety to express the process of making an article, or the article so made. "The manufacture of hydrocarbon oils" means primarily the making of hydrocarbon oils. It may mean the thing made also. Are there other words in the sentence calculated to throw light on the meaning of this one? "I claim the above described new manufacture of hydrocarbon oils, . . . by treating them substantially as hereinbefore described." It seems to us that the most natural meaning of these words is that "I claim this new mode of manufacturing hydrocarbon oils, by treating them as hereinbefore described."

This is the meaning which would first suggest itself to the mind. If the product is meant, the words "by treating them substantially as hereinbefore described" are useless. They are not only useless, but embarrassing, for by the well settled rules of construing all instruments, some importance must be attached to them; and if they are to be regarded at all, they must either refer to the process of making the oils for which the applicant is claiming a patent, or they are intended to limit his claim for a patent for the product to that product only, when produced by treating the oils in the manner before described. The counsel for appellant disclaim this latter construction, and allege that the patent covers the oil described, by whatever mode it may be produced. It is necessary to insist on this view, because it is made to appear in the case that the oils sold by defendants were produced by a process very different from that described by appellant.

We can see no reason why the applicant for the patent, if he had in his mind a claim for the article produced, should have intended so to limit his claim. If the *article* was the discovery which he sought the exclusive right to make, use and sell, he was entitled to that monopoly, however produced. If, however, he had in his own mind only a claim for the process of manufacture by which the article was made, then his reference to the mode of treating the oils from which it came was evidently proper and intelligible.

But the language in the specifications aids us in construing the claim. In the sentence next preceding this claim he says: "It will also be evident to those skilled in the art, that *my invention* will be used, if the above mentioned process be worked, to produce the deodorized heavy oils above described from distilled hydrocarbon oils," etc.

It is very clear that what he here calls his *invention* is a thing which produces the deodorized oils, and not the oil itself. So, again, he says: "From the above it will be obvious that my invention consists *in producing* heavy hydrocarbon oils, suitable for lubricating and other purposes, and free from the characteristic odor, *by distilling from them the volatile matter from which objectionable odors arise.*" Again, he says: "In carrying on my new manufacture of deodorizing heavy oils with this apparatus, I place the oil to be deodorized in the still, and heat it by the fire beneath to the required temperature to commence the operation, the steam being shut off from the coil, and the outlet-cock being opened to admit of the expulsion of any water from within the coil."

Here the word "manufacture" is used in the sense of the word "process," a word which could be substituted for it, without a shade of change in the meaning. As it can here mean nothing else but process, we have a definition of the meaning to be attached to it in other parts of the same paper, if that meaning were otherwise doubtful. But apart from these verbal criticisms, all of which are just, and tend strongly to show what was the invention claimed by appellant, it is impossible to read the four printed pages of specifications in which appellant minutely describes his invention, without observing that they are almost wholly directed to the apparatus, the mode of using it, and the peculiar process of distillation, by which the more volatile parts of the heavy oils, which contain the offensive odors, are separated from the main body of the oil, pass over in that process, and leave the remainder free from this great drawback in its use in the arts. Why should this be so, if the applicant for the patent was only looking to the products as his invention, the deodorized heavy hydrocarbon oils? If the oil alone was to be patented, by whatever process made, this elaborate description of one particular process was unnecessary.

A strong appeal is made by counsel to give the appellant the benefit of a liberal construction in support of the patent. Cases are cited in which this court has held, that rather than defeat a patent where it appears that a valuable invention has really been made, this court, giving full effect to all that is found in the application on which the patent office acted, will uphold that which was really invented, and which comes within any fair interpretation of the patentee's assertion of claim.

§ 5114. *The remedy for failure to claim the product of the process claimed is by reissue.*

We are not disposed to depart from this rule in the present case. There is no question here, but that the patent is good for the second claim, for the superheating coil, with its steam-pipe, etc. And we are all of opinion that it is good for the process of distillation described in the specifications, by which the heavy hydrocarbon oils are deodorized. It is, therefore, a valid patent for two important matters well set forth and described. If the patentee is also entitled to a patent for the product of this distillation, and has failed, as we think he has, to obtain it, the law affords him a remedy by a surrender and reissue. When this is done the world will have fair notice of what he claims — of what his patent covers, and must govern themselves accordingly.

§ 5115. *The interests of the public demand that the claims in a patent should clearly and distinctly define and limit the actual invention claimed by and secured to the patentee.*

The growth of the patent system in the last quarter of a century in this country has reached a stage in its progress where the variety and magnitude of the interests involved require accuracy, precision and care in the preparation of all the papers on which the patent is founded. It is no longer a scarcely-recognized principle struggling for a foot-hold, but it is an organized system with well-settled rules, supporting itself at once by its utility, and by the wealth which it creates and commands. The developed and improved condition of the patent law, and of the principles which govern the exclusive rights conferred by it, leave no excuse for ambiguous language or vague descriptions. The public should not be deprived of rights supposed to belong to it without being clearly told what it is that limits these rights. The genius of the inventor constantly making improvements in existing patents, a process

which gives to the patent system its greatest value, should not be restrained by vague and indefinite descriptions of claims in existing patents from the salutary and necessary right of improving on that which has already been invented. It seems to us that nothing can be more just and fair, both to the patentee and to the public, than that the former should understand and correctly describe just what he has invented, and for what he claims a patent.

In consistency with these views, we are of opinion that the appellant in this case has described and claimed a patent for the process of deodorizing the heavy hydrocarbon oils, and that he has not claimed as his invention the product of that process. The judgment of the circuit court is affirmed.

Dissenting opinion by MR. JUSTICE CLIFFORD.

I dissent from the opinion and judgment in this case upon the ground that the invention, when the claim is properly construed, is an invention of the described new manufacture, and not merely for the process as decided by a majority of the court.

Process and product — Interrelation of, §§ 5116-5118.

§ 5116. If an inventor, after obtaining his first patent for the machine, waits for more than two years before applying for the process and product patents, there may intervene such disclosure and public use that the patent office will be compelled, under the provisions of the supplement of 1839, to reject the subsequent applications; but where no such time has elapsed, it is competent for the patentee, within the two years, to take out his process and product patents, and thus to guard himself against the danger and loss that might arise from others using the process to accomplish other results or securing the product by the agency of other means or instrumentalities. *McKay v. Dibert*, 5 Fed. Rep., 587.

§ 5117. While the product patent continues in existence the manufacture of the product by any instrumentality is prohibited; and it is no answer to the charge of infringement to say that the machine patent has expired and that the particular mechanism employed is public property. *Ibid.*

§ 5118. If the machine in its ordinary and natural operation can only be used to manufacture the patented product, the public must abstain from its use until the time comes when it may be used without infringing the rights of others. *Ibid.*

See *Claim, Right to Broad*, § 683. *Construction of Patents*, § 1229. *Estoppel*, § 2233. *Invention*, §§ 3574, 3575, 3627-3629. *Invention, Joinder of*, §§ 3684-3690. *Process*, §§ 5047, 5083. *Reissues*, §§ 5559-5562, 5622, 5666-5668.

Process and product — Product — Patentability, §§ 5119-5125. Novelty, § 5126. Infringement, §§ 5127, 5128. See Article of Manufacture, §§ 398-418. Composition of Matter, §§ 1117-1145. Sale, §§ 5918-5925.

§ 5119. Although an inventor has obtained a patent for a process, he may have another for the product. *Jones v. Sewall*, 3 Cliff., 563.

§ 5120. A patent may be good for a product, although no patent has been obtained for the machine or process by which it is produced. *Waterbury Brass Co. v. Miller*, 9 Blatch., 77.

§ 5121. A product made by a machine which has before been made by hand is not patentable. *Wooster v. Calhoun*, 11 Blatch., 215.

§ 5122. *Quære*: Whether the artificial production of a composition identical with one found in nature would not entitle the inventor to a patent for the product. *Badische Anilin & Soda Fabrik v. Cochrane*, 16 Blatch., 165.

§ 5123. The improved quality of an old product, an effect of the machine making it, is not sufficient to support a patent for the product. *McCloskey v. Du Bois*, 9 Fed. Rep., 38.

§ 5124. While a new process for producing the old article (alizarine) was patentable, the product itself could not be patented, even though it was a product made artificially for the first time, in contradistinction to being eliminated from the madder-root. Calling it "artificial alizarine" did not make it a new composition of matter, and patentable as such, by reason of its having been prepared artificially for the first time from anthracene, if it was set forth as alizarine — a well known substance. *Cochrane v. Badische Anilin & Soda Fabrik*, 111 U. S., 293.

§ 5125. Where an article is produced by a machine, and, remaining temporarily in the machine, co-operates therewith to produce certain mechanical effects upon the articles subsequently produced, it cannot be claimed in combination with the machine. Notwithstanding its remaining in the machine and co-operating therewith, it is still merely the product, and the machine must be claimed independently of it. *Dederick v. Cassell*, 9 Fed. Rep., 306.

§ 5126. Where the invention sought to be patented is a product, it is anticipated by a similar product, independent of the process by which it is made. *McCloskey's Appeal*, 3 MacArth., 14.

See *Publication*, § 5143.

§ 5127. When the product is independent of the process, the patent is infringed by the unlicensed manufacture of the new product by any mode of manufacture, the process of manufacture being wholly unimportant. *Merrill v. Yeomans*, 1 Holmes, 331.

§ 5128. If it be capable of being produced by various different processes, yet when the product is new, independent of the process, the patent is infringed by the unlicensed manufacture of the new product by any mode of manufacture, the process of manufacture being wholly unimportant. *Badische Anilin & Soda Fabrik v. Hamilton Manufacturing Co.*, 13 O. G., 273.

Publication — *Defined*, § 5131. *What is not a publication*, §§ 5132-5137. *Insufficient description does not constitute a prior publication*, §§ 5138-5140.

§ 5131. Publication means put into general circulation or on sale. *Cottier v. Stimson*, 20 Fed. Rep., 906.

§ 5132. An unpublished description of an invention is no bar to a subsequent discoverer's obtaining a patent. *N. W. Fire-Extinguisher Co. v. Phila. Fire-Extinguisher Co.*, 6 O. G., 34.

§ 5133. Where one of the anticipations relied upon consisted of an article made in London, described in a circular issued and published by the maker, *held*, that the circular to the trade is not a printed publication or a public work within the meaning of the patent law. *Parsons v. Colgate*, 15 Fed. Rep., 600.

§ 5134. Business circulars which are sent only to persons engaged, or supposed to be engaged, in the trade, are not such publications as section 4886 of the law contemplates, and in a contest of priority will not afford a basis for a claim of prior invention as against a patentee. *New Process Fermentation Co. v. Koch*, 21 Fed. Rep., 580.

§ 5135. Where a certain book was put in evidence as a printed publication, but there was no other evidence than that furnished by the copy that the work was ever on sale or in circulation, doubted that the evidence was sufficient to prove a publication under the statute. *Cottier v. Stimson*, 20 Fed. Rep., 906.

§ 5136. It seems that a published drawing of an invention is not such a published description of it as will bar a patent to one who originates it afterward. *Reeves v. Keystone Bridge Co.*, 1 O. G., 466.

§ 5137. *Semble*, that a mere drawing, without any description whatever, is not admissible under notice of prior publication. *Judson v. Cope*, 1 Bond, 327.

§ 5138. Prior publication showing nothing more than suggestions and speculations of scientific writers, who had never tested their practicability or demonstrated their truth, *held*, not to anticipate a patented invention. *Jensen v. Keasbey*, 24 Fed. Rep., 144.

§ 5139. Where the alleged prior publication remotely suggested the device, but it was not described in such terms that the public could construct and put it to the use designed by patentee without further invention, it was *held* not to show a want of novelty. *McComb v. Ernest*, 1 Woods, 195.

§ 5140. The suggestion, in a prior publication, of an untried invention, wholly unaccompanied by any explanations to show that it could be constructed and adapted to act like patentee's invention, *held* insufficient to establish a want of novelty. *Howe v. Williams*, 2 Cliff., 245.

See *Invention*, §§ 3555, 3556.

Publication — Prior — *A description of the thing patented is a*, §§ 5141-5144.

§ 5141. Although the inventor of a prior compound may have abandoned his invention as a failure, yet, if he published substantially the formula of the plaintiff, it is fatal to his right. *Allen v. Hunter*, 6 McL., 303.

§ 5142. A patent is invalid if the invention claimed is found to be patented or described in a printed publication prior to the patentee's invention or discovery thereof; and it is enough if the thing patented is described, and not the steps necessarily antecedent to its production. *Cohn v. United States Corset Co.*, 3 Otto, 366.

§ 5143. When the invention claimed is an article, it is not necessary, in order to render the patent void, that the prior publication should also contain a description of the process by which such article was made. *Ibid.*

§ 5144. A prior patent or publication, to anticipate a patent, must appear in the description to embody substantially the same organized mechanism, operating substantially in the same manner, as that described in the patent claimed to have been anticipated. *Gottfried v. Phillip Best Brewing Co.*, 17 O. G., 675.

See *Patents*, § 4754.

Publication — Prior — *What is a sufficient description*, §§ 5145-5155.

§ 5145. A prior publication, to avoid a patent, must contain an intelligible description of an organization substantially like that in the patent. *Washburn v. Gould*, 3 Story, 122.

§ 5146. Sufficient description in a prior publication to defeat a patented invention must have been so full and precise as to enable a mechanic to construct it, and it must also have been in

all material respects like that covered by or described in the patent. *Parker v. Stiles*, 5 McL., 44.

§ 5147. The description in a prior publication should be to some degree in the nature of a specification, so far as to enable a skilled mechanic in the art to construct the machine. It should not be vague references to, or suggestions of, the thing described. *Hays v. Sulzor*, 1 Bond, 279.

§ 5148. A prior publication, in order to invalidate a patent, must be such as to admit of the construction of the patented device without the exercise of further invention. *Carr v. Rice*, 1 Fish., 198.

§ 5149. A prior description, to invalidate a patent, must be such as to show that the article described in the patent can be certainly arrived at by following the prior description. *Atlantic Giant Powder Co. v. Parker*, 16 Blatch., 281.

§ 5150. Printed publications, in order to defeat a patent, must furnish such clear and definite information as to enable a skilled person, beyond any reasonable doubt, by following them, without aid from anything not known when they were made, to construct an apparatus like that patented. *Bignall v. Harvey*, 18 Blatch., 353.

§ 5151. If the description in a prior publication is sufficient to show the structure of plaintiff's device in the particulars covered by his claim, it is not necessary to show otherwise the existence or use of the prior described device. *Cohn v. United States Corset Co.*, 12 Blatch., 225.

§ 5152. It is only when a published description of a process is sufficient to give the public a practical knowledge of the invention that it will avail to defeat a patent for it obtained afterward by a new discoverer. *Roberts v. Dickey*, 4 Brewster, 260.

§ 5153. When the defense relied on is that the patented invention has been described in a printed publication before the patentee's invention thereof, the sufficiency of the publication as an anticipation must be determined by the rule laid down in *Seymour v. Osborne*, 11 Wall., 516, and *Cohen v. U. S. Corset Co.*, 93 U. S., 336. The construction put in those cases upon the words "described in any printed publication in this or any foreign country," appearing in section 7 of the act of 1836 (5 Stats., 117), in reference to the same subject, is equally applicable to the similar expression made use of in section 24 of the act of 1870. The description relied on should be in such clear, full and exact terms as to enable any person skilled in the art or science to which it relates to make, construct and practice the invention. *Downton v. Yaeger Milling Co.*, 108 U. S., 466.

§ 5154. A patent is not invalidated by statements in an earlier publication, unless those statements are full and definite enough to inform those skilled in the art how to put in practice the invention now patented. *Hood v. Boston Car-spring Co.*, 21 Fed. Rep., 67.

§ 5155. Unless the earlier printed and published description does exhibit the later-patented invention in such a full and intelligible manner as to enable persons skilled in the art to which the invention is related to comprehend it without assistance from the patent, or to make it, or repeat the process claimed, it is insufficient to invalidate the patent. *Cohn v. U. S. Corset Co.*, 3 Otto, 366.

Publication — Prior — Date of, §§ 5156-5159.

§ 5156. Under act of 1836, prior publication, to invalidate a patent, must be prior to the "discovery," not date of application. *Adams v. Edwards*, 1 Fish., 1.

§ 5157. Neither defendant nor respondent can be permitted to prove that the invention described in the alleged prior patent or printed publication was made prior to the date of such patent or publication. *Kelleher v. Darling*, 4 Cliff., 424.

§ 5158. If the patent introduced as proof of prior publication, whether foreign or domestic, was duly issued, or the complete description of the invention was published in some printed publication prior to the supposed invention or discovery, the patent or printed publication will be held to be prior if it is of prior date to the patent in suit, unless the latter is accompanied by the application for the same, or other evidence of plaintiff's priority of invention over such publication is produced. *Ibid.*

§ 5159. A printed publication is a bar to a patent for what it described therein only from the time it is shown to have been put in circulation, and the imprint on the title page is not evidence of the date of circulation. *Reeves v. Keystone Bridge Co.*, 1 O. G., 466.

Publication — Prior — Foreign works, § 5160. Foreign patents, §§ 5161-5170. See Use, Prior Foreign Knowledge and, §§ 6415-6420.

§ 5160. Under the law, act 1870, the publication in an English work is put on the same footing with a patent taken out at the time of publication. *Webb v. Quintard*, 9 Blatch., 352.

See *Reissues*, § 5319.

§ 5161. Inventions patented in the United States cannot be superseded by the mere introduction of a foreign patent or publication, though of prior date, unless the description or drawing contain and exhibit a substantial representation of the patented matter in such full, clear and exact terms as to enable any person skilled in the art or science to which it appertains, without the necessity of resorting to experiments, to make, construct and practice the invention, as he would be enabled to do from a prior patent for the same invention. *Cahill v. Brown*, 15 O. G., 697.

§ 5162. A description in a prior foreign publication which was co-extensive with that in the patent, *held*, such a sufficient description as would conform to the requirements of the statute. *Woven Wire Mattress Co. v. Whittlesey*, 8 Biss., 23.

§ 5163. A patent for an invention originated in this country after it had been described by an English publication is void. *Webb v. Quintard*, 9 Blatch., 352.

§ 5164. To give an inventor precedence over an English publication describing his invention he must have previously made it, and then exercised reasonable diligence in adapting and perfecting it. *Ibid.*

§ 5165. An English provisional specification is a bar to a patent only as a printed specification describing the invention. The patent constitutes no objection. *Cohn v. U. S. Corset Co.*, 12 Blatch., 225.

§ 5166. In order to be an effectual bar the description must be so full as to leave no doubt as to the identity of the device. *Ibid.*

§ 5167. It is incumbent on the defendant in such a case to make out the sufficiency of the description. *Ibid.*

§ 5168. An English provisional specification is not a bar to the grant of a patent in this country, and when relied on as a printed publication under section 4920, Revised Statutes, it seems that the defendant must show that it was actually published before the date of the patentee's invention. *Coburn v. Schroeder*, 11 Fed. Rep., 425.

§ 5169. The knowledge derived from a prior publication must, in order to defeat a patent, be sufficient to enable those skilled in the art to practice the invention, failing which requisite, English provisional specification No. 496, of 1863, was declared to be inadequate to invalidate the patent in suit. *Goff v. Stafford*, 14 O. G., 748.

§ 5170. Where an invention has been patented in a foreign country, or described in a public work, the alleged inventor here is presumed to have been acquainted with that invention as it was known in the foreign country. *Swift v. Whisen*, 2 Bond, 115.

See *Use*, § 6378.

Publication — Prior — Defense, §§ 5171, 5172.

§ 5171. When properly pleaded and proven, the statutory defense "that the invention had been patented or described in some printed publication prior to the supposed invention or discovery" by the patentee to the suit, is sustained, if the conflicting patent, whether foreign or domestic, was duly issued or the complete description was published prior to the date of the patent in contest. *Kelleher v. Darling*, 4 Cliff., 424.

§ 5172. It is not necessary to allege or prove, in order to sustain the defense of prior patent or printed publication, that such patent or publication was issued or given two years earlier than the patentee's invention. *Parks v. Booth*, 12 Otto, 96.

Publication — Prior — Statutory notice, §§ 5173, 5174.

§ 5173. Notice of prior publication contained in a special plea, previously stricken out by the court, is not such as will entitle the work to be given in evidence. *Foote v. Silsby*, 1 Blatch., 445.

§ 5174. Failure of notice of prior publication (act 1836, section 15) to specify page or heading in the public work in which the invention had been previously described, *held* sufficient ground for rejection of it as evidence of prior knowledge. *Ibid.*

See *State of the Art*, § 6100.

Publication — Prior — Statute, § 5175. How proved, § 5176. Evidence, § 5177.

§ 5175. Act 1836, section 7, prior publication, construed. *Webb v. Quintard*, 9 Blatch., 352.

§ 5176. A prior publication may be proved, as to its contents and the fact of publication, by the production of the book, or by parol testimony. *Allen v. Hunter*, 6 McL., 303.

§ 5177. Where a prior publication described a partially successful working of a machine, and a witness testifies to a successful working at a subsequent date, the work is no evidence from which a successful operation of the machine in the intermediate time may be inferred. *Seymour v. McCormick*, 19 How., 96.

See *Abandonment*, § 82. *Plea in Equity*, § 4790.

291. PUNITIVE DAMAGES.

See DAMAGES, PUNITIVE.

292. PURCHASER.

Purchaser — Of invention — *Prior to application*, §§ 5178, 5179.

§ 5178. Act 1839, section 7, “purchaser of invention prior to application,” construed. *Pier-son v. Eagle Screw Co.*, 3 Story, 402.

§ 5179. Act 1839, section 7, which allows any one to use or vend a machine which he has purchased or constructed before the inventor applied for his patent, construed to mean a purchase of the inventor or his grantee, or a construction by their consent, or by his own ingenuity. *Hovey v. Stevens*, 1 W. & M., 290.

Purchaser — Of rights under a patent, §§ 5180-5185.

§ 5180. The purchaser of all the right, title and interest which the vendor has in a patent takes nothing by his purchase if the vendor had previously parted with it. *Ashcroft v. Walworth*, 1 Holmes, 152.

§ 5181. The purchaser of an interest in a patent who has notice that it has been assigned to another is not a *bona fide* purchaser, and acquires no title, although the previous assignment has not been recorded in the patent office. *Ibid.*

§ 5182. Where defendants were innocent purchasers, without notice of plaintiff's claim, of the alleged infringing patent, the validity of which had not been determined in prior suits where plaintiff's patent was sustained, the court refused to order a peremptory injunction, but directed bonds to be given to abide a final decision. *U. S. Annunciator Co. v. Sanderson*, 3 Blatch., 184.

§ 5183. The voluntary purchaser of a licensee's right should inform himself as to the extent of his right, and he cannot set up his failure to do so as a defense for invading the rights of another. *Chambers v. Smith*, 5 Fish., 12.

§ 5184. The purchaser of a patent stands in full privity to a decree obtained by the former owner in a suit for infringement. *Dayton v. Wright & Herring*, 11 O. G., 197.

§ 5185. The interest of a purchaser of right to make, use and vend for use in a particular place a patented device, expires with the limitation of the patent, unless otherwise stipulated for in the contract. *Aiken v. Manchester Print Works*, 2 Cliff., 435.

Purchaser — Of patented article.

SUMMARY (*ADAMS v. BURKE*, §§ 5186, 5187) — *Sale by vendor in restricted territory*, §§ 5186, 5187.

ADAMS v. BURKE.

(17 Wallace, 453-460. 1873.)

APPEAL from U. S. Circuit Court, District of Massachusetts.

STATEMENT OF FACTS.—Burke bought patented articles from persons authorized to sell them within certain limits. He used or sold them outside those limits. The party holding the general patent sued him for infringement, and his bill having been dismissed he appealed.

Opinion by MR. JUSTICE MILLER.

The question presented by the plea in this case is a very interesting one in patent law, and the precise point in it has never been decided by this court, though cases involving some of the considerations which apply to it have been decided, and others of analogous character are frequently recurring. The vast pecuniary results involved in such cases, as well as the public interest, admonish us to proceed with care, and to decide in each case no more than what is directly in issue.

We have repeatedly held that where a person had purchased a patented

machine of the patentee or his assignee, this purchase carried with it the right to the use of that machine so long as it was capable of use, and that the expiration and renewal of the patent, whether in favor of the original patentee or of his assignee, did not affect this right. The true ground on which these decisions rest is that the sale by a person who has the full right to make, sell and use such a machine carries with it the right to the use of that machine to the full extent to which it can be used in point of time.

§ 5186. *Where a patented article whose sole value is in its use is lawfully sold within a district to which its vendor is limited, it may be used anywhere.*

The right to manufacture, the right to sell and the right to use are each substantive rights, and may be granted or conferred separately by the patentee. But, in the essential nature of things, when the patentee, or the person having his rights, sells a machine or instrument whose sole value is in its use, he receives the consideration for its use and he parts with the right to restrict that use. The article, in the language of the court, passes without the limit of the monopoly. *Bloomer v. McQuewan*, 14 How., 549; *Mitchell v. Hawley*, 16 Wall., 544. That is to say, the patentee or his assignee having in the act of sale received all the royalty or consideration which he claims for the use of his invention in that particular machine or instrument, it is open to the use of the purchaser without further restriction on account of the monopoly of the patentees. If this principle be sound as to a machine or instrument whose use may be continued for a number of years, and may extend beyond the existence of the patent, as limited at the time of the sale, and into the period of a renewal or extension, it must be much more applicable to an instrument or product of patented manufacture which perishes in the first use of it, or which, by that first use, becomes incapable of further use, and of no further value. Such is the case with the coffin-lids of appellant's patent.

It seems to us that, although the right of Lockhart & Seelye to manufacture, to sell and to use these coffin-lids was limited to the circle of ten miles around Boston, that a purchaser from them of a single coffin acquired the right to use that coffin for the purpose for which all coffins are used. That so far as the use of it was concerned, the patentee had received his consideration, and it was no longer within the monopoly of the patent. It would be to engraft a limitation upon the right of use not contemplated by the statute, nor within the reason of the contract, to say that it could only be used within the ten miles circle. Whatever, therefore, may be the rule when patentees subdivide territorially their patents, as to the exclusive right *to make* or *to sell* within a limited territory, we hold that in the class of machines or implements we have described, when they are once lawfully made and sold, there is no restriction on their *use* to be implied for the benefit of the patentee or his assignees or licensees.

A careful examination of the plea satisfies us that the defendant who, as an undertaker, purchased each of these coffins and used it in burying the body which he was employed to bury, acquired the right to this use of it freed from any claim of the patentee, though purchased within the ten-mile circle and used without it. The decree of the circuit court dismissing the plaintiff's bill is, therefore, affirmed.

Dissenting opinion by MR. JUSTICE BRADLEY, JUSTICES SWAYNE and STRONG concurring.

The question raised in this case is whether an assignment of a patented in-

vention for a limited district, such as a city, a county, or a state, confers upon the assignee the right to sell the patented article to be used outside of such limited district. The defendant justifies under such a claim. He uses a patented article outside of the territory within which the patent was assigned to the persons from whom he purchased it. The plaintiff, who claims under the original patentee, complains that this is a transgression of the limits of the assignment.

§ 5187. *Where an assignment has been of a right to make and sell a patented article within a limited district, a purchaser from the assignee cannot use the article outside of that district.*

If it were a question of legislative policy, whether a patentee should be allowed to divide up his monopoly into territorial parcels, it might admit of grave doubt whether a vendee of the patented article, purchasing it rightfully, ought to be restrained or limited as to the place of its use. But the patent act gives to the patentee a monopoly of use, as well as of manufacture, throughout the whole United States; and the eleventh section of the act (of 1836) expressly authorizes not only an assignment of the whole patent, or any undivided part thereof, but a "grant and conveyance of the exclusive right under any patent, to make and use, and to grant to others to make and use, the thing patented within and throughout any specified part or portion of the United States." *Washburn v. Gould*, 3 Story, 131; *Blanchard v. Eldridge*, 1 Wall. Jr., 339.

If an assignment under this clause does not confer the same rights within the limited district which the patentee himself previously had in the whole United States, and no more, it is difficult to know what meaning to attach to language however plain.

On the 26th day of May, 1863, letters patent were granted to Merrill & Horner for a certain improvement in coffin-lids, giving to them the exclusive right of making, using, and vending to others to be used, the said improvement. On the 13th day of March, 1865, Merrill & Horner, the patentees, by an assignment duly executed and recorded, did assign to Lockhart & Seelye, of Cambridge, in Middlesex county, Massachusetts, all the right, title and interest which the said patentees had in the invention described in the said letters patent, for, to, and in a circle whose radius is ten miles, having the city of Boston as a center. By necessary consequence (as it seems to me), the right thus assigned consisted of the exclusive right to make, use and vend the improved coffin-lid within the limited territory described; but did not include any right to make, use or vend the same outside of those limits. As the assigned right to make the lids was a restricted right, limited to the territory, so the assigned right to use them was a restricted right limited in the same manner. Each right is conveyed by precisely the same language. A different construction would defeat the intent of the parties. For if the assignees, after making any number of lids within the limited district, could use them or authorize others to use them outside of the district, the balance of the monopoly remaining in the hands of the patentees might be rendered of little value.

If it be contended that the right of vending the lids to others enables them to confer upon their vendees the right to use lids thus sold outside of the limited district, the question at once arises, how can they confer upon their vendees a right which they cannot exercise themselves? The only consistent construction to be given to such an assignment is, to limit all the privileges conferred by it to the district marked out. It is an assignment of the manu-

facture and use of the patented article within that district, and within that district only.

Difficulties may, undoubtedly, be suggested in special cases. If the patented thing be an article of wearing apparel, sold by the assignee within his district, it is confidently asked, cannot the purchaser wear the article outside of the district? The answer to acute suggestions of this sort would probably be found (in the absence of all bad faith in the parties) in the maxim *de minimis non curat lex*.

On the other hand, the difficulties and the injustice which would follow from a contrary construction to that which I contend for are very obvious. Take the electric telegraph for example. Suppose Professor Morse had assigned his patent within and for the New England States. Would such an assignment authorize the vendees of his assignees to use the apparatus in the whole United States? Take the planing machine; would an assignment from Woodworth of his patent within and for the state of Vermont authorize the assignees to manufacture machines *ad libitum*, and sell them to parties to be used in other states? So of Hoe's printing press, and a thousand other machines and inventions of like sort.

Such a doctrine would most seriously affect not only the assignor (as to his residuary right in his patent), but the assignee also. For if it be correct, there would be nothing to prevent the patentee himself, after assigning his patent within a valuable city or other locality, from selling the patent machine or article to be used within the assigned district. By this means the assignment could be, and in numberless instances would be, rendered worthless. Millions of dollars have been invested by manufacturers and mechanics in these limited assignments of patents in our manufacturing districts and towns, giving them, as they have supposed, the monopoly of the patented machine or article within the district purchased. The decision of the court in this case will, in my view, utterly destroy the value of a great portion of this property.

I do not regard the authorities cited as establishing a different doctrine from that now contended for. The remark of Chief Justice Taney, in *Bloomer v. McQuewan*, that "when a machine passes to the hands of a purchaser it is no longer within the limits of the monopoly; it passes outside of it, and is no longer under the protection of the act of congress," is perfectly true in the sense and application in which the chief justice made it. He was speaking of time, not territory; of the right to use a machine after the original patent had expired and a renewal had been granted, not of using it in a place outside of the grant. All the effects mentioned by the chief justice would undoubtedly follow so far forth as it was in the power of the vendor to produce them, but no further. And he would never have contended that those effects would follow any further than the vendor's power to produce them extended. That is the very question in this case. How far did the assignee's interest, and therefore his power, extend? In my judgment it was limited in locality, both as to manufacture and use, and that he could not convey to another what he did not have himself. I hold, therefore, that the decree should be reversed.

Purchaser—Of patented article—Acquires unqualified right, §§ 5188–5193. Limitations as to term, §§ 5194–5198. Limitation as to locality, §§ 5199–5201. See *Repairs*, §§ 5825, 5826. *Sale*, §§ 5912–5944.

§ 5188. Purchaser of a patented device for use in the ordinary pursuits of life takes it outside of the monopoly of the patent act; and his redress in case of injury is under state law. *Aiken v. Manchester Print Works*, 2 Cliff., 435.

§ 5189. A patented article purchased from one who has unqualified authority to sell it becomes like other property, and the purchaser may use it as he pleases without any liability under the patent. *McKay v. Wooster*, 2 Saw., 373.

§ 5190. The purchase of a patented article from the patentee confers upon the buyer the right to use the article to the same extent as though it were not the subject of a patent, but the sale does not import the permission of the vendor that it may be used in a way that will violate his exclusive property in another invention. *Roosevelt v. Western Electric Co.*, 20 Fed. Rep., 724.

§ 5191. When the article is of such peculiar characteristics that it cannot be dealt in as a trade commodity, and cannot be used practically at all unless as a part of another patented article of the vendor's, it would be against good conscience to allow an injunction to a vendor under such circumstances; but this is not true of the article in question. *Ibid.*

§ 5192. The purchaser of a patented article does not acquire any right in the monopoly, but he does acquire the right of unrestricted ownership in the article he buys as against the vendor, including as an inseparable incident the right to use and enjoy it and to transfer his title to others. *Holliday v. Matheson*, 24 Fed. Rep., 185.

§ 5193. By the act of 1870 the right of a person constructing or purchasing a patentable article before the application for a patent is limited to the right to use or vend the specific thing, and this, whether it be regarded as a legislative construction of the former acts or not, may properly govern the right of recovery in actions brought since its passage. *Brickill v. City of New York*, 18 Blatch., 273.

See *Sale*, §§ 5926-5932.

§ 5194. A patentee may stipulate, in licensing another to sell the patented article, that his licensee shall not sell it to be used beyond the original term of the patent; and a purchaser from such licensee will be guilty of infringing if he use it during the extended term. *Mitchell v. Hawley*, 16 Wall., 544.

§ 5195. A purchaser from such a licensee is entitled to no notice of the limited extent of his authority; he should inquire into it, and if he neglects to do so he purchases at his own risk. *Ibid.*

§ 5196. Where such a licensee gave the purchaser a license to use the patented article in terms sufficient to put him upon inquiry, it was held that he was entitled to no further notice of the limited authority of the licensee. *Ibid.*

§ 5197. The purchaser of a patented machine from one who is authorized to make such machines, and to use them, and to license others to use them during the term of the original patent, has no right to use it during the extended term. *Hawley v. Mitchell*, 1 Holmes, 42.

§ 5198. If one who purchases a patented article from those who have no authority to sell it obtains an assignment for his territory of the patent for the original term, he is not liable for using the article after the patent is extended. *Eunson v. Dodge*, 18 Wall., 414.

§ 5199. The purchase of a patented article lawfully manufactured and sold without restriction or condition within his territory, by the territorial assignee of a patent-right, conveys to the purchaser the right to use or sell the article in another territory for which another person has taken an assignment of the same patent. *Adams v. Burks*, 1 Holmes, 40.

§ 5200. Where the owner of a patent sells the entire interest in it for a specified territory, and the assignee sells the patented article therein, purchaser is not restricted in his use of it to that territory, neither is he liable to the patentee for using it in the territory reserved. *McKay v. Wooster*, 2 Saw., 373.

§ 5201. Neither is he liable to one to whom the right for the territory reserved is sold by an assignment subsequent to the other. *Ibid.*

See *Purchaser*, § 5185.

Purchaser — Abroad, § 5202.

§ 5202. The owner of a patent in the United States who has sold the patented article in England without restrictions or conditions cannot treat as an infringer one who has purchased the article in England of the vendee, or restrain him from using or selling it in the United States. *Holliday v. Matheson*, 24 Fed. Rep., 185.

Purchaser — Of patented article — In general, §§ 5203, 5204.

§ 5203. The purchaser of articles made under contract by a party with an infringing machine is not liable as infringer unless the contract is colorable only (act 1800). *Keplinger v. De Young*, 10 Wheat., 358.

§ 5204. The purchaser of the product of a patented machine is not an infringer. *Blanchard Gun-Stock Turning Factory v. Jacobs*, 2 Blatch., 69.

See *Decree*, § 1768. *Estoppel*, §§ 2206, 2207. *Jurisdiction*, § 3957.

293. RACE OF DILIGENCE.

See PRIORITY OF INVENTION.

294. REASONS OF APPEAL FROM COMMISSIONER.

See APPEAL, FROM COMMISSIONER, REASONS OF.

295. REBELLION.

See ABANDONMENT, §§ 25, 54. OWNERS, JOINT, §§ 4482, 4483.

296. RECEIVER.

§ 5205. The peril of a fund in litigation is cause for the interference of the court to rescue and protect it by the appointment of a receiver. *Parkhurst v. Kinsman*, 2 Blatch., 78.

§ 5206. An assignment of a patent by a receiver in a proceeding in which the defendant did not appear, and where no step was taken to bring him before the court, is a nullity. *Railroad Co. v. Trimble*, 10 Wall., 367.

§ 5207. Where a receiver of a firm, under direction of a court, had used a patented device, which being a personal license to the firm he had no right to use, *held*, that application should be made to such court to correct such order before proceeding against him in a federal court. What will be done by the federal court in the absence of such an application stated. *Curran v. Craig*, 22 Fed. Rep., 101.

§ 5208. The rule that a receiver cannot convey title to a patent, unless the owner of the legal title joins, does not apply to the transfer of a mere equitable title. *Adams v. Howard*, 22 Fed. Rep., 656.

§ 5209. Where a bill for infringement of a patent had been dismissed, with costs to defendant, for which an execution issued and was returned wholly unsatisfied, a motion by defendant for a receiver of the patents as equitable assets to be disposed of for the satisfying of the decree was denied. *Thayer v. Hart, Jr.*, 24 Fed. Rep., 558.

§ 5210. A receiver of a corporation, by the law of Pennsylvania, is a mere custodian of its property, and has no title in a patent passed to him, by virtue of which he can bring suit in his own name. *Dick v. Stuthers*, 25 Fed. Rep., 103; *Dick v. Oil Well Supply Co.*, 25 Fed. Rep., 105.

300. RECOVERY.

See DISCLAIMER, §§ 1991-2065. OWNERS, JOINT, §§ 4476, 4477. SURRENDER OF PATENTS, §§ 6240, 6241.

Recovery — *At law*, § 5211. *In equity*, § 5212.

§ 5211. In the absence of an assignment plaintiff may recover at law, notwithstanding a private agreement (act 1793). *Park v. Little*, 3 Wash. C. C., 196.

§ 5212. Benefits derived by the defendant from the use of the plaintiff's patented invention constitute valid ground for a recovery by the plaintiff. *Sargent v. Yale Lock Manufacturing Co.*, 17 Blatch., 249.

Recovery — Of profits and damages, §§ 5213-5221.

§ 5213. In equity plaintiff may seek and recover the gains and profits derived by defendant by the unlawful infringement, and he is not prejudiced because he says that those gains and profits are the damages which he has suffered. *Perry v. Corning*, 7 Blatch., 195.

§ 5214. In equity under the existing laws (§ 4921, R. S.) a complainant can recover both profits and damages. *Goodyear Dental Vulcanite Co. v. Van Antwerp*, 9 O. G., 497.

§ 5215. Where the plaintiff, when the suit was commenced, owned the patent, and the entire interest in the claim for profits and damages sought to be recovered, he has a right by virtue of such ownership to recover in the suit the profits and damages for infringements committed in the district before he owned the patent. *Consolidated Oil Well Packer Co. v. Eaton*, 12 Fed. Rep., 865.

§ 5216. A claim to recover profits or damages for past infringement cannot be severed from the title by assignment or grant so as to give a right of action for such claim in disregard of the statute. *Gordon v. Anthony*, 16 Blatch., 234.

§ 5217. The act of 1837, section 9, which allows a recovery upon such claims of a patent as are valid, though other claims are not, does not apply to inventions which are not specified in distinct claims. *Rumford Chemical Works v. Lauer*, 10 Blatch., 122.

§ 5218. Although the second claim of the patent is invalid for want of novelty, the plaintiff can recover on the first claim, although no disclaimer had been made to the second claim, provided that prior to the entry of a decree as to the first claim a disclaimer is entered as to the second claim, there not appearing to have been unreasonable neglect or delay; but he will not be entitled to costs. *Christman v. Rumsey*, 17 Blatch., 148.

§ 5219. Where, after action at law brought on two claims of a patent, a bill was filed and an injunction decreed in equity on one of the claims, and no claim was made on the second claim before the master, though the bill was broad enough to include it, and there was a final decree entered for the sum found; and the suit at law was continued on the second claim, *held*, that the cause of action in both suits was identical, and that damages would not lie in the suit at law. *Child v. Boston & Fairhaven Iron Works*, 19 Fed. Rep., 258.

§ 5220. Where recovery has been had from an infringer who manufactured and sold the patented invention for use, there can be no further recovery from his vendee of profits for the use of the device. A recovery could be had for either but not for both. *Steam Stone Cutter Co. v. Sheldons*, 21 Fed. Rep., 875.

§ 5221. There cannot be a recovery by decree for both profits and damages. *Williams v. Leonard*, 9 Blatch., 474.

Recovery — At law — Creates no license for continued use, §§ 5222-5226.

§ 5222. Recovery at law gives no license for continued use. Every subsequent use is an infringement. *Whittemore v. Cutter*, 1 Gall., 478.

§ 5223. A recovery at law for the use of an infringing machine does not operate as a license to continue the use of the machine. *Hayden v. Suffolk Mfg. Co.*, 4 Fish., 86.

§ 5224. Where no patent fee being adopted, the damages recovered for infringement are the profits for the use of the machine prior to recovery. Such recovery does not vest the title to the machine in the defendant. *Spaulding v. Page*, 1 Saw., 702.

§ 5225. When a patentee gets his remuneration in the exclusive use of his machine and the sale of its products, a recovery will not give the infringer any right to the further use of the infringing machines. *Perrigo v. Spaulding*, 13 Blatch., 389.

§ 5226. The damages recovered in a suit for infringement are merely a satisfaction for prior use, and do not free the parties infringing from the operation of a patent. *Matthews v. Spangenberg*, 15 Fed. Rep., 813.

See *Use, Right to*, §§ 6601-6603.

Recovery — Of full damages and profits — When it will vest title, §§ 5227-5237.

§§ 5227-8. Where a patentee does not use the patented machine himself, nor establish a patent fee but manufactures the patented article and sells at fixed prices, and another party infringes by making and selling the patented article, and patentee sues him and recovers the full amount of profits he would himself have obtained, he adopts the sale of the infringer, and the title to the article on which the profits were recovered vests in the purchaser from the infringer. *Spaulding v. Page*, 1 Saw., 702.

§ 5229. When a patentee claims and recovers not only the actual gains and profits of the manufacture and sale of the infringing machine, but all the damages which he has sustained therefrom, it is at least to be presumed that such recovery embraces all the profit which the

patentee would have received had he made and sold the machine with the incidental and consequential right to use it. *Gilbert & Barker Manufacturing Co. v. Bussing*, 12 Blatch., 426.

§ 5230. When a patentee gets his remuneration by patent or license fees, a recovery of the license or patent fee from an infringer, and its payment, authorizes the defendant to use the particular articles for which such recovery has been had. *Perrigo v. Spaulding*, 13 Blatch., 389.

§ 5231. When a patentee gets his remuneration by the sale of his patented machine for use by others, a recovery of profits and damages from the manufacturer of an infringing machine is a full compensation for his injury, and places the patentee in the same position as if he had made and sold the machine himself, and confers on third parties the right to use the machine while it lasts. *Ibid.*

§ 5232. When a full recovery and satisfaction from one party has been had the patentee has obtained all that the law gives him, and the particular article or machine becomes, in effect, licensed by the patentee, and may be used so long as it lasts, free from any further claim by the patentee. *Ibid.*

§ 5233. On recovery of profits in equity, the infringing sales must be adopted by the orator upon the very terms upon which defendant made them, and as much right to the inventions must follow, as if the sales had been made by the orator instead of defendant. *Steam Stone Cutter Co. v. Windsor Mfg. Co.*, 17 Blatch, 24.

§ 5234. The recovery of the profits of the sale for use vests the title to the use in the purchaser of the infringing machines. *Steam Stone Cutter Co. v. Sheldons*, 21 Fed. Rep., 875.

§ 5235. The recovery of profits and damages from the manufacturers of an infringing machine debars the patentee from recovering from a user for the use of the same machine. *Booth v. SeEVERS*, 19 O. G., 1140.

§ 5236. Where a patentee recovers from an infringing manufacturer full damages and profits on account of the infringement, the purchaser from such manufacturer, who is a user of the machine, will be protected in such use from a suit for infringement, as he would be were he a licensee from the patentee, but only on showing clearly that it was the same machine involved in the prior suit. *Allis v. Stowell*, 16 Fed. Rep., 783.

§ 5237. While the patentee may, if he choose, confine himself to a recovery for past infringement, and insist that the further use of the infringing machine be enjoined, yet, if he elect as his measure of damages the full license fee established by himself, the payment thereof operates to vest in the defendant the right to use the machine during the term of the patent, or until that particular machine is worn out. *Stutz v. Armstrong*, 25 Fed. Rep., 147.

See *Damages and Profits*, §§ 1531, 1615. *Decree*, § 1806. *Injunction*, § 3370. *License*, § 4047.

301. REDUCTION TO PRACTICE.

SEE DELAY, DILIGENCE IN REDUCTION TO PRACTICE. PRIORITY OF INVENTION, REDUCTION TO PRACTICE.

SUMMARY (*COFFIN v. OGDEN*, §§ 5238-5240) — *Prior knowledge and use, act 1836*, § 5238; *that of a single person is sufficient*, § 5239; *what constitutes such use*, § 5240.

COFFIN v. OGDEN.

(18 Wallace, 120-125. 1873.)

APPEAL from U. S. Circuit Court, Southern District of New York.

Opinion by MR. JUSTICE SWAYNE.

STATEMENT OF FACTS.—The appellant was the complainant in the court below, and filed this bill to enjoin the defendants from infringing the patent upon which the bill is founded. The patent is for a door lock with a latch reversible, so that the lock can be applied to doors opening either to the right or the left hand. It was granted originally on the 11th of June, 1861 [No. 32,521], to Charles R. Miller, assignee of William S. Kirkham, and reissued to Miller on the 27th of January, 1863. On the 10th of June, 1864, Miller assigned the entire patent to the complainant. No question is raised as to the complainant's title, nor as to the alleged infringement by the defendants. The answer alleges that the thing patented, or a material and substantial part thereof, had been, prior to the supposed invention thereof by Kirkham, known and used by divers persons in the United States, and that among them were

Barthol Erbe, residing at Birmingham, near Pittsburg, and Andrew Patterson, Henry Masta and Bernard Brossi, residing at Pittsburg, and that all these persons had such knowledge at Pittsburg. The appellees insist that Erbe was the prior inventor, and that this priority is fatal to the patent. This proposition, in its aspects of fact and of law, is the only one which we have found it necessary to consider.

Kirkham made his invention in March, 1861. This is clearly shown by the testimony, and there is no controversy between the parties on the subject. It is equally clear that Erbe made his invention not later than January 1, 1861. This was not controverted by the counsel for the appellant, but it was insisted that the facts touching that invention were not such as to make it available to the appellees, as against the later invention of Kirkham and the patent founded upon it. This renders it necessary to examine carefully the testimony upon the subject.

Erbe's deposition was taken at Pittsburg upon interrogatories agreed upon by the parties and sent out from New York. He made the lock marked H. E. (It is the exhibit of the appellees, so marked.) He made the first lock like it in the latter part of the year 1860. He made three such before he made the exhibit lock. The first he gave to Jones, Wallingford & Co. The second he sent to Washington, when he applied for a patent. The third he made for a friend of Jones. He thinks the lock he gave to Jones, Wallingford & Co. was applied to a door, but is not certain.

Brossi. In 1860 he was engaged in lockmaking for the Jones & Nimmick Manufacturing Company. He had known Erbe about seventeen years. In 1860 Erbe was foreman in the lock shop of Jones, Wallingford & Co., at Pittsburg. In that year, and before the 1st of January, 1861, he went to Erbe's house. Erbe there showed him a lock, and how it worked, so that it could be used right or left. He says: "He (Erbe) showed me the follower made in two pieces. One piece you take out when you take the knob away. The other part — the main part of the follower — slides forward in the case of the lock with the latch, so you can take the square part of the latch and turn it around left or right, whichever way a person wants to." He had then been a lockmaker eight years. He examined the lock carefully. He had never seen a reversible lock before. He has examined the exhibit lock. It is the same in construction. The only difference is, that the original lock was made of rough wrought iron. It was a complete lock, and capable of working. Erbe thought it a great thing. Erbe showed him the lock twice afterwards at Jones, Wallingford & Co.'s. He saw such a lock attached to the office door there, and working, but don't know whether it was the first lock made or one made afterwards.

Masta. In 1860 he was a patternmaker for Jones, Wallingford & Co. Had known Erbe fourteen or fifteen years. Erbe showed him his improvement in reversible locks New Year's day, 1861. He examined the lock with the case open. "You had to pull out the spindle, and the hub was fitted so that it would slide between the spindle and the plate and let the latch forward."
"The whole hub was made of three pieces. One part was solid to the spindle or hub shanks, and then the hub that slides between the plate and case, and a washer at the other side of the spindle." "There is not a particle of difference between the exhibit and the original lock. It is all the same." He identifies the time by the facts that he commenced building a house in 1861, and that year is marked on the water conductor under the roof.

Patterson. Until recently he was a manufacturer of locks and other small hardware. In the year 1860 he was the superintendent of the lock factory of Jones, Wallingford & Co. and their successors in Pittsburg. He had known Erbe since 1856. About the 1st of January, 1861, Erbe showed him an improved reversible lock of his invention like the exhibit lock. The improvement "consisted in constructing the hub or follower so that when the spindle was withdrawn the hub would slide forward between the cases so that the head of the latch would protrude beyond the face of the lock, so as to permit its reversal from right to left; the latch-head being connected with the yoke by a swivel joint, so that it might be reversed. . . . It was our uniform practice to put our new locks on the doors about the office to test them, and I believe that one was put on; but at this distance of time I cannot say positively that it was."

There is no proof that Erbe made any locks according to his invention here in question but those mentioned in his testimony. He applied for a patent in 1864 and failed to get it. Why is not disclosed in the record.

The appellants called no witnesses at Pittsburg or elsewhere to contradict or impeach those for the appellees. Brossi was subjected to a rigorous cross-examination, but, in our judgment, it in nowise diminishes the effect of his testimony in chief. The counsel for the appellants asked with emphasis, in the argument here, why the defendants had not called Jones, of the firm of Jones, Wallingford & Co.? The question was well retorted, why was he not called by the other side? He does not appear in a favorable light. He prevented Erbe, who was in his employ, from going to New York to testify in behalf of the defendants, and avowed a determination to prevent, if it were possible, their obtaining the testimony of Brossi, Masta and Patterson. It is difficult not to regard him with a feeling akin to that which attends the presumptions *in odium spoliatoris*. We entertain no doubt that the testimony of all these witnesses is true in every particular, including the statement of Brossi as to putting the lock on the door. If that were false, doubtless Jones would have been called to gainsay it. His hostility to the defendants is a sufficient reason for their not calling him for any purpose.

§ 5238. *What will constitute prior knowledge and use, under the patent act of 1836, such as will defeat a patent.*

The case arose while the patent act of 1836 was in force and must be decided under its provisions. The sixth section of that act requires that to entitle the applicant to a patent his invention or discovery must be one "not known or used by others before his invention or discovery thereof." The fifteenth section allowed a party sued for infringement to prove, among other defenses, that the patentee "was not the original and first inventor of the thing patented, or of a substantial and material part thereof claimed to be new."

The whole act is to be taken together and construed in the light of the context. The meaning of these sections must be sought in the import of their language, and in the object and policy of the legislature in enacting them. *Gayler v. Wilder*, 10 How., 496 (§§ 385-96, *supra*). The invention or discovery relied upon as a defense must have been complete, and capable of producing the result sought to be accomplished; and this must be shown by the defendant. The burden of proof rests upon him, and every reasonable doubt should be resolved against him. If the thing were embryotic or inchoate; if it rested in speculation or experiment; if the process pursued for its develop-

ment had failed to reach the point of consummation, it cannot avail to defeat a patent founded upon a discovery or invention which was completed, while in the other case there was only progress, however near that progress may have approximated to the end in view. The law requires not conjecture, but certainty. If the question relate to a machine, the conception must have been clothed in substantial forms which demonstrate at once its practical efficacy and utility. *Reid v. Cutter*, 1 Story, 590.

§ 5239. *Prior knowledge and use by a single person is sufficient.*

The prior knowledge and use by a single person is sufficient. The number is immaterial. *Bedford v. Hunt*, 1 Mason, 302. Until his work *is done*, the inventor has given nothing to the public. In *Gayler v. Wilder* the views of this court upon the subject were thus expressed: "We do not understand the circuit court to have said that the omission of Conner to try his safe by the proper tests would deprive it of its priority; nor his omission to bring it into public use. He might have omitted both, and also abandoned its use and been ignorant of the extent of its value; yet if it was the same with Fitzgerald's, the latter would not, upon such grounds, be entitled to a patent; provided Conner's safe and its mode of construction were still in the memory of Conner before they were recalled by Fitzgerald's patent." Whether the proposition expressed by the proviso in the last sentence is a sound one, it is not necessary in this case to consider.

§ 5240. *If at least three perfect specimens of an improvement have been completed and exhibited to as many witnesses, and if one of them has been applied in actual use, it is fatal to a patent obtained by a subsequent inventor for the same improvement.*

Here it is abundantly proved that the lock originally made by Erbe "was complete and capable of working." The priority of Erbe's invention is clearly shown. It was known at the time to at least five persons, including Jones, and probably to many others in the shop where Erbe worked; and the lock was put in use, being applied to a door, as proved by Brossi. It was thus tested and shown to be successful. These facts bring the case made by the appellees within the severest legal tests which can be applied to them. The defense relied upon is fully made out.

Decree affirmed.

Reduction to practice — *Defined*, §§ 5241, 5242. *What amounts to*, §§ 5243-5245; *what does not*, §§ 5246, 5247.

§ 5241. Reduction to practice in practical form as distinguished from a model. *Electric R. R. Signal Co. v. Hall R. R. Signal Co.*, 6 Fed. Rep., 603.

§ 5242. The expression "reduced to practice" does not import the bringing the invention into actual use. When applied to an invention, it generally means the reducing it into such form that it may be used so as not to be a mere theory. A small model, demonstrating the practicability of the invention, is a sufficient reduction to practice. Size is of no importance. *Heath v. Hildreth*, 1 MacA. Pat. Cases, 12. •

§ 5243. Where the invention is not of a mere philosophical speculation, abstraction or theory, but of something corporeal, something to be manufactured, the applicant need not show that he has reduced his invention to practice otherwise than by filing his specification and furnishing drawings and a model, as required by the statute, where the nature of the case admits of drawings or of a representation by model. *Screw Co. v. Sloan*, 1 MacA. Pat. Cases, 210.

§ 5244. An inventor has reduced his invention to practice when he has so described it upon paper, with such drawings or models as will enable any person skilled in the art to make and use the same; but he is not obliged to furnish drawings or model until he makes his application. *Perry v. Cornell*, 1 MacA. Pat. Cases, 68.

§ 5245. Where an inventor has complied with the provisions of the law by duly filing an application clearly showing and describing the nature and operation of the invention by speci-

fication and drawings verified by oath, he has reduced the principle of the invention to practice for the purpose of obtaining a patent; and if the invention is patentable, he is entitled to the grant of a patent therefor. *Burrows v. Witherill*, 1 MacA. Pat. Cases, 315.

§ 5246. Experiments tried upon an arrangement of materials corresponding to the structure of a new armor for ships is not such a perfecting of the invention as will sustain a patent for it if it is described in a foreign publication before anything further is done toward reducing it to practice. *Webb v. Quintard*, 9 Blatch., 352.

§ 5247. Neither will a letter written to the British admiralty, asking their aid in making experiments, obviate the effect of a published description of the invention. *Ibid.*

See *Drawings*, §§ 2076-2080. *Invention*, §§ 3544-3557.

Reduction to practice — *Not essential to securing patent*, §§ 5248-5255; *nor to validity of patent*, §§ 5256-5258.

§ 5248. Reducing to practice differs from bringing into use. There is no law requiring the applicant to reduce his invention to actual use before he can obtain a patent. *Perry v. Cornell*, 1 MacA. Pat. Cases, 68.

§ 5249. There is no express requirement in the patent laws that an inventor shall reduce his invention to actual use before he can obtain a patent, nor is there any time limited within which he is to disclose his invention before application for a patent. *Stephens v. Salisbury*, 1 MacA. Pat. Cases, 379.

§ 5250. None of the patent laws has ever required that the invention should be in use or reduced to practice before the issuing of the patent otherwise than by a model, drawings, and specification containing a written description of the invention. *Heath v. Hildreth*, 1 MacA. Pat. Cases, 12.

§ 5251. By the seventh section of the act of 1836 the commissioner is bound to issue a patent upon the compliance on the part of the applicant with the conditions there named, and upon the appearance of certain facts; and the reduction of the invention to practice is not named as one of these conditions. *Ibid.*

§ 5252. There being no law which requires the inventor to put his invention into practice or use before obtaining his patent, it is immaterial to him whether the second inventor has put it in practice or not. That fact cannot affect his rights when involved in interference with a patentee under the eighth section of the act of 1836. Neither that section nor any other section of that or any other act makes the right of the patentee or of the applicant depend upon the fact of the invention being reduced to actual practice, except in the case of the *alien patentee*. *Ibid.*

§ 5253. For the purpose of obtaining a patent it is not necessary to show that the invention has been reduced to practice, if it appear that the invention was devised and explained to others, and was not subsequently abandoned. *Hill v. Dunklee*, 1 MacA. Pat. Cases, 475.

§ 5254. Although an invention has not been reduced to actual practical use, yet if it appear to be capable of being so reduced, it will be sufficient to entitle the party to a patent. *Chandler v. Ladd*, 1 MacA. Pat. Cases, 493.

§ 5255. The conception of the idea of a new invention is not sufficient. It must be reduced to some practical use before it can be patented, or set up and relied upon to defeat a patent. *Many v. Jagger*, 1 Blatch., 372.

§ 5256. It is no objection to the validity of a patent to a citizen that the thing described in the specification has never been reduced to actual practice, either before or since the date, provided that it is capable of useful and successful operation when constructed as described. *Wheeler v. Clipper Mower & Reaper Co.*, 10 Blatch., 181.

§ 5257. If the invention be such that, when the thing invented shall be constructed according to the model and specifications filed, it will operate successfully, as a practical and useful thing, the inventor has satisfied the law, and his patent is valid. He is not bound by law to construct it in order to preserve his patent. *Broadnax v. Central Stock Yard & Transit Co.*, 4 Fed. Rep., 214.

§ 5258. Mere discovery of an improvement does not make it a proper subject of a patent unless it be embodied in a working machine and adapted to practical use. Whoever first perfects a machine and makes it capable of operation is entitled to a patent. *Judson v. Bradford*, 16 O. G., 171.

Reduction to practice — *In general*, §§ 5259, 5260. See *Priority of Invention*, §§ 4986-5006. *Delay*, §§ 1878-1882.

§ 5259. The patentee has the right to take up the improvement at the point where it was left by his predecessor; and if, by the exercise of his own inventive skill, he is successful in first perfecting and reducing to practice the invention which his predecessor undertook to make,

is entitled to the merit of such an improvement as an original inventor. *Union Paper Bag Machine Co. v. Pultz & Walkley Co.*, 15 Blatch., 160.

§ 5260. A putting of an invention into use is generally strong evidence of a reduction of it to practice. If the adaptation to use, or even the use itself, is merely experimental, the invention is not perfected. But use is not necessarily required in order to show perfection or completion, if capable from its structure of successful working. *Coffin v. Ogden*, 7 Blatch., 61.

See *Date of Invention*, §§ 1726-1730. *Invention, Prior*, §§ 3697-3713. *Inventor, Prior*, §§ 3744-3761. *Reissues*, § 5317.

302. REFERENCE TO MASTER, PRACTICE.

See PRACTICE, REFERENCE TO MASTER.

303. REHEARINGS.

Rehearings — Particular cases — Orders, §§ 5261-5264. *Denied*, §§ 5265-5271.

§ 5261. Where it appeared doubtful whether under the averments in the answer a decree adverse to one of plaintiff's patents could be passed on the ground of insufficient description, on which the court had held it void, a rehearing was ordered so far as that patent was concerned, with leave to amend answer. *Schneider v. Thill*, 5 B. & A., 595.

§ 5262. After interlocutory decree and reference to a master for an account, a rule to show cause why the decree should not be opened and a rehearing ordered granted, it being alleged that a court of equity, in view of *Root v. Lake Shore & Michigan Southern R. Co.*, 21 O. G., 1112, had no jurisdiction, and that the defendants had newly discovered evidence to prove that the complainants' patent was invalid. *Spring v. Domestic Sewing Machine Co.*, 22 O. G., 1445.

§ 5263. A rehearing granted to review a decision upon which the decree for an accounting rested, in view of the decisions of the supreme court relating to reissues, and found sufficient to change that made in the former case without prejudice to the proceedings before the master. *American Diamond Rock-Boring Co. v. Sheldons*, 32 O. G., 1240.

§ 5264. Where the claims of the patent sued on, upon which a decree had been directed for plaintiff, had been disallowed during the pendency of another application of the same inventor, the disallowance acquiesced in and all right of appeal waived by him, but were none the less subsequently patented, a rehearing was granted to introduce such evidence, though the petition failed to show that petitioners were entitled to it as a matter of right, because in view of the newness of the patent it was desirable that the cases should be as full as may be in respect to the validity of the claims sued upon. *Railway Register Mfg. Co. v. Broadway & 7th Ave. R. Co.*, 32 O. G., 257.

§ 5265. Jordan and Smith, being joint applicants and patentees, sold their patent to plaintiffs, who, after suit, obtained an interlocutory decree. On petition of defendants to open the case and file an additional answer setting up the newly-discovered fact that Jordan was the sole inventor of the subject-matter covered by the patent, said petition being based upon Jordan's affidavit that he was the sole inventor, coupled with affidavits of other parties who swear that they have heard Jordan speak of himself as the inventor, and never heard Smith make any such pretension, *held*, that if the defendants' affidavits, alone and uncontradicted, were the evidence at a final hearing, they could hardly avail to persuade the court that the invention was wholly Jordan's. *Collins Co. v. Coes*, 8 Fed. Rep., 517.

§ 5266. Defendants' affidavits being met by proof that Jordan and Smith repeatedly spoke of the invention as joint, and by affirmative evidence that Smith made a wrench before Jordan began to experiment, in which the step-plate was sustained by a set-screw, the defendants contend that Smith is the sole inventor. *Held*, that the wrench which Smith made would be an infringement of the patent, but that that fact does not prove that it anticipated the patent, and that as made by Smith it was merely an experiment on the way to the completed invention, and has no effect at all. Leave to open the case refused. *Ibid*.

§ 5267. *Held*, on motion for rehearing and application to amend answer, that in no class of cases should the practice of allowing rehearings be more strictly guarded than in cases where the defense of prior use is relied on to defeat the novelty of a patented invention, since it is seldom that a defendant cannot make it appear that he has discovered additional evidence; and reasonable diligence not having been exercised, the motion was denied. *Hicks v. Ferdinand*, 20 Fed. Rep., 111.

§ 5268. Demurrer to a petition for a rehearing in a patent case sustained, on the ground of laches in the discovery of the matters therein set forth; that the new proofs were immaterial; of want of equitable grounds for sustaining the petition. *Hoe v. Kahler*, 25 Fed. Rep., 271.

§ 5269. Application for rehearing based on alleged newly-discovered evidence, made three years after discovery of the evidence, refused for laches, it appearing that such evidence was known to defendant on the former trial. *Colgate v. Western Union Telegraph Co.*, 19 Fed. Rep., 828.

§ 5270. An application to reopen case for further hearing and to amend answer, the petition thereof appearing defective in the particulars enumerated, denied; but conditional leave granted, for reasons stated, to amend defective petition and to use certain of the affidavits and exhibits accompanying the same. *Allis v. Stowell*, 18 O. G., 465.

§ 5271. Where petition for rehearing was asked on the ground that, since the interlocutory decree was entered, decisions of the supreme court had laid down a rule for ascertaining the validity of reissues, the motion was denied on the ground that the reissue patent was good for the single claim of the original repeated therein. *Cote v. Moffitt*, 15 Fed. Rep., 345.

Rehearing — In general, §§ 5272-5285.

§ 5272. Equity practice on rehearing. *American Giant Powder Co. v. Cal. Vigorit Powder Co.*, 6 Saw., 508.

§ 5273. A rehearing should not be granted for newly-discovered evidence, where the evidence could have been obtained by reasonable diligence on the first hearing, nor when it is merely cumulative to that previously received, nor when, if presented, it would not have changed the result. *Ibid.*

§ 5274. A rehearing may be granted at any time before final decree. *Reeves v. Keystone Bridge Co.*, 9 O. G., 885.

§ 5275. The practice to ask for a rehearing is by petition to court for leave to file a supplemental bill, setting forth the newly-discovered evidence, and for a rehearing of the cause at the time when the supplemental bill may be ready for hearing. *Ibid.*

§ 5276. The defendants must satisfy the court that the omission to produce the evidence is not due to any negligence on their part. *Ibid.*

§ 5277. The new evidence must be material. *Ibid.*

§ 5278. A rehearing having been granted and new evidence introduced, rendering necessary the opening of the whole record, the old and new evidence will be considered together. *Henry v. Francetown Soapstone Co.*, 2 Fed. Rep., 78.

§ 5279. It is a valid objection to a motion for rehearing upon the ground of newly-discovered testimony, that, so far as the motion and accompanying affidavits disclose, there is no adequate reason, even if the supposed new matter had been presented in time, for changing the decree. *Brown v. Deere*, 2 McC., 425.

§ 5280. It is a valid objection to a motion for rehearing that it is not presented within the time prescribed by law. *Ibid.*

§ 5281. A rehearing will not be granted on the ground that the record on which the case was heard was imperfect, where it appears that the omitted matter presents nothing material to the merits of the case or matter further establishing that held sufficiently proved by the court in giving its decree. *Ambler v. Whipple*, 23 Wall., 278.

§ 5282. On motion for rehearing after an interlocutory decree, on the ground of newly-discovered evidence, the burden is on defendants to show that omission to produce testimony was not due to any negligence on their part, and that they were diligent in their efforts to obtain it; and no such diligence being shown, the motion was refused, although in the stipulation filed plaintiff admitted diligence on the part of defendants, and though on construction of the patent the evidence was material. *Gillette v. Bate Refrigerating Co.*, 12 Fed. Rep., 108.

§ 5283. A motion for a rehearing on the ground of new and further evidence is properly demurrable, unless sustained with an allegation that such proof could not have previously been obtained by the defendant with reasonable diligence. *Page v. Holmes Burglar Alarm Telegraph Co.*, 18 Blatch., 118.

§ 5284. A rehearing cannot be obtained on the ground of surprise, because an adversary's counsel argued otherwise than was expected. *Everest v. Buffalo Lubricating Oil Co.*, 22 Fed. Rep., 252.

§ 5285. An application for rehearing in a court of original jurisdiction, after entry of a final decree, is not an *ex parte* proceeding, but must be presented on notice and considered after the other side has had an opportunity to answer it. *American Giant Powder Co. v. Cal. Vigorit Powder Co.*, 6 Saw., 508.

See *Affidavits*, §§ 173, 177.

Rehearing — In patent office, §§ 5286-5291.

§ 5286. The commissioner, in the exercise of his discretionary power, may set aside his own decision in an interference proceeding and rehear the parties thereto. It is an act over which

the judge has no control nor jurisdiction, and cannot form a valid ground of appeal. *Matthew v. Wade*, 1 MacA. Pat. Cases, 143.

§ 5287. The commissioner may, therefore, rehear the parties to an interference upon the same question and revise his former decision in the case. *Ibid.*

§ 5288. Motions to rehear in chancery and for new trials at law are motions addressed to the discretion of the court, from the refusal to grant which there lies no appeal. *In re Rouse*, 1 MacA. Pat. Cases, 286.

§ 5289. The filing of a second application by the defeated party to an interference is in effect an effort to have the decision reviewed and reversed upon a rehearing or new trial of the first case; and from the refusal of the commissioner to declare a new interference thereon between the same parties no appeal lies to the judge. *Ibid.*

§ 5290. When the decision of the commissioner was reversed by the judge upon the ground that the depositions of the prevailing party were improperly taken, it is competent for the commissioner to grant a new trial to afford the parties the opportunity of having their testimony fully and impartially taken. *Nichols v. Harris*, 1 MacA. Pat. Cases, 362.

§ 5291. When a new party is included in such rehearing or new trial of an interference, it does not become a new case within the spirit of the rule excluding depositions taken in another case not between the same parties. Following the chancery rather than the common law practice, the new party applicant comes in subject to the depositions already taken; and as between the original parties there is no lack of *mutuality*, since the parties and the subject-matter are the same. *Carter v. Carter*, 1 MacA. Pat. Cases, 388.

SEYMOUR v. OSBORNE.

(11 Wallace, 516-560. 1870.)

APPEAL from U. S. Circuit Court, Northern District of New York.

STATEMENT OF FACTS.—Seymour was the owner of five patents relating to the machinery of harvesters, two of them for his own inventions, and the other three he held as assignee of Palmer and Williams. The bill in this case was filed by Seymour against Osborne for infringement of the patents. The bill was dismissed and complainants appealed. Further facts appear in the opinion of the court.

§ 5292. *Importance of suits relating to patent-rights.*

Opinion by MR. JUSTICE CLIFFORD.

Controversies respecting the infringement of letters patent possess, in many cases, a degree of importance much beyond the profits or damages claimed for

the alleged unlawful use of the invention, as the pleadings usually put in issue, in one form or another, the validity of the letters patent alleged to be infringed, and frequently involve, directly or indirectly, the same inquiry in regard to the letters patent set up in defense as superseding the patent on which the suit is founded. Such being the state of the pleadings, the result, whatever it may be, whether for the party suing or for the party defending, must oftentimes determine rights of property of much greater value than the amount of the profits or damages claimed for the alleged infringement of the letters patent.

Inventions secured by letters patent are property in the holder of the patent, and as such are as much entitled to protection as any other property, consisting of a franchise, during the term for which the franchise or the exclusive right is granted.

Letters patent are not to be regarded as monopolies, created by the executive authority at the expense and to the prejudice of all the community except the persons therein named as patentees, but as public franchises granted to the inventors of new and useful improvements for the purpose of securing to them, as such inventors, for the limited term therein mentioned, the exclusive right and liberty to make and use and vend to others to be used their own inventions, as tending to promote the progress of science and the useful arts, and as matter of compensation to the inventors for their labor, toil and expense in making the inventions, and reducing the same to practice for the public benefit, as contemplated by the constitution and sanctioned by the laws of congress.

Five several letters patent were owned by the complainants when the present suit was commenced, and they allege in the bill of complaint that the respondents have infringed their exclusive rights as secured to them in each and every one of those letters patent. Four of the letters patent are reissued letters patent, and are numbered and described as follows: (1) Reissued letters patent No. 4, dated January 1, 1861, for a new and useful improvement in harvesters, being one of a second reissue in two separate patents, on amended specifications, as more fully explained in the pleadings and the patents annexed to the printed record. (2) Reissued letters patent No. 1682, dated May 31, 1864; also for a new and useful improvement in harvesters, being the second reissue from the before-mentioned reissue when the invention was divided into two parts. They both purport to be founded upon the original patent granted to Aaron Palmer and Stephen G. Williams, dated July 1, 1851, which was for a new and useful improvement in harvesters, and the reissued patents were fully extended for seven years from the expiration of the original term. (3) Reissued letters patent No. 72, dated May 7, 1861, being a reissue of one of three parts of a prior reissue of the original patent, dated July 8, 1851, which was granted to William H. Seymour for a new and useful improvement in reaping machines. (4) Reissued letters patent No. 1683, dated May 31, 1864, being a reissue of another of the three parts of the prior reissue of that patent, as more fully explained in the pleadings; the charge being that the respondents have infringed the first claim. (5) Superadded to those several charges against the respondents is the further one that they have also infringed certain original letters patent owned by the complainants, dated January 24, 1854, which secures to them, as assignees of Palmer and Williams, certain other new and useful improvements in grain harvesters besides those embodied in the several reissued letters patent to which reference has been made.

Founded upon those several letters patent, the bill of complaint, which is drawn in the usual form, alleges that the respondents have unlawfully made and used, and vended to others to be used, the respective inventions therein described, and the complainants pray for an account and for an injunction. Service was made upon the respondents, and they appeared and filed an answer, setting up several defenses to each of the patents described in the bill of complaint. Responsive to the answer the complainants filed the general replication, and the cause being at issue they put in evidence the five several letters patent on which the suit is founded, the respondents consenting that copies of the same, and of the respective certificates of extension mentioned in the pleadings, might be substituted in the record in the place of the originals as introduced in evidence.

Other proofs were introduced and the parties were fully heard, but the circuit court was of the opinion that the proofs introduced by the complainants were not sufficient to show any infringement of their rights, and accordingly entered a decree for the respondents, dismissing the bill of complaint. Dissatisfied with that conclusion, the complainants appealed to this court and now seek to reverse that decree. Separate defenses having been set up in the answer to each of the five letters patent, it will be necessary to a clear understanding of the controversy, and to prevent any misunderstanding as to the views of the court, to describe somewhat more fully the nature of the several inventions and the objects which they were designed to accomplish.

§ 5293. *Reissued patent No. 1110, January 1, 1861, original patent No. 8192, Palmer & Williams, July 1, 1851, harvester, examined.*

I. Explained in general terms, the invention secured in the first mentioned reissued patent, numbered 4, consists in arranging an automatic sweep-rake in a harvesting machine in such relation to a quadrant-shaped platform, upon which the cut grain falls as it is cut, that it shall vibrate over the same at suitable intervals to discharge the cut grain in gavels upon the ground.

Specific description is given, in the first place, of the frame of the machine, which, as represented, is composed of three longitudinal beams and two transverse beams securely fastened to each other at their points of intersection. Next follows a reference to the driving-wheel, which, as represented, is placed between the outer longitudinal beam and the central beam, having its bearings on arched supports or brackets rising from each of the beams composing the frame. Guard fingers through which a sickle vibrates are secured upon the front edge of a platform shaped like a quadrant or sector of a circle, of which the arm or lever that carries the rake-head forms the radius, and the fulcrum-pin on which the arm or lever vibrates constitutes the center, the whole operating so that the grain is swept round on an arc of a circle and discharged in gavels upon the ground behind the driving-wheel.

Minute details of all the other elements of the machine are also given in the subsequent parts of the specifications, and of their modes of operation, and the specification concludes with the claim which, in substance, is discharging the cut grain from a quadrant-shaped platform on which it falls as it is cut, by means of an automatic sweep-rake vibrating over the same, substantially as described, which must be understood as referring back to the description contained in the body of the specification.

§ 5294. *Reissued patent No. 1682, May 31, 1864, original patent No. 8192, examined.*

II. Two combinations are mentioned in the specification of the reissued

letters patent No. 1682, but it is only necessary to refer to the first, as it is not alleged that the respondents have infringed the second claim. Described separately, the ingredients of the first claim are as follows: (1) The cutting apparatus to sever the standing stalks of grain. (2) The quadrant-shaped platform arranged behind the cutting apparatus to receive the severed stalks of grain as they fall. (3) The sweep-rake and the described mechanism to operate the same in such manner that the teeth shall move in circular curves over the platform when they are acting on the grain.

Reference must also be made to the other two reissued letters patent embraced in the pleadings. Both have respect to an improvement made in reaping machines, and they were both granted to secure material parts of an original invention once before surrendered and reissued because the letters patent were defective and inoperative. Before the term of the original patent expired the patents were extended for the further term of seven years.

§ 5295. *Reissued patent No. (72) 1177, March 7, 1861, original patent No. 8212, W. H. Seymour, July 8, 1851, harvesters, examined.*

III. Number 72 consists in constructing the platform of a reaping machine, upon which the cut grain falls as it is cut, in the shape of a quadrant, or of a sector of a circle, placed just behind the cutting apparatus, and in such relation to the main frame that the grain, whether raked off by hand or by machinery located behind the cutting apparatus, can be swept around on the arc of a circle and be dropped, heads foremost, on the ground far enough from the standing grain to leave room for the team and machine to pass between the gavels and the standing grain without the necessity of taking up the gavels before the machine comes round to cut the next swath.

§ 5296. *Reissued patent No. 1683, May 31, 1864, original patent No. 8212, examined.*

IV. They also acquired title to the invention secured in the remaining reissued letters patent mentioned in the bill of complaint, to wit, number 1683; but it will be sufficient to refer to the first claim of the same, as the second is not the subject of controversy in this suit. As described in the specification, the ingredients of the first claim are the cutting apparatus to sever the stalks, the reel to incline the heads of the stalks towards the cutting apparatus, and the quadrant-shaped platform, located in the rear of the cutting apparatus, to receive the cut stalks as they fall before the operation of the sweep-rake begins. Designed as the improvements were to accomplish the same object as the other two improvements previously described, the patentees or owners of the several letters patent elected to compromise rather than litigate, and the result was that the entire interest became ultimately vested in the appellants.

§ 5297. *Further improvements patented.*

V. Patented improvements in the method of transferring motion from the driving-wheel of a reaping machine to the rake on the platform of the machine, and in the method of hanging the reel so as to dispense with any post on the side of the machine next the grain, were also acquired by the appellants as a part of the same arrangement, and they charge in the bill of complaint that the second claim of the original letters patent, embodying that improvement, is also infringed by the respondents.

§ 5298. *A patent is prima facie evidence that the patentee is inventor and lawful owner of the invention.*

Power to grant letters patent is conferred by law upon the commissioner of

patents, and when that power has been lawfully exercised, and a patent has been duly granted, it is of itself *prima facie* evidence that the patentee is the original and first inventor of that which is therein described and secured to him as his invention. *White v. Allen*, 2 Cliff., 228. Persons seeking redress for the unlawful use of letters patent, in which they have an interest, are obliged to allege and prove that they, or those under whom they claim, are the original and first inventors of the improvement embodied in the letters patent on which the suit is founded, and that the same have been infringed by the party against whom the suit is brought.

Undoubtedly the burden to establish both of those allegations is, in the first place, upon the party instituting the suit, as they lie at the foundation of every such claim; but the law is well settled that the letters patent in question, where they are introduced in evidence in support of the claim, if they are in due form, afford a *prima facie* presumption that the first-named allegation is true; and the rule is equally well settled that that presumption, in the absence of satisfactory proof to the contrary, is sufficient to entitle the party instituting the suit to recover for the alleged violation of the exclusive rights secured to him in the letters patent.

§ 5299. *After a patent has been given in evidence, the burden of proof is upon the defendant.*

Availing themselves of that rule of law, the complainants in this case introduced the five several letters patent on which the suit is founded, and they contend, and well contend, that their effect as evidence is to cast the burden of proof upon the respondents to show that the respective patentees are not the original and first inventors of the improvements embodied in the several letters patent, as they have alleged in their answer.

§ 5300. *Thirty days' notice of defense assailing the validity of the patent is required.*

Parties defendants, sued as infringers, are not allowed in an action at law to set up the defense of a previous invention, knowledge or use of the thing patented, unless they have given notice of such a defense thirty days before the trial and have stated in the notice "the names and places of residence of those whom they intend to prove to have possessed a prior knowledge of the thing, and where the same had been used;" and the settled practice in equity is to require the respondent, as a condition precedent to such defense, to give the complainant substantially the same information in his answer. *Agawam Co. v. Jordan*, 7 Wall., 596; *Teese v. Huntingdon*, 23 How., 10.

Notices of the kind were given by the respondents in this case, but it will be more convenient to examine certain special defenses set up in the answer before entering upon that inquiry, as the decree must be affirmed, in any event, if any one of those defenses is well founded, whether the issues of novelty and of infringement are determined in favor of the complainants or respondents. All of the special defenses apply to the original patent as well as to those which have been reissued, except such as are founded upon the acts or omissions of the commissioner in granting the reissues, which, of course, are not applicable to the former. They are eight in number, as exhibited in the answer, the respondents alleging in each that the letters patent are void and of no effect for the reasons therein set forth and they will be briefly examined in the order in which they are pleaded.

§ 5301. *Recitals in letters patent that the required oath was taken before the same was granted are, in the absence of fraud, conclusive evidence that it was so taken.*

1. That the letters patent are void and of no effect because the patentees did not make oath, before the patents were granted, that they did verily believe that they were the original and first inventors of the improvements for which the letters patent were solicited.

Congress possesses the power to pass laws to secure to inventors, for limited times, the exclusive right to their inventions, and congress, in pursuance of that article of the constitution, has conferred the power to grant letters patent for that purpose upon the commissioner of patents. Persons who have made an invention, and who desire to obtain an exclusive property therein, may make application in writing to the commissioner of patents, and the provision is that the commissioner, on due proceedings had, may grant a patent for the said invention.

Inventors of machines are required, before they receive a patent, to deliver a written description of their inventions, and of the manner and process of making, constructing and using the same, in such "full, clear and exact terms" as to enable any person skilled in the art or science to make, construct and use the same, and fully to explain the principle by which the invention may be distinguished from others of like kind; and they are also required to specify and point out the part, improvement or combination which they claim as their invention.

Doubtless these several requirements may be regarded as conditions precedent to the right of the commissioner to grant the application, as they must appear on the face of the letters patent, and are always open to legal construction as to their sufficiency. Drawings are also required in certain cases; and where the invention is such that it may be represented by a model, the applicant for a patent is required to furnish a model of the same; and the further requirement is that he shall make oath or affirmation that he does verily believe that he is the original and first inventor of the improvement for which he solicits a patent, and that he does not know that the same was ever before known or used.

Importance, it is conceded, must be attached to the latter requirement, but it is certain that the oath or affirmation may be taken elsewhere than before the commissioner, as the same section provides that it "may be made before any person authorized by law to administer oaths." 5 Stat. at Large, 119.

Extended examination of the question, however, is unnecessary, as every one of the letters patent on which the suit is founded contains the recital that the required oath was taken before the same was granted, and the court is of the opinion that those recitals, in the absence of fraud, are conclusive evidence that the necessary oaths were taken by the applicants before the letters patent were granted.

§ 5302. *What applicants are required to specify and point out in their claims and specifications.*

2. That the letters patent are void and of no effect, because the patentees did not specify and point out in their specifications and claims the parts, improvements or combinations which they claim as their respective inventions. Grant the theory of fact assumed in the proposition and the conclusion would follow, but the whole theory of the proposition as applied to the present case is founded in error.

§ 5303. *Sufficient description of a machine.*

Inventions secured by letters patent sometimes, though rarely, embrace an entire machine, and in such cases it is sufficient if it appear that the claim is co-extensive with the invention. Other inventions embrace only one or more parts of a machine, as the coulter of a plough, or the divider or sweep-rake of a reaping machine; and in such cases the part or parts claimed must be specified and pointed out so that constructors, other inventors and the public may know how to make the invention, and what is withdrawn from general use.

§ 5304. — *of a combination of new and old elements.*

Patented inventions are also made which embrace both a new ingredient and a combination of old ingredients embodied in the same machine. Even more particularity of description is required in such a case, as the property of the patentee consists, not only in the new ingredient, but also in the new combination, and it is essential that his invention shall be so fully described that others may not be led into mistake, as no other person can lawfully make, use or vend a machine containing such new ingredient or such new combination. They may make, use or vend the machine without the patented improvements, if it is capable of such use, but they cannot use either of those improvements without making themselves liable as infringers.

§ 5305. *Sufficient description of a combination of old elements.*

Improvements in machines protected by letters patent may also be mentioned, of a much more numerous class, where all the ingredients of the invention are old, and where the invention consists entirely in a new combination of the old ingredients, whereby a new and useful result is obtained, and many of them are of great utility and value, and are just as much entitled to protection as those of any other class. *Union Sugar Refinery v. Matthiessen*, 2 Fish. Pat. Cas., 605. Such a combination is sufficiently described if the ingredients of which it is composed are named, their mode of operation given, and the new and useful result to be accomplished pointed out, so that those skilled in the art and the public may know the extent and nature of the claim, and what the parts are which co-operate to produce the described new and useful result. Tested by these rules, it is clear that the objection under consideration cannot prevail in respect to any one of the several letters patent on which the suit is founded.

§ 5306. *What is necessary to authorize a reissue of a patent.*

3. That the reissued letters patent are void and of no effect, because the commissioner of patents never obtained jurisdiction to receive the surrender of the originals, nor to grant the reissues, as no evidence was produced before him to show that the originals were inoperative or invalid for any reason or cause whatsoever. Whenever any patent is inoperative or invalid, by reason of a defective or insufficient description or specification, if the error arose by inadvertency, accident or mistake, and without any fraudulent or deceptive intention, it is lawful for the commissioner, upon the surrender to him of such patent, and of the payment to him of a certain duty, to cause a new patent to be issued to the inventor *for the same invention* for the residue of the term then unexpired, in accordance with the patentee's corrected description and specification. 5 Stat. at Large, 122.

Whether adjudged to be valid or invalid, it is clear that the several reissued letters patent are all in due form, and that they contain all the usual recitals asserting a compliance with the requirements specified in the patent act, and

it is equally certain that the respondents did not introduce any proofs to establish the theory of fact assumed in the answer.

Authority to accept the surrender of original patents in certain cases, and to grant new patents to the inventor, was conferred upon the commissioner by the act of the 3d of July, 1832, and in a case arising under that act it was held by this court, more than thirty years ago, that where an act was to be done or a patent granted, upon proofs to be laid before a public officer, upon which he was to decide, the fact that such public officer had done the act or granted the patent was *prima facie* evidence that the proofs had been regularly made, and that they were satisfactory, even though the patent did not contain any recitals that the prerequisites to the grant had been fulfilled; and such continued to be the rule until the question came up again for consideration under the existing patent act, when it was held by this court that the fact of the granting of the reissued patent closed all inquiry into the existence of inadvertence, accident or mistake, and left open only the question of fraud for the jury. *Railroad v. Stimpson*, 14 Pet., 458; *Stimpson v. Railroad*, 4 How., 384; 4 Stat. at Large, 559.

§ 5307. *Upon a question of a reissue of a patent for inadvertency, accident or mistake, the decision of the commissioner is final.*

Since that time it has been definitively settled that neither reissued nor extended patents can be abrogated by an infringer, in a suit against him for infringement, upon the ground that the letters patent were procured by fraud in prosecuting the application for the same before the commissioner. *Rubber Company v. Goodyear*, 9 Wall., 797; S. C., 2 Cliff., 375.

§ 5308. *Patents cannot be impeached collaterally.*

Where the commissioner accepts a surrender of an original patent and grants a new patent, his decision in the premises, in a suit for infringement, is final and conclusive, and is not re-examinable in such a suit in the circuit court, unless it is apparent upon the face of the patent that he has exceeded his authority, that there is such a repugnancy between the old and the new patent that it must be held, as matter of legal construction, that the new patent is not for the same invention as that embraced and secured in the original patent. *Battin v. Taggart*, 17 How., 83; *O'Reilly v. Morse*, 15 id., 111, 112; *Sickles v. Evans*, 2 Cliff., 222; *Allen v. Blunt*, 3 Story, 744.

§ 5309. *Reissued patents must be for the same invention as the original.*

4. That the reissued letters patent are void and of no effect because they were not granted for the same invention as that embodied in the original letters patent, nor for any invention made by the patentees before the original letters patent were granted.

Reissued letters patent must, by the express words of the section authorizing the same, be *for the same invention*, and consequently where it appears, on a comparison of the two instruments, as matter of law, that the reissued patent is not for the same invention as that embraced and secured in the original patent, the reissued patent is invalid, as that state of facts shows that the commissioner, in granting the new patent, exceeded his jurisdiction. Power is unquestionably conferred upon the commissioner to allow the specification to be amended if the patent is inoperative or invalid, and in that event to issue the patent in proper form; and he may, doubtless, under that authority, allow the patentee to redescribe his invention and to include in the description and claims of the patent not only what was well described before, but whatever else was suggested or substantially indicated in the specification or drawings

which properly belonged to the invention as actually made and perfected. Interpolations of new features, ingredients or devices, which were neither described, suggested nor indicated in the original patent, or patent office model, are not allowed, as it is clear that the commissioner has no jurisdiction to grant a reissue unless it be for the same invention as that embodied in the original letters patent, which necessarily excludes the right on such an application to open the case to new parol testimony and a new hearing as to the nature and extent of the improvement, except in certain special cases, as provided in a recent enactment not applicable to the case before the court. 16 Stat. at Large, 206; *Cahart v. Austin*, 2 Cliff., 536; *Curtis on Patents* (3d ed.), 276; *Woodworth v. Stone*, 3 Story, 753.

Corrections may be made in the description, specification or claim, where the patentee has claimed as new more than he had a right to claim, or where the description, specification or claim is defective or insufficient; but he cannot, under such an application, make material additions to the invention which were not described, suggested nor substantially indicated in the original specifications, drawings or patent office model.

§ 5310. *Conclusiveness of commissioner's decision as to matters of fact and of construction.*

Prior to the decision of this court, that a person sued as an infringer cannot abrogate a reissued or extended patent by showing that the commissioner had been induced to grant it by fraudulent representations, it had sometimes been supposed that every such new patent was open to that defense, and that the question was one of fact dependent upon evidence; but since it has been determined that such a party cannot be heard to make such a defense to the charge of infringement, it has come to be regarded as the better opinion that all matters of fact involved in the hearing of an application to reissue a patent, and in granting it, are conclusively settled by the decision of the commissioner granting the application. Matters of construction arising upon the face of the instrument are still open, but all matters of fact connected with the surrender and reissue are closed in such a suit by the decision of the commissioner in granting the reissued patent. *Rubber Co. v. Goodyear*, 9 Wall., 796; *Stimpson v. Railroad*, 4 How., 404; *Railroad v. Stimpson*, 14 Pet., 458.

§ 5311. *A reissued patent is void if it is for a different invention from that of the original.*

Letters patent reissued for an invention substantially different from that embodied in the original patent are void and of no effect, as no jurisdiction to grant such a patent is conferred by any act of congress upon the commissioner, and he possesses no power in that behalf except what the acts of congress confer. Whether a reissued patent is for the same invention as that embodied in the original patent, or for a different one, is a question for the court in an equity suit to be determined as a matter of construction, on a comparison of the two instruments, aided or not by the testimony of expert witnesses, as it may or may not appear that one or both may contain technical terms or terms of art requiring such assistance in ascertaining the true meaning of the language employed. *Sickles v. Evans et al.*, 2 Cliff., 203.

Where the specification and claim, both in the original and reissued patents, are expressed in ordinary language, without employing any technical terms or terms of art, the question whether the reissued patent is for the same invention as that described in the original patent, or for a different one, is purely a question of construction; but where both or either contain technical terms or

terms of art, the court may hear the testimony of scientific witnesses to aid the court in coming to a correct conclusion. Cases doubtless arise where the language of the specification and claim, both of the surrendered and reissued patents, is so interspersed with technical terms and terms of art that the testimony of scientific witnesses is indispensable to a correct understanding of its meaning. Both parties in such a case would have a right to examine such witnesses, and it would undoubtedly be error in the court to reject the testimony; but the case before the court is not of a character to render it expedient to pursue the inquiry. *Bischoff v. Wethered*, 9 Wall., 814; *Betts v. Menzies*, 4 Best & Smith, Q. B., 999.

§ 5312. *It is incumbent on the defendant to introduce the original patent in evidence where the defense is that the reissue is not for the same invention.*

Apply the rule to the present case, that the question is one of construction, and it is clear that the defense under consideration is not open to the respondents, as they did not introduce in evidence the original letters patent from which the reissued patents were derived. Persons owning reissued letters patent, and seeking redress from those who have invaded their exclusive rights, are not obliged to introduce in evidence the surrendered patent, and, if the old patent is not introduced by the party sued, he cannot have the benefit of such a defense.

§ 5313. *Construction of words "substantially as described" in a claim.*

5. That the several letters patent are void and of no effect because the claims therein patented are for an effect, and not for any particular machinery. Founded, as the defense is, upon an obvious misconstruction of the claims of the several patents, it does not seem to require much explanation. Omit the words "substantially as described," or "substantially as set forth," and the question presented would be a very different one; but inasmuch as those words, or words of equivalent import, are employed in each of the claims, the defense is without merit. Where the claim immediately follows the description of the invention it may be construed in connection with the explanations contained in the specifications, and where it contains words referring back to the specifications, it cannot properly be construed in any other way. *Curtis on Patents* (3d ed.), secs. 225-227.

6. That the several reissued letters patent are void and of no effect because the claims therein made are too broad and embrace that of which the patentees were not the original and first inventors prior to the granting of the original letters patent. Properly understood the defense is substantially the same as that set up in the fourth defense, and it must be overruled for the same reasons, which need not be repeated.

§ 5314. *Where a general replication has been filed, respondents must prove the new matter alleged in their answer.*

7. That the several letters patent are void and of no effect because what is claimed therein as new was in public use, with the consent and allowance of the original patentees, more than two years before they applied for the several patents. Such a defense set up in a case where the complainants file the general replication is of no avail unless sustained by proof, and the respondents did not introduce any proofs to sustain it, which is all that need be said upon the subject.

8. That the combination claimed in each of the several letters patent is a combination of old parts, the combining of which involved no invention, but merely the skill of an intelligent mechanic or other person skilled in the manufacture and use of harvesting machines.

Reduced to a proposition, the defense, as set up in the answer, is that the several improvements were old and not patentable on that account, as no improvements were made which required invention. Specific objection is made under this head to each of the four reissued letters patent, but the grounds of the several objections are substantially the same, so that the several propositions may be considered together.

§ 5315. *To be patentable an article must be new and useful.*

New and useful machines are the proper subjects of an application for a patent, and so, by the express words of the act of congress, are new and useful improvements on any machine. All of the patents embraced in the suit fall under the second clause of the provision, and are of the fourth class of patents before described, that is, they consist of a new combination of old elements whereby a new and useful result is obtained. Particular changes may be made in the construction and operation of an old machine so as to adapt it to a new and valuable use not known before, and to which the old machine had not been, and could not be, applied without those changes, and, under those circumstances, if the machine, as changed and modified, produces a new and useful result, it may be patented, and the patent will be upheld under existing laws. *Bray v. Hartshorn*, 1 Cliff., 541; *Losh v. Hague*, 1 Webster's Patent Cases, 207; *Hindmarsh on Patents*, 95; *Phillips v. Page*, 24 How., 166; *Norman on Patents*, 25.

§ 5316. *What constitute patentable improvements on an old machine.*

Such a change in an old machine may consist merely of a new and useful combination of the several parts of which the old machine is composed, or it may consist of a material alteration or modification of one or more of the several devices which entered into its construction; and whether it be the one or the other, if the change of construction and operation actually adapts the machine to a new and valuable use not known before, and it actually produces a new and useful result, then a patent may be granted for the same, and it will be upheld as a patentable improvement. *Park v. Little*, 3 Wash., 196.

Improvements for which a patent may be granted must be new and useful, within the meaning of the patent law, or the patent will be void; but the requirement of the patent act in that respect is satisfied if the combination is new and the machine is capable of being beneficially used for the purpose for which it was designed, as the law does not require that it should be of such general utility as to supersede all other inventions in practice to accomplish the same object. *Lowell v. Lewis*, 1 Mason, 182; *Bedford v. Hunt*, id., 302; *Many v. Jagger*, 1 Blatch., 372; *Barrett v. Hall*, 1 Mason, 447.

Unsuccessful in those defenses, the respondents in the next place attack the respective inventions as destitute of originality, and allege that the patentees were not the original and first inventors of the several improvements supposed to be secured in the letters patent. Separate defenses of the kind are set up in the answer to each of the letters patent, but the nature and character of the objections are such that the whole series may properly be considered together.

Prior notice in the answer is required in such a case as a condition precedent to the right to introduce proofs to support such a defense, and it is certainly proper that the respondent should be allowed to comply with that requirement; but it is an abuse of the privilege to give such notices without some reason to suppose that such a defense can successfully be made, and that the proofs, if required, can be obtained, as it exposes the complainant to un-

necessary expense and trouble in preparing his case for trial. Where no proofs were introduced in support of the answer, no mention will be made of the notices, as a notice without proof to support it is of no avail.

Out of all the alleged prior inventions set up in the answer, only four were made the subject of proof to any substantial extent. Two of these are the inventions of Obed Hussey and of Thomas D. Burrall, of the combination of the quadrant-shaped platform located behind the cutting apparatus. Those patents were introduced as tending more particularly to supersede the reissued patent number 72, before described.

Strong doubts are entertained whether any of the patents given in evidence by the respondents as superseding the particular patent of the complainants, involved in this issue, are of a character to have that effect, even if the inventions which they purport to secure were of prior date; but it is not absolutely necessary to decide that point, except as to one of the exhibits, as the court is of the opinion that none of the others antedate the invention secured in that patent. Conclusions are all that will be useful on this branch of the case, especially as the question is one of fact dependent upon the proofs, which are somewhat conflicting, and where a full analysis of the evidence would hardly be practicable, as it would extend the opinion to an unreasonable length.

Proofs entirely satisfactory to the court are exhibited by the complainants showing that their invention, as described in the patent in question, was perfected early in the summer of 1849, as a material part of a harvesting machine, and that the same was reduced to practice as an operative machine during the harvesting season of that year.

Hussey, from 1839 or earlier to the time of his death, in the summer of 1860, was much engaged in the manufacture of reaping machines of various kinds. Most of his machines, however, were constructed without any reel and with square platforms, so as to drop the cut grain at the rear of the platform, differing so widely from the patented machine of the complainants as to require no argument to show that they afford no support to the present defense. Other machines were constructed by him with a straight guide-board on the platform, which was adjustable within certain limits, and the apparatus was doubtless capable, to a limited extent, of causing the cut grain to be moved sufficiently out of the path of the machine to give room for a single team.

Evidence to show that the invention of the complainants is embodied in those machines is entirely wanting, and it is quite clear that if any such had been introduced it could not have been credited, as the differences between them are too palpable and material to be overcome by parol evidence. Machines were also made by him with two platforms, or with a platform in two parts, the one being attached to the rear of the other, but it required two men to do the work which, with the complainants' machine, is easily and much better accomplished by one, which is certainly all the explanation which need be given of those machines in the present case.

§ 5317. *It is not valid evidence against a patented machine that a similar machine had been previously made as an experiment, but not reduced to practice as an operative machine.*

Apart from these he also made one experimental machine, with a square platform, to which was bolted an angular addition, giving the whole, when the addition was attached, an angular form. Examined when the addition is bolted to the main platform, irrespective of the other ingredients of the combination, it approaches much nearer to the invention of the complainants than

any of the other exhibits introduced in evidence by the respondents. Conceding all that, still it would not be difficult to show that the two are substantially different in several respects; but it is unnecessary to enter that field of inquiry, as the proofs are entirely satisfactory to the court, that the machine, as constructed, was merely an experiment, and that it was never reduced to practice as an operative machine. Undoubtedly it was built in the autumn of 1848, subsequent to the close of the harvest season; but the respondents' testimony shows that it was not used for cutting grain during that harvesting season.

Some obscurity surrounds its early history, nor is it of much importance that it should be better known. It appears that it was sent to the railroad depot to be transported to some other place for trial; but there is no positive evidence that it was ever forwarded or used, or that it was capable of any beneficial use. Where it was transported, if at all, from the depot, does not appear; but it does appear that it was returned the next year to the shop of the maker, and that it was set against the wall by the side of the street in front of the shop, where it remained for some time; that it was then removed to the new shop of the maker, where it remained until it was taken to pieces and broken up by his order, and never restored till long subsequent to the complainants' patent.

§ 5318. *Who is an inventor in the sense of the patent law.*

Original and first inventors are entitled to the benefit of their inventions if they reduce the same to practice, and seasonably comply with the requirements of the patent law in procuring letters patent for the protection of their exclusive rights. Crude and imperfect experiments are not sufficient to confer a right to a patent; but in order to constitute an invention the party must have proceeded so far as to have reduced his idea to practice, and embodied it in some distinct form. Desertion of an invention consisting of a machine, never patented, may be proved by showing that the inventor, after he had constructed it, and before he had reduced it to practice, broke it up as something requiring more thought and experiment, and laid the parts aside as incomplete, provided it appears that those acts were done without any definite intention of resuming his experiments, and of restoring the machine with a view to apply for letters patent. *Johnson v. Root*, 2 Cliff., 123; *Gayler v. Wilder*, 10 How., 498 (§§ 385-96, *supra*); *Parkhurst v. Kinsman*, 1 Blatch., 494; *White v. Allen*, 2 Cliff., 230.

He is the first inventor in the sense of the patent law, and entitled to a patent for his invention, who first perfected and adapted the same to use; and it is well settled that until the invention is so perfected and adapted to use it is not patentable under the patent laws. *Washburn v. Gould*, 3 Story, 122; *Cahoon v. Ring*, 1 Cliff., 612. Argument is hardly necessary to show that nothing else introduced in evidence by the respondents as having been constructed by that inventor is of a character to interfere, in any substantial respect, with the novelty of the invention held by the complainants, as the weight of the evidence plainly tends to disprove the allegations of the answer, and the inferences to be drawn from a comparison of the exhibits would establish the opposite theory even if the other proofs were less decisive to that effect.

Prior invention by Thomas D. Burrall is the next defense set up by the respondents to the particular patent under consideration. They attempt to show that he constructed a harvesting machine having a square platform, to

which he attached an apron, quadrant formed, which would deliver the cut grain, heads foremost, at the side of the machine and out of the way of the team in cutting the next swath.

Concede the fact that the machine, together with the circular apron, was constructed by the person named as alleged, and that the machine in that form antedates the invention held by the complainants, still the court is of the opinion that it is not of a character to defeat the complainants' patent, as it had no reel, was not a self-raker in any view of the case, and consisted beyond doubt of a substantially different combination. Compared with that, the invention described in the complainants' patent is both new and useful, and is plainly sufficient to support a patent as a new arrangement.

Suppose it to be otherwise, still the conclusion as to this defense must be the same, as the court is unhesitatingly of the opinion from the proofs that the supposed inventor did not construct the circular apron, and attach the same to the square platform, and use the two in conjunction, until after the complainants' invention was perfected and reduced to practice as an operative machine.

Evidence was also introduced by the respondents respecting the invention of Nelson Platt, but extended discussion upon that topic is unnecessary, as it is hardly contended by the respondents that the machine contains a quadrant-shaped platform with, and immediately behind, the cutting apparatus, and in such relation to the main frame as that described in the specification of the complainants' patent. They appear to shrink from that proposition, which is the only one involved in this defense, and seek shelter under another of a very different character, which is that the difference between the two is so very slight that it required no invention to pass from the former to the latter, which is a matter appertaining to another head of the defense that has previously been fully considered and the point distinctly overruled.

Properly understood, that machine does not contain a combination of the quadrant-shaped platform with the cutting apparatus in any practical sense. On the contrary, it has a square platform combined with the cutting apparatus, and the quadrant-shaped platform is combined with the square platform; nor does it contain any quadrant-shaped platform to receive the grain as it falls, but the ingredients of the invention, as well as the combination, are different from those in the complainants' machine, and the mode of operation is also different, which is all that need be said in response to that defense.

Substantially the same defenses were also set up to the other reissued letters patent, to the extent that those patents were put in issue in the pleadings, but it will not be necessary to restate the objections to their originality nor to present any response to the same, as to do so would only be to repeat what has been said in respect to the one more particularly assailed in argument.

Attempt is also made to show that the original letters patent described in the bill of complaint are also invalid, because the patentees are not the original and first inventors of the improvements therein secured. Whether they were or were not the original and first inventors of the improvement in the first claim is a matter of no importance in this case, as the pleadings do not put that claim in issue. They only put in issue the second claim, which embodies the described method of hanging the reel so as to dispense with any post or reel-bearer next to the standing grain, to prevent the grain from getting caught between the divider and the reel-supporter, and the only evidence introduced of prior invention is what is contained in an article published in

London in the Mechanics' Magazine. Expert witnesses were examined in respect to it by both sides. One examined by the respondents testified that he did not understand that it had any reel-support on the grain side of the machine, which in that respect is like the machine of the complainants, but three expert witnesses examined by the complainants testify that neither the description nor the drawings of the same, as exhibited in that magazine, show anything which is embodied in the complainants' patent, and the court is of the same opinion.

§ 5319. *Prior foreign publication; when sufficient to defeat a patent.*

Patented inventions cannot be superseded by the mere introduction of a foreign publication of the kind, though of prior date, unless the description and drawings contain and exhibit a substantial representation of the patented improvement in such full, clear and exact terms as to enable any person skilled in the art or science to which it appertains, to make, construct and practice the invention to the same practical extent as they would be enabled to do if the information was derived from a prior patent. Mere vague and general representations will not support such a defense, as the knowledge supposed to be derived from the publication must be sufficient to enable those skilled in the art or science to understand the nature and operation of the invention, and to carry it into practical use. Whatever may be the particular circumstances under which the publication takes place, the account published, to be of any effect to support such a defense, must be an account of a complete and operative invention capable of being put into practical operation. Webster's Patent Cases, 719; Curtis on Patents (3d ed.), § 278a; Hill v. Evans, 6 Law Times (N. S.), 90; Betts v. Menzies, 4 Best & Smith (Q. B.), 999.

None of these defenses, however, were sustained in the court below, but the circuit judges were of the opinion that the proofs failed to show that the respondents had infringed the letters patent of the complainants.

§ 5320. *Combinations.*

Actual inventors of a combination of two or more ingredients in a machine secured by letters patent in due form are entitled, even though the ingredients are old, if the combination produces a new and useful result, to treat every one as an infringer who makes and uses or vends the machine to others to be used without their authority or license. Pitts v. Whitman, 2 Story, 619; Ames v. Howard, 1 Sumn., 487.

They cannot suppress subsequent improvements which are substantially different, whether the new improvements consist in a new combination of the same ingredients, or of the substitution of some newly-discovered ingredient, or of some old one performing some new function not known at the date of the letters patent, as a proper substitute for the ingredient withdrawn from the combination constituting their invention. Mere formal alterations in a combination in letters patent, however, are no defense to the charge of infringement, and the withdrawal of one ingredient from the same, and the substitution of another which was well known at the date of the patent as a proper substitute for the one withdrawn, is a mere formal alteration of the combination if the ingredient substituted performs substantially the same function as the one withdrawn.

§ 5321. *Patentee's right to invoke the doctrine of equivalents.*

Patentees, therefore, are entitled in all cases to invoke to some extent the doctrine of equivalents, but they are never entitled to do so in any case to suppress all other substantial improvements, and the rule which disallows such

pretensions, if properly understood and limited, is as applicable to the inventor of a device, or even of an entire machine, as to the inventor of a mere combination, except that the inventor of the latter cannot treat any one as an infringer whose machine does not contain all of the material ingredients of the prior combination, as in that state of the case the subsequent invention is regarded as substantially different from the former one, unless the latter machine employs as a substitute for the ingredient left out to perform the same function some other ingredient which was well known as a proper substitute for the same when the former invention was patented. *Prouty v. Ruggles*, 16 Pet., 341; *Johnson v. Root*, 2 Cliff., 123.

Bona fide inventors of a combination are as much entitled to suppress every other combination of the same ingredients to produce the same result, not substantially different from what they have invented and caused to be patented, as any other class of inventors. All alike have the right to suppress every colorable invasion of that which is secured to them by their letters patent, and it is a mistake to suppose that this court ever intended to lay down any different rule of decision. Guided by these rules the remaining question for the determination of the court is whether the respondents have infringed the several patents described in the bill of complaint.

§ 5322. *Review of the patents and the alleged infringements.*

Infringement is alleged by the complainants, and the burden is upon them to prove the allegation, as it imputes a wrongful act to the respondents. All controversy as to the character of the machines made and sold by the respondents is closed by their admission set forth in the record. Exhibit 6, it is conceded by the respondents, is an accurate representation of the machines which they made and sold, and the complainants accept the admission as correct. Absolute certainty, therefore, attends that inquiry, and there is very little, if any, more difficulty in ascertaining the construction of the patented machines made and furnished to the public by the complainants, so that the only substantial inquiry is whether the machines made and sold by the respondents infringe the patented machines of the complainants, as the latter embody all the inventions of the complainants except the claims pointed out as not infringed, and the proofs satisfy the court that the exhibits are constructed in accordance with the mechanism described in the several letters patent.

Properly construed, the reissued patent number 4 is the combination of a quadrant-shaped platform located behind the cutting apparatus of the harvester so as to receive the grain as it falls after it is cut, with an automatic sweep-rake so constructed as to sweep over the platform in circular curves, and to move forward and backward, or towards and from the cutting apparatus, so as to seize upon the grain as it falls, after being cut, sweeping it over the platform in circular curves and delivering it upon the ground behind the machine with its stalks at right angles, or nearly so, with the line of progression of the machine, and to return by a forward movement towards the cutting apparatus to the original position when the first operation commenced.

Number 1682 is divided into two parts, the first of which may be used without the second, and it is not charged that the second part has been infringed by the respondents. Briefly described it consists of a combination of the cutting apparatus of a harvester with a quadrant-shaped platform arranged in the rear thereof, and with a sweep-rake operated by mechanism in such a manner that its teeth are caused to sweep over the platform in curves when

acting on the grain and to discharge the stalks crosswise to the direction of the swath and out of the way of the team on the return of the machine.

Two combinations are also contained in the reissued patent 1683, but the respondents are not charged with infringing the second, so that it is only necessary in this connection to refer to the first and describe its operation. It consists of a combination of the cutting apparatus with a reel and with a quadrant-shaped platform located in the rear of the cutting apparatus, operating as follows: The cutting apparatus severing the grain, the reel bearing the grain against the cutting apparatus and insuring its delivery upon the quadrant-shaped platform in the rear thereof, and the quadrant-shaped platform receiving the grain from the cutting apparatus and reel, and supporting it in such a manner that it can be moved from the cutting apparatus, heads foremost, swept round in a curve and discharged upon the ground crosswise to the direction of the swath and out of the track of the horses when the machine comes round to cut the next swath.

Patent numbered 72 is also an arrangement of the quadrant-shaped platform immediately behind the cutting apparatus of a reaping machine, so that the platform will receive the grain as it falls from the cutting apparatus, and will support it in such a manner that it may be swept round in a curvilinear path and discharged, heads foremost, upon the ground at the side of the platform out of the path of the horses when they return.

Reference will only be made to the second part of the original patent embraced in the suit, as it is not charged that the respondents have infringed the other claim. Separated from the second claim, the first consists in a mode of hanging the reel in a reaping machine so as to dispense with any post or reel-bearer on the side next to the standing grain, without any projection of the reel-shaft or bearing therefor on that side of the machine, so that the reel overhangs the bearings on the one side and is without support on the other side.

Prior to the act of congress allowing several patents to be issued for distinct and separate parts of the thing patented, it is not probable that a bill of complaint joining five several patents in the same charge of infringement would have escaped objection from the respondent; but it will be noticed that all the claims appertain to the same general subject, and that it requires all of the inventions in question to constitute a complete self-raking harvester or reaping machine, and that they are all embodied in the machines which the complainants make and furnish to the public. Viewed in that light the court is of the opinion that the objection, if it had been made, could not have been sustained. 5 Stat. at Large, 192.

Where the invention or inventions are embodied in a machine, the question of infringement is best determined by a comparison of the machine made by the respondent with the mechanism described in the complainant's patent or patents, where more than one is embraced in the same suit. *Blanchard v. Putnam*, 8 Wall, 426.

Comparisons of the kind have been carefully made by the court, aided by the evidence of the expert witnesses, as exhibited in the record, and the court is of the opinion that the several inventions of the complainants, excepting the claims pointed out as not infringed, are embodied in the machines made and sold by the respondents. Two of the expert witnesses testify to that effect without qualification, and the reasons which they assign for that con-

clusion are, in the opinion of the court, decisive of the question. Some attempt was made in the cross-examination of those witnesses to elicit an answer that the sweep-rake employed by the respondents operated differently from the corresponding device of the complainants in the several reissued patents, but the attempt was wholly unsuccessful, and called forth explanations which confirm the conclusion that the two devices have substantially the same operation.

Special reference is made in the opinion of the district judge to the means employed by the respondents in supporting the reel, as showing that the machines which they have made and sold do not infringe the second claim of the original patent. His view is that their machines do not infringe that claim because they do not employ but one reel-post instead of two, as shown in the complainants' patent, but it is so obvious that the one post with the frame attached to the upper end is substantially the same thing that it is not deemed necessary to pursue the argument.

For these reasons we are all of the opinion that the complainants are entitled to a decree that their several patents are valid, and for an account and for a perpetual injunction, except as to such, if any, as have expired. Decree reversed with costs, and the cause remanded for further proceedings in conformity to the opinion of the court.

MILLER v. BRASS COMPANY.

(14 Otto, 350-356. 1881.)

APPEAL from U. S. Circuit Court, District of Connecticut.

Opinion by MR. JUSTICE BRADLEY.

STATEMENT OF FACTS.—This is a suit brought by Edward Miller & Co. against The Bridgeport Brass Company to restrain the infringement of a patent and for an account of profits, etc. The patent was for an alleged improvement in lamps, and was originally granted to Joshua E. Ambrose October 16, 1860, for fourteen years, and was extended for seven years longer. It was twice surrendered and reissued, once in May, 1873, and again in January, 1876. The court below dismissed the bill on the ground that the second reissue, No. 6844, on which the suit was brought, was not for the same invention which was described and claimed in the original patent. We agree with the circuit court in the conclusion to which it came.

§ 5323. *Letters patent No. 3038, granted to Joshua E. Ambrose October 16, 1860, for an improvement in lamps, declared void by reason of enlargement of the scope of the original and delay in reissuing.*

The original patent described a combination of devices; amongst other things two domes or reflectors, one above the other, elevated above a perforated cap through which a wick tube and a vapor tube ascended. It was claimed that this combination of devices, especially including the two domes, which admitted the external air between them for producing a more perfect combustion, would make a lamp which, without a chimney and without danger of explosion, would burn those hydrocarbons which are volatile and contain an excess of carbon. The invention proved a failure, but it was found that the use of one of the domes (and the other parts), with the restoration of the chimney, would be a real improvement, and both the complainant and the defendant made such lamps in large quantities. Fifteen years after the original patent was granted, the patentee (or rather his assignee) discovers that

the improved lamp was really a part of his original invention, and that by inadvertence and mistake he had omitted to claim it. We think, however, that the court below was clearly right in holding that the invention specified in the second claim of the reissued patent (which is the one in question here) is not the same invention which was described and claimed in the original patent. The latter was for a double dome without a chimney, the peculiarity of the supposed invention being the use of the double dome as a means of dispensing with the chimney. The reissue is for a single dome with a chimney. It is not only obviously a different thing, but it is the very thing which the patentee professed to avoid and dispense with.

§ 5324. *Right to correct by reissue a mistake, to the effect that the claims of an original patent are not broad enough, may be lost by unreasonable delay.*

But there is another grave objection to the validity of the reissued patent in this case. It is manifest on the face of the patent, when compared with the original, that the suggestion of inadvertence and mistake in the specification was a mere pretense; or if not a pretense, the mistake was so obvious as to be instantly discernible on opening the letters patent, and the right to have it corrected was abandoned and lost by unreasonable delay. The only mistake suggested is, that the claim was not as broad as it might have been. This mistake, if it was a mistake, was apparent upon the first inspection of the patent, and if any correction was desired, it should have been applied for immediately.

§ 5325. *Expanded reissue claims condemned.*

These afterthoughts, developed by the subsequent course of improvement, and intended, by an expansion of claims, to sweep into one net all the appliances necessary to monopolize a profitable manufacture, are obnoxious to grave animadversion. The pretense in this case, that there was an inadvertence and oversight which had escaped the notice of the patentee for fifteen years, is too bald for human credence. He simply appealed from the judgment of the office in 1860 to its judgment in 1876; from the commissioner and examiners of that date, to the commissioner and examiners of this; and upon a matter that was obvious on the first inspection of the patent. If a patentee who has no corrections to suggest in his specification, except to make his claim broader and more comprehensive, uses due diligence in returning to the patent office, and says "I omitted this," or "my solicitor did not understand that," his application may be entertained, and, on a proper showing, correction may be made.

§ 5326. *The making of a claim, and the omission to claim other matter apparent on the face of the patent, is a dedication to the public of the unclaimed matter.*

But it must be remembered that the claim of a specific device or combination, and an omission to claim other devices or combinations apparent on the face of the patent, are, in law, a dedication to the public of that which is not claimed. It is a declaration that that which is not claimed is either not the patentee's invention, or, if his, he dedicates it to the public. This legal effect of the patent cannot be revoked unless the patentee surrenders it and proves that the specification was framed by real inadvertence, accident or mistake, without any fraudulent or deceptive intention on his part; and this should be done with all due diligence and speed.

§ 5327. *Effect of laches in reissuing a patent.*

Any unnecessary laches or delay in a matter thus apparent on the record

affects the right to alter or reissue the patent for such cause. If two years' public enjoyment of an invention with the consent and allowance of the inventor is evidence of abandonment, and a bar to an application for a patent, a public disclaimer in the patent itself should be construed equally favorable to the public. Nothing but a clear mistake, or inadvertence, and a speedy application for its correction, is admissible when it is sought merely to enlarge the claim.

§ 5328. *Office of a reissue. The statutes construed.*

The power given by the law to issue a new patent upon the surrender of the original, for the correction of errors and mistakes, has been greatly misunderstood and abused. It was first contained in the act of July 3, 1832, chapter 357, and the law was adopted in view of suggestions made in several judgments of this court. But it was carefully confined to cases where the patent was invalid or inoperative by reason of a failure to comply with any of the terms and conditions prescribed by the law for giving a clear and exact description of the invention, and where such failure was due to inadvertence, accident or mistake, without any fraudulent or deceptive intention. This being shown, a new patent, with a correct specification, was authorized to be issued for the same invention. The act of July 4, 1836, chapter 45, enlarged the power to grant reissues by adding an additional ground for reissue; namely, that the patentee had inadvertently claimed in his specification, as his own invention, more than he had a right to claim as new. And, with that addition, the law has continued substantially the same to the present time. The fifty-third section of the act of 1870, chapter 230, which was the law on this subject when the reissue in the present case was granted, is in the following words: "Whenever any patent is inoperative or invalid by reason of a defective or insufficient specification, or by reason of the patentee claiming as his own invention or discovery more than he had a right to claim as new, if the error has arisen by inadvertence, accident or mistake, and without any fraudulent or deceptive intention, the commissioner shall, on the surrender of such patent, and the payment of the duty required by law, cause a new patent for the same invention, and in accordance with the corrected specification, to be issued to the patentee."

It will be observed that whilst the law authorizes a reissue when the patentee has claimed too much, so as to enable him to contract his claim, it does not, in terms, authorize a reissue to enable him to expand his claim. The great object of the law of reissues seems to have been to enable a patentee to make the description of his invention more clear, plain and specific, so as to comply with the requirements of the law in that behalf, which were very comprehensive and exacting. The third section of the act of 1793, chapter 11, required an applicant for a patent "to deliver a written description of his invention, and of the manner of using or process of compounding the same, in such full, clear and exact terms as to distinguish the same from all other things before known, and to enable any person skilled in the art or science of which it is a branch, or with which it is most nearly connected, to make, compound and use the same. And in the case of any machine, he shall fully explain the principle, and the several modes in which he has contemplated the application of that principle or character, by which it may be distinguished from other inventions; and he shall accompany the whole with drawings and written references, where the nature of the case admits of drawings." This careful and elaborate requirement was substantially repeated in the sixth section of the

act of 1836, with this addition: "And shall particularly specify and point out the part, improvement or combination which he claims as his own invention or discovery."

Although it had been customary to append a claim to most specifications, this was the first statutory requirement on the subject. It was introduced into the law several years subsequently to the creation of reissues; and it was in the thirteenth section of this act of 1836 that provision was made for a reissue to correct a claim which was too broad in the original. Now, in view of the fact that a reissue was authorized for the correction of mistakes in the specification before a formal claim was required to be made, and of the further fact that when such formal claim was required, express power was given to grant a reissue for the purpose of making a claim more narrow than it was in the original, without any mention of a reissue for the purpose of making a claim broader than it was in the original, it is natural to conclude that the reissue of a patent for the latter purpose was not in the mind of congress when it passed the laws in question. It was probably supposed that the patentee would never err in claiming too little. Those who have any experience in business at the patent office know the fact, that the constant struggle between the office and applicants for patents has reference to the claim. The patentee seeks the broadest claim he can get. The office, in behalf of the public, is obliged to resist this constant pressure. At all events, we think it clear that it was not the special purpose of the legislation on this subject to authorize the surrender of patents for the purpose of reissuing them with broader and more comprehensive claims, although, under the general terms of the law, such a reissue may be made where it clearly appears that an actual mistake has inadvertently been made. But by a curious misapplication of the law it has come to be principally resorted to for the purpose of enlarging and expanding patent claims. And the evils which have grown from the practice have assumed large proportions. Patents have been so expanded and idealized, years after their first issue, that hundreds and thousands of mechanics and manufacturers, who had just reason to suppose that the field of action was open, have been obliged to discontinue their employments, or to pay an enormous tax for continuing them.

§ 5329. *When a patent may be reissued with enlarged claim.*

Now whilst, as before stated, we do not deny that a claim may be enlarged in a reissued patent, we are of opinion that this can only be done when an actual mistake has occurred; not from a mere error of judgment (for that may be rectified by appeal), but a real *bona fide* mistake, inadvertently committed; such as a court of chancery, in cases within its ordinary jurisdiction, would correct. Reissues for the enlargement of claims should be the exception and not the rule. And when, if a claim is too narrow,—that is, if it does not contain all that the patentee is entitled to,—the defect is apparent on the face of the patent, and can be discovered as soon as that document is taken out of its envelope and opened, there can be no valid excuse for delay in asking to have it corrected. Every independent inventor, every mechanic, every citizen, is affected by such delay, and by the issue of a new patent with a broader and more comprehensive claim. The granting of a reissue for such a purpose, after an unreasonable delay, is clearly an abuse of the power to grant reissues, and may justly be declared illegal and void. It will not do for the patentee to wait until other inventors have produced new forms of improvement, and then, with the new light thus acquired, under pretense of inadvert-

ence and mistake, apply for such an enlargement of his claim as to make it embrace these new forms. Such a process of expansion carried on indefinitely, without regard to lapse of time, would operate most unjustly against the public, and is totally unauthorized by the law. In such a case, even he who has rights, and sleeps upon them, justly loses them.

The correction of a patent by means of a reissue, where it is invalid or inoperative for want of a full and clear description of the invention, cannot be attended with such injurious results as follow from the enlargement of the claim. And hence a reissue may be proper in such cases, though a longer period has elapsed since the issue of the original patent. But in reference to reissues made for the purpose of enlarging the scope of the patent, the rule of laches should be strictly applied; and no one should be relieved who has slept upon his rights, and has thus led the public to rely on the implied disclaimer involved in the terms of the original patent. And when this is a matter apparent on the face of the instrument, upon a mere comparison of the original patent with the reissue, it is competent for the courts to decide whether the delay was unreasonable, and whether the reissue was therefore contrary to law and void.

We think that the delay in this case was altogether unreasonable, and that the patent could not lawfully be reissued for the purpose of enlarging the claim and extending the scope of the patent.

Decree affirmed.

JAMES v. CAMPBELL.

(14 Otto, 356-385. 1871.)

APPEALS from U. S. Circuit Court, Southern District of New York.

Opinion by MR. JUSTICE BRADLEY.

STATEMENT OF FACTS.—This case is founded on a bill in equity filed by Christopher C. Campbell, the complainant below, against Thomas L. James, United States postmaster in and for the city of New York, to enjoin him from using a certain implement for stamping letters, which the complainant claims to have been patented to one Marcus P. Norton, by letters patent dated April 14, 1863, and surrendered and reissued on the 23d of August, 1864; and again surrendered and reissued on the 3d of August, 1869, and again, finally, on the 4th of October, 1870. The complainant claims to be assignee of Norton, the patentee. Other persons claiming an interest in the patent were made parties to the suit. The circuit court rendered a decree in favor of the complainant, and adjusted the rights of the several parties to the amount of the decree. The defendant James appealed. The other parties, not being satisfied with the decree as it affected their mutual interests, also appealed. The case is now before us in all its aspects. Supposing the court below to have had jurisdiction of the case, the first question to be considered will be the liability of the principal defendant, James, to respond for the use of the machine or implement in question.

§ 5330. *Government has no right to appropriate or use a patented article without compensation.*

That the government of the United States, when it grants letters patent for a new invention or discovery in the arts, confers upon the patentee an exclusive property in the patented invention which cannot be appropriated or used by the government itself, without just compensation, any more than it can appro-

priate or use without compensation land which has been patented to a private purchaser, we have no doubt. The constitution gives to congress power "to promote the progress of science and useful arts by securing for limited times to authors and inventors the exclusive right to their respective writings and discoveries," which could not be effected if the government had a reserved right to publish such writings or to use such inventions without the consent of the owner. Many inventions relate to subjects which can only be properly used by the government, such as explosive shells, rams and submarine batteries to be attached to armed vessels. If it could use such inventions without compensation, the inventors could get no return at all for their discoveries and experiments. It has been the general practice, when inventions have been made which are desirable for government use, either for the government to purchase them from the inventors, and use them as secrets of the proper department; or, if a patent is granted, to pay the patentee a fair compensation for their use. The United States has no such prerogative as that which is claimed by the sovereigns of England, by which it can reserve to itself, either expressly or by implication, a superior dominion and use in that which it grants by letters patent to those who entitle themselves to such grants. The government of the United States, as well as the citizen, is subject to the constitution; and when it grants a patent the grantee is entitled to it as a matter of right, and does not receive it, as was originally supposed to be the case in England, as a matter of grace and favor.

§ 5331. *Mode of obtaining compensation for use by government of patented article.*

But the mode of obtaining compensation from the United States for the use of an invention, where such use has not been by the consent of the patentee, has never been specifically provided for by any statute. The most proper forum for such a claim is the court of claims, if that court has the requisite jurisdiction. As its jurisdiction does not extend to torts, there might be some difficulty, as the law now stands, in prosecuting in that court a claim for the unauthorized use of a patented invention; although where the tort is waived, and the claim is placed upon the footing of an implied contract, we understand that the court has in several recent instances entertained the jurisdiction. It is true, it overruled such a claim on the original patent in this case, presented in 1867; but, according to more recent holdings, it would properly now take cognizance of the case. The question of its jurisdiction has never been presented for the consideration of this court, and it would be premature for us to determine it now. If the jurisdiction of the court of claims should not be finally sustained, the only remedy against the United States, until congress enlarges the jurisdiction of that court, would be to apply to congress itself. The course adopted in the present case, of instituting an action against a public officer, who acts only for and in behalf of the government, is open to serious objections. We doubt very much whether such an action can be sustained. It is substantially a suit against the United States itself, which cannot be maintained under the guise of a suit against its officers and agents except in the manner provided by law. We have heretofore expressed our views on this subject in *Carr v. United States*, 98 U. S., 433, where a judgment in ejectment against a government agent was held to be no estoppel against the government itself.

But as the conclusion which we have reached in this case does not render it necessary to decide this question, we reserve our judgment upon it for a more fitting occasion.

§ 5332. *Reissue No. 4143, October 4, 1870, and original patent No. 38,175, M. P. Norton, April 14, 1863, hand-stamp, considered.*

The subject-matter of the patent on which the bill in this case was founded is an implement or stamp for postmarking letters and canceling revenue and postage-stamps. The original patent, dated April 14, 1863, exhibited two stamps connected together by a cross-bar which was attached to a handle; one stamp being intended for printing the postmark, and the other for canceling the postage-stamp,—both operations being performed by a single blow. The stamps consisted of small hollow blocks, or cylinders, in which were inserted and fastened the types which produced the impressions desired. In one were placed the lettered types which produced the postmark, and in the other a single type which blotted or canceled the postage-stamp. The patentee, in his specification, described the invention as follows:

“The nature of my improvements, herein described, consists in the employment and combination of a device for canceling postage or other stamps by means of wood, cork, or similar material inserted in a tube or recess therein, for the purpose of effacing or blotting such stamps with indelible ink. It also consists in the combination of a canceling device, having wood, cork, rubber, or any similar material for the type or blotter therein, with any postmarking device, so as to blot, cancel or efface postage-stamps with indelible ink at the same time and operation of postmarking of letters, packets, etc., etc.

“To enable others skilled in the art to which my invention relates to make and use the same, I will here proceed to describe the construction and operation thereof, which is as follows, to wit: I construct the postmarking stamp (D) of any suitable material. (E), Figure 3, is the mortice or recess of suitable dimensions to receive the type for the month, the day of the month, and the year, around which is the name of the place where used, and is the same as the postmarking device described in my letters patent, bearing date the 16th day of December, 1862, and which is secured to the cross-piece (B) in the same manner and by the same means as described and set forth in the said patent, which is also the case with the canceling device (C).

“I construct the canceling stamp or device (C) of any suitable material, of any size required in diameter, and in length to correspond to the postmarking device (D). (F), Figure 3, is the tube or recess in the device (C) for the purpose of receiving the blotting or canceling device (G), Figures 2 and 5, which device is made of wood, cork, rubber, or similar material, so as to closely fit the said tube or recess (F), Figure 3. The face of this device may contain a plan or form for canceling with indelible ink, like that shown at Figure 2, or it may have any plan or form for that purpose thought best to devise or use. This device (G) may project somewhat below the lower end of the said tube (F), as seen at Figure 5, and may also project below the face of the postmarking or rating device (D), Figures 2 and 3, and it may be driven out of the said tube or recess by means of a pin or bolt operating through the hole (A), Figures 3 and 5, for the purpose of repairs, or to replace it by a new one. The said tube or recess (G) may be any size in diameter required or any depth desired. The said canceling stamp or device (C) being thus constructed with cork, rubber, or other elastic substance for type or blotter, will receive and hold on the face thereof ink in quantities sufficient to blot or cancel the postage-stamp in such manner as to prevent the possibility of the said postage-stamp being cleansed of the canceling ink by any chemical or other process, for the said ink would be so effectually put thereon that any attempts to remove it there-

from would entirely destroy the said postage-stamp, and thereby render the same incapable of a second or re-use. The said cork, rubber, or other elastic substance, as aforesaid, will render the said stamp capable of an easy and rapid use, for there being a yielding of the same when the blow is given, the operator will not tire as soon by a constant or continued use of the same as though it were of solid metal, and the same will greatly aid in raising the entire stamp from the paper and postage-stamp when the impression shall have been given by the operator. The said blotter or type can be more easily repaired or replaced by a new one at less expense than if made of solid metal. The said cork, rubber, or other elastic material may extend upward to the said cross-bar (B), and there be connected to the same by a screw or pin-bolt, if desired, which will be the same in effect and in operation.

“Having thus described my invention and improvements in marking and canceling stamps, what I claim and desire to secure by letters patent of the United State of America, therein, is:

“1. The canceling device (C) with wood, cork, or rubber type or blotter (G) therein, or any device substantially the same, so as to cancel the postage-stamp with indelible ink, substantially as herein described and set forth.

“2. I also claim the canceling device (C) with wood, cork, or similar material forming the type or blotter (G) therein, in combination with the cross-piece (B), and with the postmarking device (D) substantially as herein described and set forth.”

We have given the description and claim in full for the purpose of better comparing it with the reissued patent on which the suit was brought, and which is dated October 4, 1870. It will be seen that the invention claimed is very specific and definite in its character. In the first place, the canceling device is claimed separately, consisting of a hollow tube, in which is inserted the canceling type or blotter made of wood, cork, rubber or other elastic substance. The nature of the substance of which the blotter was to be made is emphasized thus: “The said cork, rubber, or other elastic substance as aforesaid will render the said stamp capable of an easy and rapid use, for there being a yielding of the same when the blow is given, the operator will not tire as soon by a constant or continued use of the same *as though it were of solid metal*, and the same will greatly aid in raising the entire stamp from the paper and postage-stamp when the impression shall have been given by the operator. The said blotter or type can be more easily repaired or replaced by a new one at less expense *than if made of solid metal*.” It is plain, therefore, that elasticity in the material of which the blotter was to be composed was a distinctive feature of the blotting device thus separately claimed. Besides the advantages referred to in the foregoing extracts, its superior adaptability to hold indelible ink was evidently regarded by the inventor as important. From the facts appearing in the case, it is quite clear that a separate claim of this blotting device could not have been sustained had it not presented these special characteristics; had it not, in fact, contained all the elements it did contain. The patentee himself, as will be more fully seen hereafter, had, shortly before his application for this patent, obtained a patent for a double stamp exactly like the one patented in this, except that the blotter type was made of “steel, or other material which would answer the purpose.”

Of course he could not claim a blotter of like material in the patent now under consideration. And the record is full of evidence to show that hand-types for stamping letters and other characters with or without the use of ink

had long been constructed of almost every kind of material. The general form of the instrument was old. Stamps fastened to what is called a brad-awl handle, adjusted thereto centrally, so as to balance the pressure, were used for seals and other instruments for making impressions of every sort from time immemorial; and hand-stamps of the same general description, having a cylindrical type-holder in place of a seal, made hollow for inserting and holding the type, had long been used in the postoffice department. It was not without good cause, therefore, that the separate claim for the canceling device, as a distinct invention, was confined to an elastic type or blotter inclosed in a hollow tube. In like manner, the combination of devices in the entire instrument, forming the subject of the second claim, was necessarily specific in its character, being restricted by the special construction of the canceling device. The specific form of a cross-bar to sustain the type-holder, and balance the effect of the blow or pressure when making the impression, was substantially contained in the common hand-type, long before used for printing names on linen with indelible ink. This instrument consisted of a metallic trough or receiver to hold the type, the bottom of which, at its middle part, was attached to a wooden brad-awl handle. Inserting the types for a postmark in one end of this device, and the type for blotting the postage-stamp in the other, it would be a complete double stamp like that claimed by Norton, the patentee. The fact that it might require a stronger piece of metal for postoffice uses than was required for stamping letters on cloth, or that the type-holder would be better adapted to the purpose by being divided into two compartments, does not detract from the substantial similarity of the instruments. Given the idea of stamping the postmark and blotting the postage-stamp with one instrument at a single blow, it required but little invention, in view of what was then in common use, to adjust the printing apparatus to the handle by means of a block, shoulder or cross-bar, or other similar device. The needs and requirements of the instrument would soon be developed, and manifest themselves to any skilled workman in that branch of mechanics.

The evidence does not show to our satisfaction that Norton was by any means the first inventor of a double postoffice stamp, so constructed as to make the postmark and cancel the postage-stamp at one blow. If that fact was important, the burden of proof was on the complainant to show that Norton's invention antedated those of others proven in the cause, of which there were several independent of each other. But there is no satisfactory proof that Norton ever produced, prior to 1862, or, at most, prior to 1861, any other double stamp than one which he patented in 1859. In connection with one C. A. Haskins, he obtained a patent in October, 1857, for a hand-stamp attached to a standard with a projecting arm, and provided with a spring to lift it from the paper automatically, after the blow which made the impression was given. This stamp was an elaborate and complicated contrivance of wheels and cylinders for arranging and manipulating the types for making letters and figures showing the month and day of the month in the postmark. It had no hint of any secondary apparatus for effacing a postage-stamp at the same time. But in August, 1859, Norton obtained a patent for the use of his assignees, Reynolds and Low, which did contain a device for effacing the postage-stamp. Low seems to have been associated with him in the patent of 1857 in the way of furnishing money, but what was the nature or extent of the assignee's real interest in the patent of 1859 is not made to appear. The application for this patent was dated May 3, 1859, but when filed in the patent

office is not shown. The principal feature of the stamp described in this patent was also an elaborately contrived device for arranging the types for the letters and figures in the postmarking stamp, something in the same line with that described in the patent of 1857; no claim for which, however, was allowed. But to the postmarking stamp, which was fixed to the handle in the ordinary way, was attached, on one side, entirely outside of the bearing of the handle, a flat piece of metal to be used as a blotter, for which, in combination with the postmarking stamp, a claim was allowed. It is clear to us that this was the stamp to which Norton alluded, and which he asked to have the privilege of testing in the postoffice at Troy, in his letter to the assistant postmaster-general of the 11th of April, 1859, on which much stress has been laid by the complainants. The letter does not give a description of the stamp he wished to test, but it concludes with these words: "I herewith inclose you an envelope containing a postmark from the stamp on the left, and an erasure upon the stamp made at the same operation of postmark. As *now* constructed, is believed to work well."

This is a clear intimation that what he desired to have tested had been recently brought to its existing form. In a former part of the letter he had said: "While the order given by your department was in force, I was unable, in consequence of sickness, to thoroughly test my stamp. It was used upon about three thousand letters only during that time. I have since made some changes in it which seem to make it a much better thing for the purpose designed. Now I ask the opportunity to test it without any expense to the government." An order was made by Mr. King, the assistant postmaster-general, on the 4th of May, 1859, authorizing the postmaster at Troy to use for postmarking letters at his office for the term of three months, "Norton's improved marking stamp." The application for the patent had been prepared and sworn to the day previous to this order, namely, May 3, 1859. In this application the description of the invention commences thus:

"The nature of my invention consists in constructing, combining and arranging a hand-stamp, hereinafter described, so as to contain a cylinder with initials of each and every month in a year, and two other cylinders with figures for the respective days of each and every month; also a cylinder with figures to represent ten years, more or less, as the case may be, which cylinders shall revolve upon the same shaft with each, and within a stationary form of type, and thereby print the month, the day of the month, and the year in connection with each, and each in connection with and at the same time of the printing of the subject-matter upon the aforesaid stationary form of type. It also consists in attaching a blotter, hereinafter described, to the hand-stamp aforesaid, upon one or two sides thereof, for the purpose of cutting, blotting, canceling or effacing 'the frank' or postage-stamp, so as to prevent a second use of the same, while at the same time the name of the 'postoffice,' the year, the month, and the day of the month is printed upon the envelope and one side of the said frank or postage-stamp, thereby giving a good impression of the same, and prevent undue wear of the said postmarking-stamp in consequence of being used upon the uneven surface made by the said frank or postage-stamp."

Now, if Norton had, as he pretends, invented, as early as 1854, the stamps for which he took out his subsequent patents in 1862 and 1863, it is hardly conceivable that he should have taken out the patents for 1857 and 1859 in the form in which they stand. The fact that he did take them out reduces it almost to a demonstration that he had not invented any such stamps at this time.

It is true, he produces a caveat filed by him in 1853, which has, or had, an amendment bearing date "Tinnmouth, Vt., August 7, 1854," which amendment contained a full description of the double stamp as finally exhibited in his patent of 1863, and the reissue thereof. But this amendment was shown to have been surreptitiously introduced by him, amongst the papers of the office, certainly as late as 1864, ten years after its pretended date. In his examination as a witness in this cause he admitted that he made the paper referred to in the summer of 1864, when his assignees, Shavor and Corse, were applying for a reissue of the original patent now in question, and that it was used in that application; but he pretends that it was a copy of a paper which he made and sent to the patent office in 1854. No such original paper, however, has ever been found in the patent office, and on a regular charge for the offense of making the surreptitious paper, and introducing it amongst the files, he was found guilty in September, 1871, and debarred, by order of the commissioner of patents, from further access to the papers of the office.

This amendment caveat, therefore, as well as the testimony of Norton on the subject, may be laid out of view.

A witness by the name of Sherwood, a machinist and model-maker, was examined, who produced a sheet or two of items of account, copied from his books, showing charges against Norton for work on "stamps" in 1857, 1859, 1860 and 1862. There were four items in 1857 under date of May, for certain hours of work, charged thus: "May 8. To three hours, finish stamp." There was a large number of items of similar character in the other years named, particularly in January and March, 1859, and August, September, November and December, 1862, corresponding, as will be observed, with the times when Norton must have been getting up his models for his different patents. The witness was unable to distinguish the kind of stamps he worked on at these different dates, except that he professed to feel quite sure that the first one would postmark a letter and cancel a stamp thereon at the same time. Describing, on his cross-examination, the stamp which he thus referred to, he says: "It was a dating wheel stamp, the wheels giving the dates, with a die for the office and year in the top of the frame that held it, blotting or canceling at one end the impression given by a blow on the lever by the hand." Now this description applies aptly to both the stamp patented in 1857 and to that patented in 1859, except that it was the latter only which had the blotting attachment. We think it perfectly apparent that the witness had, by a very natural mental process, confounded the instruments together, and imagined that the blotter was attached to the first instead of the second invention. His examination took place twenty years after the date of the accounts, and he relied solely on his memory as to the character of the articles which he worked upon.

This is really the strongest evidence that can be found in the record affording any ground for the conclusion that Norton ever produced any double stamp at all prior to the one he patented in 1859. The testimony of Mr. King, the former assistant postmaster-general, when compared with his own contemporary letters and other circumstances, clearly indicates that he had, quite naturally, confounded the device of one date with that of a later date. Other evidence was relied on, but all of such a loose and indefinite character that no reliance can be placed on it in support of the complainant's theory. And it is quite significant that no stamp of the kind claimed, made at the period in question, was produced in the examination. Had such stamps ever been in existence, it is strange that they should have altogether disappeared.

Now, there is abundant evidence in the record to show that double stamps were conceived of and used before 1859, and that about that time they sprung up spontaneously in various parts of the country. It was but recently that there had been any demand for their construction, since postage-stamps had not been in general use in the country for any long period. They were first authorized to be issued and used by the act of March 3, 1847, chapter 63 (9 Stat., 188); but it was optional to use them or not. By the act of March 3, 1851, chapter 20, postage on single letters was reduced from five cents to three on being prepaid. 9 Stat., 587. It was not till the passage of the act of March 3, 1855, chapter 173, that all postage, except on letters to or from a foreign country, was required to be prepaid. This law first brought postage-stamps into universal use; and, as they must be canceled, two impressions had to be made on a letter — one for the ordinary postmark, giving the place and date of mailing the letter; the other for canceling or effacing the postage-stamp. This required two blows and produced double work. But without any great exercise of ingenuity, postmasters and clerks in various places improvised double stamps, generally by screwing, welding or binding to the side of the common stamp an appendage to serve as a blotter at the same time. This was done by Ezra Miller, at Janesville, Wisconsin, as early as January, 1859, or in 1858; and by General Dix in New York, and one Powers in Buffalo, in the summer of 1860. There is also evidence that a similar appendage for the purpose of stamping a large figure 5, to show the postage due, was invented and used by one Rees in the Philadelphia postoffice as early as 1845, when the rates of postage were five and ten cents; and that one Ireland devised and used at the same office a like appendage for canceling postage-stamps as early as 1853. Other similar devices were referred to in the evidence. The adoption of a more artistic and convenient form of the instrument thus spontaneously originated, as its use was continued and became more imperative, was a matter of course. Norton's particular form and construction of the double stamp, as described in his patent of 1863, was undoubtedly an improvement; but we should expect to find, as we do find, that he was restricted in his claim to the particular form and construction set forth in his specification.

A reference to Norton's application for the original patent in question in this case, a copy of which is in evidence, and which, being preserved of record in the patent office, may properly be referred to, shows that the functionaries of that office regarded it important that the instrument sought to be patented should be specialized with particularity. This application was presented to the office on the 5th of January, 1863, and was rejected on the 21st of February. On the 21st of March, 1863, the application was renewed in a letter addressed by Norton to the commissioner of patents, and after certain amendments were made to the specification, the patent was allowed to pass. The most important amendment was the insertion of that portion of the specification commencing with the words, "the said canceling stamp or device (C) being thus constructed with cork, rubber or other elastic substance for type or blotter," and so on, to the end of the paragraph. This amendment derives further importance and illustration from the letter of Norton above referred to, in which a renewal of the application was made, and which was dated at the National Hotel in Washington, March 21, 1863. In that letter the writer says:

"I do not understand that the device referred to in your letter of the 21st of February last is 'a common ink canceling stamp, such as has been used for years in our postoffices for blotting and thus canceling postoffice stamps.'

The devices to which you undoubtedly refer have always been made of metal entirely, or of wood entirely. Wood was found to answer no purpose, because not at all durable, so metal ones were used. *Now this device consists of a barrel or tube, into which wood, cork, rubber, or some such material is inserted, for the purpose of holding an indelible ink in quantities sufficient to blot the postage-stamp so thoroughly as to prevent the same being washed or cleansed by a chemical mixture and again being used in payment of postage. This tube or barrel holds firmly the elastic substance therein, and prevents the same from undue wear and exposure. The elastic substance therein being worn out can again be replaced at the office where used, thus saving the trouble and expense of returning the same to the government contractors for such repairs. This, therefore, constitutes a new device, composed of two distinct parts in combination, producing new results, besides blotting the postage-stamp.*

“This device being new, its combination with the postmarking device for the purposes set forth in the specification is of course new. Upon these two claims I, therefore, most respectfully ask a patent.”

On the same day that this letter was received, according to the memorandum on the file-wrapper, the specification was returned to the applicant to enable him to amend it, and was re-examined on the 26th of March, and favorably passed upon on the 1st of April. No one can read the patent in the light of these contemporary documents, and of the previous history of the stamp, without arriving at the conclusion that, so far as the blotting device was separately concerned, the invention consisted of, and was confined to, a tube containing a type-blotter made of an elastic substance, as contradistinguished from iron or other hard substance. The iron or steel blotter had been patented in 1862, as already mentioned, and as will be shown more fully hereafter. There was not, there could not have been, any inadvertence or mistake in confining the invention to the combination described and claimed in the patent.

The second claim is merely that of a combination of this specific device with the other parts of the apparatus. As the patentee says, in his letter to the commissioner, “this device being new, its combination with the postmarking device for the purposes set forth in the application is of course new.” In other words, the substantive invention for which the applicant desired a patent was the blotting device constructed specifically in the manner and for the purpose described. The addition of the combination claim was for the purpose of possibly securing the combination, if the principal claim should be found to be untenable.

§ 5333. *A patent cannot be reissued in order to expand the claim beyond the invention specified in the original patent.*

Perhaps we have gone more minutely into the evidence relating to the progressive improvements in this instrument than was necessary to show that the claim of the patent was not more restricted than it should have been. The court ought not to be called upon to explore the entire history of an art in order to ascertain what a patentee might have included in his patent had he been so disposed. If he was the author of any other invention than that which he specifically describes and claims, though he might have asked to have it patented at the same time and in the same patent, yet if he has not done so, and afterwards desires to secure it, he is bound to make a new and distinct application for that purpose, and make it the subject of a new and different patent. When a patent fully and clearly, without ambiguity or obscurity, describes

and claims a specific invention, complete in itself, so that it cannot be said to be inoperative or invalid by reason of a defective or insufficient specification, a reissue cannot be had for the purpose of expanding and generalizing the claim so as to make it embrace an invention not described and specified in the original. It is difficult to express the law on this subject more aptly and forcibly than in the words of Mr. Justice Grier, in the case of *Burr v. Duryee*, 1 Wall., 531, where, in delivering the unanimous opinion of the court, he says: "The surrender of valid patents, and the granting of reissued patents thereon, with expanded or equivocal claims, when the original was clearly neither 'inoperative nor invalid,' and whose specification is neither 'defective nor insufficient,' is a great abuse of the privilege granted by the statute, and productive of great injury to the public. This privilege was not given to the patentee or his assignee in order that the patent may be rendered more elastic or expansive, and, therefore, more 'available' for the suppression of all other inventions." Of course, if, by actual inadvertence, accident or mistake, innocently committed, the claim does not fully assert or define the patentee's right in the invention specified in the patent, a speedy application for its correction, before adverse rights have accrued, may be granted, as we have explained in the recent case of *Miller v. Brass Company*, 14 Otto, 350 (§§ 5323-29, *supra*). But where it is apparent on the face of the patent, or by contemporary records, that no such inadvertence, accident or mistake, as claimed in a reissue of it, could have occurred, an expansion of the claim cannot be allowed or sustained.

§ 5334. *The reissued patent considered.*

Turning now to the reissued patent on which the present suit was brought, which is the third reissue, dated October 4, 1870, we find the invention described as follows:

"The nature of my said invention and improvements herein contained and described consists in the employment and combination of a device or die used for the more complete and perfect cancellation of postage-stamps or letter-franks by means of soft wood used endwise, or of cork, rubber or other suitable material, whereby such stamp or frank is effaced and canceled, in and by indelible or other ink, in the manner substantially as herein described and set forth.

"It also consists in the combination of a postage-stamp canceling device or die, constructed of wood, cork, rubber or any suitable material, with any suitably arranged and constructed postmarking stamp or device, so as to cancel, efface or destroy the postage-stamp or letter-frank with indelible or any suitable ink at the same time, blow or operation of the stamp or instrument by which the postmark is given or made upon the letter, envelope or packet, substantially as herein described and set forth.

"It also consists of the postmarking of letters, envelopes or packets, and in the cancellation of the postage-stamp or stamps thereon, with, in or by any suitable ink or similar material, by means of some soft wood used endwise against the postage-stamp, or by the means of cork, rubber, iron or steel, or by means of any other suitable material, so combined with the postmarking stamp or instrument as to cancel, efface or destroy the postage-stamp or stamps at one and the same blow or operation of the entire instrument thus constructed for that purpose, whereby to prevent a second or re-use of such postage-stamp or stamps."

After some details as to the mode of construction, the specification proceeds:

“The said canceling type or die can be easily repaired, or replaced by a new one, whenever desired, and at very little expense; and such canceling die or type G may extend upward to the said cross-bar B, and there be connected to the same by means of a screw, pin or small bolt. *In such case there would not be any tube or pipe surrounding said canceling die or type G.* The operation and effect produced would in such case of construction be the same.

“The said postage-stamp canceling device, die or type G may be of any desired distance from the aforesaid postmarking or dating device or stamp D, or it may be securely *fastened to the immediate side* of the said postmarking and dating part or stamp or device D by any convenient and suitable mechanical means.

“The said canceling die, type or device G I prefer to use made of cork, as it will hold a much greater quantity of canceling ink upon and in the lower face thereof, and when it comes in contact with the printed surface of the postage-stamp such surface will become somewhat and sufficiently broken by means thereof, and thus and thereby inject into or impregnate such broken surface with the said canceling ink, whereby such postage-stamp, so operated upon and filled with such ink, cannot be sufficiently cleansed by any means as to enable it to be re-used, or used a second time, in fraud upon the postal revenue, without immediate detection of the same.

“Soft wood, used endwise, will answer nearly the same purpose. Still, long and continued use after the granting of my said patent, April 14, 1863, has fully proven the superiority of the cork for the canceling die or type used upon postage-stamps as aforesaid. . . .

“I also construct my said postage-stamp canceling device, die or type of *cast-iron, steel or other suitable metal*, substantially as shown at G', figures 5 and 6, and which may be secured to the said cross-bar or piece B in like manner as the said tube or cylinder C, figures 2 and 4, and which is done either by screw and nut where the same unites with the said cross-bar, or it may there be firmly fastened by means of suitably constructed and arranged pins or rivets, or the same may be soldered to the under side of said cross-bar or piece B, or otherwise attached thereto. . . .

“The *aforesaid metal canceling device, die or type G'*, figures 5 and 6, *may also be fastened or secured to the immediate side of the said postmarking device by any good and sufficient means*, substantially as hereinbefore described and set forth, in reference to the said device C, or tube or cylinder, constructed to receive and contain the said type or die G, figures 2, 3 and 4.

“Such metallic device, die or type may also have upon its lower face or lower surface any suitable configuration deemed best to use for the purpose of canceling the postage-stamp in, with or by any suitable ink, at the same time, blow and operation of the instrument or apparatus, as hereinbefore stated and set forth.

“In any and every case the postmarking of the letter, envelope or packet, and the effacing or cancellation of the postage-stamp or letter-frank thereon representing value, are done at the same time, and by the same blow or operation of the said several devices and parts, constructed and combined in the manner and by the means substantially as herein described and set forth.

“Both the postmarking and cancellation of the said postage-stamp are done

with indelible or other and suitable ink, used for such cancellation or effacing of the postage-stamp."

Omitting much more of this verbose specification, containing, amongst other things, a dissertation on the supposed advantages and importance of the invention, we add the summary of the patentee's claims, which is as follows:

"What I claim and desire to secure by letters patent of the United States of America is —

"1. The postage-stamp canceling device, cylinder or tube C, containing a die or type, G, made of cork, wood, *or other suitable material, or any equivalent for said cylinder or tube C, or for the said canceling die or type G*, whereby to efface, cancel or destroy the postage-stamp with indelible or other ink, in the manner and for the purposes substantially as herein described and set forth.

"2. The canceling device, cylinder or tube C, with cork or wood, or *any substantial equivalent* thereof, forming the die or type G therein, in combination with the cross-bar or piece B, and with the postmarking device D, substantially as and for the purposes herein described and set forth.

"3. *The postmarking of letters, envelopes and packets, and the cancellation of the postage-stamps* thereon with ink, at one and the same blow or operation of the instrument, in the manner and by the means substantially as herein described and set forth.

"4. *The employment and combination of a postmarking device, with a postage-stamp canceling device*, both being operated by one and the same handle, for the postmarking of letters, envelopes or packets, and for the cancellation of the postage-stamps thereon with indelible or other ink, in the manner substantially as herein described and set forth."

By these extracts from the specification and the summary of claims, it appears perfectly obvious that the patentee has embraced in the reissued patent several matters of supposed invention different from and additional to the invention which formed the subject of the original patent. And it is principally, if not wholly, these new and additional claims which the appellant James, as postmaster of New York, is charged with infringing.

In the first place, a new form of the canceling device is set forth and claimed, different from that described in the original patent, to wit, a canceling type or die attached directly to the cross-bar, without any tube or pipe surrounding and holding the same. This is not contemplated or hinted at in the original patent. The latter does suggest, it is true, that "the cork, rubber or other elastic material may extend upward to the cross-bar, and there be connected to the same by a screw or pin-bolt, if desired;" but this suggestion had reference to a type inclosed, at the same time, by a surrounding cylinder, which formed the distinctive feature of the invention. The context shows that nothing more was intended by the suggestion than the extension of the type upward through the cylinder and fastening it in a particular way. The thought seems to have occurred to the patentee that it might be an advantage, under some circumstances, in addition to fastening the type in the cylinder by compression, to extend it through the cylinder and fasten it to the bar to secure it from any danger of falling out of the cylinder by becoming loose. Not a hint was given that the cylinder could be dispensed with. This was an after-thought. The cylinder was clearly and distinctly set forth as a necessary constituent of the device, and an essential element in the combination of which the blotting device consisted.

The bearing which this new feature in the reissued patent has on the case is evinced by the fact that one of the devices used for several years in the post-office, which is complained of as an infringement of the patent, was a naked blotter made of cork, directly attached to the cross-bar, without any inclosing cylinder to support it; also by the fact that the other device used in the post-office during the defendant's term of office consisted of an iron blotter directly attached to the side of the postmarking stamp without any inclosing cylinder.

In our judgment, this addition to the patent was no part of the original invention, and could not lawfully be embraced in the reissue, and that the claim for it is therefore void. It is true that this particular feature is not made the subject of a distinct claim. But it is described as part of the invention, and would probably be included in the general and sweeping terms employed in the claims that are made. Regarded as not being a part of the original invention, those claims cannot stand if they are construed to include it; if they are construed so as not to include it, then the use of this form of device by the defendant cannot be adjudged an infringement of the patent.

Another new matter, forming no part of the original invention, but expressly disclaimed in the original patent, is the making of the blotter of cast-iron, steel or other suitable material. The original specification, in various forms of expression, excludes such materials. The words "wood, cork, rubber, or any similar material" have this intention, as shown by the context. A claimed advantage is that "the said cork, rubber or other elastic substance, as aforesaid, will render the said stamp capable of an easy and rapid use; for there being a yielding of the same when the blow is given, the operator will not tire as soon by a constant or continued use of the same *as though it were of solid metal*. The said blotter or type can be more easily repaired or replaced by a new one, at less expense, *than if made of solid metal*." This language amounts to an express disclaimer of solid metal. The merit claimed for the invention was that the elastic materials proposed to be used for the blotter, and the use of which the patent throughout supposes possible by the support received from the surrounding cylinder, were far superior to solid metal and other solid and inelastic substances. How, after this, it could be supposed that the use of solid metal as a material for the type-blotter was included in the invention, and that a claim for it was omitted through inadvertence and mistake, it is difficult to understand. Besides, as already seen, and will be again adverted to, the use of steel or other material that would answer the purpose had already been described and claimed in Norton's patent of 1862. We think that any claim in the reissued patent which can be fairly construed to embrace a blotter made of metal is void, and that the use of such a blotter by the defendant did not afford the patentee or the complainant any just ground of complaint.

In connection with this branch of the subject, it is observable that the patentee has added two new diagrams to his drawings for the purpose of exhibiting and illustrating this new ground of claim. This fact, though not decisive, is strongly corroborative of the conclusion which we have reached on the subject.

§ 5335. *A patent for a machine cannot be reissued for the purpose of claiming the process of operating that class of machines, because, if the claim for the process is anything more than for the use of the particular machine patented, it is for a different invention.*

The third addition in the reissued patent to the invention described in the

original is that of the *process* of stamping letters with a postmark and canceling the postage-stamp, at one and the same blow or operation of the instrument, in the manner and by the means described and set forth. Leaving out of view the history of the art prior to the invention claimed by the patentee, what possible pretense can there be for contending that the general process was part of the invention which formed the subject of the original patent? Suppose it be true that Norton was the first inventor of this process, was that process the invention which he sought to secure in the original patent? A patent for a process and a patent for an implement or a machine are very different things. *Powder Company v. Powder Works*, 98 U. S., 126. Where a new process produces a new substance, the invention of the process is the same as the invention of the substance, and a patent for the one may be reissued so as to include both, as was done in the case of Goodyear's vulcanized-rubber patent. But a process, and a machine for applying the process, are not necessarily one and the same invention. They are generally distinct and different. The process or act of making a postmark and canceling a postage-stamp by a single blow or operation, as a subject of invention, is a totally different thing in the patent law from a stamp constructed for performing that process. The claim of the process in the present case, however, is not so broad as this. It is for the process or act of stamping letters with a postmark and canceling the postage-stamp at one and the same blow or operation of the instrument, *in the manner and by the means described and set forth*. Perhaps this claim amounts to no more than a claim to the exclusive use of the patented instrument or device. If it is anything more, it is for a different invention from that described in the original patent. If it is not for anything more, the question is brought back to the instrument or device itself which forms the subject of the patent, and which has been already considered.

The last claim, to wit, "the employment and combination of a postmarking device with a postage-stamp canceling device, both being operated by one and the same handle, for the postmarking of letters, envelopes, or packets, and for the cancellation of the postage-stamps thereon with indelible or other ink, in the manner substantially as herein described and set forth," may admit of two constructions. It may either amount to a claim for a combination of any kind of devices for stamping and blotting, or for a combination of the particular devices described in the patent. Inasmuch as these specified devices, as we have already shown, embrace new devices not described in the original patent, the claim is too broad in either of its aspects to be advanced in a reissue of that patent, unless the patentee was really the inventor of the general combination of such devices in a double stamp, and was entitled to add a claim therefor to such reissue. We have seen that his original patent was for a specific blotting device, and for the combination of such specific device with a post-stamping device in the same instrument. Could he, in a reissue of the patent, lawfully make the broad claim of the combination of any and all devices for blotting and post-stamping, at one and the same time, in one and the same instrument? This would be, it is true, only adding a new claim to his patent, but greatly enlarging its scope and making it to embrace every kind of double stamp that can be conceived. Did he forget to insert this claim in his original patent? Was it omitted through accident and mistake? When we examine his original application, the changes it underwent, the careful exclusions as well as inclusions which it contained, and the particularity of the specific combination which he did claim, could he, after the lapse of more than

a year (if we take the date of his first application for a reissue as the time for consideration), be allowed to return to the patent office and pretend that he had inadvertently omitted the principal claim of the whole thing? If he was, or pretended to be, really the inventor of the entire double stamp, did not the patent, on its face, show that the invention was not secured to him,—that it contained no such claim? And was not this omission obvious on inspection? The truth is, that when he made his original application, and got his original patent, all the documents show demonstrably that he did not intend it to embrace any such broad invention. That was not the invention he sought to secure. Having obtained a patent for his specific device and combination, if he afterwards wished to claim the general combination, and had not already abandoned it by taking a narrower patent, he was bound to make a new application for that purpose. Patentees avoid doing this when they can, and seek to embrace additional matters in a reissue, in order to supersede and get possession of the rights which the public, by lapse of time or other cause, have acquired in the meantime. It is for this very reason that the law does not allow them to take a reissue for anything but the same invention described and claimed in the original patent.

But these broad claims in the reissued patent, if construed according to the latitude in which they are expressed, are void by reason of embracing inventions which had been patented both in England and in this country prior to the patentee's application for the original patent.

A stamp with a postmarking device and a blotting device combined in one instrument was described in an English patent, dated April 24, 1860, granted to one David G. Berri. As shown in the drawing, the postmarker and blotter were attached to one metallic plate, analogous and equivalent to the cross-bar described in Norton's patent, to the center of which plate the handle was attached, so that the instrument was equally balanced. The particular object of the patent was to secure a method of hinging the plate containing the types on to the fixed plate to facilitate the insertion and change of the types. But the double stamp is fully exhibited; and the patentee in the specification says: "In conclusion to the foregoing description, it may be here necessary to note that my improved date-stamp may be employed, either in connection with the double or obliterating mark, as represented, or separately, in conformity with the usual requirements."

The same combination of postmarker and blotter in one instrument was also exhibited in Norton's own patent of August 9, 1859. As he did not then reserve the process of stamping letters with such an instrument, nor the combination of a postmarker and a blotter, and did not make any simultaneous application therefor, he could not afterwards obtain a patent for such process and combination, but would be restricted to such particular combination or process as might be exhibited in a new device or apparatus.

We have already referred to this patent of 1859, and will here only quote from the specification, to show the construction of the stamp and the scope which the patentee claimed his invention to possess. He says:

"*The blotter* (J) is fastened to the frame (B) upon one side thereof by the use of the shaft (D), one end of which passes through the upper part of the said blotter, and which is firmly secured to the said frame by means of the nut (E), or by using it for the nut in place of the said nut (E) as aforesaid. This blotter is then and thereby retained in a fixed and strong position by means of the screw (S) in connection with the said shaft (D), the blotter (J)

or nut (E), and is for the purpose of cutting, inking, blotting, effacing and effectually canceling the frank or postage-stamp, while, at the same time and operation, the name of the postoffice, the year, the month and the day thereof are given upon the envelope or letter at one side of the said frank or postage-stamp, and not upon it as now practiced, in order to efface and to cancel it under the operation of stamping, which unduly wears out the marking stamp, gives a bad and unintelligible impression, and is in direct violation of the rules or statute of the postoffice department. This stamp may have another blotter like (J), which shall be upon the opposite side thereof, by the use of which the frank or postage-stamp would be cut, inked, blotted, effaced and canceled upon any part of the letter or envelope where it may be placed. One blotter like (J), however, is believed to answer the required purpose. *This blotter (J) may be made of any size or shape, and of any material to answer the end or purpose sought to be obtained.* The face, which receives the ink, and which comes directly upon the frank or postage-stamp, is grooved or cut, thereby leaving various projections, which have a sharp or knife edge sufficient for each to cut entirely through the frank or postage-stamp, but not through the envelope immediately under the same, while at the same time the places thus cut are inked by the same sharp-edged projections or cutters on the face of the said blotter as aforesaid. The said blotter (J) should be made of the best kind of *cast-steel*, and in such shape as not to break any part thereof. The projections upon the face of the said blotter may be kept sharp and in cutting order by filing and sharpening them when dull."

The claim of this patent is as follows:

"Having thus set forth and described my invention, what I claim and desire to secure by letters-patent of the United States is:

"The blotter (J), connected or attached to the main part of any 'postoffice postmarking stamp' for the purpose of cutting and inking, blotting and effacing so as to successfully cancel the frank or postage-stamp of any letter or any package at the same time and operation of marking or printing upon such letter or package the name of any postoffice, the year, the month and the day of the month, substantially as and for the purpose herein set forth."

Another patent was taken out by Norton on the 16th of December, 1862, for a double stamp, containing a combination of the postmarker and blotter and the cross-bar connecting them, and to which they were attached. The drawings attached to this patent exhibit exactly the same form of instrument which is exhibited and described in the drawings and specification of the patent sued on in this case. The blotter, however, instead of being confined to wood, cork or other elastic material, was proposed to be made of "steel or other material which will answer the purpose," and to have on its face circular cutters, inclosed in circular rings, to cut the postage stamp at the same time that it defaced it with ink. The invention is described in the specification as follows:

"The nature of my improvement consists in so constructing canceling stamps that the same shall cut the postage-stamp, or any stamp similar thereto, without injury to the contents of the envelope or packet inclosed therein, and at the same time cause a heavy circular mark upon the inside, and one upon the outside of that part of the stamp or letter-frank canceled by the cutting device, so that said postage-stamp or letter-frank shall readily show cancellation in ink, and when removed from the letter or packet on which the same may have been canceled, it shall be reduced to parts or pieces whereby a sec-

ond use of the said stamp or frank is thus prevented, although it may have been previously cleaned by a chemical or other process.

"It also consists in the employment and combination of a canceling stamp with a cutting and inking device thereon, with a postmarking or rating stamp, so that the canceling of the letter-frank and the postmarking on the envelope or packet shall be effectually done by the means fully described hereinafter.

"To enable others skilled in the art to which my invention relates to make and use the same, I will here proceed to describe the construction and operation thereof, which is as follows, to wit: I construct the postmarking stamp (D) of steel or any material which will answer the purpose. (G) is the mortice or opening to receive the type for the month, the day of the month, and the year, around which is the name of the place where used. (E) is a screw for the purpose of holding the type in the said openings (G). This stamp is secured or firmly fastened to the block or cross-piece (B), figures 1, 2 and 3, by means of the screw (K), which is held in its place by means of the small screw (a), figures 1 and 2, which is placed near one side of the said screw (K) so as to prevent the same from becoming loose by reason of turning backwards."

After further directions as to the construction of the canceling stamp, he adds:

"The cross-piece (B) is made of iron or steel, and in width the same as the diameter of the said rating and canceling stamp, and of any thickness required. The said canceling stamp (c) is securely fastened to the said cross-piece (B), and at any desired distance from the said rating stamp (D), as seen at figures 1, 2 and 3, and in the same manner as that of the said stamp (D). (H) is a screw-bolt or stem, the lower end of which is screwed into the center of the said cross-piece (B). The handle (A) is then screwed upon the said bolt or stem (H), and firmly upon the said cross-piece (B), thereby making a strong and reliable joining of the handle to the whole stamp."

The claim in this patent is, first, for the canceling stamp separately, and secondly as follows:

"I also claim the combination of the canceling stamp (c) and the postmarking or rating stamp (D) with the cross-piece (B), substantially as and for the purposes herein described and set forth."

§ 5336. *A patentee cannot include in a subsequent patent any invention embraced in a prior one granted to himself.*

It is hardly necessary to remark that the patentee could not include in a subsequent patent any invention embraced or described in a prior one granted to himself any more than he could an invention embraced or described in a prior patent granted to a third person. Indeed, not so well; because he *might* get a patent for an invention before patented to a third person in this country, if he could show that he was the first and original inventor, and if he should have an interference declared.

Now, a mere inspection of the patents referred to above will show that after December, 1862, Norton could not lawfully claim to have a patent for the general process of stamping letters with a postmark and canceling stamp at the same time; nor for the general combination of a post-stamper and blotter in one instrument; nor for the combination of a post-stamper and blotter connected by a cross-bar; for all these things, in one or other specific form, were exhibited in these prior patents.

Any such claim, therefore, in the reissued patent of 1870 must be inoperative and void, as well because the thing claimed was anticipated in former

patents, as because it would be for a different invention from that contained and described in the original patent. We may, therefore, dismiss from consideration the third and fourth claims of the reissued patent. If they are to be construed as being broader and claiming more than the original patent, they are void; if to be construed as claiming nothing more, they are simply redundant, because the first and second claims embrace all that was in the original, and more.

The case, then, upon the patent, is narrowed down to the claim of the specific device of the blotter as described and claimed in the original patent; and the combination thereof with the postmarking device in one instrument by means of the cross-bar. This being the case, it will be pertinent next to inquire whether the defendant used that device or combination. If he did not, it is unnecessary to pursue the subject further.

As we have already seen, the canceling stamp or device, described in the patent, consisted of a cylinder, corresponding in length to the postmarking device, and containing a type of wood, cork, rubber, or other elastic material, slightly projecting therefrom. It does not appear that this device was ever used by the defendant. The stamp used by him until January, 1876, had a blotter of cork, it is true; but it was not the specific device described in the patent, and to which the patent was restricted. The cork was not inclosed in a cylinder as demanded by the patent. It was a naked piece of cork directly attached to the cross-bar by a common wood screw, passing through a hole in the cross-bar, and driven into the cork, firmly holding it to the bar. This device, of course, was different from that which was patented. The only other stamp used by the defendant had a steel blotter, connected with the postmarker by a solid metallic plate or mass of metal, and having no cylinder. Neither of these devices infringed the complainant's patent, construed as we consider it must be in order to have any validity at all.

The decree of the circuit court will be reversed, and the cause remanded with directions to dismiss the bill of complaint; and it is so ordered.

Dissenting opinion by MR. JUSTICE MILLER.

As regards the right to a patent for an invention like this, which can be of use to no one but the government of the United States, and which is, therefore, in effect a contract by the United States that it will not use that which is essential to some of its most important operations without paying to the patentee whatever he may demand for the use of his invention, I have great doubt,—a doubt which it would have been necessary to solve in this case if the majority of the court had believed the patent sued on valid. In the opinion just delivered they have held that while the original patent to Norton might have been valid for some purposes, the reissued patent is void because it is not for the same invention. In this view I do not concur.

The general postoffice and its branches had long been in search of an instrument which by one blow—one strike of the hand—would mark the name of the place where a letter was mailed and the time, and so deface the postage-stamp on the letter as would make it impossible to be used again. This had been done by the use of a single die, which held the type indicating date, etc., and which was made to cover the stamp also, so that the date obliterated the stamp by covering it. For reasons not necessary to mention this did not answer, and it became desirable to have an instrument which at one stroke defaced the stamp and made beside, but apart from the stamp, the postmark date.

Many attempts to do this had been made with more or less success. Most of them failed because the handle which conveyed the power from the hand of the operator was so placed in regard to these two marking instruments that they did not strike with entire unity, in point of time, on all the space of the letter to be covered by the two instruments. In my opinion the record shows that Norton was the first man to accomplish this result by uniting these two marking instruments by a cross-bar between them, and placing the shank or handle common to them both so precisely in the center between them on the cross-bar that the stroke brought the type and the obliterating device on to the surface of the paper precisely level, and with precision as to time, over the space which they were designed to cover.

This, I think, was the principal merit of his invention. Connected with it, however, and essential to it, was his device for obliterating the stamp. In his original patent this is described as a cylinder into which is fastened something which receives the indelible ink used to obliterate the stamp, and which imparts it to the surface of the stamp by the blow or strike already mentioned. This, he said in his original patent, was made of wood, cork, rubber or other suitable material.

It was discovered, by experience, afterwards, that iron was a more suitable material than wood, or cork, or rubber, and in the reissue of the patent, on which this action is founded, iron is mentioned as one of these suitable materials. I do not think this should invalidate the reissue if the original patent was good. If iron was a suitable material it was covered by the original patent. If better than the material specifically named, that did not exclude it from the original patent nor make the reissue void.

Nor do I concur in the opinion that the combination of the printing and erasing instrument by a cross-bar and shank or handle, which brought the force employed in the stroke to act equally and simultaneously on all the surface to be impressed, was anticipated by any other patent or any other invention.

It would serve no good end to go into all the testimony with the elaborate care which characterizes the opinion of the court on these disputed points. I therefore content myself with stating the principal points in which I differ with that opinion.

Reissues — Statutes, construction of — *Act 1793*, §§ 5337, 5338. *Act 1832*, § 5339. *Act 1836*, §§ 5340-5350. *Act 1870*, §§ 5351-5353. *Act 1871*, §§ 5354, 5355.

§ 5337. Power of secretary of state, under act 1793, to grant reissues on surrender of patent with defective specification through inadvertence or mistake, without fraud on patentee's part. *Grant v. Raymond*, 6 Pet., 218.

§ 5338. In a patent reissued under act 1793, it is not necessary to recite that all prerequisites were complied with. The law makes the presumption. *Phila. & Trenton R. Co. v. Stimpson*, 14 Pet., 448.

§ 5339. Act 1832, section 3, "infringement of reissue," construed. *Stimpson v. Railroad Co.*, 4 How., 380.

§ 5340. Reissue under act 1836. Purpose of the act. *Burr v. Duryee*, 1 Wall., 531.

§ 5341. Act 1836, section 13, "reissue," construed. *Stanley v. Whipple*, 2 McL., 35. *Carver v. Braintree Mfg. Co.*, 2 Story, 432.

§ 5342. Act 1836, section 13, "conclusiveness of commissioner's action in granting reissue," reviewed. *Allen v. Blunt*, 3 Story, 742.

§ 5343. Act 1836, section 13, commissioner's power to reissue an extended patent, considered. *Gibson v. Harris*, 1 Blatch., 167.

§ 5344. A reissue is clearly grantable under ruling in *Grant v. Raymond*, 6 Pet., 218, and act 1833, chapter 162. *Ames v. Howard*, 1 Sumn., 482.

§ 5345. Act 1836, section 13, "reissue by assignee of patentee's executor," construed. *Carew v. Boston Elastic Fabric Co.*, 1 Holmes, 45.

§ 5346. Act 1836, establishing a new system of reissues, by defining the conditions under which the power it confers shall be exercised, necessarily excludes all other cases, except, possibly, correcting errors of the department. *Mini's Assignees v. Adams*, 3 Wall. Jr., 20.

§ 5347. Statute provision of act 1836 as to reissues is remedial and, like all remedial statutes, is to be construed liberally so as most effectually to meet the beneficial end in view and prevent a failure of the remedy. *Carew v. Boston Elastic Fabric Co.*, 1 Holmes, 45.

§ 5348. The law of 1836 has been construed to authorize a patentee to claim on a reissue whatever shall clearly appear to have been a part of his original invention, as described or shown in his original specifications, drawings or models. *Calkins v. Bertrand*, 6 Biss., 494.

§ 5349. Under the law as it stood in 1866, a patent surrendered for reissue was canceled in law as well when the application was rejected as when it was granted. The patentee was in the same circumstances as he would have been if his original application for a patent had been rejected. *Peck v. Collins*, 13 Otto, 660.

§ 5350. Under the law as it then stood, surrender of a patent was an abandonment of it, and an applicant for reissue took upon himself the risk of getting a reissue or of losing all. The question of his right to any patent at all was opened anew the same as upon an original application for a patent. *Ibid.*

§ 5351. The last clause of section 53, act of 1870 (sec. 4916, Rev. Stat.), relates merely to the evidence to which the commissioner may resort, but does not increase his power as to the invention for which a reissue may be granted. Whether said clause relates to any other than machine patents not considered in this case. *Atlantic Giant Powder Co. v. California Powder Works*, 8 Otto, 126.

§ 5352. The last clause of section 53, act 1870, so far as granting a new right is concerned, has no retroactive operation; and it can only apply to reissues of patents originally issued since the passage of that act. *Atlantic Giant Powder Co. v. Cal. Powder Works*, 3 Saw., 448.

§ 5353. Whatever may have been the effect of the new clause introduced in the law by the act of July 8, 1870, that "the surrender shall take effect upon the issue of the amended patent" in cases where a reissue is refused for other reasons, it would still seem that if the patentee's title to the invention is disputed and adjudged against him, the effect of such a decision should be as fatal to his original patent as to his right to a reissue. *Peck v. Collins*, 13 Otto, 660.

§ 5354. Act 1871, reissue to assignee, construed. *National Car Spring Co. v. Union Car Spring Mfg. Co.*, 12 Blatch., 80.

§ 5355. The law authorizing reissues of patents was never intended to allow the scope of a patent to be enlarged so as to include and embrace within it matters and things that were not embraced in the original invention. *Swain Turbine Manufacturing Co. v. Ladd*, 12 Otto, 408.

See *Application*, § 379.

Reissues — Construction of statutes; accident, inadvertence or mistake — *A reissue must be for accident, inadvertence or mistake*, 5356-5368; *what is not accident, etc.*, §§ 5369, 5370.

§ 5356. The right to reissue exists in case of defective description, or error arising from inadvertence or mistake. *Knight v. B. & O. R. Co.*, Taney, 106.

§ 5357. A patentee is not entitled to have his patent reissued unless he shows by satisfactory evidence that the error he seeks to have corrected was owing to "inadvertence, accident or mistake, and without any fraudulent or deceptive intention," and states particularly wherein the inadvertence, accident or mistake consisted. *Conklin and Stafford*, 1 MacArth., 375.

§ 5358. The decisions of the courts sustaining patents against objections for want of such evidence rest upon the principle that it is the province of the commissioner to determine whether sufficient evidence to that effect has been produced; and that his granting a reissue is conclusive on that point, and is not open to revision. *Ibid.*

§ 5359. The supreme court of the District of Columbia is not governed by this principle in determining an appeal from the decision of the commissioner of patents refusing a reissue, but will require the same evidence of inadvertence, accident or mistake that should have been produced before him. *Ibid.*

§ 5360. If it be found that the claims of the original patent were valid, and that the reissue for the same invention states the claim or claims in a different way, the law is well settled that the change does not of itself vitiate the new patent, but that, on the contrary, the original claims are conclusively presumed to have been made, as they were, through inadvertence, accident or mistake. *Smith v. Merriam*, 6 Fed. Rep., 713.

§ 5361. The statute never intended to allow a patent to be enlarged except in a clear case of mistake. *Meyer v. Maxheimer*, 9 Fed. Rep., 99.

§ 5362. The statute of 1870, relating to reissues, authorizes the insertion of new claims, founded upon the original invention as exhibited by the specifications or drawings, in reissues, when the omission results from "inadvertence, accident or mistake," and where the claimant has not by some act or omission estopped himself from exercising the right to amend. *Combined Patents Can Co. v. Lloyd*, 11 Fed. Rep., 149.

§ 5363. The purpose of a reissue is to enable one to secure what he was entitled to in his original patent, but, through inadvertence or mistake, did not obtain; but it cannot be made the means of covering anything which was not in the original invention. *Vogler v. Semple*, 7 Biss., 382.

§ 5364. A reissue can only be had when the original patent is inoperative or invalid from one of two causes — either by reason of a defective or insufficient, specification or by reason of the patentee claiming as his own invention or discovery more than he had a right to claim as new — and even then only where the error has arisen from inadvertence, accident or mistake, and without any fraudulent or deceptive intention. *Atlantic Giant Powder Co. v. California Vigorit Powder Co.*, 6 Saw., 508.

§ 5365. The statutory provisions concerning reissues require that the original patent must be inoperative or invalid either from a defective or insufficient specification or from claiming as new more than the patentee has the right to claim; and, in addition to this, the error which is sought to be corrected must have arisen by inadvertence, accident or mistake, and without any fraudulent or deceptive intention. If the party interested can bring himself within these conditions and limitations, the commissioner is authorized to issue a new patent for the same invention. When the original shows upon its face that the grounds and reasons for the reissue do not exist, or where a comparison of the letters patent discloses different inventions, the reissue is void, as an act unauthorized by law. *Flower v. Rayner*, 19 O. G., 425.

§ 5366. The rule laid down by the supreme court is that where it is sought merely to enlarge a claim there must be clear mistake and inadvertence and a speedy application for its correction, with no unreasonable delay; that in such a case a patentee cannot wait until other inventors have produced new forms of improvement and then apply for such an enlargement of his claim as to make it embrace those new forms; and that when it is apparent from a comparison of the two patents that the reissue is made to enlarge the scope of the patent, the court may decide whether the delay was unreasonable and the reissue therefore void. *Wooster v. Handy*, 21 Fed. Rep., 51.

§ 5367. A patent cannot be lawfully reissued for the mere purpose of enlarging the claim, unless there has been a clear mistake inadvertently committed in the wording of the claim, and the application for reissue is made within a reasonably short time. Whether there has been such an inadvertent mistake is, in general, a matter of fact for the commissioner to decide; but whether the application is made in reasonable time is matter of law, which the court may determine by comparing the reissued patent with the original, and, if necessary, with the records in the patent office when presented by the record. *Mahn v. Harwood*, 112 U. S., 354.

§ 5368. Where there has been an omission to claim certain devices or combinations apparent on the face of a patent, arising from inadvertence, accident or mistake, the appropriate remedy is by reissue, and a second patent may not be granted for the devices or combination omitted. *Hill v. Commissioner of Patents*, 33 O. G., 757.

§ 5369. The rejection of a claim in the application on an alleged anticipating device is at most an erroneous ruling of an officer having a *quasi* judicial power, which could presumably be corrected by appeal, and not such "mistake and inadvertence" as entitles to reissue. *Putnam v. Hutchinson*, 12 Fed. Rep., 127.

§ 5370. Where additional matter is claimed, however, which does not appear by reference to the patent or contemporary records to be embraced in the invention, or where it appears by such reference that the alleged omission "could not have occurred through inadvertence or mistake," as said by the court in *James v. Campbell et al.*, the case is not within the jurisdiction of the commissioner, and a reissue for additional claims may be declared void. *Combined Patents Can Co. v. Lloyd*, 11 Fed. Rep., 149.

See *Citizenship*, § 673. *Claims*, §§ 809, 848-851.

Reissues — Accident, inadvertence and mistake; particular cases — Involving, §§ 5371-5373. Not involving, §§ 5374-5382.

§ 5371. Where the specification was defective in not fully describing the combination of the thickness and slope of the front and back surfaces of a rib, it was held a proper case for reissue. *Carver v. Braintree Mfg. Co.*, 2 Story, 432.

§ 5372. Where it appears from the original papers in a case that a certain feature was

within the contemplation of the inventor as a valuable element in a patentable combination, and it is proved that a claim embracing such feature was erased from the original application through a misunderstanding of the invention by the solicitors, *held*, that the commissioner of patents committed no error in granting a reissue containing a claim embracing such feature. *Stutz v. Armstrong*, 20 Fed. Rep., 843.

§ 5373. Where the original claim was so ambiguous as to suggest a doubt as to its sufficiency, and was also open to two different constructions, *held*, that it was not a mistake so obvious as to be apparent upon first inspection of the patent, and that the reissue applied for within eleven months was not void for laches and was valid. *Western Union Telegraph Co. v. Baltimore & O. Telegraph Co.*, 25 Fed. Rep., 30.

§ 5374. Where a claim has been made and abandoned on the application for the original patent, its omission cannot be considered an inadvertence, accident or mistake that will justify its insertion in a reissue. *Wicks v. Stevens*, 2 Woods, 310.

§ 5375. Where one of the claims in an original application was rejected upon reference to certain patents, and the applicant, by his attorney, orders the same to be erased, and thus obtains and accepts a patent for the residue of his claims, there has been no inadvertence, accident or mistake within the meaning of the patent law, and the patentee is not entitled to a reissue covering the claim before erased. *In re Hatchman*, 26 O. G., 738.

§ 5376. Where a patent was reissued for an original claim, the rejection of which had been acquiesced in by applicant's solicitor, but without applicant's knowledge, until after the grant; doubted that it was a mistake such as would warrant a reissue, and a preliminary injunction was denied. *Arnheim v. Finster*, 32 O. G., 256.

§ 5377. Where a specific invention, complete in itself, was described fully and clearly, without ambiguity or obscurity, in an original patent, and all the papers in the file-wrapper show it to have been the intention of the patentee to have thus limited his invention, a broad construction of the claims of a reissue would not be justifiable, even though the history of the art shows that such broader invention should have been claimed in the original patent. *Yale Lock Manufacturing Company v. James*, 20 Fed. Rep., 903.

§ 5378. There was no inadvertence, accident or mistake, within the contemplation of the statute, nor was there the nature of defectiveness or insufficiency meant by the statute, although the patentee might have fallen into an error of judgment or into an erroneous conclusion of fact. *Ibid.*

§ 5379. Where an invention covered by the claim of the original patent was clearly and accurately described in the specification of that patent, and there was no defect or insufficiency so far as the description was concerned, and the patent was not invalid or inoperative to cover anything arising out of such description which was set forth as an invention, *held*, there is no evidence that there was, in fact, any inadvertence, accident, or mistake, and hence a reissue with enlarged claims was not authorized. *Wooster v. Handy*, 21 Fed. Rep., 51.

§ 5380. A specification and claim in the original patent having been framed so as to cover accurately and definitely a certain invention, there was no error which had arisen through inadvertence or mistake, nor was there any defectiveness or insufficiency in the specification, and hence there arose no case for a reissue. *American Diamond Drill Co. v. Sullivan Machine Co.*, 21 Fed. Rep., 74.

§ 5381. Where, on comparison of the original and reissued specification, all but two claims of the original appeared in the reissue, with certain additional claims not made in the original, *held*, that it precluded the idea of inadvertence, accident or mistake, and that there was no pretense that the patent was inoperative or invalid as to anything therein claimed as the patentee's invention. *Kells v. McKenzie*, 9 Fed. Rep., 284.

§ 5382. The specification and drawings of the reissue upon which the suit is brought being substantially the same as those of the original patent, it follows that the reissue was not for the purpose of making the original specification more full, accurate, or intelligible, or for the purpose of eliminating from it what the inventor had not the right to claim as new. *McMurry v. Mallory*, 111 U. S., 97.

See *Appeal*, § 302.

Reissues — Who may reissue — Administrator, § 5383. *Assignee*, §§ 5384-5392. *Assignee of executor*, § 5393. *Executor*, §§ 5394, 5395. *Owners of exclusive territorial right*, § 5396. *Patentee*, § 5397.

§ 5383. *Held*, that, under act 1836, section 13, a patent was properly surrendered and reissued to patentee's administrator, and that his right was not restricted because of his having previously made special or limited grants or licenses. *Smith v. Mercer*, 4 West. L. J., 49.

§ 5384. An assignee of a patent cannot reissue the patent except upon proof that the new specifications were invented by patentee and originally intended to have been patented by him and were omitted by mistake. *Taney's Opinion*, 2 Op., 572.

§ 5385. The statute of 1836 authorizes a reissue to an assignee of an assignee, and that without the approbation, or consent, or knowledge of the original patentee. *Swift v. Whisen*, 2 Bond, 115.

§ 5386. Assignees may tender a surrender and apply for reissue. *Forbes v. Barstow Stove Co.*, 2 Cliff., 379.

§ 5387. Assignee of a patent does not take the benefit of a reissue obtained after the assignment to him by inurement, but he must ratify the surrender and this must be proved affirmatively. *Burdell v. Denig*, 2 Fish., 588.

§ 5388. If a part of the whole patent has been vested in another, so as to constitute him an assignee within the meaning of the statute, an efficacious surrender can be made only by the concurrence of both of the owners of the patent; but this may be manifested by the assignee by his direct co-operation in the surrender, or his subsequent ratification of it. *Meyer v. Bailey*, 8 O. G., 437.

§ 5389. Assignee of patent cannot, after long delay, reissue for matter disclaimed by original patentee. *Putnam v. Hutchinson*, 12 Fed. Rep., 127.

§ 5390. The privilege of reissue, under section 4895, Revised Statutes, is not confined to the immediate assignee of the inventor. The word "assignee," as used in the statute, means the "assignee" in any degree, however remote. *Selden v. Stockwell Self-Lighting Gas-Burner Co.*, 19 Blatch., 544.

§ 5391. It is not essential to the validity of a reissued patent that a transferee of an interest in the original patent, who is not an assignee within the meaning of the statute, concur in the surrender. *Meyer v. Bailey*, 8 O. G., 437.

§ 5392. The patentee assigned the state of Pennsylvania to B., and afterward reissued the patent. Subsequently to the reissue B. assigned his title to an interest in the state of Pennsylvania, except as to certain counties, under the *reissued* patent, to the complainants, who, under the title thus acquired, filed a bill in equity against the defendants. Defendants demurred on the ground that B.'s interest was outstanding at the time of the surrender, and that he did not appear to have been a party to or to have assented to or approved of the surrender, and therefore the reissue was void. *Held*, that B. was not an assignee within the meaning of the statute, and therefore it was not necessary for him to concur in the surrender in order to give validity to the reissue. *Ibid*.

See *Assignee*, § 537. *Contracts*, § 1309. *Employer and Employee*, §§ 2108, 2109. *Estoppel*, § 2257. *Title*, § 6319.

§ 5393. The assignee of patentee's executor may reissue the patent. *Carew v. Boston Elastic Fabrics Co.*, 1 Holmes, 45.

§ 5394. Under United States patent laws, where the reissue was granted the executor as such, he may sue on such patent in all respects as if he had been designated in it as trustee instead of executor. *Rubber Co. v. Goodyear*, 9 Wall., 788.

§ 5395. The executor of a deceased patentee may surrender his patent and obtain a reissue. *Carew v. Boston Elastic Fabric Co.*, 3 Cliff., 356.

§ 5396. The owner of an exclusive territorial right under a patent may ratify a reissue thereof in which he did not join, by making an assignment under such reissue. *Meyer v. Bailey*, 8 O. G., 437.

§ 5397. Same reissue privilege pertains to a patentee taking under a special law as under the general law. *Page v. Holmes Burglar Alarm Telegraph Co.*, 17 Blatch., 484.

See *Assignee*, § 557. *Grant*, §§ 2631-2639.

Reissue—Office of— *Is to correct*, §§ 5398, 5399. *The description*, §§ 5400-5405. *To correct omissions*, §§ 5406, 5407. *To omit part of original*, §§ 5408-5410. *To modify or change the claim*, §§ 5411-5415. *To render effectual the original invention*, § 5416.

§ 5398. The law provides for and allows reissues for corrections, but not for alterations. *Doane & Wellington Mfg. Co. v. Smith*, 15 Fed. Rep., 459.

§ 5399. Where in the original patent the inventor, while giving his invention to the public, fails to describe the *rationale* of it, he is entitled to do so on the reissue. *Woodward v. Dinsmore*, 4 Fish., 163.

§ 5400. An amendment in a reissue consisting in greater conciseness and precision in the description of the invention, and in the methodical and separate definition of patentee's claims, is within the statutory warrant, and has the sanction of express adjudication. *Parham v. American Button-hole, etc., Sewing Machine Co.*, 4 Fish., 468.

§ 5401. The reissue of a patent is allowed to enable patentee to more perfectly describe his invention; and where the specifications vary, but the invention and the thing patented is the same, such variation does not make the patent void. *O'Reilly v. Morse*, 15 How., 62.

§ 5402. It is the office of a reissue to correct errors in the specification and claim of the

original patent, but the reissue claim should be confined to the original invention. *Tyler v. Welch*, 18 Blatch., 209.

§ 5403. The word "specification," as employed in section 4916, means description and claim. Therefore a reissue is allowed when the specification is defective or insufficient in regard to either the description or the claim, or to both, to such an extent as to render the patent inoperative or invalid, if the error arose in the manner mentioned in the statute. *Wilson v. Coon*, 18 Blatch., 532.

§ 5404. Where a reissued patent is granted upon a surrender of the original, for its alleged defective or insufficient specification, such specification cannot be substantially changed in the reissued patent, either by the addition of new matter or the omission of important particulars, so as to enlarge the scope of the invention as originally claimed. A defective specification can be rendered more definite and certain so as to embrace the claim made, or the claim can be so modified as to correspond with the specification; but, except under special circumstances, this is the extent to which the operation of the original patent can be changed by the reissue. *Russell v. Dodge*, 3 Otto, 460.

§ 5405. The correction of a patent by means of a reissue, where invalid or inoperative for want of a full and clear description of the invention, is proper. *Sewing Machine Co. v. Frame*, 24 Fed. Rep., 596.

§ 5406. The original patent being unnecessarily restricted, it was the object and the proper office of the reissue to correct this omission, so as to protect the patentee to the full extent of the invention. *Schuessler v. Davis*, 13 O. G., 1011.

§ 5407. If a form of a device embraced in a reissued patent had not been mentioned in the original patent, it might well be said not to have formed any part of the conception of the inventor; but if described in such original patent, although referred to as not being so useful or desirable in the combination as another form of such device, it might nevertheless be properly embraced by the reissued patent. *Campbell v. James*, 17 Blatch., 42.

See *Construction of Patents and Specifications*, § 1233. *Process and Product*, § 5114.

§ 5408. An inventor is always at liberty to omit in his reissue a part of his original invention, if he deems it expedient, and to retain that part only which he deems fit to retain. *Carver v. Braintree Mfg. Co.*, 2 Story, 432.

§ 5409. Minor features of invention relinquished upon reissue — because: 1, unimportant and valueless, and 2, lacking in patentable novelty — will not invalidate the reissue grant. *Gould v. Ballard*, 13 O. G., 1081.

§ 5410. And, further, there is nothing in the policy or terms of the patent act which forbids the omission of part of the original invention from the reissued patent. *McWilliams Mfg. Co. v. Blundell*, 11 Fed. Rep., 419.

§ 5411. It is a legitimate and important function of a reissue to modify or change the claims of the original patent, so as to cover the invention set forth therein. *Westinghouse v. Gardner & Ranson Air Brake Co.*, 9 O. G., 538.

§ 5412. So far as the claim is wanting in rightful scope, the patent is inoperative. To reissue the patent, that a claim to fully cover the invention may be entered, is warranted by the statute. *Badische Anilin and Soda Fabrik v. Higgin*, 15 Blatch., 290.

§ 5413. Although the original patent may contain a satisfactory specification of invention, yet if the specification of claim be inadequate to proper protection, the defect is within the language of the reissue section (4916, Revised Statutes) and may be remedied. *Ibid.*

§ 5414. A patent which fully describes and illustrates the actual invention of the patentee, but fails to claim it, may properly be reissued with claims to such parts as were really the invention of the patentee, such new claims constituting an amendment of the "specification" within the meaning of the law. *Wilson v. Coon*, 18 Blatch., 532.

§ 5415. Where the claim of the original patent was limited by including an element not of the essence of the invention, *held*, that it was a proper case for a reissue, in which the element was optional, the drawing and specification remaining substantially the same. *Crandal v. Walters*, 9 Fed. Rep., 659.

See *Claims*, §§ 809, 837.

§ 5416. The purpose of a reissue is to render effectual the actual invention for which the original patent should have been granted — not to introduce new features. *Union Paper Collar Co. v. Van Dusen*, 23 Wall., 530.

Reissue — Scope of — May include, what, §§ 5417-5421.

§ 5417. Scope of a reissue; what it may include. *Knight v. B. & O. R. Co.*, Taney, 106.

§ 5418. Whatever was the invention of the original patentee, whether expressly claimed in the original patent or not, when incorporated in the reissue patent, will be held to be within the claim of the original patent. *Swift v. Whisen*, 2 Bond, 115.

§ 5419. It is within the scope of a reissue that it contain a fuller description of the state of the art than the original, as well as of the nature of the improvements made by the patentee and the advantages attained through them. *Robertson v. Secombe Manufacturing Co.*, 10 Blatch., 481.

§ 5420. A reissued patent is not valid for everything which might have been claimed in the original patent, nor does its validity depend wholly upon the fact that the new features attempted to be secured thereby were suggested in the models, drawings or specifications of the original patent. Hence, where a patentee in his specifications claims as his invention a particular part of a machine, and his claims are all limited to that part, a reissue embracing other and distinct portions of the machine is not for the same invention, and is *pro tanto* void, although the designs accompanying the original patent show all the features contained in the reissue. *Kells v. McKenzie*, 9 Fed. Rep., 284.

§ 5421. To determine accurately the extent of the invention secured by any reissued letters patent, the state of the art at the time the original patent was granted must be considered. *Garneau v. Dozier*, 12 Otto, 230.

Reissue — Claim — *What may be claimed*, §§ 5422-5424. *When valid*, §§ 5425-5427. *Construction of claim*, §§ 5428-5433. *Description*, §§ 5434-5436. *Claim cannot be departed from*, §§ 5437, 5438. See *Evidence*, §§ 2318, 2319. "*Substantially as Described*," § 6199.

§ 5422. The machine in the reissue being the same as in the original, claims may be made to include whatever was the actual invention, if and so far as the patentee was the first to invent it. *Buffum v. Oak and Mfg. Co.*, 4 B. & A., 599.

§ 5423. It seems that on reissue a patentee may claim something which he had described as one mode of making his machine or article. For the thing which is actually made and exhibited he is to have a patent, though he may have said that an alternative form was equally good. *Atwood v. Portland Co.*, 10 Fed. Rep., 283.

§ 5424. Matter so described in the original specification that it might have been claimed in the original patent may properly be claimed in the reissue. *Washburn & Moen Mfg. Co. v. Haish*, 10 Biss., 65.

§ 5425. A reissue is valid although it claims only one of two modes of construction specified in the original patent. *American Nicholson Pavement Company v. City of Elizabeth*, 3 O. G., 522.

§ 5426. If the original patent is valid to the extent of its claim a reissue is without authority of law. *Atlantic Giant Powder Co. v. California Vigorit Powder Co.*, 6 Saw., 508.

§ 5427. Where the claims of a reissued patent involve a total abandonment of the principles which are stated in the original patent to be those of the invention, the reissued patent is invalid. (*Yale Lock Co. v. Scovill Manufacturing Co.*, 18 Blatch., 248, cited and distinguished.) *Parker & Whipple Co. v. Yale Clock Co.*, 18 Fed. Rep., 43.

§ 5428. The original patent may be referred to to aid in construction of the reissue in case of doubt. *Ely v. Monson & Brimfield Mfg. Co.*, 4 Fish., 64.

§ 5429. Where in a reissue a general term is used to cover an infringing device, it calls for careful scrutiny of the new claims to make sure that they do not exceed the limits of the invention; but if the term is intelligible, or can be made so by expert testimony, it is not necessarily fatal to the patent that it may be used in a new sense. *Crompton v. Knowles*, 7 Fed. Rep., 199.

§ 5430. The claims in a reissued patent are to be construed so as not to embrace any invention broader in its scope than the invention described, or substantially suggested or indicated in the original. *Swain Turbine Mfg. Co. v. Ladd*, 11 O. G., 153.

§ 5431. Claims in a reissue are to be construed, if the language will reasonably bear such an interpretation, so as not to embrace any invention broader in its scope than that in the original. *Brainard v. Cramme*, 12 Fed. Rep., 621.

§ 5432. Where it can be seen that the patentee seeks by apt words of description to secure what he has honestly invented and nothing more, the court should hesitate to regard with favor the accusation now so freely made against reissued patents. *Crandal v. Parker Carriage Goods Co.*, 20 Fed. Rep., 851.

§ 5433. Where the reissue claim omitted certain elements of the original claim, it was held, in view of the words "as specified" appended to the claim, to include such omitted elements, and to be for the same invention as the original. *Hayes v. Bickelhaupt*, 23 Fed. Rep., 183.

See *Equivalents*, § 2159.

§ 5434. A reissue need not describe the invention in the exact language of the original, but may contain a more full and exact description of what was there imperfectly described. *Pearl v. Ocean Mills*, 11 O. G., 2.

§ 5435. A reissue patent need not be rigidly confined in description to what was described

before. It may include whatever else was suggested or substantially indicated as part of the original patented invention. *Herring v. Nelson*, 14 Blatch., 293.

§ 5436. The decision of United States supreme court in *Lehigh Valley Railroad Company v. Mellon*, 20 O. G., 1891, while it limits the effect of the specification to the claim, does not exclude reference to the original specification to correct the claim upon a reissue. *Coburn v. Schroeder*, 22 O. G., 1538.

§ 5437. Where the office of a reissue was to secure a broad claim, the complainant in a suit upon such claim must be held thereto, even though the real invention is not secured thereby. *Wisner v. Grant*, 7 Fed. Rep., 922.

§ 5438. It is immaterial whether or not a certain construction might have been covered by the language of the specification, since the claims are to be dealt with and nothing else. *Turner & Seymour Manufacturing Co. v. Dover Stamping Co.*, 111 U. S., 319.

Reissue — Identity — Must be for same invention as original, §§ 5439-5458.

§ 5439. The reissue must be for an invention substantially the same in principle and mode of operation as that embodied in the original patent. *Knight v. B. & O. R. Co.*, Taney, 106.

§ 5440. Under act 1836, section 13, on reissue patentee might make his specification more accurate or restrict the limits of his claim, but his reissue patent, taking the place of the one he has surrendered, can only be for the same invention. *Battin v. Taggert*, 2 Wall. Jr., 101.

§ 5441. The invention described and claimed in a reissue must be the same as originally patented. And if, by a fair construction, the specification and claim are for something substantially different from those of the original, the patent is void. *Goodyear v. Berry*, 2 Bond, 189.

§ 5442. A reissue is invalid unless for the same invention as original. *Gill v. Wells*, 22 Wall., 1.

§ 5443. A new and different invention cannot be claimed in the reissue. *Crompton v. Belknap Mills*, 3 Fish., 536; *Battin v. Taggert*, 17 How., 74.

§ 5444. A reissue can only be for the invention originally made and intended to be described or claimed, and included in the original patent. *Brown v. Selby*, 2 Biss., 457.

§ 5445. Reissues must be for the same invention as the original patent, and it is the same with respect to a divisional reissue. (Dissenting opinion of CLIFFORD, MILLER and DAVIS, JJ.) *Corn-Planter Patent*, 23 Wall., 181.

§ 5446. Nothing can be interpolated in a patent on a reissue which was not indicated in the specification, model or drawings filed with the application for the original patent. *Carew v. Boston Elastic Fabric Co.*, 3 Cliff., 356.

§ 5447. Nothing can be admitted in a reissued patent for a chemical invention which is not found in the application for the original, and the act of 1870 does not dispense with this requirement. *Tarr v. Webb*, 10 Blatch., 96.

§ 5448. Where, on reissue, the alteration made was in the drawings only to an extent which in no wise affected the mode of operation, the manner of construction, or the function performed by the invention, it was held altogether immaterial, and the reissue sustained as for the same invention as that in the original patent. *McCrary v. Pennsylvania Canal Co.*, 5 Fed. Rep., 367.

§ 5449. A reissued patent must be for the same invention as the original, containing no new matter. *Putnam v. Yerrington*, 9 O. G., 689.

§ 5450. It is not meant by this that no new or different language should be employed. *Ibid.*

§ 5451. There is no safe or just rule but that which confines a reissue patent to the same invention which was described or indicated in the original. *Meyer v. Maxheimer*, 9 Fed. Rep., 99.

§ 5452. A reissue, to be valid, must be for the same invention contained in the original patent, and when, in a suit between the same parties, the supreme court of the United States had decided that the defendants' apparatus did not infringe the invention contained in the original patent, it could not infringe a valid reissue thereof, and the suit was accordingly dismissed. *Cammeyer v. Newton*, 16 O. G., 720.

§ 5453. If the reissues of an original patent are for any other or substantially different invention from that described in such original patent, they are unquestionably void; but the fact that the specifications or claims are different, the invention or discovery remaining the same, is of no consequence. *Campbell v. James*, 17 Blatch., 42.

§ 5454. When the reissue describes only what was described in the original patent, both as to the devices and the nature of the invention, it cannot be said that the invention in one is different from that in the other, although the claims have been changed and enlarged. *Sharp v. Tift*, 18 Blatch., 132.

§ 5455. A reissued patent must be for the same invention as that which formed the subject

of the original patent, or for a part thereof when divisional reissues are granted. It must not contain anything substantially new or different. *Atlantic Giant Powder Co. v. California Powder Works*, 8 Otto, 126.

§ 5456. A reissue can only be granted for the same invention which was originally patented. To show that the patentee, before obtaining his original patent, had made and done all those things which it is proposed to embrace in or cover by the reissued patent is nothing to the purpose. *Swaine Turbine Manufacturing Co. v. Ladd*, 12 Otto, 408.

§ 5457. In cases of reissues of patents, inoperative or invalid by reason of a defective or insufficient specification, or by reason of the patentee claiming as his own invention or discovery more than he had a right to claim as new, it is imperative that the new patent, when issued, shall be for the same invention, and that no new matter shall be introduced into the specification, when, as in the present case, there is a drawing with reference to which the invention is described. *Heald v. Rice*, 14 Otto, 737.

§ 5458. In this instance the reissue held to be not merely for a broader claim made many years after the original was granted, but for a different invention. By suppressing the description of certain parts of the device, the reissued patent is made to cover by implication an invention described and claimed in a subsequent patent. *Matthews v. Boston Machine Co.*, 15 Otto, 54.

Reissue — Identity — Want of identity with original, void, §§ 5459-5461.

§ 5459. Whenever it appears, upon a comparison of the two specifications and claims, as a matter of law arising on their construction, that the reissue is for a different invention from that secured in the original, the reissue is void and of no effect. *Sickles v. Evans*, 2 Cliff., 203.

§ 5460. Where it appears, on a comparison of the two instruments, as matter of law, that the reissued patent is not for the same invention as that embraced and secured in the original patent, the reissued patent is invalid. *Stevens v. Pritchard*, 4 Cliff., 417.

§ 5461. A reissue for an invention not exhibited in some manner (including, doubtless, an arrangement of the parts to produce the result, without express statement that it will be produced) in the original patent is invalid, and the question of delay in making the application is irrelevant. *Hammond v. Franklin*, 22 Fed. Rep., 833.

Reissue — Identity — Presumption of law is in favor of identity of original and reissue, §§ 5462-5472.

§ 5462. The question of identity of invention in the reissue and original patent is presumptive only and open to rebuttal. *Allen v. Blunt*, 2 W. & M., 121.

§ 5463. The presumption of law is that the reissued patent is for the same invention as the original. *Crompton v. Belknap Mills*, 3 Fish., 536; *Hussey v. McCormick*, 1 Biss., 300; *Morris v. Royer*, 2 Bond, 66.

§ 5464. Reissued patents are presumed to be for the same invention as the original, unless the contrary appear. *Stevens v. Pritchard*, 4 Cliff., 417.

§ 5465. The question is not one of fact, but of legal construction upon a comparison of the two instruments. *Ibid.*

§ 5466. A reissue is presumed to be for the same invention as the original, unless evidence on the face of the patent shows otherwise. *O'Reilly v. Morse*, 15 How., 62.

§ 5467. It is to be presumed that a reissue is for the same invention as the original patent; and it is for the defendant to show that it is not. *Guidet v. Barber*, 5 O. G., 149.

§ 5468. It is to be presumed, from the fact of a reissue, that the inventions described in the original and amended patents are the same. *Bantz v. Elsas*, 6 O. G., 117.

§ 5469. Whenever a patent is reissued or extended the presumption is that it is for the same invention, and the action of the commissioner is conclusive against a charge of fraud in obtaining the extension, or the reissue as well as all other objections, unless it appears upon the face of the papers that the new patent is not for the same invention as the original. *La Baw v. Hawkins*, 6 O. G., 724.

§ 5470. The legal rule is, that *prima facie* a reissue is for the same invention as that originally patented. *United States & Foreign Salamander Felting Co. v. Haven*, 3 Dill., 131.

§ 5471. The legal presumption is always in favor of the reissue, and that it is for the same invention as the original, and where defendant has not produced the original in evidence, the defense that the reissue is for a different invention from that in the original patent must fail. *Bickford v. Laporte*, 2 Fed. Rep., 214.

§ 5472. Reissued patents are presumed to be for the same invention as the original, and will only be adjudged to be void because for a different invention, where it clearly appears that the reissue contains some new feature of a material character not described, suggested, nor substantially indicated in the specification, drawings, or patent office model. *Thomas v. Shoe Machinery Manufacturing Co.*, 16 O. G., 541.

Reissue — Identity — Introduction of original in evidence to establish, §§ 5473-5477.

§ 5473. Where the original patent is not put in evidence there is nothing properly before the court by which to determine whether the original and the reissue are for the same invention or not. As the reissue was granted by the proper officer, the presumption is that it was properly granted, and there is nothing in the case to overcome that presumption. *Searls v. Bouton*, 12 Fed. Rep., 140.

§ 5474. Defendants may read the original patent in evidence at the trial, though not put in before the examiner, in order to show that the reissue is for a different invention in fact from the original, if the evidence cannot surprise the plaintiffs. *Knapp v. Shaw*, 15 Fed. Rep., 115.

§ 5475. Where defendant sets up, in a suit for infringement of a reissued patent, that the reissue is broader than the original, and invalid, he may introduce the original patent on plaintiff's failure to do so. *National Pump Cylinder Co. v. Simmons Hardware Co.*, 18 Fed. Rep., 324.

§ 5476. The defense that a reissued patent covers more than was embraced in the original cannot be sustained without producing the original and comparing it with the reissued patent. *Doherty v. Haynes*, 4 Cliff., 291.

§ 5477. Where one of the defenses set up was that the improvement secured by the reissue was not for the same invention as the original, *held*, 1. That the complainant is not obliged in such a case to introduce the original patent in evidence. 2. That the respondent cannot have the benefit of such a defense if the original patent is not exhibited in the record. *Bates v. Coe*, 8 Otto, 31 (§§ 1816-30).

See *Reissues*, § 5549.

Reissue — Identity — Test of, § 5478. *How determined,* §§ 5479-5490. *A question for the jury,* §§ 5491, 5492; *for the court,* § 5493.

§ 5478. Differences in the description and claims of the old and new specifications are not the tests of substantial diversity, but the description may be varied and the claims restricted or enlarged, provided the identity of the subject-matter of the original patent is preserved. *Parham v. American Button-hole, etc., Sewing Machine Co.*, 4 Fish., 468; *Herring v. Nelson*, 14 Blatch., 293.

§ 5479. In the absence of any allegation as to fraud, the want of identity of the invention in the reissued with that in the original patent can only be proved by showing upon the face of the instruments that one is so different from and repugnant to the other that they cannot be both for the same invention. *Middletown Tool Co. v. Judd*, 3 Fish., 141.

§ 5480. The identity of the invention set forth in the original patent and in the reissue is a matter of legal construction, and is determined by a comparison of the two patents. *Kerosene Lamp Heater Co. v. Littell*, 13 O. G., 1009.

§ 5481. To impeach a reissue, which is *prima facie* evidence that it is for the same invention as that in the original, it must appear, in the absence of fraud, that the invention described therein is repugnant to the original. *Andrews v. Wright*, 13 O. G., 969.

§ 5482. Whether a reissued patent is for the same invention as the original depends upon whether the specification and drawings of the reissued patent are substantially the same as those of the original; and, if not, whether the omissions or additions are or are not greater than the law allows to cure the defect of the original. *Union Paper Collar Co. v. Van Dusen*, 23 Wall., 530 (§§ 398-406).

§ 5483. The validity of the reissue depends upon the fact whether the patents are for the same invention, and the identity of the invention must be determined by the drawings and specifications construed together. *Searls v. Worden*, 11 Fed. Rep., 501.

§ 5484. The identity of the invention in the original and reissued patent is a question to be decided by the evidence. *Morris v. Royer*, 2 Bond, 66.

§ 5485. The question of identity of inventions described in the original and reissue patents is a matter of legal construction, to be determined by the court on a comparison of the two instruments. *Tucker v. Tucker Mfg. Co.*, 4 Cliff., 397.

§ 5486. The courts will in no case declare a reissue patent void if, by the true construction of the two instruments, the invention secured by the reissue is not substantially different from that embodied in the original patent. Inquiries in such a case are restricted to a comparison of the terms and import of the two patents in view of the drawings and models. If from these it results that the invention claimed in the reissue is not substantially different from that described, suggested or indicated in the original specification, drawings or model, the reissued patent must be held valid, as all other alterations and amendments plainly fall within the intent and purpose of the statute which allows a surrender and reissue. *Thomas v. Shoe Machinery Mfg. Co.*, 16 O. G., 541.

§ 5487. The question of identity of invention of the reissue with the original is to be determined by an inspection of the two instruments. *Ball v. Langles*, 12 Otto, 128.

§ 5488. To sustain the position that a reissued patent is not a patent for the same invention which was described in the specification of the original patent, and, therefore, that the reissue is unauthorized and void, the defendant must overcome the presumption against him arising from the decision of the commissioner of patents in granting the reissue, and this he can do only by showing, from a comparison of the original specification with that of the reissue, that the former does not substantially describe what is described and claimed in the latter. This must plainly appear before the court can be justified in pronouncing the reissued patent void. *Smith v. Goodyear Dental Vulcanite Co.*, 3 Otto, 486.

§ 5489. The question of identity as to the claims in two patents—the original and its reissue—is one of construction and comparison, to be determined from the face of the instruments, interpreted according to the principles of law. *Reed v. Chase*, 25 Fed. Rep., 94.

§ 5490. A comparison of an original and its reissue, for the purpose of determining the question of identity of the inventions described in them, requires an interpretation of the original patent in the light of the state of the art at the date when the application for it was filed. *Eachus v. Broomall*, 115 U. S., 429.

§ 5491. Whether the reissue is for a substantially different invention from the original invention is a question for the jury on the evidence. *Stimpson v. Railroad Co.*, 4 How., 380.

§ 5492. In determining the substantial identity of the invention in the original and reissued patent, it is competent for the jury to look into the drawings of the original patent. *Swift v. Whisen*, 2 Bond, 115.

§ 5493. Whether the reissue is for the same invention as the original patent involves a question of fact, and may be properly considered by courts of equity without reference to a jury. *Poppenhusen v. Falke*, 4 Blatch., 493.

Reissue — Identity — Permissible discrepancy, § 5494. *Question of identity*, § 5495; *cannot be raised on demurrer*, § 5496. *Claims in original*, § 5497. *Re-examination as to identity*, § 5498.

§ 5494. Discrepancy in the titles and variations in the description and claims of the reissued and original patent will not avoid the latter. This effect arises only from diversity of subject. *Penna. Salt Co. v. Thomas*, 5 Fish., 148.

§ 5495. In considering the validity of a reissue the only question is as to whether the invention described in the reissue is to be found in the original model, specifications or drawings of the inventor. *Chicago Fruit House Co. v. Busch*, 2 Biss., 472.

§ 5496. The question of identity of invention in original and reissued patent cannot be raised by demurrer. *Adams, etc., Mfg. Co. v. Meyrose*, 12 Fed. Rep., 440.

§ 5497. If any invention claimed or described in the reissue is identical with the claims in the original it is to be protected under *Gould v. Spicer*, 15 Fed. Rep., 346. *Singer Mfg. Co. v. Goodrich*, 15 Fed. Rep., 455.

§ 5498. Questions once decided will not be re-examined, on the ground that the evidence now for the first time shows the identity of the reissued and original structure, the drawings then before the court having been insufficient; it is not enough to show that the disputed structure was shown in the original drawings and specifications. It must be claimed also. *Hayes v. Dayton*, 20 Fed. Rep., 690.

See *Acquiescence*, § 147. *Identity*, § 2719.

Reissue — Valid restriction, §§ 5499-5502. *Valid enlargement*, §§ 5503-5510; *invalid*, §§ 5511-5517. *Permissible change*, §§ 5518-5523.

§ 5499. The inventor or his representative has the right in a reissue to enlarge or restrict the claim so as to give it validity and secure the invention. *Rubber Co. v. Goodyear*, 9 Wall., 788; *Battin v. Taggart*, 17 How., 74.

§ 5500. Claims improperly made, or which had been made too broad, may be restricted, and mistakes inadvertently made — not errors of judgment — may be corrected. *Swaine Turbine Manufacturing Co. v. Ladd*, 12 Otto, 408.

§ 5501. If a patentee might have claimed an element generally and broadly, most assuredly his more limited claim on reissue cannot be successfully impeached. *Stutz v. Armstrong & Son*, 20 Fed. Rep., 843.

§ 5502. When a patent has been judicially declared void for the reason that its claim is too broad, the defect held properly corrected by reissue. *Mathews v. Flower*, 33 O. G., 887.

§ 5503. Extensive division and enlargement of claims afford no legal ground of objection to a reissue unless new matter has been introduced. *Dederick v. Cassell*, 9 Fed. Rep., 306.

§ 5504. The validity of a reissued patent is not affected because it contains a claim not made in the original; neither is that circumstance any evidence that the patentee did not make the invention claimed. *Eickemeyer Hat-Blocking Machine Co. v. Pearce*, 10 Blatch., 403.

§ 5505. An inventor may, in his reissue specification, make his description more full and accurate; but he must not substantially change it so as to describe another device or cover anything not in the original. *Washburn & Moen Manufacturing Co. v. Haish*, 10 Biss., 65.

§ 5506. When it appears, upon comparison, that the specification of the reissue only differs from the original in containing an invention of broader scope, it is clear that the original patent must be valid if the reissue would be. *Atlantic Giant Powder Co. v. Cal. Vigorit Powder Co.*, 6 Saw., 508.

§ 5507. It will not invalidate the reissue that the claim is broader than the claim of the original patent, provided that it is "for the same invention" shown and described in the specification and drawings. *Waring v. Johnson*, 19 Blatch., 38.

§ 5508. A patentee may, under proper circumstances, by reissue, enlarge his claims so as to make them extend to the limits of his invention, but he is bound by those limits. He may not enlarge the invention. *Odell v. Stout*, 22 Fed. Rep., 159.

§ 5509. Where the single original claim was broadly construed with reference to the specifications, drawings and state of the art, the seven claims of its reissue were held to be separately included therein and were sustained. *Reed v. Chase*, 25 Fed. Rep., 94.

§ 5510. If severable claims of the reissue cover the same invention as the original, which contains but a single claim, such claims would seem to be as valid as the original, and would be infringed by whatever would infringe that. *American Diamond Rock-Boring Co. v. Sheldon*, 33 O. G., 1598.

§ 5511. Reissue with expanded claims condemned. *Case v. Brown*, 2 Wall., 320; *Burr v. Duryee*, 1 Wall., 531.

§ 5512. The unwarrantable expansion of the claims in a reissue defeats its validity. *Nye v. Allen*, 15 Fed. Rep., 114.

§ 5513. A reissued patent which enlarges an original patent — *i. e.*, which makes the invention patented other and more inclusive than the original letters patent — is void as against intervening rights and the public as well. *Dunbar v. White*, 15 Fed. Rep., 747.

§ 5514. Any extension of a reissued patent beyond the scope of the invention set forth and fairly indicated in the original specification, drawings and model would be fatal to the patent itself. *Swaine Turbine Manufacturing Co. v. Ladd*, 12 Otto, 408.

§ 5515. A claim in a reissue which covers an invention clearly beyond that shown in the original is invalid, whether the time elapsing between the reissue and original patent is great or not. *Dryfoos v. Weise*, 19 Fed. Rep., 315.

§ 5516. The original patent showed certain devices to which no function was ascribed, and the position of which with reference to a particular part of the machine was not shown with accuracy. The reissue described such devices as occupying a definite position with reference to said particular part of the machine and as having a specified function. *Held*, that a claim in the reissue covering the arrangement described therein embraced an invention different from that shown in the original, was too broad to be added at any time, and was therefore void. *Reay v. Raynor*, 19 Fed. Rep., 308.

§ 5517. The reissue was taken out more than three years after the original, and would seem to be for that reason unseasonable and invalid. *Ibid.*

§ 5518. If in the reissue the description of the parts had only been more full and particular, or if distinct functions of the parts not before mentioned had been newly set forth, or functions before mentioned had been wholly omitted, so long as the devices and their mode of operation, as described, remained the same, the reissue might not be voided for showing a different invention. *Doane & Wellington Manufacturing Co. v. Smith*, 15 Fed. Rep., 459.

§ 5519. To introduce new words or phrases which are more aptly descriptive does not invalidate a reissue, the invention set forth being the same as in the original patent. *Draper v. Potomska Mills Corporation*, 13 O. G., 276.

§ 5520. Where the original specification in a patent for a stamp averred one object to be to stamp the day and month, a reissue may describe one object to be "dating" and "printing dates." *Robertson v. Secombe Manufacturing Co.*, 10 Blatch., 481.

§ 5521. In an original patent for a stamp containing several type-wheels for dates, the suggestion that they might bear any suitable letters or figures warrants describing in a reissue a wheel bearing the date of the year, though it was not otherwise alluded to in the original. *Ibid.*

§ 5522. It was held to be no objection to the reissued patent that it suggested that any material which was the equivalent of india-rubber might be used instead of it, such as animal or vegetable fiber, gutta percha, etc., although those materials were not mentioned in the original. *National Car-Spring Co. v. Union Car-Spring Manufacturing Co.*, 12 Blatch., 80.

§ 5523. Where, on reissue, patentee substituted for his former specification of a material to be used as part of his device a description of materials which may be used by specifying only those which have the two properties in which he had formally declared the utility and availability of the material which he then named to consist, *held*, that there was no enlargement of the thing patented, and that the reissue was valid. *Dunbar v. White*, 15 Fed. Rep., 747.

Reissue — *May include matter shown in the specifications, model or drawings of the original*, §§ 5524-5536. *Parol testimony to enlarge scope beyond matter shown, etc.*, § 5537. See *Drawings*, §§ 2081, 2082. *Model*, §§ 4199, 4200. *Scope of Patent*, § 5967.

§ 5524. Applications for reissue need not be limited to the original drawings and model. If justified by the specification, new drawings may be added. *Hank's Case*, 2 A. L. T. (U. S.) R., 129.

§ 5525. A reissue specification may be amended by the model in a machine patent as well as by the drawings. *Hendy v. Golden State & Miners' Iron Works*, 17 Fed. Rep., 515.

§ 5526. A reissue may include matter shown in the model which was not described or indicated in the original specification or drawing, and it seems that the character of a lost or destroyed model may be established by oral testimony. *Meyer v. Goodyear's India Rubber Glove Manufacturing Co.*, 11 Fed. Rep., 891.

§ 5527. The provision of the act of congress, that new features shall not be introduced, does not take away the right to include in the reissue whatever was substantially suggested or indicated in the surrendered specifications, drawings, or patent office model. *Stevens v. Pritchard*, 4 Cliff., 417.

§ 5528. A reissued patent may embrace whatever was suggested or substantially indicated in the original specification, drawings or model, and the claims may be broader, therefore, than those contained in the first patent. *Seymour v. Marsh*, 2 O. G., 675.

§ 5529. A suggestion in the specification, or an indication in the drawing or model of the original patent, may oftentimes justify an enlarged description of the invention upon reissue; but if the new description embody a distinct invention, enough should be found in the original specification to apprise others that such additional feature is included. *Kelleher v. Darling*, 4 Cliff., 424.

§ 5530. The most natural construction of the law relating to reissues (Revised Statutes, section 4916) would perhaps be that, if a patent should be inoperative by reason of a defective specification, or invalid for claiming too much, the defect might be supplied or the excessive claim be reduced by reissue. *Smith v. Merriam*, 6 Fed. Rep., 713.

§ 5531. But the courts have given a very different interpretation, much wider in most respects and narrower in only one. They do not permit a defective specification to be supplied excepting from the drawings or model; but they do permit the claim to be varied provided the same invention is described in both patents. *Ibid.*

§ 5532. The validity of a reissued patent is not affected because it describes features not described in the original, and points out their functions, if they were shown in the original drawings. *Bantz v. Elsas*, 6 O. G., 117.

§ 5533. Where a reissued patent claimed a feature which was not described in the original specification, nor clearly shown in the drawings, and the model was so injured as to furnish no evidence respecting it, it was held on other proof that the model originally contained the disputed feature, and the patent was held valid. *Aultman v. Holley*, 11 Blatch., 317.

§ 5534. A reissued patent cannot be sustained if it claims devices which are not shown either in the specification, drawing or model of the original application, nor suggested by them, whatever may be the extrinsic proof that they formed a part of the patentee's invention. *Carew v. Boston Elastic Fabric Co.*, 3 Cliff., 356; *Sarven v. Hall*, 9 Blatch., 524.

§ 5535. The applicant for reissue cannot interpolate new features not described, suggested or substantially indicated in his original specification, drawings or model. Such interpolations in a reissue patent, if material, show that the commissioner exceeded his jurisdiction; and where that is done it clearly becomes the duty of the court to declare the patent void. *Thomas v. Shoe Machinery Mfg. Co.*, 16 O. G., 541.

§ 5536. Where the original specifications and drawings did not show the absence or presence of the feature in the enlarged reissue, the latter was sustained in view of the fact that it did not appear whether or not the feature was shown in the original model. *Hendy v. Golden State & Miners' Iron Works*, 17 Fed. Rep., 515.

§ 5537. In an application for reissue, parol testimony is not admissible to enlarge the scope of the invention beyond what was described, suggested or substantially indicated in the original specification, drawings or patent office model. *Union Paper Collar Co. v. Van Dusen*, 23 Wall., 530 (§§ 398-406).

Reissues. — New matter — Defined, §§ 5538-5541. *Cannot be introduced in reissue,* §§ 5542-5544; *except in case of a machine,* § 5545. *What is,* § 5546; *what is not,* § 5547. *Must clearly appear,* §§ 5548, 5549. *Pro tanto recovery in case of,* § 5550.

§ 5538. "New matter," act 1870, supposed to mean new substantive matter, such as would have the effect of changing the invention, or of introducing what might be the subject of another application for a patent. *Atlantic Giant Powder Co. v. California Powder Works*, 8 Otto, 126.

§ 5539. New matter is such an enlargement of the original specification or claims as to include combinations or results which did not necessarily flow from the invention as originally stated and described. *Putnam v. Yerrington*, 9 O. G., 689.

§ 5540. By new matter is not meant merely the introduction of a new ingredient in a patented composition, but any change in the original specification and claim, whereby a new and substantially different composition and results are secured. *United States & Foreign Salamander Felting Co. v. Haven*, 3 Dill., 131.

§ 5541. What is and what is not "new matter" in relation to a reissue. *Yale Lock Mfg. Co. v. Scovill Mfg. Co.*, 18 Blatch., 248.

§ 5542. Section 4916 of the Revised Statutes of the United States prohibits in a reissue not only the introduction of new matter, but also the enlargement of the original claim growing out of the subsequent advancement of the art. This rule controls both the patent office and the courts. *United States & Foreign Salamander Co. v. Haven*, 3 Dill., 131.

§ 5543. The section upon the subject of reissues prohibits the introduction of "new matter" into the specification, even though the new matter was the invention of the patentee and was inadvertently omitted from the original application. *Atwater Mfg. Co. v. Beecher Mfg. Co.*, 8 Fed. Rep., 608.

§ 5544. The prohibition of the statute in relation to reissue applications is limited to the adding of new matter to the specifications, and there is no obligation upon the patentee to claim all things in the reissue which were claimed in the original invention. (*Carver v. Braintree Mfg. Co.*, 2 Story, 438.) *Albright v. Celluloid Harness Trimming Co.*, 12 O. G., 227.

§ 5545. In determining the propriety of the reissue no new matter can be introduced into the specification, except in case of a machine patent. It is only with respect to patents of that character, where no models or drawings exist, that, in our judgment, any notice can be taken by the commissioner of matter outside of the original specification and claim. *Atlantic Giant Powder Co. v. Cal. Powder Works*, 3 Saw., 448.

§ 5546. Where, on an application for reissue, the original reissue application was all erased, except the opening and conclusion, and a second application was substituted, differing in important particulars from the first, but not sworn to, *held*, that the reissue granted thereon was invalid. *Whitely v. Swayne*, 4 Fish., 117.

§ 5547. It is no enlargement of the invention to draw the reissue claim so as to cover various kinds of bell, the original being laid simply to a gong-shaped bell. The drawings and specification clearly show that the form of bell is not an essential characteristic of the invention, and it is manifest that the original claim must have been unnecessarily limited. *Gong Bell Manufacturing Co. v. Clark*, 13 O. G., 274.

§ 5548. It must clearly appear that new matter has been introduced before a reissue or its claims can be rejected. *Dederick v. Cassell*, 9 Fed. Rep., 306.

§ 5549. Where the original patent is not in evidence the question of new matter in the reissue cannot be determined. *Consolidated Oil Well Packer Co. v. Eaton*, 12 Fed. Rep., 865.

§ 5550. Where the new matter introduced in the reissue is so interwoven with the descriptive portion of the claim that it cannot be separated from the other matters therein described, the principle of recovery *pro tanto* on the valid claim, in the absence of a disclaimer, does not apply and there can be no recovery. *Cahart v. Austin*, 2 Cliff., 528.

Reissue — For a process, §§ 5551-5553. *A machine reissued for a process,* §§ 5554-5558. *A process reissued for a product,* §§ 5559-5561; *for an article of manufacture,* § 5562. *For an article of manufacture,* § 5563. *For a product,* §§ 5564, 5565. *For a composition of matter,* §§ 5566-5568.

§ 5551. A reissued patent is not the less valid because it contains a full account of processes which, although adverted to in the original, were not described at length, because they were well known in the art. *Goodyear Dental Vulcanite Co. v. Smith*, 1 Holmes, 354.

§ 5552. A patentee cannot, by obtaining a reissue for a process, enlarge his right to a monopoly beyond the actual invention. *Clark v. Kennedy Manufacturing Co.*, 14 Blatch., 79.

§ 5553. The reissued patent, having been expanded to embrace a claim for purifying mid-

dlings, when no such process was described, suggested or claimed in the original patent, is void. *American Middlings Purifier Co. v. Atlantic Milling Co.*, 5 Dill., 127.

§ 5554. A reissued patent is valid, although the description of a machine to which the invention may be applied is substituted in the specification for the purpose of illustration instead of the description of another contained in the original, which was so imperfect that it failed to show the application. *Aultman v. Holley*, 11 Blatch., 317.

§ 5555. Where a broad claim to a process not found in the original patent is introduced in the reissue, it cannot, by construction, be limited to the mechanism, but must be held to cover the mode of operation generally, and is void. *Hatch v. Moffitt*, 15 Fed. Rep., 252.

§ 5556. The rule reiterated that a patent for a machine cannot be reissued for the purpose of claiming the process of operating that machine, because if the claim for the process is anything more than for the use of the particular machine patented it is for a different invention. *Heald v. Rice*, 14 Otto, 737.

§ 5557. A patent for a machine cannot be broadened on reissue to cover a process described in the original patent. If the process was patentable, it should have been included in the original patent. *New v. Warren*, 22 O. G., 587.

§ 5558. A reissue for a process of an original patent for a mechanism to accomplish a specific result is much broader than the original patent and covers every mechanism which can be contrived to carry on the process. *Wing v. Anthony*, 106 U. S., 142.

§ 5559. A reissue for a product of an original process patent is valid. *Tucker v. Dana*, 7 Fed. Rep., 213.

§ 5560. A patent granted for certain processes of exploding nitro-glycerine will not support a reissue for a composition of nitro-glycerine and gunpowder or other substances, even though the original application claimed the invention of both process and compound. They are distinct inventions. *Atlantic Giant Powder Co. v. California Powder Works*, 8 Otto, 126.

§ 5561. An original patent for a process will not support a reissued patent for a composition, unless the composition is the result of the process, and the invention of the one involves the invention of the other. *Ibid.*

§ 5562. A reissue of a process patent for the article of manufacture distinctly indicated, but not technically claimed in the original, is valid. *Penna. Salt Co. v. Thomas*, 5 Fish., 148.

§ 5563. A claim in an original patent to an article of manufacture is a curable defect, and may be claimed in the reissue as a combination. *Middletown Tool Co. v. Judd*, 3 Fish., 141.

§ 5564. The claimant's original patent claimed glue reduced to minute shavings by a rasping process performed in a machine constructed to give the glue such a form and no other. His reissued patent described the same process and machine, and claimed the product. It was held valid, although it also contained amendments evidently intended to cover glue reduced to fine particles by crushing or other means. *Milligan & Higgins Glue Co. v. Upton*, 4 Cliff., 237.

§ 5565. Reissue patents for the product, after the rejection and withdrawal of an application for a patent for the product and the taking out of a patent for the machine alone, of doubtful validity. *American Carpet Lining Co. v. Manhattan Carpet Lining Co.*, 20 O. G., 372.

§ 5566. A patentee cannot, upon a reissue, appropriate the use in any or all proportions of the ingredients specified in a patent for a composition, although in his original specification he claimed the right to vary the proportions named; he is entitled to only those which will result in a product possessing the peculiar properties of his original compound. *Francis v. Mellor*, 1 O. G., 48.

§ 5567. Where the original patent described a compound consisting of two ingredients, one of which was an inexplusive porous substance, a reissue covering all porous substances, whether explosive or inexplusive, which would form with nitro-glycerine a compound equally safe for handling, is void as for a different invention. *Atlantic Giant Powder Co. v. California Vigorit Powder Co.*, 6 Saw., 508.

§ 5568. A reissued patent for a composition may be valid although some of the ingredients specified in the original patent are omitted, provided the composition possesses substantially the same characteristics and is capable of the same uses. *Francis v. Mellor*, 1 O. G., 48.

Reissue — *A combination claim cannot be reissued for a combination of a less number of elements*, §§ 5569-5578.

§ 5569. A patent for a combination of four elements, which does not suggest any other improvement, cannot be reissued with a claim for a combination of three of those elements, omitting all reference to the fourth. *Gill v. Wells*, 22 Wall., 1.

§ 5570. A suit for the infringement of such a reissued patent cannot be maintained against any one who uses a combination of the three elements embraced in it, even though he uses with them a substitute for the omitted element. *Ibid.*

§ 5571. A patent for a combination of old elements cannot be reissued for the separate elements, because the elements are old, and because it is for a different invention from that in the

original patent. (Dissenting opinion of CLIFFORD, MILLER and DAVIS, JJ.) *Corn-Planter Patent*, 23 Wall., 181.

§ 5572. The omission in a reissue of an element essential to the invention as originally described and patented is fatal to the reissue. *Cammeyer v. Newton*, 16 O. G., 720.

§ 5573. Where the specification of the original patent suggested no invention save the one contained in the entire combination, the claim in the reissue for a less number of elements than it embraced was declared void. *Miller & Co. v. Bridgeport Brass Co.*, 14 Blatch., 282.

§ 5574. Had it been intimated in the original patent that the less number of elements could be used in combination, this would have justified a claim to them on reissue. *Ibid.*

§ 5575. Without such suggestion the claim is invalid, as a departure from the original invention. *Ibid.*

§ 5576. Where complainants in their reissue split up and divided the elements of their invention, and claimed them separately and not as a combination, and the separate claims embraced fewer elements in combination than were embraced in the claim of the original patent, *held*, that this enlarged the scope of the patent, and that the reissue was for a different invention from that embraced in the original patent. *Matthews v. Boston Machine Co.*, 15 Otto, 54.

§ 5577. It is an enlargement of a claim for a combination of several elements (seven) to reissue it for a combination of a less number of them (five). *Gage v. Herring*, 107 U. S., 640.

§ 5578. If a patent containing a single claim for a combination of several elements is, within four months before its expiration, reissued and extended with the same description as before, but with two claims, the one a repetition of the original claim, and the other for a combination of some of the elements only, the reissue is invalid as to the new claim, and valid as to the other. *Ibid.*

Reissue — *A combination may be reissued with claims to the separate elements*, §§ 5579-5582; *to subcombination*, §§ 5583-5589.

§ 5579. A patentee, whose devices are new, is at liberty to claim each, by way of reissue, although he may have represented and claimed them originally as acting conjointly. *Gallahue v. Butterfield*, 10 Blatch., 232.

§ 5580. Where the thing shown and described in the original patent and in the reissue is the same, but in the original has been claimed with all its features in combination, the patentee can in the reissue modify or divide his claims so as to embrace severally the distinct features of the thing invented. *Smith v. Merriam*, 6 Fed. Rep., 713.

§ 5581. When the real invention was a box-loop for carriage-tops of a particular construction, and the claim of the original patent was limited to the use of the box-loop in connection with an adjunct — a new strengthening or stiffening plate — *held*, that the patent might be reissued for the purpose of inserting a claim for the loop itself, without reference to the strengthening plate. *Crandal v. Walters*, 9 Fed. Rep., 659.

§ 5582. The introduction into reissued letters patent of claims for the patentable parts of the combination claimed in the original letters does not invalidate the reissued letters, if the patentee was the first inventor of the patentable parts claimed, although the original patent was for the combination alone, so described and claimed that the parts were not to be used separately, but together and simultaneously. *Odell v. Stout*, 22 Fed. Rep., 159.

§ 5583. When, in the specification of the original patent, the inventor describes a new and useful combination of a number of ingredients, performing, in combination, certain functions less than he has claimed, he may in the reissue claim such combination of the less number which he has described, suggested or substantially indicated as his invention, but failed to include in his claims. *Pearl v. Ocean Mills*, 11 O. G., 2.

§ 5584. The doctrine of *Vance v. Campbell*, 1 Black, that the use of a less number of elements than are contained in the patented combination is no infringement because not the same invention, does not apply to the practice of reissuing patents. It is true the law requires that reissues shall be for the same invention as the originals on which they are based, but it is no departure to make separate claims to subcombinations which were originally joined in one. *Herring v. Nelson*, 14 Blatch., 293.

§ 5585. The validity of a unitary combination which contained a less number of elements than was stated and claimed in the original patent upheld in the reissue. *Herring v. Nelson*, 14 Blatch., 293.

§ 5586. The doctrine in *Herring v. Nelson*, 12 Official Gazette, approved. Separate claim may be laid in the reissue to subcombinations of elements united originally in one general combination claim. *Kerosene Lamp Heater Co. v. Littell*, 13 O. G., 1009.

§ 5587. The original patent claimed the entire combination, and the reissue subcombinations which enter into such general and larger combination. *Held*, that the reissue was for

things contained within the apparatus described in the original patent, on the authority of *Brown v. Guild*, 23 Wall., 181, and *Herring v. Nelson*, 14 Blatch., 293, as against *Gill v. Wells*, 22 Wall., 1, and *Russell v. Dodge*, 3 Otto, 460. *Christman v. Rumsey*, 17 Blatch., 148.

§ 5588. When the specification and drawings of the original and reissued patents illustrate and describe the same mechanical structure, with the same mode of operation, the reissue may lawfully contain claims to combinations of fewer elements than were contained in the combination claimed in the original patent. *Ibid.*

§ 5589. The omission in an original patent to claim subcombinations in the combinations claimed, the existence of such subcombinations being apparent on the face of the original patent, *held*, on the facts in the case, such a dedication of them, if new, to the public, that a reissue to cover such subcombinations in revocation of such dedication cannot avail to the prejudice of rights acquired by the public before the reissue was applied for. *Clements v. Odorless Excavating Apparatus Co.*, 109 U. S., 641.

Reissues — Combination — *Must be for the original combination*, §§ 5590, 5591. *May claim combination shown but not claimed*, 5592-5596. *May omit element not material to combination*, § 5597. *Cannot substitute a new element for an omitted element*, §§ 5599, 5600.

§ 5590. The reissue must be confined to the original combination, and cannot be expanded to make a new combination by the introduction therein of devices new or old, not included in or suggested by the original. *Washburn & Moen Mfg. Co. v. Fuchs*, 16 Fed. Rep., 661.

§ 5591. Where a patentee, in his specifications, claims as his invention a particular part of the machine, and his claims are all limited to that part, a reissue embracing other and distinct portions of the machine, is not for the same invention, and is *pro tanto* void, although the designs accompanying the original patent show all the features contained in the reissue. *Flower v. City of Detroit*, 22 Fed. Rep., 292.

§ 5592. Nothing which is plainly embraced in the specifications, model or drawings of the original patent is regarded by the courts as new matter. Mechanical combination shown but not claimed in the original may be lawfully claimed by reissue. *Dederick v. Cassell*, 9 Fed. Rep., 306.

§ 5593. Although a patented combination proves impracticable, yet the patentee may, upon a reissue, claim such devices and such combinations of devices as are new and are shown in his original application, provided they can be made operative without further invention. *Wheeler v. Clipper Mower & Reaper Co.*, 10 Blatch., 181.

§ 5594. The drawings being identical with those of the original patent, it is no violation of the reissue privilege to include in the new specification and claims what was fairly indicated by the drawings to be within the invention. *Kerosene Lamp Heater Co. v. Littell*, 13 O. G., 1009.

§ 5595. Thus, features of construction shown in combination and in a manner that would enable a skilled mechanic to practice the invention, although neither described nor claimed originally, may be set forth and protected upon reissue. *Ibid.*

§ 5596. It is of no consequence that a reissue states that certain combinations are found in the machine which will act in a certain way and effect certain results, when the original did not state that such combinations were found there, or failed to state that said modes of operation and said results would follow, provided the said combinations in fact existed in a machine made according to the drawings and description in the original patent, or provided the said modes of operation and the said result in fact followed in a machine so made. To supply such defects is the very object and office of a reissue. *Potter v. Stewart*, 18 Blatch., 561.

§ 5597. A patentee is not bound to include in the claim of his reissued patent an element of the original claim — a pin connecting a clamp-piece and a screw — which was not necessary or material to the combination, and which was found to be practically useless. *McWilliams Manufacturing Co. v. Blundell*, 11 Fed. Rep., 419.

§ 5598. Defects in the description of an original patent may be cured by reissue, but the patentee may not strike out the entire description of one of the ingredients of a combination, and insert in lieu thereof a description of other devices, unless it be alleged that such other devices are the equivalents of the device stricken out. *Tucker v. Tucker Mfg. Co.*, 4 Cliff., 397.

§ 5599. A patent for a combination of four elements cannot be reissued for a combination of three of the original elements with a substitute for the fourth, unless it was known at the date of the patent to be a proper substitute; and it should be explained, it seems, that the substitute is an equivalent for the omitted element, and why the change is made. *Gill v. Wells*, 22 Wall., 1.

§ 5600. When the original patent described a certain form of mica chimney united to a glass base, a reissue claiming such glass base in combination with any form of chimney-top was re-

garded as greatly enlarging the scope of the invention by dropping one element from the combination and putting in its place another not its equivalent. *Blackman v. Hibbler*, 17 Blatch., 333.

Reissues — Combinations in general — *New matter*, § 5601. *May include elements implied in original claim*, § 5602. *May include mode not shown in original*, § 5603. *Expansion*, § 5604. *Claiming a combination not so called in original*, § 5605.

§ 5601. Under act 1870, section 53, a reissue with description of combinations of elements of the original other than that contained in the original, is new matter. *Gill v. Wells*, 22 Wall., 1.

§ 5602. Where a reissue claim was to a combination of certain elements claimed in the original patent, and also included elements implied or understood in the original claim, it was held but another mode of formulating such original claim, and not an expanded claim. *Fay & Co. v. Fraser*, 11 Biss., 422.

§ 5603. Where the gist of the invention is the apparatus, or combination of parts, and not any particular instrumentality by which it is put in operation, *held*, that because one mode only was indicated in the original, the patentee was not shut up to the one mode in the reissue as long as it was not the essence of the invention. *Broadnax v. Central Stock Yard & Transit Co.*, 4 Fed. Rep., 214.

§ 5604. A claim to a combination of parts which specifies that such parts are constructed in a particular way for a special purpose cannot be expanded by reissue so as to include combinations of those parts, expressed so as to cover them broadly and without limitation as to their construction or advantages. *McMurray v. Mallory*, 111 U. S., 97.

§ 5605. An arrangement of devices was described in an original patent, although it was not called a combination. *Held*, that a reissue calling it a combination, and containing a statement that the invention consisted also in this combination, does not appear to vary the prior description in effect. *American Diamond Rock-Boring Co. v. Sheldon*, 33 O. G., 1598.

Reissues — Effect of disclaimer in original, § 5606; *actual*, §§ 5607-5612; *constructive*, §§ 5613-5616. See *Disclaimer*, §§ 1994, 2012, 2022, 2026, 2030-2040, 2045. *Errors*, § 2182. *Priority of Invention*, § 5018.

§ 5606. A reissued patent is within the letter and the spirit of the provisions of the patent act relating to disclaimers. *Gage v. Herring*, 107 U. S., 640.

§ 5607. A statement in an original patent that a part is old, or a disclaimer of a part, does not, it seems, necessarily prevent its being claimed on reissue, though it would have that effect if made advisedly. *Hussey v. Bradley*, 5 Blatch., 134.

§ 5608. It is doubtful whether a reissue patent can be sustained in any case where it contains claims that have once been formally disclaimed by the patentee or rejected with his acquiescence, and he has consented to such rejection in order to obtain his patent. *Leggett v. Avery*, 11 Otto, 256.

§ 5609. In such case the rejection (*omission*) of the claim can in no just sense be regarded as a matter of inadvertence or mistake, and even if it were such, the applicant would seem to be estopped from setting it up on an application for a reissue. *Ibid*.

§ 5610. Doubts expressed as to whether reissued letters patent can be sustained when they contain claims which have once been formally disclaimed by the patentee, or rejected with his acquiescence, and he has consented to such objection in order to obtain his patent. *Goodyear Dental Vulcanite Co. v. Davis*, 12 Otto, 222.

§ 5611. Where patentee claimed in the reissue what had been distinctly waived by disclaimer in the original patent, it was held to be new matter and the claim void. *Atwater Mfg. Co. v. Beecher Mfg. Co.*, 8 Fed. Rep., 608.

§ 5612. A statement in the original patent that a part is old, or a disclaimer to a part, made from inadvertence, will not necessarily prevent claiming such matter on reissue. *Hussey v. Bradley*, 5 Blatch., 134.

§ 5613. A patentee is not estopped by words in his original specification which he has omitted in his reissue. *Allen v. Blunt*, 2 W. & M., 121.

§ 5614. Dedication to the public in an original patent may be revoked on reissue. *Battin v. Taggart*, 17 How., 74.

§ 5615. A patentee reissuing his patent has no right to omit something which he had before described as essential. *Atwood v. Portland Co.*, 10 Fed. Rep., 283.

§ 5616. Where it appeared that a reissue granted seventeen months subsequent to grant of original patent was a *deliberate* attempt to contradict leading assertions in the original specification, the enlarged claims to such matter were held invalid. *McKay v. Stowe*, 17 Fed. Rep., 516.

Reissue — *Right may be lost by delay*, § 5617. *Laches, how determined*, § 5618. *Unreasonable delay*, §§ 5619-5621; *particular cases*, §§ 5622-5642.

§ 5617. The right to have corrections made by reissue may be abandoned and lost by unreasonable delay. *Terrell v. Bradford*, 23 O. G., 1623.

§ 5618. Laches in reissuing is determined not merely on a question as to what information respecting their rights parties do actually obtain, but as to what information they might have obtained had they used the means and opportunities directly at their command. *Ives v. Sargent*, 17 Fed. Rep., 447.

§ 5619. A delay of more time than would be reasonably sufficient to read the patent and ascertain its need of amendment should be accounted laches in a case where enlargement of a claim is the only amendment. *Hartshorn v. Eagle Shade Roller Co.*, 18 Fed. Rep., 90.

§ 5620. In determining whether an inventor is guilty of inexcusable delay, the fact that the correction of a mistake by reissue was before any adverse rights had accrued is a consideration of paramount importance, and it ought to count something in his favor that, being of foreign birth, education, and an alien tongue, he encountered difficulties in acquiring a knowledge of our language and laws. *Stutz v. Armstrong & Son*, 20 Fed. Rep., 843.

§ 5621. The settled rule is, where the claim is merely expanded, that a delay of more than two years in applying for a reissue invalidates the reissue, unless such delay is accounted for and excused by special circumstances. It is a question of law arising on the face of the bill where such delay is not therein explained; and the court cannot substitute the decision of the patent office upon that question for its own. *Wollensak v. Reiher*, 115 U. S., 96.

§ 5622. Where a process patent was reissued, after a lapse of four years, to cover the product also, *held*, that it was a mistake apparent upon the first inspection of the claim, and such product claim was held void for laches. *Union Tubing Co. v. Patterson & Co.*, 23 Fed. Rep., 79.

§ 5623. Where there was a delay of nearly four years, and the original patent was plain, simple, and free from obscurity, it was held that the delay in seeking a correction by reissue was unreasonable, and that the commissioner had, therefore, no authority to grant it; and the patent was held invalid so far as the claims were broader than those in the original patent. *Mahn v. Harwood*, 112 U. S., 354.

§ 5624. Where the reissue was obtained five years after grant of the original patent for a mistake apparent at the time, and disclaimed by implication, it was held void for delay in reissuing, and was not for "a mistake and inadvertence" within the scope of a reissue. *Streit v. Lauter*, 11 Fed. Rep., 309.

§ 5625. If an enlargement and alteration of the scope of a patent by reissue is in any case allowable, an unexplained delay of five years must be deemed unreasonable. *Singer Mfg. Co. v. Goodrich*, 15 Fed. Rep., 455.

§ 5626. The enlargement of the scope of a claim six years after the original patent is not valid. *American Diamond Rock-boring Co. v. Sheldon*, 33 O. G., 1598.

§ 5627. Where a patent claiming a combination was reissued six years after, with a claim to one of the parts of the combination, the reissue was held to be for a different invention, and that the part claimed was abandoned, having been six years in use prior to his claim. *Battin v. Taggert*, 2 Wall. Jr., 101.

§ 5628. After a lapse of eight years no amendment can be imported into a reissue to effect a broadening of the claim of the original in the absence of very special circumstances. *Tuttle v. Loomis*, 30 O. G., 344.

§ 5629. An inventor, having in his original patent limited his claim of invention to a specified detail of construction, cannot, after a lapse of nine years, procure a valid reissue embodying the enlarged and comprehensive claims that might have been allowed in the original patent. *Sheriff v. Fulton*, 12 Fed. Rep., 136.

§ 5630. When a process claimed in a reissue granted nine years after the original, which was for the apparatus, is merely the employment of the devices described in such original, and is therefore fully disclosed, and other inventors have in the meantime occupied the ground, such process must be held to be abandoned to the public. *Brainard v. Cramme*, 12 Fed. Rep., 621.

§ 5631. The original patent claiming a type-wheel provided with yielding flanges to permit the types to be impressed upon the surface to be marked, a claim in a reissue granted after the manufacture of non-infringing devices, and nine years after the issue of the original, *held* not to be sustainable to cover rigid flanges. If there were any error in restricting the original to elastic flanges it was a plain one, apparent at once to the patentee, and as capable of prompt correction then as after a lapse of more than nine years. *Holt v. Keeler*, 13 Fed. Rep., 464.

§ 5632. Doubtful whether, after a delay of nine years, the claim of a patent can be materially enlarged upon the suggestion that the original claim was defective in form and required amendment. *Sheriff v. Fulton*, 12 Fed. Rep., 136.

§ 5633. Where a mechanical patent was reissued after a lapse of eleven years so as to include the process, *held*, that the process was a different invention, and that the patent was void for delay in reissuing. *Scrivner v. Oakland Gas Co.*, 22 Fed. Rep., 98.

§ 5634. *Semble*, that, when a patentee has slept upon his rights for thirteen years, it is too late to seek redress by way of reissue. No tribunal ought to encourage or countenance such gross negligence. *In re Cushman*, 1 MacA. Pat. Cases, 577.

§ 5635. Where two reissue patents were reissued, one eleven and the other thirteen years subsequent to the grant of the original, the right to reissue was held lost and abandoned by unreasonable delay. *Pope Mfg. Co. v. Marqua*, 15 Fed. Rep., 400.

§ 5636. Where the only mistake suggested is an omission of a claim, and the patentee neglects for thirteen years to file his application for reissue, *held*, that he must be regarded, in view of his conduct, as intending to dedicate such invention to the public, and he is estopped from asserting his claim to such invention in a reissue. *Combined Patents Can Co. v. Lloyd*, 11 Fed. Rep., 149.

§ 5637. It is incumbent upon the owner of a patent, when a reissue is taken thirteen years after the date of the original, to show that there was some mistake or inadvertence in the original which necessitated a reissue. *Newton v. Furst & Bradley Mfg. Co.*, 14 Fed. Rep., 465.

§ 5638. If the specification of the original patent was defective or insufficient in claiming a combination of several devices, instead of making distinct claim for every device which entered into the combination, the fact was instantly discernible, even by an unpracticed eye, as soon as the patent was read. The correction, if any was to be made under such circumstances, should have been applied for immediately. The right to the correction was lost by unreasonable delay of thirteen and a half years. *Bantz v. Frantz*, 105 U. S., 160.

§ 5639. Where matter claimed in the reissue, made fourteen years after the original patent, was not contained in the original, it was held void. *Sickles v. The Falls Co.*, 4 Blatch., 508.

§ 5640. Where the original patent shows upon its face that certain broad claims were not made, the patentees, if they are the inventors of such subject-matter, when apprised that it was not claimed in the patent, should use due diligence in surrendering the patent and having the mistake corrected. Fourteen years is too long a period of delay. *Matthews v. Boston Machine Co.*, 15 Otto, 54.

§ 5641. Where there was a lapse of more than fourteen years between the grant of the original and the date of the reissued patent, *held*, that the patentee had been guilty of such laches as to invalidate the reissue. *Hyatt v. Southworth*, 15 Fed. Rep., 751.

§ 5642. It appearing that the device in question was in general use throughout the entire life of the original patent, *held*, that there was no error in the original patent caused by inadvertence, accident or mistake which could have escaped the notice of the patentee and his associates for fifteen years, and even if the patentee had the right to a reissue, if applied for in seasonable time, he had lost it by his laches and unreasonable delay. *Johnson v. Railroad Co.*, 105 U. S., 539.

Reissues — *Limitation as to time*, §§ 5643, 5644. *Must be made in reasonable time*, §§ 5645, 5646. *Reasonable delay*, §§ 5647-5649; *particular cases*, §§ 5650-5656.

§ 5643. Limitation as to time within which a patent may be reissued considered. *Hussey v. Bradley*, 5 Blatch., 134.

§ 5644. The fact that a reissue application was filed within two years after the grant of an original patent, while it may not be conclusive against the charge of unreasonable delay, is entitled to some consideration in view of that provision of the patent laws by which nothing less than two full years' public use of an invention is a bar to an application for a patent. *Stutz v. Armstrong*, 20 Fed. Rep., 843.

§ 5645. A reissue must be taken within a reasonable time after the error upon which it is based has been discovered. *Knight v. B. & O. R. Co.*, Taney, 106.

§ 5646. The application for a reissue for the purpose of enlarging the claim must be made within a reasonable time, because the rights of the public, conceded by the original patent, are directly affected and violated by an enlargement of the claim; and the patentee's continued acquiescence in the public enjoyment of such right for an unreasonable time justly deprives him of all right to a reissue, and the commissioner of lawful authority to grant it. *Mahn v. Harwood*, 112 U. S., 354.

§ 5647. *Semble*, that a reissue applied for within two years after the issue of the original patent may include a claim rejected in the original application. *Kells v. McKenzie*, 9 Fed. Rep., 284.

§ 5648. A reissue granted within a few months of the date of the original patent, and before others appear to have done anything in that region of invention, is looked upon favorably. *Dryfoos v. Wiese*, 19 Fed. Rep., 315.

§ 5649. A patent reissue with claims more specifically and clearly describing the invention is valid, although applied for more than two years after the date of the original patent, and although the original claims in connection with the specification were capable of the same construction as the claims of the reissued patent. *Hicks v. Otto*, 19 Fed. Rep., 749.

§ 5650. There is no rule fixing the precise time within which application for a reissue must be made. What is a reasonable time is a question, when a reissue is attacked, to be decided by the court upon the case presented. The rule is equitable, and therefore flexible, and to be applied according to equity. *Odell v. Stout*, 22 Fed. Rep., 159.

§ 5651. Upon the authority of *James v. Campbell* and other decisions of the supreme court, it is clear that the claim of a patent may be enlarged by a reissue if the patentee move promptly and no rights of others have intervened, and the delay in this case of six months is not unreasonable. *Ibid.*

§ 5652. In a suit for infringement of a reissued patent for an improvement in preserving meats, etc., involving two claims which were not in the original patent, it is held as follows: There is not unreasonable delay in applying, between two and three months after date of the original patent, for a reissue enlarging the claims to cover parts of an invention already described, especially where it appears that the application is not made for the purpose of covering the improvements of other inventors. *Hammond v. Franklin*, 22 Fed. Rep., 833.

§ 5653. No invariable rule can be laid down as to what is a reasonable time within which the patentee must seek for the correction of a claim which he considers too narrow. It is for the court to judge in each case, and it will exercise proper liberality toward the patentee; but as the law charges him with notice of what his patent contains, he will be held to reasonable diligence. By analogy to the rule as to the effect of public use before an application for a patent, a delay of more than two years would, in general, require special circumstances for its excuse. *Mahn v. Harwood*, 112 U. S., 354.

§ 5654. Where the original patent was reissued with broader claims within four months from its date of grant, *held*, there was no laches in reissuing and that the reissue was valid. *Worswick Mfg. Co. v. Steiger*, 17 Fed. Rep., 250.

§ 5655. Where the delay in reissuing of nearly eight years resulted from an actual mistake discovered by testimony given in court seven years after the grant of the original patent, and such as could not be accounted as laches on the part of patentee, and was one from which no innocent person could have suffered, the reissue was sustained. *Hartshorn v. Eagle Shade Roller Co.*, 18 Fed. Rep., 90.

§ 5656. Delay of ten years in reissuing a patent is not such laches as will avoid it. *Hussey v. Bradley*, 5 Blatch., 132.

Reissues — Divisional — Are valid, §§ 5657, 5658. When authorized, §§ 5659-5669.

§ 5657. Act 1837, section 5, authorizes the divisional reissue of the thing patented. *Good-year v. Providence Rubber Co.*, 2 Cliff., 351.

§ 5658. A patent may be reissued in divisions, but the patent cannot be broadened in that way any more than if reissued together. *New v. Warren*, 22 O. G., 587.

§ 5659. The patentee cannot reissue a patent which includes several distinct improvements in several reissues, unless there be some error in the specification arising from inadvertency, accident or mistake. *Butler's Opinion*, 3 Op., 165.

§ 5660. By the terms of the statute, a reissue must be for the same invention which is embraced by the original patent, or if the reissue be in divisional parts, each division must be for some distinct and separate part of that invention. *Atlantic Giant Powder Co. v. Cal. Powder Works*, 3 Saw., 448.

§ 5661. Where a patent is reissued in divisions, they are to be treated as but one patent, and the division in no wise impairs the validity of the reissues. *Penna. Salt Co. v. Thomas*, 5 Fish., 148.

§ 5662. It would seem to be a sound principle, that on a divisional reissue under act 1837, section 5, at patentee's desire, for distinct and separate parts of the thing patented, each part covered by the patent should stand by itself as an invention. *Brown v. Selby*, 2 Biss., 457.

§ 5663. When a patent is reissued in several divisions, no one of them is void on the ground that it describes all the mechanism shown in the original, provided the claim in each is for a different device, which is clearly described, and there is no conflict between them. *Wheeler v. McCormick*, 11 Blatch., 334.

§ 5664. On application for a divisional reissue, the commissioner has power to issue one or more divisions, and subsequently others; and until such application is ended in all its divisions, the vitality of the original continues so far as to support that part which remains undecided. *Phillips' Opinion*, 16 Op., 560.

§ 5665. Modified forms of an invention clearly shown in the original patent form "distinct

and separate parts of the thing patented," and may constitute subject-matter of separate patents upon reissue. *Selden v. Stockwell Self-Lighting Gas-Burner Co.*, 19 Blatch., 544.

§ 5666. A divisional reissue of an original patent into two patents, one for the process, and one for the product, is valid. *Tucker v. Burditt*, 4 B. & A., 569.

§ 5667. A new process or method of producing a new article, and the new product or manufacture, are proper subjects of separate and distinct claims in an original patent, and proper subjects for a reissue in divisions. *Goodyear v. Providence Rubber Co.*, 2 Cliff., 351.

§ 5668. The right to reissue a patent in two divisions, one for a new product, and the other for a new process of making it, even though the original patent related to the process alone, is fully sustained. (*Goodyear v. Providence Rubber Co.*, 2 Fish.) *Badische & Anilin Soda Fabrik v. Hamilton Manufacturing Co.*, 13 O. G., 273.

§ 5669. Where the original patent was reissued in two divisions, the divisional reissue was held within the discretion of the patent office and proper. *Bennet v. Fowler*, 8 Wall., 445.

See *Reissues*, §§ 5445, 5455.

Reissues — A reissue of a reissue is valid, §§ 5670-5676.

§ 5670. A reissue of a reissue is not valid unless the improvement described therein is, in its principle and mode of operation, the same with that intended to be described in the first reissue. *Knight v. B. & O. R. Co.*, Taney, 106.

§ 5671. Under act 1836, a reissue of a reissue is valid. *French v. Rogers*, 1 Fish., 133; *Morse v. Bain*, 9 West. L. J., 106.

§ 5672. Notwithstanding the fact that the patent has been reissued seven times, the law presumes that the last patent was granted to correct accidental or inadvertent mistakes in the original. The only test of the validity of the commissioner's action is whether he has allowed a reissue for a different invention from that covered by the original patent, or for what was not therein described, claimed or indicated. *Union Paper Collar Co. v. White*, 7 O. G., 698.

§ 5673. A claim valid in a first reissue is valid in a second reissue, notwithstanding the latter contains an invalid claim. *Dryfoos v. Wiese*, 19 Fed. Rep., 315.

§ 5674. Where an original patent is valid, but the reissue based thereon is invalid, there is no good reason why a second reissue embracing the valid claim alone of the original patent would not be valid. *Giant Powder Co. v. Safety Nitro Powder Co.*, 19 Fed. Rep., 509.

§ 5675. There may be a reissue of a reissue. Section 4916, Revised Statutes, authorizes the reissue of "any patent." A reissue patent is none the less a patent, within this section, because it is a reissued patent. *Selden v. Stockwell Self-Lighting Gas-Burner Co.*, 19 Blatch., 544.

§ 5676. Where a claim of a second reissue is no broader than the claim of the first reissue, it is valid, provided the first reissue was lawful. *Western Union Telegraph Co. v. Baltimore & Ohio Telegraph Co.*, 25 Fed. Rep., 30.

Reissues — Oath, §§ 5677-5683.

§ 5677. The oath of the inventor to the reissue application is necessary under act 1793. Taney's Opinion, 2 Op., 572.

§ 5678. Under the act of March 3, 1871, the oath of the assignees is sufficient upon an application for the reissue of a patent originally issued before July 8, 1870; the oath of the inventor is required only when the original patent issued after that date. *The National Car-spring Co. v. Union Car-spring Manufacturing Co.*, 12 Blatch., 80.

§ 5679. Where, in his application for reissue, applicant made oath that his patent was *not fully valid and available* to him, *held*, that it was not the oath required by the statute; and there being no evidence that the patent was "inoperative or invalid" before the commissioner, the reissue granted thereon was held invalid. *Whitely v. Swayne*, 4 Fish., 117.

§ 5680. Where the affidavit to a petition for reissue averred that the original or prior reissue was not "fully valid and available," *held*, that it was not an equivalent to the affidavit prescribed by the statute, and that the reissue granted thereon was invalid. *Poage v. McGowan*, 15 Fed. Rep., 398.

§ 5681. Where on reissue the petition and oath set out that the patent was "not fully" operative and valid, *held*, that it was not indispensable that the petitioner should use the exact phraseology of the statute, if he employs language which actually conveys its legal meaning. *Gold & Stock Telegraph Co. v. Wiley*, 17 Fed. Rep., 234.

§ 5682. The words "inoperative or invalid," in the statute authorizing reissues (4916, R. S.), mean inoperative or invalid in whole or in part, and consequently the words in an oath, "not fully inoperative," conform to the true intent of the law, if the law required an oath, which it does not. *Hartshorn v. Eagle Shade Roller Co.*, 18 Fed. Rep., 90.

§ 5683. In the matter of reissues there is no law requiring the applicant to take any oath on the subject of the invalidity of the original patent. *Ibid.*

See *Assignee*, § 558.

Reissues — Commissioner's decision — Conclusive, §§ 5684-5698. See *Identity*, §§ 5686, 5695.

§ 5684. The grant of a reissue by the commissioner of patents is conclusive as to the existence of all the facts which were by law necessary to entitle him to issue it; unless it was apparent on the face of the patent itself that he was guilty of a clear excess of authority, or that the patent was procured by fraud between him and the patentee. *Allen v. Blunt*, 3 Story, 742.

§ 5685. The commissioner's decision on reissue is final in all collateral proceedings. *Good-year v. Providence Rubber Co.*, 2 Cliff., 351.

§ 5686. The decision of the commissioner on reissuing a patent is conclusive to the effect that the reissue is for the same invention as the original; and is not re-examinable, unless it is apparent on the face of the patent that he has exceeded his authority, or unless there is a clear repugnancy between the old and new patents, or unless the reissue was obtained by collusion between him and patentee. *Potter v. Hollender*, 4 Blatch., 238.

§§ 5687-8. The decision of the commissioner as to reissues is final and conclusive, unless impeached for fraud in his or the patentee's acts, or for some irregularity arising on the face of the papers, or for a clear repugnance between the original and reissued patents. *Blake v. Stafford*, 6 Blatch., 195.

§ 5689. The grant of a reissued patent is conclusive as to all the facts which by law are necessary to entitle the commissioner to issue it, unless it is apparent on the face of the instrument itself that he was guilty of excess of authority. *French v. Rogers*, 1 Fish., 133.

§ 5690. Proof that the samples deposited in the patent office with the original application do not correspond with the ingredients specified in the reissue will not impair its validity; whether an applicant has complied with the requisites for obtaining a patent is for the commissioner to determine, and the court will not revise his action. *Tarr v. Folsom*, 1 Holmes, 312.

§ 5691. The decision of the commissioner in reissuing a patent is final, and forecloses all inquiry into the existence or sufficiency of the facts, which are prescribed as necessary to authorize him to grant a reissue; fraud even will not warrant a re-examination of his decision at the instance of an infringer. *Parham v. American Button-hole, etc., Machine Co.*, 4 Fish., 468.

§ 5692. All matters of fact involved in the hearing of an application for the reissue of a patent are conclusively settled by the decision of the commissioner in granting the application. Power to grant reissued as well as original patents is vested in the commissioner. When that power has been lawfully exercised and a patent has been duly granted, whether reissued or original, it is of itself, if introduced in evidence, where a party claims redress for alleged infringement, *prima facie* evidence that the patentee is the original and first inventor of that which is therein described and secured to him as his invention. *Judson v. Bradford*, 16 O. G., 171.

§ 5693. The question whether a patent is "inoperative or invalid by reason of defective or insufficient description or specification," and whether such defect has arisen by "inadvertence, accident or mistake, and without any fraudulent or deceptive intention," appears from the decisions of the court to be submitted finally to the judgment of the commissioner wherever the circumstances bring it within the jurisdiction conferred upon him by the statute. *Combined Patents Can Co. v. Lloyd*, 11 Fed. Rep., 149.

§ 5694. The decision of the commissioner of patents in granting a reissue, that, by reason of an insufficient or defective specification, the original patent is inoperative or invalid, and that such error arose from inadvertence, accident or mistake, and without any fraudulent or deceptive intention, conclusively establishes the fact. *Christman v. Rumsey*, 17 Blatch., 148.

§ 5695. The action of the commissioner of patents in granting a reissue within the limits of his authority is not open to collateral impeachment, but his authority being limited to a reissue for the same invention, the two patents may be compared to determine the identity of the invention. If the reissued patent, when thus compared, appears on its face to be for a different invention, it is void, the commissioner having exceeded his authority in issuing it. *Russell v. Dodge*, 3 Otto, 460.

§ 5696. The question as to whether the original patent was inoperative or invalid by reason of the defective or insufficient specification is conclusively decided by the commissioner by the fact of his granting the reissue. *Selden v. Stockwell Self-Lighting Gas-Burner Co.*, 19 Blatch., 544.

§ 5697. The commissioner of patents is invested by law with authority to determine whether surrendered patents are invalid by reason of defective or insufficient specifications, or by reason of the patentee's claiming as his own invention or discovery more than he had a right to claim as new, and whether these errors have arisen by inadvertence, accident or mistake, and without fraudulent intention. His decision as to the existence of these prerequisites is conclusive, and not subject to review by the courts. *Ball v. Langles*, 12 Otto, 128.

§ 5698. The action of the commissioner in accepting the surrender and granting the reissue is final and conclusive, unless it is apparent on the face of the patent that he has exceeded his authority; that it must be held, as a matter of legal conclusion from the repugnancy between them, that the reissued patent is not for the same invention as that embraced in the original patent. *Spaeth v. Barney*, 22 Fed. Rep., 828.

Reissues — Commissioner's decision — *Conclusive on the question of fraud*, § 5699; *not conclusive*, §§ 5700-5703.

§ 5699. The question of fraud in obtaining a reissue must be regarded as settled by the commissioner of patents in granting it. *Corn-Planter Patent*, 23 Wall., 181.

§ 5700. On the grant of a reissue by the commissioner of patents, the only question left open for inquiry is that of fraud. *Stimpson v. Railroad Co.*, 4 How., 380.

§ 5701. The action of the commissioner in granting a reissue cannot be questioned or impeached, unless on the ground of actual fraud in obtaining it, a palpable incongruity between the reissued and original patent, or an excess of authority on the part of the commissioner. *Morris v. Royer*, 2 Bond, 66.

§ 5702. The action of the commissioner in granting a reissue is not open for re-examination by the courts, except on the ground of fraud in its procurement. *Miller & Peters Mfg. Co. v. Du Brul*, 12 O. G., 351.

§ 5703. The question whether there is a fraud in the surrender and application for a reissue is for the officers of the patent office alone to decide, and their determination is conclusive in a collateral proceeding. The court can only examine and pass upon what appears upon the face of the patent, and see whether there is anything to indicate its invalidity or render it void upon its face. All questions of fact behind the patent are to be examined, heard, and conclusively determined by the commissioner of patents. *Giant Powder Co. v. Safety Nitro Powder Co.*, 19 Fed. Rep., 509.

Reissues — Commissioner's decision — *Excess of authority*, §§ 5704-5708. *Not conclusive as to identity*, §§ 5709-5715; *nor as to his jurisdiction*, § 5716. See *Estoppel*, §§ 2257-2259. *Patents*, § 4740.

§ 5704. The power to accept a surrender and issue new letters patent is vested exclusively in the commissioner of patents. He must judge of the sufficiency of the original specification, whether the same is defective in any particular, whether such defect was the result of an unintentional error, and if so to what extent a new or additional specification should be allowed to describe correctly the invention claimed. *Atlantic Giant Powder Co. v. Cal. Vigorit Powder Co.*, 6 Saw., 508.

§ 5705. But this does not preclude the examination by the court of the original and reissued patents to see whether or not they disclose on their face a case in which the commissioner has no jurisdiction to act, or a case in which, by his determination, he has exceeded his jurisdiction. If so, the reissued letters patent must fall. *Ibid.*

§ 5706. The only ground on which the allowance of a reissue is open to objection is, that the commissioner has exceeded his authority in granting it for an invention different from that embraced in the original patent. *Parham v. American Button-hole and Sewing Machine Co.*, 4 Fish., 468.

§ 5707. After reissue the commissioner's decision in the premises *in a suit for infringement* is final and decisive, and is not re-examinable in such a suit in the circuit court, unless it is apparent on the face of the patent that he has exceeded his authority, and that there is such a repugnancy between the old and the new patent that it must be held, as matter of legal construction, that the new patent is not for the same invention as that embraced and secured in the original. *Thomas v. Shoe Machinery Mfg. Co.*, 16 O. G., 541.

§ 5708. The granting of a reissue is *prima facie* evidence of inadvertence, accident or mistake, as the granting of original letters is *prima facie* evidence of invention. This evidence is not conclusive, nor is the action of the commissioner of patents *res adjudicata*. *Odell v. Stout*, 22 Fed. Rep., 159.

§ 5709. On the question of identity of invention in the reissue and original patent, the commissioner's action is not conclusive, and is a question of fact for the jury. *Allen v. Blunt*, 2 W. & M., 121.

§ 5710. The decision of the commissioner is not conclusive upon the substantial identity of the invention claimed in the original and in the reissued patent. *Goodyear v. Berry*, 2 Bond, 189.

§ 5711. The action of the commissioner is presumed to a certain extent to be conclusive upon the question of identity of the inventions embraced in the original and reissued patent, except in cases of fraud. *Swift v. Whisen*, 2 Bond, 115.

§ 5712. The grant of a reissue by the commissioner is not conclusive upon the identity of the invention with that in the original. *Bridge v. Brown*, 1 Holmes, 53.

§ 5713. The decision of the commissioner on reissue is *prima facie* evidence of the identity of the invention with that in the original patent. The fairness of the transaction and the question of fraud in the surrender are alone open to court and jury. *Hussey v. Bradley*, 5 Blatch., 132.

§ 5714. The decision of the commissioner of patents in granting a reissue is re-examinable only when it appears upon the face of the reissued patent that it is for a different invention from that embraced in the original grant. *Wells v. Gill*, 2 O. G., 590.

§ 5715. Under act 1870, section 53, it is now well settled that the decision of the commissioner reissuing the patent is final and conclusive, and is not subject to review in any court, except as to the identity of the invention. *Kells v. McKenzie*, 9 Fed. Rep., 284.

See *Reissues*, §§ 5686, 5695.

§ 5716. Unless the reissue is for the same invention, the commissioner has no power to grant it; and the commissioner's decision is not conclusive as to his own jurisdiction. *Cahart v. Austin*, 2 Cliff., 528.

Reissues — Presumption as to acts of commissioner — Presumed to have been made legally, §§ 5717-5726. See *Process and Product*, § 5109.

§ 5717. A reissue by the commissioner is presumed to have been made legally. *Allen v. Blunt*, 2 W. & M., 121.

§ 5718. The action of the commissioner upon the right of parties to a reissue is, to a certain extent, presumed to be conclusive. *Swift v. Whisen*, 2 Bond, 115.

§ 5719. The commissioner, in reissuing a patent, is presumed to have performed his duty pursuant to law, and his decision is conclusive, except on the question of fraud. *Jordan v. Dobson*, 2 Abb., 398.

§ 5720. It is to be presumed, until the contrary appear, that the commissioner did his duty correctly in granting the reissued patent. *Klein v. Russell*, 19 Wall., 433.

§ 5721. When a reissue has been granted it is to be presumed that the commissioner has found all the conditions fulfilled on which he is authorized to issue it, and that it is for the same invention that is described in the original patent. *American Nicholson Pavement Co. v. City of Elizabeth*, 3 O. G., 522.

§ 5722. No such presumption can prevail if it appears on the face of the patent that the commissioner has exceeded his authority, or if there has been fraud or collusion between him and the parties. *Ibid.*

§ 5723. The action of the officers in the patent office in granting reissues must be presumed to be right, and the burden of proving the reverse is on the defendants. *American Middlings Purifier Co. v. Atlantic Milling Co.*, 4 Dill., 100.

§ 5724. It is to be presumed, from the decision of the commissioner of patents in granting a reissue, that it embraces the same invention as the original patent; and the contrary can be shown only by a comparison of the papers in the two cases. *Birdsell v. McDonald*, 6 O. G., 682.

§ 5725. The commissioner of patents alone is invested with authority to decide whether a patentee is entitled to a reissue, and after he has exercised this power and granted the reissue it becomes a presumption of law that he has done his duty thoroughly, faithfully and properly. *Miller & Peters Manufacturing Co. v. Du Brul*, 12 O. G., 351.

§ 5726. The action of the commissioner of patents in reissuing letters patent is doubtless of a judicial character, and is presumed to be correct until impeached in a regular way; and yet the court is not obliged to accept his decision as final. *Flower v. Rayner*, 19 O. G., 425.

See *Reissues*, §§ 5769-5776. *Patents*, § 4628.

Reissues — Commissioner's powers in granting, §§ 5727-5738.

§ 5727. If the commissioner grants a reissue for a different invention from that described in the original patent, it is invalid. *Tucker v. Tucker Mfg. Co.*, 4 Cliff., 397.

§ 5728. The commissioner of patents is not authorized to grant a reissue of a patent for an invention in addition to that shown in the original, in cases where there are no drawings nor models, upon proof that the addition was really a part of the same invention sought to be patented in the original. *Averill Paint Co. v. National Paint Co.*, 9 Fed. Rep., 462.

§ 5729. A reissue patent must in all cases be for the same invention as that contained in the original patent, and the last clause of section 4916, Revised Statutes, merely governs the manner of proof, but does not authorize the commissioner to grant a reissue for a different invention, or to determine that one invention is the same as another or different one, or that two inventions essentially distinct constitute but one. *Ibid.*

§ 5730. Whenever it appears, on a comparison of the two instruments, that the original patent is valid, it is clear that the commissioner has exceeded his jurisdiction, and the reissue is without authority of law. *Atlantic Giant Powder Co. v. Cal. Vigorit Powder Co.*, 6 Saw., 508.

§ 5731. The commissioner has no authority to grant a reissue embracing new matter or a broader invention than what was revealed in the original specifications, drawings or models. *Ball v. Langles*, 102 U. S., 128.

§ 5732. In deciding upon a reissue, whether it is for the same invention as the original, the commissioner is not limited to the claims, nor the specification, model or drawing of the original. Any legal proof to show it to be the same invention should be received. *Hussey v. Bradley*, 5 Blatch., 132.

§ 5733. The commissioner may allow a patentee to redescribe his invention in a reissue and to include in the description and claims of the patent not only what was well described before, but whatever else was suggested or substantially indicated in the specification, model or drawings which properly belonged to the invention as actually made and perfected. *Tucker v. Tucker Manufacturing Co.*, 4 Cliff., 397.

§ 5734. Act 1837, section 8, confers on the commissioner of patents the same power respecting the granting of a reissue as that which he possesses in case of an original application. *Potter v. Dixon*, 5 Blatch., 160.

§ 5735. A reissue signed by the acting commissioner held valid on the ground that it should be considered under the circumstances as the "lawful exercise of the officer's authority, unless it is apparent on the very face of the patent that he has exceeded his authority." *Smith v. Mercer*, 4 West. L. J., 49.

§ 5736. A mistake by the commissioner as to the necessity of issuing a new patent is not an excess of jurisdiction, but a mistake in a matter clearly within his jurisdiction, and the real question is whether it is one which the courts will correct by destroying a new patent after the old one has been surrendered. *Smith v. Merriam*, 6 Fed. Rep., 713.

§ 5737. A reissue cannot be affected by subsequent void acts of the commissioner, but must stand or fall upon its own merits. *Atwood v. Portland Co.*, 10 Fed. Rep., 283.

§ 5738. Where there is a doubt as to whether the description in a patent will be misunderstood, the judgment of the patent office as to the necessity for a reissue is entitled to great weight. *Sewing Machine Co. v. Frame*, 24 Fed. Rep., 596.

See *Patents*, § 4740.

Reissue — Term — Relates back to original, §§ 5739-5746.

§ 5739. The term of the reissued patent runs from the date of the original patent. *Grant v. Raymond*, 6 Pet., 218.

§ 5740. The reissued patent (act 1793) and the proceedings on which it issues have relation to the original transaction. *Ibid.*

§ 5741. Under section 13, act 1836, the reissued patent has relation back to the emanation of the first patent, as if it had been issued at the date of the first. *Stanley v. Whipple*, 2 McL., 35.

§ 5742. A reissue patent is a continuation of and relates back to the original patent. *Shaw v. Cooper*, 7 Pet., 292.

§ 5743. A reissued patent relates back to the date of the original patent. *House v. Young*, 3 Fish., 335.

§ 5744. In judgment of law the reissue is only a continuation of the original patent. *Crompton v. Belknap Mills*, 3 Fish., 536.

§ 5745. A reissued patent is generally considered, except in respect to infringement prior to its issue, as if granted at the date of the original patent; and the reissue in respect to subsequent infringements is to take effect as though issued originally, even though the original patent was invalid. *Hussey v. Bradley*, 5 Blatch., 132.

§ 5746. The legal presumption, in the absence of the original patent produced in evidence by defendant, is that complainant is entitled to hold, and to carry back to the date of the original patent all that the reissue claims. *Bickford v. Laporte*, 2 Fed. Rep., 214.

Reissue — Effect in law as to prior infringement, §§ 5747-5759. Infringement of, §§ 5760, 5761.

• § 5747. A suit begun upon one patent cannot be sustained upon a reissue of that patent. *Jones v. Barker*, 11 Fed. Rep., 597.

§ 5748. A suit begun upon one patent cannot be sustained upon a reissue of that patent; hence a suspension of proceedings cannot be had for the purpose of obtaining such reissue. *Brainard v. Cramme*, 12 Fed. Rep., 621.

§ 5749. A reissue, except as to infringements prior to reissue, takes effect as if granted at the date of the original patent with respect to subsequent infringements. *Bloomer v. Stolley*, 5 McL., 158; *Shaw v. Cooper*, 7 Pet., 292; *Stanley v. Whipple*, 2 McL., 35; *Smith v. Pearce*, 2 McL., 176; *Hussey v. Bradley*, 5 Blatch., 134.

§ 5750. On surrender and reissue the patent has always been considered to operate, except as to suits for infringement committed before the reissue, from the commencement of the original term. *Woodworth v. Hall*, 1 W. & M., 248.

§ 5751. A reissued patent has the same effect and operation in law as though it had been originally filed in the corrected form only on the trial of actions brought on it for causes thereafter arising, and has no such effect in any other cause or for any other purpose. *United States Stamping Co. v. King*, 17 Blatch., 55.

§ 5752. A correction amended in a patent could not operate as to third persons against whom prosecutions were pending prior thereto, but only for cases accruing after. *Woodworth v. Hall*, 1 W. & M., 248.

§ 5753. A surrender of a patent for reissue under act 1836, section 13, extinguishes it, and suits for infringement previously brought fall with it. *Moffitt v. Garr*, 1 Black, 273.

§ 5754. Where, after the cause of action had accrued and action commenced, plaintiff reissued his patent, *held*, that the reissue was a solemn admission of the invalidity of the original under which suit was brought, and that plaintiff was not entitled to recover. *Moffitt v. Garr*, 1 Bond, 315.

§ 5755. There can be no recovery of damages on a reissue for infringement prior thereto. *Agawam Co. v. Jordan*, 7 Wall., 583.

§ 5756. Where a reissue is made by mistake, the reissue not being valid, neither is the surrender, and all infringers could be prosecuted under the old and valid patent. *Woodworth v. Edwards*, 3 W. & M., 120.

§ 5757. A reissued patent cannot be availed of to sustain and render effectual a suit, the basis of which is taken away by the act of the party in surrendering his patent; and where, on surrender and reissue during pendency of suit, leave was asked to file a supplemental bill founded on the reissue, the right was denied and motion for injunction refused. *Fry v. Quinlan*, 13 Blatch., 205.

§ 5758. Moneys paid voluntarily or upon judgment upon a patent subsequently surrendered and reissued cannot be recovered back. The title thereto rests on the voluntary payment or the judgment. *Moffitt v. Garr*, 1 Black, 273.

§ 5759. Act of 1836 provides that as to third parties the amended specification shall have the same effect and operation in law on the trial of actions as if it had been originally filed in its corrected form. *Smith v. Mercer*, 4 West. L. J., 49.

See *Damages and Profits*, § 1530.

§ 5760. Whoever erects or uses a patented machine does so at his peril. And where infringer has knowledge of the prior patent, suit can be brought for infringement of the reissue without notice. *Ames v. Howard*, 1 Sumn., 482.

§ 5761. Prior use of an invention under a defective patent cannot take away the right to reissue such patent, or authorize a use under the reissue. *Stimpson v. Westchester R. Co.*, 4 How., 380; *Battin v. Taggart*, 17 How., 74; *Hussey v. Bradley*, 5 Blatch., 134.

See *Infringement*, § 2976.

Reissue — One invalid claim does not invalidate entire reissue, §§ 5762-5768.

§ 5762. The invalidity of a claim in a reissue does not impair the validity of a claim in the original patent which is separately reproduced in the reissued patent. *National Pump Cylinder Co. v. Gunnison*, 17 Fed. Rep., 817; *Gould v. Spicer*, 15 Fed. Rep., 344; *Cote v. Moffitt*, 15 Fed. Rep., 345; *Fetter v. Newhall*, 17 Fed. Rep., 841; *Gage v. Herring*, 107 U. S., 640; *Schillinger v. Greenway Brewing Co.*, 17 Fed. Rep., 244; *Odell v. Stout*, 22 Fed. Rep., 159.

§ 5763. One claim in a reissue may be void without necessarily invalidating the other claims, and may be disclaimed *pendente lite* when there has been no unreasonable neglect or delay. *Tyler v. Galloway*, 12 Fed. Rep., 567.

§ 5764. Whether a reissue is wholly valid or not it may be valid to the extent that claims in the original and in the reissue are alike; and if those claims are infringed an injunction may be granted. *Starrett v. Athol Machine Co.*, 14 Fed. Rep., 910.

§ 5765. The entire reissue will not be void on account of one void claim. *Wood v. Packer*, 17 Fed. Rep., 650.

§ 5766. Invalidity of one claim does not necessarily render the other claims of the reissue invalid. *Reay v. Raynor*, 19 Fed. Rep., 308.

§ 5767. The invalidity of one of the claims of a reissued patent does not invalidate the entire reissue, provided the invalid claim was made in good faith. Where it appears that claims in

a reissued patent were made to broaden the invention and thereby to cover intermediate inventions or improvements, the fraud may so vitiate all the claims in the reissued patent that all will be held to be void; but one claim in a reissue may be void without necessarily invalidating the other claims. *Odell v. Stout*, 22 Fed. Rep., 159.

§ 5768. A reissue claim which conforms with the original is good, notwithstanding that other reissue claims expand the claim of the original patent, or any claims that the patentee might have lawfully made. *Western Union Telegraph Co. v. Baltimore & O. Telegraph Co.*, 25 Fed. Rep., 30.

Reissue — Evidence — *Of what a reissue is*, §§ 5769-5776.

§ 5769. A reissue is *prima facie* evidence of the lawful surrender of the original patent and of its own lawful grant. *Knight v. B. & O. R. Co.*, Taney, 106.

§ 5770. A reissue is *prima facie* evidence that it has been rightfully granted by the commissioner. *Allen v. Blunt*, 3 Story, 742; *Woodworth v. Stone*, 3 Story, 749.

§ 5771. A reissue is *prima facie* evidence, in the absence of fraud on the patent office, that the original patent was not abandoned. *Hoffheims v. Brandt*, 3 Fish., 218.

§ 5772. Although the decision of the patent office is entitled to great weight, the reissue is but *prima facie* evidence of its validity, and the duty devolves on the court to determine whether it claims more than the original specification shows patentee to have invented. *Woodward v. Dinsmore*, 4 Fish., 163.

§ 5773. The decision of the commissioner in reissuing a patent is very strong *prima facie* evidence that it was a proper and lawful case for a reissue; but it is not conclusive on that point. *Seymour v. Osborn*, 3 Fish., 555.

§ 5774. The fact that a reissue patent has been granted is *prima facie* evidence that satisfactory proofs have been given to the commissioner of such a state of facts as warrant the reissue, even though the patent may contain no recitals that the prerequisites to the grant have been fulfilled. *Thomas v. Shoe Machinery Mfg. Co.*, 16 O. G., 541.

§ 5775. The commissioner's decision upon the question of reissue is *prima facie* evidence that it is for the same invention as that in the original patent, and subsequent inquiry before a court and a jury is limited to the question of fraud. *Hussey v. Bradley*, 5 Blatch., 134; *Philadelphia & Trenton R. Co. v. Stimpson*, 14 Pet., 448; *Stimpson v. Westchester R. Co.*, 4 How., 380; *O'Reilly v. Morse*, 15 How., 62; *Battin v. Taggart*, 17 How., 74; *Woodworth v. Stone*, 3 Story, 749.

§ 5776. In a suit for infringement of a reissued patent, on demurrer to the bill for failure to specify the ground of surrendering the original patent, it is held that the reissued patent is *prima facie* evidence that it is founded on sufficient cause and is in accordance with law. *Spaeth v. Barney*, 22 Fed. Rep., 828.

See *Inventor*, § 3812. *Novelty*, §§ 4325, 4384. *Patents*, § 4703. *Process and Product*, § 5109.

Reissue — Defense to — *Want of identity*, § 5777. *Purchase prior to reissue*, § 5778. *Not included in original*, § 5779.

§ 5777. Where the defense against a reissued patent is that it is for a different invention from the original, it cannot be doubted that the latter may be the subject of reference, as to a repealed statute, to aid in the construction of the new patent issued upon the corrected specification. *Reedy v. Scott*, 23 Wall., 352.

§ 5778. Purchase of the patented device prior to reissue, and under the original invalid patent, held no defense to a suit for infringement brought on the reissue. *Bliss v. City of Brooklyn*, 8 Blatch., 533.

§ 5779. Defendant cannot avoid liability by the defense that, when his invention was set up, prior to plaintiff's reissue, it was not covered by the patent. *Carr v. Rice*, 1 Fish., 198.

Reissue — *Fraud in securing*, §§ 5780-5785. *Validity*, §§ 5786-5788.

§ 5780. Actual and constructive fraud in reissues considered. *Swift v. Whisen*, 2 Bond, 115.

§ 5781. A reissue which covers improvements not described or used in the machine under the original patent is a fraud. *Brooks v. Fiske*, 15 How., 212.

§ 5782. A reissued patent can only be impeached for fraud by a bill in equity brought for the purpose by the government. *Birdsell v. McDonald*, 6 O. G., 682.

§ 5783. The validity of a reissue can only be inquired into, 1st, in case of fraud in obtaining it; 2d, where, on its face, the commissioner has exceeded his jurisdiction; where there is a clear repugnance between the original and reissue. *House v. Young*, 3 Fish., 335.

§ 5784. Allegations as to false representations in securing reissue should be made in distinct language, without equivocation, and be the subject of very distinct proof. *Doughty v. West*, 2 Fish., 553.

§ 5785. It is no defense to infringement for the wrong-doer to prove irregularities in the reissue of the patent. *Goodyear Dental Vulcanite Co. v. Wetherbee*, 3 Cliff., 555.

See *Fraud*, §§ 2606-2608.

§ 5786. The validity of a reissue sustained, the object of which was to extend the monopoly beyond the limits assigned to the original by a judicial decision. *Poppenhusen v. Falke*, 5 Blatch., 47.

See *Infringer*, §§ 2995, 2996.

§ 5787. The presumption of law is always in favor of the validity of a reissue patent. *Reissner v. Anness*, 13 O. G., 870.

§ 5788. A reissued patent is not rendered invalid simply because a suit could be sustained on the specification and claim as originally granted. *Wilson v. Coon*, 18 Blatch., 532.

See *Patents*, § 4628.

Reissue — Patentee's right to, §§ 5789-5791. After extension, §§ 5792-5794.

§ 5789. To entitle a patentee to reissue he must have been the first to disclose the invention in the record existing in the patent office. *Ex parte Platt & Walden*, 15 O. G., 827.

§ 5790. Rights of a patentee of a reissue are determined by the law under which the original application was made. *Shaw v. Cooper*, 7 Pet., 292.

§ 5791. On a reissue, the rights of the patentee, except as to prior infringement, are to be ascertained by the law under which the original application was made. *Read v. Bowman*, 2 Wall., 591.

§ 5792. A reissue may be granted after an extension. *Wilson v. Rousseau*, 4 How., 646.

§ 5793. A patent extended by two extensions to fourteen additional years, and reissued on the last extension in the form of a whole term of twenty-eight years, is, in legal effect, a patent for the residue only of the period unexpired at the time it was issued. *Gibson v. Harris*, 1 Blatch., 167.

§ 5794. Where, under act 1833, section 18, a patent was twice extended, and reissued during the last extension as a patent for twenty-eight years, it was held a valid patent for that term. *Woodworth v. Edwards*, 3 W. & M., 120.

Reissues — Generally, §§ 5795-5814.

§ 5795. *Semble*, that a new patent may be granted on the surrender of the prior patent, which was broader than the invention (act 1793). *Morris v. Huntington*, 1 Paine, 348.

§ 5796. Doubted whether it would not be a valid objection to a reissued patent (act 1793) that third parties had acquired rights during the existence of the original invalid patent. *Grant v. Raymond*, 6 Pet., 218.

§ 5797. Reissue granted executor of patentee is a new contract between the government and executor since the decease of the original patentee. *Goodyear v. Providence Rubber Co.*, 2 Cliff., 351.

§ 5798. A reissue applicant cannot be placed in interference with an unexpired patent in which the record date of original application filed is subsequent to that of the reissue patentee, and which does not claim the subject-matter in conflict. *Ex Parte Platt & Walden*, 15 O. G., 827.

§ 5799. But it is not clear that an interference can never be declared in any case of application for reissue. *Ibid.*

§ 5800. The presumption of right arising from public acquiescence in the enjoyment of a patent is not removed by its reissue. *Orr v. Badger*, 7 Law Rep., 465.

§ 5801. Where a patent that has been assigned is reissued to the patentee, it cannot be admitted that the reissue is void, if the assignment was duly recorded in the patent office, and the application for surrender and reissue was made with the knowledge and consent of the assignee. *Goodyear Dental Vulcanite Co. v. Wetherbee*, 3 Cliff., 555.

§ 5802. To surrender the original and obtain reissue letters patent does not impair the judgment of lack of novelty, it appearing that the inventions set forth are the same as those contained in the original patents. *Jones v. McMurry*, 2 Hughes, 527.

§ 5803. A pending reissue application cannot receive such a construction as to supersede the original patent, no matter how nearly the proceedings may have approached consummation, so long as they are not finally completed; and the withdrawal of the application may be allowed by the commissioner for a reasonable cause, where not fraudulently procured and not prejudicial to the rights of third parties. *Forbes v. Barstow Stove Co.*, 2 Cliff., 379.

§ 5804. It is doubtless true that a reissue of a patent to a person not the owner would not affect the title of the owner. The reissue and title should go together to make a good title to the reissue, or, at least, the reissue should be consented to by the true owner. *Campbell v. James*, 17 Blatch., 42.

§ 5805. Decrees sustaining certain claims of a reissue patent having been made when much less strictness in comparing reissued patents with originals was required, they are disregarded, and the claims held to be too narrow to embrace the defendant's invention or too broad for the original invention and claim. *National Wire Mattress Co. v. New York Braided Wire Mattress Co.*, 20 Fed. Rep., 119.

§ 5806. The court cannot say, as a mere matter of law, that a reissue is invalid, because the patent was sustained in several suits, and licenses were taken under it, as alleged in the bill, thereby averring, in substance, that the original patent was valid and operative; whereas a reissue is based on the inoperativeness and invalidity of the patent. *Thomson v. Wooster*, 114 U. S., 104.

§ 5807. Where inventions embraced in a reissue were not exhibited in the original patent, evidence tending to show that, prior to his application for the original patent, the patentee constructed an apparatus embodying them, is immaterial. *Hammond v. Franklin*, 22 Fed. Rep., 833.

§ 5808. The fact that the patent office suggested the application for reissue is without weight where it appears that the suggestion was founded on an application by the patentee for a new patent which did not include the subject-matter of the new claims of the reissue. *Ibid.*

§ 5809. Where a patent was taken out for an invention and subsequently a second improvement patent thereon, and a month later a third patent, claiming a novel combination, shown but not claimed in the first patent, and the first and second patents were surrendered and reissued, claiming that which was claimed in the third patent, and the third patent was surrendered but not reissued, the reissue of the first and second patents was sustained. *Battin v. Taggart*, 17 How., 74.

§ 5810. *Semble*, that a patentee may surrender his patent and take out a new original patent within two years, where the invention has not been in public use more than two years. *Mini's Assignee v. Adams*, 3 Wall. Jr., 20.

§ 5811. The object of the law on the subject of patents is to advance the interest of the public by securing certain exclusive rights to patentees, and among those rights is that of changing, by a surrender or reissue, the language when the idea remains the same. *Dunbar v. White*, 15 Fed. Rep., 747.

§ 5812. Where a reissue had been held to be invalid because the specification did not contain the full, clear and exact description of the invention that the law requires, *held*, that in the light thrown upon the subject-matter of the patent by the evidence introduced, and by the fuller specification of the last reissue, the true character of the invention had been fairly brought out, and the reissue was sustained. *Schneider v. Pountney*, 21 Fed. Rep., 399.

§ 5813. A needless and improper multiplication of claims in a reissue does not vitiate the whole patent, but only the superfluous claims. *Dederick v. Cassell*, 9 Fed. Rep., 306.

§ 5814. Claims in a reissue which, unless limited to less than they express, enlarge the invention beyond that covered by the original patent, are void. *Curtis v. Branch*, 15 O. G., 919.

§ 5831. Under act 1793, section 10, the proceedings in repeal of patent, construed. Delano v. Scott, Gilp., 489.

§ 5832. Proceedings under act of 1793, section 10, for the repeal of a patent, are in the nature of a *scire facias* at common law. Stearn v. Barrett, 1 Mason, 153.

§ 5833. *Scire facias* for the repeal of a patent (section 10, act 1793) should directly allege the causes for which the patent is sought to be repealed. *Ibid.*

§ 5834. The judicial authority intended to be given by section 10, act 1793, is vested exclusively in the district judge, and the proceedings under it were intended to be summary. The making of the rule absolute, if sufficient cause is not shown to the contrary, on the return of the rule to show cause, works a repeal of the patent, without further proceedings. Thompson v. Haight, 1 U. S. L. J., 98; McGaw v. Bryan, 1 U. S. L. J., 85.

§ 5835. Under the act 1793 a patent cannot be repealed by a rule to show cause without further proceedings; the proper practice stated. Wood, *Ex parte*, 9 Wheat., 603.

§ 5836. Under act 1793 the United States cannot be made party to a suit for the repeal of a patent by *scire facias*. Wood v. Williams, Gilp., 517.

§ 5837. Under act 1793 a decision in favor of patentee on the issue of a *scire facias* does not prevent his right being contested in any subsequent suit. Delano v. Scott, 1 Gilp., 489.

§ 5838. Knowledge on the part of patentee that he is not the original inventor of the thing patented amounts to "surreptitious and false suggestion," under act 1793, and is sufficient ground for repeal of the patent. *Ibid.*

§ 5839. A patent cannot be declared void (sec. 6, act 1793) for any other defect in the specification than fraudulent concealment or addition. Whitney v. Emmett, 1 Bald., 303.

§ 5840. Under section 10, act 1793, the circuit courts have appellate jurisdiction in proceedings to repeal a patent. Stearns v. Barrett, 1 Mason, 153.

§ 5841. In a civil suit, a circuit court can give a judgment declaring a patent void only in cases provided for under section 6, act 1793. Whitney v. Emmett, 1 Bald., 303.

§ 5842. Under act 1836, section 16, extended act 1839, section 10, a United States court has jurisdiction to declare letters patent void only in the case of interfering patents, and where the granting of a patent is refused by the commissioner of patents or by the chief justice of the District of Columbia on appeal. Merserole v. Union Paper Collar Co., 6 Blatch., 356.

§ 5843. The jurisdiction conferred by the acts of 1790 and 1793 upon the federal courts to repeal a patent, and which without express grant it is believed did not inhere in those courts, is nowhere conferred by the acts of 1836 or 1870, or in the Revised Statutes of 1874. Atty. Gen. *ex rel.* Hecker v. Rumford Chemical Works, 9 O. G., 1062.

§ 5844. The decisions in the federal courts sustaining proceedings in equity to vacate letters patent granting lands obtained by fraud furnish no precedent in case of letters patent for inventions. *Ibid.*

§ 5845. The United States have the same right to vacate a patent for invention obtained by fraud as where the subject is a land grant, or is a franchise or right of a different kind, and may properly proceed by bill in equity to vacate such patent. United States v. Gunning, 18 Fed. Rep., 511.

§ 5846. In the patent act, as it now stands, we find no authority given the courts to set aside or annul a patent for mere want of novelty. Lockwood v. Cleveland, 20 Fed. Rep., 164.

§ 5847. Where the name of the government was only colorably used to cancel a patent for fraudulent oath as to prior public use, and the suit was really prosecuted by private persons, *held*, that the court had no jurisdiction, and *held* further, as the matter could be set up as a valid defense to the validity of the patent on a suit thereunder for infringement, such defense should be left to the parties really interested. United States v. Frazer, 22 Fed. Rep., 106.

§ 5848. Where a bill was filed praying for an injunction and the repeal of the patent enjoined, in case plaintiff was successful in obtaining his patent, the inchoate right of the inventor, arising from the pendency of an application in the patent office, was held insufficient to give a court jurisdiction to decree an injunction against a party already possessed of a patent, and that the patent of the latter could not be collaterally impeached for fraud. Hoeltze v. Hoeller, 2 Bond, 386.

§ 5849. On a suit to repeal a patent, a motion, on the application of the United States, asking for a preliminary injunction to restrain the commencement or prosecution of suits for infringement of the patent during the pendency of the action for repeal, denied. United States v. Colgate, 21 Fed. Rep., 318.

§ 5850. A bill in chancery has become established as the appropriate proceeding for annulling a grant or patent from the government. Mowry v. Whitney, 14 Wall., 434.

§ 5851. The practice that obtains in England as to the mode or forms of procedure for the

cancellation and annulling letters patent by *scire facias* does not obtain in this country. Attorney-General *ex rel.* Hecker v. Rumford Chemical Works, 9 O. G., 1062.

§ 5852. No statute of the United States confers or recognizes the existence of any such right, nor can any precedent be found for the suing out of a writ of *scire facias*, or the bringing of a bill in equity to repeal or cancel the patent by the attorney-general, in the name and behalf of the United States, either with or without a relator. *Ibid.*

§ 5853. No private person can maintain a bill in chancery to set aside a patent, except (under section 16 of the act of 1836) the holder of a patent which is in conflict with another, or an applicant for a patent whose claim has been rejected upon another patent. None but the officers of the government can institute such a proceeding in other cases. Mowry v. Whitney, 14 Wall., 434.

§ 5854. Where a bill in equity, purporting to be brought by the United States, at the instance of certain parties, prayed for the surrender and canceling of certain letters patent, and it did not appear on its face to be filed on behalf of the United States by the district attorney, by whom alone the United States can, under the statute, bring suit, a demurrer thereto was sustained. United States *ex rel.* West v. Doughty, 7 Blatch., 424.

§ 5855. "The attorney-general of the United States, as he is attorney-general," has no authority as such, and in his own name, to file an information, or commence proceedings by bill in equity to repeal a patent. Att'y-Gen. *ex rel.* Hecker v. Rumford Chemical Works, 9 O. G., 1062.

§ 5856. If the court has jurisdiction in cases of this character the information should be in the name and behalf of the United States, and should be filed by the attorney of the United States, in the district in which the information is filed. *Ibid.*

§ 5857. Any other mode of procedure (unless authority is expressly conferred by statute) is neither authorized by law, sanctioned by any precedent, nor supported by the authority of any judicial decision. *Ibid.*

§ 5858. It rests with the attorney-general to say whether proceedings shall be instituted to annul the defendant's patent for want of novelty. There is no absolute duty imposed upon him to do so at the instance of a party asserting its invalidity for want of novelty, and it is no ground for a demurrer to a bill for taking testimony *in perpetuam rei memoriam*. New York & Baltimore Coffee Polishing Co. v. New York Polishing Co., 9 Fed. Rep., 578.

§ 5859. A patent decreed to be void, upon a bill in equity filed for the purpose, on its being found to claim what was embraced in a former patent. Adamson v. Dedrick, 2 O. G., 523.

311. RESULT.

See INFRINGEMENT, DIFFERENCE AND IDENTITY IN RESULT. PATENTABILITY, RESULT.

312. RESULT CLAIMS.

See CLAIMS, RESULT. CLAIMS, CONSTRUCTION OF RESULT.

313. REPLICATION.

§ 5860. When and on what terms leave will be granted, on motion, to file an amended replication setting up a license. Goodyear v. McBurney, 3 Blatch., 32.

§ 5861. Where plaintiffs in their amended declaration averred construction and use of certain infringing machines by defendant, at the date when plaintiffs first acquired title, and defendants pleaded accord and satisfaction with plaintiffs' authorized agent, and plaintiffs, in their replication, filed two pleas alleging that defendants purchased the infringing machines nearly a year before plaintiffs acquired title and from persons unknown to plaintiffs, and that they thereafter used them as alleged in the declaration, the replication was held bad, as an effort to go behind the declaration and add another and different cause of action. Burdell v. Denig, 15 Fed. Rep., 397.

§ 5862. Where a replication is put in to a plea, the parties proceed to the examination of witnesses in the same way as in case of a replication to an answer. Reissner v. Anness, 13 O. G., 7.

§ 5863. This course having been prescribed by order of the court, a motion to revoke was denied. *Ibid.*

See Practice, §§ 4911, 4920.

314. RE-USE.

SUMMARY (COTTON-TIE CO. v. SIMMONS, §§ 5864-5866) — *The patent construed, § 5864. — Re-use amounting to an infringement, § 5865. — Sale of part of combination with intent to procure an infringement, § 5866.*

COTTON-TIE COMPANY v. SIMMONS.

(16 Otto, 89-95. 1882.)

APPEAL from U. S. Circuit Court, District of Rhode Island.

Opinion by MR. JUSTICE BLATCHFORD.

STATEMENT OF FACTS.— This is an appeal by the plaintiffs in a suit in equity from a decree dismissing the bill of complaint. The suit was brought for the infringement of three several letters patent,— No. 19,490, granted to Frederic Cook, March 2, 1858, for an “improvement in metallic ties for cotton bales,” and extended for seven years from March 2, 1872; reissued letters patent No. 5333, granted to James J. McComb, as assignee of George Brodie, March 25, 1873, for an “improvement in cotton-bale ties” (the original patent having been granted to Brodie, as inventor, March 22, 1859, and reissued to him April 27, 1869, and extended for seven years from March 22, 1873); and No. 31,252, granted to J. J. McComb, January 29, 1861, for an “improvement in iron ties for cotton bales,” and extended for seven years from January 29, 1875. They are severally known as the Cook, the Brodie and the McComb patents. The Cook patent expired March 2, 1879; the Brodie patent, March 22, 1880; and the McComb patent, January 29, 1882. The plaintiffs are the American Cotton-Tie Company, Limited, a British corporation; James J. McComb, administrator of Mary F. McComb, deceased; and the said James J. McComb, Charles G. Johnsen and Emerson Foote, each in his own behalf and as a copartner in a firm called the American Cotton-Tie Company. The defendants are Simeon W. Simmons and two other persons, doing business as the Providence Cotton-Tie Company. The Cook patent was assigned to McComb March 21, 1872. The Brodie reissue of 1869, with all rights to reissue, renewal and extension, was assigned to McComb March 19, 1873. On the 22d of June, 1874, McComb assigned to himself, Johnsen and Foote, who composed the firm called the American Cotton-Tie Company, the Cook patent as extended, and the Brodie patent as reissued in 1869 and as extended. Mary F. McComb became, in 1861, the owner of the McComb patent. She died in 1874, intestate, and McComb was appointed her administrator. On the 1st of March, 1876, the firm called the American Cotton-Tie Company assigned to the corporation called the American Cotton-Tie Company, Limited, the Cook patent as extended, and the Brodie patent as extended and as reissued in 1873. On the same day McComb, individually and as administrator, assigned to the said corporation the McComb patent and its extension.

The bill is in the usual form, and was filed in November, 1876. It alleges that the defendants have made, used, and sold to others to be used, the patented inventions, and, also, metallic ties for cotton bales containing the patented inventions. No defense affecting the validity of the patents sued on is set up in the answer. The only defense pleaded or made is as to infringement.

The corporation plaintiff, since it acquired title to the three patents in March, 1876, has carried on the business of making cotton-bale ties under the patents. The form of tie it has principally made is the form of the McComb

patent, which is called the "arrow tie," from the shape of the five-sided hole cut in the plate of the buckle. It has not granted any licenses to make the ties, but has itself supplied the demand for them. The tie consists of a buckle and a band, all made of metal. The band goes around the bale, and the two ends of it are confined by means of the buckle. On each of the buckles which the corporation has made and put upon the market it has placed the words "licensed to use once only," stamped into the body of the metal. This practice was also observed by its predecessor, the copartnership firm. The tie, consisting of buckle and band, is purchased by the person who desires to use it to confine the cotton in the bale, and is placed around the bale on the plantation or at the cotton-press. It remains on the bale until the bale reaches the cotton-mill, and the band of the tie, which is of hoop-iron, is then cut. The buckle and the band, thus free, become scrap-iron, and are sold as such. The hoop is too short for the length required for baling, if it were to be mended by lapping and riveting the two ends at the place of severance, and to bale with it requires that there should be a free end which may be confined at the buckle in the process of baling. The defendants buy the buckles and severed hoops at the cotton-mills, as scrap-iron, the hoops, when bought, being in bundles, bent, and being pieces of unequal lengths, some cut at one distance from the buckle, and some at another. The defendants straighten the old pieces of hoop and roll them by cold rolling, and punch the ends with holes, and rivet the pieces together, and form a band by cutting it to the proper length, which band, with the buckle accompanying it, makes a tie ready for use. In using the tie one end of the band is attached to one end of the buckle by a loop in that end of the band, and then the band is passed around the bale, and its free end is slipped, by a loop made in it, through a slit in the buckle, around the other end of the buckle, while the bale is under pressure. When the pressure is removed the expansive force of the compressed cotton holds the looped ends of the bands in place in the buckle, the looped ends being confined between the bale and the body of the band. The use of the arrow tie has been very extensive. The defendants sell to others to be used the ties which they so prepare, and do not themselves bale cotton with them. Baled cotton is sold in the United States without tare, that is, the iron of the buckle and the hoop is weighed with the cotton and the bagging, and the whole is sold by weight at the price of the cotton per pound. The scrap-iron consisting of the buckles and cut hoops is sold at one cent and a quarter per pound, while the corporation sells its ties at six cents per pound.

§ 5864. *The patents considered.*

The specification of the Cook patent describes a buckle with a slot cut through one of its end bars, so that the end of the band may be slipped through sidewise instead of being pushed through endwise. The third claim is to "the herein-described 'slot,' cut through one bar of clasp, which enables the end of the tie or hoop to be slipped sidewise underneath the bar in clasp, so as to effect the fastening with greater rapidity than by passing the end of the tie through endwise."

The specification of the Brodie reissue states that his invention "relates to the combination with open-slot ties of metallic bands having their ends free, and held in position by the expansion of the bale." Some of the drawings show an open slotted link or buckle in connection with a band, and the specification states that the ends of the band are "turned under the link and held

in position by the pressure exerted by the expansion of the bale." It adds: "In the latter mode of use the slack may be readily taken up by forming the loop in the iron at the moment of making the fastening, and passing the end thus looped through the opening in the side of the link. The band is thus slipped sidewise through the opening into the slot instead of thrusting it through endwise." The third, fourth and fifth claims of the Brodie reissue are in these words: "3. The combination of an open slot for introducing the band sidewise with a link having a single rectangular opening for holding both ends of a metallic band, and the band. 4. An open slotted link, when combined with metallic bands, the ends of which are turned under the link and held in position by the expansion of the bale. 5. The method of baling cotton with metallic bands, and taking up the slack of the band by bending the same at any desired point into the form of a loop, and passing such loop sidewise through an open slit into the slot intended to receive it and over the bar of the clasp intended to hold it."

The specification of the McComb patent states that the nature of his invention "consists in the use of a peculiarly shaped buckle as a fastening or tie for the ends of the iron hoops." It says that the "buckle is a piece of wrought iron or other metallic substance about the eighth of an inch thick, an inch and three-quarters wide, and two inches long (the size being modified to suit the width of the hoop used), with an oblong hole or aperture cut or punched through the center;" that the five sides of the plate of the buckle are equal and parallel; and that the two largest of the five sides of the oblong hole are of equal length, and are equal in length to the width of the hoop. The drawings show the two sides forming the arrow-part as of equal length. The slit or slot is cut through one of the sides of the plate opposite one of the two longest sides of the central hole, so that one of the loops of the hoop stretches across and covers the slit. The claim of the patent is this: "Forming a link or tie with an oblong aperture, one end of which is arrow-shaped, or rather presents two sides of an equilateral triangle, the design of this arrow-shaped end being not only to force the loop or bend of the hoop over the slot, which it does with unerring precision when the bale expands after being released from the press, but, also, to secure an equal bearing upon the separated parts of the slotted side of the tie."

§ 5865. *Reconstruction and re-use of a machine which amounts to an infringement.*

A buckle without a band will not confine a bale of cotton. Although the defendants use a second time buckles originally made by those owning the patents and put by them on the market, they do not use a second time the original bands in the condition in which those bands were originally put forth with such buckles. They use bands made by piecing together severed pieces of the old bands. The band in a condition fit for use with the buckle is an element in the third claim of the Brodie reissue. That claim is for a combination of the open slot arranged to allow of the sidewise introduction of the band, the link or buckle with the single rectangular opening arranged so as to hold both ends of the band and the band. The old buckle which the defendants sell has the slot of Cook, and the slot and rectangular opening of Brodie, and the slot and arrow-shaped opening of McComb. Whatever right the defendants could acquire to the use of the old buckle, they acquired no right to combine it with a substantially new band, to make a cotton-bale tie.

They so combined it when they combined it with a band made of the pieces of the old band in the way described. What the defendants did in piecing together the pieces of the old band was not a repair of the band or the tie, in any proper sense. The band was voluntarily severed by the consumer at the cotton mill because the tie had performed its function of confining the bale of cotton in its transit from the plantation or the press to the mill. Its capacity for use as a tie was voluntarily destroyed. As it left the bale it could not be used again as a tie. As a tie the defendants reconstructed it, although they used the old buckle without repairing that. The case is not like putting new cutters into a planing-machine in place of those worn out by use, as in *Wilson v. Simpson*, 9 How., 109. The principle of that case was, that temporary parts wearing out in a machine might be replaced to preserve the machine, in accordance with the intention of the vendor, without amounting to a reconstruction of the machine.

§ 5866. *One who sells a part of a combination, with the intent to have it used in infringing, is liable therefor.*

The defendants contend that they do not combine the band with the buckle, and do not infringe the third claim of the Cook patent, or the third, fourth and fifth claims of the Brodie reissue, or the claim of the McComb patent, because they do not bale cotton with the tie. But they participate in combining the open slot, the buckle and the band, the whole being so arranged that the ends of the band can be turned under the buckle and held in position by the expansion of the bale, and that the slack of the band can be taken up by bending the band into the form of a loop, and passing the loop sideways through the open slit into the hole and over the holding-bar of the plate. They sell the tie having the capacity of use in the manner described, and intended to be so used. Only the bale of cotton and the press are needed to produce the result set forth in the specifications of the patents, and without the bale of cotton and the press the tie would not be made or sold. The slot through the end bar of the buckle in the Cook patent is of no practical use apart from the band and the bale of cotton, and the same thing is true of the link of the McComb patent with its arrow-shaped aperture; and although a person who merely makes and sells the buckle or link in each case may be liable for infringing those patents, he is so liable only as he is regarded as doing what he does with the purpose of having the buckle or link combined with a band and used to bale cotton. Because the defendants prepare and sell the arrow-tie, composed of the buckle or link and the band, intending to have it used to bale cotton and to produce the results set forth in the Cook and the McComb patents, they infringe those patents. *Saxe v. Hammond*, 1 Holmes, 456; *Bowker v. Dows*, 3 Ban. & Ard., 518. We do not decide that they are liable as infringers of either of the three patents merely because they have sold the buckle considered apart from the band or from the entire structure as a tie.

We are therefore of opinion that the defendants infringed the third claim of the Cook patent, the third, fourth and fifth claims of the Brodie reissue, and the claim of the McComb patent.

Decree reversed, with costs, with directions to enter a decree for the plaintiffs, in respect to those claims, for an account of profits and damages, as prayed in the bill, and to take such further proceedings in the suit as may be in conformity with the opinion of this court.

317. RIGHT OF ACTION.

See ASSIGNEE, RIGHT OF ACTION. CORPORATION, RIGHT OF ACTION FOR INFRINGEMENT.

Right of action — *Act 1870*, §§ 5867, 5868. *Assignee*, §§ 5869, 5870. *Assignment of right of action*, §§ 5871-5873. *Distiller*, § 5874. *On single claims*, §§ 5875-5877. *New cause of action*, § 5878. *Election of remedies*, § 5879. *Right to bring additional suit*, §§ 5880, 5881. See *Assignee*, §§ 562-571. *Corporation*, §§ 1369-1371. *Infringement*, § 2947. *Parties*, §§ 4489-4545. *Recovery*, §§ 5211-5237.

§ 5867. Although the act of 1870 repealed the act of 1836, it preserved unimpaired whatever rights had been acquired under it, and the owners of patents obtained before the passage of the act of 1870 may maintain suits for infringements perpetrated afterward. *Union Paper Bag Machine Co. v. Newell*, 11 Blatch., 379.

§ 5868. All actions on patents commenced before July 8, 1870, are to be prosecuted in accordance with the provisions of the act of 1836; but the remedial provisions of the act of 1870 apply to all actions commenced after that date, though for causes accruing before. *Ibid.*

§ 5869. Section 4919 of the Revised Statutes permits an assignee of a patent, and of all claims for damages and profits accrued thereunder before the assignment, to maintain an action at law in his own name to recover such damages. *Spring v. Domestic Sewing Machine Co.*, 22 O. G., 1445.

§ 5870. A patentee or his assignee, in transferring a part of a patent, may reserve the right to prosecute for piracies. *Bicknell v. Todd*, 5 McL., 236.

§ 5871. Patentee may assign right to recover for infringements occurring before the assignment. *Hamilton v. Rollins*, 5 Dill., 495.

§ 5872. The right to recover for infringement of a patent, like other choses in action, is assignable in equity, and the real owner of the right is entitled to maintain a suit upon it in equity in his own name. *Shaw v. Colwell Lead Co.*, 11 Fed. Rep., 711.

§ 5873. In equity the right to recover gains and profits will pass by assignment after decree without the title to the patent itself. *Quære*, will it before? *Campbell v. James*, 5 B. & A., 630.

§ 5874. A distiller cannot recover from the collector money deposited with him as pay for patented meters prescribed by the internal revenue department. *Nusbaum v. Emery*, 3 Biss., 469.

§ 5875. A patent may contain several distinct claims for different inventions, and a suit may be maintained for the infringement of any one of them as if it was the only one. *McComb v. Brodie*, 1 Woods, 153.

§ 5876. Where complainants' patent covers three separate and distinct inventions, it is competent for the complainants to sue for an infringement of any one of them. *McComb v. Ernst*, 1 Woods, 195.

§ 5877. Where a patent was construed to cover three separate and distinct inventions, it was held competent for complainant to sue for infringement of any one of them. *Cook v. Ernst*, 2 O. G., 89.

See *Assignment*, §§ 444-450.

§ 5878. Where the patent had been infringed by defendants since suit between the same parties in another district, *held*, that it created a new cause of action, which could be enforced either at law or in equity, and the right so to do was not prejudiced by the fact that complainant, if he chose, might proceed against defendants for contempt in violating the injunction. *Roemer v. Neuman*, 23 Fed. Rep., 447.

See *Remedy*, § 5818.

§ 5879. In this case it was competent for the complainants to take either one of the two remedies for the alleged injuries growing out of a violation of the agreement or license. They could bring a bill alleging an injury to their exclusive rights, or could bring a proper suit, setting up the breach of contract as the *gravamen* of their action. *Stover v. Halsted*, 13 Blatch., 95.

See *Damages and Profits*, § 1543.

§ 5880. It is doubtful whether the court will, in any proceeding, enjoin the plaintiffs from prosecuting whatever suits they choose in the courts of other districts. *Rumford Chemical Works v. Hecker*, 11 Blatch., 552.

§ 5881. A complainant who has obtained a decree for an account upon a bill for an infringement may bring another suit, as it seems, for such infringements of the same patent as are not covered by the first. *Ibid.*

318. RIGHT TO USE.

See USE, RIGHT TO.

319. ROYALTY AND LICENSE FEE.

See DAMAGES, MEASURE OF, LICENSE FEE AND ROYALTY.

Royalty and license fee — *Patentee can recover but one royalty*, §§ 5882, 5883. *How established*, §§ 5884-5886. *Equity jurisdiction*, § 5887. *License fee, how established*, §§ 5888-5891. See *Damages and Profits, Measure of*, §§ 1574-1598.

§ 5882. Patentees are entitled to but one royalty for a patented machine. *Bloomer v. Millinger*, 1 Wall., 340.

§ 5883. The patentee is entitled to but one royalty for a patented machine, and he ought to have but one profit for the manufacture and use of a machine. *Spaulding v. Page*, 1 Saw., 702.

§ 5884. No price can be said to be fixed, or royalty established, where the patentee varies his price according to the courage or ability to resist of an infringer, or where there are other circumstances showing the absence of a fixed and established fee. *Black v. Munson*, 14 Blatch., 265.

§ 5885. Where a license under letters patent provided for the payment of a royalty of \$5 a machine, but subject to a reduction of \$3 if promptly paid, etc., it was, on the question of assessing damages against a third party, considered as establishing a royalty at the lower rate, and interest from the date of the interlocutory decree establishing the patent and the fact of infringement, was allowed. *Graham v. Geneva Lake Crawford Mfg. Co.*, 32 O. G., 1603.

§ 5886. In respect to two or more claims in a patent, each of value and distinct from the other, one cannot equal all in value any more than in mathematics a part can equal the whole. A licensee may, if he choose, bind himself to pay the same price whether he use the entire invention or a part only, but at the same time he acquires the right to use all, and so his agreement may not be unreasonable; but if as against an infringer such a license can have any force, reasonably it must be in the way only of establishing a royalty for the entire invention. *Westcott v. Rude*, 19 Fed. Rep., 830.

§ 5887. Where the real damage is in the nature of a royalty there is no remedy in equity. *Hoe v. Boston Daily Advertiser Corporation*, 14 Fed. Rep., 914.

§ 5888. Proof of a single license is not sufficient to establish a market price. *Westcott v. Rude*, 19 Fed. Rep., 830.

§ 5889. Evidence of settlements for infringements of a patent, or of licenses for the future, given wholly or partially in consideration of such settlements, is not competent to show an established royalty or license fee. *Gottfried v. Crescent Brewing Co.*, 22 Fed. Rep., 433.

§ 5890. When the question is close, a revoked or abandoned license may be considered as throwing light upon the value which an inventor has put upon the right to manufacture his patented machine. *Graham v. Geneva Lake Crawford Mfg. Co.*, 32 O. G., 1603.

§ 5891. Agreements made to secure the manufacture and introduction of a patented machine are not to be considered as unqualified licenses fixing a royalty or license fee which can be accepted as establishing, within the language of the court in *Seymour v. McCormick*, 16 How., 480, the average of actual damages sustained by a patentee when his invention is used without license. *Ibid.*

See *Damages and Profits*, § 1520.

320. RULE OF COMITY.

Rule of comity — *Prior decisions* — *Of supreme court*, §§ 5892-5897; *of federal courts*, §§ 5898-5907; *particular cases*, §§ 5908-5910. See *Injunction, Preliminary*, §§ 3047, 3049, 3148-3158.

§ 5892. Decisions of the supreme court are authority in this court, even though none of the parties are the same as in the prior determination. *Richardson v. Lockwood*, 4 Cliff., 128.

§ 5893. The judgment of the supreme court of the United States upon a question of fact arising afterward in a circuit court is entitled to high respect, and, though not binding in law, should be definitive where nothing is alleged which raises a doubt as to its soundness or a suspicion that it would not be repeated on a rehearing. *Seymour v. Marsh*, 2 O. G., 675.

§ 5894. The judgment of the supreme court that a machine is not an infringement of a patent will not hinder its being held an infringement of the same patent when reissued in different terms. *Wells v. Jaques*, 5 O. G., 364.

§ 5895. The decision of the United States supreme court upon a question of law, and sustaining a patent, is entitled to deference, but is not to be followed where the facts appear to be different. *Kirby v. Dodge & Stephenson Manufacturing Co.*, 10 Blatch., 307.

§ 5896. Where the validity of the patent had been established by a prior decision of the supreme court, *ex parte* affidavits to establish its want of validity, presented on a subsequent application for injunction, were not considered. *American Middlings Purifier Co. v. Christian*, 4 Dill., 448.

§ 5897. Decisions of the supreme court of the United States upon questions of patent law are final. Where the question is one of complicated facts, and the facts may be and are controverted in the supreme court, with regard to the validity of the patent, its decision is conclusive upon those facts, so far as the facts are the same. *Ibid.*

§ 5898. The federal courts constitute an indivisible system for ascertaining the rightfulness and limits of the patent, and when, in any co-ordinate department of it, judgment has been pronounced, that duty should be deemed performed until reversed by an appellate tribunal. *Goodyear Dental Vulcanite Co. v. Willis*, 1 Flip., 388.

§ 5899. No circuit court is bound to follow the decisions of the courts of other circuits. Nevertheless, where a patent has been sustained in the circuit courts of four different circuits, and no appeal from the decision has been taken in either case, a strong presumption arises that the parties were satisfied with the soundness of the decisions; and it is incumbent on the party who seeks to bring another court to a different conclusion to point out indisputable grounds for it. *Blake v. Robertson*, 6 O. G., 297.

§ 5900. Where a previous decision has been had by a circuit court with regard to the validity of a patent, the uniform course of decision in the courts of the United States has been to treat it as of the very highest nature, and as almost conclusive in an application for injunction in another case founded on the same patent. *American Middlings Purifier Co. v. Christian*, 4 Dill., 448.

§ 5901. Upon principles of comity, the decisions of courts of co-ordinate jurisdiction upon the same subject-matter of controversy will be adopted as the rule of construction when, after a fair comparison of the testimony in the two cases, there does not appear to be new, or additional, or contradictory evidence which impels the court in the second hearing to a different result. *Rumford Chemical Works v. Hecker*, 10 O. G., 289.

§ 5902. A proper regard for uniformity of decision requires that, where the same evidence as to the state of the art and prior invention is before the court, as in a prior case decided in another circuit, the conclusion then reached should therefore be followed, unless, indeed, plain mistake be shown. *Hammerschlag v. Garrett*, 9 Fed. Rep., 43.

§ 5903. In patent causes, where the same issue has been passed upon by the circuit court sitting in one district, it is only in case of a clear mistake of law or fact, of newly-discovered testimony, or upon some question not considered by such court, that its findings will be reviewed in another district. *Searls v. Worden*, 11 Fed. Rep., 501.

§ 5904. When the record is substantially the same as that in a prior case, the rule of comity prevails, and the findings of the court will be followed; but when the defenses and proofs are not the same, the rule does not apply. *Edgerton v. Furst & Bradley Manufacturing Co.*, 10 Biss., 402.

§ 5905. In hearing a case upon the same issues already passed upon by another circuit court, in which no new question is suggested, or newly-discovered evidence adduced tending to change or modify the adjudication in that case, such prior decision will be assumed to be correct. *Worden v. Searls*, 21 Fed. Rep., 406.

§ 5906. A decision on a preliminary application for an injunction is not of controlling right in another circuit, as was held in the *Sargent Manufacturing Company v. Woodruff*, 5 Bissell, 444. *Cornell v. Littlejohn*, 9 O. G., 837.

§ 5907. The question for decision in all the cases being one of law, on undisputed facts, a decision of it on a motion for a preliminary injunction is of equal weight, on a question of comity, as a decision of it on a final hearing. *American Cotton-Tie Supply Co. v. Bullard*, 17 Blatch., 160.

§ 5908. In view of numerous decrees in other circuit courts sustaining the validity of the Green patent for driven wells, in only one of which appeal has been taken to the supreme court, the court declined to hear argument except as to new features of the particular case. *Green v. French*, 11 Fed. Rep., 591.

§ 5909. The conclusions of the circuit court for the eastern district of New York and the circuit court for the district of Maryland, with respect to the patentability of the invention, adopted, and the validity of the patent sustained, notwithstanding certain testimony offered to show the prior use of the invention. *American Ballast Log Co. v. Cotter*, 11 Fed. Rep., 728.

§ 5910. Where in a suit on a reissue patent certain defenses and evidence were the same as in a prior suit on the same patent, the decision in the former suit as to the matters there considered and passed upon was followed. *Strobridge v. Landers*, 11 Fed. Rep., 880.

See *Construction of Patents*, §§ 1213, 1216.

Sale — Auction, § 5911.

§ 5911. Where B. purchased a patented machine from A., who also gave him a personal license to use it upon the payment of a certain royalty, on the failure of which the license could be revoked; and on the death of B. parts of the machine were purchased at auction by C., who reconstructed the machine and sold it to D., *held*, that the purchase by C. gave him no right to reconstruct from the loose materials a working machine embodying A.'s invention. *Wortendyke v. White*, 2 B. & A., 25.

Sale — Sheriff's.

SUMMARY (*WILDER v. KENT*, §§ 5912, 5913)—*Fixtures; state law*, § 5912.—*Sheriff's sale passes right to use patented machine*, § 5913.

WILDER v. KENT.

(Circuit Court for Pennsylvania: 23 Official Gazette, 831, 832. 1882.)

§ 5912. *Fixtures.*

Opinion by ACHESON, J.

In Pennsylvania, as between vendor and vendee, heir and executor, and debtor and execution-creditor, machinery, whether fast or loose, of a manufactory which is a constituent part thereof, for the purposes of the business there conducted, and without which the establishment would not be fully equipped, is a fixture, and passes as a part of the freehold. *Voorhis v. Freeman*, 2 W. & S., 116; *Ege v. Kille*, 84 Pa. St., 333; *Morris' Appeal*, 88 id., 368. That the two graining-machines, the subject-matter of this suit, although loose and portable, were fixtures within the above-stated principle, we incline to think; but in our apprehension of the case it is not necessary to pass definitely upon that question. The sheriff's levy upon the real estate, after describing the factory lot, proceeds thus: "And having erected thereon a large two-story brick building, known as the 'Corry Wooden Ware Works,' with machinery for manufacturing tubs, pails, etc., large boilers and engine, pulleys, shafting, belting," etc.

Now, the two graining-machines were then used in said works in the ordinary course of the manufacture of tubs and pails to paint or grain designs thereon, to finish the vessels, and make them marketable wares. Clearly they

were within the scope of the levy. In *Voorhis v. Freeman*, *supra*, where the sheriff's vendee claimed duplicated detached rolls, the premises having been described as "a lot or piece of ground, with one iron rolling mill establishment situate thereon, with the buildings, apparatus, steam-engine, boilers, bellows, etc., attached to the said establishment," Chief Justice Gibson said: "And were it necessary, we would further hold that they might have passed, had they been chattels, by force of the word 'apparatus,' in the description of the premises."

So, in this instance, we decide without hesitation that under the sheriff's levy, sale and deed, the title to the two graining-machines vested in his vendee as part of the designated machinery. Each machine is a patented apparatus, constructed under letters patent granted by the United States to John R. and Alfred J. Cross. The plaintiff, David H. Wilder, having acquired the exclusive territorial right to the patent for the counties of Erie and Warren, Pennsylvania, set up said two machines (one of which he bought from one of the patentees, and the other of which he constructed himself), in the Corry Wooden Ware Works, in the said county of Erie. They were there operated under the patent for a number of years by Wilder & Howe and the Corry Manufacturing and Lumber Company (of both which concerns the plaintiff was a member), and by the plaintiff individually, he having eventually become the sole owner of the works and machinery, including the machines in question. Afterward, upon an execution against Wilder, the sheriff levied upon the works and machinery, and sold the same to Adams Davis, one of the defendants. The sheriff's sale, as already shown, embraced the two graining-machines, and under the title thereby acquired the defendants are operating them at said works. This is the alleged infringement of which Wilder complains. We are, therefore, called upon to decide what rights a purchaser at sheriff's sale takes in a patented machine belonging to and sold as the property of the owner of the patent, the defendant in the execution. The learned counsel agree that the question has never been judicially determined; and upon diligent search no case has been found involving the precise point now presented for decision.

§ 5913. *Whatever right to use the patented machine a defendant in an execution may have passes with the machine when sold by the sheriff to his vendee.*

In *Sawin v. Guild*, 1 Gall., 485; 1 Robb., 47, the sheriff, upon an execution against the patentee, levied on and sold the "materials" of several of the completed patented machines, and such sale was held to be no infringement of the patent-right. "He sold," said Mr. Justice Story, "the materials as such, to be applied by the purchaser as he should by law have a right to apply them. The purchaser must therefore act at his own peril, but in no respect can the officer be responsible for his conduct." The specific ruling in *Chambers v. Smith*, 5 Fisher, 12, was that a purchaser at a marshal's sale of a patented machine was an infringer in operating it outside of the district to which its use was limited by the license granted to the defendant in the execution.

The position taken by the plaintiff's counsel is that when the owner of a patent, who does not manufacture for sale, makes a machine for his own use only, and such patented machine is sold at a forced sale by the sheriff, the right to use it does not pass with it, but only the ownership of the materials of which the machine is constructed. To sustain this proposition reliance is placed upon the cases of *Stephens v. Cady*, 14 How., 528, and *Stevens v. Gladding*, 17 id., 447, in which it was held that the seizure and sale of the copper-plate of a copyrighted map, under an execution against the owner of the

copyright and plate, did not carry with it the right to print and publish the map; but the reason assigned for this is that the copyright — the exclusive and intangible right to multiply copies of the original work — does not inhere in and has no necessary connection with the plate, which is the mere instrument for producing the copies. The copyright and plate are wholly distinct and disconnected subjects of property, each capable of being owned and transferred independent of the other (*Ibid.*), and therefore a judicial sale of one does not carry any title to the other. But the lawful sale of a patented machine takes it out of the monopoly, either altogether or *pro tanto*, according to the nature of the contract. The purchaser of a machine from the patentee acquires no right in the patent itself, and needs none to enable him to enjoy his acquisition. By implication he is invested with a license to use that particular machine, and in the absence of express provision to the contrary, such license passes with the machine to successive owners as an incident of proprietorship. That such is the law in case of a voluntary sale of a patented machine by the patentee is incontrovertible. But wherefore should the rights of the sheriff's vendee under an execution against the patentee be less than those of a purchaser directly from the patentee? The rule is, that the purchaser at the sheriff's sale succeeds to the beneficial rights of the defendant in the execution to the property sold. *Chambers v. Smith, supra.* But why should an exception be made where the subject-matter of sale is a patented machine? To deny to the sheriff's vendee the right to use such machine would in effect prevent its sale upon an execution at law as an operative apparatus, and practically withdraw it from the reach of the owner's execution creditors. The mischievous consequences to such creditors to which the doctrine contended for would lead (now that patented machinery has come into almost universal use) can hardly be estimated. The plaintiff's position is untenable. It is very true that the patent-right itself, being incorporeal and resting exclusively upon statutory grant, cannot be levied on at law, and is available to creditors only by proceedings in a court of equity. *Ager v. Murray*, 105 U. S., 126. But a patented machine is susceptible of manual seizure, and the unrestricted sale thereof does not involve the transfer of any interest in the patent.

The conclusion, therefore, is that whatever right to use the patented machine a defendant in an execution may have, passes with the machine when sold by the sheriff to his vendee. Hence it follows that the plaintiff has no just cause of complaint against these defendants.

The foregoing views being decisive of the case, it is unnecessary to consider the other questions which the counsel have so ably discussed.

McKENNAN, C. J.: I concur fully in the foregoing opinion.

Per CURIAM: Let a decree be drawn dismissing the plaintiff's bill, with costs.

§ 5914. Sheriff's sale on execution of materials of a patented machine is no infringement. *Sawin v. Guild*, 1 Gall., 484.

§ 5915. A license to use a patented invention held a proper subject of sale to satisfy a judgment debt by bill in equity. *Matthews v. Green*, 19 Fed. Rep., 649.

Sale — Judicial.

SUMMARY (AGER *v.* MURRAY, § 5916) — *Patent-right is subject to judgment debt in equity,*
§ 5916.

AGER *v.* MURRAY.

(15 Otto, 126-132. 1881.)

APPEAL from the Supreme Court of the District of Columbia.

Opinion by MR. JUSTICE GRAY.

STATEMENT OF FACTS.— This is a bill in equity by a judgment creditor to subject to the payment of his debt the interest of his debtor in patent-rights. The case was heard in the supreme court of the District of Columbia upon bill and answers, by which it appears to be as follows:

On the 10th of April, 1876, Talbot C. Murray, in an action at law upon a promissory note, recovered judgment against Wilson Ager for the sum of \$2,164.66, with interest and costs. Upon that judgment a writ of *fiери facias* was issued, and returned *nulla bona*. Wilson Ager had no real or personal property in the district subject to execution at law, but was the owner of sundry letters patent issued to him by the United States for useful inventions, which, if sold, would produce more than enough money to satisfy that judgment. On the 26th of September, 1876, he conveyed all his right and interest in these letters patent to the other defendant, Elisha C. Ager, who owned an equitable interest of one-third therein, and who, on the 8th of October, 1877, reconveyed the patent-rights to Wilson by an assignment which was not recorded in the patent office. Wilson Ager resides in the District of Columbia, and the other defendant resides in the state of California, and both have appeared in the cause and answered to the merits of the bill.

The bill prays for an injunction against further assignment pending the suit, and that the patents be sold under the direction of the court, and the proceeds of the sale applied to the payment of the judgment debt, and the defendant, Wilson Ager, be required to execute such assignment as may be necessary to vest title in the purchaser or purchasers, in conformity with the patent laws, and for further relief. The decree is, that in default of his paying by a certain day the judgment mentioned in the bill, with interest and costs, and the costs of this suit, the patent-rights be sold and an assignment thereof executed by him as prayed for, and that, in default of his executing such assignment, some suitable person be appointed trustee to execute the same.

§ 5916. *A patent-right may be subjected in equity to the payment of a judgment debt of the patentee.*

From that decree the original defendants have appealed to this court, and the single question argued before us is whether a patent-right may be ordered by a court of equity to be sold and the proceeds applied to the payment of a judgment debt of the patentee. A patent or a copyright which vests the sole and exclusive right of making, using and vending the invention, or of publishing and selling the book, in the person to whom it has been granted by the government, as against all persons not deriving title through him, is property, capable of being assigned by him at his pleasure, although his assignment, unless recorded in the proper office, is void against subsequent purchasers or mortgagees for a valuable consideration without notice. Rev. Stat., secs. 4884, 4898, 4952, 4955. And the provisions of the patent and copyright acts, securing a sole and exclusive right to the patentee, do not exonerate the right

and property thereby acquired by him, of which he receives the profits, and has the absolute title and power of disposal, from liability to be subjected by suitable judicial proceedings to the payment of his debts.

In England it has long been held that a patent-right would pass by an assignment in bankruptcy, even without express words to that effect in the bankrupt act. *Hesse v. Stevenson*, 3 Bos. & Pul., 565; S. C., Davies, Pat. Cas., 263; *Longman v. Tripp*, 2 New Rep., 67; *Bloxam v. Elsee*, 1 Car. & P., 558; S. C., Ry. & M., 187; 6 Barn. & Cress., 169; 9 D. & R., 215; *Mawman v. Tegg*, 2 Russ., 385; *Edelsten v. Vick*, 11 Hare, 78; *Hudson v. Osborne*, 39 L. J. (N. S.), Ch., 79. In *Hesse v. Stevenson*, Mr. Justice Chambre, in the course of the argument, said: "The right to the patent is made assignable; why, then, may it not be assigned under a commission of bankrupt?" 3 Bos. & Pul., 571. And Lord Alvanley, delivering the unanimous judgment of the court, after observing that it was contended "that the nature of the property in this patent was such that it did not pass under the assignment," and "that although by the assignment every right and interest, and every right of action, as well as right of possession and possibility of interest, is taken out of the bankrupt and vested in the assignee, yet that the fruits of a man's own invention do not pass," said: "It is true that the schemes which a man may have in his own head before he obtains his certificate, or the fruits which he may make of such schemes, do not pass, nor could the assignee require him to assign them over, provided he does not carry his schemes into effect until after he has obtained his certificate. But if he avail himself of his knowledge and skill, and thereby acquire a beneficial interest, which may be the subject of assignment, I cannot frame to myself an argument why that interest should not pass in the same manner as any other property acquired by his personal industry." 3 Bos. & Pul., 577, 578. The recent bankrupt act of the United States, in defining what property should vest in the assignee in bankruptcy, expressly enumerated "all rights in equity, choses in action, patent-rights, and copyrights," and required the assignee to sell all the property of the bankrupt for the benefit of his creditors. Rev. Stat., secs. 5046, 5062-5064. The only difference is, that in England all such rights pass that become vested in the bankrupt before he obtains a certificate of discharge, whereas here only those rights pass which belong to him at the time of the assignment.

It has been said by an English text-writer that "a patent-right may be seized and sold in execution by the sheriff under a *fiery facias*, being in the nature of a personal chattel." Webster on Patents, 23. We are not aware of any instance in which such a course has been judicially approved. But it is within the general jurisdiction of a court of chancery to assist a judgment creditor to reach and apply to the payment of his debt any property of the judgment debtor, which by reason of its nature only, and not by reason of any positive rule exempting it from liability for debt, cannot be taken on execution at law; as in the case of trust property in which the judgment debtor has the entire beneficial interest, of shares in a corporation, or of choses in action. *M'Dermutt v. Strong*, 4 Johns. Ch., 687; *Spader v. Hadden*, 5 id., 280, and 20 Johns., 554; *Edmeston v. Lyde*, 1 Paige, 637; *Wiggin v. Heywood*, 118 Mass., 514; *Sparhawk v. Cloon*, 125 id., 263; *Daniels v. Eldredge*, id., 356; *Drake v. Rice*, 130 id., 410.

In *Stephens v. Cady*, 14 How., 528, and again in *Stevens v. Gladding*, 17 id., 447, the point decided was that, by a sale of the copper-plate engraving of a

map on execution from a state court against the owner of the copyright, the purchaser acquired no right to strike off and sell copies of the map.

Mr. Justice Nelson, in delivering judgment in *Stephens v. Cady*, said: "The copper-plate engraving, like any other tangible personal property, is the subject of seizure and sale on execution, and the title passes to the purchaser the same as if made at a private sale. But the incorporeal right, secured by the statute to the author, to multiply copies of the map by the use of the plate, being intangible, and resting altogether in grant, is not the subject of seizure or sale by means of this process — certainly not at common law. No doubt the property may be reached by a creditor's bill, and be applied to the payment of the debts of the author, the same as stock of the debtor is reached and applied, the court compelling a transfer and sale of the stock for the benefit of creditors." He then cited the cases in Johnson's and Paige's Reports, above referred to, and added: "But in case of such remedy, we suppose, it would be necessary for the court to compel a transfer to the purchaser, in conformity with the requirements of the copyright act, in order to vest him with a complete title to the property." 14 How., 531.

In *Stevens v. Gladding*, Mr. Justice Curtis said: "There would certainly be great difficulty in assenting to the proposition that patent and copyrights, held under the laws of the United States, are subject to seizure and sale on execution. Not to repeat what is said on this subject in 14 How., 531, it may be added, that these incorporeal rights do not exist in any particular state or district; they are co-extensive with the United States. There is nothing in any act of congress, or in the nature of the rights themselves, to give them locality anywhere, so as to subject them to the process of courts having jurisdiction limited by the lines of states and districts. That an execution out of the court of common pleas for the county of Bristol, in the state of Massachusetts, can be levied on an incorporeal right subsisting in Rhode Island or New York, will hardly be pretended. That by the levy of such an execution the entire right could be divided, and so much of it as might be exercised within the county of Bristol sold, would be a position subject to much difficulty. These are important questions, on which we do not find it necessary to express an opinion, because in this case neither the copyright, as such, nor any part of it, was attempted to be sold." 17 How., 451. The difficulties of which the learned justice here speaks are of seizing and selling a patent or copyright upon an execution at law, which is ordinarily levied only upon property, or the rents and profits of property, that has itself a visible and tangible existence within the jurisdiction of the court and the precinct of the officer; and do not attend decrees of a court of equity, which are *in personam*, and may be enforced in all cases where the person is within its jurisdiction. *Massie v. Watts*, 6 Cranch, 148. And the terms in which he refers to the statement of Mr. Justice Nelson show that there was no intention to criticise or qualify that statement.

There are, indeed, decisions in the circuit courts that an assignee in insolvency, or a receiver, of all the property of a debtor, appointed under the laws of a state, does not, by virtue of the general assignment or appointment merely, without any conveyance made by the debtor or specifically ordered by the court, acquire a title in patent-rights. *Ashcroft v. Walworth*, 1 Holmes, 152; *Gordon v. Anthony*, 16 Blatch., 234. But, in *Ashcroft v. Walworth*, Judge Shepley clearly intimated that the courts of the state might have compelled the debtor to execute such a conveyance. And the highest courts of

New York and California have affirmed the power, upon a creditor's bill, to order the assignment and sale of a patent-right for the payment of the patentee's judgment debts. *Gillette v. Bate*, 86 N. Y., 87; *Pacific Bank v. Robinson*, 57 Cal., 520.

In *Carver v. Peck*, 131 Mass., 291, the court reserved the expression of any opinion upon that question, because unnecessary to the decision. And the assumption in *Cooper v. Gunn*, etc., 4 B. Mon. (Ky.), 594, that an author could not be deprived against his will, and in favor of any of his creditors, of any of the rights secured to him by the copyright acts, was merely *obiter dictum*, unsupported by reasoning or authority.

In the case at bar, the bill is filed by a judgment creditor of the patentee, in a court of the United States of appropriate jurisdiction, against the patentee, residing within the District, and holding the entire legal title and two-thirds of the equitable interest in the patent-rights, and against the owner of an equitable interest in the remaining third, who is properly made a party to the bill. Both defendants are before the court, and have filed answers. The debtor's interest in the patent-rights is property, assignable by him, and which cannot be taken on execution at law. The case is thus brought directly within the opinion delivered by Mr. Justice Nelson, in *Stephens v. Cady*, of the soundness of which we entertain no doubt.

The clause of the decree below appointing a trustee to execute an assignment, if the patentee should not himself execute one as directed by the decree, has not been objected to in argument, and was clearly within the chancery powers of the court, as defined in the statute of Maryland of 1785, which is in force in the District of Columbia. Maryland Stat. 1785, ch. 72, secs. 7, 13, 25; 2 Kilty's Laws; Laws of District of Columbia (ed. 1868), pp. 326, 328, 333, 336.

Decree affirmed.

Sale — By order of court, § 5917.

§ 5917. A court of equity may direct the sale of the interest of an inventor in his patent in order to satisfy a judgment obtained against him in a court of law, the writ of execution having been returned *nulla bona*, and for that purpose will require the patentee to make an assignment of the patent, as provided in section 4898 of the Revised Statutes of the United States, and in default of such assignment within a limited time will appoint a trustee, with authority to execute the same. *Murray v. Ager*, 20 O. G., 1311.

Sale — Of product of patented machine, §§ 5918-5921. Of product of patented process, § 5922.
Of patented product, §§ 5923-5925.

§ 5918. An assignee of the exclusive right to make, use and vend a patented machine within a given territory may vend the product elsewhere. *Simpson v. Wilson*, 4 How., 709.

§ 5919. When the sale of the product of a patented machine is connected with the illegal use of the thing patented, the individual is responsible in damage, and an injunction will be allowed. *Boyd v. McAlpin*, 3 McL., 427.

§ 5920. Sale of product of a machine is no violation of the exclusive right to use, construct or sell the machine itself. *Ibid.*

§ 5921. Where there had been an assignment of an exclusive right in a particular territory to make and use patented means for the production of an article, *held*, that the right was not infringed by the sale within the same territory of the product of the patented means, and an injunction was refused. *Boyd v. Brown*, 3 McL., 295.

§ 5922. The sale of the product of a patented process is no infringement where the novelty is in the process and not in the product. *Goodyear v. The Railroad*, 2 Wall. Jr., 356.

See *Process and Product*, § 5111.

§ 5923. A patentee cannot divide his process and product patent in numerous licenses so as to bind purchasers of the product. Every person who pays patentee for a license to use his process becomes the owner of the product and may sell it to whom he pleases, or apply it to

any purpose, unless he binds himself by covenants to restrict his right. *Metropolitan Washing Machine Co. v. Earle*, 3 Wall. Jr., 320.

§ 5924. Whether the inventor has a patent for the article manufactured, or only for the product or the material of which it is composed, the unconditional sale of the manufactured article carries with it the absolute dominion over the material as well as over the manufactured article. *Goodyear v. Beverly Rubber Co.*, 1 Cliff., 348.

§ 5925. Where defendants purchased the patented product of plaintiff's patented process, and modified the product by a different process, *held*, that the patented product became the purchasers' absolute property, and their subsequent use of it for other purposes was no infringement. *Ibid.*

Sale — Unrestricted, of patented articles — Passes unlimited right of user, §§ 5926-5932.

Sale by one not having an exclusive right, § 5933. *Qualified sale*, § 5934. *Licensed to be used once*, §§ 5935, 5936. *Unwarranted sale*, § 5937. *Sale abroad*, § 5938. See *Purchaser*, §§ 5186-5201.

§ 5926. An unrestricted sale of a patented article carries with it the right to its unlimited use; but the reason upon which this rule rests involves a plain distinction between the right to use and the right to manufacture and sell the invention, and is inapplicable to their definition. *Hatch v. Adams*, 22 Fed. Rep., 434.

§ 5927. Unconditional sale of a patented article confers the whole title therein, and impliedly warrants full ownership on the part of the vendor. *Holliday v. Matheson*, 30 O. G., 452.

§ 5928. When a patentee sells the patented article he parts with all his control over it, and the purchaser may treat it like any other property, and use it as long as it lasts without liability to the patentee, although the original term of the patent has expired and it has been extended. *Mitchell v. Hawley*, 16 Wall., 544.

§ 5929. The purchaser has the same right in the article if the person from whom he obtained it was authorized by the patentee, without any conditions, to make and sell or make and use it. *Ibid.*

§ 5930. When a patentee has constructed a machine, and sold it without any conditions, or authorized another to construct, sell, and deliver it, or construct and use and operate it without any conditions, and the consideration has been paid to him for the thing patented, the rule is well established that he must be understood to have parted to that extent with all his exclusive right, and that he ceases to have any interest whatever in the patented machine so sold and delivered, or authorized to be constructed and operated. When such circumstances appear, the owner of the machine, whether he built it or purchased, if he has also acquired the right to use and operate it during the life-time of the patent, may continue to use it until it is worn out, in spite of any and every extension subsequently obtained by the patentee or his assigns. *Wooster v. Siedenbergh*, 13 Blatch., 88.

§ 5931. When a patented article is made and sold by one who has authority to do so, it becomes like other property, and no use or sale of it afterward is an infringement of the patent. *Adams v. Burks*, 1 Holmes, 40; *Hawley v. Mitchell*, 1 Holmes, 42.

§ 5932. When the owner of a patent himself sells a machine constructed for the purpose of using his invention, he is understood to have to that extent parted with his exclusive right to his invention. *Detweiler v. Voegel*, 19 Blatch., 482.

See *Purchaser*, §§ 5188-5193.

§ 5933. A sale by the patentee of the machine gives an implied right to use it. But this inference does not necessarily follow, where the sale is made by a person who has no exclusive right, but a license merely of use, in which latter case the extent of the transfer must depend upon the facts and circumstances proved. *Wilson v. Stolley*, 4 McL., 275.

§ 5934. Where the owner of the patent sells the patented article under circumstances which imply that the purchaser is not to acquire an unqualified property in it, as where a license accompanies the transfer, the purchaser's rights are limited to the extent of the monopoly granted to him. *Holliday v. Matheson*, 24 Fed. Rep., 185.

§ 5935. A buckle or bale-tie, sold for ordinary commercial use, passes beyond the monopoly of the patent, and cannot be followed or controlled in its subsequent disposition. *American Cotton-Tie Co. v. Simons*, 13 O. G., 967.

§ 5936. Though the words "Licensed to use once only" were stamped upon the buckles, and words of like import were contained in the bill-heads and invoices, the nature of the article and of its use are such that there is an implied parting with the unrestricted title at the time of sale, which is inconsistent with any such reservation or limitation. *Ibid.*

See *Re-use*, §§ 5864-5866.

§ 5937. A sale of patented articles in the ordinary course of trade, outside the territorial limits to which the right of sale is restricted by the patentee's grant, is unwarranted. *Hatch v. Adams*, 22 Fed. Rep., 434.

§ 5938. Unconditional sale of a patented article, even where the sale was in a foreign country, is good everywhere and carries the right to use or sell for use anywhere. *Holliday v. Matheson*, 30 O. G., 452.

Sale — In general — *Sale prior to patenting*, § 5939. *Sale for limited use*, § 5940. *Right to use during extension*, § 5941. *Sale to patentee no infringement*, § 5942. *Sale of fraudulent patent*, § 5943. *Acquiescence in sale under foreclosure*, § 5944.

§ 5939. Sale of an invention prior to patenting is recognized as valid by act 1839, section 7. *Rathbone & Co. v. Orr*, 5 McL., 131.

§ 5940. A sale of an invention to be used in making brushes does not authorize the use of it in making mirrors. *Clark v. Scott*, 9 Blatch., 301.

§ 5941. Under a sale of a patented machine from an assignee the purchaser has a right to use it during the extended term of the patent, notwithstanding any words of limitation in the conveyance to the assignee restricting his rights to the original term. *Hawley v. Mitchell*, 1 Holmes, 42.

§ 5942. The sale of a patented article to the patentee or his agent is not *per se* an infringement, and damages cannot be recovered. It may, however, be evidence of infringement if accompanied by other circumstances. *Byam v. Bullard*, 1 Curt., 100.

§ 5943. Where defendant purchased a patent-right covering the whole machine, in the belief that he was entitled to the whole, whereas plaintiff, his vendor, had knowingly included in his patent, together with his improvement, that which had been previously patented to another, *held*, that the sale was a fraud, and a promissory note given in part consideration thereof was void in law. *Turner v. Johnson*, 2 Cr., 287.

§ 5944. Circumstances amounting to acquiescence in sale under foreclosure of patented machines, *held* to have same effect as if owner of the patent had himself sold the machines to defendants and given them the right to use them. *Detweiler v. Voegel*, 19 Blatch., 482.

See *Assignment*, § 517. *Attorney*, § 579. *Damages and Profits*, § 1474. *Title*, § 6313.

324. SCOPE OF PATENT.

Scope of patent — Patentee is entitled to all the uses of which his patented invention is capable, §§ 5945-5950. See *Construction of Patents*, §§ 1146-1256. *Invention*, §§ 3576-3583. *Inventor*, §§ 3777-3780. *Patents*, § 4755.

§ 5945. The man who has made the first invention has made it for all the uses to which it is applicable. *Woodman v. Stimpson*, 3 Fish., 98.

§ 5946. Patentee is entitled to every use to which his invention may be applied. *Union Stone Co. v. Allen*, 14 Fed. Rep., 353.

§ 5947. The patentee has the benefit of all the uses to which his invention can be applied. *Chalmers Spence Patent Non-Conductor Co. v. Pierce*, 9 Fed. Rep., 152.

§ 5948. A patent secures the combination or machine patented for all purposes to which it can be put. *Zinn v. Weiss*, 7 Fed. Rep., 914.

§ 5949. The inventor is entitled to all the uses to which his invention can be applied, whether he or another conceived them. *Odell v. Stout*, 22 Fed. Rep., 159.

§ 5950. The originator of a patented invention has an exclusive right in it, although he may not have contemplated all the uses to which it is applied. *McComb v. Brodie*, 1 Woods, 153.

§ 5951. The inventor of a machine is entitled to the benefit of all the uses to which it can be put, no matter whether he had conceived the idea of the use or not. *Roberts v. Ryer*, 1 Otto, 150.

§ 5952. The patentee is entitled to all the benefits which result from his invention, whether he has specified all the benefits in his patent or not. *California Artificial Stone Paving Co. v. Perine*, 7 Saw. 190.

§ 5953. A patentee is entitled to all the necessary and legitimate results attained by his invention, including even such as were unexpected. *Wells v. Jaques*, 5 O. G., 364.

§ 5954. A patentee who is the first to make an invention is entitled to his claim for all the uses and advantages which belong to it, and it is immaterial whether he perceived and stated such advantages in his patent. *Stow v. City of Chicago*, 14 Otto, 547.

§ 5955. An inventor is entitled to all the uses to which his patent may be applied, and to all the beneficial results which legitimately follow the use of his instrumentalities, as shown by the statement of his invention, and the figures used to illustrate it; and such uses and results may be stated and described in an application for reissue by the inventor, without subjecting himself to the imputation of incorporating new matter. *Putnam v. Yerrington*, 9 O. G., 689.

§ 5956. The patentee is entitled to the exclusive use of the whole of his patented invention, and if it is of a combination of numerous parts, including in it other new and useful combinations of less of the parts, he seems to be entitled to the exclusive use of these lesser combinations, as well as to the exclusive use of the whole. *Holly v. Vergennes Machine Co.*, 18 Blatch., 327.

§ 5957. Where a patent clearly shows and describes a machine whose use necessarily involves the production of a certain process, no other person can afterward patent that process. The first patentee is entitled to his mechanism for every use of which it is capable, even though he did not foresee all of them. *New Process Fermentation Co. v. Koch*, 21 Fed. Rep., 580.

§ 5958. The invention patented, when for a machine, is the machine itself, and the inventor is entitled to the exclusive use of it — if that invention is a machine, for all the uses and purposes to which that machine, without the exercise of any inventive power, can be applied. *Conover v. Roach*, 4 Fish., 12.

§ 5959. There is no doubt that the patent would give an exclusive right to the patented invention for all uses to which it could be put, whether contemplated by the inventor or discovered by himself or others afterwards. But the invention must in some way be covered by the patent before he can acquire an exclusive right to it for any purpose. *Tinker v. Wilber Eureka M. & R. Mfg. Co.*, 1 Fed. Rep., 138.

§ 5960. A patentee has the exclusive right to all the forms of his device in which the principle of his invention may be embodied, and, although he has described but one of those forms, those who use any other trespass upon his right. *Murphy v. Eastman*, 1 Holmes, 113.

See *Composition of Matter*, § 1144.

Scope of patent — Its limitation — *The patent is limited to the invention patented*, §§ 5961-5970. *Permissible modifications in construction*, § 5971.

§ 5961. Where the inventor is not the first in the field of invention, he is entitled only to his particular means or instrumentalities. *Morgan Elevated R'y Co. v. Pullman*, 14 Fed. Rep., 648.

§ 5962. When a patent is granted, patentee must stand by his patent. He gains no exclusive right except for such a machine as his patent describes and secures, though it may be far less broad and comprehensive than his actual invention. *Waterbury Brass Co. v. Miller*, 9 Blatch., 77.

§ 5963. An inventor must be taken to know of what his invention consists, and his patent does not secure to him the exclusive right to anything more than he claims to have invented. *Rich v. Close*, 8 Blatch., 41.

§ 5964. The scope of a patent must be determined by its claims, and it does not necessarily cover all the descriptive matter in the specification. *McMillan v. Rees*, 1 Fed. Rep., 722.

§ 5965. In the case of patented chemical combinations, the exclusive right to the invention imports nothing but protection against the use of the same, or substantially the same elements compounded and treated on principles substantially the same as those of the patented article. *Goodyear v. Berry*, 2 Bond, 189.

§ 5966. A patent for a mechanical structure producing a new and useful result is no protection against the use of an invention producing the same result by appliances and on principles substantially different from the patented invention. *Ibid.*

§ 5967. A patent for a particular structure, intended to accomplish a particular end, does not necessarily import an exclusive right to every possible mode of accomplishing the same. *Blanchard v. Puttman*, 2 Bond, 84.

§ 5968. A patent for a mechanical structure, or a process to effect a specific purpose, does not embrace every possible means of effecting the same result. . . . A patentee is protected from the use of all plans or devices, which, however seemingly different from the patented invention, are the same in principle and operation. *Whitney v. Mowry*, 2 Bond, 45.

§ 5969. Illustration of modification not involving invention covered by and within the scope of a patent. *Barker v. Stowe*, 15 Blatch., 49.

§ 5970. No patentee is held, in reducing his patent to application, to strictly and entirely follow the mere mechanical device shown in his drawings of the patent. He may deviate so long as he does not violate the principle involved. *Weir v. North Chicago Rolling Mill Co.*, 9 Biss., 508.

§ 5971. A patentee is not limited to the literal import of his description of his invention, but in construction he may make such modifications of it as do not involve a departure from its principle or a material change in its mode of operation. *Grier v. Castle*, 17 Fed. Rep., 523.

See *Construction of Patents*, § 1186. *Process*, § 5044.

Scope of patent — Generally — *Patent is for the discovery described*, § 5972. *In view of state of art at date of invention*, § 5973. *Secures the means patented, not the result*, §§ 5974, 5975; *and the particular devices*, §§ 5976-5978; *and equivalents*, § 5979.

§ 5972. The grant of the patent can only be for the discovery as recited and described in the patent and specification. *Evans v. Eaton*, Pet. C. C., 322.

§ 5973. It is what was known at the date of completed invention, and not when the application was filed, which fixes the scope of a patent. *Sprague v. Adriance*, 14 O. G., 308.

§ 5974. The patent secures the means specified to obtain the result, not the result. *American Pin Co. v. Oakville Co.*, 3 Blatch., 190.

§ 5975. It is the mechanism or contrivance claimed in a patent which is appropriated under it, and not the purpose for which it is intended, nor the results it produces. *Merrill*, 1 MacArth., 301.

§ 5976. A patent covers only the devices which are claimed, although others are described by way of explaining them or illustrating the way in which they operate. *Wheeler v. McCormick*, 11 Blatch., 334.

§ 5977. A patent is not for what is described, suggested or hinted at anywhere in the patent, but is for what is fairly described somewhere and covered by the claims of the patent, although the whole is to be looked at in order to ascertain what the claims do really cover. *White v. Gleason Manufacturing Co.*, 8 Fed. Rep., 917.

§ 5978. The scope of a patented invention may be so narrowed by the prior state of the art that infringement cannot be adjudged to exist unless there has been an appropriation in substantial form of construction of the identical elements which the inventor had a right to claim as new in his patent. *Saladee v. Racine Wagon & Carriage Co.*, 20 Fed. Rep., 686.

§ 5979. A patent, in calling for a specific mode, embraces in law all mechanical equivalents; consequently all modes, however changed in form, which act substantially on the same principle and effect the same end, are within the patent. *Pitts v. Edmunds*, 1 Biss., 168.

Scope of patent — Generally — Limitations generally, §§ 5980-5984.

§ 5980. Patent claiming entire machine is good for the actual invention only. *Goodyear v. Mathews*, 1 Paine, 300.

§ 5981. The discovery of a new mode of operating an old machine to produce a new result does not give the inventor the right to a monopoly of the old machine. *Elastic Fabrics Co. v. Rubber Thread Co.*, 1 Holmes, 372.

§ 5982. No one can take something old and apply it in a new way or in a new form, so as to produce a particular result, and be protected beyond the particular way or form or device, and the application which he has made. *Fuller v. Yentzer*, 6 Biss., 203.

§ 5983. A patent protects the essential structure of an invention, but exterior form, painted color and such non-essentials cannot be the subject of the patent, and an imitation of the latter will not be enjoined. *Fairbanks v. Jacobus*, 14 Blatch., 337.

§ 5984. Where a result similar to that of the patent has been once obtained by one kind of a joint, the invention of a special joint for producing the same result does not make the patent cover a function. The field is still open for others to make other joints to be used in the same place, for accomplishing the same result. *Pattee v. Moline Plow Co.*, 10 Biss., 377.

325. SECRETARY OF THE INTERIOR.

See APPEAL FROM COMMISSIONER, TO SECRETARY OF INTERIOR.

SUMMARY (*BUTTERWORTH v. UNITED STATES ex rel. HOE*, §§ 5985-5993) — *Mandamus*, § 5985. — *Secretary's authority*, § 5986. — *Liability of public officer to judicial process*, § 5987. — *Appeal to supreme court of District of Columbia*, § 5988. — *Revised Statutes, section 4918, considered; interfering patents*, § 5989. — *Appeal from commissioner to secretary*, § 5990. — *History of legislation*, § 5991. — *Commissioner's powers*, §§ 5992, 5994. — *Bill in equity to obtain patent*, § 5993.

BUTTERWORTH v. UNITED STATES ex rel. HOE.

(112 U. S., 50-69; 29 Official Gazette, 615-620. 1884.)

ERROR to the Supreme Court of the District of Columbia.

Opinion by MR. JUSTICE MATTHEWS.

STATEMENT OF FACTS.— This is a writ of error prosecuted for the purpose of reviewing and reversing the judgment of the supreme court of the District of

Columbia awarding a peremptory *mandamus* commanding the plaintiff in error, the commissioner of patents, to receive the final fee of \$20 tendered by the relators, and cause letters patent of the United States to R. Hoe & Co., as assignees of Gill, to be prepared and sealed according to law, for a certain invention therein particularly described, and to be presented to the secretary of the interior for his signature.

The facts upon which the controversy arises are shown by the record to be as follows: On March 12, 1881, Gill, one of the relators, made application in due form to the commissioner of patents for letters patent for certain new and useful improvements in printing machines, of which he claimed to be the original and first inventor. An interference was declared with an unexpired patent, No. 238,720, granted to Walter Scott, March 8, 1881. A hearing was had before the examiner of interferences, who decided in favor of Scott, and, on appeal to the examiners-in-chief, that decision was affirmed. An appeal from that decision was taken by Gill to the commissioner of patents, who decided that Gill was the original and first inventor of the improvements claimed, and was entitled to a patent therefor, and on June 4, 1883, adjudged that such patent should issue to the relators composing the partnership of R. Hoe & Co., as assignees of Gill, the inventor.

On June 14, 1883, an appeal was taken by Scott from that decision of the commissioner of patents to the secretary of the interior, under rules prescribed by that officer, dated May 17, 1883, who, on March 7, 1884, reversed the decision of the commissioner of patents in favor of Gill, adjudged Scott to be the original and first inventor of the improvements claimed, and that Gill was not entitled to a patent therefor.

In his return to the alternative writ the commissioner of patents, admitting that he had refused, in compliance with the demand of the relators, to accept their tender of the final fee, and to prepare the patent for signature, and to take any further steps therein, declares "that he so refused, not because he desired to make further inquiry, or to be further advised in that behalf, no motion or other proceeding for rehearing or review had been taken or was pending before him in that behalf, but that he based his refusal, and does so still, solely upon the ground that the honorable the secretary of the interior had entertained the appeal taken to him from said decision under the rules aforesaid, and had, in pursuance of said appeal, entered a decision reversing that of the commissioner of patents, and awarded priority of invention to Walter Scott."

The return proceeds as follows: "Your respondent further says that for many years, and until 1881, it was held, in pursuance of decisions and opinions of the honorable attorney-general made in that behalf, that the honorable the secretary of the interior had, and therefore has, no legal authority to review on appeal a decision of the commissioner of patents, wherein the commissioner has finally adjudged an applicant to be entitled to a patent as prayed for in his application; in other words, that the judgment of the commissioner of patents upon the right of an applicant to have and receive a patent is final and conclusive, subject only to review by the supreme court of the District of Columbia, and such other courts as have jurisdiction in that behalf, and by the commissioner; and the practice of the patent office and the honorable the secretary of the interior conformed thereto. This question, however, was again raised in the cases of *Nicholson v. Edison* and *Le Roy v. Hopkins*, and the honorable the attorney-general of the United States, to whom the question

was again referred, in an opinion signed on the 20th day of August, 1881, held that the honorable the secretary of the interior had and could, on appeal to him, exercise the jurisdiction to review the decision of the commissioner of patents, and control his action in that behalf; and later, on, to wit, the 26th day of February, 1884, the honorable secretary, in an official letter (a copy of which is hereto attached marked "E"), advised your respondent that he, the honorable secretary, had, in pursuance of the opinion of the honorable attorney-general, exercised jurisdiction on appeal from the judicial action of the commissioner in determining questions devolved upon him by the statute.

"In deference to that opinion and the action of the honorable the secretary of the interior in the case under consideration, your respondent refused, and does refuse, to accede to the demand of the relator. That, in view of the decisions and the uniform practice of the commissioners of patents and the heads of the department of the interior prior to 1881, doubt and uncertainty have arisen touching the legal obligations devolving upon your respondent in the case under consideration, and those of like character.

"Your respondent further says that if the judgment of the commissioner of patents, which is, that the relator is entitled to receive his patent as prayed for, is final, and if upon such judgment it is the lawful duty of the respondent to accept said final fee and take the necessary and proper steps to prepare said patent for issue, as prayed, then your respondent has improperly refused, and does improperly refuse, to prepare said patent for issue; but if his decision is subject to review and reversal on appeal to the honorable the secretary of the interior, then such refusal on the part of your respondent to accept said fee and prepare said patent for issue is right and proper."

The return of the commissioner also sets out as exhibits the decision of his predecessor in office awarding priority of invention to Gill and adjudging him to be entitled to a patent; the appeal of Scott to the secretary of the interior; the rules governing such appeals as adopted and promulgated by that officer; the decision on that appeal by the secretary communicated by letter to the commissioner, reversing the decision of the commissioner and awarding priority of invention to Scott, and a subsequent letter of the secretary to the commissioner, dated February 26, 1884, in which he states that at the request of his predecessor, Mr. Kirkwood, in connection with the cases of *Nicholson v. Edison* and *Le Roy v. Hopkins*, the attorney-general considered the question as to the extent of the supervisory authority of the secretary over the acts of the commissioner, and, in an opinion dated August 20, 1881, reached the conclusion that the final discretion in all matters relating to the granting of patents is lodged in the secretary of the interior; that Secretary Kirkwood concurred in that opinion, and from that time to the present, appeals from the judicial action of the commissioner of patents have been considered by the secretary of the interior; that the attention of congress was particularly directed to this new practice in the annual report of the secretary of the interior for 1881, and that there has not since been any legislative expression of dissent from the interpretation the existing law had received; and that he does not feel justified in discontinuing a practice which he finds thus established.

§ 5985. *Mandamus will not lie to compel a public officer to do a particular thing which his superior in authority has lawfully ordered him not to do.*

It is clear enough that if the action of the commissioner of patents, in the matter of controversy, is subject to the order of the secretary of the interior,

the judgment of the supreme court of the District of Columbia must be reversed, for *mandamus* evidently will not lie to compel a public officer to do a particular thing which his superior in authority has lawfully ordered him not to do. The direct and immediate question, therefore, for our determination, is, whether the secretary of the interior had power by law to revise and reverse the action of the commissioner of patents in awarding to Gill priority of invention and adjudging him entitled to a patent.

§ 5986. *Authority and power of the secretary of the interior considered.*

The authority and power claimed for the secretary of the interior are asserted and maintained upon these general grounds: that he is the head of the department of which the patent office is a bureau; that the secretary is charged by section 441, Revised Statutes, with the supervision of public business relating to patents for inventions, in the same terms and in the same sense as in the cases of the various other subjects which in that section are classed together, to wit, the census, the public lands, the Indians, pensions and bounty lands, the custody and distribution of publications, etc.; that, by section 4883, it is required that all patents shall be signed by the secretary, as the responsible representative of the government, in whose name the grant is made, and countersigned by the commissioner of patents, only to attest the act of his superior; that, by section 481, while the commissioner is required to superintend or perform all duties respecting the granting and issuing of patents directed by law, it is thereby also provided that it must be under the direction of the secretary of the interior—a clause to be read, it is argued, as if it were expressly inserted as a qualification of every statutory duty imposed upon the commissioner; that, by section 483, the regulations which, from time to time, the commissioner may establish for the conduct of proceedings in the patent office are subject to the approval of the secretary; that, by section 487, the reasons for the refusal of the commissioner to recognize any person as a patent agent, either generally or in any particular case, are subject to the approval of the secretary; that this general relation of official subordination, with the accompanying powers of supervision and direction, extends to all the official acts of the commissioner, without regard to any distinction between those which are merely ministerial and those which are judicial in their nature; and that such supervision and direction may be exerted at any stage of a proceeding, in the discretion of the secretary, whether in advance, or during its progress, or after its termination, and embraces, therefore, the mode of appeal, though no appeal, in express terms, is actually given.

And it is claimed that this conclusion is strengthened by the analogy of the other bureaus forming parts of the various executive departments of the government, like that, for example, of the general land office, the commissioner of which is by law subject to the supervision of the secretary of the interior, in respect to which it was decided, in *Magwire v. Tyler*, 1 Black, 195, approved and affirmed in *Snyder v. Sickles*, 98 U. S., 203, that the power of supervision and appeal vested in the secretary extends to all matters relating to the general land office, and is co-extensive with the authority of the commissioner to adjudge.

In reference to this argument from the analogy of the general relation of the heads of executive departments to their bureau officers, it may as well be observed, in this connection, that, although not without force, it will be very apt to mislead, unless particular regard is had to the nature of the duties intrusted to the several bureaus, and critical attention is given to the language

of the statutes defining the jurisdiction of the chief and his subordinates, and the special relation of subordination between them respectively; for it will be found, on a careful examination, too extensive and minute to be entered upon here, that the general relation between them of superior and inferior is varied by the most diverse provisions, so that, in respect to some bureaus, the connection with the department seems almost clerical and one of mere obedience to direction, while in that of others the action of the officer, although a subordinate, is entirely independent, and, so far as executive control is concerned, conclusive and irreversible. And in respect to the particular illustration drawn from the relation of the general land office to the department of the interior, the language of the section of the Revised Statutes (section 453) describes the duties of the commissioner, to be performed under the direction of the secretary, as executive duties, while those which relate to the decision of questions of private right under the pre-emption laws, being *quasi-judicial*, are made by section 2273 expressly subject to an appeal, first from the register and receiver to the commissioner, and from him to the secretary. *Lyttle v. Arkansas*, 9 How., 314; *Barnard's Heirs v. Ashley's Heirs*, 18 How., 43. Each case must be governed by its own text, upon a full view of all the statutory provisions intended to express the meaning of the legislature.

To determine that intention of the legislature in reference to the principal question in the present case, it becomes important, in the first place, to obtain a clear idea of the nature and extent of the jurisdiction involved in the claim, that all the official acts of the commissioner of patents are subject to the direction and superintendence of the secretary of the interior.

§ 5987. *It is a maxim of the law, admitting few if any exceptions, that every duty laid upon a public officer, for the benefit of a private person, is enforceable by judicial process.*

If the secretary is charged by law with the performance of such a duty, he is bound to fulfill it. It is imperative, not discretionary. He cannot discharge it, according to the intention of the statute, in a manner either arbitrary or perfunctory. While it may be admitted that, so far as the public alone have an interest in the proper performance by the commissioner of his duties in the administration of his bureau, the secretary might satisfy his duty of direction and superintendence by prescribing general rules of conducting the public business and securing, by general oversight, conformity to them; yet, on the other hand, it must also be admitted, that whenever a private person acquires by law a personal interest in the performance by the commissioner of any act, he thereby also acquires an individual interest in the direction and supervision of the secretary, to correct any error, or supply any omission or defect in its performance, tending to his injury. It is a maxim of the law, admitting few if any exceptions, that every duty laid upon a public officer, for the benefit of a private person, is enforceable by judicial process. So that the secretary would be bound, upon proper application, in every such instance, to inquire into, and, if necessary, redress, the alleged grievance. And hence the official duty of direction and supervision on the part of the secretary implies a correlative right of appeal from the commissioner, in every case of complaint, although no such appeal is expressly given. Such, indeed, is the practical construction put by the secretary himself upon his own powers and duties; for the rules governing appeals to the secretary of the interior in patent cases, made part of the return here, assume the equal right of all parties to the proceeding, whether *ex parte* or otherwise, to obtain his review of the action of

the commissioner, not only in the final judgment, but upon all interlocutory questions material to the matter, to the decision of which exceptions have been duly taken during the progress of the inquiry.

It is further to be observed, in the same connection, that if the power and duty of the secretary, in directing and superintending the performance by the commissioner of his duties, and those of all other subordinates in the bureau, may be exercised in the form of appeal, it may also be exercised in any other mode, in the discretion of the secretary, suitable to the end in view; for, if directing and superintending includes review by appeal after a decision, they may as well embrace dictating, either in advance of action or from time to time, during its course and progress. So that it follows in every case of an application for a patent, or for a reissue, or for an extension, or in cases of an interference, the secretary may direct the matter to be heard before himself, and thereupon further direct what decision shall be rendered in each matter by the commissioner, so as to meet his approval. This right of interposition, at any stage of the proceeding, is explicitly maintained in the opinion of attorney-general of August 20, 1881, which was made the basis for the reversal of the previous practice of the department in this particular, as will appear by the following extract: "From the right and power of the secretary to withhold his signature from the patent, unless he is satisfied of the claimant's title thereto, plainly follows an equal right to direct the commissioner, while the proceedings are pending, to receive an amendment which will open up a line of evidence that may throw light on that title."

We are led, therefore, immediately to inquire whether such a construction of phrases, employed in establishing the organization of the patent office as a bureau in the department of the interior, is justified by a view of the whole legislation *in pari materia*, and consistent with the integrity of the system of the statutes in relation to letters patent for new and useful inventions. The general object of that system is to execute the intention of that clause of the constitution, article I, section VIII, which confers upon congress the power "to promote the progress of science and useful arts, by securing for limited times to authors and inventors the exclusive right to their respective writings and discoveries."

The legislation based on this provision regards the right of property in the inventor as the medium of the public advantage derived from his invention; so that in every grant of the limited monopoly two interests are involved — that of the public, who are the grantors, and that of the patentee. There are thus two parties to every application for a patent, and more, when, as in case of interfering claims or patents, other private interests compete for preference. The questions of fact arising in this field find their answers in every department of physical science, in every branch of mechanical art; the questions of law, necessary to be applied in the settlement of this class of public and private rights, have founded a special branch of technical jurisprudence. The investigation of every claim presented involves the adjudication of disputed questions of fact, upon scientific or legal principles, and is, therefore, essentially judicial in its character, and requires the intelligent judgment of a trained body of skilled officials, expert in the various branches of science and art, learned in the history of invention, and proceeding by fixed rules to systematic conclusions.

Accordingly it is provided in the statutes (R. S., sec. 4893) that on the filing of any application for a patent the commissioner shall cause an examination to be made of the alleged new invention or discovery, and if on examina-

tion it shall appear that the claimant is justly entitled to a patent under the law, and that the same is sufficiently useful and important, the commissioner, not the secretary, shall issue a patent therefor, although it must be signed by the secretary. The claim is examined in the first instance by a primary examiner assigned to the class to which it belongs; if twice rejected by him, the applicant is entitled (R. S., sec. 4909) to appeal from his decision to that of the board of examiners-in-chief, constituted a tribunal for that purpose; and from their decision, if adverse, he may appeal to the commissioner in person. R. S., sec. 4910.

§ 5988. *Appeal to supreme court of District of Columbia (R. S., sec. 4911).*

If dissatisfied with his decision, the party, except in cases of interference, in respect to which another provision is made, hereafter to be considered, may appeal to the supreme court of the District of Columbia. R. S., sec. 4911. To that appeal the commissioner is a formal party, the court acting only on the evidence adduced before him, and confining its revision to the points set forth in the reasons of appeal. A certificate of its proceedings and decision is to be returned to the commissioner and entered of record in the patent office, and shall govern — so the statute says — the further proceedings in the case, but without precluding, it continues, any person interested from the right to contest the validity of such patent in any court wherein the same may be called in question.

It is evident that the appeal thus given to the supreme court of the District of Columbia from the decision of the commissioner is not the exercise of ordinary jurisdiction at law or in equity on the part of that court, but is one step in the statutory proceeding under the patent laws whereby that tribunal is interposed in aid of the patent office, though not subject to it. Its adjudication, though not binding upon any who choose by litigation in courts of general jurisdiction to question the validity of any patent thus awarded, is, nevertheless, conclusive upon the patent office itself, for, as the statute declares (R. S., sec. 4914), it “shall govern the further proceedings in the case.” The commissioner cannot question it. He is bound to record and obey it. His failure or refusal to execute it by appropriate action would undoubtedly be corrected and supplied by suitable judicial process. The decree of the court is the final adjudication upon the question of right; everything after that dependent upon it is merely in execution of it; it is no longer matter of discretion, but has become imperative and enforceable. It binds the whole department, the secretary as well as the commissioner, for it has settled the question of title, so that a demand for the signatures necessary to authenticate the formal instrument and evidence of grant may be enforced. It binds the secretary by acting directly upon the commissioner, for it makes the action of the latter final by requiring it to conform to the decree.

Congress has thus provided four tribunals for hearing applications for patents, with three successive appeals, in which the secretary of the interior is not included, giving jurisdiction, in appeals from the commissioner, to a judicial body, independent of the department, as though he were the highest authority on the subject within it. And to say that, under the name of direction and superintendence, the secretary may annul the decision of the supreme court of the District, sitting on appeal from the commissioner, by directing the latter to disregard it, is to construe a statute so as to make one part repeal another, when it is evident both were intended to co-exist without conflict.

The inference is that an appeal is allowed from the decision of the commis-

sioner refusing a patent, not for the purpose of withdrawing that decision from the review of the secretary, under his power to direct and superintend, but because, without that appeal, it was intended that the decision of the commissioner should stand as the final judgment of the patent office, and of the executive department, of which it is a part.

As already stated, the case of interferences is expressly excepted by section 4911 from the appeals allowed to the supreme court of the District. Further provision, covering such and also all other cases in which an application for a patent has been refused, either by the commissioner of patents or by the supreme court of the District, is found in Revised Statutes, section 4915. It is thereby provided that the applicant may have remedy by bill in equity. This means a proceeding in a court of the United States having original equity jurisdiction under the patent laws, according to the ordinary course of equity practice and procedure. It is not a technical appeal from the patent office, like that authorized in section 4911, confined to the case as made in the record of that office, but is prepared and heard upon all competent evidence adduced and upon the whole merits. Such has been the uniform and correct practice in the circuit courts. *Whipple v. Miner*, 15 Fed. Rep., 117; *Ex parte Squire*, 3 Ban. & A., 133; *Butler v. Shaw*, 21 Fed. Rep., 321. It is provided that the court, having cognizance thereof, on notice to adverse parties and other due proceedings had, may adjudge that such applicant is entitled, according to law, to receive a patent for his invention, as specified in his claim, or for any part thereof, as the facts in the case may appear. And such adjudication, if it be in favor of the right of the applicant, shall authorize the commissioner to issue such patent on the applicant filing, in the patent office, a copy of such adjudication, and otherwise complying with the requirements of law. And in all cases where there is no opposing party a copy of the bill shall be served on the commissioner, and all the expenses of the proceeding shall be paid by the applicant, whether the final decision is in his favor or not.

It thus appears that, as, in cases of other applications for a patent refused by the commissioner, the judgment, on a direct appeal, of the supreme court of the District is substituted for and becomes the decision of the patent office, so here, in cases of interference, where the commissioner has rejected an application for a patent, the decree of the circuit court of the United States governs the action of the commissioner, and requires him, in case the adjudication is in favor of the complainant, to issue the patent as decreed to him. It certainly cannot be successfully claimed that, to a writ of *mandamus* issued out of a court of competent jurisdiction, commanding the commissioner of patents to record and execute the judgment of the supreme court of the District, reversing, on an appeal, his decision refusing a patent in any case other than an interference, or the decree of a circuit court of the United States in any case under section 4915, Revised Statutes, requiring a patent to be issued to the claimant, it would be a sufficient answer that he had been directed by the secretary of the interior not to do so. If not, it must be, and is, because the decision of the commissioner, as originally rendered, or that correction of it required by the judicial proceedings, specified in the two sections of the statutes referred to, is final and conclusive upon the department.

§ 5989. *Section 4918, Revised Statutes, considered.*

This conclusion is strengthened by the provisions of section 4918, Revised Statutes. It is there enacted that, in case a patent is actually, though erroneously, issued, interfering with another, any person interested in any one of

them, or in the working of the invention claimed under either of them, may have relief against the interfering patentee, and all parties interested under him, by suit in equity against the owners of the interfering patent; and the court, on notice to adverse parties and other due proceedings had according to the course of equity, may adjudge and declare either of the patents void in whole or in part, or inoperative or invalid, in any particular part of the United States, according to the interest of the parties in the patent or the invention patented; of course, without prejudice to the rights of any person, except the parties to the suit, and those deriving title under them, subsequent to the rendition of the judgment.

Thus, every case is fully provided for, both when the commissioner wrongfully refuses to issue a patent, and when, in cases of interference, he erroneously issues one; and that, by means of judicial proceedings, through tribunals distinct from and independent of the patent office, the integrity and force of whose judgments would be annulled, if not regarded as conclusive upon the commissioner, notwithstanding any power of direction and superintendence on the part of the secretary, which is therefore necessarily excluded.

§ 5990. *In all matters in which the action of the commissioner is judicial or quasi-judicial, the fact that no appeal is expressly given to the secretary is conclusive that none is to be implied, and this is equally true whether or not an appeal is allowed to the courts.*

The law gives express appeals from the decision of the commissioner, or, in cases where technical appeals are not given, other modes of review by judicial process. It gives no such appeal from him to the secretary. If it exists, it is admitted it is only by an implication, which discovers an appeal in the power of direction and superintendence. That power does not necessarily, *ex vi termini*, include a technical appeal; and the principle applies that where a special proceeding is expressly ordained for a particular purpose it is presumably exclusive. It is clear that when the appeal is expressly authorized from the commissioner to the court, either directly or by means of an original suit in equity, another appeal to the secretary on the same matter is excluded; and no reason can be assigned for allowing an appeal from the commissioner to the secretary in cases in which he is by law required to exercise his judgment on disputed questions of law and fact, and in which no appeal is allowed to the courts, that would not equally extend it to those in which such appeals are provided, for all are equally embraced in the general authority of direction and superintendence. That includes all or does not extend to any. The true conclusion, therefore, is, that in matters of this description, in which the action of the commissioner is *quasi-judicial*, the fact that no appeal is expressly given to the secretary is conclusive that none is to be implied.

§ 5991. *History of the legislation.*

The conclusion is confirmed by a review of the history of legislation on the point. The first statute on the subject of patents, act of 1790, chapter 7 (1 Stat., 109), authorized their issue by the secretary of state, the secretary for the department of war, and the attorney-general, or any two of them, "if they shall deem the invention or discovery sufficiently useful and important." The act of 1793, chapter 11, which next followed (1 Stat., 318), authorized them to be issued by the secretary of state, upon the certificate of the attorney-general that they are conformable to the act. The ninth section of the statute provided for the case of interfering applications, which were to be submitted to the decision of arbitrators, chosen one by each of the parties and

the third appointed by the secretary of state, the decision or award of two of whom should be final as respects the granting of the patent.

This continued to be the law until the passage of the act of 1836, chapter 357 (5 Stat., 117), creating, in the department of state, the patent office, "the chief officer of which shall be called," it says, "the commissioner of patents," and "whose duty it shall be, under the direction of the secretary of state, to superintend, execute, and perform all such acts and things touching and respecting the granting and issuing of patents for new and useful discoveries, inventions and improvements as are herein provided for or shall hereafter be by law directed to be done and performed," etc. By that act it was declared to be the duty of the commissioner to issue a patent if he "shall deem it to be sufficiently useful and important," the very discretion previously vested in the three heads of departments by the act of 1790; and in case of his refusal the applicant was (section 7) secured an appeal from his decision to a board of examiners, to be composed of three disinterested persons, appointed for that purpose by the secretary of state, one of whom, at least, to be selected, if practicable and convenient, for his knowledge and skill in the particular art, manufacture, or branch of science to which the alleged invention appertained. The decision of this board being certified to the commissioner, it was declared that "he shall be governed thereby in the further proceedings to be had on such application." A like proceeding, by way of appeal, was provided in cases of interferences. By the sixteenth section of the act a remedy by bill in equity, as now given in sections 4915 and 4918, Revised Statutes, was given as between interfering patents or whenever an application shall have been refused on an adverse decision of a board of examiners. By the eleventh section of the act of 1839, chapter 88 (5 Stat., 354), as modified by the act of 1852, chapter 107 (10 Stat., 75), it was provided that in all cases where an appeal was thus allowed by law from the decision of the commissioner of patents to a board of examiners, the party, instead thereof, should have a right to appeal to the chief justice or to either of the assistant judges of the circuit court of the United States for the District of Columbia; and by section 10 the provisions of the sixteenth section of the act of 1836 were extended to all cases where patents are refused for any reason whatever, either by the commissioner or by the chief justice of the District of Columbia, upon appeals from the decision of the commissioner, as well as where the same shall have been refused on account of or by reason of interference with a previously-existing patent.

In this state of legislation the patent office, by the act of 1849, chapter 108 (9 Stat., 395), was transferred to the department of the interior, the secretary of which, it was enacted, "shall exercise and perform all the acts of supervision and appeal, in regard to the office of commissioner of patents, now exercised by the secretary of state;" which language, so far at least as appeals, strictly so called, are concerned, was without force, as no appeals had ever been given from any decision of the commissioner to the secretary of state, unless that can be called so which, by section 7 of the act of 1836 (5 Stat., 120), was to be determined by a board of examiners, appointed, *pro re nata*, by the secretary of state, and for which, as we have seen, an appeal to the chief justice of the circuit court of the District of Columbia had been substituted by the act of 1839. 5 Stat., 354.

The act of 1861, chapter 88 (12 Stat., 246), created the office of examiners-in-chief "for the purpose of securing greater uniformity of action in the grant

and refusal of letters patent, . . . to be composed of persons of competent legal knowledge and scientific ability, whose duty it shall be, on the written petition of the applicant for that purpose being filed, to revise and determine upon the validity of decisions made by examiners when adverse to the grant of letters patent; and also to revise and determine, in like manner, upon the validity of the decisions of examiners in interference cases, and when required by the commissioner, in applications for the extension of patents, and to perform such other duties as may be assigned to them by the commissioner; that from their decisions appeals may be taken to the commissioner of patents in person, upon payment of the fee hereinafter prescribed; that the said examiners-in-chief shall be governed in their action by the rules to be prescribed by the commissioner of patents."

The act of July 8, 1870 (16 Stat., 198), revised, consolidated and amended the statutes then in force on the subject, and the substance of its provisions, material to the present inquiry, have been carried into the existing revision.

It will be observed that the judgment and discretion, vested by the original patent law of 1790, in a majority of the three executive officers, the secretary of state, the secretary for the department of war and the attorney-general, who were authorized to cause letters patent to issue, "if they shall deem the invention or discovery sufficiently useful and important," was transferred by the act of 1836, section 7, to the commissioner of patents, it being made his duty to issue a patent for the invention, "if he shall deem it sufficiently useful and important;" and is continued in him by section 4893, Revised Statutes, the language being that he shall cause an examination to be made of the alleged new invention, "and if on such examination it shall appear that the claimant is justly entitled to a patent under the law, and that the same is sufficiently useful and important, the commissioner shall issue a patent therefor."

It thus appears, not only that the discretion and judgment of the commissioner, as the head of the patent office, is substituted for that of the head of the department, but, also, that that discretion and judgment are not arbitrary, but are governed by fixed rules of right, according to which the title of the claimant appears from an investigation, for the conduct of which ample and elaborate provision is made; and that his discretion and judgment, exercised upon the material thus provided, are subject to a review by judicial tribunals whose jurisdiction is defined by the same statute. In no event could the direction of the secretary of the interior extend beyond the terms in which it is vested—that is, to the duties to be performed under the law by the commissioner. The supervision of the secretary cannot change those duties nor require them to be performed by another, nor does it authorize him to substitute his discretion and judgment for that of the commissioner, when, by law, the commissioner is required to exercise his own, and when that judgment, unless reversed in the special mode pointed out, by judicial process, is by law the condition on which the right of the claimant is declared to depend. The conclusion cannot be resisted that, to whatever else supervision and direction on the part of the head of the department may extend, in respect to matters purely administrative and executive, they do not extend to a review of the action of the commissioner of patents in those cases in which, by law, he is appointed to exercise his discretion judicially. It is not consistent with the idea of judicial action that it should be subject to the direction of a superior,

in the sense in which that authority is conferred upon the head of an executive department in reference to his subordinates. Such a subjection takes from it the quality of a judicial act. That it was intended that the commissioner of patents, in issuing or withholding patents, in reissues, interferences and extensions, should exercise *quasi-judicial* functions, is apparent from the nature of the examinations and decisions he is required to make, and the modes provided by law, according to which, exclusively, they may be reviewed.

Such has been the uniform construction placed by the department itself upon the laws defining the relation of its executive head to the commissioner of patents. No instance has been cited in which the right of the secretary to reverse such action of the commissioner in granting or withholding a patent has been claimed or exercised prior to that based upon the opinion of Attorney-General McVeagh in 1881. The jurisdiction had been previously expressly disclaimed, in 1876, by Secretary Chandler (9 O. G., 403), and by his immediate successor, Mr. Schurz, in 1877, 1878 and 1879 (12 O. G., 475; 13 O. G., 771; 16 O. G., 220).

§ 5992. *When the commissioner of patents decided that the relators were entitled to a patent, he had fully exercised his judgment and discretion, and the ministerial duty that remained could not be avoided merely out of deference to the claim of the secretary to reverse and set aside the decision; therefore a mandamus was properly directed to the commissioner to compel him to perform his duty, to wit, to prepare the patent, to lay it before the secretary for his signature, and to himself countersign it.*

Some question is made as to the remedy. We think, however, that *mandamus* will lie, and that it was properly directed to the commissioner of patents. He had fully exercised his judgment and discretion when he decided that the relators were entitled to a patent. The duty to prepare it, to lay it before the secretary for his signature, and to countersign it, were all that remained, and they were all purely ministerial. These duties he had failed and refused to perform merely out of deference to the claim of the secretary to reverse and set aside the decision on the merits in favor of the relators. This we have held not to be a valid excuse. The case falls clearly within the principles acted upon in *Commissioner of Patents v. Whiteley*, 4 Wall., 522.

§ 5993. *Remedy by bill in equity under section 4915, Revised Statutes, not appropriate in this instance.*

The remedy by bill in equity under section 4915 is not appropriate, because it applies only when the commissioner decides to reject an application for a patent, on the ground that the applicant is not, on the merits, entitled to it. So that, if, in such a case, a decree for a patent could be considered, *ex proprio vigore*, as equivalent to a patent, or could be enforced by direct process in execution of it, nevertheless, the present is not a case where such a bill would lie.

§ 5994. *It belongs exclusively to the commissioner to decide whether a patent ought to issue.*

It is suggested that the writ was erroneously awarded by the court below, on the ground that the decision of the commissioner of patents, in favor of issuing the patent to the relators, was erroneous in law upon its face. But that question does not arise upon this record. We have adjudged that it belongs exclusively to the commissioner to decide the question for himself, whether a patent ought to issue. The statute points out the remedy for a party aggrieved by his error, if he has decided erroneously. It is not by an appeal to the

secretary; nor can the question be presented in such a proceeding as the present.

The judgment of the supreme court of the District of Columbia is consequently affirmed.

§ 5995. It is the secretary of the interior who issues the patent, and the commissioner of patents is not liable to a suit for refusing to do so. *Whitely v. Fisher*, 4 Fish., 248.

§ 5996. The secretary of the interior advised to decline to answer the question of an intending applicant, made prior to his application, as to whether or not it will be granted. *Black's Opinion*, 9 Op., 95.

See *Commissioner*, § 1096. *Errors*, §§ 2179, 2180. *Mandamus*, § 4127. *Appeal*, §§ 273-279. *Void Patent*, §§ 6727-6729.

326. SECRET INVENTION.

335. SPECIFICATION.

Specification — *Defined*, § 5997. *Is a part of the patent*, §§ 5998-6001; *except where reference is made to state of the art*, § 6002.

§ 5997. The term "specification" as employed in the patent laws has two meanings: When used without the word "claim," it means the description and claim, and when the "claim" is

mentioned in connection therewith it embraces the description alone. The word "specification," as employed in section 4916, means description and claim. *Wilson v. Coon*, 18 Blatch., 532.

§ 5998. The specification required by act 1836, section 6, is a part of the patent. *O'Reilly v. Morse*, 15 How., 62.

§ 5999. The specification forms part of the letters patent. *Hogg v. Emerson*, 6 How., 437.

§ 6000. It is proper to refer in letters patent to drawings and specifications, and these papers constitute a part of the description. *Hogg v. Emerson*, 11 How., 578.

§ 6001. The long uniform practice of filing the specification with the petition, and the treatment of them as part of and reference to them in the letters patent, sustained. *Hogg v. Emerson*, 6 How., 437.

§ 6002. The statement in a specification in reference to the state of the art, and the relation of the invention to it, is not a substantive part of the specification which by reference is embraced in the claim, but is the mere expression of the inventor's opinion. Its insertion in the reissue does not in any way affect or enlarge the claim of the original, considered or applied to it. *Reed v. Chase*, 25 Fed. Rep., 94.

Specification — Sufficient description — *What constitutes*, §§ 6003-6017. *Knowledge of the scientific principle not necessary*, §§ 6018-6021. *Sufficient description of a machine*, § 6022; *of a process*, §§ 6023-6026. *The statute*, § 6027.

§ 6003. Act 1793, section 3, "description," reviewed. *Evans v. Eaton*, 7 Wheat., 356.

§ 6004. A patentee is bound to describe in what his invention consists in such manner that it can be clearly ascertained by fair interpretation what he intends to claim. *Wyeth v. Stone*, 1 Story, 273.

§ 6005. The United States patent law requires such a description of the invention set out in the specification, that one acquainted with the art may not only understand, but may be enabled therefrom to construct the invention. *Wintermute v. Redington*, 1 Fish., 239.

§ 6006. A patentee should describe his invention with reasonable certainty. *Davoll v. Brown*, 1 W. & M., 53.

§ 6007. The meaning of the requirement of a sufficient description is that the specification may be understood by ordinary mechanics, and the thing described be made from the description and drawings. *Mabie v. Haskell*, 2 Cliff., 507.

§ 6008. A description is sufficient if it enables the court to specify the invention patented from the face of the patent and accompanying papers. *Whitney v. Emmett*, 1 Bald., 303.

§ 6009. A description, although less perfect and complete than would be desired, still, if sufficient to enable a skilful mechanic to attain the end, will not render the patent void on its face. *Carver v. Braintree Mfg. Co.*, 2 Story, 432.

§ 6010. If, with the exercise of ordinary intelligence and skill, the jury believe that the invention could be constructed from the information given by the patent, the description would be sufficient. *Judson v. Moore*, 1 Bond, 285.

§ 6011. If the specification contains such a description as will enable one skilled in the art to accomplish the desired result it is sufficient, without attempting to speculate as to the philosophy of its action. *St. Louis Stamping Co. v. Quinby*, 16 O. G., 135.

§ 6012. The description in a patent must be so full and plain that a fairly competent workman in the art could take it, and, exercising the then existing knowledge of the trade, follow it out, and by it, without invention or addition, construct an operative machine containing the parts mentioned in combination. *Webster Loom Co. v. Higgins*, 15 Blatch, 447.

§ 6013. If it requires experiment and invention to make and use the matter described, the patent is invalid. *Ibid.*

§ 6014. In the description of the improvement and directions for constructing the improved machine, it is not necessary to state those matters which it is apparent would be proper or indispensable in its structure. *Wayne v. Holmes*, 1 Bond, 27.

§ 6015. Where it appeared that a person skilled in the art would readily apply the patented apparatus in the best way for the purpose, it was held a sufficient description, although not shown in the patent drawing arranged for the usual work or in the best manner, but only for rare kinds of work. *Vogeley v. Noel*, 18 Fed. Rep., 827.

§ 6016. The specification should be construed as a whole. *Wayne v. Holmes*, 1 Bond, 27.

§ 6017. And if from the entire instrument the true nature of the improvement, with the mode of carrying it out, is disclosed, the description is sufficient. *Ibid.*

See *Composition of Matter*, §§ 1117-1120.

§ 6018. A patent is not invalid because the theory upon which the applicant's machine operates, as set forth in his specification, is erroneous, provided the machine will accomplish that of which it is represented to be capable. *Hamilton v. Ives*, 3 O. G., 30.

§ 6019. The reason which the patentee gives for the operation or use of his device is not conclusive. *Stow v. City of Chicago*, 8 Biss., 47.

§ 6020. Even if the invention fails to describe accurately the precise law which governs the proper relations and proportions of the parts of the patented invention, yet, if the patentee has obtained the practical result and taught others how to accomplish it, he has made a patentable invention, however imperfectly he may understand the philosophy of it. *Pearl v. Ocean Mills*, 11 O. G., 2.

§ 6021. It may be that an inventor does not know the scientific principle of his invention, or that, knowing it, he omitted, from accident or design, to set it forth; but the patent is not thereby vitiated if he sets forth the process or mode of operation which ends in the result and the means for working out the process or mode of operation. *Andrews v. Cross*, 19 Blatch., 294.

§ 6022. What will amount to a sufficient description of a machine. *Parks v. Booth*, 12 Otto, 96.

§ 6023. It is not necessary to describe in the specification a process well known to those skilled in the art. *Mulford v. Pearce*, 13 Blatch., 173.

§ 6024. It is a sufficient description of a process and product to describe the proportions and way of proceeding, and it is not essential to the validity of the patent to state the chemical change, the philosophy of the process. *Cahill v. Beckford*, 1 Holmes, 48.

§ 6025. It is a sufficient description of a process patent, where a fixed rule is given, which may be safely followed, while it is made known that the rule may to some extent be safely departed from. *Tilghman v. Werk*, 1 Bond, 511.

§ 6026. Courts are liberal in construing descriptions in patents where particular degrees of heat are to be employed; but some approximation ought to be indicated by the patentee, and it should not be so wide of the mark as to involve invention or frequent experiment to ascertain the proper temperature. *Flower v. Rayner*, 19 O. G., 425.

See *Process*, §§ 5036-5040, 5054.

§ 6027. The provision of the statute requiring a full and sufficient description is *express*, and it must appear that it has been complied with, or the patent is rendered a nullity. *Judson v. Moore*, 1 Bond, 285.

See *Article of Manufacture*, § 414. *Defenses*, §§ 1835, 1836, 1845-1847.

Specification — What constitutes a sufficient specification, §§ 6028-6039.

§ 6028. Specifications for an invention should be so distinct, intelligible and certain, that others beside the inventor may understand its nature and use. *Lee's Opinion*, 1 Op., 64.

§ 6029. The specifications must be so full and clear as to enable a competent person to make the compound without experiment. *Allen v. Hunter*, 6 McL., 303.

§ 6030. Patents to be valid must be so clear that by ordinary means they can be worked out by a person skilled in the art. *Downton v. Yaeger Milling Co.*, 1 McC., 26.

§ 6031. If the means known at the time of the patent were not sufficient to execute and carry out the invention, but something had to be contrived or invented to make it operative, the patent is void. *Ibid.*

§ 6032. Specifications must contain reasonable certainty, and must so describe the parts of a machine, or of the improvement, as to enable a person skilled in the construction of machines to build one. *Brooks v. Bicknell*, 3 McL., 250.

§ 6033. What degree of certainty is required in the specification stated. *Davis v. Palmer*, 2 Brock., 298.

§ 6034. Reasonable certainty as to what is claimed as new in the specification is sufficient. *Lowell v. Lewis*, 1 Mason, 182.

§ 6035. A specification in letters patent is sufficiently clear and descriptive when expressed in terms intelligible to a person skilled in the art to which the invention belongs. *Webster Loom Co. v. Higgins*, 105 U. S., 580.

§ 6036. It is not incumbent upon patentee to suggest all the possible modes by which his invention can be varied; but it is sufficient to state the modes which he contemplates to be best, and to add that he deems other mere formal variations are protected by his patent. *Carver v. Braintree Mfg. Co.*, 2 Story, 432.

§ 6037. The omission to mention in the specification something which contributes only to the degree of benefit, providing the apparatus would work beneficially and be worth adopting without it, is not fatal, while the omission of what is known to be necessary to the enjoyment of the invention is fatal. *Sewall v. Jones*, 1 Otto, 171.

§ 6038. If from the patent, specification, drawings, model and old machine, clear ideas are conveyed to men of mechanical skill in the subject-matter, by which they could make or direct the making of the machine by following the directions given, the specification is good within the acts of congress. *Whitney v. Emmett*, 1 Bald., 303.

§ 6039. The specification is intended to inform those who are skilled in the art to which it relates, and it is to be such that the process (invention) may be advantageously used by them, and if it be sufficient for their direction it is all the law requires. *Roberts v. Schreiber*, 2 Fed. Rep., 855.

See *Reissue*, §§ 5302-5304.

Specification — Sufficiency of description — *Is for the court*, §§ 6040-6042; *for the jury*, §§ 6043-6045. *How determined*, §§ 6046, 6047. *Construction of*, §§ 6048-6052.

§ 6040. Whether patentee has described the subject-matter or what he claims as his invention, so as to enable the public to know what his claim is, is in general a question of law for the court on the construction of the patent. *Forbes v. Barstow Stove Co.*, 2 Cliff., 379.

§ 6041. It is a question of law upon the construction of the terms of the patent as to whether the invention is described with reasonable certainty. *Lowell v. Lewis*, 1 Mason, 182.

§ 6042. The sufficiency of the specification in law is a question for the court; in fact, for the jury. *Whitney v. Emmett*, 1 Bald., 303.

§ 6043. The sufficiency of the description to enable a mechanic to construct the machine is for the jury to determine. *Emerson v. Hogg*, 2 Blatch., 1.

§ 6044. Whether the description is so particular as to enable a mechanic to construct the machine is a question for the jury. *Brooks v. Jenkins*, 3 McL., 432.

§ 6045. The sufficiency of the description in the specification is a matter of fact for the jury, and not of law. *Evans v. Eaton*, 7 Wheat., 356.

§ 6046. The question as to the sufficiency of the description and specification must be determined, like a question of construction, from what is written, aided by the drawings, and if need be, by the patent office model. *Hawes v. Nute*, 4 Cliff., 173.

§ 6047. To determine the sufficiency of the description of the invention, it is necessary to take the whole specification together. *Judson v. Cope*, 1 Bond, 327.

§ 6048. The description in the specifications of the operation and effect of each separate element or part of a patented combination must be read and construed with reference to the entire combination and its results, and the effect which the operation of each element or part has upon each of the others. *Hamilton v. Ives*, 3 O. G., 30.

§ 6049. A specification is to be interpreted as it is understood by an expert in the art, and includes all known equivalents of the ingredients employed; but such as were not then known and were discovered afterward may be used without infringing the patent. *Woodward v. Morrison*, 1 Holmes, 124.

§ 6050. The construction which ought to be given to the specification should not be too strict and technical. The proper inquiry is, Has the specification substantially complied with that which the public has a right to require; has the appellee communicated to the public the manner of carrying his invention into effect, so that a skilful workman can carry into execution the plan of the invention? *Stephens v. Salisbury*, 1 MacA. Pat. Cases, 379.

§ 6051. The drawing and model filed with an application are to be taken together in explanation of the specification. *Ibid.*

§ 6052. Where an invention was described in one portion of the specification as compounded of the explosive substance nitro-glycerine and an inexplusive porous substance, and in another portion of the specification a more detailed description of the porous substance was given without mentioning its inexplusive character, *held*, that the two passages are to be read together, and that the invention is a compound of nitro-glycerine with an inexplusive porous substance of the character described. *Atlantic Giant Powder Co. v. California Vigorit Powder Co.*, 6 Saw., 508.

Specification — Ambiguous, §§ 6053-6056. *Vague*, §§ 6057, 6058. *Misleading*, § 6059. *Defective*, §§ 6060-6067. *Insufficient description*, §§ 6063-6070.

§ 6053. Uncertainty in the terms of the specification will render a patent void. *Davis v. Palmer*, 2 Brock., 298.

§ 6054. Where the specification is ambiguous the patent is void. *Kneass v. Schuylkill Bank*, 4 Wash., 9.

§ 6055. The patent is not void for ambiguity because the specification merely says that the cutter is to be "hardened" without specifying what degree of hardness is to be given to it. *Monce v. Adams*, 12 Blatch., 1.

§ 6056. Unless the objection to a patent on the ground of vagueness or ambiguity in the specification is very clear and unmistakable, courts are reluctant to declare a patent void on this ground. *Swift v. Whisen*, 2 Bond, 115.

See *Composition of Matter*, §§ 1117, 1118.

§ 6057. *Held*, that where certain apertures, though not especially described in the specification, were nevertheless shown in the drawings, it removed any objection on the ground of vagueness or uncertainty in the description which might be occasioned by not stating their exact size. *Ibid*.

§ 6058. Where a description of the invention in a specification is so defective that those conversant with the art are unable, by following it, to produce the article claimed, the patent is void, as well as where no proportions are given in which the materials which form a compound are to be used, or where they are too vaguely defined. *Jenkins v. Walker*, 1 Holmes, 120.

§ 6059. Where the utility of the patented invention was demonstrated, the fact that the inventor may have, in his specification, overrated the importance of some of the elements of his invention and underrated others, *held*, not to constitute a deceptive and misleading specification. *Fire Extinguisher Case*, 21 Fed. Rep., 40.

§ 6060. A specification is not fatally defective because it does not mention such modifications as practical use would readily suggest in order to render the machine efficient, such as employing a weight or a spring, or changing the dimensions of the parts. *Union Paper Bag Co. v. Nixon*, 4 O. G., 31.

§ 6061. A defect in a specification should be clear and palpable, to justify the court in saying that the patent was a nullity. *Judson v. Moore*, 1 Bond, 285.

§ 6062. An innocently defective specification will not invalidate a patent. (Act 1793.) *Gray v. James*, Pet. C. C., 394 (*aliter*, act 1836).

§ 6063. Specification defective from insufficient description to invalidate patent must be with deceptive intent. *Park v. Little*, 3 Wash., 196; *Whittemore v. Cutter*, 1 Gall., 429.

§ 6064. A description, to invalidate a patent, must be defective, with the intent to defraud the public (act 1793). *Reutgen v. Kanowrs*, 1 Wash., 168.

§ 6065. A specification, materially defective, with intent to deceive the public, will avoid the patent (act 1793). *Lowell v. Lewis*, 1 Mason, 182.

§ 6066. A patent may be valid and operative with respect to what it claims, and still be inoperative from a defective or insufficient description, because it fails to claim as much as was really invented. *Wilson v. Coon*, 18 Blatch., 532.

§ 6067. Under act 1793, section 3, a defective specification is a good bar to an action for infringement. *Grant v. Raymond*, 6 Pet., 218.

§ 6068. The patent being for a process to be effected without any known means of accomplishing the result, but requiring inventive faculty, whereby rolls to accomplish the purposes and their modes of operation were to be determined by new inventions or discoveries, then the patent does not furnish to any one as then skilled in the art means whereby the beneficial end could be accomplished. *Downton v. Yaeger Milling Co.*, 1 McC., 26.

§ 6069. It is not a sufficiently clear specification if some very skilful artisan could make and use the invention, but persons of ordinary skill could not. The person so skilled must be able not only to construct, but to use the invention for a useful purpose. *Lippincott v. Kelly*, 1 West. L. J., 513.

§ 6070. If the invention is not described with reasonable certainty and precision, the patentee can claim nothing under his patent. *Parker v. Stiles*, 5 McL., 44.

Specification — Of an improvement, §§ 6071, 6072. *Distinguishing old parts from new*, §§ 6073-6083.

§ 6071. Section 3, act 1793, sufficient description of an improvement, reviewed. *Evans v. Hettick*, 3 Wash., 408.

§ 6072. It is the duty of the patentee, under Revised Statutes, section 4888, to point out in his specification the improvement which he claims to be his invention, and the patent must be taken as it reads in the light of common knowledge, until it is shown to cover more by those who claim it does cover more. *McCloskey v. Du Bois*, 19 Blatch., 205; 20 O. G., 371.

§ 6073. Patentee must describe in full and exact terms in what his invention consists. If for an improvement only, he should distinguish the new from the old in his specification. *Lowell v. Lewis*, 1 Mason, 182.

§ 6074. In describing an improvement of a well known machine, it is necessary only to describe the improvement, and not the entire machine. *Brooks v. Bicknell*, 3 McL., 250.

§ 6075. Although, under act 1837, a patent is not void when patentee claims more than he has invented, yet the specification must state in what the improvement consists. *Peterson v. Wooden*, 3 McL., 248.

§ 6076. The law does not require the specification to set forth the old machinery with which the new invention is to be connected. *Emerson v. Hogg*, 2 Blatch., 1.

§ 6077. Where an invention is claimed as an improvement on an old machine, it is properly

taken for granted that a practical mechanic is acquainted with the construction of the machine upon which the improvement is made. *Ives v. Hamilton*, 2 Otto, 426.

§ 6078. Patentee need not describe and disclaim all the old parts, when he particularly describes the parts he claims as inventions. *Hogg v. Emerson*, 6 How., 437.

§ 6079. Applicant need not state what parts of his invention are new and what old; he need only point out what he claims as his invention; this will be considered as claimed by him as new and the rest as old. *Corn-Planter Patent*, 23 Wall., 181.

§ 6080. A reference in general terms to the old instrument on which the patented improvement was made as "a cast-iron spoke wheel," held sufficient to enable a person skilled in the art to distinguish the old device from the improvement. *Many v. Jagger*, 1 Blatch., 372.

§ 6081. It is essential to the validity of a patent that the particular invention be pointed out and distinguished from what is old, and when the invention consists merely of a new combination of old elements or devices, where nothing is or can be claimed except the new combination, it is sufficiently described to constitute a compliance with the letter and spirit of the law if the devices of which it is composed are specifically named, their mode of operation given, and the new and useful result to be accomplished is pointed out, so that those skilled in the art and the public may know the extent and nature of the claim and what the parts are which co-operate to do the work. *Parks v. Booth*, 12 Otto, 96.

§ 6082. When a patent is obtained for parts of a machine involved with other parts which may have been used before, it is essential that the new parts should be so distinctly pointed out that the claim may not cover any old parts. *Blake v. Sperry*, 2 N. Y. Leg. Obs., 251.

§ 6083. It is sufficient for the purpose of distinguishing old parts from new in the specification and claims of a patent to describe each and all of the parts, and claim the mechanism as a whole, so constructed and operated as to produce the result set forth. *Gottfried v. Phillip Best Brewing Co.*, 17 O. G., 675.

See *Improvement*, §§ 2785-2796.

Specification — Generally — *The best method must be shown*, §§ 6084-6086. *The specification controls the grant*, §§ 6087, 6088. *Notice of defense of insufficient specification*, § 6089. 6090. *Enlargement of specification*, § 6090. *Definite description*, § 6091. See *Claims, Construction of*, §§ 743-759. *Drawings*, §§ 2066-2095. *Oyer*, § 4488. *Priority of Invention*, § 5002.

§ 6084. The patentee is bound to disclose in his specifications the best method of making his machine known to him at the time of his application. *Page v. Ferry*, 1 Fish., 298.

§ 6085. Failure to describe the best means for making a patented device will not avoid a patent, unless done with fraudulent intent. *Magic Ruffle Co. v. Douglass*, 2 Fish., 330.

§ 6086. A patentee is not obliged to state everything to which his invention is applicable in order to be protected in his exclusive right to everything to which it is applicable. *Pike v. Potter*, 3 Fish., 55.

§ 6087. Specification controls the grant. *Whittemore v. Cutter*, 1 Gall., 429.

§ 6088. The specification should maintain the patent; the latter should not indicate one thing, and the former describe another, as the subject of the grant. *Sullivan v. Redfield*, 1 Paine, 441.

§ 6089. An objection to the validity of a patent because of an insufficient specification, raised in argument, but not set up as a defense in the answer, cannot be considered. *Rubber Co. v. Goodyear*, 2 Fish., 509; 9 Wall., 793; *Wonson v. Peterson*, 13 O. G., 548.

§ 6090. The law does not permit enlargements of an original specification any more than it does in the case of reissues of patents already granted. It regards with jealousy and disfavor any attempt to enlarge the scope of an application once filed, or of a patent once granted, the effect of which would be to enable the patentee to appropriate other inventions made prior to such alteration or improvements which have gone into public use. *Railway Co. v. Sayles*, 7 Otto, 554.

§ 6091. The act of 1837 and the present statutes carefully limit the right of a party in an action to such material and substantial parts of the thing patented as could be definitely distinguished from the parts claimed without right; and where the reissue claims which might cover the infringement were so blended with other parts that they could not be distinguished therefrom, the bill was dismissed. *American Diamond Rock-Boring Co. v. Sheldon*, 33 O. G., 1598.

336. SPECIFICATIONS AND PATENTS, COPIES OF.

See COPIES, OF SPECIFICATIONS AND PATENTS.

337. STATE OF THE ART.

See CLAIMS, CONSTRUCTION IN VIEW OF STATE OF ART

State of the art—*Who chargeable with knowledge of*, §§ 6092-6094. *Evidence of*, §§ 6095-6102; *admissible without notice*, §§ 6103-6107. See *Claims, Construction of*, §§ 769-774. *Construction of Patents*, §§ 1208-1212. *Experts*, §§ 2429, 2430. *Patents*, §§ 4742, 4743. *Reissues*, §§ 5419-5421. *Specification*, § 6002.

§ 6092. Every patentee is chargeable with knowledge of prior patents. *Odiorne v. Winkley*, 2 Gall., 50.

§ 6093. Patentees have, in their description, a right to assume that those who desire to understand all the conditions under which their invention could be operated are acquainted with the preceding state of the art immediately relating thereto. *Tompkins v. Gage*, 5 Blatch., 268.

§ 6094. An intelligent mechanic is chargeable with the state of the art in relation to the subject upon which he is called to exercise his skill. *Treadwell v. Parrott*, 5 Blatch., 396.

See *Inventor*, § 3788. *Publication*, § 5170.

§ 6095. Proof of the state of the art is admissible in equity cases without any averment in the answer touching the subject, and in actions at law, without giving the notice required, when evidence is offered to invalidate a patent. It consists of proof of what was old and in general use at the time of the alleged invention, and may be admitted to show what was then old, or to distinguish what is new, or to aid the court in the construction of the patent. *Dunbar v. Myers*, 4 Otto, 187.

§ 6096. Evidence of the state of the art showing the prior existence of analogous devices for substantially the same purpose, but not fully exhibiting the device patented, operates to narrow the field for the exercise of inventive faculty and limit the range of the patents. *Washburn & Moen Manufacturing Co. v. Haish*, 10 Biss., 65.

§ 6097. The fact that evidence clearly admissible as showing the state of the art at the date of the invention was not objected to is no waiver of the right to have it restricted to the purpose for which it was admissible. *Zane v. Loffe*, 2 Fed. Rep., 229.

§ 6098. Evidence is admissible to show the meaning of terms used in a patent, as well as the state of the art, for the purpose of enabling the court or jury to understand it. *Webster Loom Company v. Higgins*, 105 U. S., 580.

§ 6099. Evidence to prove the state of the art is admissible, and expert testimony to aid in expounding and defining technical words and phrases may be received in the construction of letters patent. *Goodyear Dental Vulcanite Co. v. Gardiner*, 3 Cliff., 408.

§ 6100. Testimony of witnesses examined in a case as to alleged prior use by parties, not set up in the answer, can only be considered by the court for the purpose of showing the state of the art at the time of patentee's invention. The same rule would apply to printed publications by which it is sought to anticipate the invention. *Geir v. Goetinger*, 7 O. G., 563.

§ 6101. The testimony of witnesses of whose names no notice was given to the complainants is admissible to show the state of the art, but will receive no consideration upon the question whether there had been a prior knowledge and use of the invention. *La Baw v. Hawkins*, 6 O. G., 724.

§ 6102. Matter introduced to show the state of the art in construing the patent cannot be permitted to defeat the suit by antedating the invention, when that issue is not raised by the pleadings. *Middletown Tool Co. v. Judd*, 3 Fish., 141.

§ 6103. No notice is necessary in order to introduce evidence relative to the state of the art. *Vance v. Campbell*, 1 Black, 427.

§ 6104. A patent not admissible in evidence on the question of novelty (anticipation), because of no allegation to that effect in the answer, may be properly in evidence to show the state of the art and to restrict the claim. *Delong v. Bickford*, 22 O. G., 2242.

§ 6105. It seems a patent not set up in the answer may be introduced to show the state of the art. *American Saddle Co. v. Hogg*, 1 Holmes, 133.

§ 6106. Though the court in construing the patent may hear evidence of the state of the art at the date of the alleged invention, such evidence, in the absence of notice, cannot be admitted on the question of novelty. *Railroad Co. v. Dubois*, 10 Wall., 47.

§ 6107. Although prior use or knowledge of the invention claimed in a reissue is not specifically set up in the answer as a defense, it is nevertheless admissible to consult the evidence on that point contained in the record for the purpose of defining the limits of the original grant and the scope of the invention described in the specification. *Eachus v. Broomall*, 115 U. S., 429; 33 O. G., 1265.

See *Use, Double*, § 6355.

338. STATE JURISDICTION.

See JURISDICTION, STATE.

339. STATE STATUTES.

See STATUTES, STATE.

340. STATUTES.

See ASSIGNMENTS, CONSTRUCTION OF STATUTES. USE, KNOWLEDGE AND, PRIOR TO APPLICATION, CONSTRUCTION OF STATUTES. USE, PRIOR PUBLIC, CONSTRUCTION OF STATUTES. REISSUES, CONSTRUCTION OF STATUTES.

Statutes — Construction of — *Constitutional provisions*, §§ 6108-6110.

§ 6108. The seventh amendment to the constitution is a provision exclusively for suits at common law. *Motte v. Bennett*, 2 Fish., 642.

§ 6109. *Semble*, that under section 8, article 1 of the constitution, congress may secure to an inventor the exclusive right to his invention for a limited period, beginning at any time after the invention was made, and after it became publicly known. *Jordan v. Dobson*, 2 Abb., 398.

§ 6110. The language of the constitution confers upon congress the power of "securing" "to inventors the exclusive right to their discoveries." It is not empowered to grant to inventors a favor, but to secure to them a right; and the term "to secure a right" by no possible implication carries with it the opposite power of destroying the right, in whole or in part, by appropriating it to the purposes of the government without complying with that other condition of the constitution, the making of "just compensation." *McKeever v. United States*, 14 Ct. Cl., 396.

See *Contracts, Violation of*, § 1352. *Government*, §§ 2627, 2628.

Statutes — Construction of — *Patent acts generally*, §§ 6111-6114.

§ 6111. The patent acts should be construed in the spirit in which they are made. *Grant v. Raymond*, 6 Pet., 218.

§ 6112. In a general act, congress cannot be presumed to decide who is the inventor, without words rendering such construction unavoidable. *Evans v. Eaton*, 3 Wheat., 454.

§ 6113. The purposes of the patent law and of the constitutional provision are answered when the patentee is protected against competition in the use of his invention by others; and when the law prevents others from infringing on his exclusive right to make, use or sell, its object is accomplished. *In re Brosnahan*, 4 Dill., 1.

§ 6114. The statute permitting a disclaimer by patentee is not penal, but remedial. *O'Reilly v. Morse*, 15 How., 62.

Statutes — Construction of — *Act 1793*, §§ 6115-6117. *Act 1800*, §§ 6118, 6119. *Act 1836*, § 6120. *Revised Statutes*, §§ 6121-6125.

§ 6115. Act of 1793, sections 3, 4 and 6, construed. *Whittemore v. Cutter*, 1 Gall., 429.

§ 6116. Act 1793, section 10, construed. *Stearns v. Barrett*, 1 Mason, 153.

§ 6117. Act 1793, chapter 11, reviewed. *Evans v. Eaton*, 7 Wheat., 356.

§ 6118. Act of 1800, section 3, reviewed. *Evans v. Jordan*, 1 Brock., 248.

§ 6119. Act of 1800, chapter 25, construed. *Sawin v. Guild*, 1 Gall., 484; *Whittemore v. Cutter*, 1 Gall., 429.

§ 6120. Section 14, act 1836, is exclusively for actions at law for damages. *Motte v. Bennett*, 2 Fish., 642.

§ 6121. The words "officers of the revenue" in section 989 of the Revised Statutes mean officers of the revenue from customs, and cannot be construed to include postmasters. *Campbell v. James*, 18 Blatch., 196.

§ 6122. Where, therefore, a judgment has been rendered against a postmaster for the infringement of a patented postage-stamp marking and canceling device, and execution has been awarded against him personally, a certificate for his relief, under section 989 of the Revised Statutes, will not be granted. *Ibid.*

§ 6123. Where an act of congress depriving the chief clerk of authority to act as commissioner of patents was signed by the president and indorsed "approved July 23, 1868," and the following day was received at the state department at 4 o'clock; and later on the same day the

chief clerk as commissioner granted the extension of a patent, *held*, that the date of the chief clerk's decision was July 24; and that in view of the act of congress his action was void. *American Wood Paper Co. v. Glen Falls Paper Co.*, 8 Blatch., 518.

§ 6124. The clear purport of the provisions of the Revised Statutes relative to suits for infringement of patents is that such suits must be brought in the name of the real and beneficial party in interest. *Goldsmith v. American Paper Collar Co.*, 18 Blatch., 82.

§ 6125. Where the meaning of the Revised Statutes is plain, the court cannot recur to the original statutes to see if errors were committed in revising them; but it may do so when necessary to construe doubtful language used in the revision. *Cannan v. Pound Mfg. Co.*, 23 Fed. Rep., 185.

Statutes — Special acts — *Reviewed*, §§ 6126-6130. *Construed*, §§ 6131-6139.

§ 6126. Special acts, extending or renewing particular patents, reviewed. *Day v. Union Rubber Co.*, 3 Blatch., 488.

§ 6127. An act of congress is not unconstitutional because it was retrospective in granting a patent. *Blanchard v. Sprague*, 3 Sumn., 535; S. C., 2 Story, 165.

§ 6128. An act authorizing the extension of a patent, passed after the original patent has expired, is valid. *Jordan v. Dobson*, 2 Abb., 398.

§ 6129. Where, in an act of congress renewing a patent, there was error both as to the words and date in the descriptive words of the subject-matter of the patent, *held*, that these variances were fatal and could not be corrected by the court so as to give validity to the letters patent. *Blanchard v. Sprague*, 3 Sumn., 279.

§ 6130. An act of congress, after the expiration of the patent, granting an extended term, is considered as engrafted on the general laws and they must be construed together. *Jordan v. Dobson*, 2 Abb., 398.

§ 6131. Where, under a special act, the court is directed to ascertain, *first*, whether patentee was the original inventor; *secondly*, to determine the amount of compensation, *held*, that congress by such act waived the special defense that patentee was its servant, paid extra and detailed for the purpose and experimenting at its expense; and also other special defenses, as abandonment; and that the finding of the first question in the affirmative is conclusive as to patentee's right to compensation. *Dahlgreen's Case*, 16 Ct. Cl., 30.

§ 6132. Special act for the relief of Evans construed. *Evans v. Eaton*, 3 Wheat., 454.

§ 6133. Special act January 21, 1808, relief of Evans, construed. *Evans v. Weiss*, 2 Wash., 342.

§ 6134. Special act of 1808, for the relief of Evans, construed not to relieve from treble damages those who erected machines in the *interim* between the expiration of the original patent and the act, and continued their use subsequent thereto. *Evans v. Jordan*, 9 Cr., 199.

§ 6135. Where a patent is granted by private act, a user of the invention prior to the grant is liable only from the time he receives notice of the law. *Evans v. Weiss*, 2 Wash., 342; *Evans v. Jordan*, 1 Brock., 248. See *Id.*, 9 Cranch., 199.

§ 6136. Special act 1839, granting Blanchard's patent, does not give damages for breaches prior to grant. *Blanchard v. Sprague*, 3 Sumn., 535; S. C., 2 Story, 165.

§ 6137. The special act of congress passed in 1868 for the benefit of the inventor Page did in effect relieve him from any charge of constructive abandonment growing out of his published description, or from the public use of his invention prior to application for patent, or from his withdrawal of the application upon rejection. Page being the first inventor, congress had full power to exempt him from the operation of the general statutory rule working a forfeiture of right. *Page v. Holmes Burglar Alarm Telegraph Co.*, 17 Blatch., 484.

§ 6138. The proviso of the special act by which apparatus in existence at date of patent grant and involving the invention might be used and sold without liability to patentee, fully protects and preserves all that was property in the constitutional sense at that date. *Ibid.*

§ 6139. Where all rights to apply for and obtain letters patent under the general acts have lapsed by reason of failure to prosecute the application, and a special act has removed the disabilities of a particular class of persons — to wit, the heirs of the inventor — in the way of applying for and obtaining a patent, and at the same time expressly saves to owners of machines the right to the continued use of such machines during the life-time of the patent, *held*, that the rights of those claiming under the original inventor by assignment are not thereby revived. *Fire Extinguishing Mfg. Co. v. Graham*, 16 Fed. Rep., 543.

Statutes — Of limitation, §§ 6140-6150.

§ 6140. The right to plead the statute of limitations does not depend upon the discretion of the court; but a court having the right to prescribe rules for the regulation of its business, any

one excepting to the decision of the court must embody in a bill of exceptions the rule affecting the question, in order to obtain the judicial notice of the supreme court. *Steam Packet Co. v. Sickles*, 19 Wall., 611.

§ 6141. Under act of 1870, where the party sues for any infringement under the original term of the patent, he must bring his suit within six years after the expiration of that term; and when he sues for anything that occurred under the extended term, he must sue within six years after the expiration of that extension. *Sayles v. Chicago, Burlington & Quincy R. R.*, 9 Fed. Rep., 515.

§ 6142. Statute of 1870 bars any claim to damages, unless brought during the term for which they shall be granted or extended, or six years after the expiration thereof. *Sayles v. Dubuque & Sioux City R. Co.*, 5 Dill., 561.

§ 6143. Under act 1870, section 56, the limitation of six years for bringing suit for infringement runs from the original term and extended term of a patent as distinct terms. *Sayles v. Louisville City R. Co.*, 9 Fed. Rep., 512.

§ 6144. The limitation contained in section 55, act 1870, regarding the bringing of infringement suits, was repealed by operation of section 5596, Revised Statutes, except as to causes of action arising prior thereto. *Sayles v. Oregon Central R'y Co.*, 6 Saw., 31.

§ 6145. Where a patent has been granted for fourteen years and extended for seven years, a suit may be brought against an infringer for profits that accrued at any time during the twenty-one years, if brought within six years after the extended patent expires. *Sayles v. Richmond, Fredericksburg & Potomac R. Co.*, 3 Hughes, 172.

§ 6146. Acts of limitation will be construed prospectively only, unless a contrary intention clearly appears. *Vaughn v. East Tennessee, Virginia & Georgia R. Co.*, 1 Flip., 621.

§ 6147. Notwithstanding the repeal of the limitation clause in section 55 of the act of 1870, an action will lie upon a patent expiring before the adoption of the Revised Statutes, if brought within six years after the expiration of the patent. *Ibid.*

§ 6148. Section 5597, Revised Statutes, reserving existing causes of action, so far as limitations are concerned, precisely as though no repeal had been made, *held* to refer to and construed in view of section 55, act 1870, limitations in causes of patent actions, which was repealed by omission from the Revised Statutes. *Hayden v. Oriental Mills*, 22 Fed. Rep., 103.

§ 6149. Where, on suit brought to recover for infringement, more than six years subsequent to termination of original term, *held*, that under the statute of limitations (act 1870, section 56) recovery for extended term only could be had. *Sayles v. Louisville City R. Co.*, 9 Fed. Rep., 512.

§ 6150. Suit for infringement must be brought within six years after expiration of the original term of the patent to cover such term; suit brought within six years after extended term covers such extension only. *Hayden v. Oriental Mills*, 22 Fed. Rep., 103.

Statutes — State statutes of limitation — Cannot apply in United States courts in actions concerning patents, §§ 6151-6163.

§ 6151. *Quere*: Whether the state statute of limitations is applicable to a suit in equity, brought after the expiration of the extension of a patent, to compel an infringer to account for profits. *Stevens v. Kansas Pacific R'y Co.*, 5 Dill., 487.

§ 6152. State statutes cannot limit the time within which action for infringement may be brought in United States courts. In the absence of congressional legislation on the subject, there is no limit to the time for bringing such actions. *Collins v. Peebles*, 2 Fish., 541; *Parker v. Hallock*, 2 Fish., 543.

§ 6153. In the absence of a United States statute of limitations as to suits on patents, a state statute does not apply. *Sayles v. Chicago, Burlington & Quincy R. R.*, 9 Fed. Rep., 515.

§ 6154. State statutes of limitation cannot limit the accountability of infringers. Statutory rights cognizable only by the federal courts can be affected only by laws of congress. *Wetherill v. New Jersey Zinc Co.*, 1 B. & A., 485.

§ 6155. Although in ordinary actions at common law, brought in United States courts, the statutes of limitation of the state where the suit is brought may be pleaded in bar, under the provisions of the judiciary act, such pleadings will not apply to an action for the infringement of a patent, where the right of action is exclusively under the constitution and laws of the United States, and when the form of the remedy is prescribed by the acts of congress, and when the circuit courts of the United States are clothed by statute with exclusive jurisdiction over the whole subject-matter. *Anthony v. Carroll*, 9 O. G., 199.

§ 6156. Should the legislature of a state pass an act in express terms limiting the time for bringing an action in the federal courts for the infringement of patent rights, there can be no reasonable doubt that such a statute would be unconstitutional and void. *Ibid.*

§ 6157. Where congress has by statute of limitation fixed the date in patent cases, whereof

the federal government has exclusive jurisdiction, a state statute cannot be pleaded. *Hayward v. City of St. Louis*, 3 McC., 614.

§ 6158. *Semble*, that the state statute of limitations has no application to suits in respect of the rights granted by letters patent. *Sayles v. Dubuque & Sioux City R. Co.*, 5 Dill., 561.

§ 6159. State statutes of limitation do not apply in suits at law for the infringement of patents. The question, however, considered so doubtful that the court indicated a course by which it might be submitted more speedily to the appellate court. *Adams v. Bellair Stamping Co.*, 25 Fed. Rep., 270.

§ 6160. States cannot pass limitation statutes in respect to suits concerning patents. *Reed v. Miller*, 2 Biss., 12.

§ 6161. A plea setting up the statute of limitations of the state of New York is a good plea in bar to an action for infringement brought in the circuit court of the northern district of New York, congress having prescribed no limitation. *Rich v. Ricketts*, 7 Blatch., 230.

§ 6162. State statutes of limitation are applicable to actions at law for the infringement of a patent. *Hayden v. Oriental Mills*, 24 O. G., 601.

§ 6163. In ordinary actions at law in the United States courts, the statutes of limitation of the state where the suit is brought may be pleaded under section 34 of the judiciary act. *Reed v. Miller*, 2 Biss., 12.

Statutes—State statutes, §§ 6164-6176.

§ 6164. A state has no power to pass laws prohibiting the free sale and use of patented articles, or annexing conditions to the grants of property in inventions, which have been made by congress. *Ex parte Robinson*, 2 Biss., 309.

§ 6165. The right conferred by the patent laws of the United States to inventors, to sell their inventions and discoveries, does not take the tangible property in which the invention or discovery may be exhibited or carried into effect from the operation of the tax and license laws of the state. *Webber v. Virginia*, 103 U. S., 344.

§ 6166. Patented articles are subject to the police jurisdiction of the states, and cannot be sold in such states as may by law forbid their use or sale. *Patterson v. Kentucky*, 7 Otto, 501.

§ 6167. A patent can only be used so far as tolerated by state law. *Ibid.*

§ 6168. Where a licensee was prevented by the terms of his license from establishing telephonic communication between certain parties, *held*, that the right to establish such system under the patent was none the less subject to the laws which control commercial transactions, and as such subject to the control of the state law, and of the courts, and that the licensee was compelled, on tender of equal payment for the privilege, to establish such communication, despite the terms of his license. (Brewer, J.) *State of Missouri v. Bell Telephone Co.*, 23 Fed. Rep., 539.

§ 6169. The licensee stands on a contract, and the courts cannot cause him to violate it. (Treat, J.) *Ibid.*

§ 6170. A tax upon the manufacturers of another state, while those of the state itself are free from such taxation, is invalid, since it discriminates against the rights of the non-resident manufacturer, and violates the constitutional provision vesting all commercial control in the federal government. *Webber v. Virginia*, 103 U. S., 344.

§ 6171. A statute of Indiana requiring that any person who may take any obligation in writing for which any patent-rights, or rights claimed by him to be a patent-right, shall form the whole or any part of the consideration, shall, before it is signed by the maker, insert in the body of said written obligation, above the signature of the maker, the words "given for a patent-right," *held* unconstitutional. *Castle v. Hutchinson*, 25 Fed. Rep., 394.

§ 6172. A statute of Missouri punishing by fine and imprisonment the manufacture and sale of oleomargarine is not in violation of the provision of the constitution which secures to inventors the monopoly in their inventions; and where the prisoner manufactured under such a patent in violation of the state law, the state law was sustained. *In re Brosnahan*, 4 Dill., 1.

§ 6173. Act of state of New York of March 27, 1862, *held* to be without effect to relieve the corporation of the city of Brooklyn from liability to pay complainant for the use of his patent. *Bliss v. City of Brooklyn*, 8 Blatch., 533.

§ 6174. The laws of New York prohibit the suspension of the powers of alienation of both real and personal property by any limitation or condition whatever for a longer period than during the continuance and until the termination of not more than two lives in being. *Ladd v. Mills*, 20 Fed. Rep., 792.

§ 6175. The laws of New York free married women from disability to make an assignment by an instrument in writing, and make their property distinctively their own. Where a married woman by her sole deed assigns an interest in a patent, the assignment is valid, and she may join with such assignee in an action involving their joint rights. *Fetter v. Newhall*, 17 Fed. Rep., 841.

§ 6176. The Ohio statute of May 4, 1869, providing that a note given for a patent-right shall have such words printed upon its face, and be subject in the hands of any purchaser or holder to the same defenses as in the hands of the original holder, is unconstitutional, as an interference with the patent monopoly granted by the United States. *Woolen v. Banker*, 2 Flip., 34.

See *Assignment*, §§ 419, 474, 526. *Executor*, § 2369. *Guardians*, § 2655. *Injunction, Provisional*, § 3229.

Statutes — Foreign, §§ 6177-6179.

§ 6177. The construction of a foreign statute put upon it by its own courts is the proper construction for the courts of this country. *Bate Refrigerator Co. v. Gillette*, 20 Fed. Rep., 192.

§ 6178. Difference between the patent laws of England and the United States. *Hogg v. Emerson*, 6 How., 437; *Mellus v. Silsbee*, 4 Mason, 108.

§ 6179. Congress have declared the intention of the law to be to promote the progress of useful arts by the benefits granted to inventors; not by those accruing to the public after the patent has expired, as in England. *Whitney v. Emmett*, 1 Bald., 303.

Statutes — Construction of generally — *Ex post facto* laws, §§ 6180, 6181. Penal statutes, §§ 6182, 6183. Rules of construction generally, §§ 6184-6189.

§ 6180. An act prescribing conditions as to future use is not *ex post facto*. *Evans v. Jordan*, 1 Brock., 248.

§ 6181. *Ex post facto* law defined. *Evans v. Robinson*, 1 Car. L. R. (N. C.), 209.

§ 6182. Rules for construing penal statutes. *French v. Foley*, 11 Fed. Rep., 801.

§ 6183. The thirty-second section of the crimes act of April 30, 1790, limiting suits for penalties for two years after the fine or forfeiture incurred, is repealed by act February 28, 1839, section 4. *Stimpson v. Pond*, 2 Curt., 502.

§ 6184. An act of congress should be so construed as to be held constitutional and not retrospective, unless absolutely necessary. *Blanchard v. Sprague*, 3 Sumn., 535; S. C., 2 Story, 165.

§ 6185. Rule of construction of statutes, in cases of obscure and doubtful phraseology, stated. *Wilson v. Rousseau*, 4 How., 646.

§ 6186. In the construction of statutes *in pari materia* they are all to be kept alike in view, and construed in the light of each other, and their effect considered under such construction. *United States ex rel. Koechlin v. Marble*, 22 O. G., 1365.

§ 6187. In the construction of statutes every part of the act and acts *in pari materia* are to be taken together for the purpose of discovering the intention of the legislature, which, when ascertained, is to prevail. *Prentiss v. Ellsworth*, 27 O. G., 623.

§ 6188. The construction of a statute which has been adopted for many years by the officers intrusted with its execution is entitled to great consideration. *Gear v. Grosvenor*, 1 Holmes, 215.

§ 6189. Questions raised as to when an act of congress signed by the president takes effect. *American Wood Paper Co. v. Glen's Falls Paper Co.*, 8 Blatch., 513.

341. STATUTORY ABANDONMENT.

See ABANDONMENT, UNDER THE STATUTE.

342. STATUTORY NOTICE.

See NOTICE, STATUTORY.

343. STATUTORY PLEAS.

See PLEAS, STATUTORY.

344. STAY OF INJUNCTION.

See INJUNCTION, STAY OF.

345. SUBSTANTIALLY AS DESCRIBED.

See CLAIMS, §§ 711-806.

§ 6190. "Substantial" signifies that the substance of the thing is looked to rather than the form. *Brooks v. Jenkins*, 3 McL., 432.

§ 6191. "Substantially in the manner herein described," construed in reference to its meaning, limitation and specification. *Hovey v. Stevens*, 3 W. & M., 17.

§ 6192. The words "in the manner described," in a claim, signify *in the manner previously described in his patent*. *McCormick v. Seymour*, 3 Blatch., 209.

§ 6193. The words "substantially as described and shown," in a claim, construed to relate only to material features of the combination specified, and these are to be ascertained by considering the object or purpose of the machine, and what are the elements of the combination which create its distinctive character, and are effective in producing the peculiar result for which the contrivance is made. *Waterbury Brass Co. v. Miller*, 9 Blatch., 77.

§ 6194. The words "substantially as set forth" limit and define the claim by reference to the specification. *Detmold v. Reeves*, 1 Fish., 127.

§ 6195. "Substantially as described," in a claim for an article of manufacture, construed in view of the specification to signify made by a particular process. *Rogers v. Sargent*, 7 Blatch., 507.

§ 6196. The words in a claim, "the equivalent therefor," embrace colorable alterations merely, and cannot be construed to apply to any improvements which are not substantially the same as those described and involve the same principle. *McCormick v. Manny*, 6 McL., 539.

§ 6197. The effect of the words "substantially as described," used in a claim, is to refer to the specification for the description of the elements of the combination which is wanting in the claim. *Knox v. Murtha*, 9 Blatch., 205.

§ 6198. Full effect must be given to the words "substantially as set forth" in a claim. *Piper v. Moon*, 10 Blatch., 264.

§ 6199. The words "substantially as described," appended to certain broad reissue claims, held to limit them to the original so that they could be sustained. *Seymour v. Osborn*, 3 Fish., 555.

§ 6200. The words "substantially as and for the purpose set forth," in a claim, refer it back to the specification for a qualification of the claim and the several elements of which the combination is composed. *Corn-Planter Patent*, 23 Wall., 181.

§ 6201. The words "substantially as described" in the specification and claims must necessarily be implied, and involve a reference to the specification and drawing, to prevent any misunderstanding of the scope and meaning of the claims. *Westinghouse v. Gardner & Ranson Air Brake Co.*, 9 O. G., 538.

§ 6202. Words "substantially as specified," appended to a combination claim, held to mean "substantially as specified in regard to the combination which is the subject of the claim." *Lake Shore & Mich. Southern R'y Co. v. National Car-Brake Shoe Co.*, 110 U. S., 229.

See *Combination*, § 871. *Reissues*, § 5313.

346. SUBSTITUTION OF AN EQUIVALENT.

See COMBINATION, INFRINGEMENT OF, BY SUBSTITUTION OF AN EQUIVALENT. COMPOSITION OF MATTER, §§ 1117-1145. DEFENSES, §§ 1818, 1849. FORMAL CHANGE, § 2526. INFRINGER, § 2999. INVENTION, §§ 3527-3529, 3630.

§ 6203. Substitution of a mechanical equivalent in the construction of a machine is not a substantial change. *Tatham v. Le Roy*, 2 Blatch., 474.

§ 6204. Substitution of an equivalent not involving invention will not avoid infringement. *Gibson v. Harris*, 1 Blatch., 167.

§ 6205. The substitution of a mechanical equivalent to produce the same result is an infringement. *Foss v. Herbert*, 1 Biss., 121.

§ 6206. Substitution of mechanical equivalent will not avoid infringement. *Tompkins v. Gage*, 5 Blatch., 268.

§ 6207. *Semble*, that the substitution of heated air or fire heat in place of steam, as claimed in a process, is an evasion. *American Wood Paper Co. v. Glen's Falls Paper Co.*, 8 Blatch., 513.

§ 6208. The substitution by defendants of a passive agency which performs no useful object in addition to the agency employed by plaintiffs will not alter the character of the machine; and if plaintiff's patent is violated without, it is equally violated by, its substitution. *Waterbury Brass Co. v. New York & Brooklyn Brass Co.*, 3 Fish., 43.

347. SUBSTITUTION OF MATERIAL.

§ 6209. The conditions under which the use of one material instead of another in constructing a known machine or article may be patentable considered and explained. (*Hotchkiss v. Greenwood*, 11 How., 248, and *Hicks v. Kelsey*, 18 Wall., 670, cited and discussed.) *Goodyear Dental Vulcanite Co. v. Willis*, 1 Flip., 388.

§ 6210. It is not an infringement of a patented machine, the first of its class, where the substituted device was not a known equivalent at the date of the patent. *Maynadier v. Tenney*, 2 B. & A., 615.

§ 6211. The substitution of one material for another, where a new and useful result is effected, or an increase of efficiency or a decided saving in the operation is clearly attained (and not a matter of mere mechanical judgment), is a proper subject for letters patent. *Dalton v. Nelson*, 13 Blatch., 357.

§ 6212. Where, by the substitution of one material for another, the same result is produced, and in the same way, and also a new result, differing from the former one materially, the difference between the two cases is one of kind and not of degree; and such an improvement must have been the result of invention, thought, experience and skill, rather than the result of mere mechanical judgment. *Ibid.*

§ 6213. If in place of the element omitted another is substituted which has been newly discovered, or one which was not known at the date of the patent to be an equivalent, and which performs a new function, it constitutes a new invention, and is not an infringement of the combination. *Rees v. Gould*, 15 Wall., 178.

§ 6214. The use of one material instead of another in constructing a known machine is, in most cases, so obviously a matter of mere mechanical judgment, and not of invention, that it cannot be called an invention unless some new and useful result, as increase of efficiency, or a decided saving in the operation, be obtained. But where there is some such new and useful result, where a machine has acquired new functions and useful properties, it may be patentable as an invention, though the only change made in the machine has been supplanting one of its materials by another. This is true of all combinations, whether they be of materials or processes. *Smith v. Goodyear Dental Vulcanite Co.*, 3 Otto, 486.

§ 6215. Insulating a wire with gutta percha in place of india-rubber, *held* to be a substitution involving invention, and more than a mere change of material. *Colgate v. Western Union Telegraph Co.*, 15 Blatch., 365.

§ 6216. Although it is known that both rubber and vulcanite become soft at the temperature at which steam packings are used, it does not follow that the employment of vulcanite for rubber as the skeleton of a packing is a mere substitution of material, particularly in view of the different qualities presented by packings made by the two methods. *Clarke v. Johnson*, 18 Blatch., 450.

§ 6217. Doubted whether substitution of material involves invention. *Wirt's Opinion*, 2 Op., 52.

§ 6218. Non-patentable substitution of material. *Carter v. Messinger*, 11 Blatch., 34.

§ 6219. Mere change of material used in the construction of devices is not invention; it is only the exercise of mechanical judgment, and hardly adds enough to the domain of knowledge to raise the person to the dignity of an inventor who first thought of making such a change. *Putnam v. Yerrington*, 9 O. G., 689.

§ 6220. It is not invention to change one well known material for another, or to apply a well known process, without some adaptation, more than every skilled mechanic could apply to a new art or subject; but a change in the form of a machine or instrument, though slight, if it works a successful result not before accomplished in a similar way in the art to which it is applied, or in any other, is patentable. *Isaacs v. Abrams*, 14 O. G., 861.

§ 6221. Mere substitution of material, the purpose being the same, the means of accomplishing it being the same, and the form of the device and mode of operation being the same, is not a sufficient change to constitute invention. *Hicks v. Kelsey*, 18 Wall., 670.

§ 6222. The mere substitution of one known material for another in a known combination is not the subject of letters patent, though such substituted material is a cheaper and better one for the purpose. *Putnam v. Weatherbee*, 1 Holmes, 497.

§ 6223. The mere substitution of a well known element for another, where it appears that the substituted element was well known as a usual substitute for the element left out, is a mere formal one, and a colorable evasion of the patent. *Union Sugar Refinery Co. v. Matthieson*, 3 Cliff., 639.

See *Invention*, §§ 3616, 3634. *Process and Product*, § 5107.

348. SUGGESTIONS.

Suggestions — *Will not defeat a patent*, §§ 6224-6236. *May entitle to a joint patent*, § 6237.

§ 6224. Suggestions by another person, which do not amount to patentable inventions or improvements, cannot invalidate the patent for the thing to which they are applied. *Pennock v. Dialogue*, 4 Wash., 538.

§ 6225. Suggestions by others as to mere alterations in form or proportions will not affect the validity of a patent. *Watson v. Bladen*, 4 Wash., 580.

§ 6226. Suggestions made to inventor, while experimenting upon, and during the progress of the development and testing of his invention, will not invalidate his patent. *Spaulding v. Tucker*, Deady, 649.

§ 6227. A patent for an invention communicated to the patentee by another person is void; but the mere fact that he received a hint as to how the patented improvement might be made would not affect his right. *Alden v. Dewey*, 1 Story, 336.

§ 6228. It is no evidence of such prior knowledge of the invention as will defeat the patent, that others have made suggestions to the patentee as to the possibility of making the improvement subsequently patented. *Bell v. Daniels*, 1 Bond, 212.

§ 6229. Mere conversations about the practicability of an improvement, or suggestions as to the manner in which it might be carried out or accomplished, will not of themselves defeat the claims to originality of him who perfects the idea and secures a patent; but information to a patentee sufficient to enable him to construct the thing itself would. *Judson v. Moore*, 1 Bond, 285.

§ 6230. To invalidate a patent on the ground that it was not the patentee's idea, it must appear that the suggestions, if any, made to him would furnish all information necessary to enable him to construct the invention. *Pitts v. Hall*, 2 Blatch., 229.

§ 6231. Inquiries made or information or advice received from men of science do not impair patentee's right to the character of an inventor. *O'Reilly v. Morse*, 15 How., 62.

§ 6232. Where an employer has conceived the plan of an invention, and is engaged in experiments to perfect it, no suggestions from an employee not amounting to a new method or arrangement, which is in itself a complete invention, is sufficient to deprive the employer of the exclusive property in the perfected improvement. *Agawam Co. v. Jordan*, 7 Wall., 583.

§ 6233. Where patentee is the first to so combine and arrange his device as to make a practical, efficient and complete invention, and so describes it as to enable others to use it, important suggestions and information in regard thereto will not impair his patent; neither will the fact that others about the time of his invention were experimenting with some of its elements. *Hubbell's Case*, 5 Ct. Cl., 1.

§ 6234. An invention is not the less novel because the patentee developed it from ideas which were suggested to him by others. *Roberts v. Dickey*, 4 Brewster, 260.

§ 6235. The mere suggestion that a given result may be obtained is not patentable, and does not anticipate a patent producing such result. *Graham v. Gammon*, 7 Biss., 490.

§ 6236. Although the efforts of prior unsuccessful experimenters may have suggested to the patentee the construction which he finally adopted and perfected, and may have been of profit to him as far as they went, his patent will not be invalidated thereby. *Whittlesey v. Ames*, 9 Biss., 225.

§ 6237. Where an idea is suggested by one and utilized by another, *semble*, that a joint patent should be taken out. *Thomas v. Weeks*, 2 Paine, 92.

See *Invention, Joint*, §§ 3691-3696.

See APPEAL, FROM COMMISSIONER.

352. SURPRISE.

See PRACTICE, SURPRISE.

353. SURRENDER OF PATENT.

See REISSUES, §§ 5292-5814.

§ 6238. The act of congress does not require in terms that the surrender of a patent for re-issue should be in writing. *Goodyear Dental Vulcanite Co. v. Wetherbee*, 3 Cliff., 555.

§ 6239. The surrender of a patent to the commissioner is an act which, in judgment of law, extinguishes it. It is a legal cancellation of it; and hence the patent can no more be the foundation for the assertion of a right, after the surrender, than could an act of congress which had been repealed; and it has frequently been determined that suits pending which rest upon an act of congress fall with the repeal of it. Antecedent suits depend upon the patent existing at the time they were commenced, and unless it exists and is in force at the time of the trial and judgment, the suits fail. *Reedy v. Scott*, 23 Wall., 352.

§ 6240. Surrendered patents cease to be causes of action from the moment of surrender, nor can there be recovery for infringement before surrender unless the same has been reduced to judgment. (Dissenting opinion of CLIFFORD, MILLER and DAVIS, JJ.) *Corn-Planter Patent*, 23 Wall., 181.

See *Reissues*, §§ 5350, 5753.

§ 6241. If a patent is surrendered for reissue after final decree or judgment, the surrender has no effect upon a right passed previously into judgment. The right of the patentee then rests on his judgment or decree, and not on his patent. *Mers v. Conover*, 11 O. G., 1111.

§ 6242. A surrender of a patent by the patentee for the purpose of having it reissued is valid, although he had assigned the patent, if it was made at the request of the assignees. *Wing v. Warren*, 2 O. G., 342.

§ 6243. If a part of the whole patent has been vested in another, so as to constitute him an assignee within the meaning of the statute, an efficacious surrender can be made only by the concurrence of both of the owners of the patent; but this may be manifested by the assignee by his direct co-operation in the surrender, or his subsequent ratification of it. *Meyer v. Bailey*, 8 O. G., 437.

359. TERM (DURATION) OF LICENSE.

See LICENSE, TERM OF.

360. TERM OF PATENT.

Term of patent—*Length of term in discretion of congress*, § 6254. *Expiration of*, §§ 6255, 6256. *Antedating (act 1836)*, § 6257. *Act 1861*, §§ 6258-6260. *How determined*, § 6261. *Particular cases*, §§ 6262, 6263.

§ 6254. It rests in the sound discretion of congress to say when and how long a patent may run. *Blanchard v. Sprague*, 3 Sumn., 535.

§ 6255. The patent expires on the last hour of the same day of the month on which it is granted. *Johnson v. McCulloch*, 4 Fish., 170. (Overruled.)

§ 6256. The term of a patent expires on the day preceding that of the same date as the date of the grant. The term of a patent granted June 15, 1844, and extended June 15, 1858, *held* to have expired June 14, 1865. *Bourn v. Goodyear*, 9 Wall., 811.

§ 6257. The patentee is not obliged to claim the whole term of fourteen years for which a patent may be granted. Under the eighth section of the act of 1836, he may waive his claim to part of the term in favor of the public by antedating the patent in the manner and under the conditions there specified; and if he knowingly acquiesces in the antedating, and takes the deed so, he is in like condition. Neither can he in such a case correct the date of the patent as a clerical error, where it appears from the proceedings in the case that the antedating of the patent was a deliberate act on the part of the commissioner, made in supposed accordance with the provisions of the law, upon the express request of the patentee who accepted and acquiesced in the patent so granted. *Cushman, In re*, 1 MacA. Pat. Cases, 577.

See *Antedating*, § 235.

§ 6258. Section 16 of the act of March 2, 1861, is amendatory of section 6 of the act of March 3, 1839, and not inconsistent therewith. *De Florez v. Raynolds*, 17 Blatch., 436.

§ 6259. The evident design of section 16 of the act of 1861 was that no patents thereafter granted should be extended, but that their original terms of duration should be seventeen years, instead of fourteen years with the privilege of an extension of seven years, as under the former law. *Ibid.*

§ 6260. The law did not provide that the patents granted under such section should by their terms and on their face be granted for seventeen years from the date of issue, but that they should "remain in force" for the term specified. *Ibid.*

§ 6261. The term or duration of a patent must be determined by the statute and all the facts of the case, and not merely by the terms of the grant in the patent. *Ibid.*

§ 6262. As long as separate patents for a machine, and the process and the product, are allowable, they represent distinct *inventions*, and each one may live, without interference or molestation, its whole life without regard to the death of the other. *McKay v. Dibert*, 5 Fed. Rep., 587.

§ 6263. Where letters patent were surrendered and canceled for error of the office in incorrectly limiting their term, and a new patent issued for seventeen years from its date of issue, *held*, that the term did not run from the date of the canceled patent, but from that of the new patent, the patentee having refused to accept the first patent, and having exercised no rights under it. *Railway Register Mfg. Co. v. North Hudson C. R. Co.*, 23 Fed. Rep., 593.

See *Bill*, § 583. *Burden of Proof*, § 664. *Disclaimer*, § 2065. *Reissue*, §§ 5739-5746.

Term of patent — Effect of foreign on domestic patent.

SUMMARY (BATE REFRIGERATING CO. v. GILLETT, §§ 6264–6267) — *Construction of section 4887, Revised Statutes, §§ 6264, 6265.* — *Date of Canadian patent, § 6266.* — *Prolongation of foreign patent, § 6267.*

(GRAMME ELECTRICAL CO. v. ARNOUX & HOCHHAUSEN ELECTRICAL CO., §§ 6268–6271) — *Construction of section 4887, Revised Statutes, §§ 6268–6271.* — *Austrian patent, § 6269.* — *Secret patent, § 6270.*

BATE REFRIGERATING COMPANY v. GILLETT.

(Circuit Court for New Jersey: 13 Federal Reporter, 553–558; 22 Official Gazette, 1205. 1882.)

STATEMENT OF FACTS.—Petition to dissolve injunction. An injunction had issued restraining the defendants from violating the patent of the complainant. The petition set forth that the letters patent, whose violation was enjoined, were numbered 197,134, and had been granted to one Bate for seventeen years from November 20, 1877; that prior thereto—namely, January 9, 1877—a patent for the same invention had been granted to the said Bate in the Dominion of Canada for the term of five years; that said patent expired January 9, 1882, and that therefore the patent granted by the United States expired on the same day, according to the Revised Statutes, section 4887; and that the letters patent No. 197,134, having been granted for seventeen years, were in violation of section 4887, and therefore null and void; and prayed a dissolution of the injunction. The affidavits showed that Bate had filed his application for letters patent at Washington on December 1, 1876, and before any action had been taken had filed a like application in Canada on December 19, 1876; that letters were granted in Canada and dated January 11, 1877; but the inventor not having furnished a working model of his invention, as required by section 15 of the Canadian patent act, the letters were withheld until June, 1878, when, a model having been furnished, they were mailed to the inventor's solicitor; that in the meantime the United States had issued their letters patent; that in 1881 Bate procured an extension of his Canadian patent.

§ 6264. *Under section 4887, Revised Statutes, the life of the domestic patent expires with the term of the prior outstanding foreign patent.*

Opinion by NIXON, J.

The case turns upon the question whether the invention was patented in Canada previous to the issuing of the patent in the United States in the sense in which the word "patented" is used in section 4887 of the Revised Statutes. The provisions of the section: "Every patent granted for an invention which has been previously patented in a foreign country shall be so limited as to expire at the same time with the foreign patent, or, if there be more than one at the same time, with the one having the shortest term, and in no case shall it be in force more than seventeen years."

The phraseology here used materially differs from the previous legislation upon the subject. The power of the commissioner is defined and abridged. Where a foreign patent has been granted for the same subject-matter he is expressly required to limit the terms of the domestic patent to the period of time that the foreign one has to run; or, if there be more than one, then to make it expire at the same time with the one having the shortest term. We do not see how any language could have been employed that would more clearly express the legislative design that the life of the domestic patent should expire with the term of any outstanding foreign patent; but the counsel for the complainant contended that the present case did not fall within the limitation of

the statute because the application of the United States patent was filed antecedent to the application for or the grant of the Canadian patent.

§ 6265. — *although the date of filing of the domestic patent was prior to the grant of the foreign patent.*

We are at a loss to understand what the time of filing the application has to do with the matter. It is true the acts of 1836, section 8, and of 1839, section 6, made the date of filing the specifications and drawings in the one case, and the date of application for the home patent in the other, the point of time from which to reckon the six months intervening between the issue of the foreign and domestic patents. It is also true that by section 4886 and the first clause of section 4887 of the Revised Statutes, an inventor is required to file an application for his patent within two years after his invention or discovery has been in public use or on sale, from all of which the late commissioner was led to the opinion that the word "previously" in the last clause of section 4887 had reference to time prior to the filing of the application rather than to time prior to the granting of the patent (*Ex parte Mann*, 17 O. G., 330); but this seems to be wresting the language of the section from its plain and obvious meaning, and we are not able to follow the reasoning by which such an interpretation is reached.

§ 6266. *The grant of a Canadian patent is determined by its date or issue, not by its delivery.*

It is further insisted that the grant of the Canadian patent was to be determined, not by its date or issue, but the time of the delivery to the patentee, namely, June 26, 1878, a long time after the date of the American patent. Hence it was said "the invention had not been previously patented in a foreign country" when the patent was granted here; but this position will not stand the test of analysis or examination. It appears upon the face of the Canadian patent that it was dated on the 9th and issued on the 11th of January, 1877, and was to continue in force for five years from its date. By the eighteenth section of the Canadian patent act the invention is patented so as to be available to the patentee when signed, sealed and registered. Owing to the neglect of the inventor in not forwarding a model, it was not delivered until June, 1878; but it was no less a patent, securing to him the benefits of the invention and protecting him against infringement. This becomes manifest by referring to section 16 of the act. Again the proofs show that the patent was absolutely granted as early as January, 1877, although the delivery was withheld, owing to the laches of the grantee.

§ 6267. *The prolongation of the term of a prior foreign patent does not lengthen the term of the domestic patent beyond the original foreign term.*

It was further maintained that even if the American patent should terminate with the Canadian patent, the extension of the latter under the provisions of the act operated to lengthen the term of the domestic patent to the period of fifteen years from the date of the first issue of the foreign patent. By virtue of the provisions of section 17 of the Canadian laws, Bate procured extensions, first on December 12, 1881, for five years from January 9, 1882, and secondly on December 13, 1881, for another five years, to be computed from the expiration of the prior extension, to wit, January 9, 1887.

The question is an interesting one and has already received examination and answer in other circuits. It first came before Mr. Justice Clifford, in *Henry v. Tool Company*, decided in 1878 (14 O. G., 855). In that case the United States patented for the full term of seventeen years, although at the

time of the grant there was an English patent for the same invention which had been granted for fourteen years from the 15th of November, 1860. The defendants claimed that the United States patent expired by operation of law at the same time with the English patent. The complainant insisted that the language of the statute extended not only to the term of the foreign patent in force when the United States patent was obtained, but also to the term of any prolongation which the patentee might secure from the foreign government, and that, as he had obtained an extension of four years to the original term, the owners of the domestic patent were entitled to add those four years to its life. Mr. Justice Clifford refused to accede to such a construction of the law, but held: 1. That by the provision of the act of July 8, 1870, congress never intended to extend the term of the domestic patent beyond the legal term secured to the foreign patentee when the domestic patent was granted. 2. That the prolongation of the English patent for a further term, after the expiration of the original, did not save the domestic patent from lapsing under the statute. He was followed in this construction by Blatchford, J., in *Reissner v. Sharp*, 16 O. G., 356. There was an attempt made to distinguish the case from *Henry v. Tool Company*, *supra*: 1. Because the Canadian patent had not expired when the extension was granted; and 2. Because the extension, by the terms of the Canadian law, was not a matter of favor, as it was under the English act. But the judge could not perceive that these considerations were of sufficient force to cause any other conclusion as to the plain meaning of the statute than that arrived at by Mr. Justice Clifford. We are clearly of opinion that the prayer of the petition should be granted and the injunction dissolved.

Whether the complainant's United States patent is void *ab initio* because the term was not limited on its face to expire at the same time as the foreign patent is not properly before the court on this motion. It was a defense to the suits of which the defendants did not choose to avail themselves, and a formal interlocutory decree entered on the case cannot be impeached in and by any such collateral proceedings. Injunction dissolved.

GRAMME ELECTRICAL COMPANY *v.* ARNOUX & HOCHHAUSEN ELECTRICAL COMPANY.

(Circuit Court for New York: 17 Federal Reporter, 838-841; 25 Official Gazette, 193. 1883.)

Opinion by BLATCHFORD, J.

STATEMENT OF FACTS.—This is a suit in equity, brought for an infringement of letters patent No. 120,057, granted to Zenobe Theophile Gramme and Eardley Louis Charles D'Ivernois, October 17, 1871, for seventeen years from that day, for an improvement in magneto-electric machines. It is set up as a defense in the answer that the patentees obtained a patent in Austria, December 30, 1870, for the same invention as is covered by No. 120,057; that the Austrian patent has expired, and that, therefore, No. 120,057 has expired.

The Austrian patent and sundry documents pertaining to it, and the Austrian statute, are in evidence. The patentees took out a patent in France for the same invention for fifteen years on the 22d of November, 1869. On the 30th of May, 1870, they made oath in Paris, France, to their application for No. 120,057. The application and the oath recited the date and the term of the French patent. The application was filed in the United States patent office, August 17, 1870, with a specification, drawings and model, and the

proper fee was paid. On the 3d of October, 1870, they filed in Austria an application, dated September 30, 1870, for a patent for the same invention for the period of one year. On the 30th of December, 1870, "an exclusive patent" was issued to them in Austria "for the duration of one year" for the invention, "under all conditions and with all effects stated in the supreme patent law of August 15, 1852." An amended oath to the United States application was sworn to by the patentees at Paris, June 26, 1871, and filed in the patent office July 12, 1871. It referred to the French patent, and stated its date and term, but it did not mention the Austrian patent. The final fee for No. 120,057 was paid October 2, 1871. The Austrian patent was extended nine times, year to year, each extension being for one year, and till December 30 in each year, and it finally expired December 30, 1880.

The bill in this suit was filed in July, 1881. It is agreed that the Austrian patent applied for and granted was for the same invention that is claimed in No. 120,057.

The Austrian patent law of August 15, 1852, requires that the applicant for a patent shall state in his petition the number of years for which he demands a patent, which number cannot exceed fifteen, except by special grant of the crown. The tax must be paid in advance and is in proportion to the duration of the privilege. The exclusive privilege secures to the patentee the exclusive use of his invention "for the number of years mentioned in his privilege." A patentee whose privilege has been granted for a short period may claim its prolongation for one or more years during the fixed longest period, provided he demands such a prolongation before the privilege has become extinct and pays in advance the tax for the required term of prolongation.

§ 6268. *The meaning of section 4887, Revised Statutes (section 25 of the act of 1870), is that the United States patent shall expire at the same time with the foreign patent having the shortest term to run which was granted before the United States patent was granted, and not that it shall expire at the same time with the foreign patent having the shortest term to run which was granted before the time when the application for the United States patent was made.*

No. 120,057 was granted under the provisions of the act of July 8, 1870 (16 U. S. Stats. at Large, 198), and its validity and duration must be tested by those provisions. By section 22 of that act (p. 201) every patent is to be granted for the term of seventeen years. By section 25 (p. 201) it is provided as follows: "No person shall be debarred from receiving a patent for his invention or discovery, nor shall any patent be declared invalid, by reason of its having been first patented, or caused to be patented, in a foreign country: *Provided*, the same shall not have been introduced into public use in the United States more than two years prior to the application, and that the patent shall expire at the same time with the foreign patent; or, if there be more than one, at the same time with the one having the shortest term; but in no case shall it be in force more than seventeen years."

It is contended for the defendant that under the foregoing provisions No. 120,057 expired either on December 30, 1871, or on December 30, 1880, the date of the expiration of the Austrian patent, accordingly as that patent is to be regarded as a patent for one year or for ten years. To this the plaintiff replies that the application for No. 120,057 was filed before the application for the Austrian patent was filed. But the date of the application for No. 120,057 cannot affect the question. Under the act of 1870 a patent takes effect from the time when it is granted, and cannot be antedated. The meaning of sec-

tion 25 of the act of 1870 is that the United States patent shall expire at the same time with the foreign patent having the shortest term to run which was granted before the United States patent was granted, and not that it shall expire at the same time with the foreign patent having the shortest term to run which was granted before the time when the application for the United States patent was made. *Bate Refrigerating Co. v. Gillett*, 13 Fed. Rep., 553 (§§ 6264-67, *supra*).

§ 6269. *An Austrian patent granted for one year may be prolonged to fifteen years; but a capacity of being prolonged so as to have a duration of fifteen years is not equivalent to having a term of fifteen years; and where the Austrian patent was prolonged so as to expire at the end of ten years, the United States patent expired with it.*

It is also contended by the plaintiff that the Austrian patent, though granted for the duration of one year on its face, was really a patent for fifteen years. It might have been prolonged year by year, or otherwise, for five years beyond December 30, 1880. But it was not prolonged beyond that date, and at most it cannot be regarded as a patent which, when granted, had a longer term to run than till December 30, 1880, even if it could be considered as a patent having, when granted, a longer term to run than one year. A capacity of being prolonged so as to have a duration of fifteen years is not equivalent to having a term of fifteen years, when the patent is granted for one year and then is prolonged so as to expire at the end of ten years. At latest the Austrian patent expired December 30, 1880, and it is not necessary to decide whether the term for which it was granted was not a term of only one year.

§ 6270. *Although the Austrian patent was a secret patent, it was nevertheless a patent within the meaning of section 4887, however far it might come short of being a prior public foreign patent sufficient to defeat a patent granted here to another inventor.*

It is also contended for the plaintiff that the Austrian patent was a secret patent, and therefore not a patent within the meaning of section 25 of the act of 1870. The Austrian statute provides that the petition for a patent must contain a statement whether the invention is to be kept secret or not; that special care is to be taken for the observation of the required secrecy, and due precautions are to be adopted against any possible violation of the secret; and that specifications as to which secrecy is demanded are not open to the public or for the taking of copies until the patent is extinct. In the present case the petition for the Austrian patent stated that it was desired that the description be kept secret. But the Austrian statute also provides that an exclusive privilege secures to the patentee the exclusive use of his invention, as laid down in his specification, for the number of years mentioned in his privilege. The Austrian patent in the present case states on its face that it is an exclusive patent, for the duration of one year, for the improvements in question, "in consonance with the description deposited" "under all conditions and with all effects stated in the" Austrian statute.

§ 6271. *It was also the manifest intention of section 4887 that the exclusive privilege under the patent here should expire with the exclusive privilege granted abroad to the same inventor having the shortest term.*

In view of these facts, however far the Austrian patent might have come short of being a prior public foreign patent sufficient to defeat a patent granted here to another inventor for an invention made after the granting of such

prior foreign patent, it is not perceived how the question of secrecy or publicity in the foreign patent granted prior to the granting of the patent here can affect, under section 25 of the act of 1870, the question of the duration of the patent here. The Austrian patent conferred on the patentees an exclusive privilege. It was the manifest intention of section 25 of the act of 1870 that the exclusive privilege under the patent here should expire with the exclusive privilege granted abroad to the same inventor having the shortest term. *De Florez v. Raynolds*, 17 Blatch., 436, 450.

As the Austrian patent expired at the latest on December 30, 1880, and before this suit was brought, and No. 120,057 continued to exist no longer, there was no ground for this suit in equity when it was brought, whatever ground there may have been for a suit at law against these defendants for infringement. *Root v. Railway Co.*, 105 U. S., 189. The novelty of the invention patented is attacked, and it is also contended that the patent is invalid because it was issued for the term of seventeen years and not for a shorter term. But the consideration of these questions is unnecessary, and the bill is dismissed, with costs.

Term of patent — Construction of statutes — Domestic patent term as affected by foreign patent, §§ 6272-6284.

§ 6272. By the terms of the acts of 1835 and 1836, inventions patented abroad more than six months before were limited to fourteen years from the date of publication of the foreign patent, while those patented abroad within six months before were not affected at all by the foreign patent. *American Diamond Rock-Boring Co. v. Sheldon*, 17 Blatch., 303.

§ 6273. Patents granted under the act of March 2, 1861, for inventions previously patented in a foreign country do not remain in force for seventeen years from their date, but are limited to the term of seventeen years from the date of publication of such foreign patents. *De Florez v. Raynolds*, 17 Blatch., 436.

§ 6274. The actual date of issuing a patent (section 8, act of 1836), or the time when a patent should "take date," was one thing, and the date from which its term began to run was another. The latter need not necessarily be a date expressed on the face of the patent, and under section 6 of the act of 1839, such date is "the date of publication" of the foreign patent. *Ibid.*

§ 6275. The provisions of the law limiting the duration of a United States patent for an invention previously patented abroad to the same inventor are intended to give to the patentee a specified term from the date at which his foreign patent had effect as a foreign patent in his favor. *Ibid.*

§ 6276. The language of the act of 1861, that "all patents hereafter granted shall remain in force for seventeen years from the date of issue," and "all acts and parts of acts heretofore passed which are inconsistent with this act are hereby repealed," considered in connection with former and existing legislation respecting inventions first patented abroad, was well calculated to create the doubt and embarrassment which followed. *Siemens v. Sellers*, 16 Fed. Rep., 856.

§ 6277. The provision of the patent act of 1870, that in the case of a prior foreign patent the United States patent "shall expire at the same time with the foreign patent, or, if there be more than one, at the same time with the one having the shortest term," is not retroactive. It did not take away any portion of the term of an existing patent, nor any right to an extension (*a reissue?*) which was in force when such patent was granted. *Badische Anilin & Soda Fabrik v. Hamilton Manufacturing Co.*, 13 O. G., 273.

§ 6278. Hence, a patent granted originally in 1869, and reissued after the passage of the act of 1870, is not abridged in term by the expiration of a prior foreign patent for the same invention occurring subsequent to the reissue. *Ibid.*

§ 6279. By the provisions of the patent act of July 8, 1870, congress never intended to extend the term of the domestic patent beyond the legal term secured to the foreign patentee when the domestic patent was granted. *Henry v. Providence Tool Co.*, 14 O. G., 855.

§ 6280. The limitation is the same, even if the domestic application was filed before the application for, or the grant of, the foreign patent, the word "previously" in the last clause of section 4887 referring to time prior to the grant of the domestic patent rather than to time prior to the application therefor. (*Ex parte Mann*, 17 O. G., 330, disapproved.) *Bate Refrigerating Co. v. Gillett*, 22 O. G., 1205.

§ 6281. Section 4887 of the Revised Statutes expressly requires the commissioner of patents to limit the term of a domestic patent for an invention previously patented in a foreign country to the period of time which the foreign patent has to run, or, if there be more than one such foreign patent, to so limit the domestic patent that it will expire at the same time with the one having the shortest term. *Ibid.*

§ 6282. Statutes with regard to the effect of a foreign patent upon a United States patent recited. *Cornley v. Marckwald*, 17 Fed. Rep., 83.

§ 6283. The provision of the statutes (§ 4887, R. S.), that a United States patent for an invention previously patented abroad shall be so limited as to expire at the same time with the foreign patent, seems to mean that the term of the patent here shall be as long as the remainder of the term for which the patent was granted there, without reference to incidents occurring after the grant. It refers to fixing the term, not to keeping the foreign patent in force. *Holmes Electric Protective Co. v. Metropolitan Burglar Alarm Co.*, 21 Fed. Rep., 458.

§ 6284. Section 4887 is not to be construed as requiring the limitation of the term of the domestic patent to that of the prior foreign patent to be expressed in the patent, but merely as controlling the effect or duration of the grant. *Canan v. Pound Mfg. Co.*, 23 Fed. Rep., 185.

See *Errors*, § 2181. *Extension*, §§ 2515, 2516. *Foreign Patents*, §§ 2520-2532.

Term of patent—Domestic patent term as affected by foreign patents—In general, §§ 6285-6289. *Does not include extension of foreign patent*, §§ 6290-6293. *Particular cases*, §§ 6294-6303.

§ 6285. A patent not limited on its face to the term of a prior foreign patent is not void. *O'Reilly v. Morse*, 15 How., 62.

§ 6286. The date of publication of the foreign patent is to be the date from which to determine the life of an American patent. *Weston v. White*, 13 Blatch., 364.

§ 6287. An American patent will expire at the same time with the foreign patent granted to the same party or parties, but will not exceed the term of seventeen years. *Ibid.*

§ 6288. An inventor receiving a patent in the first instance in this country is entitled to seventeen years' protection of his invention; but if he has previously obtained letters patent in one or more foreign countries, then, while not deprived of his right to a patent here, the term to which the law in such case limits his protection is a period not extending beyond the date of the expiration of that one of the foreign patents first expiring. *United States ex rel. Koechlin v. Marble*, 22 O. G., 1365.

§ 6289. It is only a patent for an invention that has been previously actually patented in a foreign country that is limited by the foreign patent. The description of the invention in the foreign patent might affect the validity of the domestic one and might not, but would not limit it. *Holmes Electric Protective Co. v. Metropolitan Burglar Alarm Co.*, 22 Fed. Rep., 341.

§ 6290. The prolongation of the English patent for a further term after the expiration of the original does not save the domestic patent from lapsing under the statute on the expiration of the original foreign term. *Henry v. Providence Tool Co.*, 14 O. G., 855.

§ 6291. *Held*, that a United States patent is limited to the original term granted the prior foreign patent and does not include a prolongation or extension of the term of the foreign patent. *Reissner v. Sharp*, 16 Blatch., 381.

§ 6292. The statute limits the term of the United States patent to the legal term secured to the foreign patent at the time when the United States patent was granted, excluding all subsequent prolongations or extensions of the term of the foreign patent, whether made by the executive or legislative department of the foreign government, before or after the expiration of the original term of the foreign patent; and the reissue patent to C. Reissner & Co. expired May 15, 1878. *Ibid.*

§ 6293. The term of the domestic patent is limited to the term of the foreign patent in force when the domestic patent was granted, and is not prolonged by any subsequent extension of the foreign patent. *Bate Refrigerator Co. v. Gillett*, 22 O. G., 1205.

§ 6294. Where the patent application was filed and acted on in the United States, although not issued prior to the date of the French patent for the same invention, *held*, it was properly not limited to run from the date of the French patent. *Morse v. Bain*, 9 West. L. J., 106.

§ 6295. Where the date of the United States application did not appear apart from that of the patent, and the date of the filing of the full English specification was not six months prior thereto, *held*, that under act of 1836, it was not limited by the prior English patent, unless the date of the grant of the English patent—six months prior to the filing of the English specification—be taken as the date at which the invention was patented in England. *American Diamond Rock-Boring Co. v. Sheldon*, 17 Blatch., 303.

§ 6296. Where application for the English patent was filed subsequent to application in the United States, and the English patent was sealed and published five months subsequent to the

issue of the United States patent, but bore date prior thereto — the date of the provisional application — it was held not to limit the term of the United States patent. *Gold & Stock Telegraph Co. v. Commercial Telegraph Co.*, 23 Fed. Rep., 340.

§ 6297. Where the patent was issued for fourteen years, without being limited, in view of act 1837, section 6, to fourteen years from date of patentee's prior foreign patent, it was held illegally issued (*Morse's Patent*, No. 1647). *Smith v. Ely*, 5 McL., 76, overruled. *Smith v. Ely*, 15 How., 137.

§ 6298. A patent not so limited under section 4887, Revised Statutes, as to expire with the prior foreign patent for the same invention, *held*, invalid. *Paillard v. Gautschi*, 20 O. G., 1893.

§ 6299. A patent granted for seventeen years from the date of its issue, and not limited on its face to expire at the time of expiration of a foreign patent granted to the same party, *held*, to be valid for the term of such foreign patent. *Canan v. Pound Mfg. Co.*, 23 Fed. Rep., 185.

§ 6300. Where a prior Canadian patent, granted for a term of five years, was declared void *ab initio* by a Canadian court, *held*, that the subsequent United States patent ran for the full term of seventeen years, as if there had been no such prior Canadian patent. *Bate Refrigerator Co. v. Gillett*, 20 Fed. Rep., 192.

§ 6301. Where a patent issued, running fourteen years from its date, and a foreign patent had been issued before upon the same invention, the error was held to have been properly corrected on a reissue. *Buerk v. Valentine*, 9 Blatch., 479.

§ 6302. The patentee in such a case cannot recover for infringements previous to the reissue any more than on any other reissued patent. *Ibid.*

§ 6303. Although the original patent in that case was void, no notoriety nor use of the invention after the application for it was filed and before the reissued patent was obtained would affect the validity of the latter. *Ibid.*

See *Process*, § 5059.

361. TERRITORIAL ASSIGNMENT.

See ASSIGNMENT.

362. TERRITORIAL LICENSE.

See LICENSE.

363. TERRITORIAL LIMITATIONS IN CONTRACTS CONCERNING PATENTS.

See CONTRACTS, CONCERNING PATENTS, TERRITORIAL LIMITATION.

364. THING PATENTED.

§ 6304. "Thing patented" is to be understood generally throughout the patent law as referring to the patented machine, when taken in connection with the right to use, in contradistinction to the right to make and sell. *Wilson v. Rousseau*, 4 How., 646.

§ 6305. The patent law protects the thing patented, not the product. *Boyd v. Brown*, 3 McL., 295.

365. TITLE.

SUMMARY (*MOORE v. MARSH*, §§ 6306, 6307) — *Owner's right to recover*, § 6306. — *Act 1836, section 14, construed*, § 6307.

MOORE v. MARSH.

(7 Wallace, 515-523. 1868.)

ERROR to U. S. Circuit Court, Western District of Pennsylvania.

Opinion by MR. JUSTICE CLIFFORD.

STATEMENT OF FACTS.— Viewed in the light of the admitted facts, the only question in the case is whether the assignment by the plaintiff to a third person of an undivided half of the right, title and interest secured to him by his

letters patent, subsequent to the alleged infringement, but before the commencement of his suit, is a bar to his claim to recover damages for such infringement.

Letters patent were granted to the plaintiff on the 18th of April, 1848 [No. 5522], for a certain new and useful improvement in grain drills, in which it is alleged that he is the original and first inventor of the improvement. Original patent was for the term of fourteen years, but it was subsequently extended by the commissioner of patents for the term of seven years from and after the expiration of the original term. Alleged defects existed in the original specification, and in consequence thereof the plaintiff, on the 3d of February, 1863, surrendered the letters patent, and the same were reissued to him in three new patents for separate and distinct parts of the invention for the unexpired portion of the original and extended terms of the patent. [Reissues Nos. 1393, 1394, 1395.]

Damages are claimed of the defendants for infringing the reissued letters patent from the day of the reissue to the 24th of February, 1865, as more fully set forth in the declaration. Pleas to the declaration were subsequently filed by the defendants, and the record shows that they gave due notice of certain special defenses which they proposed to offer in evidence under the general issue, in pursuance of the act of congress in such case made and provided. Before the day for the trial came, however, the parties filed an agreement waiving a jury and submitting the cause to the court, stipulating that the decision of the court should have the same effect as the verdict of a jury. Leave to amend was subsequently granted by the court to both parties.

Purport of the amendment to the declaration was, that the plaintiff was the sole owner of the letters patent for the county of Union, in the state of Pennsylvania, from the date of the reissued letters patent to the 24th of February, 1865, and that the defendants had infringed the same throughout that period, by making and using the invention, and vending the same to others to be used, without his license or consent.

Defendants filed another special plea, in which they alleged that the plaintiff, when he commenced his suit, was not the owner of the exclusive right secured in the reissued letters patent within any part of the United States; that in certain states and districts he had parted with all his interest in the patent; and that, on the said 24th of February, he assigned and transferred an undivided half of all the residue of his right, title and interest in the same, and, therefore, that the plaintiff had no right to bring this action in his own name against the defendants. Plaintiff demurred to the plea, and the defendants joined in demurrer. Parties were heard, and the court rendered judgment for the defendants, and the plaintiff sued out this writ of error.

Conceded fact is, that the plaintiff was the exclusive owner of the patent in the territorial district where the alleged infringement was committed, throughout the entire period of the infringement, as alleged in the declaration. Express allegation of the declaration is to that effect, and, as the plea is in avoidance and contains no denial of the matters alleged in the declaration, they must be considered as admitted, unless the matters alleged in the special plea are a sufficient answer to the action. Briefly stated, the matter alleged in avoidance of the right of the plaintiff to maintain the suit is, that he, before he commenced the suit, but subsequent to the infringement, sold and assigned an undivided half of his patent for the territorial district where the infringement was committed to a third person.

Patentees have secured to them, by virtue of the letters patent granted to them, the full and exclusive right and liberty, for a prescribed term, "of making and using, and vending to others to be used," their respective inventions or discoveries; and, whenever their rights, as thus defined, are invaded by others, they are entitled to an action on the case to recover actual damages as compensation for the injury. 5 Stat. at Large, 123, § 14.

Such damages may be recovered by action on the case in any circuit court of competent jurisdiction, to be brought in the name or names of the person or persons interested, whether as patentees, assignees or as grantees of the exclusive right, as already defined within and throughout a specified part of the United States. *Id.* Assignees and grantees, as well as the patentee, may, under some circumstances, maintain an action on the case for an infringement, in their own name, as appears by the express words of the act of congress. An assignee is one who holds, by a valid assignment in writing, the whole interest of a patent, or any undivided part of such whole interest, throughout the United States. 5 Stat. at Large, 121, § 11.

Where the patentee has assigned his whole interest, either before or after the patent is issued, the action must be brought in the name of the assignee, because he alone was interested in the patent at the time the infringement took place; but where the assignment is of an undivided part of the patent, the action should be brought for every infringement committed subsequent to the assignment, in the joint names of the patentee and assignee, as representing the entire interest. *Herbert v. Adams*, 4 Mason, 15; *Curtis on Patents* (3d ed.), § 347; *Gayler v. Wilder*, 10 How., 477; *Whittemore v. Cutter*, 1 Gall., 430; *Woodworth v. Wilson*, 4 How., 712.

Settled view at one time was, that the grantee of a territorial right, for a particular district, could not bring an action on the patent in his own name; but the act of congress having made him a party interested in the patent, it is now equally well settled that he may sue in his own name for invasion of the patent in that territorial district, as no one else is injured by any such infringement. *Tyler v. Tuel*, 6 Cr., 324; *Gayler v. Wilder*, 10 How., 477 (§§ 385-396, *supra*); *Curtis on Patents*, § 346. Both assignees and grantees have an interest in the patent, but the terms are not synonymous, as used in the patent law. *Potter v. Holland*, *Law's Digest*, 157.

Grants, as well as assignments, must be in writing, and they must convey the exclusive right, under the patent, to make and use, and vend to others to be used, the thing patented, within and throughout some specified district or portion of the United States, and such right must be exclusive of the patentee, as well as of all others, except the grantee. Suits for infringement in such districts, if committed subsequent to the grant, can only be brought in the name of the grantee, as it is clear that no one can maintain such an action until his rights have been invaded, nor until he is interested in the damages to be recovered.

Alleged infringement in this case was committed in the county of Union, in the state of Pennsylvania, and the admitted fact is that the plaintiff, throughout the entire period of the infringement, was the sole owner of the exclusive right to make and use, and grant to others to make and use, the thing patented, in that territorial district, by virtue of his original title as patentee, having never assigned or granted any right, title or interest within that county. 5 Stat. at Large, 121, § 11.

§ 6306. *Under the patent act of 1836 the original owner of a patent may recover for an infringement during the time of his ownership.*

Grant that these views are correct, and it is clear that unless the plaintiff can maintain the action there can be no redress, as it is too plain for argument that a subsequent assignee or grantee can neither maintain an action in his own name, or be joined with the patentee in maintaining it, for any infringement of the exclusive right committed before he became interested in the patent. Undoubtedly the assignee *thereafter* stands in the place of the patentee, both as to right under the patent and future responsibility; but it is a great mistake to suppose that the assignment of a patent carries with it a transfer of the right to damages for an infringement committed before such assignment. Comment upon the cases cited, as supporting this proposition, is unnecessary, as it is clear to a demonstration that they give it no countenance whatever. Such a proposition finds no support in any decided case, nor in the act of congress upon the subject.

§ 6307. *The meaning of the word "interested," in section 14 of patent act, is that the right of action is given to the person owning the exclusive right at the time the infringement was committed.*

True meaning of the word interested, as employed in the last clause of the fourteenth section of the patent act, when properly understood and applied, is, that the right of action is given to the person or persons owning the exclusive right at the time the infringement is committed. Subsequent sale and transfer of the exclusive right are no bar to an action to recover damages for an infringement committed before such sale and transfer. The reason for the rule is, that the assignee or grantee is not interested in the damages for any infringement committed before the sale and transfer of the patent. Correct interpretation of the words person or persons interested is, that the words mean the person or persons interested in the patent at the time when the infringement was committed, which is the cause of action for which the damages may be recovered. *Dean v. Mason*, 20 How., 198.

Assignment was made in that case after suit was brought, but before the final decree. Proof of the fact was offered and a motion filed to dismiss the case, but the court overruled the motion because the assignees could have no interest in a suit for an infringement committed before their right accrued. *Kilborn v. Rewee*, 8 Gray, 415; 1 Hilliard on T., 521; *Eades v. Harris*, 1 Younge & Collier, 230.

Attempt is made to distinguish the case at bar from the rule established in those cases, but, in the view of this court, without success. Judgment reversed. New venire ordered.

Title — Generally — Recording, §§ 6308, 6309. *Mesne assignment*, § 6310. *Administrators*, §§ 6311, 6312. *Sale of firm property*, § 6313. *Attachment of stock*, §§ 6314, 6315. *Priv-ity*, § 6316. *Title in trust*, §§ 6317, 6318. *Reissue to assignee*, § 6319. *Conveyance in trust*, §§ 6320, 6321. *Patentee's right*, § 6322. *Non-payment of purchase money*, § 6323.

§ 6308. A written instrument executed by the owner of a patent and recorded in the patent office is necessary to the transfer of the title in it to a purchaser. *Ashcroft v. Walworth*, 1 Holmes, 152.

§ 6309. The titles to patents are required by law to be recorded, and a purchaser has a right to rely upon the apparent recorded title, so long as he acts in good faith. *Secombe v. Campbell*, 18 Blatch., 108.

§ 6310. The title to a patent granted an assignee having at the date of its grant no interest of record in the patent, vests, by operation of law, instantly in the ultimate assignee. *Consolidated Electric Light Co. v. Edison Electric Light Co.*, 33 O. G., 1597.

§ 6311. In a suit for the infringement of a patent, the bill alleged and the proofs showed that the letters patent became the property of P., as administratrix of the patentee, as part of his estate, and that complainant was the sole devisee and legatee under the will of P. *Held*, that no property in the patent passed to complainant, and the bill must be dismissed. *Pelham v. Edelmeyer*, 15 Fed. Rep., 262.

§ 6312. From a comparison of the sections of the statutes relating to patents, it is made clear that a patent-right, like any other personal property, is understood by congress to vest in the executors and administrators of the patentee, if he has died without having assigned it. *Shaw Relief Valve Co. v. City of New Bedford*, 19 Fed. Rep., 753.

§ 6313. The title to a patent taken out in the name of one of the members of a firm and never assigned to the firm will not pass by sale of partnership property, although expenses incident to the issue of the patent were paid by the firm, and the patent was used for the benefit of the firm while the partnership lasted. *McWilliams Manufacturing Co. v. Blundell*, 11 Fed. Rep., 419.

§ 6314. The attachment of shares of a stockholder in a corporation does not affect its right to assign letters patent, of which he is the owner. *Gottfried v. Miller*, 14 Otto, 521.

§ 6315. The fact that a person holds stock in a company gives him no title to its property, and the attachment of such stock in the hands of a stockholder for a personal debt of the stockholder does not in any way incumber the property of the company. *Ibid*.

§ 6316. Where suit for infringement was brought against the licensee of a party who, at the time of granting it, had no title in the patent, but subsequently acquired such title in privity with plaintiff, and plaintiff had subsequently agreed to confirm all licenses of such party, *held*, that because of such privity the suit would not lie. *Gottfried v. Miller*, 10 Fed. Rep., 471.

§ 6317. S. and E., patentees, executed an agreement, sale and grant to B., of "the said invention and letters patent or extensions to be hereafter obtained on account of said invention," and containing certain covenants and agreements of quiet enjoyment of all rights under the patent so assigned, and not to make or sell, or cause to be made or sold, any other machine for the purposes to which such patented machine is applicable. *Emmons v. Sladdin*, 9 O. G., 352.

§ 6318. Subsequently S. and L. took out a patent and obtained a reissue thereof for inventions of the same character and purpose of that described in the sale or assignment to B., and brought suit against the plaintiffs herein, who are the purchasers and assignees of B.'s interest. *Held*, that the title of S. and L. must be held to be only in trust for B. and his assigns, so far as the letters patent of the United States embraced any inventions made by S. before the conveyance to B., and incorporated in the invention described in the agreement of sale and grant to B. by S. and E. *Ibid*.

§ 6319. The action of the patent office in reissuing a patent to assignees raises a presumption of title in the assignees named, and if the defendant wished to raise the question as to whether a reservation contained in an assignment included the territory in controversy, he should have raised it in his answer, or at least have put in proof tending to show such fact. *Washburn & Moen Manufacturing Co. v. Haish*, 10 Biss., 65.

§ 6320. The defense that the plaintiff's title fails because one of the parties through whom such title is derived did not own the patent when it was surrendered by and reissued to him was sought to be sustained by showing that a certain instrument of writing was forged by such party by placing it before and attaching it to the genuine execution of another and a different instrument. It appearing that the parties whose assignment such instrument purported to be had knowingly acted under the same. *Held*, that this ratified and confirmed the instrument as good from the beginning. *Campbell v. James*, 17 Blatch., 42.

§ 6321. It appearing that the conveyance was one expressly in trust, upon condition that the plaintiff should have the sole management of the trust until a fair, just and reasonable settlement should be had with the United States for the use of the invention in the postal service of the United States by the postoffice department, *held*, that as no such settlement had been made, the limitation in the conveyance had not expired, and the right to bring suit for infringement was in the plaintiff. *Ibid*.

§ 6322. The rights of a patentee or his assigns, under a new patent, are unaffected by the acquiescence or engagements of those whose title expired with the original patent. *Smith v. Mercer*, 4 West. L. J., 49.

§ 6323. Equity will enforce a lien for purchase money, but it does not vacate a transfer because the purchase money has not been paid. *Perkins v. U. S. Electric Light Co.*, 24 O. G., 204.

Title — *Equitable title*, §§ 6324, 6325. *Legal title*, §§ 6326-6328.

§ 6324. In a court of equity, an equitable title is sufficient, as against the patentee and those claiming under him with notice of the complainant's rights, to entitle the latter to sue. *Ruggles v. Eddy*, 10 Blatch., 52.

§ 6325. In a court of equity a party holding an equitable title cannot be ousted of his equitable rights by the holder of the legal title, who in such case stands as trustee for the party beneficially interested. *Whiting v. Graves*, 13 O. G., 455.

§ 6326. The legal title to the patent being in the plaintiff, it constitutes no defense to the action to make a showing of equitable interests in other parties. *Graham v. McCormick*, 10 Biss., 39.

§ 6327. Letters patent having been issued directly to the defendant as assignee, it acquired the legal title. *Perkins v. United States Electric Light Co.*, 24 O. G., 204.

§ 6328. Where complainant had acquired the legal title to the patent, *held*, that it must prevail over the equitable title of defendant, unless acquired with notice of the equities of defendant. *Davis Improved Wrought Iron Wagon Wheel Co. v. Davis Wrought Iron Wagon Co.*, 20 Fed. Rep., 699.

§ 6333. A question of title raised by demurrer cannot be disposed of by amendment. *Shaw Relief Valve Co. v. City of New Bedford*, 19 Fed. Rep., 753.

366. TRIAL OUT OF EQUITY.

Trial out of equity — *Lies in the discretion of the court*, §§ 6334-6338. *When granted*, §§ 6339, 6340. *Findings are not conclusive*, §§ 6341-6343. *When verdict will be set aside*, § 6344. *Practice*, §§ 6345, 6346. *Particular cases*, §§ 6347-6349.

§ 6334. Allowance of a jury trial to settle the question of infringement out of equity is a matter of sound discretion with the court and not one of right. *Brooks v. Norcross*, 2 Fish., 661.

§ 6335. A jury trial out of equity lies in the discretion of the court. *Ely v. Monson & Brimfield Mfg. Co.*, 4 Fish., 64.

§ 6336. Where it is discretionary with a court of equity whether it will first send a case to be tried at law, and it exercises its discretion to decide the case upon its merits without the aid of a jury of any sort, such action is not a ground of appeal. *Cochrane v. Deener*, 4 Otto, 781.

§ 6337. But if the appellate court were convinced that the case was not properly decided, and could not be properly decided without such a reference, it might, in the exercise of its own discretion, remand it to the court below for that purpose. *Ibid.*

§ 6338. Upon a bill in equity for the infringement of a patent it is a matter of discretion, and not of jurisdiction, whether a case shall be first tried at law; and in this matter the courts of the United States, sitting as courts of equity in patent cases, are much less disposed than the English courts are to send parties to a jury before assuming to decide upon the merits. *Ibid.*

§ 6339. Feigned issue out of chancery is not granted as a matter of course; it will not be granted on an old patent, long in use and established by decisions. *Van Hook v. Pendleton*, 1 Blatch., 187.

§ 6340. If the conscience of the court is in such doubt as to need the verdict of a jury, it will obtain it; but it cannot be on account of a request by a party or on a question of infringement involving law as well as fact. *Brooks v. Norcross*, 2 Fish., 661.

§ 6341. A verdict upon an issue ordered by a court of equity is not final. *Allen v. Blunt*, 3 Story, 742.

§ 6342. The finding of a jury out of equity is not conclusive; it only aids the court. *Ely v. Monson & Brimfield Mfg. Co.*, 4 Fish., 64.

§ 6343. The verdict of a jury upon an issue out of chancery is only advisory, and never conclusive upon the court. It is intended to inform the conscience of the chancellor, and may be disregarded and a decree rendered contrary to it. *Watt v. Starke*, 17 O. G., 1092.

§ 6344. Verdict of a jury on an issue out of chancery will not be set aside, unless the preponderance of evidence against it is great. *Brooks v. Bicknell*, 4 McL., 70.

§ 6345. Rules as to issues directed out of chancery. *Ibid.*

§ 6346. On an issue out of chancery to try the validity of patent, the proper notices of persons and place where the patented article was before used must be set out. *Orr v. Merrill*, 1 W. & M., 376.

§ 6347. After a verdict for plaintiff, refusal of a new trial, on bill for perpetual injunction, answer and ratification, defendants were allowed to amend answer, and a feigned issue was granted to try novelty of plaintiff's invention in view of newly discovered evidence. *Foote v. Silsby*, 1 Blatch., 545.

§ 6348. Where the case has been set down for final hearing without motion or order for a trial at law, and the opinion of the court is so formed as not to be affected by the verdict, and a long delay would be involved, the court refused to exercise its discretion in ordering such trial before granting an injunction. *Goodyear v. Day*, 2 Wall. Jr., 283.

§ 6349. Where it appeared that a trial at law and a hearing in equity had already been had, and that both had resulted favorably to complainant's patent, a motion to bring an action at law to determine the several matters involved in the suit was overruled. *Howe v. Williams*, 2 Cliff., 245.

SUMMARY (PENNSYLVANIA R. CO. *v.* LOCOMOTIVE ENGINE SAFETY TRUCK CO., § 6351) — *Analogous use*, § 6351.PENNSYLVANIA RAILROAD COMPANY *v.* LOCOMOTIVE ENGINE SAFETY TRUCK COMPANY.

(110 U. S., 490-498; 27 Official Gazette, 207. 1884.)

APPEAL from U. S. Circuit Court, Eastern District of Pennsylvania.

Opinion by MR. JUSTICE GRAY.

STATEMENT OF FACTS.—This is an appeal by the defendant below, from a decree against it, upon a bill in equity for the infringement of letters patent [No. 34,377], granted on February 11, 1862, to Alba F. Smith for an improvement in trucks for locomotive-engines, the specification annexed to which, except the drawings and the letters referring to them, and the formal beginning and conclusion, was as follows:

“Several laterally-moving trucks have heretofore been made and applied to railroad cars. My invention does not relate broadly to such laterally-moving trucks, but my said invention consists in the employment, in a locomotive-engine, of a truck or pilot wheels provided with pendent links, to allow of a lateral movement, so that the driving-wheels of the locomotive-engine continue to move correctly on a curved track in consequence of the lateral movement allowed by said pendent links, the forward parts of the engine traveling as a tangent to the curve, while the axles of the drivers are parallel, or nearly so, to the radial line of the curve. In the drawing I have represented my improved truck itself. The mode of applying the same to any ordinary locomotive-engine will be apparent to any competent mechanic, as my truck can be fitted in the place of those already constructed, or the same may be altered to include my improvement.”

The specification then refers to the drawings, showing the wheels, the axles and the frame of any ordinary locomotive-truck, made in any usual manner, with the center cross-bearing plate or platform of two thicknesses of iron plate riveted together, strengthened by cross-bars beneath, and embracing at its ends the upper bars of the frame, a bolster made of a flanged bar, the king-bolt passing through the center of the bolster, and also through an elongated opening in the plate, so as to allow of lateral motion to the truck beneath the bolster, and at the same time becoming a connection to hold the truck to the engine, the bolster taking the weight of the engine in the middle, and itself suspended at the ends of bars attached to the moving ends of pendent links attached by bolts at their upper ends to brackets on the frame, and the distance between the bars, transversely of the truck, slightly more than between the bolts, so that the pendent links diverge slightly. The specification then proceeds:

“When running upon a straight road, the engine preserves great steadiness, because any change of position transversely of the track, in consequence of the engine moving over the truck or the truck beneath the engine, is checked by the weight of the engine hanging upon the links, and in consequence of

their divergence any side movement causes the links on the side toward which the movement occurs to assume a more inclined position, while the other links come vertical, or nearly so. Hence the weight of the engine acts with a leverage upon the most inclined links, to bring them into the same angle as the others, greatly promoting the steadiness of the engine in running on a straight line. As the pilot or truck wheels enter a curve, a sidewise movement is given to the truck, in consequence of the engine and drivers continuing to travel as a tangent to the curve of the track. This movement and the slight turn of the whole truck on the king-bolt not only causes the wheels to travel correctly on the track, with their axles parallel to the radial line of the curve of track, but also elevates the outer side of the engine, preventing any tendency to run off the track upon the outer side of the curve. Upon entering a straight track the truck again assumes the central position, and in case of irregularity in the track or any obstruction the truck moves laterally without disturbing the movement of the engine.

“I do not claim laterally-moving trucks, nor pendent links, separately considered, but what I claim and desire to secure by letters patent is the employment, in a locomotive-engine, of a truck or pilot-wheels fitted with the pendent links, to allow of lateral motion to the engine, as specified, whereby the drivers of said engine are allowed to remain correctly on the track, in consequence of the lateral motion of the truck allowed for by said pendent links when running on a curve, as set forth.”

The invention, then, as claimed, is for the combination, with a locomotive-engine, of a truck, of which the king-bolt, forming the connection to hold the truck to the engine, passes through a bolster and through an elongated opening in the plate or platform of the truck, so as to allow the truck to have a lateral motion beneath the bolster, and the bolster takes the weight of the engine in the middle, and is suspended from the frame of the truck by pendent and slightly-divergent links, so that any movement of the engine or truck sidewise, as in entering upon or passing over a curve of the track, causes the links on the side toward which the engine moves to assume a more inclined position, and the other links to become nearly vertical, and the weight of the engine hanging upon the links checks its own lateral movement and tends to bring both sets of links back to their original angle. In railroad cars the trucks were allowed to swivel around the king-bolt before 1841. The transverse slot and pendent links, allowing a lateral motion, were used by Davenport and Bridges in 1841. In 1859 Kipple and Bullock made the pendent links divergent, and at the time of Smith's invention the trucks of railroad cars had all the elements of the truck put by him under the front of a locomotive-engine. The question, therefore, is whether employing as the forward truck of a locomotive-engine with fixed driving-wheels a truck already in use on railroad-cars has the novelty requisite to sustain a patent.

After carefully considering the evidence and arguments in this case and the reasons assigned for sustaining Smith's patent, in the opinion of the court below, reported in 1 Ban. & Ard., 470, and in the opinion rendered by the circuit court in the second circuit in *Locomotive Engine Safety Truck Co. v. Erie Railway Co.*, reported in 6 Fish. Pat. Cas., 187, and in 10 Blatchford, 292, this court finds itself unable to escape from the conclusion that the application of the old truck to a locomotive-engine neither is a new use nor does it produce a new result.

In both engine and car the increased friction against the rails and the danger of being thrown off the track in entering upon or passing along a curve are due to the impulse of forward motion in a direction tangential to the curve and to the influence of centrifugal force. In the engine, as in the car, the object and the effect of the transverse slot allowing a slight lateral motion, and of the divergent pendent links by means of which the weight of the engine or car itself helps to keep it upon the track, are to secure steadiness and safety by lessening the friction against the rails and the danger of being thrown off the track. The only difference is that, by reason of the fixed position of the driving-wheels of the engine, the truck, which has before been applied at each end of a car can only be applied at the forward end of the engine, and therefore the accommodation of the movement of the engine to the curve of the track may be less complete than in the case of the car. The effect of the invention upon the engine as compared with its effect upon the car is the same in kind, though perhaps less in degree.

§ 6351. *The application of an old process or machine to a similar or analogous subject, with no change in the manner of applying it, and no result substantially distinct in its nature, will not sustain a patent, even if the new form of result has not before been contemplated.*

It is settled by many decisions of this court, which it is unnecessary to quote from or refer to in detail, that the application of an old process or machine to a similar or analogous subject, with no change in the manner of application, and no result substantially distinct in its nature, will not sustain a patent, even if the new form of result has not before been contemplated. *Hotchkiss v. Greenwood*, 11 How., 248; *Phillips v. Page*, 24 How., 164, 167; *Jones v. Morehead*, 1 Wall., 155, overruling S. C., nom.; *Livingston v. Jones*, 1 Fish. Pat. Cas., 521; *Hicks v. Kelsey*, 18 Wall., 670; *Smith v. Nichols*, 21 Wall., 112; *Brown v. Piper*, 91 U. S., 37 (§§ 6354-57, *infra*); *Roberts v. Ryer*, 91 U. S., 150; *Keystone Bridge Co. v. Phoenix Iron Co.*, 95 U. S., 274, 276 (§§ 807-10, *supra*); *Planing Machine Co. v. Keith*, 101 U. S., 479, 491; *Pearce v. Mulford*, 102 U. S., 112; *Heald v. Rice*, 104 U. S., 737, 754-756; *Atlantic Works v. Brady*, 107 U. S., 192.

In the well known case of *Crane v. Price*, in which the English court of common pleas upheld a patent for using anthracite instead of bituminous coal with the hot-blast in smelting iron ore, the evidence, as Chief Justice Tindal remarked, proved beyond doubt that in the result of the combination of the hot-air blast with the anthracite not only was the yield of the furnace more and the expense of making the iron less, but "the nature, properties and quality of the iron were better" than under the former process, by means of the combination of the hot-air blast with bituminous coal. 4 Man. & Gr., 580, 604; 5 Scott, N. R., 388, 389; 1 Webster, Pat. Cas., 393, 410. And the decision rests, as was pointed out by Chief Baron Pollock and Baron Parke, in *Dobbs v. Penn*, 3 Exch., 427, 432, 433, and by Mr. Justice Bradley in *Hicks v. Kelsey*, above cited, upon the ground that a new metal or composition of matter was produced. As observed by Mr. Justice Bradley: "In compositions of matter a different ingredient changes the nature of the compound; whereas, an iron bar in place of a wooden one, and subserving the same purpose, does not change the identity of a machine." 18 Wall., 674.

So in *Smith v. Goodyear Dental Vulcanite Co.*, in this court, as was observed by Mr. Justice Strong in delivering its judgment: "A new product was the

result, differing from all that had preceded it, not merely in degree of usefulness and excellence, but differing in kind, having new uses and properties. 93 U. S., 486, 494." See, also, *Goodyear Dental Vulcanite Co. v. Davis*, 102 U. S., 222.

Upon the principles which must govern this case, the decisions of this court and of the highest courts of England are in full accord, as will appear by referring to three cases, fully argued and considered, all of which were carried to the exchequer chamber, and two of which were finally decided in the house of lords. In *Bush v. Fox* a patent for constructing the interior of a caisson or cylinder with successive chambers to work in, "in such manner that the work-people may be supplied with compressed air, and be able to raise the material excavated, and to make or construct foundations and buildings," under water, when a similar apparatus had already been used for working underground on land, was held by Chief Baron Pollock, by the court of exchequer chamber, and by the house of lords, to be void for want of novelty, after able arguments in support of the patent by Sir Alexander Cockburn, then attorney-general, and by Mr. Webster, the accomplished patent counsel, at the successive stages of the case. *Macrory*, Pat. Cas., 152, 167, 179; 9 Exch., 651; 5 H. L. Cas., 707.

So the court of queen's bench held that the finishing of yarns of wool or hair by a process previously applied to yarns of cotton and linen, by subjecting them, while distended and kept separate, to the action of rotatory beaters or burnishers, by which they would be burnished or polished on all sides, was not the subject of a patent, because, as Lord Campbell said, in order to sustain a patent for the application of an old process to a new purpose, "there must be some invention in the manner in which the old process is applied." "Here there is no novelty in the mode of application," "but merely the application of a known process by a known means to another substance." *Brook v. Aston*, 27 Law Journal (N. S.), Q. B., 145; S. C., 4 Jurist (N. S.), 279; S. C., with the opinion less fully reported, 8 E. & B., 478. The judgment was unanimously affirmed in the exchequer chamber. Of the opinions there delivered it is sufficient to quote from that of Baron Martin, who, after expressing his concurrence in the statement of Mr. Justice Willes in *Patent Bottle Envelope Co. v. Seymer*, 28 Law Journal (N. S.), C. P., 22, 24; S. C., 5 C. B. (N. S.), 164, 173, that "the application of a well-known tool to work previously untried materials or to produce new forms is not the subject of a patent," added, "when a machine is well known, it becomes in fact a tool." 28 Law Journal (N. S.), Q. B., 175, 176; 5 Jurist (N. S.), 1025, 1027.

But perhaps the most important English case is that of *Harwood v. Great Northern R'y Co.*, 2 B. & S., 194, 222, and 11 H. L. Cas., 654. In that case a patent was obtained for "improvements in fishes and fish-joints for connecting the rails of railways." In the specification the patentee stated that in securing the joints of rails it had been found advantageous to attach to each side of the rails, by means of bolts and rivets, pieces of iron commonly called "fishes," and described his invention as consisting in making the fishes with a groove or recess in their outer surfaces, so as to receive the square heads of the bolts or rivets, and to prevent them from turning round while the nuts on the other side were being screwed on or off, and also to avoid the danger of the flanges of the wheels of the carriages striking against the heads; and he claimed "the constructing fishes for connecting the rails of railways with a

groove adapted for receiving the heads of the bolts or rivets employed for securing such fishes, and the application of such fishes for connecting the rails of railways."

In an action for the infringement of that patent it appeared that fishes for connecting the rails of railways had never before been made with a groove or recess in their outer surfaces, so as to receive the square heads of the bolts; but it was proved that in the construction of several railway bridges, beams of timber had been laid horizontally one above the other, and fastened or bolted together with bolts and nuts, horizontal bars or plates of iron placed beneath, parallel to and in contact with the beams, and fastened or bolted by the same bolts and nuts, and each of these bars or plates of iron constructed with a groove in its under surface, which received the square heads of the bolts, and which served the double purpose of strength and of preventing the heads of the bolts from turning round. In those bridges there were no joints to be fished by the bars or plates of iron, nor were there corresponding bars or plates of iron above the horizontal beams of timber. But it was also proved that a bridge, known as the "Hackney bridge," having too great a span to be conveniently crossed by a single beam, had been constructed with two horizontal longitudinal beams of timber on each side, the ends of which met and were joined together in the middle of the bridge by scarf-joints; that beneath those beams were transverse planks, constituting the flooring of the bridge; and beneath the planks were bars of grooved iron, like those used in the other bridges, carried under the scarf-joints and under the whole length of the horizontal beams; that above and immediately over each scarf-joint, extending eighteen inches beyond each end of the joint, and resting immediately upon the longitudinal beam, was a horizontal flat plate of iron thirteen feet in length, and that the bolts passed upward through the grooved iron bars, the transverse planking, and the longitudinal beams, and also, at the middle of the bridge, through the plates of iron over the scarf-joints. A verdict supporting the patent was obtained under the rulings of Lord Chief Justice Cockburn and affirmed by the court of queen's bench; but its judgment was unanimously reversed in the exchequer chamber in a considered judgment delivered by Mr. Justice Willes, and the judgment of reversal was affirmed by the house of lords in accordance with the opinions of Lord Chancellor Westbury, Lord Cranworth and Lord Wensleydale, and of a majority of the judges who attended, upon the ground, as stated by the lord chancellor, that the application of the channeled iron horizontally under the timbers of a bridge being well known, "the channeled iron was applied in a manner which was notorious, and the application of it to a vertical fish would be no more than the application of a well known contrivance to a purpose exactly analogous or corresponding to the purpose to which it had been previously applied." 11 H. L. Cas., 683. And all who gave opinions in the house of lords concurred with the court of exchequer chamber in the proposition of law that the mere application of an old contrivance in an old way to an analogous subject, without any novelty in the mode of applying such old contrivance to the new purpose, is not a valid subject-matter of a patent. 2 B. & S., 228; 11 H. L. Cas., 666, 672, 682, 684, 685.

In the case at bar the old contrivance of a railroad-truck, with the swiveling king-bolt, transverse slot, and pendent divergent links, already in use under railroad cars, is applied in the old way, without any novelty in the mode of

applying it, to the analogous purpose of forming the forward truck of a locomotive-engine. This application is not a new invention, and therefore not a valid subject of a patent.

The decree of the circuit court must therefore be reversed, and the case remanded, with directions to dismiss the bill.

§ 6352. Where the particular position of machinery claimed is not new, but has existed before in other somewhat different machines, where it was applied to analogous purposes, the objection is fatal. *Moody v. Fiske*, 2 Mason, 112.

§ 6353. A mere analogous use is not patentable; but when a new or improved manufacture is produced by new contrivances, combinations or arrangements, a new principle may be constituted, and the application or practice of old things will of course be new also. *In re Smith*, 1 MacA. Pat. Cases, 255.

See *Invention*, §§ 3519-3524, 3600-3605.

Use — Double.

SUMMARY (*BROWN v. PIPER*, §§ 6354-6357) — *Double use; patentability*, § 6354. — *State of the art; admissibility in evidence, without notice*, § 6355. — *Judicial notice*, §§ 6356, 6357.

BROWN v. PIPER.

(1 Otto, 37-44. 1875.)

APPEAL from U. S. Circuit Court, District of Massachusetts.

Opinion by Mr. JUSTICE SWAYNE.

STATEMENT OF FACTS.—The bill is founded upon two patents granted by the United States to the appellee,—one numbered 732 [now numbered 31,736], of the 19th of March, 1861; the other numbered 36,107, and dated August 5, 1862. The second and later patent was not relied upon in the argument here, and may, therefore, be laid out of view. Our attention will be confined to the prior one. It is declared in the specification to be “for a new and improved method of preserving fish and meats.” The invention is alleged to consist “in a method of preserving fish and other articles in a chamber, and cooling the latter by means of a freezing mixture, so applied that no communication shall exist between the interior of the preserving chamber and that of the vessels in which the freezing mixture is placed.” The specification continues: “I do not profess to have invented the means of artificial congelation, nor to have discovered the fact that no decay takes place in animal substances so long as they are kept a few degrees below the freezing point of water; but the practical application of them to the art of preserving fish and meats, as above described, is a new and very valuable improvement. The apparatus for freezing fish and keeping them in a frozen state may be constructed in various ways and of different shapes. The apparatus shown in the drawing, however, will suffice to illustrate the principle and mode of operation.”

The process and apparatus are then described as follows: A box of wood or other suitable material, surrounded by a packing of charcoal or other non-conducting substance, is to be provided, and the fish in small quantities laid in it on a rack. Metallic pans filled with a freezing mixture, such as salt and ice, are then to be set over them, and a cover shut over the pans. “In about twenty-four hours, the freezing mixture having been changed once in twelve hours, the fish will be frozen completely through.” After being frozen, the fish or meat may, if desired, be covered with a thin coating of ice; and this coating may be preserved by applying the substances named, which will exclude the air, and prevent the juices from escaping by evaporation. “The

fish are then *to be packed closely* in a large preserving box, which is inclosed in a still larger box; the space between the boxes being filled with charcoal or other non-conducting material, to exclude the heat." Other minor details are described, which it is not deemed material to repeat. The patentee then declares: "I do not desire to be understood as confining myself to the specific apparatus above described, nor to the use of either or both the preliminary processes of freezing and cooling; but I have described the mode of operation, which, by experience, I have found best for preserving the most delicate varieties of fish." The summation and claim are: "Having described my invention, what I claim as new, and desire to secure by letters patent, is, *preserving fish or other articles in a close chamber by means of a freezing mixture, having no contact with the atmosphere of the preserving chamber, substantially as set forth.*"

The patent is not for the principle long and well known to physicists, that a low degree of cold, like a high degree of heat, prevents the decay of animal matter; nor is it for the freezing of the articles to be preserved before or after they are placed in the preserving chamber; nor is it for applying, by means of an apparatus with any particular details of construction, cold to the articles to be preserved; nor is it for the frigorific effect of the freezing mixture upon the atmosphere of the inner chamber; but it is for the application to such articles of the degree of cold necessary to preserve them, by means of "a close chamber," in which they are to be placed, and "a freezing mixture, having no communication with the atmosphere of the preserving chamber."

If this result be reached by the means designated in any way substantially the same with that described, having the feature of the non-contact of the freezing mixture with the air of the preserving chamber, there is a clear invasion of the territory which the patentee has marked out and seeks to appropriate to himself.

It was earnestly maintained by the learned counsel for the appellee that the essence of the invention is the creation of "a freezing atmosphere" in the preserving chamber. To this there are several answers. There is nothing in the specification or claim to warrant the proposition. The direction is that "the fish are to be packed closely." This implies clearly that as many fish are to be put into the preserving chamber as it can be made to contain.

Atmospheric air is itself an agent of decay; and in all such cases it is important to preclude as far as possible its presence and contact. "If air be absolutely excluded, putrefaction ceases; and the result is the preservation of the substance in some circumstances, perhaps in all." 3 Ure's Dict. of Arts, 548. "On this principle is founded Appert's process, by which easily decomposable articles of food and drink, such as meat, fish, vegetables, milk, etc., are preserved for years; viz., by packing them in air-tight bottles or soldered tin cans, heating the vessels for several hours in boiling water, and keeping them carefully closed." 2 Watts' Dict. of Chem., 625. The patentee is to be presumed to have known this property of air.

The patent is for "a new and useful improvement" in the art to which it relates. It was issued under the act of July 4, 1836. The rights of the parties are to be considered in the light of that act. The defense relied upon in the answer is the want of novelty; and several instances of prior use and knowledge, with the requisite circumstances of time, place and persons, are alleged.

We deem it sufficient to consider one of them. On the 17th of August,

1842, a patent was issued to John Good "for a corpse preserver." The apparatus, as described, was an outer case with a close-fitting lid. The case was made double; there being a partition to within four or five inches, more or less, of the top of the outer one, leaving a space between the two of several inches, which was to be filled with ice. There was a false bottom with holes in it in the inner compartment. It rested upon ledges, which kept it four or five inches above the bottom. The intervening space was a receptacle for ice. The corpse was deposited upon the false bottom. A tray was placed over it, and under the lid. The tray was four or five inches deep, used to contain the freezing mixture, and had a flange to prevent the mixture from escaping. Proper outlets were provided for the passage of the water from the melting ice. There was no communication between the tray containing the freezing mixture and the inner compartment containing the body. Swartz, an intelligent and unimpeached witness, was examined on the 15th of October, 1869. He testified that he was an undertaker, and had used the apparatus for about twenty years, sometimes with ice under the false bottom, and sometimes without it. In either case he applied a sufficient degree of cold to prevent putrefaction before interment. He thought the bodies were sometimes frozen, but was not certain. The material point in his business was the prevention of decay for the time being; and that was always accomplished.

Here was the application of the requisite degree of cold exactly in the manner called for in the specification of the appellee. This is hardly denied; but it is insisted that the process was never applied by the witness to the preservation of fish and meats.

§ 6354. *The application of an old process to a new subject, without any exercise of the inventive faculty, or the development of any idea which can be deemed new or original in the sense of the patent law, is not patentable.*

The answer is, that this was simply the application by the patentee of an old process to a new subject, without any exercise of the inventive faculty, and without the development of any idea which can be deemed new or original in the sense of the patent law. The thing was within the circle of what was well known before, and belonged to the public. No one could lawfully appropriate it to himself, and exclude others from using it in any usual way for any purpose to which it may be desired to apply it. This is fatal to the patent. *Ames v. Howard*, 1 Sumn., 487; *Howe v. Abbot*, 2 Story, 194; *Bean v. Smalwood*, id., 411; *Winans v. B. & P. R. R.*, id., 412; *Hotchkiss v. Greenwood*, 11 How., 248.

§ 6355. *Evidence of the state of the art (which consists of proof of what was old and in general use at the time of the alleged invention) is admissible in actions at law under the general issue, without special notice, and in equity cases without any averment in the answer touching the subject.*

There is another view of the case that may properly be taken. Evidence of the state of the art is admissible in actions at law under the general issue without a special notice, and in equity cases without any averment in the answer touching the subject. It consists of proof of what was old and in general use at the time of the alleged invention. It is received for three purposes, and none other,—to show what was then old, to distinguish what was new, and to aid the court in the construction of the patent.

§ 6356. *Things of which the court will take judicial notice enumerated and defined.*

Of private and special facts, in trials in equity and at law, the court or jury,

as the case may be, is bound carefully to exclude the influence of all previous knowledge. But there are many things of which judicial cognizance may be taken. "To require proof of every fact, as that Calais is beyond the jurisdiction of the court, would be utterly and absolutely absurd." *Gresley's Ev. in Eq.*, 294. Facts of universal notoriety need not be proved. See *Taylor's Ev.*, sec. 4, note 2. Among the things of which judicial notice is taken are the law of nations; the general customs and usages of merchants; the notary's seal; things which must happen according to the laws of nature; the coincidences of the days of the week with those of the month; the meaning of words in the vernacular language; the customary abbreviations of christian names; the accession of the chief magistrate to office, and his leaving it. In this country, such notice is taken of the appointment of members of the cabinet, the election and resignations of senators, and of the appointment of marshals and sheriffs, but not of their deputies. The courts of the United States take judicial notice of the ports and waters of the United States where the tide ebbs and flows, of the boundaries of the several states and judicial districts, and of the laws and jurisprudence of the several states in which they exercise jurisdiction.

§ 6357. *Courts will take judicial notice of whatever is generally known and used within their jurisdiction.*

Courts will take notice of whatever is generally known within the limits of their jurisdiction; and, if the judge's memory is at fault, he may refresh it by resorting to any means for that purpose which he may deem safe and proper. This extends to such matters of science as are involved in the cases brought before him. See 1 *Greenleaf's Ev.*, 11; *Gresley's Ev.*, *supra*; and *Taylor's Ev.*, sec. 4 and *post*. In *The Ohio L. & T. Co. v. Debolt*, 16 How., 435, it was said to be "a matter of public history, which this court cannot refuse to notice, that almost every bill for the incorporation of companies" of the classes named is prepared and passed under the circumstances stated. In *Hoare v. Silverlock*, 12 Ad. & Ell., N. S., 624, it was held that where a libel charged that the friends of the plaintiff had "realized the fable of the frozen snake," the court would take notice that the knowledge of that fable existed generally in society. This power is to be exercised by courts with caution. Care must be taken that the requisite notoriety exists. Every reasonable doubt upon the subject should be resolved promptly in the negative.

The pleadings and proofs in the case under consideration are silent as to the ice-cream freezer. But it is a thing in the common knowledge and use of the people throughout the country. Notice and proof were, therefore, unnecessary. The statute requiring notice was not intended to apply in such cases. The court can take judicial notice of it, and give it the same effect as if it had been set up as a defense in the answer and the proof were plenary. See *M. & A. Glue Co. v. Upton*, 6 Patent Off. Gaz., 843, and *Needham v. Washburn*, 7 id., 651,—both decided by Mr. Justice Clifford upon the circuit. We can see no substantial diversity between that apparatus and the alleged invention of the appellee. In the former, as in the apparatus of the appellee, "the freezing mixture" has "no contact with the atmosphere" of the chamber where the work is to be done. If the freezer be full, and the preserving chamber be full, there would be room for but little air in either. If either were only partially full, the vacuum would be filled with that substance. The cold is generated by the same materials and applied under the same circumstances. If the cream were taken out of the freezer and fish put in, there would be, in all substantial respects, the same apparatus, process and result. If the preserving

chamber were as tight as the freezer, either might be convertibly used for the purpose of the other.

“The preservative effect of cold, and especially of dry cold, is well known and exemplified in the keeping of meat and fruit in ice-houses. Animals have been found undecomposed in the ice of Siberia which belong to extinct species, and which must have been embalmed in ice for ages.” Tit. “Antiseptic,” 1 Amer. Encyclo., 570.

Artificial freezing is usually applied to water and articles of food. “There are two general methods of effecting it, viz.: by liquefaction and by vaporization and expansion. The method by liquefaction is performed by freezing mixtures, which are formed by mixing together two or more bodies, one or all of which may be solid. They are used together in vessels having three or more concentric apartments,—an inner one, containing the article to be frozen; one eccentric to this, containing the freezing mixture, provided with some contrivance for agitation; one, again, outside of this, filled with a non-conductor of heat, as powdered charcoal, gypsum or cotton wood; and sometimes one between them for holding water.” Tit. “Freezing,” 7 Amer. Encyclo., 474.

Here the principle and substance of the appellee’s claim are set forth as belonging to the general domain of knowledge and science. It is known that Lord Bacon applied snow to poultry to preserve it. He said the process succeeded “excellently well.” The experiment was made in his old age, imprudently, and brought on his last illness. Examined by the light of these considerations, we think this patent was void on its face, and that the court might have stopped short at that instrument, and without looking beyond it into the answers and testimony, *sua sponte*, if the objection were not taken by counsel, well have adjudged in favor of the defendant. These views render it unnecessary to consider the exceptions to the master’s report.

The decree of the circuit court is reversed, and the cause will be remanded with directions to dismiss the bill. (a)

Use — Double — Defined, §§ 6358, 6359. *Is not patentable,* §§ 6360-6377. See *Patentability*, §§ 4551-4559.

§ 6358. What is and what is not double use. *Strong v. Noble*, 6 Blatch., 477.

§ 6359. An invention must involve a new principle. When the principle of the alleged invention has been discovered and applied before, the new application of it will be what is called a double use. In such cases, although there may be in the new application some degree of novelty — something may have been discovered or found out that was not known before — yet, unless the new occasion on which the principle is applied leads to some kind of new manufacture or to some new result, it will be but a double use. *In re Blandy*, 1 MacA. Pat. Cases, 552.

§ 6360. Mere application of an old device to a new use is not patentable. *Gallahue v. Butterfield*, 10 Blatch., 232; *Hawes v. Washburn*, 5 O. G., 491; *Ames v. Howard*, 1 Sumn., 482; *Teese v. Phelps*, 1 McAl., 48; *Roberts v. Ryer*, 1 Otto, 150; *Beane v. Smallwood*, 2 Story, 409.

§ 6361. The mere application of an existing machine or organization to a new use is not the subject-matter of a patent. *Conover v. Roach*, 4 Fish., 12; *Phillips v. Page*, 24 How., 164.

§ 6362. The application of an ordinary power to an ordinary purpose is not an invention within the meaning of the patent law. *Cochrane v. Waterman*, 1 MacA. Pat. Cases, 52.

§ 6363. Mere use of a mechanical structure for a different purpose is not of itself patentable. *Judson v. Moore*, 1 Bond, 285.

§ 6364. The application of an old machine to a new use, or to a new purpose, or the application of an old process to a new result, is not a patentable invention. *Bray v. Hartshorn*, 1 Cliff., 538.

(a) The above disposes, also, of *Piper v. Moon*, 1 Otto, 44.

§ 6365. The application of old devices to a new use, where it involves no new means and produces no new effects, is not patentable, although it may be useful to combine two results by uniting two instrumentalities. *Sawyer v. Bixby*, 9 Blatch., 361.

§ 6366. The application of an old fabric to a new use, requiring nothing new to adapt it, is not invention. *Smith v. Elliott*, 9 Blatch., 400.

§ 6367. If the effect of the old contrivance, when applied to the new object, is simply a better and therefore more useful accomplishment of the old effect, in an analogous object, by the use of precisely the same means, the application of the new use is not patentable. *In re Arkel*, 15 Blatch., 437.

§ 6368. A new use or application of a material or composition previously known is not invention. *Matthews v. Skates*, 1 Fish., 602.

§ 6369. A composition having been described in a prior patent, one who applies it to a new use cannot claim the composition as his invention. *United States & Foreign Salamander Felt-ing Co. v. Haven*, 3 Dill., 131.

§ 6370. A patent cannot be sustained where old and known methods and elements are used, and the novelty consists only in the use of a new material, although producing a better and cheaper article. *Hotchkiss v. Greenwood*, 11 How., 248.

§ 6371. The application of an old process to manufacture an article to which it has never before been applied is not patentable invention. *Howe v. Abbott*, 2 Story, 191.

§ 6372. The mere carrying forward, or new or more extended application, of the original thought, a change only in forms, proportions or degree, doing substantially the same thing in the same way, by substantially the same means, with better results, is not such an invention as will sustain a patent. *Roberts v. Ryer*, 1 Otto, 150.

§ 6373. The adoption for the fastening and laying of metallic shingles of the means which had always been employed for laying and fastening wooden shingles is an application of old instrumentalities to a new but cognate use, which did not involve original thought or inventive skill. *American Iron Co. v. Anglo-American Roofing Co.*, 16 Fed. Rep., 915.

§ 6374. Where the change consists merely in the employment of an obvious substitute, the discovery and application of which could not have involved the exercise of the inventive faculty in any considerable degree, the change will then be treated as merely an unsubstantial colorable variation, or a double use. *Stephens v. Salisbury*, 1 MacA. Pat. Cases, 379; *In re Everson*, 1 MacA. Pat. Cases, 406.

§ 6375. To defeat a patent on the ground of double use, it must be shown that the process described in the specification was known before, and had been applied in the same way to some analogous purpose. *Roberts v. Dickey*, 4 Brewster, 260.

§ 6376. It does not constitute patentable novelty to put an additional lock on a door, where one had been used before; it is mere double use. *Yale Lock Mfg. Co. v. Berkshire Nat. Bank*, 17 Fed. Rep., 531.

§ 6377. The application to a portable steam-engine of a hollow bed-plate fastened to the boiler, and supporting the operative parts of the engine out of contact with the boiler, whereby these parts will not be affected by the expansion and contraction of the boiler, *held*, not to be a patentable invention, in view of the fact that similar bed-plates had previously been used in various parts of the engine for a similar purpose. It is an obvious application, and a mere double use of an old device. *In re Blandy*, 1 MacA. Pat. Cases, 552.

See *Claims, Construction of*, § 791. *Invention*, §§ 3519-3524, 3600-3605.

ELIZABETH v. PAVEMENT COMPANY.

(7 Otto, 126-144. 1877.)

APPEAL from U. S. Circuit Court, District of New Jersey.

Opinion by MR. JUSTICE BRADLEY.

STATEMENT OF FACTS.—This suit was brought by the American Nicholson Pavement Company against the city of Elizabeth, N. J., George W. Tubbs,

and the New Jersey Wood-paving Company, a corporation of New Jersey, upon a patent issued to Samuel Nicholson, dated August 20, 1867, for a new and improved wooden pavement, being a second reissue of a patent issued to said Nicholson August 8, 1854. The reissued patent was extended in 1868 for a further term of seven years. A copy of it is appended to the bill; and, in the specification, it is declared that the nature and object of the invention consists in providing a process or mode of constructing wooden block pavements upon a foundation along a street or roadway with facility, cheapness, and accuracy, and also in the creation and construction of such a wooden pavement as shall be comparatively permanent and durable, by so uniting and combining all its parts, both superstructure and foundation, as to provide against the slipping of the horses' feet, against noise, against unequal wear, and against rot and, consequent sinking away from below. Two plans of making this pavement are specified. Both require a proper foundation on which to lay the blocks, consisting of tarred-paper or hydraulic cement covering the surface of the road-bed to the depth of about two inches, or of a flooring of boards or plank, also covered with tar, or other preventive of moisture. On this foundation, one plan is to set square blocks on end arranged like a checker-board, the alternate rows being shorter than the others, so as to leave narrow grooves or channel-ways to be filled with small broken stone or gravel, and then pouring over the whole melted tar or pitch, whereby the cavities are all filled and cemented together. The other plan is to arrange the blocks in rows transversely across the street, separated a small space (of about an inch) by strips of board at the bottom, which serve to keep the blocks at a uniform distance apart, and then filling these spaces with the same material as before. The blocks forming the pavement are about eight inches high. The alternate rows of short blocks in the first plan and the strips of board in the second plan should not be higher than four inches. The patent has four claims, the first two of which, which are the only ones in question, are as follows:

"I claim as an improvement in the art of constructing pavements:

"1. Placing a continuous foundation or support, as above described, directly upon the roadway; then arranging thereon a series of blocks, having parallel sides, endwise in rows, so as to leave a continuous narrow groove or channel-way between each row, and then filling said grooves or channel-ways with broken stone, gravel, and tar, or other like materials.

"2. I claim the formation of a pavement by laying a foundation directly upon the roadway, substantially as described, and then employing two sets of blocks; one a principal set of blocks, that shall form the wooden surface of the pavement when completed, and an auxiliary set of blocks or strips of board, which shall form no part of the surface of the pavement, but determine the width of the groove between the principal blocks, and also the filling of said groove, when so formed between the principal blocks, with broken stone, gravel, and tar, or other like material."

The bill charges that the defendants infringed this patent by laying down wooden pavements in the city of Elizabeth, N. J., constructed in substantial conformity with the process patented, and prays an account of profits, and an injunction.

The defendants answered in due course, admitting that they had constructed, and were still constructing, wooden pavements in Elizabeth, but alleging that they were constructed in accordance with a patent granted to John W. Brocklebank and Charles Trainer, dated January 12, 1869, and denied that it

infringed upon the complainant. They also denied that there was any novelty in the alleged invention of Nicholson, and specified a number of English and other patents which exhibited, as they claimed, every substantial and material part thereof which was claimed as new.

They also averred that the alleged invention of Nicholson was in public use, with his consent and allowance, for six years before he applied for a patent, on a certain avenue in Boston called the Mill-dam; and contended that said public use worked an abandonment of the pretended invention. These several issues, together with the question of profits, and liability on the part of the several defendants to respond thereto, are the subjects in controversy before us.

§ 6378. *A foreign patent or publication is no defense to a suit for infringement of an American patent, unless published before the making of the discovery patented.*

We do not think that the defense of want of novelty has been successfully made out. Nicholson's invention dates back as early as 1847 or 1848. He filed a *caveat* in the patent office in August, 1847, in which the checker-board pavement is fully described; and he constructed a small patch of pavement of both kinds, by way of experiment, in June or July, 1848, in a street near Boston, which comprised all the peculiarities afterwards described in his patent; and the experiment was a successful one. Before that period, we do not discover in any of the forms of pavements adduced as anticipations of his, any one that sufficiently resembles it to deprive him of the claim to its invention. As claimed by him, it is a combination of different parts or elements, consisting, as the appellant's counsel, with sufficient accuracy for the purposes of this case, enumerates them, 1st, of the foundation prepared to exclude moisture from beneath; 2d, the parallel-sided blocks; 3d, the strips between these blocks, to keep them at a uniform distance, and to create a space to be filled with gravel and tar; and 4th, the filling. Though it may be true that every one of these elements had been employed before, in one kind of pavement or another, yet they had never been used in the same combination and put together in the same manner as Nicholson combined and arranged them, so as to make a pavement like his. The one which makes the nearest approach to it, and might, perhaps, be deemed sufficiently like to deprive Nicholson of the merit of invention, is that of John Hosking, which, in one form, consisted of alternate rows of short and long blocks, the latter partially resting on the former by their being mutually rabbeted so as to fit together. The spaces thus formed between the longer blocks, and on the top of the shorter ones, were filled with loose stone and cement or asphalt, substantially the same as in Nicholson's pavement. It would be very difficult to sustain Nicholson's patent if Hosking's stood in his way. But the only evidence of the invention of the latter is derived from an English patent, the specification of which was not enrolled until March, 1850, nearly two years after Nicholson had put his pavement down in its completed form, by way of experiment, in Boston. A foreign patent, or other foreign printed publication describing an invention, is no defense to a suit upon a patent of the United States, unless published anterior to the making of the invention or discovery secured by the latter, provided that the American patentee, at the time of making application for his patent, believed himself to be the first inventor or discoverer of the thing patented. He is obliged to make oath to such belief when he applies for his patent; and it will be presumed that such was his belief until the contrary is proven. That was the law as it stood when Nicholson obtained his original patent, and it is the law

still. Act of 1836, secs. 7, 15; act of 1870, secs. 24, 25, 61; R. S., secs. 4886, 4887, 4920; and see Curtis, Patents, secs. 375, 375*a*. Since nothing appears to show that Nicholson had any knowledge of Hosking's invention or patent prior to his application for a patent in March, 1854, and since the evidence is very full to the effect that he had made his invention as early as 1848, the patent of Hosking cannot avail the defense in this suit.

It is unnecessary to make an elaborate examination of the other patents which were referred to for the purpose of showing an anticipation of Nicholson's invention. They are mostly English patents, and we will only advert in a summary way to such of them as seem to be most nearly relevant to the question in controversy, premising that in England the enrollment of the specification is the first publication of the particulars of a patented invention.

Stead's patent, enrolled in November, 1838, shows a plan of pavement consisting of a series of hexagonal, triangular or square-sided blocks, standing close together on the surface of the roadway, in a layer of sand, and being a little smaller at the bottom than at the top, so as to admit a packing of sand, or pitch and sand, in the interstices between them, below the surface. Small recesses at the top, around the edges of the blocks, are suggested, apparently for giving a better hold to the horses' feet. It had no prepared foundation like Nicholson's, and no spaces filled with gravel, etc.

Parkins' patent, enrolled October, 1839, proposes a pavement to consist of blocks leaning upon each other, and connected together with a mixture of sand and bitumen, and connected by keys laid in grooves, and having grooves cut in the surface, either across the blocks or along their edges, to give the horses a better foothold. This plan exhibits no spaces to be filled with gravel or other filling.

Wood's patent, enrolled in April, 1841, shows a pavement made of adjoining blocks fitted together, but alternately larger and smaller at the top, like the frustum of a pyramid, and not parallel-sided; those larger at the top standing slightly higher than the others, so that when pounded down, or pressed by rollers or loaded vehicles, they would act as wedges, binding the whole pavement more tightly together. No filling is used on the surface, and no prepared foundation is suggested. In one form of his pavement he describes continuous grooves, the grooves being formed of blocks which are shorter than the others; and states that the groove is to be filled with concrete, coal-tar, etc., mixed with gravel or sand; but there is no foundation described for the pavement; and the description given for laying down the pavement, viz., by ramming down the taller blocks after considerable surface has been covered by the pavement, shows that the road-bed on which the blocks are to be laid is to be a yielding one, capable of conforming itself to the under surface of the blocks in the same way as sand does to the ordinary stone pavement when the stones are rammed.

Perring's patent, enrolled January, 1843, shows a pavement consisting, in one form, of blocks leaning one upon another in rows, with strips of board between the rows, coming to within an inch or so of the top of the pavement, and the same distance from the bottom, leaving gutters for the water underneath, and the adjoining rows being connected with pins passing through the strips of board. The rows are thus separated to enable the horses' feet to get a better hold. No filling is suggested, and, indeed, would not be admissible, as the boards have no support but the pins; and no prepared foundation is required.

Crannis & Kemp's patent, enrolled August 21, 1843, presents, amongst other things, first, a pavement consisting of rows of blocks adjoining each other, but each block having a small recess on one side, on the surface, to enable the horses to get a better foothold; secondly, a pavement of alternate blocks adjoining each other, but differing in width, and slightly differing in height, the top of one block being rounded off so as to make a groove next to the adjoining blocks, and the rounded blocks in one row alternating with the rectangular topped blocks in the next row—the object of rounding off the alternate blocks being to give a foothold to the horses. This pavement is to be built on a flooring of plank, either of one or two thicknesses, but without any preparation to exclude moisture, and it has no filling in the depressions or grooves formed by rounding the alternate blocks.

A French patent, granted to Hediard in 1842, shows a pavement constructed of rows of blocks laid on a board foundation, cemented together by a thin filling (four-tenths of an inch thick) of cement or mastic, from top to bottom; no provision being made to prevent the accession of moisture from the ground below, and no strips between the rows to keep them separate from each other.

None of these pavements combine all the elements of Nicholson's, much less a combination of those elements arranged and disposed according to his plan. We think they present no ground for invalidating his patent, and no defense to this suit.

The next question to be considered is, whether Nicholson's invention was in public use or on sale, with his consent and allowance, for more than two years prior to his application for a patent, within the meaning of the sixth, seventh and fifteenth sections of the act of 1836, as qualified by the seventh section of the act of 1839, which were the acts in force in 1854, when he obtained his patent. It is contended by the appellants that the pavement which Nicholson put down by way of experiment, on Mill-dam avenue in Boston, in 1848, was publicly used for the space of six years before his application for a patent, and that this was a public use within the meaning of the law.

§ 6379. *The public experimental use of an invention, to test its qualities or remedy its defects, does not invalidate the subsequently granted patent.*

To determine this question, it is necessary to examine the circumstances under which this pavement was put down, and the object and purpose that Nicholson had in view. It is perfectly clear from the evidence that he did not intend to abandon his right to a patent. He had filed a *caveat* in August, 1847, and he constructed the pavement in question by way of experiment, for the purpose of testing its qualities. The road in which it was put down, though a public road, belonged to the Boston and Roxbury Mill Corporation, which received toll for its use; and Nicholson was a stockholder and treasurer of the corporation. The pavement in question was about seventy-five feet in length, and was laid adjoining to the toll-gate and in front of the toll-house. It was constructed by Nicholson at his own expense, and was placed by him where it was, in order to see the effect upon it of heavily loaded wagons, and of varied and constant use; and also to ascertain its durability, and liability to decay. Joseph L. Lang, who was toll-collector for many years, commencing in 1849, familiar with the road before that time, and with this pavement from the time of its origin, testified as follows: "Mr. Nicholson was there almost daily, and when he came he would examine the pavement, would often walk over it, cane in hand, striking it with his cane, and making particular examination of its condition. He asked me very often how people liked it, and asked me a great

many questions about it. I have heard him say a number of times that this was his first experiment with this pavement, and he thought that it was wearing very well. The circumstances that made this locality desirable for the purpose of obtaining a satisfactory test of the durability and value of the pavement were: that there would be a better chance to lay it there; he would have more room and a better chance than in the city; and, besides, it was a place where most everybody went over it, rich and poor. It was a great thoroughfare out of Boston. It was frequently traveled by teams having a load of five or six tons, and some larger. As these teams usually stopped at the toll-house, and started again, the stopping and starting would make as severe a trial to the pavement as it could be put to."

This evidence is corroborated by that of several other witnesses in the cause; the result of the whole being that Nicholson merely intended this piece of pavement as an experiment, to test its usefulness and durability. Was this a public use, within the meaning of the law?

§ 6380. *What is an abandonment of an invention in the sense of the patent law.*

An abandonment of an invention to the public may be evinced by the conduct of the inventor at any time, even within the two years named in the law. The effect of the law is, that no such consequence will necessarily follow from the invention being in public use or on sale, with the inventor's consent and allowance, at any time within two years before his application; but that, if the invention is in public use or on sale prior to that time, it will be conclusive evidence of abandonment, and the patent will be void.

§ 6381. *What is a public use that will work an abandonment.*

But, in this case, it becomes important to inquire what is such a public use as will have the effect referred to. That the use of the pavement in question was public in one sense cannot be disputed. But can it be said that the invention was in public use? The use of an invention by the inventor himself, or of any other person under his direction, by way of experiment, and in order to bring the invention to perfection, has never been regarded as such a use. Curtis, Patents, sec. 381; Shaw v. Cooper, 7 Pet., 292.

Now, the nature of a street pavement is such that it cannot be experimented upon satisfactorily except on a highway, which is always public. When the subject of invention is a machine, it may be tested and tried in a building, either with or without closed doors. In either case, such use is not a public use, within the meaning of the statute, so long as the inventor is engaged, in good faith, in testing its operation. He may see cause to alter it and improve it or not. His experiments will reveal the fact whether any and what alterations may be necessary. If durability is one of the qualities to be attained, a long period, perhaps years, may be necessary to enable the inventor to discover whether his purpose is accomplished. And though, during all that period, he may not find that any changes are necessary, yet he may be justly said to be using his machine only by way of experiment; and no one would say that such a use, pursued with a *bona fide* intent of testing the qualities of the machine, would be a public use, within the meaning of the statute. So long as he does not voluntarily allow others to make it and use it, and so long as it is not on sale for general use, he keeps the invention under his own control, and does not lose his title to a patent.

It would not be necessary, in such a case, that the machine should be put up and used only in the inventor's own shop or premises. He may have it

put up and used in the premises of another, and the use may inure to the benefit of the owner of the establishment. Still, if used under the surveillance of the inventor, and for the purpose of enabling him to test the machine, and ascertain whether it will answer the purpose intended, and make such alterations and improvements as experience demonstrates to be necessary, it will still be a mere experimental use, and not a public use, within the meaning of the statute.

Whilst the supposed machine is in such experimental use, the public may be incidentally deriving a benefit from it. If it be a grist-mill, or a carding-machine, customers from the surrounding country may enjoy the use of it by having their grain made into flour, or their wool into rolls, and still it will not be in public use, within the meaning of the law. But if the inventor allows his machine to be used by other persons generally, either with or without compensation, or if it is, with his consent, put on sale for such use, then it will be in public use and on public sale, within the meaning of the law.

If, now, we apply the same principles to this case, the analogy will be seen at once. Nicholson wished to experiment on his pavement. He believed it to be a good thing, but he was not sure; and the only mode in which he could test it was to place a specimen of it in a public roadway. He did this at his own expense, and with the consent of the owners of the road. Durability was one of the qualities to be attained. He wanted to know whether his pavement would stand, and whether it would resist decay. Its character for durability could not be ascertained without its being subjected to use for a considerable time. He subjected it to such use, in good faith, for the simple purpose of ascertaining whether it was what he claimed it to be. Did he do anything more than the inventor of the supposed machine might do, in testing his invention? The public had the incidental use of the pavement, it is true; but was the invention in public use, within the meaning of the statute? We think not. The proprietors of the road alone used the invention, and used it at Nicholson's request, by way of experiment. The only way in which they could use it was by allowing the public to pass over the pavement.

§ 6382. *It is not public knowledge but public use of an invention that avoids a patent.*

Had the city of Boston, or other parties, used the invention, by laying down the pavement in other streets and places, with Nicholson's consent and allowance, then, indeed, the invention itself would have been in public use, within the meaning of the law; but this was not the case. Nicholson did not sell it, nor allow others to use it or sell it. He did not let it go beyond his control. He did nothing that indicated any intent to do so. He kept it under his own eyes, and never for a moment abandoned the intent to obtain a patent for it.

In this connection it is proper to make another remark. It is not a public knowledge of his invention that precludes the inventor from obtaining a patent for it, but a public use or sale of it. In England, formerly, as well as under our patent act of 1793, if an inventor did not keep his invention secret, if a knowledge of it became public before his application for a patent, he could not obtain one. To be patentable, an invention must not have been known or used before the application; but this has not been the law of this country since the passage of the act of 1836, and it has been very much qualified in England. *Lewis v. Marling*, 10 B. & C., 22. Therefore, if it were true that during the whole period in which the pavement was used, the public knew how it was constructed, it would make no difference in the result.

It is sometimes said that an inventor acquires an undue advantage over the public by delaying to take out a patent, inasmuch as he thereby preserves the monopoly to himself for a longer period than is allowed by the policy of the law; but this cannot be said with justice when the delay is occasioned by a *bona fide* effort to bring his invention to perfection, or to ascertain whether it will answer the purpose intended. His monopoly only continues for the allotted period, in any event; and it is the interest of the public, as well as himself, that the invention should be perfect and properly tested, before a patent is granted for it. Any attempt to use it for a profit, and not by way of experiment, for a longer period than two years before the application, would deprive the inventor of his right to a patent.

The next question for consideration is, whether the defendants have infringed the patent of Nicholson. On this question we entertain no doubt. The pavement put down by the defendants in the city of Elizabeth differs in nothing from that described by Nicholson in his patent, except in the form of the strips placed between the rows of blocks, and the nicks or grooves made in the blocks to fit them. In Nicholson's description, they are simply strips of board standing endwise on the foundation. The patent describes the strips as "so arranged as to form spaces of about one inch in thickness between the rows of principal blocks. The auxiliary strip may be about half the height of the principal block; but it must not be permitted to fill up the grooves permanently and entirely, when the pavement is completed, or to perform any part of the pavement." The strips used by the defendants are substantially the same as here described, and perform the same office. The only difference in their construction and application between the blocks is, that they are beveled, by being made wider at the top than at the bottom,—the extra width of the top part being let into a notch or groove in the blocks. If they perform the additional office, of partially sustaining the pressure of the blocks and locking them together, they do not any the less perform the office assigned to them in Nicholson's pavement. Their peculiar form and application may constitute an improvement on his pavement, but it includes his.

It is objected that the blocks of the Elizabeth pavement have not parallel sides, as prescribed in Nicholson's patent, by reason of the notch or groove in the side, into which the strips are fitted; but this notch or groove does not take from the blocks their general conformity to the requisition of the patent. They are parallel-sided blocks, with a groove made in the lower part to receive the edges of the strips. The parallel-sided blocks described in Nicholson's patent were probably intended to distinguish them from such blocks as those described in Stead's patent, which were hexagonal and triangular in form; or those in Wood's patent, which were of a pyramidal shape, the opposite sides being at an angle with each other. As contradistinguished from these, both the Nicholson blocks and those used by the appellants are properly denominated blocks with parallel sides.

§ 6383. *General rules as to profits. Recoverable in equity.*

The next subject for consideration is the form and principles of the decree rendered by the court below. The bill prayed a decree for damages and profits; but, as it was filed before the passage of the act of July 8, 1870, which first authorized courts of equity to allow damages in addition to profits, the court below correctly held that a decree for profits alone could be rendered. It is unnecessary here to enter into the general question of profits recoverable in equity by a patentee. The subject, as a whole, is surrounded

with many difficulties, which the courts have not yet succeeded in overcoming. But one thing may be affirmed with reasonable confidence, that, if an infringer of a patent has realized no profit from the use of the invention, he cannot be called upon to respond for profits; the patentee, in such case, is left to his remedy for damages. It is also clear that a patentee is entitled to recover the profits that have been actually realized from the use of his invention, although, from other causes, the general business of the defendant, in which the invention is employed, may not have resulted in profits,—as where it is shown that the use of his invention produced a definite saving in the process of a manufacture. *Mowry v. Whitney*, 14 Wall., 434; *Cawood Patent*, 94 U. S., 695. On the contrary, though the defendant's general business be ever so profitable, if the use of the invention has not contributed to the profits, none can be recovered. The same result would seem to follow where it is impossible to show the profitable effect of using the invention upon the business results of the party infringing. It may be added that, where no profits are shown to have accrued, a court of equity cannot give a decree for profits by way of damages or as a punishment for the infringement. *Livingston v. Woodworth*, 15 How., 559. But when the entire profit of a business or undertaking results from the use of the invention, the patentee will be entitled to recover the entire profits if he elects that remedy. And in such a case the defendant will not be allowed to diminish the show of profits by putting in unconscionable claims for personal services or other inequitable deductions. *Rubber Co. v. Goodyear*, 9 Wall., 788. These general propositions will hardly admit of dispute, and they will furnish us some guide in deciding the questions raised in this case.

Only the defendants have appealed, and the errors assigned by them on this branch of the case are the following:

1st. "The court erred in decreeing that the complainants do recover of the defendants, the city of Elizabeth and George W. Tubbs, the sums set forth in the decree, because the master did not find that said defendants had made any profits, which failure to find was not excepted to by complainants, and because no proof was offered by complainants of any profits whatever made by said defendants."

2d. "The court erred in finding that the profits received by the defendants were the fruits of the use of the devices described and claimed in the first and second claims of the Nicholson patent,—there being no proof of any advantage derived by the defendants from such use of the Nicholson devices,—or was incident to the use of the devices of the Brocklebank & Trainer patent. The failure to specifically show such profits makes the recovery nominal."

3d. "The court erred in decreeing the whole amount of profits made by the New Jersey Wood-paving Company in the construction of the pavements referred to in the master's report. Whereas, if any profits ought to have been decreed, they should have been confined to the amount of the license for a royalty which the complainants had been accustomed to receive, and were bound by the terms of their title to accept, from any party constructing such pavement in New Jersey."

§ 6384. *Where a contractor infringed a patent his employer is not liable for profits unless he paid the contractor less than the patentee's prices.*

We will consider these assignments in order. The first seems to be well taken. The party who made the profit by the construction of the pavement in question was the New Jersey Wood-paving Company. The city of Eliza-

both made no profit at all. It paid the same for putting down the pavement in question that it was paying to the defendant in error for putting down the Nicholson pavement proper, namely, \$4.50 per square yard. It made itself liable to damages, undoubtedly, for using the patented pavement of Nicholson; but damages are not sought, or, at least, are not recoverable, in this suit. Profits only, as such, can be recovered therein. The very first evidence which the appellees offered before the master was the contracts made between the city and the other defendants for the construction of the pavement; and these contracts show the fact that the city was to pay the price named, and that any benefit to be derived from the construction of the pavement was to be enjoyed by the contractors.

It is insisted that the defendants, by answering jointly, admitting that they were jointly co-operating in laying the pavement, precluded themselves from making this defense. We do not think so. That admission is not inconsistent with the actual facts of the case, to wit, that this co-operation consisted of a contract for having the pavement made, on one side, and a contract to make it, on the other; and is by no means conclusive as to which party realized profit from the transactions. The complainants themselves, by their own evidence, showed that the contractors, and not the city, realized it.

The appellant, Tubbs, is in the same predicament with the city. Several of the contracts were made in his name, it is true, but they were made in behalf of the New Jersey Wood-paving Company, for whose use and benefit the contracts were made and completed. Tubbs only received a salary for his superintendence.

§ 6385. *Where profits are made by an infringer, he is liable to the patentee for them unless he can show that a portion of them is the result of some other thing used by him.*

The next assignment of error, based on the hypothesis that the profits received by the defendants were not the fruits of the use of Nicholson's invention, appears to us destitute of foundation. This matter is so fully and ably presented in the opinion of the circuit court as to require but little discussion from us. The Nicholson pavement was a complete thing, consisting of a certain combination of elements. The defendants used it as such — the whole of it. If they superadded the addition made to it by Brocklebank & Trainer, they failed to show that such addition contributed to the profits realized. The burden of proof was on them to do this. The evidence, if it shows anything, tends to prove that the addition diminished the profits instead of increasing them; but it could not have had much influence either way, inasmuch as the evidence shows that the profit made on this pavement was about the same as that made on the pavement of Nicholson, without the improvement. The appellants, however, obtained an allowance of nearly \$14,000 for the royalty paid by them for the use of the Brocklebank & Trainer patent. This allowance went so far in diminution of the profits recovered.

Equally without foundation is the position taken by the appellants, that other pavements, approaching in resemblance to that of Nicholson, were open to the public, and that the specific difference between those pavements and Nicholson's was small, and that, therefore, the Nicholson patent was entitled to only a small portion of the profits realized. Nicholson's pavement, as before said, was a complete combination in itself, differing from every other pavement. The parts were so correlated to each other, from bottom to top, that it required them all, put together as he put them, to make the complete

whole, and to produce the desired result. The foundation impervious to moisture, the blocks arranged in rows, the narrow strips between them for the purposes designated, the filling over those strips, cemented together, as shown by the patent,—all were required. Thus combined and arranged, they made a new thing, like a new chemical compound. It was this thing, and not another, that the people wanted and required. It was this that the appellants used, and, by using, made their profit, and prevented the appellee from making it. It is not the case of a profit derived from the construction of an old pavement together with a superadded profit derived from adding thereto an improvement made by Nicholson, but of an entire profit derived from the construction of his pavement as an entirety. A separation of distinct profit derived from Brocklebank & Trainer's improvement, if any such profit was made, might have been shown; but, as before stated, the appellants failed to show that any such distinct profit was realized.

We have looked over the various items claimed by the appellants by way of reduction of profits, and disallowed by the master and by the court below, and we are satisfied with the result which they reached. The gross profits of the work over actual expenses for material and labor were conceded to be \$123,610.78. The total deductions claimed before the master amounted to \$139,875.63, which would have been considerably more than sufficient to absorb the whole profits. The master and the court allowed deductions to the amount of \$48,618.62, which reduced the profits to \$74,992.16, for which amount the decree was rendered. The deductions overruled and disallowed amounted to \$91,257.85. Of these \$31,111.92 was a profit of twenty per cent., which the appellants claimed they had a right to add to the actual cost of lumber and other materials and labor. It is only necessary to state the claim to show its preposterousness. Other items were one of \$7,000 for salaries, and another of \$3,000 for rent, for a period of time that occurred after the work was completed. Another item was one of \$2,675.09 for the cost of a dock which the parties built on their own land; and another of \$25,000, paid for an interest in the Brocklebank & Trainer patent. As the appellants still hold these properties, we cannot well conceive what the purchase of them has to do in this account. They also claim \$15,241.33 for that amount abated from the assessments of some of their stockholders who owned lands along the streets paved. As this was a gratuity which they made to themselves, they cannot claim a deduction for it here. The last item was \$6,572.75, claimed to have been profits made upon other work, which were allowed to be included in these contracts. As this is not explained in any satisfactory way, we think the master did right in rejecting it.

We are entirely satisfied with the disposition made of these various items, and with the correctness of the decree, so far as the statement of the account is concerned.

§ 6386. *The royalty paid by the assignee to the patentee is no element to be considered in a decree against an infringer.*

But the appellants assign a third error. They insist that the appellee, as assignor of the Nicholson patent for the state of New Jersey (which was the ground of its title), was entitled to recover only thirty-one cents per square yard in any event,—being limited to that charge for the use of the patent by the terms of the assignment; sixteen cents of which was to be paid to the proprietors and fifteen to be retained by the appellee.

This matter is quite satisfactorily disposed of, in the opinion of the court

below. The stipulation was between third parties, and the appellants have no concern in it. It only applied, by its terms, to cases where, by reason of the decisions of the courts or otherwise, it should be found impracticable for the appellees to obtain contracts for laying the pavement in any town or city, or where the work of constructing pavements should be required by law to be let under public lettings, open to general competition. The object was to secure as extensive a use of the pavement as possible, as thereby the emoluments of the proprietors would be increased. But the assignment gave to the appellee the exclusive right in the patent for the state of New Jersey. It did not prohibit the appellee from constructing the pavements itself, if it could obtain contracts for doing so, and making thereby any profit it could. There was no obstacle to its doing this in the city of Elizabeth. On the contrary, it did obtain from the city large contracts, and would have obtained more if the appellants had not interfered. There is nothing in this state of things which entitles the latter, after making large profits from the use of the invention, to refuse to respond therefor. It is not for them to say that the hands of the appellee are tied by its contract with its grantor. This would be to take advantage of their own wrong. Whatever bearing the stipulation in the assignment may have on the measure of damages in an action at law, it affords no defense to the appellants when called upon to account for the profits which they have wrongfully made by pirating the invention.

We think there is no error in the decree of the circuit court, except in making the city of Elizabeth and George W. Tubbs accountable for the profits. As to them a decree for injunction only to prevent them from constructing the pavement during the term of the patent should have been rendered; which, of course, cannot now be made. As to the New Jersey Wood-paving Company, the decree was in all respects correct. A decree for costs in the court below should be awarded against all the defendants.

The decree of the circuit court, therefore, must be reversed, with costs, and the cause remanded to said court with instructions to enter a decree in conformity with this opinion; and it is so ordered.

Use — Experimental public, and sale — *Will not defeat a patent, §§ 6387-6389; neither will an experimental public use, §§ 6390-6396.*

§ 6387. The law permits an inventor to make practical tests of his invention, and when an invention is used in public in the way of experiment or trial, or when a machine is sold on trial and warranted, it is not such a public use or sale as is contemplated by the statute. *Graham v. McCormick*, 10 Biss., 39.

§ 6388. An inventor can use for profit an imperfect machine for two years prior to applying for a patent on the perfected machine, without invalidating the patent, when during such use he was perfecting the machine. *Sprague v. Smith*, 12 Fed. Rep., 721.

§ 6389. In case of a sale and public use of a machine subsequently patented, such sale and use being more than two years before the date of the application, it being shown that such sale was for experimental purposes, then upon the question of the reasonableness of the use in point of duration every presumption should be made in favor of the inventor. *Innis v. Oil City Boiler Works*, 30 O. G., 998.

§ 6390. Putting an invention out on trial and for the purpose of experiment and improvement, *held* not such a public use as would be considered a dedication to the public. *Stanley v. Hewitt*, 17 Frank. Jr., 2d Series, 165.

§ 6391. An invention will not be held forfeited because it was used for experimental purposes, in good faith, for more than two years before applying for a patent. The objection is not one to be regarded with favor; but, if clearly established, it is fatal. *Birdsell v. McDonald*, 6 O. G., 682.

§ 6392. The use of an invention for the purposes of experiment, though made in public from

necessity, is not evidence of intent to abandon. *Locomotive-Engine Safety-Truck Co. v. Pennsylvania R. Co.*, 6 O. G., 927.

§ 6393. Neither does such use debar from a patent, although it takes place more than two years before the application. *Ibid.*

§ 6394. Public use, in good faith, for experimental purposes, while the inventor is perfecting his invention, and for a reasonable period even before the beginning of the two years of limitation, cannot affect the rights of the inventor. *Henry v. Francistown Soap-Stone Stove Co.*, 9 O. G., 408.

§ 6395. The use of an invention in public two years prior to the filing of the application will not invalidate the patent when the invention is of such a nature that its trial can only be conducted in public. *Campbell v. Mayor, etc., of New York*, 9 Fed. Rep., 500.

§ 6396. Where the prior public use of the invention was the only manner in which it could be conveniently used for the purpose of actual experiment, *held* not to vitiate the patent. *Railway Register Mfg. Co. v. Broadway and Seventh Ave. R. Co.*, 22 Fed. Rep., 655.

Use — Experimental — *Will defeat a patent (act 1793)*, § 6397. *Will not defeat a patent*, §§ 6398-6408. *For profit, will not defeat*, §§ 6409, 6410. *May constitute an infringement*, §§ 6411, 6412. *What is and what is not an experimental use*, §§ 6413, 6414.

§ 6397. Under act 1793, section 1, experimental use of a machine is such prior use as to invalidate a subsequent patent therefor. *Watson v. Bladen*, 4 Wash., 580.

§ 6398. Experimental use is not such public use as will defeat a patent. *Wyeth v. Stone*, 1 Story, 273.

§ 6399. Experimental use will not deprive an inventor of his right to a patent. *Ryan v. Goodwin*, 3 Sumn., 514.

§ 6400. Experimental use prior to application for patent raises no presumption of abandonment. *Jones v. Sewall*, 3 Cliff., 563.

§ 6401. The use of an invention by the author for the purposes of experiment, though continued for more than two years, will not prejudice his right to a patent. *Ibid.*

§ 6402. Neither will the sale or use of it by others without his consent. *Ibid.*

§ 6403. Mere experimental use, made in good faith, and not in such wise as to amount to a fraud upon the public, misleading them into a use, in the belief that it is free, does not destroy the exclusive right of an inventor. *Sisson v. Gilbert*, 9 Blatch., 185.

§ 6404. An experimental use for more than two years prior to application for patent will not invalidate the patent. *American Hide & Leather Splitting Co. v. Tool Co.*, 1 Holmes, 503.

§ 6405. Acts of an inventor, to determine the value, utility or success of his invention, are to be liberally construed, if the acts are not inconsistent with the clear intention to hold the exclusive privilege. *Jennings v. Pierce*, 15 Blatch., 42.

§ 6406. Experimental use occurring more than two years prior to the filing of the application is not fatal to a patent, even though the use was for the purpose of satisfying others as to its utility. *Sinclair v. Backus*, 4 Fed. Rep., 539.

§ 6407. The law permits an inventor to construct a machine which he is engaged in studying upon and developing, and place it in friendly hands for the purpose of testing it and ascertaining whether it will perform the functions claimed for it; and if these machines are strictly experiments, made solely with a view to perfect the device, the right of the inventor remains unimpaired; but when an inventor puts his incomplete or experimental device upon the market, and sells it as a manufacturer more than two years before he applies for his patent, he gives to the public the device in the condition or stage of development in which he sells it. In such case his patent cannot be allowed to relate back and cover forms which he gave to the public more than two years before he applied for a patent. *Lyman v. Maypole*, 19 Fed. Rep., 735.

§ 6408. A patent cannot be defeated by a single experimental machine when the recollection of the mechanism that constituted it has passed away from the mind of the witness, who deposes to its existence thirty-five years before, so that it cannot from such recollection be reconstructed, and there being no other record of it. *Taylor v. Wood*, 12 Blatch., 110.

§ 6409. Where for a certain number of years the inventor, experimenting on his machine, ran it himself, kept it secret, but sold the product, which, owing to the imperfection of the machine, had mostly to be reworked, *held*, that the use for profit was incidental and subordinate to the experimental use, and the entire use might, with propriety, be considered as experimental, and was not a public use. *Jennings v. Pierce*, 15 Blatch., 42.

§ 6410. Where a machine was experimented on for four years, being used in the condition in which it was from time to time for profit, its product being sold, but the machine itself neither being sold, used by others nor licensed to be so used, and kept from view as much as possible, returning ultimately to the original device, for which a caveat had been filed at the

outset, *held*, it was an experimental use and not such public use as to invalidate the patent. *Emery v. Cavanagh*, 17 Fed. Rep., 242.

§ 6411. Experimental making and using of a patented invention is a technical infringement that may be restrained. *Albright v. Celluloid Harness-Trimming Co.*, 12 O. G., 227.

§ 6412. An experimental use, where there has been no profit and no sale, will not render one liable for infringement; but where, as a matter of business, products of so-called experiments are thrown on the market for sale, it constitutes an infringement. *Poppenhusen v. New York Gutta-percha Comb Co.*, 2 Fish., 62.

§ 6413. A use for the mere purpose of competitive examination, experiment and test is not a public use. *United States Rifle & Cartridge Company v. Whitney Arms Co.*, 14 Blatch., 94.

§ 6414. Where, through a series of years, a machine and process were used without material change in either, such use held not to have been experimental. *Manning v. Cape Ann Isinglass & Glue Co.*, 23 O. G., 2413; 108 U. S., 462; 4 Ban. & Ard., 612.

Use — Prior foreign knowledge and — *Patent not defeated by a mere prior foreign discovery*, §§ 6415, 6416; *or knowledge*, §§ 6417, 6418; *or knowledge or use*, §§ 6419-6421.

§ 6415. When the patentee believes himself to be the first inventor, a previous discovery in a foreign country shall not render his patent void, unless such discovery, or some substantial part of it, had been before patented or described in a printed publication. *O'Reilly v. Morse*, 15 How., 62.

§ 6416. Prior discovery and use in a foreign country, in the absence of its being patented or described in a printed publication, is no bar to the grant of a patent here. *Toucey's Opinion*, 5 Op., 19.

§ 6417. Patentee must be the first and original inventor, but prior knowledge abroad, in the absence of publication, or of a patent in the United States, will not defeat his patent. *Parker v. Stiles*, 5 McL., 44.

§ 6418. Previous knowledge of an invention abroad is no defense against a patent, unless it was described in some printed publication so clearly as to enable others to put it in practice. *Jones v. Sewall*, 3 Cliff., 563.

§ 6419. Knowledge or use in a foreign country is no proof of want of originality or novelty of the invention of an American citizen, unless it appears that it was patented in such foreign country, or there described in some public work. *Judson v. Cope*, 1 Bond, 327.

§ 6420. Mere previous knowledge or use of the thing patented in a foreign country will not defeat a patent issued here to the original inventor, unless it appears that it had been patented there, or published prior to his discovery. *Jones v. Sewall*, 3 Cliff., 563.

§ 6421. Evidence of knowledge and use in a foreign country would not of itself defeat the patent or be material. *Coburn v. Schroeder*, 11 Fed. Rep., 425.

Use — Prior foreign — *Will not defeat a domestic patent*, §§ 6422-6432.

§ 6422. By act 1836, section 15, it appears clearly that a use in a foreign country was not meant to be included within the terms of section 6, "not known or used by others before his or their discovery or invention thereof." *Bartholomew v. Sawyer*, 4 Blatch., 347.

§ 6423. Prior use in a foreign country does not invalidate a subsequently patented United States patent, where the patentee at the time of application supposed himself the first inventor, unless the prior invention has been patented or described in some printed public work. *Hays v. Sulsor*, 1 Bond, 279.

§ 6424. A patent will be sustained, although the invention was in use in a foreign country before the patentee originated it, unless it appear that the patentee did not believe himself to be the prior inventor when he filed his application. *Roemer v. Simon*, 5 O. G., 555.

§ 6425. The courts have uniformly held that no prior use in a foreign country of an invention invalidated a patent granted here, unless the invention had been patented or described in some printed publication. *Illingworth v. Spaulding*, 9 Fed. Rep., 611.

§ 6426. Foreign prior public use not brought home to patentee before the date of his patent cannot invalidate it. *Adams v. Loft*, 4 B. & A., 495.

§ 6427. Mere use of complainant's device in a foreign country, without its being patented or described in any printed publication, is not sufficient to anticipate his patent. *Phillips v. City of Detroit*, 17 O. G., 191.

§ 6428. Proof of prior use in a foreign country will not supersede a patent granted here unless the alleged invention was patented in some foreign country. *Roemer v. Simon*, 5 Otto, 214.

§ 6429. Proof of such foreign manufacture and use, if known to the applicant for a patent, may be evidence tending to show that he is not the inventor of the alleged new improvement. *Ibid.*

§ 6430. Public use in a foreign country, which might defeat the patent there, would have no effect upon a patent granted here, and a foreign patent would have no effect but to limit the term. *Cornley v. Marckwald*, 17 Fed. Rep., 83.

§ 6431. Prior use in a foreign country is no bar to a patent in this country. *Schillinger v. Greenway Brewing Co.*, 17 Fed. Rep., 244.

§ 6432. A simple use of the invention abroad, if not patented or described in any printed publication, is not a bar to obtaining a valid patent in the United States. *Worswick Mfg. Co. v. Steiger*, 17 Fed. Rep., 250.

Use — Foreign — *Quære: Is knowledge by persons here of foreign use a defense*, § 6433. *It will not defeat a patent*, § 6434. *Act 1836; time of foreign use*, § 6435.

§ 6433. *Quære*, whether proof of a knowledge, by persons residing in this country, of prior foreign use is a defense admissible under act 1870. *Illingworth v. Spaulding*, 9 Fed. Rep., 611. See *Plea in Bar*, § 4766.

§ 6434. The use or knowledge of the use of an invention in a foreign country, by persons residing in this country, will not defeat a patent which has here been granted to a *bona fide* patentee, who at the time was ignorant of the invention or its use abroad. *Doyle v. Spaulding*, 19 Fed. Rep., 744.

§ 6435. The time referred to by the terms (act 1836, section 15), "having been before known or used in a foreign country," is the time when patentee's original invention or discovery was made, not the date of his application. *Bartholomew v. Sawyer*, 4 Blatch., 347.

Use — Infringement — *Use on foreign vessel in domestic port is not*, §§ 6436, 6437. *Capture of article under protection of foreign patent confers no right to use under domestic patent*, § 6438.

§ 6436. The use of an invention by a foreign vessel temporarily in a United States port is not an infringement of the patent for which a right of action will lie. *Brown v. Duchesne*, 19 How., 183.

§ 6437. Where the action was for the infringement of plaintiff's invention, consisting in its use on board a foreign vessel in a United States port in the course of lawful trade, the device complained of having been made abroad, *held*, that the patent laws did not apply to such vessels so as to affect the structure or equipment which they bring hither. *Brown v. Duchesne*, 2 Curt., 371.

§ 6438. Where patentee had a patent in this country on his invention, and a subsequent patent on the same invention in England, granted before its practical introduction into this country, and one of the articles patented in England was captured on an English vessel, *held*, that no right accrued to use such invention on American vessels. *Wirt's Opinion*, 5 Op., 726.

See *Infringement*, § 2942.

§ 6439. Act 1793, section 1, knowledge and use prior to application, construed. *Morris v. Huntington*, 1 Paine, 348.

§ 6440. Act 1793, chapter 11, "abandonment, prior knowledge and use," reviewed and construed. *Pennock v. Dialogue*, 2 Pet., 1.

§ 6441. The words "not known or used," in the act 1793, signify not known or used by the public. *Ibid.*

§ 6442. Under act 1793 prior knowledge or use refers to public only; and when fraudulently obtained raises no presumption of abandonment. *Shaw v. Cooper*, 7 Pet., 292.

§ 6443. Prior knowledge and use, act 1800, to avoid a patent, must relate to the application. *Whitney v. Emmett*, 1 Bald., 303.

§ 6444. The "prior knowledge and use" contemplated in section 7, act 1836, was intended to be confined to a use, discovery or invention in this country made prior to applicant's discovery or invention, the proof of which prior use must be so limited, provided patentee at the time of his application believed himself to be the first inventor. *Bartholomew v. Sawyer*, 4 Blatch., 347.

See *Reduction to Practice*, §§ 5238-5240.

§ 6445. Act 1839, section 7, knowledge and use for two years prior to application, construed. *Sickles v. Mitchell*, 3 Blatch., 548.

§ 6446. Section 4886, Revised Statutes, providing that a patent may be granted if the invention was not known or used by others, and section 4920, Revised Statutes, providing that in his

notice of defenses the defendant shall state not only the names and residences of the persons alleged to have had prior knowledge of the invention, but "where and by whom it had been used," are to be construed together; and prior knowledge of an invention not accessible to the public did not defeat a patent. (*Gayler v. Wilder*, 10 How., 477.) *Searls v. Bouton*, 12 Fed. Rep., 140.

§ 6447. Section 4886, Revised Statutes, "not known or used by others in this country," construed. *Doyle v. Spaulding*, 19 Fed. Rep., 744.

Use—Statutory notice of prior knowledge and use—Requirements under act 1836, §§ 6448-6453; *under section 4220, Revised Statutes*, §§ 6454, 6455. *Generally*, §§ 6456-6465.

§ 6448. Under act 1836, section 15, notice of prior knowledge and use requires nothing more than the names and residences of the persons who possessed the prior knowledge of the thing patented, and the name of the place at which it had been used. *Wilton v. Railroads*, 1 Wall. Jr., 192.

§ 6449. Under act 1836, section 15, defendant must show notice to plaintiff, where he relies on defense of prior use of the invention. The object of such notice considered. *Phila. & Trenton R. Co. v. Stimpson*, 14 Pet., 448.

§ 6450. Notice of prior knowledge and use, referring merely to the county in which the thing was used, *held*, not sufficiently definite to meet the requirements of the act, and evidence thereunder was rejected. *Hays v. Sulsor*, 1 Bond, 259.

§ 6451. Under act 1836, section 15, notice of special matter requires the name of the person who had knowledge of the use, and the place where it was used, to be given. *Judson v. Cope*, 1 Bond, 327.

§ 6452. Under act 1836, section 15, notice of prior use must contain the name and residence of the person previously using, and the place where used; but the time of using is not material. *Phillips v. Page*, 24 How., 164.

§ 6453. Notice of prior knowledge and use under act 1836, section 15, is sufficiently certain and precise, if the adversary is thereby placed in a way that he may ascertain all that is necessary to his defense or answer; and where, in addition to the particular town in which such large objects as mill-stones are used, the name and residence of the witness by whom such use is to be proven is given, it is sufficient notice. *Wise v. Allis*, 9 Wall., 737.

§ 6454. Under section 4920, Revised Statutes, after notice of the name of the alleged prior inventor, and of the place of use, and of the name of some one who has used the invention, has been given or waived, all other witnesses may be examined without notice. *Woodbury Patent Planing Machine Co. v. Keith*, 4 B. & A., 100.

§ 6455. The statute, section 4920, Revised Statutes, does not require the names of witnesses to be given, but only the names of those who knew of the thing, and where they can be found, and by whom the thing was used. *Sutro v. Moll*, 19 Blatch., 89.

See *Abandonment*, § 12. *Answer*, §§ 218, 219. *Bill, of Review*, § 616.

§ 6456. Where, in a suit in chancery, the defense of prior knowledge or use of the thing patented is set up, defendant in his answer must give the names and places of residence of those who possessed such knowledge when the same had been used. *Agawam Co. v. Jordan*, 7 Wall., 583.

§ 6457. A notice given by the defendant in an action on a patent, which gives the names of the persons who knew of the prior use of the invention, and of the works in which it was used and their locality, is sufficient. *Smith v. Frazer*, 2 O. G., 175.

§ 6458. Where there is no question made that plaintiff's patentee was the original and first inventor, and the prior use relied on is that by inventor himself, or under his license, in the statutory notice names of persons using, and places where used, need not be given. *American Hide & Leather Splitting Co. v. Tool Co.*, 1 Holmes, 503.

§ 6459. The court will not invoke the privilege of the act requiring notice of prior knowledge and use for parties who have not availed themselves of it at the time of taking testimony. *Crouch v. Speer*, 6 O. G., 187.

§ 6460. In a suit at law on a patent, thirty days' notice in writing must be given of all matters relied upon by the defendant, to prove the patentee was not the original and first inventor of the improvement. In equity suits for infringement, such notice must be given in the answer of the respondent. *Pickering v. Phillips*, 4 Cliff., 383.

§ 6461. Parties defendants sued at law for infringement are not allowed to set up the defense of a prior invention, knowledge or use of the thing patented, unless written notice thereof is given thirty days before the trial. *Roemer v. Simon*, 5 Otto, 214.

§ 6462. Such notice must state the names of the patentees and the dates of their patents alleged to have been invented, and the names and residences of the persons alleged to have in-

vented, or to have had the prior knowledge of the thing patented, and where and by whom it had been used. *Ibid.*

§ 6463. Testimony as to the prior knowledge and use of the invention by persons not named in the answer will be considered on the hearing, if no motion is then made to strike it out, although it was objected to when it was taken. *Elm City Co. v. Wooster*, 4 O. G., 83.

§ 6464. Where, on the question of novelty, the alleged prior patent and its patentee's knowledge and use of the plaintiff's invention was not set up or referred to in the answer, the testimony in regard to it was not considered. *Carstaedt v. U. S. Corset Co.*, 13 Blatch., 119.

§ 6465. The respondents having given due notice of the defense of prior invention and use, stating the names and residences of the persons having the prior knowledge, and where and by whom the alleged invention had been used, added further that it had been known to and used by others to them unknown, and prayed leave that when discovered they might be permitted to insert and set forth their names in the answer. *Held*, that on motion to insert, in accordance with the notice, and no objection made, the court was justified in entering the additional names and residences *nunc pro tunc*. *Roemer v. Simon*, 5 Otto, 214.

Use — Prior knowledge and, generally — *Is a question of fact*, § 6466. *Must be prior to discovery*, §§ 6467, 6468. *Secret knowledge immaterial*, § 6469. *Experiments do not amount to*, § 6470. *What is and what is not*, §§ 6471-6473.

§ 6466. Prior knowledge and use is a question of fact, which the jury may decide on the evidence of one witness; and the question is on the credibility, not the number, of witnesses, *Whitney v. Emmett*, 1 Bald., 303.

§ 6467. Prior knowledge and use, to defeat a patent, must be prior to the date of invention. *Judson v. Cope*, 1 Bond, 327.

§ 6468. The first inventor has a right to a patent, though the knowledge and use by others was prior to his application, but not prior to his discovery. *Mellus v. Silsbee*, 4 Mason, 108.

§ 6469. The fact that an invention has been known or used before the application is immaterial, without it was known or used by the public. *Reed v. Cutter*, 1 Story, 590.

§ 6470. Proof of prior experiments on the principle of the invention, if not carried on to completion, does not make out the fact of prior knowledge or use, within the meaning of the patent laws. *Wayne v. Holmes*, 1 Bond, 27.

§ 6471. The imparting of the knowledge of the construction of a completed and perfected invention, by its inventor, to three witnesses skilled in the art, who saw it and understood its arrangement, *held*, to be giving to the public such a knowledge of it as a complete invention as to deprive a subsequent inventor from being considered a first and original inventor. *Coffin v. Ogden*, 7 Blatch., 61.

§ 6472. As the law seeks to encourage inventors to make known their inventions and to discourage an extension of the monopoly beyond the statutory period, and because of the difficulty in determining the amount of knowledge derived from the exhibition, publication and use of an invention, it has always been held that where the public have had means of knowledge of an invention they have had knowledge of the same. *Perkins v. Nashua Card & Glazed Paper Co.*, 2 Fed. Rep., 451.

§ 6473. Where it was shown that the parties set up as having prior knowledge of the patented invention had brought together all the parts necessary to accomplish the result patentee accomplished, but did not know how to use them, *held*, that this was not the known use required to defeat a patent. *Campbell v. Mayor, etc., of New York*, 9 Fed. Rep., 500.

See *Art, Lost*, §§ 391, 395.

Use — Public — *Defined*, §§ 6474-6476. *How established*, §§ 6477-6481.

§ 6474. By public use is meant a use in public by and with consent of the inventor. *Rich v. Lippincott*, 2 Fish., 1.

§ 6475. A public use, as meant by the statute, is a use in public. The invention need not be generally adopted by the public. Public is not equivalent to general use, but is distinguished from secret use — used in a public manner. *Hunt v. Howe*, 1 MacA. Pat. Cases, 366.

§ 6476. Public use is opposed to private use; it need not to be a general use by the community, but it must be an open use, so that the structure and *modus operandi* are apparent. *Adams v. Edwards*, 1 Fish., 1.

§ 6477. The obvious purpose of incurring the expense and trouble of taking out letters-patent is to carry the invention into public operation, use and sale, and it is natural to suppose that this the patentee has done. *Ellithorp v. Robertson*, 1 MacA. Pat. Cases, 585.

§ 6478. Public use, in the sense of the patent law, is proved by a single use by any person,

not the inventor, or by the inventor in an open way, provided the use was not experimental. *Jones v. Barker*, 11 Fed. Rep., 597.

§ 6479. To establish the fact of public use, actual knowledge of the invention need not have been derived by any one interested to practice it, but it is enough that any one or more persons not under pledge of secrecy saw the invention, or even might have seen it if they had used their opportunities, provided it was in fact practiced in the ordinary way after being completed. *Perkins v. Nashua Card & Glazed Paper Co.*, 2 Fed. Rep., 451.

§ 6480. Where there has been no pledge to secrecy, the visitors and workmen at a factory must be held to be either part of the public or persons from whom the public may acquire the art without breach of trust. *Ibid.*

§ 6481. *Doubted*, whether a pledge of secrecy exacted of a number of workmen who had nothing to do with the machine in question and had an opportunity to examine it would make the use a secret one. *Ibid.*

See *Grant*, § 2642.

Use — Public — *While application is pending, will not invalidate patent*, §§ 6482-6484.

§ 6482. Where the continuity of the application is not destroyed, public use for more than two years prior to the final application will not invalidate a patent. *Howe v. Newton*, 2 Fish., 531.

§ 6483. Use of the invention during pendency of the application in the patent office, without the consent of the inventor, cannot defeat the operation of letters patent after they are duly granted. *Goodyear Dental Vulcanite Co. v. Wetherbee*, 3 Cliff., 555.

§ 6484. Public or common use subsequent to the date of the original application, if that has been a continuing one, and the two petitions are "parts of the same transaction," will not avoid the patent. *Weston v. White*, 13 Blatch., 448.

Use — Prior public.

SUMMARY (*EGBERT v. LIPPMANN*, §§ 6485-6489) — *What constitutes public use*, §§ 6485, 6487. — *Number of persons using immaterial*, § 6486. — *Public use by one person held sufficient*, § 6488. — *Public and private use distinguished*, § 6489.

EGBERT v. LIPPMANN.

(14 Otto, 333-339. 1881.)

APPEAL from U. S. Circuit Court, Southern District of New York.

Opinion by MR. JUSTICE WOODS.

STATEMENT OF FACTS.— This suit was brought for an alleged infringement of the complainant's reissued letters-patent, No. 5216, dated January 7, 1873, for an improvement in corset-springs. The original letters bear date July 17, 1866, and were issued to Samuel H. Barnes. The reissue was made to the complainant, under her then name, Frances Lee Barnes, executrix of the original patentee.

The specification for the reissue declares: "This invention consists in forming the springs of corsets of two or more metallic plates, placed one upon another, and so connected as to prevent them from sliding off each other laterally or edgewise, and at the same time admit of their playing or sliding upon each other, in the direction of their length or longitudinally, whereby their flexibility and elasticity are greatly increased, while at the same time much strength is obtained."

The second claim is as follows: "A pair of corset-springs, each member of the pair being composed of two or more metallic plates, placed one on another, and fastened together at their centers, and so connected at or near each end that they can move or play on each other in the direction of their length."

The bill alleges that Barnes was the original and first inventor of the improvement covered by the reissued letters-patent, and that it had not, at the

time of his application for the original letters, been for more than two years in public use or on sale, with his consent or allowance. The answer takes issue on this averment and also denies infringement. On a final hearing the court dismissed the bill, and the complainant appealed.

As to the second defense above mentioned, it is sufficient to say that the evidence establishes beyond controversy the infringement by the defendants of the second claim of the reissue. We have, therefore, to consider whether the defense that the patented invention had, with the consent of the inventor, been publicly used for more than two years prior to his application for the original letters, is sustained by the testimony in the record.

The sixth, seventh and fifteenth sections of the act of July 4, 1836, ch. 357 (5 Stat., 117), as qualified by the seventh section of the act of March 3, 1839, chapter 88 (*id.*, 353), were in force at the date of his application. Their effect is to render letters patent invalid if the invention which they cover was in public use, with the consent and allowance of the inventor, for more than two years prior to his application. Since the passage of the act of 1839 it has been strenuously contended that the public use of an invention for more than two years before such application, even without his consent and allowance, renders the letters patent therefor void. It is unnecessary in this case to decide this question, for the alleged use of the invention covered by the letters patent to Barnes is conceded to have been with his express consent.

The evidence on which the defendants rely to establish a prior public use of the invention consists mainly of the testimony of the complainant. She testifies that Barnes invented the improvement covered by his patent between January and May, 1855; that between the dates named the witness and her friend Miss Cugier were complaining of the breaking of their corset-steels. Barnes, who was present, and was an intimate friend of the witness, said he thought he could make her a pair that would not break. At their next interview he presented her with a pair of corset-steels which he himself had made. The witness wore these steels a long time. In 1858 Barnes made and presented to her another pair, which she also wore a long time. When the corsets in which these steels were used wore out, the witness ripped them open and took out the steels and put them in new corsets. This was done several times. It is admitted, and, in fact, is asserted, by complainant, that these steels embodied the invention afterwards patented by Barnes and covered by the reissued letters patent on which this suit is brought.

Joseph H. Sturgis, another witness for complainant, testifies that in 1863 Barnes spoke to him about two inventions made by himself, one of which was a corset-steel, and that he went to the house of Barnes to see them. Before this time, and after the transactions testified to by the complainant, Barnes and she had intermarried. Barnes said his wife had a pair of steels made according to his invention in the corsets which she was then wearing, and if she would take them off he would show them to witness. Mrs. Barnes went out, and returned with a pair of corsets and a pair of scissors, and ripped the corsets open and took out the steels. Barnes then explained to witness how they were made and used.

This is the evidence presented by the record on which the defendants rely to establish the public use of the invention by the patentee's consent and allowance. The question for our decision is, whether this testimony shows a public use within the meaning of the statute.

§ 6485. *To constitute the public use of a patent it is not necessary that more than one of the patented articles should be publicly used. The use of a great number may tend to strengthen the proof of public use, but one well-defined case of public use is just as effectual to annul the patent as many.*

We observe, in the first place, that to constitute the public use of an invention it is not necessary that more than one of the patented articles should be publicly used. The use of a great number may tend to strengthen the proof, but one well-defined case of such use is just as effectual to annul the patent as many. *McClurg v. Kingsland*, 1 How., 202; *Consolidated Fruit-Jar Co. v. Wright*, 94 U. S., 92; *Pitts v. Hall*, 2 Blatch., 229. For instance, if the inventor of a mower, a printing-press or a railway car makes and sells only one of the articles invented by him, and allows the vendee to use it for two years, without restriction or limitation, the use is just as public as if he had sold and allowed the use of a great number.

§ 6486. *Whether the use of an invention is public or private does not necessarily depend upon the number of persons to whom its use is known.*

We remark, secondly, that, whether the use of an invention is public or private does not necessarily depend upon the number of persons to whom its use is known. If an inventor, having made his device, gives or sells it to another, to be used by the donee or vendee, without limitation or restriction, or injunction of secrecy, and it is so used, such use is public, even though the use and knowledge of the use may be confined to one person.

§ 6487. *A use of an invention is a public use, within the meaning of the law, if the inventor sells a machine of which his invention forms a part, and allows it to be used without restriction of any kind, although, owing to the character of the invention, it can only be used when it cannot be seen or observed by the public eye.*

We say, thirdly, that some inventions are by their very character only capable of being used where they cannot be seen or observed by the public eye. An invention may consist of a lever or spring, hidden in the running gear of a watch, or of a ratchet, shaft or cog-wheel covered from view in the recesses of a machine for spinning or weaving. Nevertheless, if its inventor sells a machine of which his invention forms a part, and allows it to be used without restriction of any kind, the use is a public one. So, on the other hand, a use necessarily open to public view, if made in good faith solely to test the qualities of the invention and for the purpose of experiment, is not a public use within the meaning of the statute. *Elizabeth v. Pavement Co.*, 97 U. S., 126 (§§ 6378-86, *supra*); *Shaw v. Cooper*, 7 Pet., 292.

§ 6488. *Where the inventor made and gave to a person for use two pairs of corset-steels, imposing no obligation of secrecy or any condition or restriction whatever, and it appeared that the invention was at that time complete, and the donee used them for a series of years before the filing of the application for a patent in the manner and for the purpose designed by the inventor, held, that the patent was invalidated by virtue of the public use, with the consent and allowance of the inventor, for more than two years prior to the filing of the application.*

Tested by these principles, we think the evidence of the complainant herself shows that for more than two years before the application for the original letters there was, by the consent and allowance of Barnes, a public use of the invention covered by them. He made and gave to her two pairs of corset-steels constructed according to his device, one in 1855 and one in 1858. They were presented to her for use. He imposed no obligation of secrecy, nor any

condition or restriction whatever. They were not presented for the purpose of experiment, nor to test their qualities. No such claim is set up in her testimony. The invention was at the time complete, and there is no evidence that it was afterwards changed or improved. The donee of the steels used them for years for the purpose and in the manner designed by the inventor. They were not capable of any other use. She might have exhibited them to any person or made other steels of the same kind, and used or sold them, without violating any condition or restriction imposed on her by the inventor.

According to the testimony of the complainant the invention was completed and put to use in 1855. The inventor slept on his rights for eleven years. Letters patent were not applied for till March, 1866. In the meantime the invention had found its way into general and almost universal use. A great part of the record is taken up with the testimony of the manufacturers and venders of corset-steels, showing that before he applied for letters the principle of his device was almost universally used in the manufacture of corset-steels. It is fair to presume that, having learned from this general use that there was some value in his invention, he attempted to resume, by his application, what by his acts he had clearly dedicated to the public.

“An abandonment of an invention to the public may be evinced by the conduct of the inventor at any time, even within the two years named in the law. The effect of the law is that no such consequence will necessarily follow from the invention being in public use or on sale, with the inventor’s consent and allowance, at any time within two years before his application; but that, if the invention is in public use or on sale prior to that time, it will be conclusive evidence of abandonment, and the patent will be void.” *Elizabeth v. Pavement Company, supra.*

We are of opinion that the defense of two years’ public use, by the consent and allowance of the inventor, before he made application for letters patent, is satisfactorily established by the evidence.

Decree affirmed.

Dissenting opinion by MR. JUSTICE MILLER.

The sixth section of the act of July 4, 1836, chapter 357, makes it a condition of the grant of a patent that the invention for which it was asked should not, at the time of the application for a patent, “have been in public use or on sale with the consent or allowance” of the inventor or discoverer. Section 15 of the same act declares that it shall be a good defense to an action for infringement of the patent, that it had been in public use or on sale with the consent or allowance of the patentee before his application. This was afterwards modified by the seventh section of the act of March 3, 1839, chapter 88, which declares that no patent shall be void on that ground unless the prior use has been for more than two years before the application.

This is the law under which the patent of the complainant is held void by the opinion just delivered. The previous part of the same section requires that the invention must be one “not known or used by others” before the discovery or invention made by the applicant. In this limitation, though in the same sentence as the other, the word “public” is not used, so that the use by others, which would defeat the applicant, if without his consent, need not be public; but where the use of his invention is by his consent or allowance, it must be public or it will not have that effect.

The reason of this is, undoubtedly, that if without his consent others have

used the machine, composition or manufacture, it is strong proof that he was not the discoverer or first inventor. In that case he was not entitled to a patent. If the use was with his consent or allowance, the fact that such consent or allowance was first obtained is evidence that he was the inventor and claimed to be such. In such case he was not to lose his right to a patent, unless the use which he permitted was such as showed an intention of abandoning his invention to the public. It must, in the language of the act, be *in public use* or on sale. If on sale, of course the public who buy can use it; and if used in public with his consent, it may be copied by others. In either event there is an end of his exclusive right of use or sale.

§ 6489. *Private and public use distinguished.*

The word *public* is, therefore, an important member of the sentence. A private use with consent, which could lead to no copy or reproduction of the machine, which taught the nature of the invention to no one but the party to whom such consent was given, which left the public at large as ignorant of this as it was before the author's discovery, was no abandonment to the public, and did not defeat his claim for a patent. If the little steel spring inserted in a single pair of corsets, and used by only one woman, covered by her outer-clothing, and in a position always withheld from public observation, is a *public* use of that piece of steel, I am at a loss to know the line between a private and a public use.

The opinion argues that the use was public, because, with the consent of the inventor to its use, no limitation was imposed in regard to its use in public. It may be well imagined that a prohibition to the party so permitted against exposing her use of the steel spring to public observation would have been supposed to be a piece of irony. An objection quite the opposite of this suggested by the opinion is, that the invention was incapable of a public use. That is to say, that while the statute says the right to the patent can only be defeated by a use which is public, it is equally fatal to the claim, when it is permitted to be used at all, that the article can never be used in public.

I cannot on such reasoning as this eliminate from the statute the word *public*, and disregard its obvious importance in connection with the remainder of the act, for the purpose of defeating a patent otherwise meritorious.

Use — Statutes, construction of — *Prior public use, acts 1793, 1836, 1839, §§ 6490-6494. Prior public use or sale, acts 1836, 1839, 1870, R. S., §§ 6495-6511. See Abandonment, Under the Statute, §§ 55-65.*

§ 6490. Under act of 1793, prior use is no bar to a patent. *Goodyear v. Mathews*, 1 Paine, 300.

§ 6491. Act 1793, section 1, "prior public use," construed. *Mellus v. Silsbee*, 4 Mason, 108.

§ 6492. Under the laws of 1836 and 1839, use or sale of an invention to defeat a patent must be with the consent and allowance of the inventor. *Campbell v. Mayor, etc., of New York*, 9 Fed. Rep., 500.

§ 6493. By the provision of the act of 1836, section 15, it was only public use or sale, with the consent and allowance of a patentee, before the application for a patent, that would defeat the patent. The act of 1839, section 7, did not change the character of the public use or sale that would defeat a patent, but provided that no patent should be held invalid by reason of them, unless "such purchase, sale or prior use has been for more than two years prior to such application for patent." *Campbell v. James*, 17 Blatch., 42.

§ 6494. "Public and common use" (act 1839, section 6) of an invention previously patented in England must be more than the "public use" of section 6; it must have passed into general use in the community to invalidate a patent upon the ground of the prior English patent. *American Hide & Leather Splitting Co. v. Tool Co.*, 1 Holmes, 503.

§ 6495. Under the seventh section of the act of 1836, directing the commissioner to cause an examination to be made of the alleged new invention, and to issue a patent if it shall not appear

inter alia that the invention had been in public use or on sale, with the applicant's consent or allowance, prior to the application, the commissioner has authority to investigate and determine the question of public use arising in connection with an application for a patent. *Mowry v. Barber*, 1 MacA. Pat. Cases, 563.

§ 6496. The use and sale of an invention under a patent is a public use within the meaning of section 7 of act of 1836, although such use is limited by the grant or monopoly to the patentee and those deriving title under him. It is not meant by the statute that there must be a general knowledge of and right to use the invention. The words "public use" mean use in public, as distinguished from secret or private use; and such a use by a single person will defeat the patent. *Ellithorp v. Robertson*, 1 MacA. Pat. Cases, 585.

§ 6497. The negative prerequisites to a patent — that the invention has not been in public use or on sale, etc. — as mentioned in the sixth section of the act of 1836, are equally binding upon the commissioner with the others therein named, and are expressly submitted to his examination by the opening provisions of section 7 of the same act. *Hunt v. Howe*, 1 MacA. Pat. Cases, 366.

§ 6498. The terms of act 1836, section 7, "prior to the application" for a patent, refer only to the "public use or sale" (of the invention) "with the applicant's consent or allowance." *Bartholomew v. Sawyer*, 4 Blatch., 347.

§ 6499. Under act 1839, prior public use and sale to invalidate a patent must be for more than two years prior to application, with knowledge and consent of inventor, and not for experimental purposes only. The burden of proof is on defendant who sets it up. *American Hide & Leather Splitting Co. v. Tool Co.*, 1 Holmes, 503.

§ 6500. The meaning of section 7 of the act of 1839 is given by inverting the order of the parts of the section so as to read as follows: No patent shall be held to be invalid by reason of such purchase, sale, or use prior to the application aforesaid, except on proof that such purchase, sale, or prior use has been for more than two years prior to said application for a patent, or by abandonment of said invention to the public. *Wickersham v. Singer*, 1 MacA. Pat. Cases, 645.

§ 6501. As distinguished from the English law — that if the thing is in use before the issuing of the patent, the patent is void — our law (section 7, act of 1839) provides that the use of the thing, even by leave of the inventor, for two years before his application for a patent, shall not invalidate it; *a fortiori*, the use of it by a third person or subsequent inventor after the first inventor, and before the issuing of the patent to the first inventor, without his consent, will not be a bar to such patent. *Heath v. Hildreth*, 1 MacA. Pat. Cases, 12.

§ 6502. Under the seventh section of the act of 1839 an inventor cannot obtain a patent if his invention was in public use more than two years prior to filing his application. *Rugg v. Haines*, 1 MacA. Pat. Cases, 420.

§ 6503. Under the provisions of section 15 of the act of 1836, and the seventh section of the act of 1839, an application will be barred by proof that the invention has been in public use for more than two years prior to filing the application. *Arnold v. Bishop*, 1 MacA. Pat. Cases, 28.

§ 6504. Section 7 of the patent act of March 3, 1839, as amendatory of that of July 4, 1836, construed to imply that the purchase, sale or prior use of an invention, etc., in defeat of a patent shall have been with knowledge and consent of the inventor. *Draper v. Wattles*, 16 O. G., 629.

§ 6505. Section 7 of the act of 1839 relieved the inventor from the danger of forfeiting his invention in consequence of its having been in public use or on sale for less than two years, but had no other effect. *Russell & Erwin Manufacturing Co. v. Mallory*, 10 Blatch., 140.

§ 6506. Section 7 of the act of 1839 has no application to a case where an applicant is met with the objection that the invention has been in public use under the patent of another. That provision is intended to relate to the case of a use, sale or license to use given, made or claimed under the patentee who admits and claims the privilege. In the case in question the applicant, so far from claiming the exception, denies that he ever did use or sell the invention to any one, and the patentee sets up no such claim. *Ellithorp v. Robertson*, 1 MacA. Pat. Cases, 585.

§ 6507. It would seem that the commissioner has power to compel the attendance of witnesses for the purpose of investigating the questions of public use and abandonment under the clause of section 12, act of 1839, providing that the commissioner shall have power to make such regulations in respect of the taking of evidence to be used in contested cases before him as may be just and reasonable. *Hunt v. Howe*, 1 MacA. Pat. Cases, 366.

§ 6508. It is the policy of the patent laws to forbid the issue of a patent for an invention which has been in public use before the application therefor. The statute of 1836 (5 Stats., 117, sec. 6) did not allow the issue of a patent when the invention had been in public use or on sale for any period, however short, with the consent or allowance of the inventor; and the statute of 1870 (Rev. Stats., sec. 4886) does not allow the issue when the invention had been in public

use for more than two years prior to the application, either with or without the consent or allowance of the inventor. *Manning v. Cape Ann Isinglass & Glue Co.*, 108 U. S., 462.

§ 6509. Public use in this country of the invention of the foreign patentee more than two years prior to filing the application for domestic patent is a defeat of the patent by the terms of the existing law of 1870. The public use thus made essential is a use in public, not necessarily a use by the public generally. *Henry v. Providence Tool Co.*, 14 O. G., 855.

§ 6510. Under section 4886, Revised Statutes, as under act of 1839, a public use of an invention for two years prior to the application, with or without the consent of the inventor, is sufficient to invalidate the patent. *Andrews v. Hovey*, 16 Fed. Rep., 387.

§ 6511. Section 4899, Revised Statutes, must be construed in connection with section 4886; and it may be said generally that while section 4886 makes void every patent where it is shown that the invention was in public use or on sale for the period of two years before the application for patent, section 4899, although allowing letters patent to stand, excepts from liability to the inventor, all persons who have used for less than two years any patented machine or article that has been purchased or constructed with the knowledge and consent of the inventor prior to his application for patent. *Duffy v. Reynolds*, 33 O. G., 621.

See *Applications*, §§ 340, 341. *Commissioner*, § 1094.

Use — Prior public, with inventor's allowance — Will defeat a patent, §§ 6512-6518. When not presumed, §§ 6519, 6520. When presumed, §§ 6521, 6522.

§ 6512. Public use, to defeat a patent, must be either generally allowed or acquiesced in, or, at least, unlimited in time, extent or object. *Wyeth v. Stone*, 1 Story, 273.

§ 6513. No fraudulent or wrongful use of an invention, and no public use without the consent, or knowledge, or sanction of the inventor, would deprive him of his right to a patent. *Pierson v. Eagle Screw Co.*, 3 Story, 402.

§ 6514. Public use of an invention prior to the grant of a patent, if acquiesced in by the inventor, is an abandonment, whether fraudulently obtained from him or not. *Shaw v. Cooper*, 7 Pet., 292.

§ 6515. The omission by an inventor to apply for a patent within two years after he learns that another is publicly using the invention and claiming it as his own, and the failure to interpose any warning or objection whatever, makes out a clear case of disability to prosecute a claim for a patent within the seventh section of the act of 1839. *Justice v. Jones*, 1 MacA. Pat. Cases, 635.

§ 6516. Whatever may be the intention of the inventor, if he suffers his invention to go into public use through any means whatever, without an immediate assertion of his right, he is not entitled to a patent; nor will a patent obtained under such circumstances protect his right. (*Shaw v. Cooper*, 7 Pet., 292.) *Savary v. Lauter*, 1 MacA. Pat. Cases, 691.

§ 6517. A first inventor cannot acquire a good title to a patent if he suffer the thing invented to go into public use, or to be publicly sold for use, more than two years before the date of his application for patent. *Rich v. Lippincott*, 2 Fish., 1.

§ 6518. The statute has made contemporaneous public use, with the knowledge and allowance of the inventor, a bar when it exceeds two years; but in the absence of that, and of any other colorable circumstance, we know of no mere period of time which ought, *per se*, to deprive an inventor of his patent. *Andrews v. Carman*, 13 Blatch., 307.

See *Priority of Invention*, § 4994.

§ 6519. The law does not presume, from patentee's public use of his own invention prior to patenting, that he consents to such use by others. *McMillin v. Barclay*, 5 Fish., 189.

§ 6520. The acquiescence of an inventor in the public use of his invention can in no case be presumed when he has no knowledge of such use; but this knowledge may be presumed from the circumstances of the case. What is evidence of acquiescence. (*Shaw v. Cooper*, 7 Pet., 292.) *Wickersham v. Singer*, 1 MacA. Pat. Cases, 645.

See *Abandonment*, § 37.

§ 6521. The fact that a patent was taken out by another inventor, four years before the application in question was filed, raises a strong presumption that the invention has been in public use with the consent and allowance of the applicant; and in the absence of any proof that the patent was surreptitiously or unjustly obtained, casts the burden of proof on the applicant to show that the fact is otherwise. *Ellithorp v. Robertson*, 1 MacA. Pat. Cases, 585.

§ 6522. When the machine of a rival inventor has been publicly used for years, with the knowledge of the applicant, or of which he might have had knowledge, he will be presumed to have acquiesced in and consented to such public use of the invention. *Hunt v. Howe*, 1 MacA. Pat. Cases, 366.

See *Acquiescence*, §§ 140-142. *Defenses*, § 1825.

Use — Prior public, § 6523.

§ 6523. If others practice the invention in this country, whether with or without the knowledge or consent of the patentee, more than two years prior to the filing of his application, the patent is invalid under the existing law. *Kelleher v. Darling*, 4 Cliff., 424.

Use — Prior public, prior to application — *Presumptions*, § 6524. *Must be of a perfect machine*, §§ 6525, 6526. *Must be clearly proved*, §§ 6527-6534. *Cannot be avoided by assigning invention*, § 6535.

§ 6524. As to public use for more than two years prior to date of application, the presumption is in favor of the patent. *Brown v. Whittemore*, 2 O. G., 248.

See *Date of Invention*, §§ 1724-1727.

§ 6525. Public use for more than two years prior to application for patent must be of a "perfect" machine, *i. e.*, a practical and operative invention, in order to invalidate the subsequent patent. *American Hide & Leather Splitting Co. v. Tool Co.*, 1 Holmes, 503.

§ 6526. Prior public use to defeat a patent must be of the perfected machine and not experimental merely, in order to amount to a dedication to the public. *Winans v. New York & Harlem R. R.*, 4 Fish., 1.

§ 6527. Public use of a single machine, other than by way of experiment, more than two years prior to application, must be clearly proved to establish an abandonment. *Pitts v. Hall*, 2 Blatch., 229.

§ 6528. Defense of prior public use to defeat a patent should be made out by clear proof. *Campbell v. James*, 17 Blatch., 42.

§ 6529. In order to sustain the defense of prior use, it is necessary for the defendant to show not only that the process was in public use prior to the alleged discovery, but that it was so used by some one who perceived the fact of its utility, who knew what could be accomplished by it, and who communicated this information to the public. *Boyd v. Cherry*, 4 McC., 70.

§ 6530. To justify the court in sustaining the defense of prior public use, the proof should be clear and satisfactory; the right of the infringer to invalidate the patent for this cause should be undoubted. *Graham v. McCormick*, 10 Biss., 39.

§ 6531. An application for a patent cannot be rejected on the ground that the invention was in public use and on sale for more than two years before the time of filing the application, when the only proof before the commissioner consists of mere *ex parte* affidavits taken without notice and cross-examination. *Alteneck's Appeal*, 23 O. G., 269.

§ 6532. The defense of public use for more than two years prior to the filing of the application upon which the patent was granted must be clearly proven. A private use for testing the invention and informing the inventor as to its perfection and usefulness, with the design on his part all the while to procure a patent, will not sustain such defense. *Campbell v. James*, 17 Blatch., 42.

§ 6533. Evidence almost wholly made up of the recollections of witnesses, revived after the lapse of many years, and contradicted in most instances by explicit testimony of other equally credible witnesses, leaves so much doubt as to the actual existence of the device as to make it unsafe to defeat a patent on the ground of public use thus sought to be established. *Washburn & Moen Manufacturing Co. v. Haish*, 10 Biss., 65.

§ 6534. In order to invalidate a patent on the ground of prior use, it is necessary to adduce evidence of that high character which convinces the court beyond a reasonable doubt. *Everest v. Buffalo Lubricating Oil Co.*, 20 Fed. Rep., 848.

§ 6535. The inventor cannot relieve himself of the consequences of the prior public use of his patented invention by assigning an interest in his invention or patent to the person by whom the invention was thus used. *Worley v. Loker Tobacco Co.*, 14 Otto, 340.

Use — Prior public, prior to application; particular cases — *Held to be a public use*, §§ 6535-6546. *Not a public use*, §§ 6547-6549.

§ 6536. The use of the machines by the plaintiff with consent of patentee, for a period of more than two years prior to application, in the absence of any evidence that a single step was taken to secure a patent, or that either the inventor or the plaintiffs intended to secure one, is a public use, an abandonment under act 1839, section 7, and the patent is void. *Toppan v. National Bank Note Co.*, 4 Blatch., 509.

§ 6537. Where the use of patentee's invention for four years prior to application was obviously that of a complete invention, and with a view to derive such benefit from it as might be due to its greater efficiency and economy over other devices before in use, and it was used

also in the ordinary way of the public use of such mechanism, it was held such prior public use as to invalidate the patent. *McMillin v. Barclay*, 5 Fish., 189.

§ 6538. Where a single stove was sold two years prior to the application for patent, although the particulars and terms of the sale were not proved, it was held to invalidate the patent. *Henry v. Francistown Soap-stone Co.*, 2 Fed. Rep., 78.

§ 6539. When it appeared from the testimony submitted in an interference that the applicant in the case — the other party being a patentee — had permitted several persons to make, for their own personal use and wear, corsets embracing his invention, without restriction or reservation, for more than two years before his application was filed, *held*, that his application was barred under the law by reason of public use, and that it was unnecessary, under such circumstances, to determine the question of priority of invention. *Blackington v. Douglass*, 1 MacA. Pat. Cases, 622.

6540. B. invented and perfected and privately used the invention in 1853. In 1858 his neighbor S. independently invented and patented the same thing, and put it into public use with the full knowledge of B., who applied for a patent one year later. *Held*, that B. has shown gross and culpable negligence, and has forfeited his right to a patent. *Spear v. Belson*, 1 MacA. Pat. Cases, 699.

§ 6541. W. filed an application for the invention in 1850, which was at once returned to him as informal. In the same year he transmitted new drawings and specifications, omitting therefrom the invention in dispute. Upon further objection he withdrew the application in 1851, received the return fee, and took no further steps until he filed a new application, October 6, 1858. S. made application for a patent in 1850, obtained a patent in 1851, and put the invention into extensive public use from 1853 on; of all of which facts W. was fully informed as early as April, 1856. *Held*, W. had abandoned the invention by not using due diligence in applying for and prosecuting his application for a patent; that his application of 1858 did not relate back to the date of the original application, and that his right to the patent was barred by reason of the public use and sale of the invention, with his consent and allowance, more than two years prior to filing his second application. *Wickersham v. Singer*, 1 MacA. Pat. Cases, 645.

§ 6542. Where two samples of the invention were made by patentee and given to another person for use, and subsequently he showed them to a third party, it was held a public use, which, having occurred more than two years prior to his application, constituted an abandonment of his invention. *Egbert v. Lippman*, 15 Blatch., 295.

§ 6543. Where, eight years before applying for a patent, the inventor, voluntarily and for a consideration, made a device embodying the invention described in his patent, and sold the same without reserve to a third party, who bought it for use and did so publicly use it, the patent was held void for public use more than two years prior to date of application. *Schneider v. Thill*, 5 B. & A., 565.

§ 6544. Where skates containing an improvement on an earlier patent held by the same inventor were in use or were offered for sale by the same inventor, whether actually sold or not, more than two years before his application for his second or subordinate patent, the latter is void. *Plimpton v. Winslow*, 14 Fed. Rep., 919.

§ 6545. Where an inventor allowed to two persons the unrestricted use of his invention without injunction of secrecy or other condition, such use *held* to constitute a public use. *Manning v. Cape Ann Isinglass & Glue Co.*, 108 U. S., 462.

§ 6546. A device which was used for about two and one-half months only, and was then laid aside, *held* to be an anticipation of a patent when the use was not for the purpose of testing the device, but was a public and practical one, with as much success as was reasonable to expect at that early stage of a particular art. *Brush v. Condit*, 20 Fed. Rep., 826.

§ 6547. Where the inventor, before applying for a patent, allowed six years to elapse in a *bona fide* experiment to test the strength and durability of a wood pavement which was laid upon a frequented road, but without exposing to the public view the mode of its construction, *held*, that there was no such public use of the invention, or any such dedication or abandonment of it, as would avoid a patent for it. *American Nicholson Pavement Co. v. City of Elizabeth*, 3 O. G., 522.

§ 6548. If Nobel's English Patent No. 1345 be regarded as a patent for the invention found in No. 78,317, and as having been granted more than six months before Nobel's application for No. 78,317, still No. 78,317 was not invalid, because it does not appear that the invention covered by it was introduced into public and common use in the United States prior to the application for No. 78,317. *Atlantic Giant Powder Co. v. Rand*, 16 Blatch., 250.

§ 6549. Where more than two years prior to his application for patent the inventor gave to another a specimen of his invention, but not for sale, which was, however, sold without his consent or allowance, *held*, it was not a public use and sale to invalidate his patent under acts 1836 and 1839. *Davis v. Fredericks*, 19 Fed. Rep., 99.

Use—Prior public and sale, with inventor's consent— *Will defeat patent*, §§ 6550, 6551. *Evidence of*, §§ 6552, 6553. *How pleaded*, § 6554.

§ 6550. Public sale or use of the invention with inventor's consent prior to his application will, under act 1793, deprive inventor of his right to patent. *Pennock v. Dialogue*, 2 Pet., 1.

§ 6551. Public use or sale that will deprive an inventor of his right to a patent must be with his consent and prior to his application. *Ryan v. Goodwin*, 3 Sumn., 514.

§ 6552. An unconditional sale by the inventor himself of his invention, together with a machine embodying the invention, more than ten years before filing the application, and the public exhibition of the machine by the purchaser, is conclusive proof that the invention was in public use, with the consent and allowance of the inventor; and he cannot then resume his right to a patent by the repurchase of such invention and machine. *Hunt v. Howe*, 1 MacA. Pat. Cases, 366.

§ 6553. Consent and allowance of public use and sale for more than two years prior to application for patent may be inferred from inventor's acquiescence therein. *Sisson v. Gilbert*, 9 Blatch., 185.

§ 6554. Allegation of sale and public use of an invention with allowance and consent of inventor at the time of the application is not a good defense, unless alleged to have been for more than two years prior to such application. *Agawam Co. v. Jordan*, 7 Wall., 583.

Use—Prior public, and sale— *Will defeat a patent*, §§ 6555-6559. *Evidence of*, § 6560. *Does not apply to reissues*, § 6561.

§ 6555. An applicant must be rejected upon testimony taken in an interference proceeding showing a sale and use of the invention more than two years prior to filing the application. *Rugg v. Haines*, 1 MacA. Pat. Cases, 420.

§ 6556. A patent is void if, more than two years before the application for it was filed, the patentee had sold the patented articles for the double purpose of realizing the proceeds and of seeing if they would sell, and others had them in actual use. *Consolidated Fruit-Jar Co. v. Wright*, 12 Blatch., 149.

§ 6557. Sales in the usual course of business, whether absolute or conditional, if they are sales of the patented thing, work a forfeiture of the invention if occurring more than two years prior to the filing of an application. A single sale is as effectual for this purpose as a hundred sales. *Henry v. Francetown Soap-stone Co.*, 2 Fed. Rep., 78.

§ 6558. The thing sold, to defeat the patent, need not have been perfect in the mechanical sense; it is sufficient if it embodied the completed invention in a form which would be operative. *Ibid.*

§ 6559. The mere fact that some of the sales were conditional — *i. e.*, that the articles were to be returned if they were not satisfactory to the buyers — does not, without further explanation, prove that the articles were experimental. It may show that the purchaser had doubts, but does not prove that the seller had any. *Ibid.*

§ 6560. Evidence of continued manufacture and sale through several years, and the allowance of such use thence onward, for six years more, before the patent was applied for, *held*, to be such prior use and sale as to invalidate a patent. *Sisson v. Gilbert*, 9 Blatch., 185.

§ 6561. More than two years' public use and sale prior to application for a patent does not apply to application for a reissue. *Shaw v. Colwell Lead Co.*, 11 Fed. Rep., 711.

Use—Prior public, in general— *To invalidate patent, the use must be prior to the discovery*, § 6562. *The use must be public*, §§ 6563-6565. *Employer's prior public use, with consent of employee (inventor), defeats employee's patent*, § 6566. *Machine in use for two years cannot be patented with an improvement*, § 6567.

§ 6562. Use prior to the discovery, not the application, invalidates a patent. *Evans v. Weiss*, 2 Wash., 342; *Goodyear v. Mathews*, 1 Paine, 300; *Morris v. Huntington*, 1 Paine, 348; *Treadwell v. Bladen*, 4 Wash., 703.

§ 6563. A prior use to avoid a patent must be public and with the acquiescence of the inventor. *Whitney v. Emmett*, 1 Bald., 303.

§ 6564. The intervening use, in order to defeat a prior invention, must be public, and with the consent of the inventor, and continue two years. *Allen v. Blunt*, 2 W. & M., 121.

§ 6565. Prior use, in order to invalidate a patent to a subsequent inventor, must be public, and not a private use unknown to the inventor. *Haselden v. Ogden*, 3 Fish., 378.

§ 6566. If a person employed in the manufactory of another, while receiving wages, makes experiments at the expense and in the manufactory of the employer, has his wages increased in consequence of the useful results of his experiments, makes the article invented, and per-

mits his employer to use it, no compensation for its use being paid or demanded, and then obtains a patent for it, the patent is invalid and void. (*McClurg v. Kingsland*, 1 How., 202.) *Worley v. Loker Tobacco Co.*, 14 Otto, 340.

§ 6567. A patentee cannot be permitted to use for profit a machine which embodies a perfected invention, for a period of two years or more, and then obtain a valid patent for the old machine by means of the addition of some new improvements which were intended to benefit the patent rather than the machine. *Sprague v. Smith*, 12 Fed. Rep., 721.

Use — Prior knowledge and — *A perfected machine is necessary in order to defeat a patent on the ground of prior knowledge and use, §§ 6568-6571; prior use, § 6572.*

§ 6568. Adverse knowledge and use of the device claimed, prior to the patentee's invention thereof, on a machine which was never completed, the device itself not being patented or otherwise given or made accessible to the public until long after the issue of complainant's patent, will not invalidate the exclusive right of the patentees. *Bullock Printing Press Co. v. Jones*, 13 O. G., 124.

§ 6569. Since the decision of the case of *Coffin v. Ogden*, 18 Wall., 120, evidence is sufficient to support the defense of a prior knowledge and use when it proves that the invention was complete and capable of working, if it had been put in public use and was known to any considerable number of persons. *Judson v. Bradford*, 16 O. G., 171.

§ 6570. Although the circumstances of the inventor and the nature of the article may have required that it be tested by others, still, under the defense of adverse public use, it is somewhat difficult for a court to qualify, by a supposed intention not declared at the time, the act of an inventor who sells the patented article on two occasions, apparently in the ordinary course of trade. *Draper v. Wattles*, 16 O. G., 629.

§ 6571. But the sale, purchase or use must have been of the thing patented; hence, where it was a less perfect article, not merely a colorable variation, no dedication results, although such article may embody features in common with what was thereafter patented. *Ibid.*

§ 6572. A patent is not invalidated by proof that before the patentee's invention a device similar to the patentee's was temporarily in use, but proved a failure and was abandoned under circumstances indicating that it was no more than an unsuccessful and abortive experiment. To defeat a patent on the ground of prior use of the patented invention, it must appear that the anticipatory device was embodied in distinct form, and was so far perfected as to be capable of practical use. *Allis v. Buckstaff*, 22 O. G., 1705.

Use — Prior — Pleading and practice, §§ 6573-6579.

§ 6573. The defense that the patentee had allowed his invention to be in public use or on sale for two years before he applied for a patent is distinct from the defense that he had abandoned it to the public, and should not be blended with it in the same pleading. *Jones v. Sewall*, 3 Cliff., 563.

§ 6574. A plea in defense, that "the invention named was in public use and on sale more than two years prior to the supposed invention of the complainants," overruled as not within any one of those allowed by statute. *Kelleher v. Darling*, 4 Cliff., 424.

§ 6575. Inventors may, if they can, keep their invention secret, and if they do, no neglect to petition for a patent will forfeit their right to apply to the commissioner for that purpose. Mere delay is not a good defense, but the respondent, in a suit for infringement, if he gives the required notice, may allege and prove that the invention embodied in the patent in suit had been in public use or on sale more than two years prior to the complainant's application for a patent; and if he alleges and proves that defense he is entitled to prevail in the suit. Those requirements constitute conditions to the sufficiency of the defense, and the court held that the respondents had not complied with either to any effectual extent. *Bates v. Coe*, 8 Otto, 31 (§§ 1816-30).

§ 6576. Where the defense of prior use is relied upon it is necessary to set out in the answer the names of those who have invented or used the anticipatory machine or improvement, but not the names of the witnesses who are to testify touching such prior use. *Allis v. Buckstaff*, 22 O. G., 1705.

§ 6577. When the answer alleges knowledge by certain persons of a certain place, but not knowledge at that or any other place, proof cannot be received that such knowledge was at that place. Affirmative defenses, and especially this defense as provided and regulated by the statute, must be alleged as well as proved. *Searls v. Bouton*, 12 Fed. Rep., 140.

§ 6578. More than one patent may be included in one suit and more than one invention may be secured in the same patent, in which cases the several defenses of prior invention and pub-

lic use may be made to each patent in the suit and to each invention to which the charge of infringement relates. *Parks v. Booth*, 12 Otto, 96.

§ 6579. The patent act allows the infringer to plead and prove that the invention of the patentee had been in public use or on sale in this country for more than two years before the inventor applied for a patent; but no question of priority is open under that defense, nor will evidence sustain it that another had made or patented the invention two years before the application without the knowledge of the patentee whose invention is in question. *Ibid.*

Use — Prior use or sale — Burden of proof on defendant, §§ 6580-6584.

§ 6580. The burden of proof is on the party who sets up the objection of "prior use" against the patent. *Corn-Planter Patent*, 23 Wall., 181.

§ 6581. The burden of sustaining their answer by proof of prior use is on the defendants; and if the testimony is so conflicting as to leave the question in doubt, it will be decided against them. *Roemer v. Simon*, 5 O. G., 555.

§ 6582. Upon the issue of prior use, the burden of proof rests upon defendant. *Putnam v. Yerrington*, 9 O. G., 689.

§ 6583. The rule of evidence is that if a defendant alleges the prior use of a patented device, the burden of proof is upon him. *Parker v. Reinhoff*, 17 Blatch., 206.

See *Invention, Prior*, § 3714.

§ 6584. The burden is on defendant to prove a sale of plaintiff's invention for more than two years prior to his application. *Hovey v. Henry*, 3 West. L. J., 153.

See *Burden of Proof*, § 662.

Use — Prior public, single — Will defeat a patent, §§ 6585-6591.

§ 6585. A patent may be defeated by showing that the thing patented had been discovered and put in actual use prior to patentee's discovery, however limited that use may have been. *Bedford v. Hunt*, 1 Mason, 302.

§ 6586. A patent may be defeated by showing that the thing secured by the patent had been discovered or put into actual use prior to the discovery of patentee, however limited such prior use or knowledge may have been. *Rich v. Lippincott*, 2 Fish., 1.

§ 6587. A single public use of a prior invention, where both work and product were seen by several, is sufficient prior knowledge to defeat a subsequent patent for a similar invention. *Aiken v. Dolan*, 3 Fish., 197.

§ 6588. Prior public use of one machine will invalidate a patent therefor. *American Hide & Leather Splitting Co. v. Tool Co.*, 1 Holmes, 503.

§ 6589. A patent may be defeated by showing that the thing secured by the patent had been invented and put into actual public use prior to the discovery of the patentee, however limited such use (other than experimental) or knowledge of the prior discovery may have been. *Boston Elastic Fabric Co. v. East Hampton Rubber Thread Co.*, 9 O. G., 745.

§ 6590. One instance of public use more than two years prior to application is sufficient to defeat the patent. *Clark Pomace Holder Co. v. Ferguson*, 17 Fed. Rep., 79.

§ 6591. A single instance of the public use of his invention by a patentee for more than two years before the date of his application will be fatal to the validity of the letters patent. *Worley v. Tobacco Co.*, 14 Otto, 340.

See *Reduction to Practice*, §§ 5238-5240.

Use — Prior — Evidence, §§ 6592-6594.

§ 6592. Testimony that parties introduced by defendant to prove prior use of the invention had paid plaintiff for the privilege of the use is admissible. *Evans v. Eaton*, 3 Wheat., 454.

§ 6593. The testimony of a witness as to prior use by him of the invention patented is rendered unreliable and incompetent by the circumstance that his employers, after having the benefit of his skill, sought the right to use the patented process as soon as they heard of it, and the further fact that the specimens produced were very different from those made under the patent. *St. Louis Stamping Co. v. Quinby*, 16 O. G., 135.

§ 6594. Where, under a general denial of patentee's priority of invention, evidence of prior knowledge and use was taken without objection, or exception in the answer, it was held competent on the question of the validity of the patent, in view of decision in *Loom Co. v. Higgins*, 105 U. S., 595. *Zane v. Soffe*, 110 U. S., 200.

Use — Right to use — *Right to make distinguished from right to use*, § 6595. *During term of patent*, §§ 6596, 6597. *On expiration of term*, §§ 6598-6600. *Effect of recovery of damages on*, §§ 6601, 6602. *After reissue*, §§ 6603, 6604. *Right to use device constructed with inventor's permission, and paid for*, §§ 6605, 6606.

§ 6595. The right to make a machine is distinct from that of using it. *Bicknell v. Todd*, 5 McL., 236.

§ 6596. Right to use a machine under a license during the original term is a property right, which, on expiration of the original term, is attached to the particular machine then in use; and both the right and the machine may pass by sale, devise, or levy of execution, or assignment of insolvent's effects. *Woodworth v. Curtis*, 2 W. & M., 524.

§ 6597. Whether a patentee, who has lost his rights in consequence of proof that his alleged invention was anticipated by another to whom a patent has issued, will be allowed to continue the use of such invention by showing that neither was the first inventor, must depend upon whether he has acted in good faith in the matter. *Greenwood v. Bracher*, 1 Fed. Rep., 856.

§ 6598. The right to use a machine after the expiration of the term of the patent is an incident to the primal right to use it during the original term; if that falls on account of fraud, the incident falls with it. *Union Paper Bag Machine Co. v. Nixon*, 1 Flip., 491.

§ 6599. Whatever was patented to the inventor and enjoyed by him and those operating under him during the term of the patent belongs to the public and is free to all at the expiration of the term. *Willcox & Gibbs Sewing Machine Co. v. Frame*, 24 O. G., 1272.

§ 6600. Where the public has acquired in any way the right to use a machine or device for a particular purpose, it has the right to use it for all the like purposes to which it can be applied, and no one can take out a patent to cover the application of the device to a similar purpose. *Blake v. City and County of San Francisco*, 113 U. S., 679.

§ 6601. Where the patent fee is adopted as the measure of damages, the right to the use of the invention throughout the term passes. *Sickles v. Borden*, 3 Blatch., 535.

§ 6602. One who pays damages for selling a machine in infringement of a patent does not acquire for himself or his vendee any right to use that machine except when actual damages have been paid. *Birdsell v. Shaliol*, 112 U. S., 485.

§ 6603. The fact that defendants were not liable for use of the invention under the defective patent conveys no right to continue its use subsequent to reissue. *Stimpson v. Railroad Co.*, 4 How., 380.

§ 6604. Acquiescence by the patentee in the use by the defendant of the original defective patent does not authorize the use of the invention after the issuing of the reissued patent. *McWilliams Manufacturing Co. v. Blundell*, 11 Fed. Rep., 419.

§ 6605. R., the agent of the patentee, authorized the firm of H., C. & N., for a valuable consideration, to construct for use, at their place of business, the device (a furnace) involved in the patent. The defendants, who had acquired all the rights of the firm of H., C. & N., were sued for infringement because of the use of the device. *Held*, first, that after the transaction with H., C. & N., the patentee had no right or interest with respect to the particular device and its use during the time of his original patent, and acquired none by the extension of his patent afterward; second, that those who *constructed* the device under the authority of the patentee, and the defendants who acquired it of them, have had, and still have, the right to use it at the particular place, clear of any claim of infringement by the patentee or his representatives. *Black v. Hubbard*, 12 O. G., 842.

§ 6606. Although the right to use may not have been acquired by lawful conveyance (according to the statutes) of that right as a subject of conveyance by itself, it was acquired by constructing the device for use, with the consent of the patentee obtained and paid for. *Ibid*.

See *Combination*, § 1018. *Contracts*, § 1290. *Decree*, §§ 1806, 1809. *Extension*, §§ 2490-2503. *Improvement*, §§ 2745-2764. *Improver*, §§ 2797-2809. *Infringement*, §§ 2911-2940. *Sale*, §§ 5912-5944.

374. UTILITY.

See NOVELTY, UTILITY AS EVIDENCE OF.

Utility — Defined, §§ 6607-6619. *In what want of utility consists*, §§ 6620, 6621.

§ 6607. Act 1793, "useful," construed. *Lowell v. Lewis*, 1 Mason, 182.

§ 6608. "Useful," act 1793, means not frivolous, or injurious to the well being, good policy or sound morals of society. *Lowell v. Lewis*, 1 Mason, 182; *Bedford v. Hunt*, 1 Mason, 302; *Kneass v. Schuylkill Bank*, 4 Wash., 9.

§ 6609. "Useful," act 1793, is used in contradistinction to frivolous or injurious. Want of

utility may be a good reason for not issuing a patent, but is no cause for avoiding it. *Whitney v. Emmett*, 1 Bald., 305.

§ 6610. "Utility" defined. *Earle v. Sawyer*, 4 Mason, 1.

§ 6611. An invention must be useful as contradistinguished from that which is frivolous, or wholly worthless. If not frivolous or entirely useless, the requirements of the law in this particular are complied with. *Stanley v. Hewitt*, 17 Frank. Jr. (2d Series), 165.

§ 6612. "Useful," in the patent law, is in contradistinction to "mischievous." The invention should be of some benefit. *Cox v. Griggs*, 1 Biss., 362.

§ 6613. "Useful," in the statute, is in contradistinction to what is frivolous or mischievous to the public. *Wintermute v. Redington*, 1 Fish., 239; *Page v. Ferry*, 1 Fish., 298.

§ 6614. What constitutes utility to sustain a patent. *Cook v. Ernst*, 2 O. G., 89.

§ 6615. In what "utility" consists. *McComb v. Ernest*, 1 Woods, 195.

§ 6616. Whether an invention is useful in the sense of the patent law is not whether it is not mischievous, or hurtful, or frivolous, or insignificant, but whether it is capable of use for a purpose from which some advantage can be derived. If it be useful in this sense, the degree or extent of its usefulness is altogether unimportant. *Crouch v. Speer*, 6 O. G., 187.

§ 6617. To constitute utility it is not important that it should be more valuable than other modes of accomplishing the same result; but it must be a practical method of doing the thing designed, in which its utility will more or less consist. *Roberts v. Ward*, 4 McL., 565.

§ 6618. It is not necessary to maintain a patent that the invention should be the very best for the use to which it is applied; if it is at all valuable, if its use for the purpose for which it is constructed is practicable, that is sufficient to sustain it as a useful invention. *Many v. Jagger*, 1 Blatch., 372.

§ 6619. The question whether the invention is sufficiently useful and important does not refer to its degree of utility as compared with other inventions of the same kind, but rather to its purpose; as whether, being capable of use, it is destined for some beneficial purpose, or is merely frivolous, insignificant or mischievous to society. *In re Seely*, 1 MacA. Pat. Cases, 248.

§ 6620. There is no utility in a patent which practices a deception on the public. *Langdon v. De Groot*, 1 Paine, 203.

§ 6621. Neither an invention which will not enable the operator to accomplish the described result, nor one which constantly exposes him to loss of his life, or great bodily harm, can be regarded as useful within the meaning of the patent law. *Mitchell v. Tilghman*, 19 Wall., 287.

See § 3638.

Utility — Degree of — Not essential, §§ 6622-6637.

§ 6622. To sustain a patent it must be to some extent useful. *Parker v. Stiles*, 5 McL., 44.

§ 6623. If the invention be useful to a certain degree and original with patentee, it is patentable, whether it does less or more work. *Wilbur v. Beecher*, 2 Blatch., 132.

§ 6624. Want of utility in a patented invention is a valid objection to the patent; but it is well settled that courts will not inquire astutely into the degree or measure of its utility, and unless it appears that the invention is wholly worthless or frivolous, the patent will be sustained. *Whitney v. Mowry*, 2 Bond, 45.

§ 6625. The law requires an invention to have some degree of utility, and that is all. *Many v. Sizer*, 1 Fish., 17.

§ 6626. The law does not require the patentees to prove their discovery to be useful to any eminent degree; it is sufficient if it produces an improved article at less cost or with more expedition than other known methods. *Carr v. Rice*, 1 Fish., 198.

§ 6627. If the invention be useful in any degree, and not absolutely worthless, the patent will be sustained. *Vance v. Campbell*, 1 Fish., 483.

§ 6628. A small degree of utility is sufficient to support a patent. *Clark Patent Steam & Fire Regulator Co. v. Copeland*, 2 Fish., 221.

§ 6629. All that the law requires is that an invention shall not be frivolous or dangerous. It does not require any degree of utility; if it is useful at all, that suffices. *Hoffheims v. Brandt*, 3 Fish., 218.

§ 6630. The degree of usefulness or importance to be exhibited by the alleged invention is not defined by the statute (act of 1836), nor is the degree material if the invention does not interfere with any prior right or claim, and is in itself innocent. If good may be the result of granting a patent, and evil cannot be, the patent should be allowed, especially as it is doubtful whether a rejected applicant has any means of having his right to a patent brought before a court of law to be tried by a jury. *In re Aiken*, 1 MacA. Pat. Cases, 130.

§ 6631. It is not necessary that the utility should be great; it is sufficient if the invention is an improvement at all. If it is of a different construction from former articles of the same kind, and of any use, that is sufficient. It need not come into general use. *Chandler v. Ladd*, 1 MacA. Pat. Cases, 493.

§ 6632. All the law requires as to utility is that the invention should not be frivolous or dangerous. It does not require any given degree of utility. If the invention is useful at all, that suffices. *Converse v. Cannon*, 2 Woods, 7.

§ 6633. Any degree of utility appreciable to a jury is sufficient, upon the question of utility, to sustain a patent. *Conover v. Roach*, 4 Fish., 12.

§ 6634. The patent is not void for want of utility if the invention possesses it in any measure, however slight. *Westlake v. Carter*, 4 O. G., 636.

§ 6635. In order to render a device patentable it need not possess greater utility or be better than others of the kind; it is sufficient if, being new, it serves a useful purpose. *Crouch v. Speer*, 6 O. G., 187.

§ 6636. Degree of utility is not a question. The law only requires that it shall be capable of some use, and that the use is not prohibited by sound morals or public policy. *Adams v. Loft*, 4 B. & A., 495.

§ 6637. If an invention is useful in any degree, no matter how infinitesimal, the court would not be justified in declaring the patent void. *Gibbs v. Hoefner*, 19 Fed. Rep., 323.

Utility — Evidence of, what constitutes — *The patent is*, §§ 6638, 6639. *General use*, §§ 6640-6643. *Defendant's use*, §§ 6644-6647. *Good sales*, §§ 6648-6650.

§ 6638. The patent is *prima facie* evidence of utility. *Vance v. Campbell*, 1 Fish., 483.

§ 6639. The patent is evidence of some utility, but this may be rebutted by evidence that it is frivolous and of no practical value. *Wayne v. Holmes*, 1 Bond, 27.

See *Novelty*, §§ 4324-4328.

§ 6640. General use of an invention is evidence of its utility. *Heinrich v. Luther*, 6 McL., 345.

§ 6641. Extensive use of an invention is evidence of utility. *Adams v. Edwards*, 1 Fish., 1.

§ 6642. It is essential that the improvement (in case of a machine), as described in the specification, shall, as a matter of fact, be capable of operating in the manner described; and it will be sufficient evidence of this fact if it shall appear, in the course of testimony taken in an interference proceeding, that the invention has been successful in the hands of others, although the applicant himself, having a mistaken idea of the capacity of the machine, has failed to obtain successful results. *Burrows v. Witherill*, 1 MacA. Pat. Cases, 315.

§ 6643. Utility is suggestive of originality, and the fact of the acceptance of a device or combination by the public and putting it into extensive use is accepted as evidence that it was the product of invention. *Washburn & Moen Mfg. Co. v. Haish*, 10 Biss., 65.

§ 6644. The fact that defendant prefers to use the mechanism patented to complainant is evidence that there is sufficient utility in the invention to support a patent. *Smith v. Glendale Elastic Fabrics Co.*, 1 Holmes, 340.

§ 6645. Utility of an invention held proven by defendant's imitation of it, and its favorable reception by the public. *Stanley v. Hewitt*, 17 Frank. Jr., 2d Series, 165.

§ 6646. A former contract between plaintiff and defendants for the use of plaintiff's machine admitted as evidence of utility. *Lee v. Blandy*, 1 Bond, 361.

§ 6647. The fact that the defendant is using in his machine the various combinations claimed in the patent, and testifies that the machine exhibits a high degree of utility, is ample evidence of the utility of the patented invention. *Foye v. Nichols*, 22 O. G., 2243.

§ 6648. Superior beauty of an ornament and good sales are evidence of utility. *Magic Ruffle Co. v. Douglass*, 2 Fish., 330.

§ 6649. The utility of an invention may be presumed from its having met with extensive sales. *Stuart v. Shantz*, 2 O. G., 524.

§ 6650. The utility of the article shown from its extensive sale, and the unanimity with which rivals engaged in its manufacture. *Eppinger v. Richey*, 14 Blatch., 307.

Utility — Evidence of — *Price paid*, § 6651. *Saving in labor*, § 6652. *What will not disprove*, §§ 6653, 6654.

§ 6651. Utility. Price paid for use, evidence of. *Park v. Little*, 3 Wash., 196.

§ 6652. In considering the question of utility, any saving in labor or expense is a proper subject for the consideration of the jury. *Hays v. Sulsor*, 1 Bond, 279.

§ 6653. The fact that the difference of construction is only brought into play on rare occasions is no sufficient reason to deny the utility of the invention. *Chandler v. Ladd*, 1 MacA. Pat. Cases, 493.

§ 6654. The fact that other devices, superior to patentee's original device, taken as a whole, have been invented, and have driven it out of use, does not prove or tend to prove that his invention lacks utility, as the law uses that term. *McComb v. Ernest*, 1 Woods, 195.

Utility — *Is essential to patentability*, §§ 6655-6658; *but not conclusive evidence of*, §§ 6659-6662.

§ 6655. Under the seventh section of the act of 1836, one of the conditions necessary to the granting of the patent is that, upon the examination thereby directed, "the commissioner shall deem it [the invention] to be sufficiently useful and important." *In re Cushman*, 1 MacA. Pat. Cases, 569.

§ 6656. The utility of an invention is an essential requisite to the validity of the patent. *Page v. Ferry*, 1 Fish., 298.

§ 6657. Every invention or discovery must be useful, to entitle the party to a patent. *Allen v. Hunter*, 6 McL., 303.

§ 6658. To warrant a patent the invention must be useful, that is, capable of some beneficial use, in contradistinction to what is pernicious, or frivolous or worthless. *Crompton v. Belknap Mills*, 3 Fish., 536.

See *Patentability*, §§ 4600-4604.

§ 6659. Utility is not an infallible test of originality. *Stanley Works v. Sargent & Co.*, 8 Blatch., 344.

§ 6660. Evidence of utility which may go to prove patentability. *Lindsay v. Stein*, 10 Fed. Rep., 907.

§ 6661. The demonstrated great utility of a device, while not conclusive as to its patentability, is a fair matter of consideration in determining it in questions of doubt. *Washburn & Moen Mfg. Co. v. Grinnell Wire Co.*, 24 Fed. Rep., 23.

§ 6662. While the fact that a device is useful and has superseded others previously employed for analogous purposes is proper to be considered, and in some cases is decisive, it does not of itself establish the fact of patentability. *Phillips v. City of Detroit*, 17 O. G., 191.

Utility — Infringer may not deny, §§ 6663-6668.

§ 6663. An infringer is estopped from denying utility. *Gray v. James*, Pet. C. C., 394; *Lowell v. Lewis*, 1 Mason, 182; *Kneass v. Schuylkill Bank*, 4 Wash., 9.

§ 6664. Infringers cannot set up want of utility in defense of the patent. *Phillips, Nimick & Co. v. Carroll & Co.*, 23 Fed. Rep., 249; *Hays v. Sulsor*, 1 Bond, 279; *Lee v. Blandy*, 1 Bond, 361; *Rice v. Heald*, 13 Pac. L. R., 33.

§ 6665. Where defendants have used the patented improvement, they are estopped from denying its utility. *Vance v. Campbell*, 1 Fish., 483.

§ 6666. Where defendant used the patented process before the filing of the bill, and continued its use under bond to account for profits, he was held estopped from insisting on its want of utility. *Whitney v. Mowry*, 4 Fish., 207.

§ 6667. Where defendants had made and sold large numbers of plaintiff's patented invention, they were estopped from setting up the defense of want of utility. *Robertson v. Garrett*, 10 Blatch., 490.

§ 6668. Where a manufacturer marked his articles with a patent which he did not own, *held*, that he could not be allowed to use that to which the complainant had at least the conclusive *prima facie* right and then defend himself by denying the validity of the patent. *Washburn & Moen Mfg. Co. v. Haish*, 9 Biss., 141.

Utility — Presumption of, arises on face of patent, §§ 6669-6674.

§ 6669. There is a presumption of some degree of utility arising from the patent itself, but it is not conclusive, and the other party may show that the invention is useless. *Lee v. Blandy*, 1 Bond, 361.

§ 6670. The patent raises the presumption of utility, which defendants must overcome; though if it is in any degree useful, the patent will be sustained. *Bell v. Daniels*, 1 Bond, 212.

§ 6671. An invention must be of some utility — a patent cannot be granted for a thing altogether frivolous; but the presumption on the face of the patent is that it is of some utility. *Hays v. Sulsor*, 1 Bond, 279.

§ 6672. Utility is presumed on the grant of a patent, and can only be repelled by clear proof that it is utterly worthless. The degree of utility is not pertinent, except in estimating damages. *Tilghman v. Werk*, 1 Bond, 511.

§ 6673. The presumption of utility arising upon the grant and extension of a patent, and the long and successful use of the patented process, requires clear and explicit proof of its utility to justify a judgment declaring the patent void. *Whitney v. Mowry*, 2 Bond, 45.

§ 6674. A machine cannot be pronounced useless or impracticable because it is susceptible of improvement which will obviate or prevent embarrassments to its more perfect operation. *Wheeler v. Clipper Mower & Reaper Co.*, 10 Blatch., 181.

See *Patents*, §§ 4629, 4633.

VAGUE SPECIFICATIONS—VALIDITY OF THE PATENT. §§ 6675-6690.

Utility—Burden is on defendant to show want of, §§ 6675, 6676.

§ 6675. Upon the question of want of utility the burden of proof is on defendant. *Parker v. Stiles*, 5 McL., 44.

§ 6676. The patent throws the burden of proof on defendant to show that the invention described therein is not a practical machine. *Fifield v. Whittemore*, 17 Fed. Rep., 513.

Utility—In general—*When a question for court, or jury, § 6677. In action for infringement, value shown, § 6678. Court will not reverse office decision as to, § 6679. Competent testimony as to, § 6680. Additional evidence in support of, § 6681. Filing affidavits as to, § 6682. Sufficient utility to sustain a patent, § 6683.*

§ 6677. When the question of “utility” is for the court, and when for the jury, considered. *Langdon v. De Groot*, 1 Paine, 203; *Parker v. Stiles*, 5 McL., 44.

§ 6678. In an action for infringement it is not necessary to show the comparative value of the thing invented, so far as the exclusive right is concerned, beyond the fact that it is useful, or of some value. *Hotchkiss v. Greenwood*, 4 McL., 456.

§ 6679. Where a suit upon a patent is defended on the ground that the alleged invention is not patentable, it is not usual for the court to revise the decision of the office as to its utility. *Doherty v. Haynes*, 4 Cliff., 291.

§ 6680. The testimony of witnesses is admissible to show the practical effect or utility of an invention. *In re Fultz*, 1 MacA. Pat. Cases, 178.

§ 6681. Where an applicant has complied with all the formal requirements of the law by duly filing his application, and it is not found upon examination that the invention is subject to any of the objections mentioned in the law as fatal to the grant of a patent, it is not competent for the commissioner to require additional evidence as to the practical result of the invention. *In re Seely*, 1 MacA. Pat. Cases, 248.

§ 6682. Pending the decision of an appeal from the commissioner, an applicant will be permitted, on motion, to procure and file affidavits of competent persons touching the practical utility and advantages of his invention. *In re Fultz*, 1 MacA. Pat. Cases, 178.

§ 6683. A patent held not to be void for want of utility in the invention upon its appearing that it possessed certain advantages over others. *Smith v. O'Connor*, 2 Saw., 461.

See *Defenses*, § 1844. *Identity*, §§ 2671-2710. *Novelty*, §§ 4331-4339. *Patentability*, § 4553.

375. VAGUE SPECIFICATIONS.

See SPECIFICATIONS, VAGUE.

376. VALIDITY OF THE PATENT.

Validity—*Pro tanto validity, §§ 6684, 6685. Prerequisites to valid grant, § 6686. A question for the court, § 6687. Presumption, §§ 6688, 6689. Not affected by foreign patents, § 6690. Cannot be collaterally attacked, § 6691. Use by others does not necessarily invalidate, § 6692.*

§ 6684. Act 1793, section 9, “*pro tanto* validity of patent,” considered. *Wyeth v. Stone*, 1 Story, 273.

§ 6685. Under act 1837, section 9, *held*, that in case of an “inadvertency and mistake of law, as well as of fact,” the patent will be valid, *pro tanto*, in the absence of unreasonable delay in filing disclaimer. *Ibid*.

§ 6686. It is enough that the inventor has perfected his invention, and is able to furnish to the patent office such specifications and model as the law requires. Having done this, the patent in so far as prerequisites to its validity, either by way of experiment or use, are material is valid. *Wheeler v. Clipper Mower & Reaper Co.*, 10 Blatch., 181.

§ 6687. The validity of the patent upon its face is a matter of construction for the court. *Parker v. Hatfield*, 4 McL., 61.

§ 6688. The presumption of validity arising on the grant of a patent is strengthened by its extension. *Whitney v. Mowry*, 2 Bond, 45.

§ 6689. The fact that persons in authority in certain cities had, during the last four years, employed plaintiff, at his own price, to lay his patented pavement, *held*, wholly insufficient to raise a presumption in favor of the validity of the patent. *Guidet v. Palmer*, 10 Blatch., 217.

§ 6690. The validity of a patent granted in this country does not at all depend upon the

validity of the patent granted in a foreign country, although its duration may. *Cornley v. Marckwald*, 17 Fed. Rep., 83.

§ 6691. In a suit for infringement the granting and validity of the patent cannot be collaterally attacked. *Crompton v. Belknap Mills*, 3 Fish., 536.

§ 6692. It does not detract from the validity of a patent, that the inventions of others are made use of in carrying out the patented invention. One invention may include within it many others, and patents for each and all be valid at the same time, but in such case each inventor would be precluded from using the inventions made and patented prior to his own, except by license from the owners thereof. *Cochrane v. Deener*, 4 Otto, 781.

See *Patentability*, § 4552. *Reissues*, §§ 5786-5788. *Verdict*, § 6705.

Validity — Evidence of — *Patent is*, § 6693. *Extensive sale is*, § 6694. *Evidence of invalidity*, §§ 6695-6697.

§ 6693. The patent is *prima facie* evidence that the several grants contained in it are valid, that the several things, methods and devices granted were new, that they are useful, that they require invention, and that they were patentee's invention. *Potter v. Hollender*, 4 Blatch., 238.

§ 6694. In all doubtful cases involving the validity of a patent, the fact that the article made by the use of the process described in the patent has been extensively sold is a consideration of great weight with the court, but it is not enough *per se* to sustain the patent. *Wilson Packing Co. v. Chicago Packing & Provision Co.*, 10 Biss., 559.

§ 6695. Under section 6, act 1793, defendant under general issue can give in evidence contesting the validity of the patent, provided he has given notice of his intention. *Evans v. Eaton*, 3 Wheat., 454.

§ 6696. Circumstances in which the long and unexplained acquiescence of patentee in the infringement of his patent may be evidence of its invalidity. *Doubleday v. Beatty*, 11 Fed. Rep., 729.

§ 6697. Where infringement is denied and a right alleged to make the patented article, which puts the plaintiff to the proof of his patent, as alleged in the bill, such proof may be met by any proof on the part of defendant tending to show the invalidity of the patent. *Eagleton Mfg. Co. v. West, Bradley & Cary Mfg. Co.*, 18 Blatch., 218.

Validity — Burden of proof — *On plaintiff to establish*, § 6698. *On defendant to disprove*, §§ 6699-6702.

§ 6698. The plaintiff must establish the validity of his patent. *Carr v. Rice*, 1 Fish., 198.

§ 6699. Burden of proof is on defendant in attacking the validity of the patent. *Adams v. Edwards*, 1 Fish., 1.

§ 6700. The burden of proof is on the party denying the validity of the patent. *Hoffheims v. Brandt*, 3 Fish., 218.

§ 6701. The patent is evidence of its own validity, and hence the burden of proof to invalidate it rests upon the defendants. Every reasonable doubt ought to be resolved against them. *Miller v. Foree*, 9 Fed. Rep., 603.

§ 6702. If the defendant claims that the patent is void for uncertainty, it rests with him to establish the charge. *Westlake v. Carter*, 4 O. G., 636.

377. VERDICT.

See TRIAL OUT OF EQUITY, §§ 6334-6349.

§ 6703. Where a verdict awarded actual damages the court refused to interfere with it, as defendant had it in his power to prove amount and neglected to do so. *Stephens v. Felt*, 2 Blatch., 37.

§ 6704. Where the evidence sustains the verdict, the court cannot say that the jury should have given greater weight to other parts of the testimony which would have limited the damages to a less sum. *Stanley v. Whipple*, 2 McL., 35.

§ 6705. The same weight is not given by courts to the verdict of a jury upon the validity of a patent which is justly given to the opinion of a jury upon other questions of fact. *Roberts v. Schuyler*, 12 Blatch., 444.

§ 6706. Where the suit is at law, the verdict of the jury must be for the damages sustained by the plaintiff, subject to the right of the court to enter judgment thereon for any sum above the verdict not exceeding three times that amount, together with the costs. *Judson v. Bradford*, 16 O. G., 171.

See *Disclaimer*, § 2064.

378. VIOLATION OF INJUNCTION.

See INJUNCTION, VIOLATION OF. INJUNCTION, PRELIMINARY, VIOLATION OF.

379. VOID PATENT.

Void patent—*When broader than invention*, §§ 6707-6711. *Ambiguous*, §§ 6712-6715. *Insufficiently described*, §§ 6716, 6717. *For fraudulent concealment*, § 6718.

§ 6707. Patentee must not patent more than his invention, or all is invalid. *Delano v. Scott*, Gilp., 489.

§ 6708. A patent broader than the invention is wholly void. *Whitney v. Emmett*, 1 Bald., 303.

§ 6709. A patentee who includes in his invention things before known cannot recover, as his patent is broader than his invention. *Evans v. Eaton*, 7 Wheat., 356.

§ 6710. Where an inventor claims to have invented more than he actually has invented his patent is void. *Tyler v. Devil*, 1 Am. L. J., 248.

§ 6711. When the claim expresses a combination of several elements without particularly pointing out the special construction of one embodying the actual novelty and invention, and the general combination is old, the patent is broader than the actual invention, and invalid. *Terry Clock Co. v. New Haven Clock Co.*, 17 O. G., 908.

§ 6712. A patent which describes an invention with such ambiguity that the court, without conjecture, cannot gather what it is, is void. *Ames v. Howard*, 1 Sumn., 482.

§ 6713. Whether the patent is void for uncertainty and ambiguity in the description is a matter of fact, to be decided upon the evidence of experts. *Washburn v. Gould*, 3 Story, 122.

§ 6714. If the meaning of the patent cannot be ascertained satisfactorily upon the face of the specification, the law declares it insufficient for ambiguity and uncertainty. *Emerson v. Hogg*, 2 Blatch., 1.

§ 6715. A patent is void for ambiguity if its terms be so obscure and doubtful that the court cannot determine what is the particular improvement claimed. *Barrett v. Hall*, 1 Mason, 447.

§ 6716. Unless the thing claimed to be invented is so described as to be known, in the language of the statute, from every other thing, the patent is void. And this must be determined by the court. *Brooks v. Jenkins*, 3 McL., 432.

§ 6717. A patent which fails to describe the invention so that it can be understood, or that fails to produce the precise result described, is void. *O'Reilly v. Morse*, 15 How., 62.

See *Improvement*, §§ 2785-2789.

§ 6718. If, with a fraudulent purpose of concealing the invention, or any material part of it, patentee omits or erroneously describes any essential element, the patent is absolutely void. *Whitney v. Mowry*, 2 Bond, 45.

See *Contracts*, § 1297. *Decree*, § 1812.

Void patent—*What will avoid a patent*, §§ 6719-6730.

§ 6719. A patent is void if the invention patented was not originally discovered by patentee or if previously described in some publication. *Evans v. Eaton*, 3 Wheat., 454.

§ 6720. A party can take nothing by a void patent. *Evans v. Eaton*, 7 Wheat., 356.

§ 6721. A patent embracing the invention of another is void. *Watson v. Bladen*, 4 Wash., 580.

§ 6722. If a patent covers material not patentable, the whole patent is void. *Blake v. Sperry*, 2 N. Y. Leg. Obs., 251.

§ 6723. *Held*, that the patent issued to an alien upon a false affidavit of citizenship was not voidable, but void; and that the commissioner had no power to grant a new original patent on its surrender after eight years' public use. *Mini's Assignee v. Adams*, 3 Wall. Jr., 20.

§ 6724. If it appears from the papers and records of the patent office in evidence that the statutory requirements have not been complied with, it is within the power of a court, and its plain duty, to hold the patent void. (R. I.) *Whitely v. Swayne*, 4 Fish., 117.

§ 6725. A patent is invalid if the result which is predicted cannot be obtained by the means described. *Mitchell v. Tilghman*, 19 Wall., 287.

§ 6726. Or, if the process cannot be performed without danger to the operator. *Ibid.*

§ 6727. A valid patent must be signed by the commissioner of patents and the secretary of the interior. If signed by the commissioner and not by the secretary, the patent is a nullity, though the omission be accidental. *Marsh v. Nichols*, 15 Fed. Rep., 914.

§ 6728. In such case the patent cannot be sustained by the production of the record of the patent office showing a complete patent, since a perfect record of an imperfect patent cannot prove the grant. *Ibid.*

§ 6729. A patent accidentally issued without the signature of the secretary of the interior cannot be amended in that particular by his successor in office. Nor does it make any difference that the same person was "acting" secretary of the interior under both administrations and signed the patent in that capacity. *Ibid.*

§ 6730. Upon a surrender of a patent for reissue, an interference declared thereon, a decision against the patentee and subsequent refusal of a reissue, the patent becomes destitute of validity and absolutely void. *Peck v. Collins*, 13 Otto, 660.

See *Inventor, Joint*, §§ 3790, 3793, 3794.

380. WAIVER.

See PRACTICE, WAIVER.

381. WARRANTY OF TITLE.

See TITLE, WARRANTY OF.

382. WITNESSES.

Witnesses — Competency of, §§ 6731-6741.

§ 6731. Competency of witness having an interest, sustained in view of ruling in *Evans v. Eaton*, 7 Wheat., 356. *Evans v. Hettich*, 7 Wheat., 453.

§ 6732. Where defendant justified under a prior patent assigned to him, and offered its patentee as witness to prove priority of invention, his competency as witness sustained. *Treadwell v. Bladen*, 4 Wash., 703.

§ 6733. Where witness executed and delivered a quitclaim of his interest in the patent to the administrator, some time before the latter transferred the interest now claimed by plaintiffs, *held*, that as he could not be affected by the verdict in the case, he was competent. *Brooks v. Jenkins*, 3 McL., 432.

§ 6734. Where, in an infringement suit in Albany, brought by plaintiff holding a right to that county, his witness testified to owning rights under the same patent in other counties, but none in Albany or in the suit, although he had employed counsel in another suit between the same parties, he was held competent. The reason given. *Buck v. Hermance*, 1 Blatch., 322.

§ 6735. The interest of a witness in the matter in controversy not objectionable when his relations to the parties are such that his interest will remain unaffected by any issue of the suit. *Arnold v. Bishop*, 1 MacA. Pat. Cases, 28.

§ 6736. It is not competent for witness to give evidence referring to plaintiff's acts among strangers. *Evans v. Hettich*, 7 Wheat., 453.

§ 6737. Exhibiting to witnesses the opinion in the former case is calculated to lead their minds to the further proof necessary in the case; and in its fairest aspect this proceeding would be as objectionable, if not more objectionable, than leading questions would be, answers to which are inadmissible in evidence. *Carter v. Carter*, 1 MacA. Pat. Cases, 388.

§ 6738. Under the provisions of United States statutes which regulate the subject of oral testimony at common law in the federal courts, the examination of an adverse party as witness before trial, as can be done under New York statute, cannot be had. There is nothing in section 914, Revised Statutes, which supersedes them. *Beardsley v. Littell*, 14 Blatch., 102.

§ 6739. Insanity of a witness is no objection to his competency or credibility, if he is sane when testifying. *Evans v. Hettich*, 7 Wheat., 453.

§ 6740. The wife of an applicant for a patent is an incompetent witness for him in an interference proceeding. *Nichols v. Harris*, 1 MacA. Pat. Cases, 302.

§ 6741. A wife is not a competent witness in cases where her husband is interested; a wife's testimony in a case of interfering patents suppressed. *Wooster v. Hill*, 22 Fed. Rep., 830.

Witnesses — Credibility, §§ 6742-6756.

§ 6742. A mistake by a witness in an immaterial fact ought not to discredit him. The maxim *falsus in uno, falsus in omnibus*, only applies where there is a wilful, corrupt falsehood in one particular, amounting to perjury. *Marshall v. Mee*, 1 MacA. Pat. Cases, 229.

§ 6743. The jury are judges of the credibility of witnesses; and if they believe that a witness has wilfully sworn falsely to any material matter, they may disregard the whole of his testimony. *Spaulding v. Tucker*, Deady, 649.

§ 6744. Where a witness falsifies a material fact in respect to which he cannot be presumed to be liable to mistake, courts are bound, upon principles of law, morality and justice to apply the maxim *falsus in uno, falsus in omnibus*. *American Bell Telephone Co. v. People's Telephone Co.*, 22 Fed. Rep., 309.

§ 6745. A witness who gives false testimony as to one particular cannot be credited as to any, according to the legal maxim *falsus in uno, falsus in omnibus*. And if there be reason to suppose that his perjury or prevarication is the result of subornation, it affords a reasonable ground in a doubtful case for suspecting the testimony of other witnesses adduced by the same party. *Wellman v. Blood*, 1 MacA. Pat. Cases, 432.

§ 6746. When there are deliberate inconsistencies and discrepancies in a witness' testimony in material matters, proceeding from design, no credit can be given to the same, in accordance with the rule *falsus in uno, falsus in omnibus*. When such inconsistencies arise from ignorance or a careless inadvertence, all confidence in the truth of his testimony must still be lost. *Carter v. Carter*, 1 MacA. Pat. Cases, 388.

§ 6747. If a party shows an unwillingness to let the truth out, and keeps back facts and the means of getting at facts in his power, then the jury is warranted in drawing the strongest possible inferences against him which may be drawn from the evidence actually given in favor of the other party; but if he comes forward with his books, furnishes all the evidence in his power, and is fairly candid in the matter, no inferences should be drawn against him, except such as are fairly drawn from the evidence adduced. *National Car-Brake Shoe Co. v. Terre Haute Car & Mfg. Co.*, 19 Fed. Rep., 514.

§ 6748. The testimony of a witness may be compared with his deposition in a former interference relating to the same matter; and gross contradictions thereby appearing, not accounted for by any satisfactory explanations, will discredit his testimony. *Wellman v. Blood*, 1 MacA. Pat. Cases, 432.

§ 6749. When witnesses have been once examined upon the facts in the case, and then upon a new trial endeavor to supplement the deficiency of their former testimony, as pointed out in the decision, their testimony should be received with great caution, and particularly where the occurrences to which they testify were twenty years old, and involved a nice point of invention. *Carter v. Carter*, 1 MacA. Pat. Cases, 388.

§ 6750. Under any circumstances, a great lapse of time, which has taken place before the witnesses are called upon to state the facts relating to a case where a nice point of invention is to be established, must in the nature of things make it very difficult to get at the real facts in the case, unless they were reduced to writing at the time. *Ibid.*

§ 6751. The presumption is that a witness under oath testifies honestly until the contrary is shown. Contradictions and inconsistencies upon immaterial points, not proceeding from corrupt motives, do not entirely destroy his testimony. *Screw Co. v. Sloan*, 1 MacA. Pat. Cases, 210.

§ 6752. While the natural interest which an inventor may be supposed to retain in his invention, after he has parted with all pecuniary interest in the same, will not render him an incompetent witness for his assignee in an interference with a rival inventor, the circumstance should be allowed due weight in considering the credit to be given to his testimony. *Ibid.*

§ 6753. The rule of law is, that where a witness stands wholly unimpeached by extrinsic circumstances, credit ought to be given to his testimony, unless it is so grossly improbable as to show that he is not to be trusted. *Ibid.*

§ 6754. Evidence of license from patentee will not discredit witness testifying to a prior existing machine. *Evans v. Eaton*, Pet. C. C., 322.

§ 6755. The testimony of witnesses as to the practicability of alleged prior devices incredible, where a test of reproductions of those devices showed them to be practically inoperative. *American Bell Telephone Co. v. People's Telephone Co.*, 25 Fed. Rep., 725.

§ 6756. A successful assault upon the general character of a witness does not necessarily exclude his testimony from consideration. The law recognizes the possibility of a witness of general bad character telling the truth, and thereupon permits such witnesses to testify, their evidence to be received for whatever, under the circumstances of the particular case, the tribunal charged with the duty of passing on and deciding the facts may deem it worth. *Miller v. Foree*, 9 Fed. Rep., 603.

Witnesses — Cross-examination, §§ 6757-6762.

§ 6757. A party has no right to cross-examine a witness except as to facts, etc., brought out in the direct examination. *Phila. & Trenton R. Co. v. Stimpson*, 14 Pet., 448.

§ 6758. When a party to the case, otherwise an incompetent witness, is produced to prove the loss of original drawings and sketches, and is cross-examined at large, his answers are thereby made evidence for himself. *Perry v. Cornell*, 1 MacA. Pat. Cases, 68.

§ 6759. Where a witness on direct examination has voluntarily referred to his own affairs in connection with the history of the invention, he cannot on cross-examination refuse to divulge the full particulars of the same on the ground that it will expose his private business. *Nichols v. Harris*, 1 MacA. Pat. Cases, 302.

§ 6760. Nor was it necessary for counsel to state that the purpose of the examination was to affect the credit of the witness, as that would defeat its very object. Much greater latitude is allowed on cross-examination than in direct. *Ibid.*

§ 6761. Where a witness had fixed the date of the invention by reference to a device of his own invention, it is competent for the other side, on cross-examination, to call out a full description of the device, and when made, with a view of showing that the witness was mistaken in his dates. *Ibid.*

§ 6762. A witness, on cross-examination, is bound to answer all material and proper questions; and his refusal to do so, or the giving of an evasive answer, shows a want of fairness on his part that must be considered as affecting the credit to be given to his testimony. *Cornell v. Hyatt*, 1 MacA. Pat. Cases, 423.

383. WRIT OF ERROR.

See PRACTICE, WRIT OF ERROR.

TABLE 1.

A TABLE OF PARTICULAR PATENTS UPON WHICH SUIT HAS BEEN BROUGHT, ARRANGED CHRONOLOGICALLY,

*And giving under each patent the suits in which it was involved; the construction, etc.,
of the patent in such suits; the reissues of such patent; the suits in which the reissue
or reissues were involved, as also the construction given them in such suits.*

NOTE.—For patents not found in this list, look in the Topical list, No. 3, and if not there, then in list of Pat-
entees, No. 4. The consecutive numbering of letters patent begins July, 1836.

1776.

Reutgen, C. Nov. 17, 1776. Forging Bolts and Round Iron.
Reutgen v. Kanowrs, 1 Wash., 168.

1779.

Whittemore, A. June 5, 1779. Machine for making Cotton and Wool Cards.
Whittemore v. Cutter, 1 Gall., 429; 1 Gall., 478.

1790.

Evans, O. Dec. 18, 1790. Hopper-boy.
Reviewed; construed; improvement not sufficiently distinguished from original inven-
tion, Evans v. Hettick, 3 Wash., 408. Reviewed, construed, and not infringed, Evans
v. Eaton, 3 Wash., 443. Construed to be for entire machine and void for not specifying
improvement, *Ibid.*, 7 Wheat., 356. Held novel, useful and patentable, Evans v. Robin-
son, 1 Car., L. R. (N. C.), 209. See, also, Evans v. Eaton, 3 Wheat., 455; 1 Pet. C. C.,
322; v. Chambers, 2 Wash., 125; v. Jordan, 1 Brock., 248; v. Weiss, 2 Wash., 342; v. Jor-
dan, 9 Cranch, 199; v. Kremer, 1 Pet. C. C., 215; v. Hettich, 7 Wheat., 453.

1798.

Tryon, I. Feb. 22, 1798. Cutting and Pointing Comb Teeth.
Tryon v. White, 1 Pet. C. C., 96.

1799.

Perkins, J. Feb. 14, 1799. Cutting and Heading Nails.
Construed to be for an art and not an abstract principle, Gray v. James, Pet. C. C., 400;
Ibid., Pet. C. C., 476.

1800.

Tyler, B. Feb. 20, 1800. Grist-mill.
Tyler v. Tuel, 6 Cranch, 324.

1806.

Bedford, J. July 16, 1806. Making Boots and Shoes.
Bedford v. Hunt, 1 Mason, 302.
Dawson, J. Nov. 6, 1806. Suspenders.
Dawson v. Follen, 2 Wash., 311.

1807.

Reed, J. Feb. 22, 1807. Cutting and Heading Nails.
Patent vacated, Odiorne v. Winkley, 2 Gall., 51. See, also, Odiorne v. Amesbury Nail
Factory, 2 Mason, 28.

1808.

Parke, J. P. Dec. 19, 1808. Fire Engine Alarm Bell.
Parke v. Little, 3 Wash., 196.

1809.

- Fulton, R. Feb. 11, 1809. Steamboat.
Cutting *v.* Myers, 4 Wash., 220.
Woodcock, J. May 8, 1809. Splitting Leather.
Woodcock *v.* Parker, 1 Gall., 438.
Barrett, W. June 27, 1809. Reel for Dyeing all Kinds of Silk Goods.
Stearns *v.* Barrett, 1 Mason, 153.

1811.

- Sawin & Skinner. Feb. 8, 1811. Cutting Nails or Brads.
Sawin *v.* Guild, 1 Gall., 484.

1812.

- Robinson, G. W. May 14, 1812. Mold for Casting Metal Buttons.
Goodyear *v.* Mathews, 1 Paine, 300.

1813.

- Perkins, J. March 23, 1813. Pump.
Lowell *v.* Lewis, 1 Mason, 182.

1814.

- Pettibone, D. Feb. 12, 1814. Auger for Boring Guns.
Construed, Pettibone *v.* Derringer, 4 Wash., 215.

1815.

- Kneass, J. Apr. 28, 1815. Printing on Bank Notes, etc.
Construed to be for an art, not for an effect, Kneass *v.* Schuylkill Bank, 4 Wash., 9.

1816.

- Sullivan, J. L. Dec. 4, 1816. Steam Tow-boat.
Validity doubted on the ground of insufficient specification, Sullivan *v.* Redfield, 1 Paine, 441.

1818.

- Ogle. 1818. Plow.
Ogle *v.* Ege, 4 Wash., 584.
Pennock & Sellers. July 6, 1818. Leather Tubes or Hose.
Pennock *v.* Dialogue, 4 Wash., 538; 2 Pet., 1.
Stearns & Barrett. Sept. 9, 1818. Dyeing and Finishing Silk Woven Goods.
Construed, Barrett *v.* Hall, 1 Mason, 447.

1819.

- Moody, P. Apr. 3, 1819. Double Speeder for Cotton.
Boston Mfg. Co. *v.* Fiske, 2 Mason, 119. Void for double use, Moody *v.* Fiske, 2 Mason, 112.
Dixon, P. July 16, 1819. Saddles without Saddle-trees.
Void for imperfectly distinguishing the invention from that which is old, Dixon *v.* Moyer, 4 Wash., 68.
Blanchard, T. Sept. 6, 1819. Turning Irregular Forms.
Construed not to include the power for working the combination; the claims sustained, Blanchard Gun-stock Turning Co. *v.* Warner, 1 Blatch., 278. Reviewed, Blanchard *v.* Beers, 2 Blatch., 413. Construed, and renewal by congress void for error as to description and date in act of congress, Blanchard *v.* Sprague, 3 Sumn., 279. Construed; held not unconstitutional; infringed, Blanchard *v.* Sprague, 3 Sumn., 535. See, also, Blanchard *v.* Whitney, 3 Blatch., 307; *v.* Sprague, 2 Story, 164; *v.* Eldridge, 1 Wall. Jr., 337; Blanchard Gun-stock Turning Co. *v.* Jacobs, 2 Blatch., 69.
Isaacs, M. Nov. 17, 1819. Inclined Circular Plane.
Isaacs *v.* Cooper, 4 Wash., 259.

1820.

- Treadwell, E. Jan. 10, 1820. Bread Finisher.
Wanting in novelty, Watson *v.* Bladen, 4 Wash., 580.
Blanchard, T. Jan. 20, 1820. Turning Irregular Forms.
Construed and held infringed, Blanchard *v.* Reeves, 1 Fish., 103. See, also, Blanchard *v.* Sprague, 3 Sumn., 535; 3 Sumn., 279; 2 Story, 164; *v.* Eldridge, 1 Wall. Jr., 337; *v.* Sprague, 1 Cliff., 288; *v.* Haynes, 6 West. L. J., 82; *v.* Beers, 2 Blatch., 413; Blanchard Gun-stock Turning Co. *v.* Jacobs, 2 Blatch., 69; Blanchard Gun-stock Turning Co. *v.* Warner, 1 Blatch., 278.
Eastman & Jaquith. March 16, 1820. Circular Saw.
Eastman *v.* Bodfish, 1 Story, 528.

Keplinger, S. May 4, 1820. Watch Chain Machine.

Keplinger *v.* De Young, 10 Wheat., 358.

Wood & Brundage. Nov. 9, 1820. Plow.

Wood & Brundage, *Ex parte*, 9 Wheat., 603.

1821.

Langdon, R. June 20, 1821. Preparing and Packing Thread.

Void for insufficiency of description in distinguishing the new from the old, Langdon *v.*

De Groot, 1 Paine, 203.

Grant, J. Aug. 11, 1821. Hat Bodies.

Grant *v.* Raymond, 6 Pet., 218.

1822.

Morris, J. May 15, 1822. Stop-cock.

Void in view of prior unrepealed patent, Morris *v.* Huntington, 1 Paine, 348.

Shaw, J. June 19, 1822. Reissue, May 7, 1829. Percussion Gun.

Held abandoned, Shaw *v.* Cooper, 7 Pet., 292.

Mellus, W. Aug. 3, 1822. Securing Ships from Decay.

Abandoned in view of use prior to patenting, Mellus *v.* Silsbee, 4 Mason, 108.

Earle, W. Dec. 28, 1822. Shingle Machine.

Substitution of a new element in an old combination, Earle *v.* Sawyer, 4 Mason, 1.

1824.

Herbert, O. R. July 14, 1824. Bedstead.

Herbert *v.* Adams, 4 Mason, 15.

1825.

Davis, G. Oct. 1, 1825. Plows.

Construed with view to patentee's change of form, Davis *v.* Palmer, 2 Brock., 298.

1826.

Treadwell, E. May 18, 1826. Biscuit and Sugar Bread Manufacture.

Treadwell *v.* Bladen, 4 Wash., 703.

Whitney & Robinson. Nov. 4, 1826. Making Glass Door Knobs.

Whitney *v.* Emmett, 1 Bald., 303.

Thomas, J. Nov. 6, 1826. Bilge Lever for Ships.

Doubted that patentee was first and original inventor, Thomas *v.* Weeks, 2 Paine, 92.

Gale, Wm. Dec. 7, 1826. Silver Spoon Manufacture.

Gilpin's Opinion, 3 Op., 595.

Goulding, J. Dec. 15, 1826. Wool Manufacture. Reissue, July 29, 1836.

Held infringed, Jordan *v.* Wallace, 5 Fish., 185. Extended reissue sustained as novel and valid, Jordan *v.* Dobson, 2 Abb., 398. Sustained, patentee being first and original inventor, Agawam Co. *v.* Jordan, 7 Wall., 583.

1828.

Woodworth, W. Dec. 27, 1828. Planing-mill. Reissue, 1871.

Infringed by use of analogous device and a colorable imitation, Gibson *v.* Van Dressar, 1 Blatch., 532. Construed to be for a combination and not infringed by a combination of some of its elements with a substantially different element, Brooks *v.* Fiske, 15 How., 214. Held infringed by substitution of equivalent, Pitts *v.* Edmonds, 1 Biss., 168. Infringed by a machine varied by an interchange of form and direction between two elements of its combination, while object and effect remain unchanged, Wilson *v.* Barnum, 2 Fish., 635.

Sustained, Motte *v.* Bennett, 2 Fish., 642. Construed, held valid and infringed, Olcott *v.* Hawkins, 2 Am. L. J. (9 Penna. L. J.), 317. Construed, Brooks *v.* Bicknell, 3 McL., 250; *v.* Jenkins, 3 McL., 432. Construed to be for an improved machine, Washburn *v.* Gould, 3 Story, 122. Sustained, Wilson *v.* Rousseau, 4 How., 646. Patentee held first inventor; sufficiency of description sustained, Woodworth *v.* Wilson, 4 How., 712.

Sustained, Woodworth *v.* Hall, 1 W. & M., 248. Infringed, Gibson *v.* Betts, 1 Blatch., 163. Sustained and held infringed in view of prior decisions, Van Hook *v.* Pendleton, 1 Blatch., 187.

Reissue No. 71, July 8, 1845.

Its signature by the acting commissioner, Woodworth *v.* Hall, 1 W. & M., 389. Held to be for same invention as original; sustained and infringed, Smith *v.* Mercer, 4 West. L. J., 49.

Sustained as valid, infringed by change of form, Gibson *v.* Harris, 1 Blatch., 167.

Sustained, Woodworth *v.* Edwards, 3 W. & M., 120. Infringed, Sloat *v.* Patton, 1 Fish., 154. See, also, Barnard *v.* Gibson, 7 How., 560; Bicknell *v.* Todd, 5 McLean, 236; Bloomer

v. McQuewan, 14 How., 539; *v. Millinger*, 1 Wall., 340; *v. Gilpin*, 4 Fish., 50; *v. Stolley*, 5 McLean, 158; *Brooks v. Norcross*, 2 Fish., 661; *v. Bicknell*, 4 McLean, 64; 4 McLean, 70; *v. Stolley*, 3 McLean, 523; *Brown v. Shannon*, 20 How., 55; *Dean v. Mason*, 20 How., 198; *Foss v. Herbert*, 1 Biss., 121; *Gibson v. Cook*, 2 Blatch., 144; *v. Barnard*, 1 Blatch., 388; *v. Gifford*, 1 Blatch., 529; *Jenkins v. Greenwald*, 1 Bond, 126; *Livingston v. Woodworth*, 15 How., 546; *Lippincott v. Kelly*, 1 West. L. J., 513; *Ritter v. Serrell*, 2 Blatch., 379; *Simpson v. Wilson*, 4 How., 709; *Van Hook v. Pendleton*, 2 Blatch., 85; *Wilson v. Sherman*, 1 Blatch., 536; *v. Simpson*, 9 How., 109 (repairs); *v. Barnum*, 8 How., 258; *v. Stolly*, 4 McLean, 273; *v. Turner*, Taney's Dec., 278; *v. Rousseau*, 1 Blatch., 3; *v. Stolly*, 4 McLean, 275; 5 McLean, 1; *Woodworth v. Cook*, 2 Blatch., 151; *v. Sherman*, 3 Story, 171; *v. Stone*, 3 Story, 749; *v. Weed*, 1 Blatch., 165; *v. Curtis*, 2 W. & M., 521.

1829.

Wyeth, N. J. March 18, 1829. Ice-cutting Apparatus.

Claim construed to be for a principle and void, *Wyeth v. Stone*, 1 Story, 273.

Knight, I. March 18, 1829. Railroad Car.

Reissue, July 10, 1834, and Apr. 28, 1836.

Knight v. Balt. & Ohio R. R., 3 Fish., 2.

Stone, A. Apr. 30, 1829. Loom.

Claim construed and limited, *Stone v. Sprague*, 1 Story, 270.

Burnap, C. P. May 1, 1829. Mode of Cutting Veneer by Machinery.

Burr v. Gregory, 2 Paine, 426.

Arnold, J. July 15, 1829. Loom.

Union Mfg. Co. v. Lounsbury, 2 Fish., 389.

Parker, Z. & A. Oct. 19, 1829. Water-wheel.

Sustained, *Parker v. Hatfield*, 4 McLean, 61. Construed to be for the combination and some of the improved elements, *Parker v. Haworth*, 4 McLean, 474.

Construed, *Parker v. Stiles*, 5 McLean, 44. Anticipated by a single prior existing machine never put to actual use, *Parker v. Ferguson*, 1 Blatch., 407.

Construed, *Wintermute v. Redington*, 1 Fish., 248. Construed, is patentable and found novel, *Parker v. Hulme*, 7 West. L. J., 417. See, also, *Parker v. Sears*, 1 Fish., 98; *v. Corbin*, 4 McLean, 462; *v. Banker*, 6 McLean, 631; *v. Hawks*, 2 Fish., 58; *v. Hallock*, 2 Fish., 543; *v. Bigler*, 1 Fish., 285; *v. Lewis*, 1 Bond, 172; *v. Brant*, 1 Fish., 58; *Case v. Redfield*, 4 McLean, 526; *Phelps v. Comstock*, 4 McLean, 353; 4 McLean, 525.

1830.

Smith, J. C. Jan. 29, 1830. Grinding Mill-stones.

See 397, Sept. 25, 1837, which is the same patent.

Aiken, H. May 24, 1830. Saw Set.

Construed and limited to material specified in description, *Aiken v. Bemis*, 3 W. & M., 348.

Scott, J. Nov. 12, 1830. Iron Chest or Safe.

Void and repealed, *Delano v. Scott*, 1 Gilp., 489.

1831.

Reed, J. Aug. 5, 1831. Pump.

Reed v. Cutter, 1 Story, 590.

Winans, R. July 20, 1831. Axle-tree for Carriages, Railway Cars.

Construed, and novelty and validity doubted, *Winans v. Boston & Prov. R. Co.*, 2 Story, 415.

Stimpson, J. Aug. 23, 1831. Rails for Railroad Carriages.

Claim construed to be for a combination of old elements, and not infringed by a combination of some of them with an element substantially different in form. *Stimpson v. Balt. & Sus. R. Co.*, 10 How., 344. See, also, *Stimpson v. Westchester R. Co.*, 4 How., 380; *v. The Railroads*, 1 Wall. Jr., 162.

1832.

Cooper, I. Oct. 25, 1832. Railway Carriages.

Cooper v. Mattheys, 8 Law Rep., 413.

Stanley, H. Dec. 17, 1832. Stove.

Reissue, Nov. 28, 1836.

Construed to be for a combination of old elements; held useful, infringed, and not abandoned by public experimental use. Claim construed to be for the individual elements, and not for the combination, and held invalid as covering more than patentee's invention. *Stanley v. Hewitt*, 17 Frank. Jr., 2d Series, 165. *Stanley v. Whipple*, 2 McLean, 35.

1833.

- Smith, J. C. March 3, 1833. Preparing Palm-leaf.
 Reissue No. 31, March 18, 1841.
 Double use, *How v. Abbott*, 2 Story, 191.
 Reed, J. & J. Nov. 19, 1833. Pump.
 Reed *v. Cutter*, 1 Story, 590.

1834.

- Emerson, J. B. March 8, 1834. Steam-engine.
 Sustained, *Emerson v. Hogg*, 2 Blatch., 1. Sustained for proper joinder of invention,
Hogg v. Emerson, 11 How., 587. See, also, *Hogg v. Emerson*, 6 How., 437.
 McCormick, C. H. June 21, 1834. Harvester.
 McCormick *v. Manny*, 6 McLean, 543.
 Winans, R. Oct. 1, 1834. Eight-wheeled Cars.
 Construed, and description held sufficient, *Winans v. Schenectady & Troy R. Co.*, 2
 Blatch., 279. Construed, novelty doubted, *Winans v. Eaton*, 1 Fish., 181. Construed,
Winans v. New York & Erie R. Co., 1 Fish., 213. Construed, *Winans v. New York &*
Harlem R. Co., 4 Fish., 1. Construction affirmed, *Ibid.*, 21 How., 88. See, also, *York &*
Maryland Line Road v. Winans, 17 How., 30.
 Wilson, C. Oct. 10, 1834. Cooking Stove.
 Claim construed, invention doubted, *Wilson v. Janes*, 3 Blatch., 227.
 Burden, H. Dec. 2, 1834. Hook or Brad-headed Spikes.
 Patentee held original and first inventor, *Troy Iron and Nail Factory v. Corning*, 1
 Blatch., 467.

1835.

- Harley, J. March 3, 1835. Casting Chilled Rollers.
 McClurg *v. Kingsland*, 1 How., 202.
 Crosby, N. & P. March 27, 1835. Saw-mill.
 Construed to be for a patentable combination, *Crosby v. Lapouraille*, Taney's Dec., 374.
 Smith, J. C. Apr. 3, 1835. Preparing Palm-leaf.
 See *Ibid.*, March 3, 1833.
 Stimpson, J. Sept. 26, 1835. Curves for Railways.
 Stimpson *v. The Railroads*, 1 Wall. Jr., 164; *Phila. & Trenton R. Co. v. Stimpson*, 14
 Pet., 448.

1836.

- Orr, J. Jan. 20, 1836. Air-tight Stove.
 Reissue No. 48, Nov. 12, 1842.
 Orr *v. Merrill*, 1 W. & M. 376; *v. Badger*, 7 Law Rep., 465; *v. Littlefield*, 1 W. & M. 30.,
 Colt, S. Feb. 25, 1836. Revolving Fire-arms.
 Reissue No. 124, Oct. 24, 1848.
 Fifth reissue claim, construed to be for five distinct combinations, is infringed. *Colt v.*
Massachusetts Arms Co., 1 Fish., 108. See, also, *Colt v. Young*, 2 Blatch., 471.
 Nevins, Wm. R. March 2, 1836. Machine for Rolling Dough and Cutting Crackers.
 Nevins *v. Johnson*, 3 Blatch., 80.
 Prouty & Mears. March 4, 1836. Plow.
 Not infringed by a combination of a less number of elements than those claimed, *Prouty*
v. Draper, 1 Story, 568. Construed to be for a combination of three elements and not in-
 fringed by use of two of them, *Prouty v. Ruggles*, 16 Pet., 336.
 Guyon, H. G. July 2, 1836. Compound Lever.
 Guyon *v. Serrell*, 1 Blatch., 245.
 16. Chaffee, E. M. Aug. 31, 1836. India Rubber.
 Construed to be for both process and means, *Day v. Union India Rubber Co.*, 3 Blatch., 490.
 See, also, *Day v. New England Car Spring Co.*, 3 Blatch., 154; 3 Blatch., 179; *v. Candee*,
 3 Fish., 9; *v. Union India Rubber Co.*, 20 How., 216; *v. Boston Belting Co.*, 16 Law Rep.,
 329; *v. Hartshorn*, 3 Fish., 32; *Hartshorn v. Day*, 19 How., 211; *Chaffee v. Boston Belting*
Co., 20 How., 216.
 68. Phillips, A. D. Oct. 24, 1836. Friction Matches.
 Construed and limited; method not infringed by a use of a part of it only, *Byam v.*
Farr, 1 Curt., 260. Construed to be for a new combination of old elements before used
 for same purpose, and not infringed by a different combination of the same elements,
Byam v. Eddy, 2 Blatch., 521.
 See, also, *Ryan v. Goodwin*, 3 Sumn., 514; *Brooks v. Byam*, 2 Story, 525; *Byam v. Bul-*
lard, 1 Curt., 100.

79. Crum, H. Nov. 14, 1836. Screw-cutting Machine.
Pierson v. Eagle Screw Co., 3 Story, 402.
97. Wood, J. Dec. 2, 1836. Making Brick or Tiles.
Proportions of materials in the composition held sufficiently stated, Wood v. Underhill, 5 How., 46.

1837.

144. Peirce, D. March 11, 1837. Scythe Snathes.
Alden v. Dewey, 1 Story, 336.
389. Imlay, R. Sept. 21, 1837. Railroad Cars and Carriages.
Construed to be for a combination and infringed, Imlay v. Norwich & Worcester R. Co., 4 Blatch., 227.
397. Smith, J. C. Sept. 25, 1837. Grinding Mill-stones.
Same patent as that of Jan. 29 1830. Infringed, Smith v. Pearce, 2 McLean, 176.
441. Stephens, H. Oct. 28, 1837. Coloring Matter.
Reissue No. 3, April 21, 1838, Stephens v. Felt, 2 Blatch., 37.
461. Allen, E. Nov. 11, 1837. Gun Locks.
Reissue No. 60, Jan. 15, 1844. Reissue held to be for same invention as original, Allen v. Sprague, 1 Blatch., 567. See, also, Allen v. Sprague, 1 Blatch., 480; v. Blunt, 2 W. & M., 121; 3 Story, 742; 1 Blatch., 480.
491. Crompton, W. Nov. 24, 1837. Power Loom.
Forbush v. Bradford, 1 Fish., 317.
Reissue 247. Sept. 13, 1853.
Forbush v. Cook, 2 Fish., 668.
505. Hathaway, J. G. Dec. 7, 1837. Applying Heat to Cooking Stoves.
Hathaway v. Roach, 2 W. & M., 63.
542. Pitts, H. & J. Dec. 29, 1837. Grain Thresher and Cleaner.
Construed and held not anticipated by a machine but slightly different in construction, but applied to an entirely different purpose, Pitts v. Wemple, 1 Biss., 87. Construed to be for the entire machine and the individual improvements, Pitts v. Whitman, 2 Story, 618. Construed to be for a combination and held infringed, Pitts v. Wemple, 6 McLean, 558. See, also, Pitts v. Hull, 3 Blatch., 201.

1838.

640. Truscott, Wolf & Dougherty. March 17, 1838. Cast-iron Wheels.
Construed to be for a new manufacture, Many v. Jagger, 1 Blatch., 372. Construed and limited in view of state of art, Many v. Sizer, 1 Fish., 31. Claim construed, Many v. Sizer, 1 Fish., 17.
777. Carver, E. June 12, 1838. Ribs of Cotton Gin.
Reissue No. 17, Nov. 16, 1839.
Construed, Carver v. Hyde, 16 Pet., 517. See, also, Carver v. Braintree Mfg. Co., 2 Story, 445.
797. Lindlay, J. June 20, 1838. Bedstead.
Boyd v. Brown, 3 McLean, 295; v. McAlpin, 3 McLean, 427.
821. Blake & Philos. June 30, 1838. Casters for Bedsteads.
Construed, held novel, and invention apparent with reasonable certainty on face of patent, Blake v. Sperry, 2 N. Y. Leg. Obs., 251.

1839.

1090. Haywood, N. Feb. 24, 1839. Preparing Caoutchouc.
Suydam v. Day, 2 Blatch., 20.
1092. Heinrich, R. Feb. 27, 1839. Tailor's Shears.
Construed in view of drawings, though not so claimed in specification, Heinrich v. Luther, 6 McLean, 346.
1157. Buck, D. May 20, 1839. Cooking Stove.
Claim construed, sustained and held infringed, Buck v. Gill, 4 McLean, 176. Construed to be for a combination, Buck v. Hermance, 1 Blatch., 398. Held novel, specification sufficient, and infringed, Buck v. Cobb, 9 Law Rep., 545. See, also, Buck v. Hermance, 1 Blatch., 322.
1243. Nock, J. July 16, 1839. Padlock.
Nock's Case, 2 Ct. of Claims, 451.
1252. Babbitt, J. July 17, 1839. Making Axle Boxes.
Construed, Roberts v. Ward, 4 McLean, 565.
1336. Knight, K. & A. Sept. 25, 1839. Paper Manufacture.
Knight v. Gravit, Mir. Pat. Off., 131.

1396. Roth, J. A. Oct. 31, 1839. Ore Furnace.

Collins v. Peebles, 2 Fish., 541.

1411. Crum, H. Nov. 14, 1839. Cutting Threads on Wood and Screws.

Pierson v. Eagle Screw Co., 3 Story, 402.

1840.

1503. Gorham, C. March 3, 1840. Palm Leaf Hat Pressing Machine.

Construed to be for a combination, Gorham v. Mixter, 1 Am. L. J., 539.

1517. Hildreth, G. W. March 19, 1840.

Held, on interference, subsequent to applicant who had made a model prior to patentee, Heath v. Hildreth, 1 MacA. Pat. Cases, 12.

1531. Bean, S. March 30, 1840. Rocking Chair.

Wanting in patentable novelty, Bean v. Smallwood, 2 Story, 408.

1630. Bell, M. June 10, 1840. Applying Waste Heat to Boilers.

Construed to be for the means of applying a principle and not for a principle; held novel and patentable, Bell v. Daniels, 1 Bond, 212. See, also, Bell v. McCullough, 1 Bond, 197.

1647. Morse, S. F. B. June 20, 1840. Electric Telegraph.

Held issued in violation of the law (act 1836, sec. 6), not being limited to fourteen years from date of his prior foreign patent, Smith v. Ely, 5 McLean, 79. Construed; patentee held first and original inventor; eighth claim void, being for a principle, O'Reilly v. Morse, 15 How., 62.

Reissue No. 117, June 13, 1848.

Reissue held legal; is for same invention as original, and not limited by term of French patent issued prior to grant, but subsequent to date of application of the original, Morse v. Bain, 9 West. L. J., 106. Construed and limited as to eighth claim in view of original, and reissue No. 79, Jan. 25, 1846, in order to be sustained; is not for a principle and is not infringed, Smith v. Downing, 1 Fish., 72. Held properly reissued a second time; is for same invention as original; construed to be for an art and sustained, French v. Rogers, 1 Fish., 133.

See, also, Smith v. Cummings, 1 Fish., 152; v. Ely, 15 How., 137; v. Selden, 1 Blatch., 475; Clum v. Brewer, 2 Curt., 506; Western Telegraph Co. v. Magnetic Telegraph Co., 21 How., 456; v. Penniman, 21 How., 460.

1658. Parker & McKelvey. June 27, 1840. Reaction Water-wheel.

Phelps v. Comstock, 4 McLean, 353; Case v. Redfield, 4 McLean, 526.

1714. Montgomery & Harris. Aug. 12, 1840. Bark Grinding Mill.

Construed, Wilbur v. Beecher, 2 Blatch., 132.

1757. Burden, H. Sept. 2, 1840. Spike Making Machine.

Particular machine held to have been made prior to date of patentee's application, Troy Iron & Nail Co. v. Odiorne, 17 How., 72. See, also, Troy Iron & Nail Co. v. Corning, 1 Blatch., 467; 6 Blatch., 328; 14 How., 218; v. Winslow, 11 Blatch., 513.

1839. Whipple, M. D. Oct. 28, 1840. Ginning Machine.

Reissue 140, July 31, 1849.

Second reissue claim construed, Whipple v. Baldwin Mfg. Co., 4 Fish., 29. Construed, Eli v. Monson, etc., Mfg. Co., 4 Fish., 64. Construed, held novel, patentable, and second claim infringed, Whipple v. Middlesex Co., 4 Fish., 41.

1868. Winans, R. Nov. 26, 1840. Locomotive Engines — Regulating Steam for.

Winans v. Danforth, M. S., N. Y., 1860.

1890. Burden, H. Dec. 10, 1840. Rolling Puddle Balls.

Process considered, Corning v. Burden, 15 How., 265.

1841.

1980. Ransom & Wenman. Feb. 13, 1841. Fire Engines.

Construed, Ransom v. Mayor, etc., of New York, 1 Fish., 261.

2021. Hanson, J. & H. March 29, 1841. Lead Pipe Machine.

Reissue No. 82, March 14, 1846.

Claim construed to be for a combination involving double use and not for a process, Le Roy v. Tatham, 14 How., 177.

Construed to be for a new combination applying a newly discovered principle to produce a new and useful result; sustained, Le Roy v. Tatham, 22 How., 132. Held invalid for failure of alien patentee to practice the invention within the United States within eighteen months (act 1836, § 9), Tatham v. Loring, 5 N. Y. Leg. Obs., 207. See, also, Tatham v. Lowber, 2 Blatch., 49; v. Le Roy, 2 Blatch., 474; 2 Blatch., 51; v. Lowber, 4 Blatch., 86.

2174. Page, G. July 16, 1841. Circular Saw-mill.

Construed to be for an old combination of old parts, Phillips v. Page, 24 How., 167. Construed, Page v. Ferry, 1 Fish., 303.

2197. Hotchkiss, J. E. July 29, 1841. Knobs for Doors.
Void for substitution of material amounting to double use only, *Hotchkiss v. Greenwood*, 11 How., 248. See, also, *Hotchkiss v. Greenwood*, 4 McLean, 456.
2275. Slocum, S. Sept. 30, 1841.
Not infringed, *American Pin Co. v. Oakville Co.*, 3 Blatch., 190.

1842.

2435. Armstrong, M. N. Jan. 24, 1842. Cleaning and Polishing Cutlery.
Armstrong v. Halenbeck, 3 N. Y. Leg. Obs., 43.
2488. Reed, J. March 12, 1842. Harvester.
Reed v. Miller, 2 Biss., 12.
2558. Du Faur, F. April 16, 1842. Generating and Applying Heat.
Reissue No. 67, Jan. 23, 1845.
Reissue construed and limited to formal arrangement and held not infringed, *Detmold v. Reeves*, 1 Fish., 127.
2631. Sickles, F. E. May 20, 1842. Lifting Valves, etc.
Construed and held not infringed, *Sickles v. Young*, 3 Blatch., 301. Held novel; patentee first and original inventor; first and second claims construed and not infringed, *Sickles v. Gloucester Mfg. Co.*, 1 Fish., 225. See, also, *Blank v. Mfg. Co.*, 3 Wall. Jr., 196; *Packet Co. v. Sickles*, 19 Wall., 611.
2636. Foote, E. May 26, 1842. Cooking Stove.
Claim construed to be for the patentable application of a new principle by means of mechanical contrivances, and not for a principle, *Foote v. Silsby*, 1 Blatch., 445. Claims construed, *Foote v. Silsby*, 2 Blatch., 260. See, also, *Foote v. Silsby*, 1 Blatch., 542; 1 Blatch., 545; 3 Blatch., 507; *Silsby v. Foote*, 14 How., 218; 20 How., 285.
2708. Rich, R. July 8, 1842. Water-wheel.
Construed, limited to combination claimed and not infringed, *Rich v. Close*, 8 Blatch., 41.
2725. Baldwin, S. K. July 16, 1842. Peg-cutting Machine.
Reissue No. 409, November 18, 1856.
Baldwin v. Sibley, 1 Cliff., 150.
2768. Hall, A. Sept. 3, 1842. Brick-press.
Combination claim construed, *Hall v. Wiles*, 2 Blatch., 197.
2872. Connison, A. Dec. 5, 1842. Steam-engine.
In interference, *Pomeroy v. Connison*, 1 MacA. Pat. Cases, 40.
2886. Sherwood, J. P. Dec. 14, 1842. Door-lock.
Invalid for want of novelty, *Jones v. Moorehead*, 1 Wall., 155.
Reissue No. 401, Oct. 7, 1856.
Held novel, *Livingston v. Jones*, 1 Fish., 521. See, also, *Livingston v. Jones*, 3 Wall. Jr., 330; *Moorehead v. Jones*, 3 Wall. Jr., 306.

1843.

2970. Howe, J. J. Feb. 24, 1843.
Not infringed, *American Pin Co. v. Oakville Co.*, 3 Blatch., 190.
3089. Davoll, W. C. May 19, 1843. Cotton Speeder.
Construed, *Davoll v. Brown*, 1 W. & M., 55.
3106. Waterman, H. May 26, 1843. Method of Connecting Tillers with the Rudder Heads of Vessels.
Held, on interference, surreptitiously granted, because caveat of contestant for priority was overlooked, *Cochrane v. Waterman*, 1 MacA. Pat. Cases, 52.
3117. Fitzgerald, D. June 1, 1843. Safe.
Construed to be for a patentable invention, *Gayler v. Wilder*, 10 How., 477. Construed, *Rich v. Lippincott*, 2 Fish., 1. See, also, *Wilder v. McCormick*, 2 Blatch., 31; *v. Gayler*, 1 Blatch., 511; 1 Blatch., 597; *v. Adams*, 2 W. & M., 329; *Gayler v. Wilder*, 10 How., 509; *Adams v. Edwards*, 1 Fish., 1.
3120. Calvert, F. A. June 3, 1843. Picking and Cleaning Wool and Cotton.
Nesmith v. Calvert, 1 W. & M., 34.
3292. Battin, J. Oct. 6, 1843. Coal Breaker.
Reissue No. 142, Sept. 4, 1849.
Battin v. Silliman, 3 Wall. Jr., 124; *v. Taggart*, 2 Wall. Jr., 101; 17 How., 74.

1844.

3431. Hovey, W. Feb. 12, 1844. Straw Cutter.
Construed to be for a combination, *Hovey v. Henry*, 3 West. L. J., 153.
3461. Goodyear, C. March 9, 1844. India Rubber Shirred Goods.
Awarded priority of invention on interference, *Warner v. Goodyear*, 1 MacA. Pat. Cases, 60. See, also, *Robinson, Ex parte*, 2 Biss. 309; *Gardner v. Goodyear Dental Vulcanite*

Co., 3 O. G., 295; Day v. Carey, 4 Blatch., 278; v. Stellman, 1 Fish., 501; Goodyear v. Day, 1 Blatch., 565.

3633. Goodyear, C. June 15, 1844. Indian Rubber, Soft Rubber.

Construed to be for new process and product, and is infringed by use of an equivalent, Goodyear v. Railroads, 2 Wall. Jr., 356.

Reissue No. 1085, Nov. 20, 1860. Process.

Claim held to be for different invention from original and void, Goodyear v. Providence Rubber Co., 2 Cliff., 351. See, also, Goodyear v. Congress Rubber Co., 3 Blatch., 449; v. Hills, 3 Fish., 134; v. Phelps, 3 Blatch., 91; v. N. J. Central R. R., 1 Fish., 626; v. McBurney, 2 Blatch., 32; v. Day, 2 Wall. Jr., 283; v. Bourn, 3 Blatch., 266; v. Bishop, 4 Blatch., 438; 2 Fish., 154; v. Mullee, 3 Fish., 420; v. Hullihen, 2 Hughes, 251; v. Chaffee, 3 Blatch., 268; v. Dunbar, 3 Wall. Jr., 310; v. N. Y. Gutta Percha Co., 2 Fish., 312; v. Beverly Rubber Co., 1 Cliff., 348; Rubber Co. v. Goodyear, 9 Wall., 788; 9 Wall., 807; Suydam v. Day, 2 Blatch., 20; Metropolitan Washing Machine Co. v. Earle, 3 Wall. Jr., 320; Day v. Newark India Rubber Mfg. Co., 1 Blatch., 628; Goodyear v. Day, 1 Blatch., 565; Day v. Cary, 4 Blatch., 271; Gardner v. Goodyear Dental Vulcanite Co., 3 O. G., 295; Robinson, *Ex parte*, 2 Biss., 309.

3802. Sickles, F. E. Oct. 19, 1844. Valves for Steam-engines.

Reissues 1112 and 1113, Jan. 1, 1861.

Construed and not infringed, Sickles v. Evans, 2 Cliff., 203.

3824. Mini, J. G. Nov. 13, 1844. Lampblack.

Void for false suggestion, Child v. Adams, 1 Fish., 189.

3857. Richards, R. Dec. 16, 1844. Machine for Cutting Leather in Soles.

Claim construed to be for an operative part of a machine, infringed by substituted equivalent which may amount to a patentable improvement, Foster v. Moore, 1 Curt., 279.

1845.

3876. Henry, S. Jan. 4, 1845. Stove.

Reconstrued, Ruggles v. Eddy, 12 O. G., 716; Ruggles v. Eddy, 10 Blatch., 52; 11 Blatch., 524.

3885. Tyler, P. B. Jan. 16, 1845. Cotton Press.

Reissue 92. May 1, 1847.

Tyler v. Hyde, 2 Blatch., 308.

3889. Cushman, W. M. C. Jan. 16, 1845. Railroad Rails.

Application for reissue, Cushman, *In re*, 1 MacA. Pat. Cases, 577.

3895. McCormick, C. H. Jan. 31, 1845. Harvester.

Claims construed, McCormick v. Seymour, 2 Blatch., 240. Claims construed and infringed, *Ibid.*, 3 Blatch., 209. Construed to be for a combination, sustained and not infringed, McCormick v. Manny, 6 McLean, 539. Construed and not infringed, McCormick v. Talcott, 20 How., 402. See, also, Seymour v. McCormick, 19 How., 96.

3987. Bigelow, E. B. Apr. 10, 1845. Power Loom.

Lowell Mfg. Co. v. Hartford Carpet Co., 2 Fish., 472.

4023. Parkhurst, S. R. May 1, 1845. Wool Carding Machine.

Patentee held first and original inventor, Parkhurst v. Kinsman, 1 Blatch., 488. In interference, Cundell v. Parkhurst, 1 MacA. Pat. Cases, 63. See, also, Parkhurst v. Kinsman, 2 Blatch., 72; 2 Blatch., 76; 2 Blatch., 78; Kinsman v. Parkhurst, 18 How., 289.

Reissue No. 1137, Feb. 12, 1861.

Morris v. Lowell Mfg. Co., 3 Fish., 67.

4120. Hale & Goodman, July 22, 1845. Machine for Cutting Irregular Forms.

Reissue No. 1400, Feb. 10, 1863.

Construed to be for a combination of old elements; limited to actual invention and not infringed, Hale v. Stimpson, 2 Fish., 565.

4199. Sickles, F. E. Sept. 19, 1845. Steam-engine.

Held valid, Sickles v. Mitchell, 3 Blatch., 548. Construed, Sickles v. Borden, 3 Blatch., 538.

Reissue 910, Feb. 21, 1860.

Reissue claim construed to be for a non-patentable result; abandoned by delay of fourteen years in reissuing; anticipated by prior patent to same patentee, and wanting in novelty, Sickles v. Falls, 4 Blatch., 509. Construed to be for a different invention from original and invalid, Sickles v. Evans, 2 Cliff., 203.

Reissue No. 1113, Jan. 1, 1861; No. 1260, Jan. 21, 1862.

Construed and not infringed, Sickles v. Evans, 2 Cliff., 203. See, also, Sickles v. Borden, 4 Blatch., 14; v. Tileston, 4 Blatch., 109; Steam Packet Co. v. Sickles, 10 How., 419.

- 4204.** Hovey, W. Sept. 23, 1845. Grinding Tools.
 Construed; novelty and originality doubted, *Hovey v. Stevens*, 1 W. & M., 290.
 Reissue No. 96, June 19, 1847.
 Claim construed and held insufficient in not distinguishing what is claimed as new,
Ibid., 3 W. & M., 17.
- 4213.** Stimpson, T. D. Sept. 30, 1845. Removing Truck Wheels.
Stimpson v. Mad River R. Co., 6 McLean, 603.
- 4266.** Hyatt, T. Nov. 12, 1845. Vault Cover.
 Reissue 303, April 3, 1855.
Lake v. Fitzgerald, 6 Fish., 420. Held not to interfere with 14,281, *Cornell v. Hyatt*, 1 MacA. Pat. Cases, 423.

1846.

- 4453.** Morse, S. F. B. Apr. 11, 1846. Electric Telegraph. (Morse Register.)
 Reissue, 118, June 13, 1848.
 Construed to be for the combination of the principle with the machinery invented; sustained and infringed, *Smith v. Clark*, 3 Am. L. J., 155. Reissue sustained and held infringed, *Morse v. Bain*, 9 West. L. J., 106. See, also, *Smith v. Downing*, 1 Fish., 72; *v. Selden*, 1 Blatch., 475; *v. Eli*, 5 McLean, 76; 15 How., 137; *O'Reilley v. Morse*, 15 How., 109.
- 4459.** Ide, N. Apr. 18, 1846. Cultivator.
 Held infringed, *Tracey v. Torrey*, 2 Blatch., 277, and *Chamberlin v. Ganson*, 2 Blatch., 279.
- 4472.** Wells, H. A. Apr. 25, 1846. Hat Body, Machine for making.
 Reissue 396. Sept. 30, 1856.
 Sustained and not infringed, *Burr v. Cowperthwaite*, 4 Blatch., 165.
 Reissue 2942, May 19, 1868.
 Fifth claim construed and not infringed when limited as in prior decisions. Sixth claim infringed, *Brett v. Quintard*, 10 Fed. Rep., 741. Not infringed in view of prior decisions, *Wells v. Jaques*, 5 Fish., 136. Reissue of an original combination for one of fewer elements considered, *Gill v. Wells*, 22 Wall., 1.
 Reissues 1086 and 1087, Dec. 4, 1860.
 If construed so as to be infringed, is too broad in view of state of art and original, and is void, *Burr v. Duryee*, 1 Wall., 531. Held not infringed if limited, otherwise too broad, *Burr v. Duryee*, 2 Fish., 275.
 2942 declared to be for same invention as original, and infringed by formal difference only, *Wells v. Gill*, 6 Fish., 574. Construed to be for a combination of old and well known devices to produce a new and useful result; valid in view of original; claims 1, 2, 4 and 6 infringed, *Wells v. Jaques*, 5 O. G., 364. Sixth claim construed to be for a combination; held valid and infringed, *Brett v. Quintard*, 17 Fed. Rep., 529. Sustained in view of original model and drawings; construed and infringed by a colorable variation, *Wells v. Haganman*, 29 Leg. Int., 405. See, also, *Wells v. Yates*, 6 Fish., 89.
- 4595.** Carey, D. June 27, 1846. Horse Power.
Pitts v. Hall, 2 Blatch., 230.
- 4726.** Howe, W. Aug. 28, 1846. Truss Bridge.
Railroad Co. v. Trimble, 10 Wall., 367.
- 4750.** Howe, E., Jr. Sept. 10, 1846. Sewing Machine.
 Held valid and not anticipated by an abandoned experiment, *Howe v. Underwood*, 1 Fish., 160. Construed in view of state of art, and claim literally to a result construed and sustained for the means; held infringed, *Howe v. Macon*, 1 Fish., 586.
 Reissue No. 1154, March 19, 1861.
 First claim construed, not anticipated by prior publication; sustained and infringed; patentee is first and original inventor, *Howe v. Williams*, 2 Cliff., 245.
- 4816.** Jackson & Judson. Oct. 17, 1846. Bell Telegraph.
United States Annunciator Co. v. Sanderson, 3 Blatch., 184.
- 4848.** Jackson & Morton. Nov. 12, 1846. Surgical Operation (Anæsthetic).
 Construed to be for a naked discovery; a more perfect effect produced by old agents in an old way on old subjects, not patentable and void, *Morton v. New York Eye Infirmary*, 5 Blatch., 116; *Cushing's Opinion*, 8 Op., 270.
- 4860.** Denniston, J. T. Nov. 20, 1846. Harness Saddles.
North v. Kershaw, 4 Blatch., 70.
- 4912.** Cahart, J. Dec. 28, 1846. Bellows for Musical Instrument.
 Reissue 484, Aug. 25, 1857.
 Void for new matter, *Cahart v. Austin*, 2 Cliff., 528.

1847.

5006. Jenkins, H. March 6, 1847. Wire Grating Manufacture.
Reissue No. 747, June 28, 1859.
Chase v. Walker, 3 Fish., 120.
5112. Atwood, A. May 15, 1847. Cast-iron Car Wheels.
Reissue No. 468, June 9, 1857.
Construed, novelty sustained and held infringed, Atwood v. Portland Co., 10 Fed. Rep., 283.
5175. Winans, R. June 26, 1847. Cars for Coal.
Construed, Winans v. Denmead, 15 How., 344.
5227. Hussey, O. Aug. 7, 1847. Reaper.
Reissue No. 449, April 14, 1857.
Novelty sustained, Hussey v. Whitely, 1 Bond, 407. Not void for laches in reissuing; is valid and infringed, Hussey v. Bradley, 5 Blatch., 134.
Reissue 742, June 21, 1859.
Not void for laches in reissuing; is valid, novel and infringed, *Ibid.* See, also, Hussey v. McCormick, 1 Biss., 300.
5253. Cornell, S. G. Aug. 21, 1847. Lead Pipe Machinery.
Tatham v. Le Roy, 2 Blatch., 484. Awarded priority on interference, Perry v. Cornell, 1 MacA. Pat. Cases, 68.
5254. Clark, T. Aug. 21, 1847. Safety Apparatus for Steam Boilers.
Construed, Clark Patent Steam Co. v. Copeland, 2 Fish., 221.
5335. McCormick, C. H. Oct. 23, 1847. Harvester.
Claim construed in view of specification to determine the invention, McCormick v. Seymour, 2 Blatch., 240.
Reissue No. 239, May 24, 1853.
Construed and held infringed, McCormick v. Talcott, 20 How., 402. See, also, McCormick v. Manny, 6 McLean, 543; v. Seymour, 3 Blatch., 223; Seymour v. McCormick, 16 How., 480.
5352. Boardman, Wm., Jr. Nov. 6, 1847. Portable Steam Pumps.
Awarded priority on interference, Atkinson v. Boardman, 1 MacA. Pat. Cases, 80.

1848.

5476. Gazley, A. H. March 14, 1848. Saddles.
North v. Kershaw, 4 Blatch., 10.
5522. Moore, L. Apr. 18, 1848. Seed Drill.
Reissues 1393, 1394 and 1395, Feb. 4, 1863.
Moore v. Marsh, 7 Wall., 515.
5531. Whitney, A. Apr. 25, 1848. Cast-iron Car Wheels.
Held novel, useful, not void for concealment; process claim construed, sustained, infringed by improvement, Whitney v. Mowry, 2 Bond, 45. Construed, *Ibid.*, 4 Fish., 141. Construed to be for a process obtaining a novel result, and not for a combination; not void for want of utility or for insufficient description, and is infringed, Mowry v. Whitney, 14 Wall., 620. Is for a process as an entirety, Whitney v. Mowry, 4 Fish., 207. See, also, Mowry v. Whitney, 14 Wall., 434.
5575. Serrell, A. T. May 16, 1848. Making Mouldings.
Reissue No. 187, Jan. 7, 1851; No. 243, June 21, 1853.
Construed, Serrell v. Collins, 4 Blatch., 62.
5876. How, J. Oct. 24, 1848. Boot Tree.
Eames v. Cook, 2 Fish., 146.

1849.

5993. Larabee, E. Jan. 2, 1849. Shower Bath.
Construed to be for a combination of old elements, and not infringed by a combination of less than the entire number of elements. Larabee v. Cortlan, 3 Fish., 5.
6025. Hibbert, J. Jan. 9, 1849. Knitting Needles.
Construed and limited to actual improvement in view of state of art, and held infringed, Aiken v. Dolan, 3 Fish., 197.
6086. Vance, E. Feb. 6, 1849. Cooking Stove.
Construed, Vance v. Campbell, 1 Fish., 483; 1 Black, 427.
6099. Morey & Johnson. Feb. 6, 1849. Sewing Machine.
Reissue No. 518, Jan. 12, 1858.
Construed and held infringed, Singer v. Walmsley, 1 Fish., 558.

- 6106.** Jenkins, H. Feb. 13, 1849. Wire Fence.
Construed and limited, and not infringed as limited, *New York Wire Rail Co. v. Walker*, 2 Fish., 179.
- 6135.** Dyson, J. Feb. 20, 1849. Carding Engine.
Held not infringed, *Dyson v. Danforth*, 4 Fish., 133.
- 6148.** Frost & Monroe. Feb. 27, 1849. Middlings Purifier.
Reissue No. 302, March 13, 1855.
Claim held bad for uncertainty, *Carr v. Rice*, 4 Blatch., 200.
Reissue 1280, Feb. 25, 1862.
• Construed to be for patentable matter; claim is for a combination, sustained, and not void for uncertainty in the specification, *Swift v. Whisen*, 2 Bond, 115; *Carr v. Rice*, 1 Fish., 198.
- 6162.** Corliss, G. H. March 10, 1849. Cut-off for Steam-engines.
Reissues Nos. 759 and 763, July 12, 1859.
Held novel, patentable and infringed, *Corliss v. Wheeler & Wilson Mfg. Co.*, 2 Fish., 199.
- 6245.** Haines, J. March 27, 1849. Harvester.
Reissue No. 331, Nov. 6, 1855.
Awarded priority on interference, *Haines v. Rugg*, 1 MacA. Pat. Cases, 420.
- 6328.** Bain, A. Apr. 17, 1849. Electric Telegraph.
Held not to interfere with Morse's patent No. 6420, *Bain v. Morse*, 6 West. L. J., 372;
Same Case, 1 MacA. Pat. Cases, 90.
- 6420.** Morse, S. F. B. May 1, 1849.
Sustained and held infringed, *O'Reilley v. Morse*, 15 How., 62. Held not to interfere with 6328, *Bain v. Morse*, 1 MacA. Pat. Cases, 90. Sustained, *Morse v. Bain*, 9 West. L. J., 106.
- 6439.** Bachelder, J. May 8, 1849. Sewing Machine.
Reissue No. 2125, Dec. 12, 1865.
Held novel, sustained and infringed, *Bachelder v. Moulton*, 11 Blatch., 304. Held valid, novel and infringed, *Potter v. Stewart*, 18 Blatch., 561. Construed to be for a combination; extension valid; is infringed, *Potter v. Braunsdorf*, 7 Blatch., 97.
- 6545.** Sanders, B. D. June 19, 1849. Winnowing Machine.
Reissue No. 306, Apr. 10, 1855.
Sanders v. Logan, 2 Fish., 167.
- 6757.** Cox, G. S. Oct. 2, 1849. Metallic Packing for Steam-engines.
Matthews v. Skates, 1 Fish., 602.
- 6762.** Hodge, N. Oct. 2, 1849. Operating Car Brake.
Reissue No. 231, March 1, 1853.
Hodge v. N. Missouri & Iron Mt. R. Co., 4 Fish., 161; *v. Hudson R. R. Co.*, 6 Blatch., 165;
v. Hudson R. & Harlem R. Co., 6 Blatch., 85; *Wood v. Mich. S. R. R.*, 2 Biss., 62.
- 6806.** Bigelow, E. B. Oct. 23, 1849. Jacquard Loom.
Lowell Mfg. Co. v. Hartford Carpet Co., 2 Fish., 472.
- 6835.** Rice, O. Oct. 30, 1849. Wash-board.
Description held sufficient, *Wayne v. Holmes*, 1 Bond, 27. See, also, *Wayne v. Winter*, 6 McLean, 344.
- 6939.** Marshall, M. Dec. 11, 1849. Loom.
Reissue No. 947, Apr. 24, 1860.
Held to be for same invention as original; is useful; original not void for want of oath, *Crompton v. Belknap Mills*, 3 Fish., 536.
- 6951.** Blanchard, T. Dec. 18, 1849. Wood-bending Machine
Reissue No. 853, Nov. 15, 1859.
Construed to be for a combination of old parts to produce a new and useful result, *Blanchard v. Puttman*, 2 Bond, 84. See, also, *Ibid.*, 8 Wall., 420.

1850.

- 7027.** Norcross, N. G. Jan. 15, 1850. Circular Saw-mill.
Construed to be for a combination, *Lee v. Blandy*, 1 Bond, 361.
- 7263.** Ladd, W. G., Jr. Apr. 9, 1850. Fluid Level.
In interference, *Chandler v. Ladd*, 1 MacA. Pat. Cases, 493.
- 7446.** Smith, A. June 18, 1850. Dyeing Parti-colored Yarn.
Reissue No. 217, May 11, 1852.
Construed, *Smith v. Higgins*, 1 Fish., 537. Construed to be for a combination and held not infringed, *Ibid.*, 2 Fish., 97.

- 7531.** O'Neil, J. July 30, 1850. Churns.
Additional patent No. 97, 1851.
Awarded priority on interference, *Burlew v. O'Neil*, 1 MacA. Pat. Cases, 168.
- 7686.** Matthews, M. M. Oct. 1, 1850. Printer's Ink.
Awarded priority on interference, *Matthews v. Wade*, 1 MacA. Pat. Cases, 144; *Johnson's Opinion*, *Ibid.*, 145.
- 7676.** Aiken, H. Oct. 1, 1850. Wrought-iron Car Wheels.
Held useful and important, the degree being immaterial, and is entitled to a patent, *Aiken, In re*, 1 MacA. Pat. Cases, 130.
- 7755.** Judson, J. & A. Nov. 5, 1850. Valves for Governors.
Construed to be for a patentable invention, *Judson v. Moore*, 1 Bond, 285. Sustained as for patentable subject-matter, *Judson v. Cope*, 1 Bond, 327.
Reissue No. 255, Jan. 10, 1854.
- 7776.** Wilson, A. B. Nov. 12, 1850. Sewing Machine.
Sustained, *Potter v. Whitney*, 3 Fish., 77.
Reissue No. 346, Jan. 22, 1856.
Held novel, not anticipated by incomplete experiment; claims construed and infringed, *Potter v. Wilson*, 2 Fish., 102. Held novel, *Potter v. Muller*, 2 Fish., 465. Infringed by formal variation, *Potter v. Schenck*, 1 Biss., 515. Infringed by use of equivalent, *Potter v. Davis Sewing Machine*, 3 Fish., 472. Held valid and infringed, *Potter v. Empire Sewing Machine Co.*, 3 Fish., 474. Sustained, *Grover & Baker Sewing Machine v. Sloat*, 2 Fish., 112.
Reissue No. 414, Dec. 9, 1856.
Construed to be for the substitution in an old combination of old elements, of a new and independent element constituting a new and patentable combination by its difference from the old element replaced, *Potter v. Holland*, 4 Blatch., 241. Held novel, not anticipated by incomplete experiments; claims construed and held infringed, *Potter v. Wilson*, 2 Fish., 102. Sustained as novel, *Potter v. Muller*, 2 Fish., 465. Sustained, *Grover & Baker Sewing Machine v. Sloat*, 2 Fish., 112. See, also, *Potter v. Fuller*, 2 Fish., 251; *v. Holland*, 4 Blatch., 206; *v. Muller*, 1 Bond, 601; *v. Stevens*, 2 Fish., 163; *v. Mack*, 3 Fish., 428; *v. Crowell*, 1 Abb., 89; *Burdell v. Denig*, 2 Fish., 538; 15 Fed. Rep., 397; 2 Otto, 716; *v. Comstock*, 15 Fed. Rep., 395; *Florence Sewing Machine Co. v. Singer Sewing Machine Co.*, 8 Blatch., 113; 8 Blatch., 117; *Wilson v. Barnum*, 1 Wall. Jr., 347.
- 7813.** Sabin, H. W. Dec. 3, 1850. Horse Rake.
Reissue Nos. 1914 and 1915. March 28, 1865.
Not abandoned; are for same invention as original, and valid, *Hoffheins v. Brandt*, 3 Fish., 219.
- 7854.** England, L. C. Dec. 24, 1850. Vats for Tanning Hides.
England v. Thompson, 3 Cliff., 271.

1851.

- 7931.** Grover & Baker. Feb. 11, 1851. Sewing Machine.
Reissue No. 568. June 15, 1858.
Grover & Baker Sewing Machine Co. v. Williams, 2 Fish., 133.
- 8047.** Littlefield, D. G. April 15, 1851. Cooking Stove.
Littlefield v. Perry, 21 Wall., 205; *Perry v. Littlefield*, 17 O. G., 51; *v. Corning*, 7 Blatch., 195.
- 8075.** Goodyear, N. May 6, 1851. India Rubber.
Reissue No. 556, May 18, 1858; 557, May 18, 1858.
Construed broadly as not limited to percentage composition provided same result is obtained, *Goodyear v. Mullee*, 5 Blatch., 429.
Sustained and infringed by a combination embodying the invention, *Goodyear v. Evans*, 6 Blatch., 121. Construed, limited, sustained and infringed. *Goodyear v. Berry*, 2 Bond, 189.
Not abandoned by laches, *Goodyear v. Hills*, 3 Fish., 134. Infringed, *Goodyear v. Rust*, 6 Blatch., 229. No. 556 sustained, not abandoned, sufficiently described, *Goodyear v. Wait*, 5 Blatch., 468. No. 557 construed, held novel and infringed, *Goodyear v. New York Gutta Percha Co.*, 2 Fish., 312. Sustained, *Goodyear v. Mullee*, 3 Fish., 420. See, also, *Goodyear v. Mullee*, 3 Fish., 259; *v. Allyn*, 6 Blatch., 33; *v. Honsinger*, 2 Biss., 1; *v. Hullihen*, 2 Hughes, 492.
- 8119.** Hoyt, Wm. H. May 27, 1851. Omnibus Steps.
Awarded priority on interference, *Stephenson v. Hoyt*, 1 MacA. Pat. Cases, 292.

- 8154.** Sangster, H. & J. June 10, 1851. Lantern.
Reissue No. 325, Aug. 21, 1855.
Wanting in novelty; claim construed to be for a result, *Sangster v. Miller*, 5 Blatch., 243.
- 8192.** Palmer & Williams. July 1, 1851. Harvester.
Reissue No. 305, Apr. 10, 1855.
Construed, limited and not infringed, *Seymour v. Osborne*, 3 Fish., 555.
Reissue No. 1110. Jan. 1, 1861.
Construed to be for a combination, and is infringed, *Ibid.*, 11 Wall., 516.
Reissue No. 1682, May 31, 1864.
Construed to be for a combination; sustained and infringed, *Ibid.* Held novel and infringed, *Seymour v. Marsh*, 2 O. G., 675. Considered, held novel, useful, and first claim infringed, *Marsh v. Seymour*, 97 U. S., 349.
- 8212.** Seymour, W. H. July 8, 1851. Harvester.
Reissue No. 1003, July 10, 1860.
Construed, limited and not infringed, *Seymour v. Osborne*, 3 Fish., 555.
Reissue No. 1177 (also No. 72), May 7, 1861.
Construed, held valid and infringed, *Seymour v. Marsh*, 2 O. G., 675; *Marsh v. Seymour*, 97 U. S., 349. Construed and held infringed, *Seymour v. Osborn*, 11 Wall., 516. Construed, limited and not infringed, *Seymour v. Osborn*, 3 Fish., 555.
Reissue 1683, May 31, 1864.
Held novel and useful; second claim infringed, *Marsh v. Seymour*, 97 U. S., 349. Construed to be for a combination; held valid and infringed, *Seymour v. Osborn*, 11 Wall., 516. Held novel and infringed, *Seymour v. Marsh*, 2 O. G., 675.
- 8253.** Corliss, G. H. July 29, 1851. Cut-off Gear.
Reissue No. 780, July 26, 1859.
Held novel, patentable and infringed, *Corliss v. Wheeler & Wilson Mfg. Co.*, 2 Fish., 199.
- 8282.** Akins & Felthousen. Aug. 5, 1851. Sewing Machine.
Reissue No. 1388, Jan. 27, 1863.
Potter v. Dixon, 5 Blatch., 160.
- 8294.** Singer, I. M. Aug. 12, 1851. Sewing Machine.
Reissue No. 278, Oct. 3, 1854.
Construed, *Singer v. Walmsley*, 1 Fish., 579. Sustained, *Wickersham v. Singer*, 1 MacA. Pat. Cases, 645.
- 8322.** Carter & Rees. Aug. 26, 1851. Nut and Washer Machine.
Reissue No. 313, June 19, 1855.
Construed, held novel, and not invalid for delay in reissuing, *Wood v. Cleveland Rolling Mill*, 4 Fish., 550. Held, on interference, entitled to patent for improvements made thereon, *Carter v. Carter*, 1 MacA. Pat. Cases, 388.
- 8368.** Jillson, A. Sept. 16, 1851. Weaver's Temples.
Awarded priority on interference, *Jillson v. Winsor*, 1 MacA. Pat. Cases, 136.
- 8427.** Kenyon, W. Oct. 14, 1851. Nuts.
Reissue No. 666, Feb. 15, 1859.
Construed, held novel, and not invalid for delay in reissuing, *Wood v. Cleveland Rolling Mill*, 4 Fish., 550. Held, on interference, subsequent to No. 13,118, *Carter v. Carter*, 1 MacA. Pat. Cases, 388.
- 8552.** Stevans, F. A. Nov. 25, 1851. Car Brake.
Construed to be for a patentable and novel combination of old elements, and sustained, *Emigh v. Chicago, Burlington & Quincy R. Co.*, 1 Biss., 400. See, also, *Same v. Baltimore & Ohio R. Co.*, 4 Hughes, 271; *Emigh v. Chamberlain*, 1 Biss., 367.
- 8589.** Hayden, H. W. Dec. 16, 1851. Machine for Making Brass Kettles.
Construed, and held to involve invention, *Waterbury Brass Co. v. New York & Brooklyn Brass Co.*, 3 Fish., 43.
Reissues Nos. 3995 and 3996, May 24, 1870.
Construed, held novel, valid and infringed, *Waterbury Brass Co. v. Miller*, 9 Blatch., 77.
- 8621.** Allen, J. Dec. 23, 1851. Setting Mineral Teeth.
Construed, held useful, *Allen v. Hunter*, 6 McLean, 303.

1852.

- 8641.** Rapp, A. W. Jan. 6, 1852. Gold Pen.
Construed, limited and not infringed. *Rapp v. Bard*, 1 Fish., 196.

- 8720.** Densmore, B. Feb. 10, 1852. Harvester.
Reissue No. 1262, Jan. 28, 1862.
Construed, invalid in part for new matter; not infringed, if limited, *Kirby v. Dodge & Stephenson Mfg. Co.*, 10 Blatch., 307. Construed, sustained, held novel and infringed, *Whiteley v. Kirby*, 11 Wall., 678.
- 8724.** Ketchum, W. F. Feb. 10, 1852. Harvester Attachments.
Reissues Nos. 4672 and 4673, Dec. 12, 1871.
Construed in view of state of art; are for same invention as original; valid and infringed, *Ketchum Harvesting Machine Co. v. Johnston Harvester Co.*, 13 O. G., 178. Infringed by manufacture here for sale abroad, *Ibid.*, 19 Blatch., 367.
- 8756.** Jones, S. T. Feb. 24, 1852. Zinc White Manufacture.
Held anticipated in part by English patent; invention not sufficiently distinguished from the invention in said patent, *Jones v. Osgood*, 6 Blatch., 435.
- 8861.** Shaw, D. Apr. 6, 1852. Smut Mill.
Reissue No. 3794, Jan. 11, 1870.
Third claim construed to be for a combination, and limited; novelty and validity doubted; not infringed by omission of one element and substitution of a new device; fifth claim invalid for want of invention, *Knox v. Murtha*, 9 Blatch., 205.
- 8876.** Singer, I. M. Apr. 13, 1852. Sewing Machine.
Singer v. Walmsley, 1 Fish., 558.
- 9005.** Rugg, G. H. June 8, 1852. Harvester.
Held, on interference, abandoned by public use and sale for more than two years prior to application, *Rugg v. Haines*, 1 MacA. Pat. Cases, 420.
- 9109.** Thompson & Bachelder. July 6, 1852. Car Brake.
Sustained, *Sayles v. Chicago & Northwestern R'y Co.*, 1 Biss., 468. Sustained; infringed by use of the inventive principle of the combination, *Ibid.*, 3 Biss., 52. Construed and limited to original application prior to amendment as against intervening rights of third parties; sustained and not infringed, *Railway Co. v. Sayles*, 97 U. S., 554. Novelty of patent, as construed by plaintiffs, doubted, *Mowry v. Grand St. & Newtown R. Co.*, 10 Blatch., 89. See, also, *Sayles v. Louisville City R. Co.*, 9 Fed. Rep., 512; *v. Oregon Central R'y Co.*, 6 Sawyer, 31; *v. Richmond, F. & P. R. Co.*, 3 Hughes, 172; *v. Dubuque & Sioux City R. Co.*, 5 Dill., 561; *Root v. Lake Shore & Mich. S. R. Co.*, 105 U. S., 189; *Hendrie v. Sayles*, 98 U. S., 546.
- 9432.** Moffitt, J. R. Nov. 30, 1852. Grain Separator.
Reissue No. 540, March 23, 1858.
Moffitt v. Garr, 1 Bond, 315; 1 Black, 273.
- 9435.** Tainter, D. Nov. 30, 1852. Rotary Knitting Machine.
First and second claims construed to be duplicate claims to same invention; patent not void in consequence, but sustained, *Tompkins v. Gage*, 5 Blatch., 268.
- 9484.** Hopkins, E. L. Dec. 21, 1852. Hat Body Manufacture.
Held not infringed, *Burr v. Duryee*, 2 Fish., 275.

1853.

- 9653.** Smith, Wm. Apr. 5, 1853. Corded Elastic Fabric.
Reissue Nos. 2843 and 2844, Jan. 14, 1868.
Not anticipated by abandoned experiment; sustained and infringed, *Smith v. Glendale Elastic Fabric Co.*, 1 Holmes, 340; *Elastic Fabric Co. v. Smith*, 100 U. S., 110.
Reissue No. 3014, June 30, 1868. Division B.
Double use, wanting in patentable invention, *Smith v. Elliott*, 9 Blatch., 400; *Smith v. Nichols*, 1 Holmes, 172.
Is for change in degree only, not involving invention, *Smith v. Nichols*, 21 Wall., 112. Not anticipated by abandoned experiment; sustained and infringed, *Smith v. Glendale Elastic Fabric Co.*, 1 Holmes, 340.
- 9688.** Sloan, T. J. Apr. 26, 1853. "Screw Machine."
Awarded priority on interference, *Screw Co. v. Sloan*, 1 MacA. Pat. Cas., 210.
- 9700.** Taylor, J. S. May 3, 1853. "Hat Body Machine."
Hawley v. Mitchell, 1 Holmes, 42; *Mitchell v. Hawley*, 16 Wall., 544.
- 9703.** O'Reilly, P. May 3, 1853. "Rails for Railroads."
Held that interference was improperly declared, the inventions not being similar, *O'Reilly v. Smith*, 1 MacA. Pat. Cas., 218.
- 9718.** Mee, J. May 10, 1853. Knitting Loom.
Awarded priority on interference over interfering applicant, who merely suggested improvements involving mechanical skill, *Marshall v. Mee*, 1 MacA. Pat. Cas., 229.

- 9719.** Mee, J. May 10, 1853. Knitting Loom.
Same as in 9718, *Ibid.*, 229.
- 9721.** Young, J. May 10, 1853. Printing Press.
Awarded priority on interference, Ruggles *v.* Young, 1 MacA. Pat. Cas., 160.
- 9736.** Seely, S. May 17, 1853. Lime Kiln.
Held to be for a patentable use of an old thing in an old way to produce known but better effects, Seely, *In re*, 1 MacA. Pat. Cas., 248.
- 9737.** Ketchum, Wm. F. May 17, 1853. Mowing Machine.
Awarded priority on interference, McCormick *v.* Howard, 1 MacA. Pat. Cas., 238.
- 9765.** Kittle, S. P. June 7, 1853. Door Fastening.
Erroneous description rejected; construed, and sustained in view of remainder of specification, Kittle *v.* Merriam, 2 Curt., 475.
- 9776.** Smith, H. L. June 7, 1853. Letter Files.
Held novel and to involve more than an analogous use; is patentable, Smith, *In re*, 1 MacA. Pat. Cas., 255.
- 9789.** Brookfield & White. June 14, 1853. Glass Manufacture.
On interference held to be product of joint inventors, Yearsley *v.* Brookfield, 1 MacA. Pat. Cas., 193.
- 9807.** Tuttle, J. H. June 21, 1853. Saw.
Reissue No. 4096, Aug. 9, 1870.
Construed and held not infringed, Wheeler *v.* Simpson, 6 O. G., 435.
- 9810.** Tyson W. F. June 12, 1853. Propellers.
Interference with No. 10 124 dissolved; there being no substantial identity between the two, Tyson *v.* Rankin, 1 MacA. Pat. Cas., 262.
- 9893.** Brown, G. W. Aug. 2, 1853. Seed Planter.
Reissue No. 1036, Sept. 11, 1860.
Construed, validity questioned, not infringed, Brown *v.* Selby, 2 Biss., 457. Construed, sustained, held valid and infringed, Corn-Planter Patent, 23 Wall., 181.
Reissue No. 1037, Sept. 11, 1860.
Construed, limited and wanting in novelty, Brown *v.* Selby, 2 Biss., 457; Corn-Planter Patent, 23 Wall., 181.
Reissue No. 1038, September 11, 1860.
Construed, limited and not infringed, Brown *v.* Selby, 2 Biss., 457. Construed, held valid and infringed, Corn-Planter Patent, 23 Wall., 181.
Reissue No. 1039, Sept. 11, 1860.
Construed, limited, sustained and not infringed, Brown *v.* Selby, 2 Biss., 457. Construed, held valid and infringed, Corn-Planter Patent, 23 Wall., 181.
- 9947.** Gallahue, A. C. Aug. 16, 1853. Machine for Pegging Shoes. Antedated Feb. 18, 1853.
Reissue No. 3533, July 6, 1869.
Fourth claim construed to be for a double use, Gallahue *v.* Butterfield, 10 Blatch., 232.
- 10038.** Sylla & Adams. Sept. 20, 1853. Harvester.
Reissues Nos. 723 and 724, March 17, 1859.
Construed; are for same invention as original; valid, sustained and infringed, Aultman *v.* Holley, 11 Blatch., 317.
Reissue No. 2608, May 14, 1867.
Construed; is for same invention as original; not invalid for new matter in description; is infringed, *Ibid.*, 11 Blatch., 317.
- 10078.** Pratt, E. L. Oct. 4, 1853. Apple-paring Machine.
Held not anticipated by defendant's patent, and is infringed by formal change only, Sargent *v.* Carter, 1 Fish., 277. See, also, Sargent *v.* Larned, 2 Curt., 349.
- 10124.** Beard, E. Oct. 18, 1853. Propeller.
Interference with No. 9810 dissolved, there being no substantial identity between the two. Tyson *v.* Rankin, 1 MacA. Pat. Cases, 262.
- 10204.** Gear, N. Nov. 8, 1853. Molding Machine.
Gear *v.* Holmes, 6 Fish., 595; *v.* Fitch, 16 O. G., 1231; *v.* Grosvenor, 1 Holmes, 215.
- 10289.** Bussell, E. T. Nov. 29, 1853. India Rubber and Steel Spring.
Reissue No. 4202, Dec. 13, 1870.
Novelty of invention, and validity of reissue to assignee (acts 1836 and 1837), sustained, National Car Spring Co. *v.* Union Car Spring Co., 12 Blatch., 80.
- 10339.** Meyer, L. O. P. Dec. 20, 1853. Vulcanizing Caoutchouc.
Construed, sustained and held infringed, Poppenhusen *v.* Falke, 5 Blatch., 46; 4 Blatch., 493. Not infringed, Poppenhusen *v.* New York Gutta-percha Co., 4 Blatch., 253. See, also, Poppenhusen *v.* New York Gutta-percha Co., 4 Blatch., 184; 2 Fish., 62.

1854.

- 10422.** Smith, H. B. Jan. 10, 1854. Mortising Machine.
Construed, in view of state of art, to be for a combination, and not for a principle; held novel, and sustained, *Smith v. Fay & Co.*, 6 Fish., 446.
- 10448.** Littlefield, D. G. Jan. 24, 1854. Coal Burner.
Reissue No. 1823, Nov. 22, 1864.
Construed to be for an improvement on a prior patented invention, *Perry v. Littlefield*, 17 Blatch., 272.
- 10459.** Palmer & Williams. Jan. 24, 1854. Harvester.
Construed, sustained and held infringed, *Seymour v. Osborne*, 11 Wall., 516. Held not infringed, *Ibid.*, 3 Fish., 555.
- 10467.** Boughton, E. Jan. 31, 1854. Cultivator.
Held to be a patentable combination of old elements, *Boughton, In re*, 1 MacA. Pat. Cases, 278.
- 10477.** Lull & Porter. Jan. 31, 1854. Shutter Hinge.
Construed in view of state of art; single claim held to be in effect two claims, one of which is infringed, *Lull v. Clark*, 22 O. G., 1535. See, also, *Lull v. Clark*, 20 Fed. Rep., 454.
- 10597.** Johnson, W. H. March 7, 1854. Sewing Machine.
Reissue No. 355, Feb. 26, 1856.
Construed, *Johnson v. Root*, 1 Fish., 351. Third claim construed, *Ibid.*, 2 Cliff., 108.
- 10741.** Meyer, L. O. P. April 4, 1854. Vulcanizing Caoutchouc.
Reissue No. 797, Aug. 16, 1859.
Identity of reissue and original doubted; held infringed, *Poppenhusen v. Falke*, 4 Blatch., 493. Construed to cover more than original; sustained and infringed, *Ibid.*, 5 Blatch., 47. Construed and infringed, *Poppenhusen v. New York Gutta-percha Co.*, 2 Fish., 62. Not infringed, *Ibid.*, 4 Blatch., 253. See, also, *Ibid.*, 4 Blatch., 184.
- 10903.** Baker, W. May 16, 1854. Clapboard Joint.
Reissue No. 3268, Jan. 19, 1869.
Construed; invalid for want of invention and unpatentable subject-matter as to novelty and utility, *Everett v. Thatcher*, 2 Flip., 234.
- 10965.** Meyers & Eunson. May 23, 1854. Sewing Machine.
Construed and held novel; first claim wanting in novelty; first, second and third claims infringed by mechanical change, *Myers v. Frame*, 8 Blatch., 446. Void for duplication of part not involving invention, *Dunbar v. Myers*, 94 U. S., 187. Second claim infringed by device different in form and construction, but having same function and mode of operation, *Myers v. Duker*, 1 B. & A., 535. See, also, *Myers v. Dunbar*, 8 O. G., 321; *Eunson v. Dodge*, 18 Wall., 414; *Peck v. Frame*, 9 Blatch., 194; 5 Fish., 211; *Emerson v. Simm*, 6 Fish., 218.
- 10967.** Steadman, T. S. May 23, 1854. Harvester.
Reissue Nos. 985 and 986, June 19, 1860.
Abandoned and not infringed, *Whitely v. Swayne*, 7 Wall., 685. Not for same invention as original; invalid for want of proper oath, *Ibid.*, 4 Fish., 117.
- 10974.** Singer, I. M. May 30, 1854. Sewing Machine.
Construed and infringed, *Singer v. Walmsley*, 1 Fish., 580.
- 10975.** Singer, I. M. May 30, 1854. Sewing Machine.
Construed and infringed, *Singer v. Walmsley*, 1 Fish., 580.
- 11113.** Bartholomew, F. H. June 20, 1854. Valve-governor for Water-closets.
Bartholomew v. Sawyer, 4 Blatch., 347.
- 11125.** Howes, F. June 20, 1854. Extra Yard for Topsails.
Held novel, valid, with sufficient specification and description, *Howes v. Nute*, 4 Cliff., 173.
- 11343.** Watt & Burgess. July 18, 1854. Paper Pulp Manufacture.
Reissue No. 1448, April 7, 1863. Product.
Void for want of novelty, *American Wood-paper Co. v. Fibre Disintegrating Co.*, 6 Blatch., 27; *v. Heft*, 3 Fish., 316; *Wood-paper Patent*, 23 Wall., 566.
Reissue No. 1449, Apr. 7, 1863. Process.
Void for want of identity with original, *American Wood-paper Co. v. Fibre Disintegrating Co.*, 6 Blatch., 27. *Wood-paper Patent*, 23 Wall., 566. Illegal, void and wanting in novelty, *American Wood-paper Co. v. Heft*, 3 Fish., 316. See, also, *American Wood-paper Co. v. Glens Falls Co.*, 8 Blatch., 513; *v. Heft*, 4 Wall., 333.
- 11376.** Hunt, W. July 25, 1854. Shirt Collar.
Reissue No. 1828, Nov. 29, 1864.
Sustained and infringed, *Union Paper Collar Co. v. Van Deusen*, 10 Blatch., 109. See, also, *Union Paper Collar Co. v. White*, 7 O. G., 698, 877; 34 Leg. Int., 143.

11491. Nicolson, S. Aug. 8, 1854. Wooden Pavement.

Reissue No. 1583, Dec. 1, 1863.

Construed to be for a combination and not infringed, *Nicolson Pavement Co. v. Hatch*, 4 Sawyer, 692.

Reissue No. 2748, Aug. 20, 1867.

Construed, held novel; not abandoned by prior public experimental use; valid and infringed, *American Nicolson Pavement Co. v. City of Elizabeth*, 6 Fish., 424. Construed and held novel, *City of Elizabeth v. Pavement Co.*, 97 U. S., 126. See, also, *American Nicholson Pavement Co. v. City of Elizabeth*, 4 Fish., 189; 6 O. G., 764; *v. Jenkins*, 14 Wall., 452; *Jenkins v. Pavement Co.*, 1 Abb., 567; *Bigelow v. City of Louisville*, 3 Fish., 602.**11608.** Hayward, D. Aug. 29, 1854. India Rubber Manufacture.

Reissue No. 3531, July 6, 1869.

Construed to be for same invention as original; limited and held valid; reissued by proper person (assignee), *Carew v. Boston Elastic Fabric Co.*, 3 Cliff., 356; *Ibid.*, 1 Holmes, 45.**11638.** Bray, B. Sept. 5, 1854. Spring Roller.Construed to be for a novel combination and sufficiently described, *Bray v. Hartshorn*, 1 Cliff., 538.**11766.** Tilghman, R. A. Oct. 3, 1854. Purifying Fat Bodies.Held novel; valid in view of prior decision to that effect and in view of extension; infringed, *Tilghman v. Mitchell*, 9 Blatch., 18. Construed and infringed by use of lower temperature and more time in process, *Ibid.*, 9 Blatch., 1. Construed to be for a process embodying a new principle, and not for a principle; held novel; valid and infringed by adopting the principle to an available and practical extent, *Tilghman v. Werk*, 1 Bond, 511.Held sufficiently described; patentee first and original inventor and process infringed, *Tilghman v. Mitchell*, 2 Fish., 518. Construed strictly, and limited in view of specification; utility doubted, and held not infringed, *Mitchell v. Tilghman*, 19 Wall., 289. Construed broadly in view of patentee being first in the art; sustained as for a process and infringed, *Tilghman v. Proctor*, 102 U. S., 707.**11805.** Barnum, D. Oct. 17, 1854. Machinery for Forming Hat Bodies.In interference, *Hopkins v. Barnum*, 1 MacA. Pat. Cases, 334.**11820.** Richardson, J. Oct. 17, 1854. Pencil Case.Awarded priority on interference, *Richardson v. Hicks*, 1 MacA. Pat. Cases, 335.**11838.** Renton, J. Oct. 24, 1854. Making Wrought Iron Direct from the Ore.In interference, *Whipple v. Renton*, 1 MacA. Pat. Cases, 332.**11858.** Evarts, H. H. Oct. 31, 1854. Shingle Machine.Construed; third claim; literally for a result; sustained as for the mechanism by which the result is obtained, and not infringed by different intermediate mechanism of inventor leading up experimentally to the patented machine, *Evarts v. Ford*, 6 Fish., 587.**11928.** Bell, Wm. Nov. 14, 1854. Lamp Cap.Held operative and awarded priority on interference, *Bell v. Hill*, 1 MacA. Pat. Cases, 351.**11971.** Parham, C. Nov. 21, 1854. Sewing Machine.

Reissue No. 1562, Nov. 3, 1863.

Construed and sustained; first claim held patentable, novel and not anticipated by abandoned experiments; first and second claims infringed, *Parham v. American Button-hole, etc., Co.*, 4 Fish., 468.**12015.** Robertson, J. W. Nov. 28, 1854. Sewing Machine.Ellithorpe *v. Robertson*, 4 Blatch., 307. Patent denied for laches, on interference, *Same v. Same*, 1 MacA. Pat. Cases, 585. Above affirmed, *Same v. Same*, id., 634.**12017.** Allen, A. H. Dec. 5, 1854. Seats for Public Halls.

Reissue No. 1126, Jan. 15, 1861.

Is for same invention as original; valid and infringed; *Allen v. City of New York*, 17 Blatch., 350. See, also, *Allen v. Mayor, etc.*, 18 Blatch., 239; *v. City of Brooklyn*, 8 Blatch., 535; *Hayward v. Andrews*, 12 Fed. Rep., 786; 106 U. S., 672; *v. City of St. Louis*, 3 McCrary, 614.**12044.** Wheeler, C., Jr. Dec. 5, 1854. Harvester.

Reissues Nos. 875, 877, 878, 879, Jan. 3, 1860.

Construed, held novel and infringed, *Wheeler v. Clipper Mower & Reaper Co.*, 10 Blatch., 181; *v. McCormick*, 11 Blatch., 334.

Reissue No. 2610, May 14, 1867.

Construed and held infringed, *Ibid.*; *Ibid.*; *Wheeler v. McCormick*, 8 Blatch., 267.**12116.** Wilson, A. B. Dec. 19, 1854. Sewing Machine.*Grover & Baker Sewing Machine Co. v. Sloat*, 2 Fish., 114; *Potter v. Muller*, 1 Bond, 601.

1855.

- 12175.** Winsor, J. S. Jan. 2, 1855. Weaver's Harness.
Reissue No. 5282, Feb. 11, 1873.
Fourth claim held infringed by similar device in an English patent, *Kendrick v. Emmons*, 1 Holmes, 234; third, fourth and eighth claims infringed, *Ibid.*, 9 O. G., 201; *Kendrick v. Emmons*, 15 O. G., 936.
- 12227.** Camp, L. E. Jan. 12, 1855. Brass Kettle Manufacture.
Phelps v. Brown, 4 Blatch., 362.
- 12231.** Case, J. Jan. 17, 1855. Seed Planter.
Reissue No. 623, Nov. 16, 1858.
Claim construed to be for a combination, *Case v. Brown*, 1 Biss., 381. See, also, *Case v. Brown*, 2 Wall., 320.
- 12367.** Wheeler, C., Jr. Feb. 6, 1855. Harvester.
Reissue No. 2632, May 28, 1867.
Construed, sustained and infringed, *Wheeler v. Clipper Mower & Reaper Co.*, 10 Blatch., 181. Sustained; sixth and eighth claims infringed, *Wheeler v. McCormick*, 11 Blatch., 334.
- 12492.** Stainthorp, J. March 6, 1855. Candle Machine.
Construed, held novel, patentable, and infringed by use with an improvement, *Stainthorp v. Humiston*, 4 Fish., 107. Infringed, *Ibid.*, 2 Fish., 311. Construed, not anticipated by abandoned experiment; sustained, *Stainthorp v. Elkinton*, 1 Fish., 349. Construed, held novel, first claim infringed, *Stainthorp v. Humiston*, 1 Fish., 475. Construed, held novel, and infringed by colorable alteration, *Thayer v. Wales*, 9 Blatch., 170. See, also, *Thayer v. Wales*, 5 Fish., 448.
- 12530.** Schooley, J. C. March 13, 1855. Process for Curing Meats.
Construed in view of application papers admitted as evidence of intent, *Pike v. Potter*, 3 Fish., 55.
- 12535.** Cunningham, E. March 13, 1855. Vapor Apparatus.
Held to be for a novel and patentable invention; fourth claim construed, sustained and infringed, *Munson v. Gilbert & Barker Mfg. Co.*, 18 O. G., 194. In interference, *Drake v. Cunningham*, 1 MacA. Pat. Cases, 378.
- 12550.** Harris, E. March 20, 1855. Lamp.
Held identical with interfering invention and awarded priority, *Nichols v. Harris*, 1 MacA. Pat. Cases, 362; *Nichols v. Harris*, 1 MacA. Pat. Cases, 302.
- 12648.** White, R. Apr. 3, 1855. Repeating Fire-arms.
Sustained as novel; patentee first and original inventor, *White v. Allen*, 2 Cliff., 224.
- 12649.** White, R. Apr. 3, 1855. Repeating Fire-arms.
Construed, held novel and infringed by use of an equivalent, *White v. Boker*, 3 Fish., 66.
- 12678.** Thompson, M. Apr. 10, 1855. Furnace for Wet Fuel.
Reissue No. 446, March 31, 1857.
Held to be for same invention as original and both claims valid, *Black v. Thorne*, 10 Blatch., 66. See, also, *Black v. Thorne*, 12 Blatch., 20; *v. Munson*, 14 Blatch., 265; *v. Hubbard*, 12 O. G., 842; *v. Thorne*, 111 U. S., 122.
- 12682.** Latta, A. B. Apr. 10, 1855. Steam Generator.
Construed, *Latta v. Shawk*, 1 Bond, 259.
- 12700.** Southworth, A. S. Apr. 10, 1855. Plate Holder for Camera.
Reissue No. 1049, Sept. 25, 1860.
Sustained in conformity with prior decisions and held not infringed, *Ormsbee v. Wood*, 3 Fish., 372. Patentee not first and original inventor, *Wing v. Schoonmaker*, 3 Fish., 607. Construed to be for a result, not a principle; patentee is first and original inventor; not abandoned; is for same invention as original, and infringed, *Wing v. Richardson*, 2 Cliff., 449. Void, claims being for different invention from original, *Wing v. Anthony*, 106 U. S., 142. See, also, *Wing v. Warren*, 5 Fish., 548.
- 12811.** Brown, G. W. May 8, 1855. Seed Planter.
Reissue No. 1091, Dec. 11, 1860.
First claim construed, limited and sustained; second claim incorrect; not infringed, *Brown v. Selby*, 2 Biss., 457. First claim void and anticipated; second claim for a double use, *Corn-Planter Patent*, 23 Wall., 181.
Reissue No. 1092, Dec. 11, 1860.
Claim held incorrect and not infringed, *Brown v. Selby*, 2 Biss., 457. Is not for patentable invention, *Corn-Planter Patent*, 23 Wall., 181.
Reissue No. 1093, Dec. 11, 1860.
Construed, and not infringed, *Brown v. Selby*, 2 Biss., 457. Not sustained, *Corn-Planter Patent*, 23 Wall., 181.

- Reissue No. 1094, Dec. 11, 1860.
Not infringed, *Brown v. Selby*, 2 Biss., 457. Construed to be for frivolous matter and not sustained, *Corn-Planter Patent*, 23 Wall., 181.
Reissue No. 1095, Dec. 11, 1860.
Construed, limited and not infringed, *Brown v. Selby*, 2 Biss., 457. Sustained and infringed, *Corn-Planter Patent*, 23 Wall., 181.
- 12857.** Conover, J. A. May 15, 1855. Wood-splitting Machine.
Construed to be for a combination of old elements, *Conover v. Roach*, 4 Fish., 12. Construed, *Conover v. Rapp*, 4 Fish., 57. Construed and held infringed; extension valid, *Johnson v. McCullough*, 4 Fish., 170. Held not anticipated by prior machine having a different arrangement and combination of the same elements, *Conover v. Mers*, 3 Fish., 386. Construed, and infringed by colorable change, *Conover v. Dohrman*, 6 Blatch., 60. Construed and infringed, *Johnson v. Onion*, 3 Hughes, 290. See, also, *Conover v. Mers*, 11 Blatch., 197; *Mers v. Conover*, 11 O. G., 1111.
- 12956.** La Baw, G. W. May 29, 1855. Miter Machine.
Reissue No. 3445, May 18, 1869.
Held to be for same invention as original; novel, and second claim infringed by substitution of well known equivalent, *La Baw v. Hawkins*, 6 O. G., 724. See, also, *La Baw v. Hawkins*, 2 B. & A., 561.
- 13118.** Steer, I. H. June 19, 1855. Making Nuts.
Wood v. Cleveland Rolling Mill, 4 Fish., 550. Awarded priority on interference, *Carter v. Carter*, 1 MacA. Pat. Cases, 388.
- 13145.** Tuck, J. H. June 25, 1855. Stuffing Box Packing.
Claim construed to be a double claim to a new article of manufacture; sustained in part and infringed, *Tuck v. Bramhill*, 6 Blatch., 95.
- 13258.** Gamble, J. K. & W. P. July 17, 1855. Railroad Draw.
Interference held properly declared; awarded priority, *Spain v. Gamble*, 1 MacA. Pat. Cases, 358.
- 13286.** Waters, C. July 17, 1855. Lantern.
Wanting in novelty, *Dennis v. Cross*, 3 Biss., 389.
- 13364.** Salisbury, E. July 31, 1855. Railway Cars — Excluding Dust from.
Awarded priority on interference, *Stephens v. Salisbury*, 1 MacA. Pat. Cases, 379.
- 13416.** Burrows, J. E. Aug. 15, 1855. White Oxide of Zinc Manufacture.
Limited in view of unsuccessful prior experiments to date of application, and held anticipated by patent founded on caveat filed and successful experiments prior to such date, *Burrows v. Lehigh Zinc Co.*, 1 B. & A., 529. Awarded priority on interference, *Burrows v. Wetherill*, 1 MacA. Pat. Cases, 315.
- 13499.** Ross, F. A. & Marshall. Aug. 28, 1855. Sewing Machine.
Reissue No. 1145, Feb. 26, 1861.
First and second claims construed in view of state of art to be for mere aggregation, wanting in invention, *Ross v. Wolfinger*, 5 O. G., 117.
- 13523.** Haines, J. Sept. 4, 1855. Harvester.
Reissue No. 545, April 13, 1858.
Commissioner of Patents v. Whiteley, 4 Wall., 523.
- 13563.** Bisbee, A. Sept. 18, 1855. Steam Gauge Cock.
Reissue No. 4027, June 11, 1870.
Sustained as a patentable substitution of material involving invention, and infringed by similar device of same material mixed with other matter, *Dalton v. Nelson*, 13 Blatch., 357.
- 13586.** Tompkins & Johnson. Sept. 18, 1855. Rotary Knitting Machine.
Reissue No. 963, May 15, 1860.
Construed and sustained, *Tompkins v. Gage*, 5 Blatch., 268.
- 13606.** Wickoff & Morrison. Sept. 25, 1855. Boring Machine.
Reissue No. 404, Oct. 14, 1856.
Farrington v. Board of Water Commissioners, 4 Fish., 216; *v. Gregory*, 4 Fish., 221.
- 13676.** Cook, J. M. Oct. 16, 1855. Dust Deflector.
Construed, sustained, and infringed by formal difference only, *Cook v. Howard*, 4 Fish., 269.
- 13802.** Sanford, D. W. C. Nov. 13, 1855. Refrigerator.
Reissue No. 455, April 21, 1857.
Construed, held wanting in novelty, *Roberts v. Buck*, 1 Holmes, 224. Construction approved, *Roberts v. Harnden*, 2 Cliff., 500. Claim construed to be for a combination, *Ibid.*, 2 Cliff., 500. Void for want of novelty, *Roberts v. Ryer*, 11 Blatch., 11. Held useful; construed to be for a double use, consisting in a more extended application; wanting in nov-

- elty, *Roberts v. Dyer* (or *Ryer*), 91 U. S., 150. Wanting in novelty, *Roberts v. Blake*, 3 O. G., 268.
- 13806.** Wetherill, S. Nov. 13, 1855. White Oxide of Zinc Manufacture.
Infringed, *Wetherill v. New Jersey Zinc Co.*, 5 O. G., 460; *Wetherill v. New Jersey Zinc Co.*, 1 B. & A., 485; *v. Passaic Zinc Co.*, 6 Fish., 50. Awarded priority on interference, *Jones v. Wetherill*, 1 MacA. Pat. Cases, 409.
- 13927.** Treadwell, D. Dec. 11, 1855. Cannon Manufacture.
Reissue No. 1272, Feb. 4, 1862.
Construed and wanting in novelty, *Treadwell v. Parrott*, 5 Blatch., 369.
- 1856.
- 14119.** Strong, Ross & Howe. Jan. 15, 1856. Weighing Scales.
Prime *v. Brandon Mfg. Co.*, 16 Blatch., 453; 3 B. & A., 191.
- 14133.** Hubbell, Wm. W. Jan. 22, 1856. Eccentric Explosive Shells.
Reissue No. 521, Jan. 19, 1858.
Patentee not first and original inventor; invention as described not operative, *Hubbell's Case*, 5 Ct. of Claims, 1.
- 14281.** Cornell, J. B. Feb. 10, 1856. Illuminating Vault Covers.
Held not to interfere with reissue No. 303 (original patent No. 4266), *Cornell v. Hyatt*, 1 MacA. Pat. Cases, 423.
- 14287.** Marquiss & Emerson. Feb. 19, 1856. Mole of Draining Plow.
Construed, *Hays v. Sulsor*, 1 Bond, 279.
- 14350.** Dorsey, O. March 4, 1856. Harvester Rake.
Reissue No. 2982, June 9, 1868.
Is for same invention as original; novel, sufficiently described, and infringed by formal difference only, *Dorsey Harvester Rake Co. v. Marsh*, 6 Fish., 387. See, also, *Dorsey Harvester Rake Co. v. Bradley Mfg. Co.*, 12 Blatch., 202.
- 14405.** Morris, J. C. March 11, 1856. Wood-bending Machine.
Reissue No. 1312, May 27, 1862.
Construed, held identical with original, novel and infringed, *Morris v. Royer*, 2 Bond, 66.
- 14447.** Dodge, C. March 18, 1856. Fire-place.
Construed to be for a combination; infringement doubted, *Dodge v. Card*, 1 Bond, 393.
- 14481.** Wellman, G. March 18, 1856. Carding Machine.
In interference, *Wellman v. Blood*, 1 MacA. Pat. Cases, 432.
- 14510.** Lyman, A. S. March 25, 1856. Cooling and Ventilating Rooms.
Reissue No. 5786, March 10, 1874.
Not anticipated by rejected and withdrawn application; first claim construed, held novel and infringed, *Lyman Ventilating, etc., Co. v. Lalor*, 12 Blatch., 303. Construed in accordance with prior decision and as to part claimed to be infringed; held wanting in novelty, *Lyman Ventilating, etc., Co. v. Chamberlain*, 10 O. G., 588.
- 14585.** Harrington, J. R. Apr. 1, 1856. Carpet Lining Machine.
Reissue No. 2415, Dec. 11, 1866. Product.
Validity doubted in view of withdrawal of application for product and taking of original patent on machine alone, *American Carpet Lining Co. v. Manhattan Carpet Lining Co.*, 20 O. G., 372.
- 14624.** Young, E. Apr. 6, 1856. Slate Frame.
In interference, *Justice v. Jones*, 1 MacA. Pat. Cases, 635.
- 14722.** Hosford, E. N. Apr. 22, 1856. Pulvulent Acid.
Reissue No. 2979, June 9, 1868.
First and second claims held wanting in novelty, *Rumford Chemical Works v. Lauer*, 10 Blatch., 122. First, second and third claims held invalid in view of prior decision; fourth claim infringed by sale of compound with intent to be combined so as to infringe, *Rumford Chemical Works v. Hecker*, 10 O. G., 289. See, also, *Rumford Chemical Works v. Hecker*, 11 O. G., 330; 11 Blatch., 552; *v. Vice*, 14 Blatch., 179; *Oliver, Finnie & Co. v. Rumford Chemical Works*, 25 O. G., 784; *Attorney-General ex rel. Hecker v. Rumford Chemical Works*, 9 O. G., 1062.
- 14740.** Sibley, H. H. Apr. 22, 1856. Tent.
Burns' Case, 4 Ct. of Claims, 113; *United States v. Burns*, 12 Wall., 246.
- 14818.** King, J. T. May 6, 1856. Washing Machine.
Held prior inventor, *King v. Gedney*, 1 MacA. Pat. Cases, 443.
- 14845.** Taylor, J. S. May 3, 1856. Machine for Sizing and Felting Hats.
Hawley v. Mitchell, 1 Holmes, 42; *Mitchell v. Hawley*, 3 O. G., 241.
- 14951.** Eames, C. T. May 27, 1856. Boot Trees.
Construed, *Eames v. Cook*, 2 Fish., 146.

- 15044.** Mann, H. F. June 3, 1856. Harvester.
Reissue No. 4281, Feb. 28, 1871.
Fourth claim construed, limited, and held not infringed, *Mann v. Bayliss*, 10 O. G., 113; Same Case, *Ibid.*, 789.
- 15273.** Barber, H. B. July 8, 1856. Method of Drawing Water from Wells.
Mowry v. Barber, 1 MacA. Pat. Cases, 563.
- 15292.** Halsey, J. E. July 8, 1856. Fire-arms.
Construed to be for a novel combination, *Halsey, In re*, 1 MacA. Pat. Cases, 459.
- 15474.** Carr, Wm. S. Aug. 5, 1856. Water-closet.
Reissue No. 978, June 12, 1860.
Held novel, valid, and infringed by colorable change only, *Blake v. McNab & Harlan Mfg. Co.*, 19 Blatch., 73. Third claim held, in view of state of art, not to involve patentable invention; not infringed if sustained, *Thompson v. Boisselier*, 31 O. G., 377; 114 U. S., 1.
- 15570.** Osborn, W. Aug. 19, 1856. Bonnet Pressing Machine.
Reissue No. 933, March 27, 1860.
Construed and held not infringed, *Doubleday v. Bracheo*, 2 Fish., 560.
Reissue No. 2257, May 29, 1866.
Construed and held infringed, *Doubleday v. Sherman*, 3 Fish., 369. See, also, *Doubleday v. Sherman*, 6 Blatch., 513; 8 Blatch., 45.
- 15687.** Cawood, J. D. Sept. 9, 1856. Anvil.
Construed; limited in view of state of art; validity sustained, *Cawood Patent*, 94 U. S., 695. Construed and limited in view of specification to specific device, *Turrill v. Railroad Co.*, 1 Wall., 491. Construed to be a patentable and novel modification of an old combination to produce a new result, *Turrill v. Illinois Central R. R.*, 3 Biss., 66. Construed, limited, and infringed by use of its essential parts, *Ibid.*, 3 Biss., 72. See, also, *Turrill v. Illinois Central R. R.*, 5 Biss., 344; *Illinois Central R. Co. v. Turrill*, 26 O. G. 917; *Turrill v. Illinois Central R. Co.*, 20 Fed. Rep., 912.
- 15693.** Gray, A. W. Sept. 9, 1856. Horse-power.
Reissue No. 1322, July 1, 1862.
Not infringed, *Gray v. Hulshizer*, 13 O. G., X, Jan. 15.
- 15753.** Ball, H. Sept. 23, 1856. Oven.
Reissue No. 4026. June 14, 1870.
Is for different invention from original and void, *Ball v. Langles*, 102 U. S., 128. Void for new matter, *Garneau v. Dozier*, 102 U. S., 230. Construed; third claim void, being for different invention from original, *Ball v. Withington*, 6 O. G., 933.
- 15957.** Thompson, G. Oct. 21, 1856. Caustic Alkali.
Reissues Nos. 2569, 2570 and 2571, Apr. 16, 1867.
Construed; held a patentable improvement in the art and infringed, *Penna. Salt Co. v. Gugenheim*, 3 Fish., 423. Process and product are for same invention as original, and involve invention, *Penna. Salt Mfg. Co. v. Thompson*, 5 Fish., 148. See, also, *Thompson v. Barry*, 2 Weekly Notes, 100; *v. Mendelsohn*, 5 Fish., 187; *Penna. Salt Co. v. Myers*, 1 Weekly Notes, 377.
- 16030.** Singer, I. M. Nov. 4, 1856. Sewing Machine.
Construed and infringed, *Singer v. Walmsley*, 1 Fish., 580. Held novel and valid; third claim is for patentable subject-matter; not abandoned and is infringed, *Singer v. Braunsdorf*, 7 Blatch., 521. Sustained, *Wickersham v. Singer*, 1 MacA. Pat. Cases, 645.
- 16094.** Louis, L. Nov. 18, 1856. Melodeon.
Hammond v. Mason & Hamlin Organ Co., 1 Holmes, 296; 92 U. S., 724.
- 16263.** Babcock, G. H. Dec. 23, 1856. Printing Press.
Held, on interference, subsequent to No. 22,611, *Babcock v. Degner*, 1 MacA. Pat. Cases, 607.

1857.

- 16364.** Cramer, J. P. Jan. 6, 1857. Cultivator Teeth.
Awarded priority on interference, *Clarke v. Cramer*, 1 MacA. Pat. Cases, 473.
- 16648.** Huson, E. Feb. 17, 1857. Wagon Gearing.
Reissue No. 6660, Sept. 28, 1875.
Construed and sustained, *Halsey v. Garlick*, 12 O. G., 1026.
- 16676.** Adams, C. Feb. 24, 1857. Keeper for Door Locks.
Construed; held novel; not prejudiced by delay during pendency of application arising out of error of office; is infringed, *Adams v. Jones*, 1 Fish., 527.
- 16700.** Woodward, D. A. Feb. 24, 1857. Solar Camera.
Reissue No. 2311, July 10, 1866.
Construed to be for a patentable arrangement and substitution of the elements of a combination; held novel and valid, *Woodward v. Dinsmore*, 4 Fish., 163.

- 16797.** Hicks, W. C. March 10, 1857. Fire-arms.
Reissue No. 3798, Jan. 18, 1870.
Claim construed to be for a combination and not a result; held valid and infringed, *Renwick v. Pond*, 10 Blatch., 39. Held valid; not anticipated by caveat, *Renwick v. Cooper*, 10 Blatch., 201.
- 16833.** Hayden, I. March 17, 1857. Cotton Cleaner.
Hayden v. Suffolk Mfg. Co., 4 Fish., 86.
- 16933.** Sloan, W. D. March 31, 1857. Lathe.
Infringed, *Whitney v. Rollstone Machine Co.*, 8 O. G., 908.
- 16956.** Davidson, C. H. & H. E. March 31, 1857. Syringe.
Reissue No. 1940, Apr. 25, 1865.
Sustained as novel; infringed by change of form, *Morey v. Lockwood*, 8 Wall., 230.
- 16961.** Barker, S. Apr. 7, 1857. Treating Moss for Mattresses.
Muscan Hair Mfg. Co. v. American Hair Mfg. Co., 4 Blatch., 174.
- 17023.** Chandler, T. A. Apr. 14, 1857. Pendulum Levels.
Held patentable, *Chandler v. Ladd*, 1 MacA. Pat. Cases, 493.
- 17082.** Douglass, A. Apr. 21, 1857. Bustles.
Awarded priority on interference, *Blackington v. Douglass*, 1 MacA. Pat. Cases, 622.
- 17184.** Rice, B. F. Apr. 28, 1857. Paper Bag Machine.
Reissue No. 920, March 6, 1860.
Second and fourth claims construed and held infringed, *Union Paper Bag Co. v. Nixon*, 1 Flip., 491. Sufficiently described; not void for new matter; claims construed to be for combinations to accomplish result, not for a principle, *Ibid.*, 6 Fish., 402. See, also, *Newell v. West*, 13 Blatch., 114; *Paper Bag Cases*, 105 U. S., 766.
- 17264.** Corbin & Martlett. May 12, 1857. Artificial Honey.
Construed to be for a new, useful and patentable composition of matter, *Corbin & Martlett, In re*, 1 MacA. Pat. Cases, 521.
- 17331.** Johnson, A. May 19, 1857. Fastening Metallic Coverings.
Reissue No. 4870, April 16, 1872.
Void for new matter, laches in reissuing; for want of novelty, *Johnson v. Flushing & North Side R. Co.*, 105 U. S. 539. Held, as construed by plaintiffs, to be for a different invention from original, *Ibid.*, 15 Blatch., 192.
- 17387.** Mellier, M. A. C. May 26, 1857. Paper Pulp.
Infringed by variation in degree of heat compensated for by prolonging the process; patent valid, extension invalid, *American Wood-paper Co. v. Glens Falls Paper Co.*, 8 Blatch., 513.
Claim construed as not limited to single substance mentioned; process held novel, and infringed by a process of several steps with one of which it is identical, *American Wood-paper Co. v. Fiber Disintegrating Co.*, 6 Blatch., 27. Held infringed by process employing heat and pressure below the minimum given, *Cadwalader, J.*; not infringed, *Grier, J.* *American Wood Paper Co. v. Heft*, 3 Fish., 316. See, also, *Buchanan v. Howland*, 5 Blatch., 151; *Anthony v. Carroll*, 9 O. G., 199.
- 17520.** Sarven, J. D. June 9, 1857. Carriage Wheel. Reissue No. 4116, Sept. 6, 1870. Second claim infringed, *Sarven v. Hall*, 11 Blatch., 295. Is for same invention as original; second claim is for a combination and infringed, *Ibid.*, 9 Blatch., 524.
- 17530.** Walsh, J. C. June 9, 1857. Gas Burner.
Held to involve patentable invention, *Walsh, In re*, 1 MacA. Pat. Cases, 530.
- 17602.** See ¶ 5, p. 752.
- 17665.** Burden, H. June 30, 1857. Horse Shoe Machine.
Second claim construed, and limited, in view of state of art, to mechanism, and held not to cover result of mechanism; is sufficiently described as limited, and not infringed. Sixth claim is infringed, *Burden v. Corning*, 2 Fish., 477.
- 17855.** Gale, Wm. S. July 21, 1857. Steam Packing.
Construed to be for an art; held novel and valid, *Poillon v. Schmidt*, 6 Blatch., 299.
- 17899.** Slawson, J. B. July 28, 1857. Fare Box.
Reissue No. 4240, Jan. 24, 1871.
Construed in view of disclaimer to be for addition to old fare box of a second window, and held void for non-invention and aggregation, *Slawson v. Grand St., etc., R. Co.*, 17 Blatch., 512. Construed to be for duplication not involving invention, *Ibid.*, 107 U. S., 649.
- 17916.** Carpenter, D. H. Aug. 4, 1857. Vapor Burner.
Hamilton v. Simons & Sample, 5 Biss., 77.
- 17990.** Whitaker & Reed. Aug. 11, 1857. Reaper.
Read v. Bowman, 2 Wall., 591.

- 17999.** Wagner, I. Z. Aug. 11, 1857. Brick Machine.
Construed to be for a patentable combination, Wagner, *In re*, 1 MacA. Pat. Cases, 510.
- 18083.** Cahoon, C. W. Sept. 1, 1857. Seeding Machine.
Reissue No. 554, May 17, 1858.
Claims construed, sustained and infringed, Cahoon *v.* Ring, 1 Cliff., 592.
- 18124.** Gambrill & Burgee. Sept. 1, 1857. Carding Machine.
Awarded priority on interference, Carroll *v.* Gambrill, 1 MacA. Pat. Cases, 581.
- 18249.** Robertson, T. J. Sept. 22, 1857. Hand Stamp.
Reissue No. 4675, Dec. 12, 1871.
Novelty sustained, Robertson *v.* Secomb Mfg. Co., 10 Blatch., 481. Sustained as practically useful, Robertson *v.* Hill, 6 Fish., 465. Held valid, Robertson *v.* Garrett, 10 Blatch., 490.
- 17602.** Woodward, E. F. June 16, 1857. Hoop Skirt.
Reissue No. 501, Sept. 29, 1857.
Construed, limited and not infringed, West *v.* Silver Wire & Skirt Mfg. Co., 5 Blatch., 477.
- 18526.** Allen, E. G. Oct. 27, 1857. Steam Gauge.
Awarded priority on interference, Farley *v.* National Steam Gauge Co., 1 MacA. Pat. Cases, 618.
- 18546.** Hebbard, A. Nov. 3, 1857. Ice Pitcher.
Is for a patentable and novel new combination applied to an old purpose, Hebbard, *In re*, 1 MacA. Pat. Cases, 543.
- 18635.** Griscomb & Denn. Nov. 17, 1857. Lime Kiln.
Additional Improvement, 192. Feb. 23, 1858.
Construed and infringed, Shelly *v.* Brannan, 2 Biss., 315.
- 18742.** Hayden, I. Dec. 1, 1857. Long Trunk for Cleaning Cotton.
Held valid, and not to have abandoned matter shown but not claimed, Suffolk Co. *v.* Hayden, 3 Wall., 315. See, also, Hayden *v.* Suffolk Mfg. Co., 4 Fish. 86; *v.* Great Falls Mfg. Co., 3 Fed. Rep., 519; *v.* Oriental Mills, 22 Fed. Rep. 103.
- 18770.** Rowe, S. Dec. 1, 1857. Machine for Making Brooms.
Pitcher's Case, 1 Ct. of Claims, 7.
- 18874.** Thompson, M. Dec. 15, 1857. Bagasse Furnace.
Held novel, Black *v.* Thorne, 10 Blatch., 66. See, also, Black *v.* Thorne, 7 O. G., 176; *v.* Hubbard, 12 O. G., 842; Black *v.* Thorne, 111 U. S., 122.
- 18975.** Jackson, S. E. & M. P. Dec. 29, 1857. Mowing Machine.
Reissue No. 3460, May 25, 1869.
Decreed good and valid; second and fourth claims infringed, Jackson *v.* Breck, 11 O. G., 112.

1858.

- 19074.** Collender, H. W. Jan. 12, 1858. Billiard Table Cushion.
Reissue No. 2511, March 19, 1867.
Held novel, useful; sustained and infringed, Collender *v.* Came, 4 Cliff., 393. Claim construed to be for the art, Collender *v.* Bailey, 13 O. G., 277.
- 19206.** Race & Matthews. Jan. 26, 1858. Hydrant Casing.
Reissue No. 4887, April 30, 1872.
Void for laches in reissuing, and for being for different invention from original by claiming individually the elements of the original combination, Matthews *v.* Boston Machine Co., 105 U. S., 54.
- 19283.** Kelsea, H. Feb. 2, 1858. Manufacture of Sewing Silk.
Awarded priority on interference, Hill *v.* Dunklee, 1 MacA. Pat. Cases, 475.
- 19347.** Chaffee, E. W. Feb. 16, 1858. Flexible Gum Mat.
Construed and held not infringed, Brown *v.* Rubber Step Mfg. Co., 13 O. G., 369.
- 19377.** Nishwitz, F. Feb. 16, 1858. Harvester.
Reissue No. 3372, Apr. 13, 1869.
First and second claims held valid and infringed, Sprague *v.* Adriance, 14 O. G., 308.
- 19412.** Dennis, P. Feb. 23, 1858. Cultivator.
Reissue No. 1515, Aug. 4, 1863.
First claim held wanting in novelty; second claim is for a combination, and not infringed by omission of one of its essential elements, Dennis *v.* Eddy, 4 Fish., 423. Construed and limited to the peculiar form, and infringed by substantial copy; second claim held not infringed, Eddy *v.* Dennis, 95 U. S., 560.
- 19490.** Cook, F. March 2, 1858. Bale Tie.
Third claim construed; held patentable subject-matter and infringed, McComb *v.* Brodie, 1 Woods, 153. Novelty sustained, and held, in view of state of art, to involve invention,

- McComb *v.* Beard, 10 Blatch., 350. Third claim held useful, novel, valid and infringed, Cook *v.* Ernst, 5 Fish., 396. Construed, McComb *v.* Ernst, 1 Woods, 195. Construed; infringed by sale of part with intent to be used for infringement, American Cotton Tie Co. *v.* Simmons, 106 U. S., 89.
- 19508.** Lewis, R. L. March 2, 1858. Boot Tree.
Construed to be for a combination of mechanical powers to effect a useful result, Eames *v.* Godfrey, 1 Wall., 78; Howe *v.* Newton, 2 Fish., 531; Godfrey *v.* Eames, 1 Wall., 317.
- 19637.** Howes & Throop. March 16, 1858. Grain Separator.
Reissue No. 4793, March 5, 1872.
First claim construed to be for a combination infringed by use of formal difference; second claim construed, and infringed; held to be for same invention as original and not abandoned, Howes *v.* McNeal, 15 Blatch., 103; *Ibid.*, 17 O. G., 799.
- 19747.** Boardman, B. March 30, 1858. Wire Staple.
Reissue No. 2183, March 6, 1866.
Construed to be for article of manufacture made by a particular process, and not anticipated by similar article not made by same process; compared with original, held novel and sustained, Rogers *v.* Sargent, 7 Blatch., 507.
- 19783.** Lippman, H. L. March 30, 1858. Lead Pencil and Eraser.
Construed, in view of state of art, and limited; validity, as involving patentable invention, doubted; is not infringed, Reckendorfer *v.* Faber, 12 Blatch., 68. Held to be for aggregation not involving invention, *Ibid.*, 92 U. S., 347.
- 19786.** Mason, J. L. March 30, 1858. Lathe Chuck.
Consolidated Fruit Jar Co. *v.* Whitney, 2 B. & A., 375.
- 19824.** Bigelow, E. Apr. 6, 1858. Syrup Caster.
Reissue No. 2406, Dec. 4, 1866.
First claim is for duplication of parts, not involving invention, Bigelow *v.* Matthews, 7 Blatch., 77.
- 19932.** Kidd, W. E. Apr. 13, 1858. Bonnet Frames.
Construed, Kidd *v.* Spence, 4 Fish., 37.
- 19956.** Spear, J. Apr. 13, 1858. Cooking Stoves.
In interference, Spear *v.* Belson, 1 MacA. Pat. Cases, 699.
- 19984.** Deuchfield, J. Apr. 20, 1858. Cooling and Drying Meal.
Reissue No. 4712, Jan. 17, 1872.
Construed to be for a novel and valid combination, and not an aggregation; identical with original and infringed, Herring *v.* Nelson, 14 Blatch., 292. Compared with original; valid where identical, invalid as to new matter, which consists in subdividing old combination claims into combination claims of a less number of elements, Gage *v.* Herring, 107 U. S., 640.
Not void for clerical office error; held novel, valid, and first claim infringed, Bignall *v.* Harvey, 18 Blatch., 353. See, also, Herring *v.* Gage, 15 Blatch., 124.
- 20159.** Jones, E. F. May 4, 1858. Lamp.
Reissue 648, Jan. 11, 1859.
Infringed by mere substitution, Jones *v.* Vankirk, 2 Fish., 586.
- 20249.** Birdsell, J. C. May 18, 1858. Clover Huller.
Reissue No. 1299, April 8, 1862.
Construed, held not too broad; is for a novel and patentable combination; valid and infringed, Birdsell *v.* McDonald, 1 Ban. & Ard., 165. Construed to be for a combination, Birdsell *v.* Hagerstown Agricultural Implement Co., 1 Hughes, 59. See, also, Birdsell *v.* Hagerstown Agricultural Implement Co., 1 Hughes, 64; 1 Ban. & Ard., 426; *v.* Shaliol, 112 U. S., 485; *v.* Perego, 5 Blatch., 251; Perrigo *v.* Spaulding, 12 O. G., 352.
- 20324.** Carpenter, D. H. May 25, 1858. Vapor Burner.
Hamilton *v.* Simons, 5 Biss., 77.
- 20519.** Storrs, L. B. June 8, 1858. Tailor's Pressing Machine.
Construed and infringed by formal variation, consisting in use of an equivalent. Storrs *v.* Howe, 4 Cliff., 388.
- 20542.** Blake, E. W. June 15, 1858. Stone Crusher.
Reissue No. 2145, Jan. 9, 1866.
Construed and infringed by employment of a mechanical equivalent, Blake *v.* Robertson, 11 Blatch., 237. Sustained as novel and for same invention as original, Blake *v.* Stafford, 6 Blatch., 195. Held novel and not anticipated by single prior machine seen twenty years before by a single witness; first and second claims infringed, Blake *v.* Eagle Works Mfg. Co., 3 Biss., 77.
Novelty of invention sustained, Blake *v.* Rawson, 1 Holmes, 200; *v.* Robertson, 94 U. S. 728. Sustained; held novel and valid, and infringed by improvement embodying it;

- Blake *v.* Robertson, 6 Fish., 509. See, also, Blake *v.* Greenwood Cemetery, 14 Blatch., 242; 16 Fed. Rep., 676; *v.* Boisselier, 16 O. G., 854.
- 20616.** Bantz, G. June 22, 1858. Furnace for Burning Wet Fuel.
Reissue No. 4731, Feb. 6, 1872.
Held valid; patentee prior inventor; construed and held infringed, Bantz *v.* Ellas, 6 O. G., 117. Void for being broader than original, and for unreasonable delay in reissuing, Bantz *v.* Frantz, 105 U. S., 160.
- 20681.** Mann, R. J. June 22, 1858. Hoop Skirts.
Construed, held novel and infringed, Doughty *v.* Day, 9 Blatch., 262.
- 20719.** Ketchum, W. F. June 29, 1858. Mowing Machine.
Reissue No. 4484, July 25, 1871.
Construed, in view of state of art, to be valid and for same invention as original, and is infringed, Ketchum Harvesting Machine Co. *v.* Johnston Harvester Co., 13 O. G., 178. Infringement by sale abroad of article made here, *Ibid.*, 19 Blatch., 367.
- 20775.** Blake, L. R. July 6, 1858. Sewing Machine.
McKay *v.* Dibert, 19 O. G., 1351; *v.* Mace, 23 Fed. Rep., 76.
- 21026.** Sampson, B. E. July 27, 1858. Horse Car Coupling.
Reissue No. 906, Feb. 21, 1860.
Second claim held valid and novel, Proctor *v.* Brill, 4 Fed. Rep., 415; Proctor *v.* Brill, 16 Fed. Rep., 791.
- 21029.** Sargeant, I. A. July 27, 1858. Clothes Wringer.
Reissue No. 2829, Dec. 31, 1867.
Construed to be for same invention as original; limited in view of state of art, and not infringed, Washing Machine Co. *v.* Tool Co., 1 Holmes, 161; 20 Wall., 242.
- 21059.** Blandy, H. & F. L. J. Aug. 3, 1858. Steam-engines.
Construed; patentee held inventor and not his workman; held novel and infringed, Blandy *v.* Griffith, 3 Fish., 609. Claim construed to be for a double use, Blandy, *In re*, 1 MacA. Pat. Cases, 552. See, also, Blandy *v.* Griffith, 6 Fish., 434.
- 21161.** Voelter, H. Aug. 10, 1858. Reducing Wood to Paper Pulp.
Reissue No. 4418, June 6, 1871.
Held novel and infringed, Miller *v.* Androscoggin Pulp Co., 1 Holmes, 142.
- 21172.** North, J. Aug. 10, 1858. Machine for Folding Paper.
Appleton *v.* Bacon, 2 Black, 699.
- 21286.** Waterman, H. Aug. 24, 1858. Tempering Wire and Steel.
Construed to be for a process, Waterman *v.* Thomson, 2 Fish., 461.
Reissue 1874, Feb. 14, 1865.
Waterman *v.* Wallace, 13 Blatch., 128.
- 21551.** Cole, R. H. Sept. 21, 1858. Nut Machine.
Construed to be for a patentable combination, Cole, *In re*, 1 MacA. Pat. Cases, 539.
- 21576.** Reichman, C. Sept. 21, 1858. Lamp.
Reissue No. 3082, Aug. 11, 1868.
Construed in view of state of art at date of original; limited and held not infringed; fourth claim wanting in novelty and void, Carlton *v.* Bokee, 17 Wall., 463.
- 21659.** Douglas, A. Oct. 5, 1858. Sewing Machine.
Reissue No. 5180, Dec. 10, 1872.
Wooster *v.* Taylor, 12 Blatch., 384; *v.* Seidenberger, 13 Blatch., 88; Thomson *v.* Wooster, 31 O. G., 913; 114 U. S., 104.
- 21712.** Whitcomb, G. Oct. 5, 1858. Hay Rake.
Reissue No. 2994, June 16, 1868.
Construed to be for a new and useful combination not in public use for more than two years prior to application; is valid and infringed, Brown *v.* Whittemore, 5 Fish., 524. Construed, sustained; fourth and fifth claims infringed, Edgerton *v.* Breck, 5 B. & A., 42. Void for public use more than two years prior to application, Edgerton *v.* Furst & Bradley Mfg. Co., 10 Biss., 402.
- 21717.** Stimpson, J. H. Oct. 5, 1858. Ice Pitcher.
Stimpson *v.* Rogers, 4 Blatch., 337.
- 21734.** Bartholomew, F. H. Oct. 12, 1858. Water-closet.
Held novel and infringed by a colorable change only, Blake *v.* McNab & Harlan Mfg. Co., 19 Blatch., 73. Claim 1 construed, and limited in view of state of art, and held not infringed, Thompson *v.* Boisselier, 31 O. G., 377; 114 U. S., 1.
- 21829.** Gordon, E. Oct. 19, 1858. Photographic Shield.
Construed, its novelty considered, Gordon *v.* Anthony, 16 Blatch., 234.
- 21856.** Steele, W. Oct. 19, 1858. Stave-cutting Machine.
Brammer *v.* Jones, 2 Bond, 100.

- 21879.** Henshaw, J. R. Oct. 26, 1858. Self-mousing Hook.
Reissue No. 2166, Feb. 6, 1866.
Is for same invention as original; construed, held novel, useful; patentee first and original inventor, and is infringed, *Middleton Tool Co. v. Judd*, 3 Fish., 141.
- 22018.** Davidson, C. H. Nov. 9, 1858. Lacteal Instrument.
Awarded priority on interference, *Davidson v. Lewis*, 1 MacA. Pat. Cases, 599.
- 22094.** Symmes, J. Nov. 16, 1858. Breech Loader.
Reissue No. 3946, May 3, 1870.
Construed to be for a combination of three elements and held wanting in novelty, *Roberts v. Schuyler*, 12 Blatch., 444.
- 22129.** Mason, J. L. Nov. 23, 1858. Moulds for Making Bottles.
Consolidated Fruit Jar Co. *v. Whitney*, 2 B. & A., 30; 2 B. & A., 375.
- 22157.** Brown, J. R. Nov. 30, 1858. Pipe Tongs.
Ashcroft v. Walworth, 1 Holmes, 152.
- 22186.** Mason, J. L. Nov. 30, 1858. Screw Neck Bottles.
Consolidated Fruit Jar Co. *v. Whitney*, 2 B. & A., 30; 2 B. & A. 375.
- 22356.** Fairclough, J. Dec. 21, 1858. Balancing Millstones.
Reissue No. 786, Aug. 2, 1859.
Wise v. Allis, 9 Wall., 737.
- 22439.** Matthew, D. Dec. 28, 1858. Locomotive Axle Bearing.
Matthew v. Penna. R. Co., 8 Fed. Rep., 45.

1859.

- 22532.** Lamoureaux, D. Jan. 4, 1859. Corsets and Bustles Manufacture.
Held valid on stipulation filed by both parties, *Foy v. Hunter*, 9 O. G., 542.
- 22539.** Allender, J. Jan. 11, 1859. Clothes Wringer.
Reissue No. 1934, Apr. 18, 1865.
First and fourth claims infringed, *Bailey Washing and Wringing Machine Co. v. Adams*, 3 B. & A., 96. Sustained; fifth and sixth claims novel and infringed, *Bailey Washing and Wringing Machine Co. v. Lincoln*, 4 Fish., 379. See, also, *Eureka Co. v. Bailey Co.*, 11 Wall., 488.
- 22611.** Degener, C. H. Jan. 11, 1859. Printing Press.
Awarded priority on interference with No. 16,263, *Babcock v. Degener*, 1 MacA. Pat. Cases, 607.
- 22697.** Bigelow, E. Jan. 25, 1859. Soda Water Apparatus.
Reissue No. 2711, Aug. 6, 1867.
Construed; first claim void for want of novelty; second and third claims sustained and infringed, *Bigelow v. Matthews*, 7 Blatch., 77.
- 22723.** Gersten, C. Jan. 25, 1859. Lamp.
Reissue No. 2765, Sept. 17, 1867.
Held not to involve patentable invention, *Dane v. Chicago Mfg. Co.*, 3 Biss., 380.
- 22787.** Dodge, P. Feb. 1, 1859. Stove.
Void for public use and sale of a single stove more than two years prior to application, *Henry v. Frankestown Soapstone Stove Co.*, 2 Fed. Rep., 78. Not abandoned by public use more than two years prior to application, *Ibid.*, 9 O. G., 408.
- 22859.** Dundas, J. Feb. 8, 1859. Cultivator.
Marsh v. Sayles, 2 O. G., 340.
Reissue No. 2380, Oct. 16, 1860, held anticipated by invention prior in date of conception and reduction to practice, *Sayles v. Hapgood*, 2 Biss., 189.
- 22990.** Taylor, L. Feb. 15, 1859. Mop Head.
Reissue No. 3682, Oct. 19, 1869.
Invention held novel; sufficient description; claims construed, and limited in view of state of art and of fraudulent intent in expanding them, and held not infringed, *Taylor v. Garretson*, 9 Blatch., 156.
- 23001.** Porter, L. P. Feb. 15, 1859. Elastic Toy.
Held infringed, *New York Rubber Co. v. Cahaskel*, 9 O. G., 923.
- 23033.** Lawton & Bliss. Feb. 22, 1859. Hose Coupling.
Construed and held not infringed, *Bliss v. Haight*, 7 Blatch., 7.
Reissue No. 3768, Dec. 21, 1869.
Construed in view of original, and sustained as valid, novel, and infringed, *Bliss v. Gaylord Mfg. Co.*, 7 Blatch., 279. Construed not for same invention as original and void, *Bliss v. City of Brooklyn*, 10 Blatch., 54. See, also, *Bliss v. City of Brooklyn*, 8 Blatch., 533.

- 26114.** Kirby, W. A. Nov. 15, 1859. Harvester.
Reissue No. 1211, July 9, 1861.
Construed, change in position of raker's seat held wanting in patentable invention and not novel. Kirby *v.* Beardsley, 5 Blatch., 438.
- 23263.** Putnam, H. W. March 15, 1859. Bottle Stopper.
Reissue No. 1606, Jan. 19, 1864.
Novelty of invention and validity of patent sustained, Putnam *v.* Hickey, 3 Biss., 157. Sustained for invention involving more than substitution of material; first claim construed and infringed, Putnam *v.* Weatherbee, 1 Holmes, 497. Construed; second, third and fourth claims held wanting in novelty; first claim construed to be for substitution or equivalent accomplishing a better result; held novel and infringed, Putnam *v.* Yerrington, 9 O. G., 689. Marking patented articles, Putnam *v.* Sudhoff, 1 B. & A., 198; Putnam *v.* Lomax, 10 Biss., 546.
- 23291.** Brodie, G. March 22, 1859. Bale Tie.
Reissue No. 5333, March 25, 1873.
Infringed by repairing article sold to be used but once, American Cotton Tie Supply Co. *v.* Bullard, 17 Blatch., 160. Construed, infringed by sale of part with intent to be used in infringing, American Cotton Tie Supply Co. *v.* Simmons, 106 U. S., 89. See, also, American Cotton Tie Supply Co. *v.* Simmons, 13 O. G., 967; *v.* McCready, 17 Blatch., 291.
- 23361.** Gallahue, A. C. March 29, 1859. Machine for Pegging Shoes.
Reissue No. 3517, June 22, 1869.
Second claim construed, sustained and infringed, Gallahue *v.* Butterfield, 10 Blatch., 232.
- 23694.** Monroe, E. P. Apr. 19, 1859. Egg-beater.
Reissue No. 1062, Oct. 16, 1860.
Second claim construed and held not infringed, Monroe *v.* Dover Stamping Co., 1 Holmes, 413.
- 23771.** Lockwood, W. E. Apr. 26, 1859. Cuffs and Collars.
Reissue No. 1980, June 6, 1865, and 1981, June 6, 1865.
Held invalid for want of patentable invention, Union Paper Collar Co. *v.* Van Deusen, 10 Blatch., 109.
Reissue No. 5259, Jan. 28, 1873.
Construed in view of state of art, and held wanting in patentable novelty, Union Paper Collar Co. *v.* Leland, 1 Holmes, 427.
- 23950.** Root, S. E. May 10, 1859. Clock Dial.
Reissue No. 6580, Aug. 3, 1875.
Construed in view of disclaimer to be for a mechanical contrivance merely, wanting in invention, Root *v.* Welch Mfg. Co., 17 Blatch., 478.
- 23957.** Spring, A. & C. May 10, 1859. Lathe.
Construed to be for application of an old machine to an analogous use not involving invention, and void for want of novelty, Howe Machine Co. *v.* National Needle Co., 21 Fed. Rep., 630. Sustained, not anticipated by prior abandoned experiment; held infringed, Spring *v.* Domestic Sewing Machine Co., 9 Fed. Rep., 505. Held wanting in novelty, Spring *v.* Packard, 8 O. G., 341; Spring *v.* Domestic Sewing Machine Co., 16 O. G., 721; 22 O. G., 1445.
- 24104.** Davis, Wm. May 24, 1859. Hominy Machine.
Combination claim held too broad and indefinite, Davis, *In re*, 1 MacA. Pat. Cases, 628.
- 24162.** Strong, Ross & Howe. May 24, 1859. Weighing Scales.
Prime *v.* Brandon Mfg. Co., 16 Blatch., 453; 3 B. & A., 191.
- 24307.** Jacobs, E. June 7, 1859. Construction of Prisons.
Held wanting in novelty, Jacobs *v.* Baker, 7 Wall., 295.
- 24720.** Chambers, M. July 12, 1859. Skirt Supporter.
Chambers, *In re*, 1 MacA. Pat. Cases, 641.
- 24734.** Goodale, W. July 12, 1859. Paper Bag Machine.
Subject-matter held to involve invention and not mere mechanical skill; is infringed, Union Paper Bag Machine Co. *v.* Pultz & Walkley, 15 Blatch., 160. Construed, *Ibid.*, 16 Blatch., 76. Construed and held infringed by a substantial equivalent, Union Paper Bag Machine Co. *v.* Murphy, 97 U. S., 120.
- 24748.** Masury, J. M. July 12, 1859. Paint Can.
Held novel, Masury *v.* Tiemann, 8 Blatch., 426. Construed, held novel and infringed, Masury *v.* Anderson, 11 Blatch., 162.
- 25061.** Tufts, O. Aug. 9, 1859. Elevator.
Construed and limited in view of state of art, and held not infringed, Tufts *v.* Boston Machine Co., 1 Holmes, 459.

25098. Cox, T. S. Aug. 16, 1859. Mole or Drain Plows.
Construed, *Cox v. Griggs*, 1 Biss., 362.
25148. Strong, Ross & Howe. Aug. 16, 1859. Weighing Scales.
Prime *v. Brandon Mfg. Co.*, 16 Blatch., 453; 3 B. & A., 191.
25235. Lauth, B. Aug. 23, 1859. Iron Manufacture.
Awarded priority on interference, *Savary v. Lauth*, 1 MacA. Pat. Cases, 691.
25418. Keen, M. L. Sept. 13, 1859. Paper Pulp Boiler.
Held not infringed, *American Wood-paper Co. v. Heft*, 3 Fish., 316; *v. Fiber Disintegrating Co.*, 6 Blatch., 27.
25484. Booth, J. L. Sept. 20, 1859. Grain Separator.
Reissue No. 1826, Nov. 29, 1864.
Held a patentable combination of old elements: sustained and infringed, *Booth v. Parks*, 1 Flip., 381. Held sufficiently described; novel; not abandoned, and infringed, *Parks v. Booth*, 102 U. S., 96. See, also, *Booth v. Seevers*, 19 O. G., 1140.
25534. Stearns, C. Sept. 20, 1859. Lightning Rod Machine.
Awarded priority on interference, *Stearns v. Davis*, 1 MacA. Pat. Cases, 696.
25701. Draper, J. Oct. 4, 1859. Hoop Skirt.
Reissue No. 870, Dec. 27, 1859.
Construed; limited and held infringed, *Doughty v. West*, 2 Fish., 553. Construed; sustained and infringed by an improvement, *Ibid.*, 6 Blatch., 429.
Reissue No. 2046, Aug. 1, 1865.
Doughty v. West, 4 Fish., 318.
25843. McQuinston, T. Oct. 18, 1859. Plow.
Reissue No. 4383, May 16, 1871.
Turnbull v. Weir Plow Co., 6 Biss., 225; 9 Biss., 334.
26013. Chase, L. C. Nov. 8, 1859. Buckles.
Reissue No. 1483, May 26, 1863.
Held wanting in novelty, *Chase v. Sabin*, 1 Holmes, 395.
26108. Jacobs, E. Nov. 15, 1859. Fastening for Jail Doors.
Held wanting in novelty, *Jacobs v. Baker*, 7 Wall., 295.
26114. See ¶ 1, p. 756.
26205. Robertson, T. J. W. Nov. 23, 1859. Sewing Machine.
First and second claims sustained as novel and second claim is infringed, *Dibble v. Augur*, 7 Blatch., 86. Claims construed, limited and not infringed, *Dibble v. Sibley*, 7 Blatch., 209.
26248. Brown, P. Nov. 29, 1859. Paint Can. *Brown v. Hall*, 6 Blatch., 401.
26329. Silverthorn, N. Nov. 29, 1859. Boot and Shoe Tip.
Reissue No. 3070, Aug. 4, 1868.
Sustained and held infringed, *American Shoe Tip Co. v. National Shoe Toe Protector Co.*, 11 O. G., 470.
26410. Blessing, Wm. Dec. 13, 1859. Seed Planter.
Construed and limited in accordance with patentee's intent as evidenced by application record, *Trader v. Messmore*, 7 O. G., 385.
26415. Conant, H. Dec. 13, 1859. Spool-winding Machine.
Construed and limited in order to be sustained; held novel, and first and third claims infringed, *Willimantic Linen Co. v. Clark Thread Co.*, 4 B. & A., 133. See, also, *Same v. Same*, 32 O. G., 1356.
26500. Jacobs, E. Dec. 20, 1859. Iron Plate Jails.
Jacobs v. Commissioners of Hamilton County, 1 Bond, 500.

1860.

26891. Cummings, G. N. Jan. 24, 1860. Spectacle Case Catch.
Construed; held not anticipated; sustained and is infringed, *Parker v. Remhof*, 17 Blatch., 206.
26901. Gold, W. L. Jan. 24, 1860. Steam-engine.
Claims construed to be for combinations of old elements, *Gould v. Rees*, 15 Wall., 187.
26904. Hubbell, Wm. W. Jan. 24, 1860. Projectiles for Fire-arms.
Patentee held first and original inventor as to part of device, *Hubbell's Case*, 5 Ct. of Claims, 1.
27094. Allen, E. Feb. 14, 1860. Cartridge Case Machine.
Reissue 1948, May 9, 1865.
Construed and held infringed, *Union Metallic Cartridge Co. v. United States Cartridge Co.*, 11 O. G., 1113. Construed and limited in view of disclaimer, *Ibid.*, 112 U. S., 624.

See, also, *Union Metallic Cartridge Co. v. United States Cartridge Co.*, 7 Fed. Rep., 344; 8 Fed. Rep., 446.

27222. Jacobs, E. Feb. 21, 1860. Prisons (joining plates of metal).

Held wanting in novelty, *Jacobs v. Baker*, 7 Wall., 295.

27898. Frink, I. P. Apr. 17, 1860. Reflector.

Reissues Nos. 3826 and 3827, Feb. 8, 1870.

Construed; sustained as novel and valid; 3827 held infringed, *Frink v. Petry*, 11 Blatch., 422.

27899. Fowler, F. F. Apr. 17, 1860. Hay Elevator.

Reissues Nos. 1869 and 1871, Feb. 14, 1865.

Sustained as properly reissued in divisional reissues, *Bennet v. Fowler*, 8 Wall., 445.

28016. Smith, I. R. Apr. 24, 1860. Cultivator.

Reissue No. 3932, Apr. 26, 1870.

Sufficiently described; valid and infringed, *Calkins v. Bertrand*, 6 Biss., 494. See, also, *Calkins v. Bertrand*, 8 Fed. Rep., 755.

28130. McKenzie, D. May 1, 1860. Baker's Oven.

Reissue No. 6397, April 20, 1875.

Construed and limited in view of state of art, and held not infringed, *Garneau v. Dozier*, 102 U. S., 230.

28139. Arnold, G. B. May 8, 1860. Sewing Machine.

Reviewed, *Magic Ruffle Co. v. Douglas*, 2 Fish., 330.

28181. Ingalls, E. T. May 8, 1860. Boot Burnishing Machine.

Construed and sustained, *Dodge v. Feary*, 8 Fed. Rep., 329. Held not infringed, *Sweetser v. Helms*, 10 O. G., 4.

28196. Richardson, F. B. & B. L. May 8, 1860. Syringe.

Held, in conformity with *Morey v. Lockwood*, 8 Wall., 230, not an infringement of Davidson's reissue, *Richardson v. Lockwood*, 4 Cliff., 128.

28244. Arnold, G. B. May 8, 1860. Ruffles.

Reviewed, *Magic Ruffle Co. v. Douglas*, 2 Fish., 330. See, also, *Magic Ruffle Co. v. Elm City Co.*, 13 Blatch., 151; 14 Blatch., 109.

28314. Swain, A. M. May 15, 1860. Turbine Wheel.

Reissue No. 5154, Nov. 19, 1872.

Construed and limited, in order to be sustained, to invention in original; not infringed as limited, *Swain Turbine Co. v. Ladd*, 102 U. S., 408. Construed and limited in view of original, in order to be sustained; fifth claim, literally functional, construed to include the means for effecting the result; not infringed as limited, *Ibid.*, 11 O. G., 153.

28482. Henderson, J. C. May 29, 1860. Coal Stove.

Reissue No. 3523, June 29, 1869.

Seventh claim, literally for a result, construed to be for the means whereby it is obtained; fifth, sixth and seventh claims held novel and infringed, *Henderson v. Cleveland Co-operative Stove Co.*, 12 O. G., 4.

28495. Lovatt, J. May 29, 1860. Skate.

Reissue No. 6369, April 6, 1875.

Construed, and limited to means specified and their equivalents; valid, and held infringed, *Turrell v. Spaeth*, 14 O. G., 377. See, also, *Turrell v. Spaeth*, 9 O. G., 1163; 8 O. G., 986; *v. Bradford*, 23 O. G., 1623.

28633. Fuller, H. W. June 5, 1860. Marking Cloth for Sewing Machine.

Construed, limited and sustained, *Fuller v. Yentzer*, 6 Biss., 203. Construed to be for a new and useful combination of old elements; sustained and not infringed, *Fuller v. Yentzer*, 94 U. S., 288; 94 U. S., 299.

28762. Merrill, R. S. June 19, 1860. Lamp.

Wanting in novelty; reissue refused, *Merrill, In re*, 1 MacArthur, 301.

28951. Allen, E. July 3, 1860. Revolver.

Reissue No. 1268, Feb. 4, 1862.

Held, on interference, subsequent in invention to No. 30,990, *Smith v. Allen*, 2 Fish., 572.

29221. Van Kirk, J. T. July 17, 1860. Lamp.

Jones v. Van Kirk, 2 Fish., 586.

29236. Bernot, E. July 24, 1860. File-cutting Machine.

Extended by special act beyond term of foreign patent to full domestic term, and again extended by patent office, sustained, *New American File Co. v. Nicholson File Co.*, 8 Fed. Rep., 816.

29282. Jacobs, E. July 24, 1860. Prisons.

Wanting in novelty, *Jacobs v. Barker*, 7 Wall., 295.

- 29534.** Whitney, B. D. Aug. 7, 1860. Lathe.
Whitney v. Rollstone Machine Works, 2 Ban. & Ard., 170.
- 29561.** Blake, L. R. Aug. 14, 1860. Boot and Shoe Manufacture. Process.
Reissue No. 9043, Jan. 13, 1880.
Invalid for want of patentability, McKay v. Jackman, 12 Fed. Rep., 615. See, also, McKay v. Dibert, 5 Fed. Rep., 587; v. McKnight, 5 Fed. Rep., 593; v. Mace, 23 Fed. Rep., 76; v. Scott Sole & Machine Co., 20 O. G., 372.
- 29562.** Blake, L. R. Aug. 14, 1860. Boots and Shoes. Product.
Infringed by manufacture of the product on a machine carrying out the expired patented process, MacKay v. Dibert, 5 Fed. Rep., 587. See, also, McKay v. Jackman, 12 Fed. Rep., 615; v. McKnight, 5 Fed. Rep., 593; v. Mace, 23 Fed. Rep., 76; v. Scott Sole & Machine Co., 20 O. G., 372.
- 29576.** Dunbar, H. D. Aug. 14, 1860. Pistons and Piston Packings.
Larabee v. Peoria, Pekin & Jacksonville R. Co., 3 Ban. & Ard., 180.
- 29649.** Flanders & Allen. Aug. 14, 1860. Leather Splitting Machine.
Found to have been abandoned, American Hide, etc., Machine Co., v. American Tool & Machine Co., 1 Holmes, 503.
- 29785.** Haskell, D. Aug. 28, 1860. Sewing Machine.
Held useful, patentable and infringed, Haskell v. Shoe Machinery Mfg. Co., 3 Ban. & Ard., 553.
- 29971.** Hayden, I. Sept. 11, 1860. Cotton Cleaner.
Held to be for a different invention from that in his prior patent; held valid and not abandoned, Suffolk Co. v. Hayden, 3 Wall., 315. See, also, Hayden v. Suffolk Mfg. Co., 4 Fish., 86.
- 30112.** Arnold, G. B. & A. Sept. 25, 1860. Sewing Machine.
Reviewed, Magic Ruffle Co. v. Douglas, 2 Fish., 330.
- 30140.** Hall, J. L. Sept. 25, 1860. Locks.
Hall v. Macneale, 107 U. S., 90.
- 30191.** Armstrong, H. G. Oct. 2, 1860. Paper-Bag Machine.
Infringed, Union Paper-Bag Machine Co. v. Binney, 5 Fish., 166.
- 30357.** Slemmon, M. G. Oct. 9, 1860. Plow.
Reissue No. 6131, Nov. 10, 1874.
Invalid for allowance of claims formally abandoned by disclaimer prior thereto, Leggett v. Avery, 11 Otto, 256.
- 30379.** Sibley, F. S. Oct. 9, 1860. Curling Hat Brims.
Doubleday v. Sherman, 8 Blatch., 45. Construed and held infringed, *Ibid.*, 3 Fish., 371.
- 30381.** Ambrose, J. E. Oct. 16, 1860. Lamps.
Reissue No. 6844, Jan. 11, 1876.
Is for a different invention from original, Miller & Co. v. Bridgeport Brass Co., 14 Blatch., 282. Void, being for a different invention from original and for delay in reissuing, *Ibid.*, 104 U. S., 350.
- 30441.** Graham, E. H. Oct. 16, 1860. Picker Staff Motion for Looms.
Reissue No. 2626, May 28, 1867.
Construed to be for a novel combination; sustained and infringed, Graham v. Mason, 4 Cliff., 88; Mason v. Graham, 23 Wall., 261. See, also, Graham v. Mason, 1 Holmes, 88.
- 30577.** Jones, J. L. Nov. 6, 1860. Truss Bridges.
First, third and sixth claims construed; infringement not found, Westlake v. Cartter, 6 Fish., 519.
- 30651.** Tyler, S. W. C. Nov. 13, 1860. Harvester.
Reissue No. 6609, Aug. 24, 1875.
Held novel and not infringed, Tyler v. Crane, 7 Fed. Rep., 775.
- 30685.** Moore, H. Nov. 20, 1860. Seed Drill.
Second and third claims construed and held not infringed, Moore v. Thomas, 3 Ban. & Ard., 113. See, also, Westcott v. Wayne Agricultural Works, 11 Fed. Rep., 298.
- 30990.** Smith & Wesson. Dec. 18, 1860. Revolver.
Held, on interference with No. 28,951, to be prior inventors, Smith v. Allen, 2 Fish., 572.

1861.

- 31133.** Stafford, D. S. Jan. 15, 1861. Corn Cultivator.
Conklin & Stafford, 1 MacArthur, 375.
- 31147.** Bell, A. J. Jan. 22, 1861. Steamboat Staging.
Infringed by use of improvement, Converse v. Cannon, 2 Woods, 7.
- 31187.** Neill, A. Jan. 22, 1861. Moulds for India Rubber Pencil Heads.
Patentee sustained as sole and not joint inventor, Ashcroft v. Cutter, 6 Blatch., 511.

- 31252.** McComb, J. J. Jan. 29, 1861. Bale Tie.

Construed; infringed by sale of part, with intent to be used in infringing, American Cotton Tie Supply Co. v. Simmons, 106 U. S., 89. Infringed by repair of article sold to be used once only, American Cotton Tie Supply Co. v. Bullard, 17 Blatch., 160. See, also, American Cotton Tie Supply Co. v. McCready, 17 Blatch., 291; v. Simons, 13 O. G., 967.

- 31626.** Richardson, F. B. March 5, 1861. Syringe.

Reissue No. 2005, June 20, 1865.

Held anticipated, Richardson v. Lockwood, 6 Fish., 454.

- 31734.** Nyce, B. M. March 19, 1861. Preserving Fruit.

Reissue No. 3252, Jan. 5, 1869.

Sustained, in view of identity with original, and is infringed, Chicago Fruit Co. v. Busch, 2 Biss., 472.

- 31736.** Piper, E. March 19, 1861. Preserving Fish.

Claim construed to be for an "art" or method; held novel and infringed, Piper v. Brown, 1 Holmes, 20. Broad claim construed, and held void for want of novelty, Piper v. Moon, 10 Blatch., 264. Construed to be for application of old process to new subject, not involving invention, Piper v. Moon, 91 U. S., 44; Brown v. Piper, 91 U. S., 37. See, also, Piper v. Brown, 1 Holmes, 196.

- 31819.** Moore, H. March 26, 1861. Seed Drill.

Sixth claim construed to be for multiplication of a device in a prior patent and not patentable, Moore v. Thomas, 3 Ban. & Ard., 13. See, also, Wescott v. Wayne Agricultural Works, 11 Fed. Rep., 298.

- 32180.** Chase, L. C. Apr. 30, 1861. Halter Ring.

Reissue No. 1514, July 28, 1863.

Construed, limited and held novel, Chase v. Wesson, 1 Holmes, 274.

- 32257.** Treadwell & Hailes. May 7, 1861. Stove.

Reissue No. 1397, Feb. 4, 1863.

Construed to be for a combination, and not infringed by an aggregation of some of the old elements claimed, Hailes v. Van Wormer, 7 Blatch., 443. Second claim held wanting in novelty; third and fourth claims not infringed; fifth claim for a combination, not infringed, *Ibid.*, 20 Wall., 353.

- 32331.** Yale, L., Jr. May 14, 1861. Locks.

Reissue No. 1470, Apr. 28, 1863.

Construed; first claim held wanting in novelty; second claim infringed, Yale & Greenleaf Mfg. Co. v. North, 5 Blatch., 455.

- 32370.** Howard, G. C. May 21, 1861. Paper Perforator.

Tappan v. National Bank Note Co., 4 Blatch., 509.

- 32441.** Tufts, O. May 28, 1861. Elevator.

First and second claims construed and held wanting in novelty, Tufts v. Boston Machine Co., 1 Holmes, 459.

- 32521.** Kirkham, W. S. June 11, 1861. Door Lock.

Reissue No. 1390, Jan. 27, 1863.

Patentee held not prior inventor, Coffin v. Ogden, 18 Wall., 120. Construed in order to be sustained as not for a function; held wanting in novelty, *Ibid.*, 7 Blatch., 61.

- 32845.** Turrell, G. B. July 16, 1861. Beer Cooler.

Turrell v. Cammerrer, 3 Fish., 462.

- 32904.** Stover, H. D. July 23, 1861. Planing Machine.

Claim 3, although inaccurate, construed in order to be sustained; held novel and infringed, Stover v. Halsted, 13 Blatch., 95.

- 32933.** Dahlgreen, J. A. Aug. 6, 1861. Cast-iron Ordnance.

Dahlgreen's Case, 16 Court of Claims, 30.

- 32984.** Dahlgreen, J. A. Aug. 6, 1861. Cast-iron Ordnance.

Dahlgreen's Case, 16 Court of Claims, 30.

- 32985.** Dahlgreen, J. A. Aug. 6, 1861. Cast-iron Ordnance.

Dahlgreen's Case, 16 Court of Claims, 30.

- 32986.** Dahlgreen, J. A. Aug. 6, 1861. Projectile.

Dahlgreen's Case, 16 Court of Claims, 30.

- 33270.** Spaulding, N. W. Sept. 10, 1861. Setting Teeth in Saws.

Reissue No. 1456, Apr. 21, 1863.

Spaulding v. Tucker, 4 Fish., 633; Tucker v. Spaulding, 13 Wall., 453; Spaulding v. Duff, 1 Sawyer, 702. Subject-matter held patentable, Spaulding v. Tucker, Deady, 649.

- 33370.** Sisson, W. Sept. 24, 1861. Stave Machine.

Held to have been in public use and on sale for more than two years prior to application, Sisson v. Gilbert, 9 Blatch., 185. See, also, May v. Chaffee, 2 Dill., 385.

- 33384.** King & Freese. Oct. 1, 1861. Bridge.
Reissue No. 2707, July 30, 1867.
Held novel and infringed, *King v. Hammond*, 4 Fish., 488.
- 33685.** Rouillion, A. A. Nov. 5, 1861. Bed Bottom.
Held wanting in novelty in view of similar prior device used for analogous purpose and of prior foreign publication. *Woven Wire Mattress Co. v. Whittlesey*, 8 Biss., 23.
- 33808.** Williams, I. F. Nov. 26, 1861. Flocking Machine for Rubber.
Reissue No. 4937, June 4, 1872.
Construed and limited in order to be sustained, and not infringed as limited, *Williams v. Barker*, 2 Fed. Rep., 649.
- 33978.** Blake, S. A. Dec. 24, 1861. Bonnets.
Construed, limited; held patentable and infringed, *Baldwin v. Bernard*, 9 Blatch., 509; *v. Shultz*, 9 Blatch., 494; 9 Blatch., 505.
- 34026.** Mann, B. A. Dec. 24, 1861. Skirt Machine.
Reissue No. 1518, Aug. 4, 1863.
Claims construed, limited; held novel and infringed, *Wilcox v. Komp*, 7 Blatch., 126.
- 34043.** Adams, T. W. Dec. 24, 1861. Hats.
Held novel and infringed by use of equivalent, *Mallory v. White*, 8 Blatch., 552.

1862.

- 34059.** Hubbell, Wm. W. Jan. 7, 1862. Explosive Shell.
Patentee held first and original inventor, and patent infringed, *Hubbell's Case*, 5 Court of Claims, 1.
- 34183.** Linville & Piper. January 14, 1862. Iron Truss for Bridges.
Construed and limited in view of claim and specification and held not infringed, *Keystone Bridge Co. v. Phoenix Iron Co.*, 95 U. S., 274; 5 Fish., 468.
- 34252.** Grosjean, F. Jan. 28, 1862. Spoons and Forks.
Reissue No. 2682, July 16, 1867.
Second claim held to involve invention; is not for a double use, and is novel, *Grosjean v. Peck, Stow & Wilcox Co.*, 11 Blatch., 54.
- 34377.** Smith, A. F. Feb. 11, 1862. Truck for Locomotives.
Construed and held novel, *Locomotive Engine Safety Truck Co. v. Erie R'y Co.*, 10 Blatch., 292. Construed in view of state of art to be for a combination, and not an aggregation or double use; held patentable, novel, not abandoned, valid and infringed, *Locomotive Engine Safety Truck Co. v. Pennsylvania R. Co.*, 1 Ban. & Ard., 470. Construed to be for an old contrivance applied in an old way to an analogous purpose; held wanting in invention and void, *Pennsylvania R. Co. v. Locomotive Safety Truck Co.*, 110 U. S., 490.
- 34476.** Bliss, W. H. Feb. 25, 1862. Hose Coupling.
Construed and held not infringed, *Bliss v. Haight*, 7 Blatch., 7.
- 34928.** Winslow, I. April 8, 1862. Canning Green Corn.
Held, in view of state of art, not to be for a patentable invention, *Jones v. Hodges*, 1 Holmes, 37. Held fully anticipated by English patent, *Jones v. Sewall*, 91 U. S., 171. Sustained; not abandoned by sale more than two years prior to application; held novel, *Jones v. Sewall*, 3 Cliff., 565. Construed in view of state of art, and held not infringed by omission of one step in process and the substitution of an entirely different step, *Jones v. Merrill*, 8 O. G., 401. See 35,274.
Reissue No. 7067, Apr. 18, 1876.
Jones v. McMurry, 13 O. G., 6.
- 34992.** Sykes, J. W. Apr. 15, 1862. Grain Elevator and Dryer.
Sykes v. Manhattan Elevator and Grain Drying Co., 6 Blatch., 496.
- 35030.** Lyon, J. W. Apr. 22, 1862. Padlock.
Second claim construed and limited to peculiar mechanism, in view of state of art, and not infringed, *Miller v. Smith*, 4 Ban. & Ard., 314.
- 35122.** Williams, I. A. Apr. 29, 1862. Locomotive Lamp.
Reissue No. 2133, Dec. 19, 1865.
Held novel, patentable and useful; claims construed to be for combinations and are infringed, *Williams v. Rome, Watertown, etc., R. Co.*, 15 Blatch., 200. Construed to be for construction and arrangement of old parts; fifth claim not novel, *Williams v. Boston & Albany R. Co.*, 17 Blatch., 21. See, also, *Williams v. Rome, Watertown & O. R. Co.*, 18 Blatch., 181.
- 35209.** Birdsell, J. C. May 13, 1862. Clover Huller.
Birdsell v. Hagerstown Agricultural Implement Mfg. Co., 6 O. G., 604; *v. McDonald*, 1 Ban. & Ard., 165; *Perrigo v. Spaulding*, 13 Blatch., 389.

35274. Winslow, I. May 13, 1862. Preserving Corn.

Novelty sustained; not abandoned by public use more than two years prior to application, *Jones v. Sewall*, 3 Cliff., 565. Construed in view of state of art, and held not infringed by omission of one step in process and substitution of an entirely different step, *Jones v. Merrill*, 8 O. G., 401. Held, in view of state of art, wanting in patentable invention, *Jones v. Hodges*, 1 Holmes, 37. Held fully anticipated by English patent, *Jones v. Sewall*, 91 U. S., 171. See 34,928.

Reissue No. 7061, Apr. 18, 1876.

Void, being for different invention from original, *Jones v. McMurry*, 2 Hughes, 527.

35315. Hoffheins, R. May 20, 1862. Harvester.

Reissue No. 2224, Apr. 10, 1866.

Construed, and claims 1, 8, 9, 11, 12, 14, 16 and 19 held not warranted by original, *Hoffheins v. Russell*, 107 U. S., 132.

35346. Winslow, I. May 20, 1862. Preserving Corn.

Novelty sustained; not abandoned by sale more than two years prior to application, *Jones v. Sewall*, 3 Cliff., 565. Held, in view of state of art, wanting in patentable invention, *Jones v. Hodges*, 1 Holmes, 37.

35348. Strong, Ross & Howe. May 20, 1862. Weighing Scales.

Prime *v. Brandon Mfg Co.*, 16 Blatch., 453; 3 Ban. & Ard., 191.

35390. Richards, J. May 25, 1862. Scroll-saw Guide.

Reissue No. 1527, Aug. 25, 1863.

Claim construed and held not infringed, *Fay & Co. v. Cordesman Bros.*, 25 O. G., 1277.

35582. Reeves, S. June 17, 1862. Construction of Columns, etc.

Not anticipated by incomplete invention embodied in drawings only, nor by a prior publication, *Reeves v. Keystone Bridge Co.*, 5 Fish., 456. See, also, *Reeves v. Keystone Bridge Co.*, 2 Ban. & Ard., 256.

35598. Fish, W. L. June 17, 1862. Lamp-chimney.

Reissue No. 7069, April 18, 1876.

Compared with original and held to be for same invention; is for a novel combination and not an aggregation; claims 1, 2 and 3 infringed, *Kerosene Lamp-heater Co. v. Littell*, 3 Ban. & Ard., 312. See, also, *Kerosene Lamp-heater Co. v. Fisher*, 5 Ban. & Ard., 78.

35842. Shaw, J. July 8, 1862. Apparatus for Saving Silver from Waste Solution.

Reissue No. 1651, April 5, 1864.

Claim construed to be for a result; held too vague and general, and invalid, *Shaw & Wilcox Co. v. Lovejoy*, 7 Blatch., 232.

35856. Horton, J. M. July 8, 1862. Augur Handle.

Reissue No. 4187, Nov. 29, 1870.

Construed; held novel and infringed, *Miller's Falls Co. v. Ives & Co.*, 14 Blatch., 169.

36065. Battey, W. P. Aug. 5, 1862. Gas Retort.

Prima facie case of infringement, *Wren v. Spencer Optical Mfg. Co.*, 5 Ban. & Ard., 61.

36107. Piper, E. Aug. 5, 1862. Preserving Animal Substances.

Piper v. Brown, 1 Holmes, 20; *v. Moon*, 91 U. S., 44; *Brown v. Piper*, 91 U. S., 37.

36163. McKay & Mathies. Aug. 12, 1862. Sewing Machine.

McKay v. Mace, 23 Fed. Rep., 76.

36266. Albertson, A. Aug. 26, 1862. Bottle Stopper.

Reissue No. 2386, Oct. 30, 1866.

Construed; limited to specific device and not infringed as limited, *Matthews v. Schoneberger*, 18 Blatch., 357. Construed and limited in view of state of art, in order to be sustained, *Matthews v. Chambers*, 6 Fed. Rep., 874.

36292. Gallahue, A. C. Aug. 26, 1862. Shoe-pegging Machine.

Construed; patentee held first and original inventor; is infringed, *Gallahue v. Butterfield*, 10 Blatch., 232.

36326. Winslow, I. Aug. 26, 1862. Preserving Corn.

Sustained, and held not abandoned by public use and sale more than two years prior to application, *Jones v. Sewall*, 3 Cliff., 565. Held wanting in patentable invention in view of state of art, *Jones v. Hodges*, 1 Holmes, 37. See 34,928; 35,274.

36495. Jones, N. Sept. 16, 1862. Shoe Lasts.

Claim construed to be for a "peculiar form." Held sufficiently described, novel and infringed, *Mabie v. Haskell*, 2 Cliff., 507.

36512. Du Bois, J. September 23, 1862. Pier for Bridge.

Claim 1 construed to be for device, not process. Claim 2 construed, *Du Bois v. Railroad Co.*, 12 Wall., 47. See, also, *Du Bois v. Philadelphia, Wilmington & B. R. Co.*, 5 Fish., 208.

- 36603.** Clissold, Wm. Oct. 7, 1862. Wool Lubricating Machine.
Reissue No. 2213, March 27, 1866.
Construed; claims 3 and 5 infringed by use of substantial equivalent, *Harwood v. Mill River Wool Mfg. Co.*, 3 Fish., 526.
- 36854.** Reckendorfer, J. Nov. 4, 1862. Pencil.
Reissue No. 3863, March 1, 1870.
Construed, limited; validity as for a patentable invention doubted; not infringed. *Reckendorfer v. Faber*, 12 Blatch., 68. Construed, held to be for aggregation not involving invention, *Ibid.*, 92 U. S., 347.
- 37033.** Crosby & Kellogg. Dec. 2, 1862. Crimping Machine.
Claim 2 infringed by use of substantial equivalent. Claim 4 infringed, *Tuttle v. Clafin*, 19 Fed. Rep., 599. See, also, *Elm City Co. v. Wooster*, 6 Fish., 452.
- 37037.** Firth & Ingham. Dec. 2, 1862. Flasks for Casting Iron Pipes.
Claim 1 construed to be for a novel combination of old parts; held not infringed by discarding one of the essential elements of the combination, *Smith v. Marshall*, 10 O. G., 375.
- 37052.** Palmer, C. H. Dec. 9, 1862. Repeating Gun.
Claim 1 construed, and limited to a combination consisting of three subcombinations. Held not infringed, *Palmer v. Gattling Gun Co.*, 19 Blatch., 392.
- 37124.** Baird, J. H. Dec. 9, 1862. Skirt Machine.
Examined, construed, held novel and claim 3 infringed, *Wilcox v. Komp*, 7 Blatch., 126.
- 37175.** Norton, M. P. Dec. 16, 1862. Hand Stamp.
Campbell v. Ward, 12 Fed. Rep., 150.

1863.

- 37317.** Cochrane, Wm. F. Jan. 13, 1863. Bolting Flour.
Reissue No. 5841, April 21, 1874.
Sustained and held infringed, *Cochrane v. Deener*, 94 U. S., 78. Held void for new matter, *American Middlings Purifier Co. v. Atlantic Milling Co.*, 5 Dill., 127. Sustained as novel and valid; infringement not shown, *Ibid.*, 4 Dill., 100. See, also, *Cochrane v. Deener*, 95 U. S., 355; *American Middlings Purifier Co. v. Christian*, 4 Dill., 448; *v. Vail*, 15 Blatch., 315.
- 37318.** Cochrane, Wm. F. Jan. 13, 1863. Bolting Flour.
Reissue No. 6030, Aug. 25, 1874.
Sustained and held infringed, *Cochrane v. Deener*, 94 U. S., 781. Held novel and valid; infringement not established, *American Middlings Purifier Co. v. Milling Co.*, 4 Dill., 100. See, also, *Cochrane v. Deener*, 95 U. S., 355; *American Middlings Purifier Co. v. Christian*, 4 Dill., 448; *v. Vail*, 15 Blatch., 315.
- 37319.** Cochrane, Wm. F. Jan. 13, 1863. Bolting Flour.
Held not infringed, *Cochrane v. Deener*, 94 U. S., 781. See, also, *Cochrane v. Deener*, 95 U. S., 355.
- 37320.** Cochrane, Wm. F. Jan. 13, 1863. Bolting Flour.
Held not infringed, *Cochrane v. Deener*, 94 U. S., 781. See, also, *Cochrane v. Deener*, 95 U. S., 355.
- 37321.** Cochrane, Wm. F. Jan. 13, 1863. Bolting Flour.
Reissues Nos. 6594 and 6595, Aug. 17, 1875.
Sustained and held infringed, *Cochrane v. Deener*, 94 U. S., 781. Validity and novelty sustained; infringement not shown, *American Middlings Purifier Co. v. Milling Co.*, 4 Dill., 100. See, also, *Cochrane v. Deener*, 95 U. S., 355; *American Middlings Purifier Co. v. Christian*, 4 Dill., 448.
- 37433.** Coe, C. W. Jan. 20, 1863. Drilling and Screw-cutting Machine.
Reissue No. 2487, Feb. 19, 1867.
Construed; is for a combination; is sufficiently described; held not anticipated; is valid and infringed; patentee held first and original inventor, *Bates v. Coe*, 98 U. S., 31.
- 37446.** Hull, L. Jan. 20, 1863. Machine for Cutting Caoutchouc.
Construed to be for the operation of an old machine in a different manner to produce a new result; held to be for the machine, not the art; is novel and not infringed, *Boston Elastic Fabric Co. v. East Hampton Rubber Co.*, 1 Holmes, 372.
Reissue No. 5903, June 2, 1874.
Held to have been in public use prior to discovery by patentee, *Ibid.*, 2 Ban. & Ard., 268.
- 37548.** Jasper, G. A. Jan. 27, 1863. Purifying and Cleansing Sugar.
Construed, *Union Sugar Refinery v. Matthiessen*, 3 Cliff., 639. See, also, *Union Sugar Refinery v. Matthiessen*, 3 Cliff., 146.

- 37550.** Pipo, J. A. Jan. 27, 1863. Ruffler.
Reissue No. 6565, July 27, 1875.
Held novel; claims 5, 7, 8 and 10 sustained and held infringed, *Wooster v. Blake*, 8 Fed. Rep., 429. Claims 1, 7 and 8 held invalid for twelve years' delay in reissuing, *Wooster v. Handy*, 21 Fed. Rep., 51. Claims 1, 7, 8 and 10 invalid, *Wooster v. Howe Machine Co.*, 21 Fed. Rep., 67. Claims 2, 4 and 5 infringed, *Wooster v. Clark*, 21 O. G., 264. See, also, *Wooster v. Howe Machine Co.*, 4 Ban. & Ard., 319.
- 37630.** Marsh, J. S. Feb. 10, 1863. Reaping Machine.
Reissue No. 2354, Sept. 11, 1866.
Result claim construed, and limited, in view of disclaimer and state of art, to be for specific combinations or for change of location with changes to adapt device thereto, and not infringed as limited, *Marsh v. Dodge & S. Mfg. Co.*, 6 Fish., 562.
- 37726.** Morgan, C. H. Feb. 17, 1863. Paper Bag Machine.
Union Paper Bag Machine Co. v. Nixon, 9 O. G., 691; 21 O. G., 1275.
- 37835.** Tuttle, W. G. March 3, 1863. Saw.
Held not infringed, *Hoe v. Simpson*, 1 Ban. & Ard., 420.
- 37941.** Welling, W. M. March 17, 1863. Martingale Ring.
Construed; held wanting in novelty and invention, *Rubber Coated Harness Co. v. Welling*, 97 U. S., 7. Liberally construed in view of state of art; is for a combination, and infringed by substitution of a known equivalent for one of its elements, *Welling v. Rubber Coated Harness Co.*, 1 Ban. & Ard., 282. Held to cover product; doubted whether it also covers process, *Ibid.*, 2 Ban. & Ard., 1.
- 38002.** Burrall, T. D. March 24, 1863. Corn Sheller.
Held insufficiently described, and wanting in novelty, *Burrall v. Rumsey*, 13 O. G., 123.
- 38015.** Tyler, C. N. March 24, 1863. Burning Fluid.
Tyler v. Boston, 7 Wall., 327.
- 38153.** Cowing, G. Apr. 14, 1863. Cylinder Polisher.
Cowing v. Rumsey, 8 Blatch., 36.
- 38175.** Norton, M. P. Apr. 14, 1863. Letter Stamp.
Reissue No. 4143, Oct. 4, 1870.
Construed in view of original and state of art. Claims 3 and 4 void for new matter or redundancy. Claims 1 and 2 limited and not infringed, *James v. Campbell*, 104 U. S., 356. Held to involve invention; to be novel, original, valid and infringed, *Campbell v. James*, 17 Blatch., 42. See, also, *Campbell v. James*, 18 Blatch., 92; 18 Blatch., 196; *v. Ward*, 12 Fed. Rep., 150; *v. James*, 5 Ban. & Ard., 630; *Secomb v. Campbell*, 5 Ban. & Ard., 632; 18 Blatch., 108; *Shavor's Case*, 4 Court of Claims, 440.
- 38200.** Bullock, Adams & Selden. Apr. 14, 1863. Printing Press.
Not invalidated by prior private knowledge and use of an incomplete machine; is novel, patentable and infringed, *Bullock Printing Press Co. v. Jones*, 3 Ban. & Ard., 195.
- 38206.** Heaton, C. W. S. Apr. 14, 1863. Defensive Ship Armor.
Limited to application of a particular device in a certain way, and not infringed by making the device for such use, but not applying it, *Heaton v. Quintard*, 7 Blatch., 73. Anticipated by prior publication, *Webb v. Quintard*, 9 Blatch., 352.
- 38389.** House, M. W. May 5, 1863. Electric Baths.
Held not infringed by defendant who justifies under a valid reissue of a prior patent, *House v. Young*, 3 Fish., 335.
- 38452.** Pettie, S. E. May 5, 1863. Paper Bag Machine.
Claims 8 and 9 wanting in novelty. Claim 3 is valid and not an alternative claim. Claims 1, 2 and 4 are infringed, *Union Paper Bag Co. v. Nixon*, 6 Fish., 402. Infringed by variation not involving invention, *Union Paper Bag Co. v. Binney*, 5 Fish., 166.
- 38519.** Waterman, N. May 12, 1863. Tray.
Held useful and sustained, *Doherty v. Haynes*, 4 Cliff., 291.
- 38664.** Evans, A. May 26, 1863. Paper Collar.
Reissue No. 2309, July 10, 1866.
Held void, *Union Paper Collar Co. v. Van Deusen*, 10 Blatch., 109. Is for different invention from the original and wanting in novelty, *Ibid.*, 23 Wall., 530.
- 38670.** Gilmore, J. T. May 26, 1863. Millstone Dressing.
Sustained over interfering patent No. 73,524, *Gilmore v. Golay*, 3 Fish., 522.
- 38694.** Murdock, J. G. May 26, 1863. Hydrant.
Reissue No. 3434, May 11, 1869.
Meyer v. Bailey, 2 Ban. & Ard., 73.
- 38713.** Merrill & Horner. May 26, 1863. Coffin Lids.
Adams v. Burks, 1 Holmes, 40; 17 Wall., 453.

- 38807.** Bosworth, C. F. June 9, 1863. Sewing Machine.
Reissue No. 7985, Dec. 11, 1877.
Construed in view of original and state of art; held novel as to claims 1, 2 and 3, and infringed, *Straw Sewing Machine Co. v. Eames*, 18 Blatch., 520.
- 38901.** Keen, M. L. June 16, 1863. Boiler for Making Paper Pulp.
Held not infringed, *American Wood-paper Co. v. Heft*, 3 Fish., 316, and *American Wood-paper Co. v. Fiber Disintegrating Co.*, 6 Blatch., 27.
- 38924.** Wicke, G. June 16, 1863. Box Nailing Machine.
Construed to be for a new combination of old devices, limited to specific mechanism, and held not infringed, *Wicke v. Ortrum*, 103 U. S., 461. See, also, *Wicke v. Kleinknecht*, 1 Ban. & Ard., 608.
- 38961.** Gray, S. S. June 23, 1863. Shirt Collars.
Reissue No. 1646, March 29, 1864.
Construed and held wanting in novelty, *Union Paper Collar Co. v. Van Deusen*, 10 Blatch., 109, and 23 Wall., 530.
- 38974.** Miller, H. June 23, 1863. Sheet Metal Can.
Reissue No. 7682, May 15, 1877.
Claim 1 construed to be for an aggregation of old elements and void. Claim 2 held to be included in claim 1 as an indispensable incident of the device there claimed and is void, *Combined Patents Can Co. v. Lloyd*, 11 Fed. Rep., 152.
- 38987.** Sands, T. June 23, 1863. Machine for Making Knitting Needles.
Reissue No. 1821, Nov. 15, 1864.
Sustained and held not infringed, *Sands v. Wardwell*, 3 Cliff., 277.
- 39027.** Atterbury, J. S. & T. B. June 30, 1863. Jelly Glass.
Atterbury v. Gill, 3 Ban. & Ard., 174.
- 39134.** Earle, T. July 7, 1863. Egg Beater.
Reissue No. 6542, July 13, 1875.
Broad claim held invalid, *Turner & Seymour Mfg. Co. v. Dover Stamping Co.*, 111 U. S., 319.
- 39210.** Black, A. S. July 14, 1863. Tempering Umbrella-ribs.
Claim 1 construed; held novel and infringed, *American Mfg. Co. v. Lane*, 14 Blatch., 438.
- 39235.** Leschot, R. July 14, 1863. Rock-drill.
Reissue No. 3690, Oct. 26, 1869.
Construed, *American Diamond Rock Boring Co. v. Sullivan Machine Co.*, 14 Blatch., 119. Is for same invention as original and infringed, *American Diamond Rock Boring Co. v. Sheldon*, 17 Blatch., 208. Claim 1 held enlarged and void for delay in reissuing; remaining claims are for more than the original invention and cover nothing that is infringed, *Ibid.*, 33 O. G., 1598. Held there was not inadvertence or mistake in original to justify the reissue in view of accuracy of the original specification and claims, *American Diamond Drill Co. v. Sullivan Machine Co.*, 21 Fed. Rep., 74. Held to be for a term of seventeen years, unlimited by prior foreign patent, *American Diamond Rock Boring Co. v. Sheldon*, 17 Blatch., 303. See, also, *American Diamond Rock Boring Co. v. Sheldon*, 18 Blatch., 50; *Steam Stone Cutter Co. v. Sheldon*, 15 Fed. Rep., 608.
- 39280.** Elwell, H. H. July 21, 1863. Knob-latch.
Reissue No. 3909, Apr. 5, 1870.
Declared valid, *Norwalk Lock Co. v. Berger*, 13 O. G., 47.
- 39535.** Treadwell & Hailes. Aug. 11, 1863. Base Burning Stove.
Claim 1 held to be for an aggregation wanting in invention, *Hailes v. Van Wormer*, 20 Wall., 353. Construed to be for a combination, and not infringed by an aggregation of some only of its elements, *Hailes v. Van Wormer*, 7 Blatch., 443.
- 39546.** Budding, B. O. Aug. 18, 1863. Heel-polishing Machine.
Construed and sustained, *Dodge v. Feary*, 8 Fed. Rep., 329. Held not infringed, *Sweetser v. Helms*, 2 Ban. & Ard., 263.
- 39702.** Reay, G. H. Aug. 25, 1863. Envelope Machine.
Reissue No. 2529, March 26, 1867.
Not infringed by sale of machine after expiration of patent, which was built during term according to understanding with patentee, *Reay v. Rau*, 15 Fed. Rep., 749. Claim 2 held valid and infringed, *Reay v. Berlin & Jones Envelope Co.*, 19 Fed. Rep., 311. Claim 2 construed, and held not infringed by change in the arrangement of parts, *Ibid.*, 20 Fed. Rep., 506. Claim 4 is for different invention from original and is too broad and void; invalid for three years' delay in reissuing. Claim 5 is for a function, and not patentable apart from the machinery. Claims 1, 2 and 10 are valid and infringed, *Reay v. Raynor*, 19 Fed. Rep., 308.

- 39889.** Crossman, C. P. Sept. 15, 1863. Caster.
Held infringed by improvement, *Star Salt Caster Co. v. Crossman*, 4 Cliff., 568. See, also, *Star Salt Caster Co. v. Crossman*, 3 Ban. & Ard., 281.
- 39910.** Foy, L. H. Sept. 15, 1863. Corset Skirt Supporter.
Reissue No. 2654, June 18, 1867.
Held valid on stipulation filed by both parties, *Foy v. Hunter*, 9 O. G., 542, and 9 O. G., 543.
- 40084.** Rose, I. M. Sept. 22, 1863. Marking Clothes in Sewing Machines.
Reissue No. 3218, Dec. 1, 1868.
Construed, limited and not infringed, *Fuller v. Yentzer*, 6 Biss., 203. Held not anticipated and not infringed, *Ibid.*, 94 U. S., 299.
- 40156.** Bing, J. Oct. 6, 1863. Shoe for Car-brakes.
Sustained, claims construed and held infringed, *National Car-brake Shoe Co. v. Lake Shore & Mich. S. R'y Co.*, 9 Biss., 503. Held not infringed by accidental resemblance in device intended for a different purpose, in the absence of evidence of intent, *National Car-Brake Shoe Co. v. D. L. & N. R. Co.*, 4 Fed. Rep., 224. Claim 2 construed as commensurate with real invention to be "substantially as specified in regard to the combination" claimed; is infringed and novel, *Lake Shore & Mich. S. R'y Co. v. National Car-brake Shoe Co.*, 110 U. S., 229. See, also, *National Car-brake Shoe Co. v. Terre Haute Car & Mfg. Co.*, 19 Fed. Rep., 514.
- 40221.** Chambers, Jr., C. Oct. 6, 1863. Brick Machine.
Chambers v. Smith, 5 Fish., 12.
- 40481.** Hoffheins, R. Nov. 3, 1863. Harvester.
Reissue No. 2490, Feb. 19, 1867.
Construed in view of original, and held that claims 1, 2, 6 and 7 are not warranted thereby; limited and held not infringed, *Hoffheins v. Russell*, 107 U. S., 132.
- 40507.** Sperry, J. Nov. 3, 1863. Manufacturing Boxes.
Sperry v. Logan, 3 Ban. & Ard., 260.
- 40515.** Tarr & Wonson. Nov. 3, 1863. Paint for Ship's Bottom.
Reissue No. 4598, Oct. 17, 1871.
Held wanting in novelty, *Tarr v. Webb*, 10 Blatch., 96. Limited in view of prior decision, and held not infringed, *Wonson v. Gilman*, 2 Ban. & Ard., 590.
Reissue No. 4599, Oct. 17, 1871.
Infringed by substitution of an equivalent, *Tarr v. Folsom*, 1 Holmes, 313. Held valid and novel, *Wonson v. Peterson*, 3 Ban. & Ard., 249.
- 40584.** Wardwell, J. G. Nov. 10, 1863. Stone Channeling Machine.
Reissues Nos. 2087 and 2088, Oct. 10, 1865.
Steam Cutter Co. v. Sheldon, 10 Blatch., 1; *Steam Stone Cutter Co. v. Shortsleeves*, 10 Blatch., 381; *v. Windsor Mfg. Co.*, 17 Blatch., 24; 18 Blatch., 47.
- 40590.** Taft, G. C. Nov. 10, 1863. Wrench.
Reissue No. 3483, June 1, 1869.
Construed, in view of state of art, to be for the mechanism described to effect the result stated, and not infringed by different means; not mechanical equivalents, although having a common object, *Coes v. Collins Co.*, 9 Fed. Rep., 905.
- 40777.** Teel, A. C. Dec. 1, 1863. Gate.
Reissue No. 2667, July 2, 1867.
Patentee held not to be first and original inventor, *Wright v. McMillan*, 13 O. G., 47.
- 40789.** Bergen, G. I. Dec. 1, 1863. Corn Planter.
Reissue No. 1935, April 18, 1865.
Claim 1 construed and not infringed, if limited in view of state of art; doubted if not void for want of utility. Claim 2 wanting in novelty, *McFarland v. Deere & Mansur Mfg. Co.*, 22 Fed. Rep., 781. Held not infringed in conformity with above decision, *McFarland v. Brown*, 22 Fed. Rep., 787.
- 40811.** Blaisdell, J. H. Dec. 8, 1863. Soda Water Apparatus.
Construed and limited in view of state of art, in order to be sustained, *Blaisdell v. Tufts*, 3 Ban. & Ard., 521. Claim 4 infringed, *Blaisdell v. Dows*, 4 Ban. & Ard., 499; *v. Puffer*, 4 Ban. & Ard., 500.
- 40874.** Wheeler, Z. Dec. 8, 1863. Amalgamator.
Birdsall v. Coolidge, 93 U. S., 64.
- 40964.** Tucker, H. Dec. 15, 1863. Bronzing or Coloring Iron.
Reissue No. 2355, Sept. 11, 1866. Process.
Construed to be for same invention as original; is novel, valid and infringed, *Tucker v. Tucker Mfg. Co.*, 4 Cliff., 397. Construed, and held not infringed by a similar process in which not sufficient oxide is used to obtain the same result, *Tucker v. Burditt*, 5 Ban. &

Ard., 220. Held not infringed by similar process in which the heat was not carried to the point of producing oxidation, *Tucker v. Corbin*, 5 Fed. Rep., 810.

Reissue No. 2356, Sept. 11, 1866. Product.

Held valid and infringed, *Tucker v. Dana*, 7 Fed. Rep., 213. Sustained as for a new article of manufacture, *Tucker v. Burditt*, 4 Ban. & Ard., 569. Both reissues sustained and held infringed, *Tucker v. Sargent & Co.*, 19 Blatch., 538.

1864.

41097. Sawyer, H. Jan. 5, 1864. Putting up, etc., Powders.

Reissue No. 2769, Oct. 1, 1867.

Held to be for a double use wanting in patentable invention, *Sawyer v. Bixby*, 9 Blatch., 361.

41214. Fuzzard, W. Jan. 12, 1864. Surface-sizing Fibrous Matter.

Reissue No. 1649, April 5, 1864.

Construed to be for a combination; limited and not infringed, *Fuzzard Wadding Mfg. Co. v. Dickinson*, 6 Blatch., 80.

41232. Ogborn & Free. Jan. 12, 1864. Grain Separator.

Schwarzel v. Holensshade, 2 Bond, 29.

41395. Reay, G. H. Jan. 26, 1864. Envelope Machine.

Held not infringed, *Reay v. Rau*, 15 Fed. Rep., 749.

41471. Bailey, T. H. Feb. 9, 1864. Valves.

Reissue No. 7886, Sept. 18, 1877.

Claim 2, if broadly construed, is wanting in novelty; not infringed, if limited, in view of state of art, *Blake v. City, etc., of San Francisco*, 113 U. S., 679.

41782. Pingree, S. W. March 1, 1864. Extracting Tan Bark.

Reissue No. 1922, March 28, 1865.

Construed to be for same invention as original; invalid for want of novelty, *Bridge v. Brown*, 1 Holmes, 53.

41788. Siemens, C. W. & F. March 1, 1864. Regenerator Furnace.

Reissue No. 3265, Jan. 12, 1869.

Patent term held expired, being limited to that of prior foreign patent, *Siemens v. Sellers*, 16 Fed. Rep., 856.

41887. Francis, L. March 8, 1864. Ink.

Reissue No. 3576, Aug. 3, 1869.

Construed, limited and sustained; no infringement proved, *Francis v. Mellor*, 5 Fish., 153.

41897. Hagan, W. E. March 8, 1864. Stove.

Reissue No. 1988, June 6, 1865.

Claim 1 held identical with original, and sustained as prior in invention to No. 45,803 on interference, *Gold & Silver Separating Co. v. United States Disintegrating Co.*, 6 Blatch., 307.

42126. Suggett, J. March 29, 1864. Pumps.

Construed to be for a combination of old principles, to effect a new and useful purpose. Found for defendant, *Haselden v. Ogden*, 3 Fish., 378.

42136. Woodman, C. T. March 29, 1864. Leather Ornamenting Machine.

Construed as to patentable invention and mechanical skill, in substitution of old elements, *Stimpson v. Woodman*, 10 Wall., 117. Construed and held not infringed, in view of above decision, *Woodman Pebbling Machine Co. v. Guild*, 4 Cliff., 185. Construed to be for a combination, and limited to the means described, *Woodman v. Stimpson*, 3 Fish., 98.

42153. Atwood & Holland. April 5, 1864. Sewing Silk Manufacture.

Belding v. Turner, 8 Blatch., 321; *Myers v. Dunbar*, 8 Blatch., 446.

42292. Johnson, A. F. April 12, 1864. Sewing Machine.

Reissue No. 6550, July 20, 1875.

Held novel, valid and infringed, *Thomas v. Shoe Machine Mfg. Co.*, 3 Ban. & Ard., 138.

42403. Robjohn, T. April 19, 1864. Band Ruffles.

Construed to be for an improvement in degree and held wanting in novelty, *Wooster v. Cahoun*, 11 Blatch., 215. See, also, *Wooster v. Blake*, 20 O. G., 158.

42520. Westlake, W. April 26, 1864. Lantern.

Reissue No. 3747, Nov. 23, 1869.

Held to be for a change in the relative position of parts, wanting in patentable invention, *Dane v. Chicago Mfg. Co.*, 3 Biss., 374. Construed to be for a combination, wanting in novelty, *Ibid.*, 7 O. G., 924.

42555. Budding, B. O. May 3, 1864. Heel-polishing Machine.

Held not infringed, *Sweetser v. Helms*, 2 Ban. & Ard., 263. See, also, *Dodge v. Feary*, 8 Fed. Rep., 329.

- 42572.** Fullam, A. I. May 3, 1864. Shearing Sheep.

Reissue No. 5701, Dec. 23, 1873.

Construed and held infringed, *Earle v. Harlow*, 2 Ban. & Ard., 264.

- 42580.** Holbeck & Gottfried. May 3, 1864. Pitching Barrels.

Construed to be for application of old contrivances to a new process, not involving patentable invention, *Gottfried v. Crescent Brewing Co.*, 9 Fed. Rep., 762. Declared invalid, *Ibid.*, 22 O. G., 1447. Sustained in accordance with above decision, *Gottfried v. Stahlmann*, 22 O. G., 1788. Held not infringed by repairing a licensed machine whose identity was maintained, *Gottfried v. Seipp Brewing Co.*, 10 Biss., 368.

Patentees held joint inventors; is novel, and not anticipated by abandoned experiment; construed to be for a patentable combination; is sufficiently described, and infringed, *Gottfried v. Phillip Best Brewing Co.*, 5 Ban. & Ard., 4. Held not anticipated by prior device producing same result by a different process; sustained and infringed by apparatus producing same result, but portable and differing in minor details, *Gottfried v. Bartholomae*, 8 Biss., 219. See, also, *Gottfried v. Miller*, 104 U. S., 521; 10 Fed. Rep., 471.

- 42591.** Moody, S. A. May 3, 1864. Corset.

Reissue No. 2165, Jan. 30, 1866.

Held useful and novel, *Moody v. Taber*, 1 Holmes, 325.

- 42842.** Day, S. F. May 24, 1864. Electro-magnetic Telegraph.

Reissue No. 3335, March 23, 1869.

Claim 2 construed, and held wanting in novelty, the principle of operation being the same, although constructed to produce a louder sound, *Day v. Bankers' & Brokers' Telegraph Co.*, 9 Blatch., 345.

- 42920.** Knibbs, J. May 24, 1864. Fire-engine Pump.

Held novel, and not abandoned by prior public experimental use; is valid and infringed, *Campbell v. Mayor of New York*, 9 Fed. Rep., 500. See, also, *City of Concord v. Norton*, 16 Fed. Rep., 477.

- 43009.** Cummings, J. A. June 7, 1864. Artificial Gums.

Validity doubted, in view of public use during eight years interval between application and grant, *Goodyear v. Hills*, 3 Fish., 134.

Reissue No. 1904, March 21, 1865.

Construed; sustained; held novel and infringed; not abandoned during pendency of application, *Goodyear Dental Vulcanite Co. v. Weatherbee*, 3 Cliff., 555. Construed to be for the described article produced by the described process, and held valid, *Goodyear Dental Vulcanite Co. v. Smith*, 1 Holmes, 354. Is for a patentable substitution of material involving invention, *Smith v. Goodyear Dental Vulcanite Co.*, 93 U. S., 486.

Construed to be infringed by use of substantial equivalents and by repairs which practiced the entire invention, *Goodyear Dental Vulcanite Co. v. Preterre*, 15 Blatch., 274. Construed to be for product made in the manner defined and not separate from process, and not infringed by celluloid plate, *Goodyear Dental Vulcanite Co. v. Davis*, 3 Ban. & Ard., 115, and 102 U. S., 222.

Construed; sustained, and held not infringed, *Goodyear Dental Vulcanite Co. v. Root*, 1 Ban. & Ard., 384. Sustained in conformity with prior adjudications, *Goodyear Dental Vulcanite Co. v. Willis*, 1 Flip., 388. Infringement not shown, *Goodyear Dental Vulcanite Co. v. Flagg*, 9 O. G., 153.

Construed; claim 1 is for patentable subject-matter, and is infringed by change, if any, of form, and not of substance. Patentee is first and original inventor, *Goodyear Dental Vulcanite Co. v. Gardiner*, 3 Cliff., 408. Sustained in conformity with supreme court decision, and held not infringed by use of celluloid, *Goodyear Dental Vulcanite Co. v. Brightwell, MacArthur & MacKay*, 74. See, also, *Goodyear Dental Vulcanite Co. v. Van Antwerp*, 2 Ban. & Ard., 252; *v. Osgood*, 2 Ban. & Ard., 529; *Gardner v. Goodyear Dental Vulcanite Co.*, 6 Fish., 329.

- 43192.** Francis & Lemate. June 21, 1864. Compound for Inking Rollers.

Reissue No. 2805, Nov. 26, 1867.

Construed as limited by disclaimer, and no infringement proved, *Francis v. Mellor*, 5 Fish., 153. See, also, *Francis v. Mahn*, 1 O. G., 51.

- 43371.** Prince, G. W. June 28, 1864. Tin Can.

Sustained, and held not anticipated, *Banker v. Bostwick*, 3 Fed. Rep., 517.

- 43378.** Bouvet, J. June 28, 1864. Metal Cans.

Reissue No. 1804, Nov. 1, 1864.

Examined; held valid and infringed, *De Florez v. Raynolds*, 14 Blatch., 505. Held not anticipated, *Ibid.*, 16 Blatch., 397. See, also, *De Florez v. Raynolds*, 17 Blatch., 436.

- 43462.** Brodie, J. July 5, 1864. Amalgating Barrels.

Sustained, *Brodie v. Ophir Quicksilver Mining Co.*, 5 Sawyer, 608.

- 43463.** Rousell, Delangre & Robin. July 5, 1864. Decorating Tin Plates.
Reissue No. 7556, March 13, 1877.
Construed to be for the substitution of old equivalent means for the production of possibly better but not different results; is invalid for undue expansion of original, *Flower v. Rayner*, 5 Fed. Rep., 793.
- 43516.** Marshall, W. C. July 12, 1864. Preserving Meat.
Reissues Nos. 6451 and 6452, May 25, 1875.
Patentability of subject-matter doubted. *Wilson Packing Co. v. Clapp*, 8 Biss., 154.
Held wanting in patentable invention and novelty. Is void, 8 Biss., 545.
- 43636.** Carr & Akin. July 26, 1864. Burrs for Knitting Machine.
Reissue No. 8391, Sept. 3, 1878.
Claim 1 construed, and limited in order to be sustained, to be for a patentable structure, and not infringed by making same device to be used in a different structure. Claims 2 and 3 construed and limited in view of original, *Campbell v. Kavanaugh*, 11 Fed. Rep., 83.
- 43669.** Clark, Wm. J. Aug. 2, 1864. Manufacture of Bolts.
Reissue No. 6291, Feb. 16, 1875.
Construed, limited, and not infringed as limited, *Clark v. Kennedy Mfg. Co.*, 14 Blatch., 79.
- 43851.** Howe, J. C. Aug. 16, 1864. Metallic Cartridges.
Construed and limited in view of state of art. Claims 1 and 2 infringed, *Forehand v. Porter*, 15 Fed. Rep., 256.
- 43858.** Morehouse, C. B. Aug. 16, 1864. Whip-sockets.
Reissue No. 5713, Dec. 30, 1873.
Construed to be for particular means and held not infringed, *Merriam v. Van Nest*, 3 B. & A., 209.
- 43979.** Destouy, A. Aug. 30, 1864. Metal Moldings.
Reissue No. 7609, Apr. 17, 1877.
Claim 3 invalid in view of thirteen years' delay in reissuing, *Combined Patents Can Co. v. Lloyd*, 11 Fed. Rep., 149.
- 43987.** Hall, C. Aug. 30, 1864. Chain-stretching Machine.
Sustained, and not anticipated by a single prior abandoned and publicly unknown machine. Claim construed and infringed, *Hall v. Bird*, 6 Blatch., 438.
- 44073.** Carter & Mets. Sept. 6, 1864. Extension Table Slide.
Reissue No. 4317, April 4, 1871.
Broadly construed is for substitution of material; invalid for want of invention; not infringed if limited, *Carter v. Messinger*, 11 Blatch., 34.
- 44129.** Walker, E. L. Sept. 6, 1864. Hay Elevator.
Reissue No. 2429, Dec. 18, 1866.
Held valid and infringed, *Nellis v. Pennock Mfg. Co.*, 22 O. G., 1131. See, also, *Nellis v. McLanahan*, 6 Fish., 286.
- 44249.** Wortendyke, J. B. Sept. 13, 1864. Machine for Cutting Paper for Twine.
Reissue No. 1825, Nov. 22, 1864.
Wortendyke v. White, 2 Ban. & Ard., 25.
- 44528.** Goddard, E. Oct. 4, 1864. Glue.
Reissue No. 4072, July 12, 1870.
Construed, and held wanting in patentable invention and novelty, *Milligan & Higgins Glue Co. v. Upton*, 97 U. S., 3. Construed to be for reducing the bulk of the article, and held wanting in patentable invention, *Ibid.*, 4 Cliff., 237.
- 44561.** Stilwell, E. R. Oct. 4, 1864. Feed Water Feeder.
Reissue No. 2160, Jan. 23, 1866.
Claim 1 construed and held not infringed, *Stilwell & Bierce Mfg. Co. v. Cincinnati Gas Light Co.*, 1 Ban. & Ard., 610.
Reissue No. 3618, Aug. 24, 1869.
Claims 1 and 2 construed. Claim 2 is for a combination producing a new result, not an aggregation; held novel and sufficiently described, *Ibid.*, 1 Ban. & Ard., 610.
- 44624.** Hartshorn, S. Oct. 11, 1864. Spring Fixture for Shades.
Reissue No. 2756, Aug. 27, 1867.
Construed and held infringed, *Hartshorn v. Almy*, 1 Holmes, 493. Infringed by patentable improvement embracing it, *Hartshorn v. Shorey*, 2 Ban. & Ard., 233. Not anticipated by single, similar prior forgotten device not designed to operate in the same way; sustained and infringed by an improvement, *Hartshorn v. Tripp*, 7 Blatch., 120. Void for delay in reissuing, *Hartshorn v. Eagle Shade Roller Co.*, 18 Fed. Rep., 90.

- 44684.** Albertson, A. Oct. 11, 1864. Bottle Stopper.
Construed; claims 1 and 2 held not infringed, *Matthews v. Schoneberger*, 18 Blatch., 356. See, also, *Matthews v. Chambers*, 6 Fed. Rep., 874.
- 44731.** Kelly, M. J. Oct. 18, 1864. Atmosphere Cooler.
Reissue No. 7643, April 24, 1877.
Construed in view of state of art; limited; sustained and infringed, *Bate Refrigerator Co. v. Toffey*, 6 Fed. Rep., 514. Claim 5 construed to be an enlarged claim for matter not omitted from original by inadvertence, and is invalid, *Bate Refrigerator Co. v. Eastman*, 32 O. G., 517.
- 44960.** Kittle, S. P. Nov. 8, 1864. Spring Mattress.
Reissue No. 2092, Oct. 17, 1865.
Claims 1 and 2 construed; held novel and infringed, *Kittle v. Frost*, 9 Blatch., 214.
- 45106.** Wood, J. Nov. 15, 1864. Car-brake Shoe.
Held not infringed, *National Car-brake Shoe Co. v. Boston & Albany R. Co.*, 15 Fed. Rep., 462.
- 45296.** Foy, L. H. Nov. 29, 1864. Corset Skirt Supporter.
Reissue No. 4831, March 26, 1872.
Held valid on stipulation filed by both parties, *Foy v. Hunter*, 9 O. G., 542, and 9 O. G., 543.
- 45334.** Moore, D. M. Dec. 6, 1864. Wrench.
Construed, and held not anticipated by prior device of same capacity but different structure; not abandoned by prior experimental use, *Sinclair v. Backus*, 4 Fed. Rep., 539.
- 45422.** McKay & Blake. Dec. 13, 1864. Sewing Machine.
McKay v. Mace, 23 Fed. Rep., 76.
- 45590.** Cross, R. & A. Dec. 27, 1864. Pail-graining Machine.
Construed to cover both the machine and particular design; sustained; claim 2 is for patentable matter, *Clark v. Bousfield*, 10 Wall., 133.
- 45647.** Shoup, W. Dec. 27, 1864. Oil Well Pump.
Held wanting in novelty, *Shoup v. Henrici*, 2 Ban. & Ard., 249.

1865.

- 45803.** Mason, M. B. Jan. 3, 1865. Desulphurizing Ores.
Claim 1 anticipated by No. 41,897, and declared void as interfering therewith, *Gold & Silver Separating Co. v. United States Disintegrating Co.*, 6 Blatch., 307.
- 45957.** Billings, W. B. Jan. 17, 1865. Coal Oil Stove.
Claims construed; claim 2 is for a double use, and is wanting in invention; claims 1, 2, 3 and 4 held wanting in novelty; claim 5 not infringed, *Couse v. Johnson*, 4 Ban. & Ard., 501.
- 45993.** Hoffman, J. H. Jan. 24, 1865. Paper Collar.
Reissue No. 2034, July 25, 1865.
Construed to be a new article of manufacture; novel and valid, *Hoffman v. Stiefel*, 7 Blatch., 58. Construed; held valid; involves invention, although all the elements are old; is infringed by substitution of equivalents and colorable evasion, *Hoffman v. Aronson*, 8 Blatch., 324.
- 46027.** Rogers, S. Jan. 24, 1865. Hay Elevator.
Reissue No. 2260, May 29, 1866.
Held valid and infringed, *Nellis v. Pennock Mfg. Co.*, 22 O. G., 1131. See, also, *Nellis v. McLanahan*, 6 Fish., 286.
- 46217.** Cross, J. R. Feb. 7, 1865. Packing for Oil Wells.
Reissue No. 7772, July 3, 1877.
Claims 1 and 2 construed and limited to original in order to be sustained; not infringed as limited, *Consolidated Oil Well Packer Co. v. Eaton*, 12 Fed. Rep., 865.
- 46300.** Johnston, S. Feb. 7, 1865. Harvester Rake and Reel.
Reissue No. 2951, March 26, 1868.
Dorsey Revolving Rake Harvester Co. v. Bradley Mfg. Co., 12 Blatch., 202.
- 46424.** Robjohn, T. Feb. 14, 1865. Ruffle Machine.
Reissue No. 6566, July 27, 1875.
Held novel; claims 8 and 9 construed and held infringed, *Wooster v. Blake*, 8 Fed. Rep., 429. Claims 8 and 9 held invalid for expansion, *Wooster v. Howe Machine Co.*, 21 Fed. Rep., 67, and *v. Handy*, 21 Fed. Rep., 51.
- 46495.** Potter, W. L. Feb. 21, 1865. Roofing Composition.
Reissue No. 2684, July 16, 1867.
Construed; held novel as limited by disclaimer; sustained and infringed, *Plastic Slate Roofing Co. v. Moore*, 1 Holmes, 167.

- 46507.** Taylor, W. B. S. Feb. 21, 1865. Flexible Tubing.
Construed; patentee held first and original inventor; infringed by substitution of known equivalent, *Taylor v. Archer*, 8 Blatch., 315.
- 46553.** Eickemeyer, R. Feb. 28, 1865. Machine for Stretching Hat Bodies.
Reissue No. 3217, Dec. 1, 1868.
Combination claims 2 and 3 held not anticipated by prior existing uncombined elements; held novel, and infringed by improvement, *Eickemeyer Hat Blocking Machine Co. v. Pearce*, 10 Blatch., 403.
- 46568.** Loewenberg. Feb. 28, 1865. Fabric for Hats.
Reissue No. 2587, Apr. 30, 1867.
Held not infringed, *Baldwin v. Shultz*, 9 Blatch., 494.
- 46615.** Brown, G. W. Feb. 28, 1865. Seed Planter.
Reissue No. 6384, April 20, 1875.
Construed, limited, and sustained as involving invention; is infringed, *Brown v. Deere & Co.*, 2 McCrary, 422. See, also, *Brown v. Deere & Co.*, 2 McCrary, 425.
- 46629.** Bergen, G. I. March 7, 1865. Corn Planter.
Claim 6 held to have been in public use and well known for more than two years prior to date of application, *McFarland v. Deere & Mansur Mfg. Co.*, 22 Fed. Rep., 781. Construed and held void in conformity with above decision, *McFarland v. Brown*, 22 Fed. Rep., 787.
- 46705.** Reynolds, H. A. March 7, 1865. Velocipede.
Reissue No. 8252, May 28, 1878.
Invalid, right to reissue having been abandoned by delay, *Pope Mfg. Co. v. Marqua*, 15 Fed. Rep., 400.
- 46871.** Bolton, J. March 21, 1865. Sewing Machine Tuck Marker.
Reissue No. 4196, Dec. 13, 1870.
Compared with original, and held invalid for enlargement of claim and for unreasonable delay of five years in reissuing, *Singer Mfg. Co. v. Goodrich*, 15 Fed. Rep., 455.
- 47107.** Hoffman, J. H. April 4, 1865. Paper Collar.
Hoffman v. Stiefel, 7 Blatch., 58.
- 47133.** Root, J. B. April 4, 1865. Oil Well Pump.
Novelty doubted; claim 2 construed and held wanting in novelty, *Doubleday v. Beatty*, 11 Fed. Rep., 729.
- 47135.** Seaver, C. April 4, 1865. Clasp for Pocket-books.
Construed; scope defined; held novel, valid and infringed, *Zinn v. Weiss*, 7 Fed. Rep., 914.
- 47385.** Bennet & Gibbs. April 25, 1865. Soap Manufacture.
Held useful, and infringed by a licensee from an owner of an unassignable shop-right, *Gibbs v. Hoefner*, 19 Fed. Rep., 323.
- 47458.** Roberts, E. A. L. April 25, 1865. Explosive.
Held novel and valid; claim 1 infringed, *Roberts v. Schreiber*, 2 Fed. Rep., 855. Sustained; not anticipated by abandoned experiment, and is infringed, *Roberts v. Reed Torpedo Co.*, 3 Brewster, 558. See, also, *Roberts v. Valley*, 14 Fed. Rep., 167.
- 47551.** Irwin, J. H. May 2, 1865. Lantern.
Construed, and not infringed as limited, *Adams v. Howard*, 19 Fed. Rep., 317. See, also, *Adams v. Howard*, 22 Fed. Rep., 656.
- 47574.** Saladee, C. W. May 2, 1865. Harness-buckle.
Reissue No. 8829, July 29, 1879.
Construed and limited in view of prior patent; sustained and not infringed, *Walters v. Crandal*, 11 Fed. Rep., 868.
- 47764.** Bristol, C. B. May 16, 1865. Snap Hook.
Construed, in view of state of art, to be for a patentable combination; limited in order to be sustained, and claim 1 infringed, *Fitch v. Bragg & Co.*, 8 Fed. Rep., 588.
- 47938.** Earl & Holcraft. May 30, 1865. Wool-oiling Apparatus.
Infringed, *Earl v. Dexter*, 1 Holmes, 412.
- 48036.** Arkell & Smith. June 6, 1865. Paper Bag.
Construed to be for a "result" of the means described—a paper bag; patentable; sustained and infringed, *Arkell v. Hurd Paper Bag Co.*, 7 Blatch., 475.
- 48048.** Buerk, J. E. June 5, 1865. Watchman's Time Detector.
Reissue No. 3869, March 8, 1870.
Held properly reissued in order to limit the term, in view of prior French patent, *Buerk v. Valentine*, 9 Blatch., 479. Sustained; is for a novel combination; valid and infringed, *Buerk v. Imhauser*, 1 Ban. & Ard., 137. Not anticipated, *Ibid.*, 14 Blatch., 19. Held novel, *Imhauser v. Buerk*, 101 U. S., 464. See, also, *Buerk v. Imhauser*, 2 Ban. & Ard., 465; 10 O. G., 907.

- 48300.** Moyer, E. D. June 20, 1865. Bottle Stopper.
Held not infringed, *Hicks v. Moeller*, 4 Ban. & Ard., 434.
- 48366.** Carpenter, R. W. June 27, 1865. Tremolo.
Reissue No. 3665, Oct. 5, 1869.
Sustained as novel; claim 1 is not for a principle, but for the described means, and is infringed, *Hitchcock v. Tremaine*, 8 Blatch., 440. Novelty sustained, *Hitchcock v. Tremaine*, 9 Blatch., 550. Not infringed by sale of one old element of the combination to licensees under the patent, *Saxe v. Hammond*, 1 Holmes, 453. See, also, *Hitchcock v. Tremaine*, 9 Blatch., 385; Tremolo Patent, 23 Wall., 518.
- 48407.** Jenkins, N. June 27, 1865. Self-closing Faucet.
Construed and limited; held novel, and not anticipated by a similar prior device which had not been used, *Zane v. Peck Bros. & Co.*, 9 Fed. Rep., 101. Held novel, *Ibid.*, 3 Ban. & Ard., 36. Construed in view of state of art; limited and not infringed, *Zane v. Soffe*, 110 U. S., 200. Held novel; valid for limited improvement claimed, and not infringed, *Zane v. Loffe*, 2 Fed. Rep., 229. See, also, *Zane v. Peck*, 23 O. G., 191.
- 48555.** Hart, Wm. H. July 4, 1865. Door Bolt.
Subject-matter held novel, original, useful and patentable, *Stanley Works v. Sargent & Co.*, 8 Blatch., 344.
- 49129.** May, J. M. Aug. 1, 1865. Drills for Boring Wells.
Reissue No. 6337, March 16, 1875.
Rouse v. Fletcher, 9 O. G., 838.
- 49140.** Nimmo, G. Aug. 1, 1865. Molding Crucibles and Pots.
Reissue No. 4608, Oct. 24, 1871.
Construed, held novel, useful and infringed, *Pickering v. Phillips*, 4 Cliff., 383. Invalid in view of prior knowledge and use, *Pickering v. McCullough*, 3 Ban. & Ard., 279; 104 U. S., 310.
- 49290.** Miltimore, J. H. Aug. 8, 1865. Lantern.
Reissue No. 9422, Oct. 19, 1880.
Adams v. Meyrose, 10 Fed. Rep., 671; *v. Meyrose Mfg. Co.*, 12 Fed. Rep., 440.
- 49349.** Lyon, B. M. Aug. 8, 1865. Machine for Forming Welts.
Infringed, *Merriam v. Smith*, 11 Fed. Rep., 588.
- 49414.** Johnson, J. Aug. 15, 1865. Steam Valve.
Construed, held valid and infringed, *Jenkins v. Johnson*, 9 Blatch., 516.
- 49469.** Caldwell, E. J. Aug. 15, 1865. Gas Stove.
Reissue No. 7077, April 25, 1876.
Construed, and limited in view of state of art, and held not infringed, *Tift v. Sharp*, 18 Blatch., 138.
- 49502.** Chesebrough, R. A. Aug. 22, 1865. Purifying Coal Oil.
Held novel and sustained. Patentee held first and original inventor, and diligent in reducing his invention to practice, *National Filtering Oil Co. v. Arctic Oil Co.*, 8 Blatch., 416.
- 49572.** Walker, J. H. Aug. 22, 1865. Mode of Cutting Boot and Shoe Soles.
Held wanting in patentable invention in view of state of art, being analogous to a double use, *Walker v. Rawson*, 4 Ban. & Ard., 128.
- 49903.** Martin, F. Sept. 12, 1865. Packing for Oil Wells.
Reissue No. 7244, July 25, 1876.
Claim 4 construed to be for a combination, and not an aggregation; held novel, *Consolidated Oil Well Packer Co. v. Eaton*, 12 Fed. Rep., 835.
- 49948.** Christy, J. Sept. 12, 1865. Car-brake Shoe.
National Car-brake Shoe Co. v. Railroad Cos., 23 O. G., 1034.
- 49951.** Goodale, E. W. Sept. 12, 1865. Paper Bag Machine.
Claim 1 construed and held infringed, *Union Paper Bag Machine Co. v. Newell*, 11 Blatch., 379. See, also, *Union Paper Bag Machine Co. v. Newell*, 11 Blatch., 519.
- 49984.** Collins, M. H. Sept. 19, 1865. Lamps.
Claim construed to be for a combination, and infringed by manufacture and sale of a part useless without the entire combination, with intent to have it completed by purchaser, *Wallace v. Holmes*, 9 Blatch., 65.
- 49992.** Field & Pullman. Sept. 19, 1865. Sleeping Car.
Reissue No. 6648, Sept. 21, 1875.
Pullman v. B. & O. R. Co., 4 Hughes, 236.
- 50073.** Hunt, Z. Sept. 19, 1865. Coal Stove.
Reissue No. 6709, Oct. 19, 1875.
Claim 3 void for aggregation, *Perry v. Co-operative Foundry Co.*, 12 Fed. Rep., 436.
- 50255.** Matthews, J. Oct. 3, 1865. Soda Water Fountain.
Reissue No. 9028, Jan. 6, 1880.

- Claims 5 and 7 held anticipated; claims 4, 6, 8 and 9 sustained and infringed, *Matthews v. Spangenberg*, 23 O. G., 92. See, also, *Matthews v. Spangenberg*, 14 Fed. Rep., 350; 15 Fed. Rep., 813.
- 50364.** Jordan & Smith. Oct. 10, 1865. Wrench.
Reissue No. 5294, Feb. 25, 1873.
Sustained as for patentable subject-matter involving invention, *Collins Co. v. Coes*, 3 Fed. Rep., 225. Construed to be for application to a device of a feature already in use for same purpose in another form of tool, and held not to involve invention, *Collins Co. v. Coes*, 21 Fed. Rep., 38. See, also, *Collins Co. v. Coes*, 8 Fed. Rep., 517.
- 50318.** Westhead, M. B. Oct. 3, 1855. Device for arranging Tapes (granted under act 1867).
Held valid for term of seventeen years, notwithstanding the prior fourteen year English patent of patentee, *Goff v. Stafford*, 3 Ban. & Ard., 610.
- 50591.** Irwin, J. H. Oct. 24, 1865. Lamp.
Construed, in view of state of art, to be for special device; sustained, and is infringed, *Adams v. Illinois Mfg. Co.*, 4 Ban. & Ard., 543. Construed, and held to be for simple change in location, which, remedying a grave defect, constitutes a patentable improvement; not anticipated by a prior application accompanied by an inoperative model; is infringed, *Adams v. Howard*, 19 Fed. Rep., 317. See, also, *Adams v. Howard*, 22 Fed. Rep., 656.
- 50614.** Mudge, B. Oct. 24, 1865. Sinking Wells.
Peck *v. Collins*, 103 U. S., 660.
- 50617.** Nobel, A. Oct. 24, 1865. Exploding Nitro-glycerine.
Reissues Nos. 4818 and 4819, March 19, 1872. Compound. Products.
Construed to be for compounds; invalid for new matter, and as for invention different from that contained in the original process patent, *Atlantic Giant Powder Co. v. California Powder Works*, 3 Sawyer, 448. Void for want of identity with original process patent, *Powder Co. v. Powder Works*, 98 U. S., 126.
Reissue No. 5798, March 17, 1874.
Limited, and held not infringed, *Atlantic Giant Powder Co. v. Mowbray*, 2 Ban. & Ard., 442. Construed, limited and not infringed, *Atlantic Giant Powder Co. v. Hulings*, 21 Fed. Rep., 519.
Reissue No. 5800, March 17, 1874.
Limited, and held not infringed, *Atlantic Giant Powder Co. v. Mowbray*, 2 Ban. & Ard., 442. See, also, *Atlantic Giant Powder Co. v. California Powder Works*, 98 U. S., 126.
- 50626.** Pingree, S. M. Oct. 24, 1865. Apparatus for Making Extracts from Tan Bark.
Construed to be for a combination, and not infringed by use of less than all its elements, *Bridge v. Brown*, 1 Holmes, 205. See, also, *Bridge v. Brown*, 1 Holmes, 53.
- 50723.** Linville & Piper. Oct. 31, 1865. Wrought Iron Bridges.
Construed, and limited in view of claims and specifications, and held not infringed, *Keystone Bridge Co. v. Phoenix Iron Co.*, 95 U. S., 274. Construed to be for use of article in a particular application and not infringed by its manufacture and sale, *Ibid*, 5 Fish., 468.
- 50860.** Tyler, Chandler & Standish. Nov. 7, 1865. Pocket-lighter.
Reissue No. 8490, Nov. 12, 1878.
Construed; held properly reissued; is novel, valid, and infringed by a formal difference only, *Selden v. Stockwell Gas Burner Co.*, 19 Blatch., 544.
- 50919.** Dickerson & Stuber. Nov. 14, 1865. Oil Well Pump.
Claim 2 construed to be for an aggregation; held wanting in invention, *Doubleday v. Roess*, 11 Fed. Rep., 737.
- 50938.** Kelly, T. J. Nov. 14, 1865. Gas Stove Burner.
Reissue No. 6833, Jan. 4, 1876.
Construed to be for a combination of old and new elements, and infringed by use of one of the new elements, *Sharp v. Tiff*, 18 Blatch., 132.
- 51085.** Rathbone & Hailes. Nov. 21, 1865. Coal Stove.
Construed; description held vague and not cured by disclaimer, *Hailes v. Albany Stove Co.*, 16 Fed. Rep., 240.
- 51145.** See ¶ 9, p. 774.
- 51167.** Fowler & Morgan. Nov. 28, 1865. Packing for Oil Wells. Reissue No. 8491, Nov. 12, 1878. Claim 1 construed, and held an unwarrantable enlargement of original, and void, *Consolidated Oil Well Packer Co. v. Eaton*, 12 Fed. Rep., 855.
- 51292.** Bussy & McLeod. Dec. 5, 1865. Reservoir Cooking Stove.
Reissue No. 5435, June 3, 1873.
Construed, in view of state of art, to be for a new combination of old elements involving invention, and not for an aggregation; claim 1 held wanting in novelty; claim 4 sus-

tained, and infringed by a colorable change, *Bussy & McLeod v. Wager*, 2 Ban. & Ard., 229. See, also, *Ibid.*, 9 O. G., 594.

51310. Hamilton, P. Dec. 5, 1865. Saw-mills.

Construed to be for a combination constituting an improvement on an old machine; sufficiently described; infringed by change in attachment of parts obtaining the same movement, *Ives v. Hamilton*, 92 U. S., 426. Construed, and held not limited to particular adjustment shown in drawing, *Hamilton v. Ives*, 3 Fish., 244. Sustained as novel, *Hamilton v. Rollins*, 5 Dill., 495. See, also, *Hamilton v. Kingsbury*, 17 Blatch., 264; 17 Blatch., 460; 15 Blatch., 64.

51364. Tinker, J. B. Dec. 5, 1865. Mowing Machine.

Construed, and held not infringed, *Tinker v. Wilber Eureka Mower and Reaper Mfg. Co.*, 1 Fed. Rep., 138.

51379. Winslow, I. Dec. 5, 1865. Knife for Removing Corn.

Void for public use more than two years prior to date of application, *Jones v. Barker*, 11 Fed. Rep., 597. Held wanting in patentable novelty, *Jones v. McMurry*, 2 Hughes, 527.

1866.

51928. Crompton, G. Jan. 9, 1866. Shedding Mechanism for Looms.

Reissue No. 5718, Jan. 6, 1874.

Construed and held not infringed, *Crompton v. Knowles*, 7 Fed. Rep., 199.

51991. Berdan, H. Jan. 9, 1866. Breech Loader.

Reissue No. 3118, Sept. 15, 1868.

Patentability doubted. Patentee held not to be the inventor, *Berdan Fire-arms Mfg. Co. v. Remington & Sons*, 3 O. G., 688.

52008. Lord, E. Jan. 9, 1866. Cleaning Cotton, etc.

Lord v. Whitehead & Atherton Machine Co., 33 O. G., 499.

52015. Belknap, F. G. Jan. 16, 1866. Amalgamator.

Construed to be for a combination; limited and not infringed, *Coolidge v. McCone*, 2 Sawyer, 571.

52169. Holt, H. Jan. 23, 1866. Marking Wheel.

Reissue No. 6714, Oct. 26, 1875.

Claim 2 limited and held not infringed, *Holt v. Keeler*, 22 O. G., 1291.

51145. Christman, J. Nov. 28, 1865. Pump Filter.

Reissue No. 5804, March 24, 1874.

Construed, and held to be for a combination and not an aggregation. Claim 1 sustained; claim 2 invalid for want of novelty, *Christman v. Rumsey*, 17 Blatch., 148.

52439. Morehouse, C. B. Feb. 6, 1866. Whip Sockets.

Reissue No. 4071, July 12, 1870.

Construed to be for a combination of old elements; limited and not infringed, *Merriam v. Drake*, 9 Blatch., 336.

52726. Magoun, A. B. Feb. 20, 1866. Adjustable Window Frame.

Reissue No. 4698, Jan. 2, 1872.

Invalid in view of broad claims covering a prior invention, *Adjustable Window Screen Co. v. Boughton*, 1 Ban. & Ard., 327.

52730. McMillin, J. S. Feb. 20, 1866. Capstans.

Invalid for public use more than two years prior to date of application, *McMillin v. Barclay*, 5 Fish., 189. See, also, *McMillin v. Rees*, 1 Fed. Rep., 722; *v. St. Louis & Miss. Valley Transportation Co.*, 18 Fed. Rep., 260.

52763. Spafford, N. H. Feb. 20, 1866. Bristles Machine.

Wilkins v. Spafford, 3 Ban. & Ard., 274.

52779. Woodward, J. Feb. 20, 1866. Paste.

Held novel, useful, valid, and infringed by use of an equivalent, *Woodward v. Morrison*, 1 Holmes, 124.

52835. Fales, J. Feb. 27, 1866. Carpet Lining.

Reissue No. 4296, March 14, 1871.

Construed; validity of broad claim doubted, *Fales v. Wentworth*, 1 Holmes, 96. See, also, *American Carpet Lining Co. v. Beale*, 5 Ban. & Ard., 529.

52960. Brooks, Gates & Burleigh. March 6, 1866. Rock Drill.

Claim 3 construed to be for a combination; its infringement doubted, *Burleigh Rock Drill Co. v. Lobdell*, 1 Holmes, 450.

53003. Hull, L. March 6, 1866. Gage Lathe.

Reissue No. 7262, Aug. 15, 1876.

Construed; not anticipated by abandoned experiment; infringed by substitution involving formal change only, *American Whip Co. v. Lombard*, 4 Cliff., 495.

53011. Leavitt, T. H. March 6, 1866. Peat Machine.
Leavitt v. Connecticut Peat Co., 6 Blatch., 139.
53075. Wood, F. March 6, 1866. Landau Carriage Doors.
Wood v. Wells, 6 Fish., 382.
53251. Littlefield, D. G. March 13, 1866. Coal Burner.
Reissue No. 4006, May 31, 1870.
Construed to be for an improvement on a prior patent, Perry v. Littlefield, 17 Blatch., 272. See, also, Perry v. Littlefield, 18 O. G., 571.
53345. Rogers, S. March 20, 1866. Hay Elevator.
Nellis v. Pennock Mfg. Co., 22 O. G., 1131; v. McLanahan, 6 Fish., 286.
53584. Dewey & Tillotson. Apr. 3, 1866. Well Reservoir.
Reissue No. 4165.
Held wanting in novelty, Tillotson v. Munson, 5 Biss., 426.
53630. Kneeland, E. Y. Apr. 3, 1865. Piston.
Sustained; patentee held first and original inventor, Kneeland v. Sheriff, 2 Fed. Rep., 901.
53633. Knox & Corrister. Apr. 3, 1866. Fluting Machine.
Reissue No. 3861, March 1, 1870.
Held novel and valid, Knox v. Loweree, 1 Ban. & Ard., 589.
53706. Tucker, E. W. Apr. 3, 1866. Bed Bottom.
Reissue No. 6338, March 16, 1875.
Dunks v. Grey, 5 Ban. & Ard., 634.
53794. Densmore, J. & A. Apr. 10, 1866. Petroleum Car.
Reissue No. 2261, May 29, 1866.
Claims construed to be for combinations separate in their nature and which may be used apart, Densmore v. Schofield, 4 Fish., 148. Held wanting in novelty and patentability; claims held to be frivolous, *Ibid.*, 102 U. S., 375.
53883. Ross, G. Apr. 10, 1866. Molding and Casting.
Smith v. Marshall & Co., 10 O. G., 375.
53927. Sanford & Wheeler. Apr. 10, 1866. Sewing Machine for Hat Linings.
Held novel and infringed, Sanford v. Messer, 1 Holmes, 149. Construed to be for a combination and held not infringed, Sanford v. Merrimack Hat Co., 4 Cliff., 404.
54033. Spafford, N. H. Apr. 17, 1866. Bristle Machine.
Wilkins v. Spafford, 3 Ban. & Ard., 274.
54034. Spafford, N. H. Apr. 17, 1866. Bristle Combing Machine.
Wilkins v. Spafford, 3 Ban. & Ard., 274.
54170. Jones, J. W. Apr. 24, 1866. Knife for removing Corn.
Held wanting in novelty, Jones v. Barker, 11 Fed. Rep., 597; v. McMurry, 2 Hughes, 527.
54323. Foy, L. H. May 1, 1866. Bustles.
Held valid on stipulation filed by both parties, Foy v. Hunter, 9 O. G., 543.
54554. Jenkins, N. May 8, 1866. Elastic Packings.
Reissue No. 3579, Aug. 3, 1869.
Held novel. Claim 1 construed and held infringed, Jenkins v. Johnson, 9 Blatch., 516. Construed, and limited in view of specification, and held not infringed, Clarke v. Johnson, 16 Blatch., 495. Construed, and held not infringed by a substitution of material developing other and different properties, Clarke v. Johnson, 18 Blatch., 450. Held novel and infringed, Jenkins v. Walker, 1 Holmes, 120. See, also, Nelson v. McMann, 16 Blatch., 139.
54649. Morris, A. May 8, 1866. Excavator Scoop.
Morris v. Shelbourne, 8 Blatch., 266.
54860. Clark & Garretson. May 22, 1866. Mop-head.
Garretson v. Clark, 15 Blatch., 70; 17 Blatch., 256; 111 U. S., 120.
54938. Moore, G. R. May 22, 1866. Stove.
Reissue No. 9247, June 8, 1880.
Claims 1 and 4 invalid for want of invention, Perry v. Co-operative Foundry Co., 12 Fed. Rep., 149.
55299. Hudson, T. S. June 5, 1866. Manufacture of Type.
Construed, sustained, and held not infringed, Hudson v. Draper, 4 Cliff., 178.
55469. Cole, H. H. June 12, 1866. Fluting Machine.
Reissue No. 4349, April 25, 1871.
Held good and valid. Patentee held first and original inventor, Cole v. Kennedy, 9 O. G., 1110.

- 55598.** Ashcroft, J. June 19, 1866. Governing Steam Boilers.
Held infringed, Chalmer Spence Patent Non-conductor Co. v. Pierce, 9 Fed. Rep., 152.
Held valid. Patentee held first and original inventor, Chalmer Spence Patent Non-conductor Co. v. Cramp, 5 Ban. & Ard., 66.
- 55614.** Burt & Dunn. June 19, 1866. Cutting Corn from Cob.
Reissue No. 8854, Aug. 19, 1879.
Void for delay in reissuing, Jones v. Barker, 11 Fed. Rep., 597.
- 55630.** Dennis, P. June 19, 1866. Shovel-plows.
Patentee held first and original inventor; patent is infringed, Dennis v. Eddy, 11 O. G., 833.
- 55901.** Plimpton, J. L. June 26, 1866. Parlor-skate.
Sustained as for a patentable improvement on his prior patents, and is infringed, Plimpton v. Winslow, 3 Fed. Rep., 333. Void for public use and sale for more than two years prior to date of application, *Ibid.*, 14 Fed. Rep., 919.
- 56102.** Rowell, J. S. & I. July 3, 1866. Cultivator.
Reissue No. 2909, March 31, 1868.
Construed and limited to combination of old elements, and not infringed by a combination of only some of them, Rowell v. Lindsay, 10 Biss., 217. Construed to be for a combination, and not infringed by the omission of an element, *Ibid.*, 113 U. S., 97.
- 56166.** Boardman, B. July 10, 1866. Improved Tool.
Claim 1 construed; limited, sustained, and not infringed, Tower v. Bemis & Call Hardware & Tool Co., 19 Fed. Rep., 498.
- 56259.** Parsons, C. C. July 10, 1866. Soap Manufacture.
Construed and limited to particular form, as patentee was not the first in the art. Held novel, Parsons v. Colgate, 15 Fed. Rep., 600.
- 56261.** Platt, C. M. July 10, 1866. Buttons.
Construed; held useful, novel and infringed, Platt v. United States Patent Button, etc., Mfg. Co., 9 Blatch., 342.
- 56345.** Barnes, S. H. July 17, 1866. Corset Spring.
Reissue No. 3624, Aug. 31, 1869.
Construed; held novel and patentable; infringed by part of the combination prepared to be applied to the entire combination, Barnes v. Straus, 9 Blatch., 553.
Reissue No. 5216, Jan. 7, 1873.
Held invalid for abandonment by public use more than two years prior to date of application, Egbert v. Lippman, 15 Blatch., 295; 104 U. S., 333.
- 56365.** Cabell, S. G. July 17, 1866. Fluting Machine.
Reissue No. 3856, May 1, 1870.
Novelty and validity sustained; claims 1 and 3 infringed, Knox v. Loweree, 1 Ban. & Ard., 589.
- 56686.** Bussey & McLeod. July 24, 1866. Cooking Stove.
Reissue No. 3815, Feb. 1, 1870.
Construed and limited in view of state of art; claims 3 and 4 held to be duplicate; claim 3 held wanting in invention, Bussey v. Excelsior Mfg. Co., 110 U. S., 131.
- 56737.** Evans, A. July 31, 1866. Paper Cuffs.
Claim 2 held novel and patentable, Union Paper Collar Co. v. Van Deusen, 10 Blatch., 109.
- 56801.** Roemer, Wm. July 31, 1866. Traveling Bag.
Held invalid for want of novelty and for prior use, Roemer v. Simon, 1 Ban. & Ard., 138.
See, also, Roemer v. Simon, 95 U. S., 214.
- 56869.** Jennings, R. July 31, 1866. Augur Machine.
Held not abandoned by an experimental use, Jennings v. Pierce, 15 Blatch., 42.
- 57057.** Gresham, J. Aug. 7, 1866. Injector for Boiler.
Not anticipated by a suggestion as to what must be done, but not telling how to do it; sustained and held infringed, Nathan v. New York Elevated R. Co., 2 Fed. Rep., 229.
- 57232.** Wheeler & Manley. Aug. 14, 1866. Machine for Pouncing Hat Bodies.
Held not anticipated by an invention prior to their date of application, but subsequent to their date of reduction to practice, Nichols v. Pearce, 7 Blatch., 567.
- 57245.** Beschke, Wm. Aug. 14, 1866. Lamp.
Construed in view of state of art; limited, and not infringed, Ashcroft v. Hollings, 11 O. G., 879.
- 57271.** Adams, Jr., I. Aug. 21, 1866. Coating Metals with Metal.
United Nickel Co. v. American Nickel Plating Works, 4 Ban. & Ard., 74.
- 57443.** Miller & Reichert. Aug. 21, 1866. Billiard Register.
Construed and limited in view of state of art, and held not infringed, Passenger Fare Enumerator Co. v. Metropolitan R. Co., 4 Ban. & Ard., 116.

- 57574.** Sargent, J. Aug. 28, 1866. Lock.
Reissue 4696, Jan. 2, 1872.
Sargent v. Yale Lock Mfg Co., 17 Blatch., 249; 17 Blatch., 244.
- 58020.** Ewing, M. P. Sept. 11, 1866. Lubricant.
Reissue No. 7321, Sept. 26, 1876.
Expanded claim held void, being for a product not limited to process, as in original; also for delay in reissuing, *Vacuum Oil Co. v. Buffalo Lubricating Oil Co.*, 20 Fed. Rep., 850.
- 58294.** Richardson, G. W. Sept. 25, 1866. Safety Valve.
Construed and limited in view of state of art, and not infringed as limited, *Consolidated Safety Valve Co. v. Crosby*, 7 Fed. Rep., 768; *v. Kunkle*, 14 Fed. Rep., 732. Held sufficiently described and valid, *Consolidated Safety Valve Co. v. Crosby Steam Gauge & Valve Co.*, 113 U. S., 157.
- 58437.** Lemmen, J. Oct. 2, 1866. Bed Fastenings.
Haven & Co. v. Brown, 6 Fish., 413.
- 58447.** Mellon, E. Oct. 2, 1866. Locomotive Wheels.
Construed and limited to claim, *Lehigh Valley R. Co. v. Mellon*, 104 U. S., 112. See, also, *Mellon v. Delaware, Lackawana & W. R. Co.*, 21 O. G., 1616.
- 58612.** Davenport, F. S. Oct. 9, 1866. Gang Plow.
Reissue No. 8986, Dec. 2, 1879.
Construed and limited in view of state of art; void for expanded claim, *Newton v. Furst & Bradley Mfg Co.*, 14 Fed. Rep., 465.
- 58901.** Simpson, E. L. Oct. 16, 1866. Dental Rubber.
Goodyear v. Evans, 6 Blatch., 121.
- 58962.** Naylor, Wm. Oct. 16, 1866. Steam Safety Valve.
Reissue No. 3727, Nov. 9, 1869.
Limited and sustained in view of state of art, although claiming certain features originally disclaimed; is not infringed, *Ashcroft v. Boston & Lowell R. R.*, 1 Holmes, 366. Construed and limited in view of disclaimer in patentee's English patent; is not infringed, 97 U. S., 189.
- 59144.** Swett, C. Oct. 23, 1866. Bale Tie.
Construed; held infringed; is not abandoned, *Johnsen v. Fassman*, 1 Woods, 138.
Reissue No. 4896, May 7, 1872.
If broadly construed, is void; if limited, is not infringed, *Johnsen v. Beard*, 2 Ban. & Ard., 50.
- 59286.** Spafford, N. H. Oct. 30, 1866. Bristle Machine.
Wilkins v. Spafford, 3 Ban. & Ard., 274.
- 59319.** Redmond, O. Oct. 30, 1866. Packing for Oil Wells.
Reissue No. 7494, Feb. 6, 1877.
Claims 1 and 5 construed and limited to original patent in order to be sustained; not infringed as limited, *Consolidated Oil Well Packer Co. v. Eaton*, 12 Fed. Rep., 865.
- 59375.** Evory & Heston. Nov. 6, 1866. Boot and Shoe.
Construed, and held infringed by an improvement of greater simplicity and cheapness, *Evory v. Burt*, 15 Fed. Rep., 112. Held to be infringed, *Evory v. Candee*, 2 Fed. Rep., 542. See, also, *Evory v. Candee*, 17 Blatch., 200; 5 Ban. & Ard., 67.
- 59458.** Roulstone, E. A. G. Nov. 6, 1866. Trunk Molding.
Reissue No. 7149, May 30, 1876.
Construed and compared with original, and held valid notwithstanding omissions. Is for mechanical skill only, and wanting in patentable novelty, *Gould v. Ballard*, 3 Ban. & Ard., 324.
- 59603.** Hill, S. L. Nov. 13, 1866. Letter Blocks.
Construed and limited in view of state of art, and held not infringed, *Hill v. Houghton*, 1 Ban. & Ard., 291.
- 59733.** Wright, T. Nov. 13, 1866. Broom.
Reissue No. 2598, May 14, 1867.
Construed to be for same invention as original, and claim, if enlarged, sustained, in view of prompt reissuing before intervening rights had accrued; is infringed, *McArthur v. Brooklyn R'y Supply Co.*, 19 Fed. Rep., 263.
- 59913.** Knox, S. R. Nov. 20, 1866. Fluting Machine.
Reissue No. 3938, April 26, 1870.
Novelty and validity sustained, *Knox v. Loweree*, 1 Ban. & Ard., 589.
- 59915.** Lallement, P. Nov. 20, 1866. Velocipede.
Reissue No. 7972, Nov. 27, 1871.
Held invalid; right to reissue abandoned by delay, *Pope Mfg. Co. v. Marqua*, 15 Fed. Rep., 400.

59936. Roberts, E. A. L. Nov. 20, 1866. Method of Increasing Capacity of Oil Wells.

Construed and held not to be for a law of nature; is not anticipated by unsuccessful experiments; held novel and infringed, *Roberts v. Dickey*, 4 Brewster, 260. Construed broadly, in view of state of art, *Roberts v. Roter*, 5 Fish., 295.

Reissue No. 6258, Jan. 26, 1875.

Held novel; is not anticipated by abandoned experiment; is infringed, *Roberts v. Schreiber*, 2 Fed. Rep., 855. See, also, *Roberts v. Walley*, 26 O. G., 107.

60151. De Puy, A. T. Dec. 4, 1866. Printer's Galley.

Reissue No. 6326, March 9, 1875.

Patentee held first and original inventor; infringed by use of well known substitute, *Hoe & Co. v. Cole & Co.*, 13 O. G., 500. Patentee held first and original inventor; construed; sustained, and infringed by change of form and substitution of well known equivalent, *Hoe v. Tuthill*, 3 Ban. & Ard., 206.

60196. King, W. R. Dec. 4, 1866. Baling Press.

Construed to be for a combination, and infringed by substitution of well known equivalent, *King v. Louisville Cement Co.*, 6 Fish., 334.

60442. Tufts, O. Dec. 11, 1866. Elevator.

Tufts v. Boston Machine Co., 1 Holmes, 459.

60476. Chipman, G. W. Dec. 18, 1866. Carpet Lining.

Reissue No. 4066, July 12, 1870.

Construed and held infringed, *Chipman v. Wentworth*, 1 Holmes, 96.

60606. Woodbury, E. F. Dec. 18, 1866. Whip.

Construed, and sustained as for a patentable invention and not for a double use; is infringed, *Strong v. Noble*, 6 Blatch., 477.

60657. Decker, L. Dec. 18, 1866. Cushion for Billiard Table.

Reissue No. 3323, March 9, 1869.

Is for same invention as original; novel and infringed, *Decker v. Grote*, 10 Blatch., 331. Limited in view of state of art, and held infringed, *Decker v. Silverbrandt*, 13 Blatch., 187. See, also, *Decker v. Griffith*, 10 Blatch., 343 (note); *v. New York Belting & Packing Co.*, 6 Fish., 374.

1867.

61172. De Forest, T. B. Jan. 15, 1867. Binding for Skirt.

Construed; held valid and infringed, *Day v. Combination Rubber Co.*, 2 Fed. Rep., 570; *v. Schwab*, 2 Fed. Rep., 544.

61207. Jurgensen, J. Jan. 15, 1867. Stem-setting Watch.

Reissue No. 4334, April 11, 1871.

Construed, and held infringed, *Jurgensen v. Magin*, 9 Blatch., 294.

61480. Spafford, N. H. Jan. 22, 1867. Bristle Combing and Assorting.

Wilkins v. Spafford, 3 Ban. & Ard., 274.

61482. Stephenson, J. Jan. 22, 1867. Street Cars.

Reissue No. 6697, Oct. 11, 1875.

Construed to embody nothing in addition to what was shown in original model and drawing; sustained as for same invention as original, *Stephenson v. Second Avenue R. Co.*, 1 Fed. Rep., 416.

61628. Meyer, R. Jan. 29, 1867. Buckle-fastening.

Reissue No. 7129, May 23, 1876.

Held properly reissued, valid and infringed, *Schuessler v. Davis*, 13 O. G., 1011. Claims 2 and 3 construed, held novel and infringed, *Loercher v. Crandal*, 11 Fed. Rep., 872. See, also, *Metal Stamping Co. v. Crandall*, 18 O. G., 1531.

61680. Page, A. H. Jan. 29, 1867. Clothes Wringer.

Reissue No. 5223, Jan. 7, 1873.

Construed and limited in view of original to a combination including a swivel joint, and not infringed by omission of the joint, *Metropolitan Wringing Machine Co. v. Young*, 14 Blatch., 46.

61796. Bethea, J. C. Feb. 5, 1867. Plows.

Reissue No. 3094, Aug. 25, 1868.

Whitely v. Fisher, 4 Fish., 248.

61900. Warner, A. Feb. 5, 1867. Hub.

Reissue No. 5366, April 22, 1873.

Held to be for same invention as original; valid, and claims 1, 2, and 3 infringed, *Hall & Co. v. Jones*, 3 Ban. & Ard., 455.

62231. Steele, J. S. Feb. 19, 1867. Sand Box for Carriage Axles.

Construed to be for an old device used for same purpose with same result, without change

- in the application; held wanting in novelty, *Goodyear v. Hartford Spring Axle Co.*, 23 Fed. Rep., 36.
- 62232.** Stockbridge, C. H. Feb. 19, 1867. Stocks for Bits. Reissue No. 6350, March 23, 1875. Construed and held infringed by formal change, *Miller's Falls Co. v. Backus*, 5 Ban. & Ard., 53.
- 62342.** See 9th ¶ on this page.
- 62378.** Stevens, J. L. Feb. 26, 1867. Egg Transporting Case. Reissue No. 8091, Feb. 19, 1878. Sustained in view of original and held novel, *Coburn v. Schroeder*, 19 Blatch., 377. Is for a patentable invention; validity reaffirmed, *Ibid.*, 22 O. G., 1538. Held infringed, *Coburn v. Brainard*, 16 Fed. Rep., 412. See, also, *Coburn v. Shroeder*, 11 Fed. Rep., 425; *v. Clark*, 15 Fed. Rep., 804; *v. Shroeder*, 19 Blatch., 493; *McKay v. Wooster*, 2 Sawyer, 373.
- 62406.** Gosling, J. W. Feb. 26, 1867. Step Cover. Reissue No. 5644, Nov. 4, 1873. Construed in view of original; if broadly, is for a different invention, and wanting in novelty; not infringed if limited, *Gosling v. Roberts*, 106 U. S., 39.
- 62492.** King, G. E. Feb. 26, 1867. Fluting Machine. Reissue No. 3000, June 23, 1868. Sustained; infringed by change in location merely, *King v. Mandelbaum*, 8 Blatch., 468. Held novel; sustained and infringed, *Kursheedt v. Werner*, 12 Blatch., 530; *King v. Werner*, 12 Blatch., 270. Construed and held not infringed, *Werner v. King*, 96 U. S., 218. Reissue No. 3001, June 23, 1868. Sustained and held infringed, *King v. Mandelbaum*, 8 Blatch., 468. Held wanting in novelty, *King v. Werner*, 12 Blatch., 270.
- 62807.** Bardell & Smith. March 12, 1867. Coal Scuttle. Reissue No. 3138, May 18, 1869. Claim 1 construed and limited to location of parts, and not infringed by change in relative location producing a better result, *Habeman v. Whitman*, 5 Ban. & Ard., 530.
- 63104.** Schoerken. March 19, 1867. Match Box. Held anticipated by a prior French patent, *Schoerken v. Swift & Courtney Mfg. Co.*, 19 Blatch., 209.
- 63229.** De Witt, H. C. March 26, 1867. Burning Oil. *Patterson v. Kentucky*, 97 U. S., 506.
- 62342.** Howlett, E. J. Feb. 26, 1867. Tools for Manufacture of Paper Bags. Reissue No. 6050, Sept. 15, 1874. Claims 2 and 5 held to be for equivalent devices and wanting in novelty, *Union Paper Bag Machine Co. v. Atlas Bag Co.*, 6 Fed. Rep., 398.
- 63353.** Zwicki, C. March 26, 1867. Looms. Claims 1 and 2 construed; utility of claim 3 doubted, *Taft v. Steere*, 19 Fed. Rep., 600.
- 63418.** Morton, J. April 2, 1867. Water Tank for Railways. Reissue No. 5544, Aug. 19, 1873. Invalid for illegal affidavit to reissue petition, *Poage v. McGowan*, 15 Fed. Rep., 398.
- 63419.** Munson, F. April 2, 1867. Bond and Coupon Register. Held patentable, novel, useful; valid, and infringed, *Munson v. Mayor, etc., of New York*, 18 Blatch., 237. See, also, *Munson v. Mayor, etc., of New York*, 22 O. G., 586; 16 Fed. Rep., 560.
- 63480.** Carihfield, A. R. April 2, 1867. Lantern. Held not infringed, *Steam Gauge & Lantern Co. v. Miller*, 21 Fed. Rep., 514.
- 63770.** Weston, D. M. April 9, 1867. Centrifugal Machine. Reissue No. 2845, Jan. 14, 1868. Construed; claim 5 held novel and infringed, *Weston v. Nash*, 1 Holmes, 488.
- 63889.** Hawes, C. L. April 16, 1867. Hotel Register. Not void for prior public use, *Hawes v. Antisdell*, 2 Ban. & Ard., 10. Limited to claim and held infringed, *Hawes v. Gage*, 5 O. G., 494. Construed, *Hawes v. Washburn*, 5 O. G., 481. Sustained in view of prior adjudication, *Hawes v. Cook*, 5 O. G., 493.
- 63917.** McMillin, J. S. April 16, 1867. Capstans. Held not abandoned either as to application or invention; is novel, involves invention; patentee is first and original inventor; held to be infringed, *McMillin v. Barclay*, 5 Fish., 189. Construed and limited to specific combination, and held not infringed, *McMillin v. St. Louis & Vicksburgh Anchor Line*, 23 Fed. Rep., 169. Construed to be for analogous use involving mechanical skill only, *Morris v. McMillin*, 112 U. S., 244. Construed to be for method, and not invalidated by prior patent for a combination use in practicing the method granted the same patentee, *McMillin v. Rees*, 1 Fed. Rep., 722.

63924. Mitchell, J. L. April 16, 1867. Hotel Register.

Hawes *v.* Gage, 5 O. G., 494.

64347. Merrill, H. April 30, 1867. Steam Heating Apparatus.

Claims 1 and 2 held too vague and general; claim 1 literally for a function, construed to be for the means; claims 1, 2 and 3 limited and not infringed, Albany Steam Trap Co. *v.* Felthousen, 20 Fed. Rep., 633.

64404. Bostock, E. May 7, 1867. Sewing Machine Tuck-creaser.

Held novel and infringed by an improvement, Bostock *v.* Goodrich, 21 Fed. Rep., 316. Construed to be for improvements on old machines, *Ibid.*, 25 Fed. Rep., 819.

64410. Draper, D. A. May 7, 1867. Forming Letters, etc., on Type-block.

Reissue No. 3442, May 18, 1869.

Claim 2 construed to be for an old article made on a new machine, and not for a new art of manufacture; is invalid for want of invention. Claim 1 held not infringed, Draper *v.* Hudson, 1 Holmes, 208.

64437. Mee, B. May 7, 1867. Hose Coupling.

Claims 1 and 2 held novel, patentable and infringed, Westinghouse *v.* Gardner & R. Air Brake Co., 2 Ban. & Ard., 55.

64910. Schaefer, C. A. May 21, 1867. Sash Supporter.

Reissue No. 8672, April 15, 1879.

Construed, limited, and held not infringed, Judd *v.* Babcock, 8 Fed. Rep., 605.

65019. Simpson, G. B. May 21, 1867. Conductor.

Construed, in view of state of art, to be for patentable substitution involving more than mere mechanical skill, and is not for a mere double use. Held valid, Colgate *v.* Western Union Telegraph Co., 15 Blatch., 365. Novelty of invention sustained, Colgate *v.* Gold & Stock Telegraph Co., 16 Blatch., 305.

Held not infringed by use of substance known, but not as an equivalent, at the date of his patent, Colgate *v.* Law Telegraph Co., 5 Ban. & Ard., 437. See, also, Colgate *v.* International Ocean Telegraph Co., 17 O. G., 194; *v.* Compagnie Française du Telegraphe de Paris a New York, 23 Fed. Rep., 82; *v.* Gold & Stock Telegraph Co., 4 Ban. & Ard., 559; *v.* Western Union Telegraph Co., 19 Fed. Rep., 828; 4 Ban. & Ard., 562; 14 O. G., 943.

65186. Eames & Seely. May 28, 1867. Soap.

Reissue No. 5007, July 30, 1872.

Construed to be for a difference in degree, not involving invention, and held void, Buchan *v.* McKesson, 18 Blatch., 485.

65230. Irwin, J. H. May 28, 1867. Lamp.

Claim 1 construed in view of state of art; held novel and infringed, Irwin *v.* Dane, 9 O. G., 642. See, also, Irwin *v.* Dane, 2 Biss., 442.

65267. Pierson, Wm. H. May 28, 1867. Plastic Compound from Vegetable Fibres.

Held not anticipated by English patent of 1856, enrolled subsequent to date of patentee's invention. Held not abandoned, Celluloid Mfg. Co. *v.* Crofut, 33 O. G., 235.

65573. Hollingsworth, J. June 11, 1867. Horse Rake.

Construed and limited; claim 1 anticipated by patentee's prior patent, Dodds *v.* Stoddard, 17 Fed. Rep., 645.

65648. Craig, S. F. June 11, 1867. Well Tube.

Held novel, and infringed by same device in which wire was substituted for solder to hold the gauze, Craig *v.* Smith, 2 Dill., 375. Construed to be for a combination of old elements; limited, and not infringed by omission of one of its elements, *Ibid.*, 4 Dill., 349. See, also, Craig *v.* Smith, 100 U. S., 226.

65664. Gilbert, J. J. June 11, 1867. Starch Manufacturing Machinery.

Claim 3 construed as a double claim, for a combination of three elements, and for a process; sustained; the process held valid and the combination novel; is infringed, New York Grape Sugar Co. *v.* Buffalo Grape Sugar Co., 18 Fed. Rep., 638. See, also, New York Grape Sugar Co. *v.* Buffalo Grape Sugar Co., 20 Fed. Rep., 505; 32 O. G., 1356; *v.* Peoria Grape Sugar Co., 21 Fed. Rep., 878.

66065. Barbarin, A. June 25, 1867. Bale Ties.

Reissue No. 7388; Nov. 7, 1876.

Washburn & Moen Mfg. Co. *v.* Wilson, 19 Fed. Rep., 233.

66130. Clark, J. B. June 25, 1867. Manufacture of Blanks for Carriage Thills.

Reviewed, in view of state of art, and held not infringed, Clark *v.* Beecher Mfg. Co., 7 Fed. Rep., 816; 31 O. G., 1169.

66182. Smith, L. B. June 25, 1867. Barbed Fence Wire.

Reissue No. 7136, May 23, 1876.

Held wanting in invention, Washburn & Moen Mfg. Co. *v.* Haish, 10 Biss., 65. See,

- also, Washburn & Moen Mfg. Co. *v.* Crowell, 1 Fed. Rep., 225; Iowa Barbed Steel Wire Co., *In re*, 5 Ban. & Ard., 279.
- 66316.** Forbes, J. July 2, 1867. Skate.
Turrell *v.* Bradford, 23 O. G., 1623.
- 66578.** Fulghum, J. P. July 9, 1867. Grain-drill.
Construed; limited, and not infringed, Grain Drill Manufacturer's Co. *v.* Rude, 23 Fed. Rep., 348.
- 66773.** Averill, D. R. July 16, 1867. Paint Compound.
Reissue No. 7031, April 4, 1876.
Held void for new matter, Averill Chemical Paint Co. *v.* National Mixed Paint Co., 9 Fed. Rep., 462.
- 66938.** Blair, J. B. July 23, 1867. Rubber Head for Lead Pencils.
Held wanting in invention and void, Rubber Tip Pencil Co. *v.* Howard, 9 Blatch., 490.
Construed and held void for want of novelty, Rubber Tip Pencil Co. *v.* Howard, 20 Wall., 498.
- 67046.** Hall, J. L. July 23, 1867. Safe Doors.
Claim 3 held to have been in public use and on sale for more than two years prior to date of application; held wanting in novelty and in invention, Hall *v.* Macneale, 107 U. S., 90.
- 67117.** Hunt, W. D. July 23, 1867. Barbed Fence Wire.
Reissue No. 6976, March 7, 1876.
Construed and compared with original; claim limited to invention shown therein, and sustained, Washburn & Moen Mfg. Co. *v.* Haish, 10 Biss., 83. Held novel in view of state of art, useful, valid, and infringed, *Ibid.*, 10 Biss., 63. See, also, Washburn & Moen Mfg. Co. *v.* Crowell, 1 Fed. Rep., 225; Iowa Barbed Steel Wire Co., *In re*, 5 Ban. & Ard., 279.
- 67222.** Sherman, J. H. July 30, 1867. Rolling Coulters.
Held not infringed, Manny *v.* Oyler, 16 Fed. Rep., 658.
- 67283.** Frost, C. H. July 30, 1867. Stove.
Reissue No. 5894, June 2, 1874.
Claims 4 and 11 held invalid for aggregation and want of invention, Perry *v.* Co-operative Foundry Co., 12 Fed. Rep., 436.
- 67398.** Bailey, L. Aug. 6, 1867. Bench Plane.
Reissue No. 6498, June 22, 1875.
Claims 3 and 4 construed, held novel and infringed, Stanley Rule & Level Co. *v.* Bailey, 14 Blatch., 510.
- 67470.** Weston, T. A. Aug. 6, 1867. Pulley.
Sustained; application held not abandoned, Weston *v.* White, 13 Blatch., 448. Term held limited by prior foreign patent to patentee, *Ibid.*, 13 Blatch., 364.
- 67642.** Garretson, O. S. Aug. 13, 1867. Mop-head.
Taylor *v.* Garretson, 9 Blatch., 156; Garretson *v.* Clark, 14 O. G., 485; 111 U. S., 120.
- 68248.** Smith & Denniston. Aug. 27, 1867. Stone Crusher.
Held wanting in patentable invention; claim 1 is for patentable subject-matter, Smith *v.* Frazer, 5 Fish., 543.
- 68282.** Brown, C. Aug. 27, 1867. Baling Hay.
Validity doubted, as being for the application of a well known process to an analogous object, Faulks *v.* Kamp, 17 Blatch., 432. See, also, Faulks *v.* Kamp, 10 Fed. Rep., 675.
- 68322.** Hyatt, T. Aug. 27, 1867. Illuminating Roofs.
Reissue No. 9883, Sept. 27, 1881.
Decreed invalid for claims broader than original, and for delay in reissuing, Hyatt *v.* Southworth, 15 Fed. Rep., 751. See, also, Lake *v.* Fitzgerald, 6 Fish., 420.
- 68361.** Goldwaith, J. F. Sept. 3, 1867. Shoe Buttoner.
Brooks *v.* Moorehouse, 3 Ban. & Ard., 229.
- 68426.** Everest, B. H. Sept. 3, 1867. Apparatus for Distilling Petroleum.
Claims 1 and 12 void for want of novelty, Vacuum Oil Co. *v.* Buffalo Lubricating Oil Co., 23 Fed. Rep., 891.
- 68446.** Konold, C. Sept. 3, 1867. Die for Swaging, etc.
Held novel and not invalidated by doubtful evidence of priority of invention, Konold *v.* Klein, 3 Ban. & Ard., 226.
- 68595.** Bickford, D. Sept. 10, 1867. Knitting Machine.
Held novel and infringed, Bickford *v.* Laporte, 2 Fed. Rep., 214.
- 68633.** Magoun, J. Sept. 10, 1867. Mold for making Glass Goblets.
Magoun *v.* New England Glass Co., 3 Ban. & Ard., 114.
- 68656.** Salgee, O. Sept. 10, 1867. Hose Coupling.
Held infringed, Watson *v.* Smith, 7 Fed. Rep., 350.

- 68674.** Wheeler, L. H. Sept. 10, 1867. Wind-mill.
Reissue No. 8826, July 29, 1879.
Construed and held not infringed, *Eclipse Wind-mill Co. v. May*, 17 Fed. Rep., 344.
- 68808.** Tucker, W. C. Sept. 10, 1867. Carriage Axles.
Reissue No. 8719, May 20, 1879.
Construed and limited in view of original and state of art, and held not infringed, *Ives v. Hartford Spring & Axle Co.*, 11 Fed. Rep., 510.
- 69176.** Campbell, Wm. Sept. 24, 1867. Curtain Fixture.
Reissue No. 7367, Oct. 31, 1876.
Held valid, the delay in reissuing having arisen from actual mistake developed by testimony in a suit, and being that from which no innocent person could have suffered, *Hartshorn v. Eagle Shade Roller Co.*, 18 Fed. Rep., 90.
- 69255.** Schröder, J. Sept. 24, 1867. Cultivator.
Reissue No. 7497, Feb. 6, 1877.
Construed and limited to a combination of old elements, and held not infringed, *Pattee v. Moline Plow Co.*, 10 Biss., 377.
- 69629.** Cleveland, C. H. Oct. 8, 1867. Suspender.
Construed, *Cleveland v. Towle*, 3 Fish., 525.
- 69713.** Shireman, J. H. Oct. 8, 1867. Horse Hay-rake.
Reissue No. 7988, Dec. 11, 1877.
Held novel, patentable; for same invention as original, and is infringed, *Wisner v. Dodd*, 2 Fed. Rep., 781. Construed to be for a novel combination; claims 4, 5 and 6 sustained, *Wisner v. Grant*, 7 Fed. Rep., 485. Construed to be for a novel combination with new mode of operation; claim 2 is not for a patentable combination in view of state of art; claims 4, 5 and 6 infringed, *Wisner v. Grant*, 5 Ban. & Ard., 215.
- 69789.** Flood, E. F. Oct. 15, 1867. Wagon Reach.
Construed to be for change of form not involving patentable invention, and held wanting in novelty, *Flood v. Hicks*, 2 Biss., 169.
- 70063.** Allen, E. Oct. 22, 1867. Mechanical Movement.
Hill v. Whitcomb, 1 Holmes, 317.
- 70075.** Curtis & Worden. Oct. 22, 1867. Whip Socket.
Reissue No. 8581, Feb. 18, 1879.
Sustained; patentees held joint inventors; not anticipated by abandoned experiment; claim 4 void for new matter and want of invention, *Worden v. Fisher*, 11 Fed. Rep., 505. Claims 1, 2 and 3 construed; held valid and infringed in conformity with above, *Worden v. Searls*, 21 Fed. Rep., 406. See, also, *Searls v. Worden*, 21 O. G., 1955.
- 70309.** Wyman, H. Oct. 29, 1867. Shuttle Box Mechanism for Looms.
Reissue No. 6567, July 27, 1875.
Construed to be for a new combination of new parts, and not infringed by use of old parts common to it and to prior machines, *Crompton v. Knowles*, 7 Fed. Rep., 204.
- 70324.** Dike, S. Oct. 29, 1867. Truss and Supporter.
Held to differ in degree only from prior inventions, and is wanting in novelty, *Elastic Truss Co. v. Page*, 4 Ban. & Ard., 328.
- 70627.** Scott, E. W. Nov. 5, 1867. Whip Socket.
Reissue No. 5400, March 6, 1873.
Construed and held valid in view of original and state of art; infringed by patentable improvement embracing the invention, *Searls v. Van Nest*, 3 Ban. & Ard., 121. Construed in view of drawings and specification to be for same invention as original; held novel, valid and infringed, *Searls v. Worden*, 11 Fed. Rep., 501.
- 70728.** Lockwood, J. K. Nov. 12, 1867. Circular Saw.
Reissue No. 8076, Feb. 5, 1878.
Construed to be for a different invention from original and held void, *Curtis v. Branch*, 5 Ban. & Ard., 189.
- 70773.** Allen, E. Nov. 12, 1867. Printing Press.
Hill v. Whitcomb, 1 Holmes, 317.
- 71241.** Stewart, T. B. Nov. 19, 1867. Car Axle Boxes.
Reissue No. 3243, Dec. 22, 1868.
Claim 1, if broadly construed, is wanting in novelty; not infringed if limited, *Baltimore Car Wheel Co. v. North Baltimore Passenger R'y Co.*, 21 Fed. Rep., 47.
- 71244.** Thatcher, J. M. Nov. 19, 1867. Air-heating Furnace.
Construed, held novel, and not infringed, *Thatcher Heating Co. v. Spear*, 1 Fed. Rep., 411. Construed, held novel, patentable, and infringed, *Thatcher Heating Co. v. Carbon Stove Co.*, 4 Ban. & Ard., 68.

- 71560.** Watt, G. Nov. 26, 1867. Plow.
Reissue No. 3609, Aug. 17, 1869.
Watt *v.* Starke, 17 O. G., 1092.
- 71643.** Richardson, G. B. Dec. 3, 1867. Salt Bottle Caster.
Construed to be an improvement upon and infringement of Crossman's patent, Star Salt Caster Co. *v.* Crossman, 4 Cliff., 568. Infringed, *Ibid.*, 3 Ban. & Ard., 281; Star Salt Caster Co. *v.* Alden, 10 Fed. Rep., 555.
- 71680.** Barry, C. Dec. 3, 1867. Machine for making Tin Cans.
Reissue No. 3143, Oct. 6, 1868.
Claim 3 construed and limited in view of specification, and held wanting in novelty, Barry *v.* Gugenheim, 5 Fish., 452.
- 71873.** Harris, J. Dec. 10, 1867. Car Axle Boxes.
Reissue No. 9881, Sept. 27, 1881.
Claim 3 held void and abandoned by delay in reissuing, Baltimore Car Wheel Co. *v.* North Baltimore Passenger R'y Co., 21 Fed. Rep., 47.
- 72061.** Martin, E. & P. E. Dec. 10, 1867. Process for refining and converting Cast Iron into Cast Steel.
Hewitt *v.* Pennsylvania Steel Co., 31 O. G., 1687.
- 72110.** Stow, H. W. Dec. 10, 1867. Pavement.
Reissue No. 3274, Jan. 19, 1869.
Void in part for want of novelty, Stow *v.* City of Chicago, 8 Biss., 47. Claims 1 and 3 construed, limited, and held wanting in novelty in view of state of art, *Ibid.*, 104 U. S., 547.
- 72324.** Pauly, W. Dec. 17, 1867. Comb.
India Rubber Co. *v.* Phelps, 8 Blatch., 85.
- 72360.** Brady, E. L. Dec. 17, 1867. Dredge-boat.
Reviewed, not anticipated, sustained, and held infringed, Brady *v.* Atlantic Works, 4 Cliff., 408. Held to involve mechanical skill only, and wanting in patentable novelty, Atlantic Works *v.* Brady, 107 U. S., 192. See, also, Brady *v.* Atlantic Works, 3 Ban. & Ard., 577.
- 72505.** Kirby, J. Dec. 24, 1867. Bung Cutter.
Held not infringed, Kirby Bung Mfg. Co. *v.* White, 1 McCrary, 155. See, also, Kirby *v.* Armstrong, 10 Biss., 135.
- 72946.** Webb, R. L. Dec. 31, 1867. Reversible Locks and Latches.
Patentee held first and original inventor; is not an abandoned experiment, and was not abandoned, Russell & Erwin Mfg. Co. *v.* Mallory, 10 Blatch., 140. Construed, and held infringed by use with supperadded device, Russell & Erwin Mfg. Co. *v.* Corbin, 12 Blatch., 36.

1868.

- 72988.** Eaton, J. S. Jan. 7, 1868. Trunk.
Maier *v.* Brown, 17 Fed. Rep., 736.
- 73012.** Irwin, J. H. Jan. 7, 1868. Lamp.
Construed in view of state of art; held novel and infringed, Irwin *v.* Dane, 9 O. G., 642. Infringed *prima facie*, *Ibid.*, 2 Biss., 442.
Reissue No. 8611, March 4, 1879.
Considered, Steam Gauge & Lantern Co. *v.* Miller & Co., 8 Fed. Rep., 314. Held not infringed, *Ibid.*, 21 Fed. Rep., 514.
- 73255.** Morse, Wm. A. Jan. 14, 1868. Pens.
Examined and held infringed, Morse Fountain Pen Co. *v.* Esterbrook Steel Pen Mfg. Co., 3 Fish., 515.
- 73259.** Owens, J. A. Jan. 14, 1878. Starch Manufacture.
Reissue No. 9732, May 31, 1881.
Sustained, New York Grape Sugar Co. *v.* American Grape Sugar Co., 10 Fed. Rep., 835.
- 73279.** Amidon, C. H. Jan. 14, 1868. Bit Stock.
Construed; held not anticipated and is infringed, Miller's Falls Co. *v.* Ives & Co., 14 Blatch., 169.
- 73425.** Green, N. W. Jan. 14, 1868. Driven Wells.
Reissue No. 4372, May 9, 1871.
Construed to be for a patentable combination of old elements to apply a new idea, constituting a new and useful process; was not abandoned; patentee held first and original inventor, Andrews *v.* Carman, 13 Blatch., 307. Construed; held novel, useful and not abandoned, Andrews *v.* Wright, 3 Ban. & Ard., 329; *v.* Cross, 19 Blatch., 294. Construed and held not infringed, Andrews *v.* Long, 2 McCrary, 577. Held infringed, Andrews *v.* Creegan, 19 Blatch., 113; Green *v.* Gardner, 22 O. G., 683.
Sustained, in view of prior decisions, and held infringed, Andrews *v.* Eames, 15 Fed.

Rep., 109. Sustained, in view of prior decisions, and held novel, in view of conflicting evidence, *Green v. French*, 11 Fed. Rep., 591. Held to be for a different invention from original, wanting in novelty and abandoned, *Andrews v. Hovey*, 16 Fed. Rep., 387. See, also, *Green v. French*, 4 Ban. & Ard., 169; *v. Barney*, 19 Fed. Rep., 420; *Andrews v. Spear*, 4 Dill., 472; 2 Ban. & Ard., 602; *v. Denslow*, 14 Blatch., 182.

73524. Golay, S. Jan. 21, 1868. Millstone Dressing.

Claims 1 and 3 invalid and void, in view of interfering patent No. 38,670, *Gilmore v. Golay*, 3 Fish., 522.

73684. Wood, J. H. Jan. 21, 1868. Coal Wagon.

Claims construed to be for the separate old elements of the combination, and not for the combination; held wanting in novelty, *Delaware Coal and Ice Co. v. Packer*, 1 Fed. Rep., 851. Construed and held not infringed, *Ibid.*, 24 O. G., 1273.

Reissue No. 9368, Aug. 31, 1830.

Claim 1 held void for aggregation; claim 2 held to be for a novel and patentable combination, and not for an aggregation, *Wood v. Packer*, 17 Fed. Rep., 650.

73597. Crane, T. Jan. 28, 1868. Knitting Machine.

Reissue No. 7338, Oct. 31, 1876.

Decreed valid, *Franz & Pope Knitting Machine Co. v. Bickford*, 18 O. G., 734. Declared good, valid and infringed, *Franz & Pope Knitting Machine Co. v. Lamb Knitting Machine Mfg. Co.*, 19 O. G., 1000.

73938. Straus, L. Jan. 28, 1868. Apparatus for Cleaning Privies.

Held infringed, *Odorless Excavating Co. v. Lauman*, 12 Fed. Rep., 788; *v. McCauley*, 2 Ban. & Ard., 570.

73943. Allen, E. Feb. 4, 1868. Printing Press.

Hill v. Whitcomb, 1 Holmes, 317.

74068. Fischer, V. Feb. 4, 1868. Sheet Metal Molding Machine.

Claim 4 held infringed, *Fischer v. Neil*, 6 Fed. Rep., 89; *v. O'Shaughnessey*, 6 Fed. Rep., 92. Claims 2 and 4 construed, and held novel, *Fisher v. Wilson*, 16 Blatch., 220; *v. Hayes*, 19 Blatch., 26. See, also, *Fischer v. Hayes*, 16 Fed. Rep., 469; 22 Fed. Rep., 92; 22 Fed. Rep., 529; 20 O. G., 242; 20 O. G., 601; 20 O. G., 672.

74254. Bein & Ulrich. Feb. 11, 1867. Children's Carriage.

Held not anticipated by an imperfect experiment; is novel, and infringed by sale of part with intent to have it combined as in the patent, *Richardson v. Noyes*, 2 Ban. & Ard., 398.

74342. Graham, A. B. Feb. 11, 1868. Harvester.

Sustained as novel, and held infringed, *Graham v. McCormick*, 10 Biss., 39. Sustained in conformity with above; held infringed, *Graham v. Geneva Lake Mfg. Co.*, 11 Fed. Rep., 138.

74379. Kelly, M. Feb. 11, 1868. Barbed Fence Wire.

Reissue No. 6902, Feb. 9, 1876.

Construed; compared with original, and sustained, *Washburn & Moen Mfg. Co. v. Haish*, 10 Biss., 83. Held novel in view of state of art; valid and infringed, *Ibid.*, 10 Biss., 65. Construed in view of original; void for expanded claim and laches in reissuing, *Washburn & Moen Mfg. Co. v. Fuchs*, 16 Fed. Rep., 661. See, also, *Washburn & Moen Mfg. Co. v. Haish*, 9 Biss., 141; *v. Crowell & Co.*, 1 Fed. Rep., 225; *Iowa Barbed Steel Wire Co., In re*, 5 Ban. & Ard., 279.

74392. Mallory, G. Feb. 11, 1868. Hats.

Held to involve invention and is novel; claim construed and limited in order to be sustained, *Mallory Mfg. Co. v. Marks*, 11 Fed. Rep., 887. Construed in conformity with above and held not infringed, *Mallory Mfg. Co. v. Hickok*, 20 Fed. Rep., 116; *v. Hickok*, 25 Fed. Rep., 827.

74435. Shelton, C. R. Feb. 11, 1868. Whip Tip.

Reissue No. 7382, Nov. 7, 1876.

Construed and limited to particular device in order to be sustained; is not infringed, *American Whip Co. v. Hampden Whip Co.*, 1 Fed. Rep., 87.

74515. Davis, C. F. Feb. 18, 1868. Grain Drill.

Reissue No. 8589, Feb. 18, 1879.

Construed; held novel, valid and infringed, *Davis v. Brown*, 19 Blatch., 263.

74613. Shaw. Feb. 18, 1868. Lead Pipe.

Reissue No. 3744, Nov. 23, 1869.

Claim 2 construed; held novel, valid and infringed, *Shaw v. Colwell Lead Co.*, 11 Fed. Rep., 711.

74672. De Forest & Gilbert. Feb. 18, 1868. Spring for Hoop Skirt.

Construed and held infringed, *Young v. Lippman*, 9 Blatch., 277. See, also, *Young v. Lippman*, 2 O. G., 342.

- 74723.** Semple, E. Feb. 18, 1868. Trunk Fastening.
Reissue No. 8521, Dec. 10, 1878.
If broadly construed is invalid; not infringed, if limited, *Cowell v. Sessions*, 17 Fed. Rep., 450.
- 74862.** Stow, H. W. Feb. 25, 1868. Street Pavement.
Construed to be for non-patentable substitution of a new material, and held wanting in novelty, *Stow v. City of Chicago*, 8 Biss., 47.
- 75217.** Taylor, G. H. March 3, 1868. Exercise Apparatus.
Construed and held infringed; patentee held first and original inventor, *Taylor v. Wood*, 12 Blatch., 110.
- 75218.** Taylor, G. H. March 3, 1868. Exercise Apparatus.
Construed and held infringed; patentee held first and original inventor, *Taylor v. Wood*, 12 Blatch., 110.
- 75344.** Bailey, Jr., T. R. March 10, 1868. Hydrant.
Reissue No. 6990, March 14, 1876.
Claim 1 held to be for entirely new invention not claimed or suggested in original, and void for abandonment by delay in reissuing; claim 3 limited and held wanting in novelty, *Flower v. City of Detroit*, 22 Fed. Rep., 292.
- 75383.** Davis, J. S. March 10, 1868. Harvester.
Toledo Mower & Reaper Co. v. Johnston Harvester Co., 32 O. G., 1010.
- 76343.** Pfeil, J. C. Apr. 7, 1868. Rolling Coulters.
Reissue No. 4533, Aug. 29, 1871.
Construed and held wanting in novelty, *Manny v. Oyler*, 16 Fed. Rep., 658.
- 76394.** Brock, W. E. April 7, 1868. Dummies for Clothing.
Construed to be for a mere substitution of old material, for a cognate use, and held wanting in patentable novelty in view of state of art, *Palmenbing v. Buchholz*, 23 O. G., 632.
- 76491.** McFarland & Campbell. Apr. 7, 1868. Metal Tenon for Blind Slats.
Sustained and held infringed, *McFarland v. Spencer*, 23 Fed. Rep., 150.
- 76646.** McGill, Wm. C. Apr. 14, 1868. Conductor's Register.
Claim 1 construed and held wanting in novelty, *Railway Register Mfg Co. v. Highland St. R'y Co.*, 4 Ban. & Ard., 116.
- 76654.** Page, C. G. Apr. 14, 1868. Induction Coil and Circuit Breaker.
Reissue No. 4588, Oct. 10, 1871.
Claims 11, 12 and 13 construed; held valid and infringed; novelty sustained. Patent construed in view of the special act granting it, *Page v. Holmes Burglar Alarm Co.*, 17 Blatch., 484. See, also, *Page v. Holmes Burglar Alarm Co.*, 18 Blatch., 118; *Gamewell Fire Alarm Telegraph Co. v. City of Chilicothe*, 7 Fed. Rep., 351.
- 79651.** Johnson & Sumner. July 7, 1868. Lumber Drier.
Curren v. Burdsall, 27 O. G., 1319.
- 76760.** Holden, C. B. Apr. 14, 1868. Hay Rake.
Reissue No. 8475, Nov. 5, 1878.
Broad claim intended to be secured, held wanting in novelty, *Wisnor v. Grant*, 7 Fed. Rep., 922.
- 76773.** Johns, H. W. Apr. 14, 1868. Roofing Composition.
Reissue No. 5951, June 30, 1874.
Held to be for a different invention from that described in the original, *United States & Foreign Salamander Felting Co. v. Haven*, 3 Dill., 131.
- 76834.** Smith, E. J. Apr. 14, 1868. File Holder.
Reissue No. 4864, Apr. 9, 1872.
Held not infringed, *Smith v. Woodruff*, 1 MacArthur, 459.
- 76993.** Calahan, E. A. Apr. 21, 1868. Printing Telegraph.
Reissue No. 3810, Jan. 25, 1870.
Sustained as to sufficiency of reissue petition and oath; claim 3 held novel and infringed, *Gold and Stock Telegraph Co. v. Wiley*, 17 Fed. Rep., 234. Claim 2 construed in view of state of art; held not to enlarge the original claim, and is infringed. Term held not limited by English patent sealed five months after issue of the domestic patent, although filed at a date prior to such issue, *Gold and Stock Telegraph Co. v. Commercial Telegraph Co.*, 23 Fed. Rep., 340. See, also, *Gold and Stock Telegraph Co. v. Pearce*, 19 Fed. Rep., 419; *v. Commercial Telegraph Co.*, 22 Fed. Rep., 838.
- 77482.** Griffiths, H. S. May 5, 1868. Suspension Ring for Business Cards.
Reissue No. 5067, Sept. 24, 1872.
Construed, and held wanting in novelty, *Griffiths v. Holmes*, 8 Fed. Rep., 154.

- 77512.** Mershon, A. H. May 5, 1868. Damper for Hot Air Furnaces.
Reissue No. 4695, Jan. 2, 1872.
Mershon *v.* Pease Furnace Co., 32 O. G., 1011.
- 77706.** Arden, H. May 5, 1868. Car Elevator.
Reissue No. 7042, April 11, 1876.
Enlarged claims 1 to 7 held void for delay in reissuing; claims 8 to 12 not infringed,
Arden *v.* Jewett, 32 O. G., 1240.
- 77715.** Chabot, C. May 12, 1868. Sewing Machine.
Chabot *v.* American Button Hole, etc., Co., 6 Fish., 71.
- 77933.** Taylor, G. H. May 12, 1878. Exercise Apparatus.
Construed, and held infringed, Taylor *v.* Wood, 12 Blatch., 110.
- 77938.** Welling, Wm. M. May 12, 1868. Artificial Ivory.
Reissue No. 5940, June 30, 1874.
Construed, and limited in view of state of art, and held infringed, Welling *v.* La Bau,
12 Fed. Rep., 875.
- 78317.** Nobel, A. May 26, 1868. Explosive Compound.
Reissue No. 5799, March 17, 1874.
Novelty sustained, Atlantic Giant Powder Co. *v.* Parker, 16 Blatch., 281. Novelty and
validity sustained, and held infringed, Atlantic Giant Powder Co. *v.* Rand, 16 Blatch.,
250. Void for claim including new matter, Atlantic Giant Powder Co. *v.* California Vig-
orit Powder Co., 6 Sawyer, 508. Is for same invention as original; sustained and held not
infringed, Atlantic Giant Powder Co. *v.* Dittmar Powder Co., 17 Blatch., 531.
Construed and held infringed by substitution of an equivalent for one of the elements,
Ibid., 20 O. G., 1380. Construed; held not broader than original; sustained and infringed
by a patentable improvement in which an equivalent is substituted, Atlantic Giant Pow-
der Co. *v.* Mowbray, 12 O. G., III. Construed, held valid and infringed, Atlantic Giant
Powder Co. *v.* Goodyear, 3 Ban. & Ard., 161. See, also, Atlantic Giant Powder Co. *v.*
California Vigorit Powder Co., 98 U. S., 126; 5 Fed. Rep., 196.
Reissue No. 10,267, Jan. 9, 1883.
Not void for being reissued in identical form of original, Giant Powder Co. *v.* Safety
Nitro Powder Co., 19 Fed. Rep., 509.
- 78320.** Owens, J. A. May 26, 1868. Starch Tray.
Validity doubted, New York Grape Sugar Co. *v.* American Grape Sugar Co., 10 Fed.
Rep., 835. Construed to be for substitution of material not involving invention, New York
Grape Sugar Co. *v.* Buffalo Grape Sugar Co., 18 Fed. Rep., 638.
- 78644.** Chase, S. E. June 9, 1868. Finishing Nails.
Reissue No. 5207, Dec. 31, 1872.
Claim 2 held substantially the same as claim 1 of original. Sustained; held novel and
infringed. Globe Nail Co. *v.* U. S. Horse Nail Co., 19 Fed. Rep., 819.
- 78769.** Swan, J. June 9, 1868. Machine for making Curved Augers.
Reissue No. 5624, Oct. 21, 1873.
Construed; held novel; combination claim 1 held not infringed; claim 2, to the art,
infringed, Bruff *v.* Ives, 14 Blatch., 198.
- 78829.** Reedy, H. J. June 9, 1868. Hoisting Machines.
Reedy *v.* Scott, 23 Wall., 352.
- 78854.** Adair, W. June 16, 1868. Pump.
Adair *v.* Thayer, 20 O. G., 523.
- 78880.** Lemman, J. June 16, 1868. Band Saw Guide.
Construed and not infringed, Fay *v.* Cordesman Bros., 109 U. S., 408
- 78932.** Davis, W. June 16, 1868. Preserving Meat.
Reissue No. 3119, Sept. 15, 1868.
Claims held to be for different invention from original in view of ambiguous original
drawings, and void to that extent, Hammond *v.* Franklin, 22 Fed. Rep., 833.
- 78958.** Guillod, E. June 16, 1868. Construction of Drilling Jars.
Sustained as involving patentable invention, Dick *v.* Oil Well Supply Co., 25 Fed. Rep.,
105. See, also, Dick *v.* Struthers, 25 Fed. Rep., 103.
- 79279.** Taylor, H. June 23, 1868. Lubricator.
Patentee held prior inventor, notwithstanding an accidental prior making of a single
similar article by defendant, Pelton & Taylor *v.* Waters, 1 Ban. & Ard., 599.
- 79528.** Benson, S. June 30, 1868. Mill-gearing.
Gates *v.* Benson, Comm'r's Decisions for 1870, p. 65.
- 79534.** Mellen, G. H. June 30, 1868. Baby Jumper.
Sustained; claim 1 infringed, Tibbats *v.* Daby, 11 Fed. Rep., 903.
- 79661.** See ¶ 12, p. 785.

- 79958.** Crosby, R. R. July 14, 1868. Lamp Chimney.
Reissue No. 7659, May 8, 1877.
Sustained as novel, valid, and infringed, *Shirley v. Sanderson*, 8 Fed. Rep., 905. Held to be for a combination not claimed in the original and intentionally omitted therefrom; void for delay in reissuing, *Shirley v. Mayer*, 25 Fed. Rep., 38.
- 79989.** Lazear, H. Y. July 14, 1868. Gas Heater.
Construed and held novel, *Sharp v. Dover Stamping Co.*, 103 U. S., 250.
- 80121.** Bickford. July 21, 1868. Knitting Machine.
Reissue No. 6423, May 11, 1875.
Sustained as valid, in the absence of original in evidence; held novel and infringed, *Bickford v. Laporte*, 2 Fed. Rep., 214.
- 80235.** Stuart & Wenyss. July 21, 1868. Guard Plate for Stove.
Construed; held useful, novel, and infringed, *Stuart v. Schantz*, 6 Fish., 35.
- 80269.** Bostock, E. July 28, 1868. Sewing Machine Tuck-creaser.
Held novel and infringed by improvement, *Bostock v. Goodrich*, 21 Fed. Rep., 316. Construed to be for improvements on old machines, *Ibid.*, 25 Fed. Rep., 819.
- 80492.** Lewis, S. July 28, 1868. Still Water Dam.
Construed and held not infringed, *Cammeyer v. Newton*, 12 Blatch., 122; 94 U. S., 225.
Reissue No. 6249, Jan. 26, 1875.
Construed, and held to omit an essential element of the original, and to contain a combination claim not in the original; is void, *Ibid.*, 4 Ban. & Ard., 159.
- 80774.** Sladdin, J. Aug. 4, 1868. Machine for making Loom Harness.
Reissues Nos. 4509 and 4510, July 8, 1871.
Emmons v. Sladdin, 2 Ban. & Ard., 199.
- 81010.** Roots, P. H. & F. M. Aug. 11, 1868. Cases for Rotary Blowers.
Reissue No. 3570, July 27, 1869.
Construed; sustained, and held infringed, *Hyndman v. Root*, 97 U. S., 224. Liberally construed; held novel, and infringed by use of a readily-adopted and well-known substitute, *Root v. Hyndman*, 6 Fish., 439.
- 81132.** Brickill, W. A. Aug. 18, 1868. Feed Water Heater.
Construed and sustained, *Brickill v. City of New York*, 18 Blatch., 273.
- 81432.** Tarrent, E. Aug. 25, 1868. Turning Machine.
Reissue No. 5487, July 15, 1873.
Claim construed to be for a different invention from original, and void, *Torrent & Arms Lumber Co. v. Rodgers*, 112 U. S., 659.
- 81743.** Broadnax. Sept. 1, 1868. Apparatus for Rendering Lard.
Reissue No. 5925, June 23, 1874.
Construed and limited in view of state of art, and held not infringed, *Broadnax v. Central Stock Yard & Transit Co.*, 4 Fed. Rep., 214.
- 81888.** Gilbert, C. Sept. 8, 1868. Starch Separator.
Sustained, *New York Grape Sugar Co. v. American Grape Sugar Co.*, 10 Fed. Rep., 835.
Declared valid, *New York Grape Sugar Co. v. Buffalo Grape Sugar Co.*, 18 Fed. Rep., 638.
See, also, *New York Grape Sugar Co. v. Buffalo Grape Sugar Co.*, 20 Fed. Rep., 505; 32 O. C., 1356; *v. Peoria Grape Sugar Co.*, 21 Fed. Rep., 878.
- 81948.** Roach, F. Sept. 8, 1868. Self-closing Faucet.
Reissue No. 7571, March 27, 1877.
Held not infringed, *Zane v. Peck*, 9 Fed. Rep., 101.
- 82262.** Wintergerst, C. Sept. 15, 1868. Vapor Burner.
Reissue No. 8784, July 1, 1879.
Held invalid for expansion of original invention and changed claims, *Doane & Wellington Mfg. Co. v. Smith*, 15 Fed. Rep., 459.
- 82580.** Babcock, F. Sept. 29, 1868. Window Sash Holder.
Construed and limited to a combination of old elements, and held novel and infringed, *Babcock v. Judd*, 1 Fed. Rep., 408.
Reissue No. 9301, July 20, 1880.
Claim 3 held not infringed by the substitution of a new element in the combination of old elements, *Ibid.*, 15 Fed. Rep., 160.
- 82606.** Crouch, G. Sept. 29, 1868. Shawl Strap.
Reissue No. 4289, March 7, 1871.
Construed to be for improvement in degree by substitution of a well known equivalent, and held void for want of invention and novelty, *Crouch v. Roemer*, 103 U. S., 797. Void for prior knowledge and use, *Crouch v. Roemer*, 2 Ban. & Ard., 637. Sustained as useful and novel; claims 1 and 2 infringed, *Crouch v. Speer*, 1 Ban. & Ard., 145.

83283. Huie, H. R. Oct. 20, 1868. Gang Plow.

Construed to be for a combination of old elements, *Carter v. Baker*, 1 Sawyer, 512.

83497. Hicks, P. Oct. 27, 1868. Wagon Reach.

Construed to be for a mere substitution of material, not involving invention, *Hicks v. Kelsey*, 18 Wall., 670.

83909. Bonnaz, A. Nov. 10, 1868. Sewing Machines for Embroidering.

Infringement found, *Cornely v. Hendrickx*, 12 O. G., 431.

83910. Bonnaz, A. Nov. 10, 1868. Sewing Machines for Embroidering.

Infringement found, *Cornely v. Hendrickx*, 12 O. G., 431. Held not invalid because its prior French patent had been adjudged invalid abroad, *Cornely v. Marckwald*, 17 Fed. Rep., 83.

83924. Cabell, S. G. Nov. 10, 1868. Fluting Machine.

Reissue No. 4653, Nov. 28, 1871.

Novelty and validity sustained; claims 1 and 2 infringed, *Knox v. Loweree*, 1 Ban. & Ard., 589.

83925. Cahill, M. S. Nov. 10, 1868. Bronzing Leather.

Construed; held useful, properly described, novel, and not anticipated by certain vague formulæ; is valid and infringed, *Cahill v. Brown*, 3 Ban. & Ard., 580. Held, in view of state of art to be for a new and useful invention; is sufficiently described, and infringed, *Cahill v. Beckford*, 1 Holmes, 48.

84062. Kelly, M. Nov. 17, 1868. Barbed Fence Wire.

Reissue No. 7035, April 4, 1876.

Held wanting in invention, *Washburn & Moen Mfg. Co. v. Haish*, 10 Biss., 65.

Reissue No. 7036, April 4, 1876.

Washburn & Moen Mfg. Co. v. Crowell, 1 Fed. Rep., 225; *Iowa Barbed Steel Wire Co., In re*, 5 Ban. & Ard., 279.

84517. Terry, S. B. Dec. 1, 1868. Pallets of Clock Escapements.

Held to involve invention in view of state of art, and sustained, *Terry Clock Co. v. New Haven Clock Co.*, 3 Ban. & Ard., 232. Construed to be broader than the invention, and wanting in novelty, *Ibid.*, 4 Ban. & Ard., 121.

84803. Davis, T. B. Dec. 8, 1868. Scoops.

Construed; held to involve invention, and not invalid for public use more than two years prior to date of application instituted without inventor's consent (acts 1836 and 1839), *Davis v. Fredericks*, 19 Fed. Rep., 99.

85374. Estabrook, J. M. Dec. 29, 1868. Screw Peg for Boots and Shoes.

Construed and limited in view of state of art in order to be sustained; not infringed as limited, *Estabrook v. Dunbar*, 2 Ban. & Ard., 427.

85472. Patric, C. E. Dec. 29, 1868. Grain Drill.

Reissue No. 6274, Feb. 2, 1875.

Construed; limited, and not infringed. *Grain Drill Manufacturer's Co. v. Rude*, 23 Fed. Rep., 348.

1869.

85526. Hinckel, F. Jan. 5, 1869. Washing Shavings.

Reissue No. 8099, Feb. 26, 1878.

Construed, in view of state of art, to be for a new combination of old parts and not for a process; is for same invention as original; novel, and infringed, *Brainard v. Cramme*, 12 Fed. Rep., 621.

85598. Lewis, S. Jan. 5, 1869. Adjustable Still Water Dam.

Cammeeyer v. Newton, 12 Blatch., 122.

85602. Morris, A. Jan. 5, 1869. Excavator.

Morris v. Shelbourne, 8 Blatch., 266.

85814. Guidet, C. Jan. 12, 1869. Pavement.

Reissue No. 4106, Aug. 23, 1870.

Held to be for a patentable invention, *Guidet v. Barber*, 5 O. G., 149. Held invalid for prior public use of device differing in degree only, *Guidet v. City of Brooklyn*, 3 Ban. & Ard., 291. Construed to be for improvement in degree, involving mechanical skill only and not invention; held void, *Ibid.*, 105 U. S., 550. See, also, *Guidet v. Palmer*, 10 Blatch., 217.

85963. Richardson, G. W. Jan. 19, 1869. Safety Valve.

Construed and limited in view of state of art, and not infringed as limited, *Consolidated Safety Valve Co. v. Kunkle*, 14 Fed. Rep., 732; *v. Crosby*, 7 Fed. Rep., 768. Held valid, novel and infringed, *Consolidated Safety Valve Co. v. Crosby Steam Gauge & Valve Co.*, 113 U. S., 157.

- 86112.** Sturges, R. C. Jan. 19, 1869. Harness Saddle Pad.
Held novel, *American Saddle Co. v. Hogg*, 1 Holmes, 177.
- 86115.** Van Marter, B. P. Jan. 19, 1869. Tub for Distilling Oils.
Reissue No. 3612, Aug. 17, 1869.
Construed and limited in view of state of art, and held not infringed, *Van Marter v. Miller*, 15 Blatch., 562.
- 86152.** Hancock, J. T. Jan. 26, 1869. Boiler Injector.
Not invalid because of attorney's oath in place of patentee's to amended specification (act 1836). Claims construed to be for combinations involving invention, and not for aggregations, and are sufficiently described in the specification. Held novel, useful and infringed, *Hancock Inspirator Co. v. Jenks*, 21 Fed. Rep., 911. See, also, *Hancock Inspirator Co. v. Jenks*, 19 Fed. Rep., 918.
- 86440.** Peard, J. Feb. 2, 1869. School Desks.
Claim 2 limited in view of state of art, and not infringed, *Peard v. Johnson*, 23 Fed. Rep., 507.
- 86549.** Irwin, J. H. Feb. 2, 1869. Lamp.
Construed, and held novel, *Irwin v. Dane*, 9 O. G., 642. See, also, *Irwin v. Dane*, 2 Biss., 442.
- 86841.** Kendall & Trested. Feb. 9, 1869. Coating Compound.
Held not infringed, *Baldwin v. Shultz*, 9 Blatch., 494.
- 87163.** Geier, P. Feb. 23, 1869. Rendering Wooden Bungs Impervious.
Construed and sustained, *Geir v. Goetinger*, 1 Ban. & Ard., 553.
- 87241.** Burdett, R. Feb. 23, 1869. Reed Organ.
Claim 1 construed and held novel; claim 2 held useful, patentable, and infringed; claim 4 held to be for an adaptation wanting in invention and novelty, *Burdett v. Estey*, 15 Blatch., 349. Claim 2 construed and held not infringed, *Ibid.*, 16 Blatch., 105. Construed, limited, and not infringed, *Estey v. Burdett*, 109 U. S., 633. See, also, *Burdett v. Estey*, 19 Blatch., 1.
- 87359.** Palmer, H. L. March 2, 1869. Apparatus for Lining Paper Board.
Reissue No. 8883, Sept. 2, 1879.
Construed to be for a combination of old elements, and not infringed by use of part only of the combination, *Faurot v. Hawes*, 3 Fed. Rep., 456.
- 87413.** Holly, B. March 2, 1869. Water Supply Regulator.
Reissue No. 5132, Nov. 5, 1872.
Claim 1 limited to original and sustained, *Holly v. Union City*, 14 O. G., 5. Claim construed to be for a combination and not for a principle; held novel, valid, and infringed by use with an improvement, *Holly v. Vergennes Machine Co.*, 18 Blatch., 327.
- 87628.** Brown, A. P. March 9, 1869. Wind Wheel.
Continental Windmill Co. v. Empire Windmill Co., 8 Blatch., 295.
- 87853.** Kappes, J. G. March 16, 1869. Mosaic Floor.
Construed to be for mechanical skill not involving invention; novelty doubted, *Kappes v. Hartung*, 23 Fed. Rep., 187.
- 87950.** Marinoni, A. H. March 16, 1869. Printing Press.
Held novel, useful and patentable; claim 3 construed to be for a combination in which the result is the product of the successive action of all the elementary parts; is infringed, *Hoe v. Cottrell*, 17 Blatch., 546.
- 88216.** Rutter, J. W. March 23, 1869. Ore and Stone Crusher.
Reissue No. 3633, Sept. 7, 1869.
Not void for laches in reissuing; claim 1 is for same invention as original; construed in view of model, and held infringed, *Frazer v. Gates & Scoville Iron Works*, 23 Fed. Rep., 439.
- 88287.** Fischer, L. March 30, 1869. Vapor Burner.
Reissue No. 7706, May 29, 1877.
Construed, held novel, sustained, and is not infringed, *Watkins v. City of Cincinnati*, 8 Fed. Rep., 325.
- 88318.** McGregor & Voll. March 30, 1869. Sash Fastener.
Reissue No. 6693, Oct. 11, 1875.
Construed and limited in view of prior inventions of one of the joint patentees, *Hopkins & Dickinson Mfg. Co. v. Corbin*, 14 Blatch., 396. Construed and limited in order to be sustained, and held not infringed, *Ibid.*, 103 U. S., 786.
- 88365.** Carstaedt. March 30, 1869. Take-up Mechanism for Looms.
Reissue No. 5150, Nov. 19, 1872.
Claims construed, limited, and held novel; claim 2 infringed, *Carstaedt v. United States Corset Co.*, 13 Blatch., 119. Infringed by substitution of an equivalent having additional functions, *Ibid.*, 13 Blatch., 371.

- 88413.** Robinson, J. G. March 30, 1869. Gang Plow.
Combination claim 1 construed and held invalid in view of state of art, and anticipated by devices which might lack some of the elements, but supplying them by the peculiar structure of other elements, *Gilbert v. Weir Plow Co.*, 22 Fed. Rep., 428.
- 88557.** Eichholtz, M. Apr. 6, 1869. Cultivator.
Reissue No. 7738, June 12, 1877.
Construed and limited to combination of old elements, and held not infringed, *Pattee v. Moline Plow Co.*, 10 Biss., 377.
- 88660.** O'Neil, A. Apr. 6, 1869. Sheet Copper Boiler.
Reissue No. 7913, Oct. 16, 1877.
Construed, and held not infringed by a process which omits one of its steps and substitutes another and different step, *Cotter v. New Haven Copper Co.*, 23 O. G., 740.
- 88765.** De Golyer. Apr. 6, 1869. Block Pavement.
Held wanting in novelty, *Stow v. City of Chicago*, 8 Biss., 47.
- 88830.** Andrews & Ogden. Apr. 13, 1869. Cheese Manufacture.
Reissue No. 6117, Nov. 3, 1874.
Hubbell v. De Land, 22 O. G., 1883.
- 88844.** Miles, D. Apr. 13, 1869. Extinguishing Fires.
Reissue No. 4994, July 16, 1872.
Claim 1 anticipated by prior invention; not novel, *Northwestern Fire Extinguisher Co. v. Phila. Fire Extinguisher Co.*, 1 Ban. & Ard., 177.
- 88929.** Westinghouse, Jr., G. April 13, 1869. Car Brake.
Reissue No. 5504, July 29, 1873.
Held valid, patentable and novel; claims 1 and 7 infringed, *Westinghouse v. Gardner*, etc., *Air Brake*, 2 Ban. & Ard., 55.
- 88971.** Matthews, E. G. April 13, 1869. Seeder and Planter.
Claim 1 construed to be for non-patentable substitution of material; claims 5 and 7 held infringed, *Holbrook v. Small*, 2 Ban. & Ard., 396. See, also, *Holbrook v. Small*, 3 Ban. & Ard., 625.
- 89025.** Carroll, W. T. April 20, 1869. Spinning Frame.
Reissue No. 6386, April 20, 1875.
Held valid, and not abandoned by prior sale of incomplete invention, *Draper v. Wattles*, 3 Ban. & Ard., 618.
- 89233.** Morgan, Jr., R. P. April 20, 1869. Elevated Railway.
Limited to particular devices, and held not infringed, *Morgan Elevated R'y Co. v. Pullman*, 14 Fed. Rep., 648.
- 89304.** Fulton, C. April 27, 1869. Stove.
Reissue No. 9252, June 15, 1880.
Claim 1 construed to be for a difference in degree, not involving invention, and is invalid, *Perry v. Co-operative Foundry Co.*, 12 Fed. Rep., 149.
- 89531.** Welling, Wm. M. April 27, 1869. Artificial Ivory.
Construed to be for the substitution in an old combination for an inert material of another equivalent inert material, and held wanting in invention, *Welling v. Crane*, 21 Fed. Rep., 707.
- 89620.** Bevin, A. G. May 4, 1869. Metallurgic Furnace.
Held to involve invention and utility; void for public use for more than two years prior to date of application, *Bevin v. East Hampton Bell Co.*, 5 Fish., 23.
- 89646.** Fisher, C. J. May 4, 1869. Horse Collar Pad.
If construed broadly is wanting in novelty; not infringed, if limited, *Voss v. Fisher*, 113 U. S., 213.
- 89770.** Irwin, J. H. May 4, 1869. Lamp.
Construed; held novel and infringed, *Irwin v. Dane*, 9 O. G., 642.
Reissue No. 8598, Feb. 25, 1879.
Held infringed, *Steam Gauge & Lantern Co. v. Miller*, 8 Fed. Rep., 314. Construed, and held not infringed, *Ibid.*, 21 Fed. Rep., 514. See, also, *Steam Gauge & Lantern Co. v. Miller*, 11 Fed. Rep., 718; *Irwin v. Dane*, 2 Biss., 442.
- 90143.** Wineman, P. May 18, 1869. Pump.
Reissue No. 7006, March 21, 1876.
Construed without reference to obvious error consisting in incorrect lettering of drawing, and held not infringed by a similar tube with a single flare in place of the two flares of the patent. *National Pump Cylinder Co. v. Simmons Hardware Co.*, 18 Fed. Rep., 324.
- 90268.** Ingels, J. May 18, 1869. Grain Drill.
Reissue No. 3976, May 17, 1870.
Sustained and held novel, *Ingels v. Mast*, 6 Fish., 415. See, also, *Ingels v. Mast*, 1 Flip., 424.

- 90284.** Merrill, J. May 18, 1869. Hydrocarbon Oils.
Construed to be for product of the described process, and not infringed as limited by a similar product of a different process, *Merrill v. Yeoman*, 1 Holmes, 331. Construed to have properly described and claimed a process, and not its product, *Ibid.*, 94 U. S., 568.
- 90334.** Atwood, J. May 25, 1869. Curing Fish.
Construed to be for a patentable improvement in the art, *Crowell v. Harlow*, 1 Fed. Rep., 140. Construed, and limited to process for curing fish, and not infringed by a like process used after the fish were cured, *Crowell v. Beardsley*, 12 Fed. Rep., 627. See, also, *Crowell v. Harlow*, 3 Ban. & Ard., 478; *v. Parmenter*, 3 Ban. & Ard., 480.
- 90443.** Gradewitz, S. May 25, 1869. Composition for Artificial Ivory.
Void for want of novelty, *Olendorf v. Eckler*, 2 Fed. Rep., 570.
- 90584.** Roberts, J. May 25, 1869. Step Cover.
Gosling v. Roberts, 22 O. G., 1785.
- 90902.** Whidden, H. F. June 1, 1869. Shoe Nail.
Held a novel, useful and patentable invention to corrugate a smooth shoe nail, in view of state of art, showing other different shoe nails had been corrugated before, *Dunbar v. Albert Tack Co.*, 4 Fed. Rep., 543. Held valid and infringed, *Dunbar v. Estabrook*, 4 Fed. Rep., 545.
- 90930.** Coll, H. June 8, 1869. Siphon Pump.
Sheriff v. Fulton, 22 O. G., 87.
- 91108.** Fletcher, A. C. June 8, 1869. Postage Stamp.
Construed, limited, and held not infringed, *Fletcher v. Selden*, 16 Blatch., 468; *v. Blake*, 19 O. G., 221.
- 91133.** Howard, J. June 8, 1869. Preparing Paper for Roofing.
Held novel, useful, patentable, not abandoned; patentee held first and original inventor; held infringed, *Howard v. Christy*, 2 Ban. & Ard., 457.
- 91144.** Matthews, E. G. June 8, 1869. Cultivator.
Claim 4 infringed, *Holbrook v. Small*, 2 Ban. & Ard., 396. See, also, *Holbrook v. Small*, 3 Ban. & Ard., 625.
- 91150.** Monce, S. G. June 8, 1869. Tool for Cutting Glass.
Held not anticipated by a prior cutter for a different purpose, where the same structure occurred accidentally and not intentionally; held not ambiguous, and is novel, *Monce v. Adams*, 12 Blatch., 1. Held wanting in novelty, *Monce v. Woodward*, 4 Ban. & Ard., 307.
- 91201.** Barry, Wm. June 15, 1869. Pipe Reamer and Squarer.
Construed to be for adaptation of a new use to an old device, not involving invention, but mere mechanical change, *Barry v. Crane Bros. Mfg. Co.*, 22 Fed. Rep., 396.
- 91474.** Moulé & Girdlestone. June 15, 1869. Water Closet.
Reissues Nos. 4137 and 4138, Oct. 4, 1870.
Earth Closet Co. v. Fenner, 5 Fish., 15.
- 92146.** Bickford. July 6, 1869. Knitting Machines.
Reissue No. 6424, May 11, 1875.
Sustained as valid in absence of original in evidence; held novel and infringed, *Bickford v. Laporte*, 2 Fed. Rep., 214.
- 92275.** Crane, M. G. July 6, 1869. Fire Alarm Signal.
Reissue No. 8896, Sept. 16, 1876.
Gamewell Fire Alarm Telegraph Co. v. City of Chilicothe, 7 Fed. Rep., 351.
- 92355.** Polsey, A. M. July 6, 1869. Nails.
Held novel and infringed by unsubstantial variation, *Globe Nail Co. v. U. S. Horse Nail Co.*, 19 Fed. Rep., 819.
- 92379.** Singer, C. July 6, 1869. Rocking Chair.
Construed; claim 2 held to be for mechanical change and wanting in patentable invention, *Singer Rocking Chair Co. v. Tobey Furniture Co.*, 14 Fed. Rep., 38.
- 92718.** Glass, Wm. July 20, 1869. Injector.
Held not infringed, *Scaife v. Fulton's Sons*, 2 Ban. & Ard., 235.
- 92822.** Hart, O. N. July 20, 1869. Hot Air Furnace.
Reissue No. 7254, Aug. 8, 1876.
Held to be for same invention as original; valid, novel, and infringed by use with a patented improvement, *Flint v. Roberts*, 4 Ban. & Ard., 165.
- 92942.** Dudley, W. U. July 20, 1869. Hand Mirror.
Construed; sustained; is not abandoned; is infringed, *Clark v. Scott*, 9 Blatch., 301. Construed, limited and not infringed, *Florence Mfg. Co. v. Boston Diatite Co.*, 1 Holmes, 415.
- 93096.** Kneppler, A. July 27, 1869. Spring Bed Bottom.
Construed and held void for want of invention in view of state of art, *Ames v. Carleton Spring Bed Co.*, 32 O. G., 1238.

93157. Adams, I. Aug. 3, 1869. Electro-deposition of Nickel.

Held valid and infringed, *United Nickel Co. v. Authes*, 1 Holmes, 155; *v. Keith*, 1 Holmes, 328; *v. Manhattan Brass Co.*, 16 Blatch., 68. Claims 3 and 4 construed and held novel and valid, *United Nickel Co. v. Harris*, 15 Blatch., 319. Not invalidated by disclaimer in subsequent English and domestic patents; construed and sustained in conformity with 15 Fed. Rep., 739; claims 1 and 4 infringed, *United Nickel Co. v. Melchior*, 17 Fed. Rep., 340. Claim 1 construed to be for a new method of using solutions requiring specific conditions by the absence of specified injurious elements, and is infringed by the use of an equivalent solution; claim 4 is for a novel and patentable article of manufacture and is infringed, *United Nickel Co. v. Pendleton*, 15 Fed. Rep., 739. Claims 1 and 4 held infringed; novelty and utility held established by immediate extensive use subsequent to patenting. Not anticipated by laboratory experiment, *United Nickel Co. v. California Electrical Works*, 25 Fed. Rep., 475.

93215. McWilliams, J. Aug. 3, 1869. Die Holder.

Reissue No. 9123, March 23, 1880.

Held valid and infringed, *McWilliams Mfg. Co. v. Blundell*, 11 Fed. Rep., 419.

93244. Stilwell, E. R. Aug. 3, 1869. Feed Water Feeder.

Claims 3 and 4 construed; patentee held first and original inventor, *Stilwell & Bierce Mfg. Co. v. Cincinnati Gas Light Co.*, 1 Ban. & Ard., 610.

93267. Gilbert & Barker. Aug. 3, 1869. Apparatus for Carburing Air.

Gilbert & Barker Mfg. Co. v. Bussing, 12 Blatch., 426.

93268. Gilbert & Barker. Aug. 3, 1869. Carburing Air Apparatus.

Construed to be for a patentable change in location of parts involving invention; held novel and infringed, *Gilbert & Barker Mfg. Co. v. Tirrell*, 12 Blatch., 144. Construed in view of state of art to be for a combination, and held wanting in novelty, *Gilbert & Barker Mfg. Co. v. Walworth Mfg. Co.*, 2 Ban. & Ard., 271.

93322. Madison & McLaughlin. Aug. 3, 1869. Street Car.

McLaughlin v. People's Railway Co., 21 Fed. Rep., 574.

93369. Thomas & Mast. Aug. 3, 1869. Grain Drill.

Reissue No. 4091, Aug. 2, 1870.

Construed and limited in view of state of art, and not infringed, *Grain Drill Manufacturer's Co. v. Rude*, 23 Fed. Rep., 348.

93391. Locke, E. A. Aug. 3, 1869. Revenue Stamp for Barrels.

Construed, held novel and infringed, *Benedict & Burnham Mfg. Co. v. Hollister*, 4 Fed. Rep., 83. Construed, and held to involve mechanical skill only and not invention, in view of state of art, *Hollister v. Benedict & Burnham Mfg. Co.* 113 U. S., 59.

93441. Holmes, G. H. Aug. 10, 1869. Take-up for Looms.

Reissue No. 8298, June 25, 1878.

Construed to be for same invention as original; sustained, and held not infringed, *Holmes v. Plainville Mfg. Co.*, 9 Fed. Rep., 757.

93449. Jones, H. K. Aug. 10, 1869. Graduating Carpenter's Square.

Reissue No. 5408, May 13, 1873.

Claim 2 held wanting in novelty; claims 3, 5 and 6 sustained, and infringed by formal difference, *Hart Mfg. Co. v. Sargeant*, 3 Ban. & Ard., 265.

93472. Perkins, C. P. Aug. 10, 1869. Wind-mill.

Reissue No. 8443, Oct. 8, 1878.

Validity doubted; held not infringed, *Eclipse Wind-mill Co. v. May*, 17 Fed. Rep., 344.

93563. Smith, H. J. Aug. 10, 1869. Electrical Machine.

Bogart v. Hinds, 33 O. G., 1268.

93775. Webber, J. W. Aug. 17, 1869. Kindling Wood.

Construed to be for an aggregation, wanting in patentable invention, *Alcott v. Young*, 16 Blatch., 134.

93910. Russell, N. C. Aug. 17, 1869. Preparation of Leather.

Reissue No. 3816, Feb. 1, 1870.

Claims construed and limited, *Russell v. Klein*, 19 Wall., 433. Held to be for a different invention from original, and wanting in novelty and validity, *Russell v. Dodge*, 93 U. S., 460. See, also, *Russell v. Place*, 94 U. S., 606; 9 Blatch., 173.

94013. Lewis, T. S. Aug. 24, 1869. Removing Green Corn from the Cob.

Limited in view of state of art, and held not infringed, *Jones v. Barker*, 11 Fed. Rep., 597.

94062. Ballard & Waddell. Aug. 24, 1869. Wooden Pavement.

Sustained and infringed, *Ballard v. City of Pittsburgh*, 12 Fed. Rep., 783.

94063. Ballard v. Waddell. Aug. 24, 1869. Wooden Pavement.

Sustained and infringed, *Ballard v. City of Pittsburgh*, 12 Fed. Rep., 783.

- 94064.** Barclay, J. Aug. 24, 1869. Plated Metal Bracelet.
Reissue No. 4192, Dec. 6, 1870.
Held novel and infringed, *Barclay v. Thayer*, 12 Blatch., 107.
- 94203.** Hayes, G. Aug. 31, 1869. Ventilator.
Reissue No. 8597, Feb. 25, 1879.
Held to be for a patentable combination; is valid and infringed, *Hayes v. Borkel*, 11 Fed. Rep., 87. Construed, and held to be for a different invention from original, and void, *Hayes v. Seton*, 12 Fed. Rep., 120. See, also, *Hayes v. Dayton*, 18 O. G., 1406; 20 Fed. Rep., 690; *v. Bickelhaupt*, 19 O. G., 177; *v. Leton*, 5 Fed. Rep., 521.
- 94469.** Brown, H. L. Sept. 7, 1869. Hand-car for Railroads.
Reissue No. 5274, Feb. 11, 1873.
Construed to be for a combination, and not infringed by use of less than all the elements, *Brown v. Hinkley & Cole*, 6 Fish., 370.
- 94747.** Holly, B. Sept. 14, 1869. Safety Valve.
Construed; held valid and infringed, *Holly v. Vergennes Machine Co.*, 18 Blatch., 327.
- 94780.** Siebert, N. Sept. 14, 1869. Lubricator.
Reissue No. 8740, June 3, 1879.
Final claims held void for new matter, *Siebert Cylinder Oil Cup Co. v. Harper Steam Lubricator Co.*, 4 Fed. Rep., 328.
- 94881.** Flagg, T. J. Sept. 14, 1869. Felt Suspender End.
Sustained; patentee held first and original inventor, *Fisk v. Church*, 5 Fish., 540. See, also, *Fisk v. West, Bradley & Cary Mfg. Co.*, 19 O. G., 545.
- 94947.** Covell, E. T. Sept. 21, 1869. Can.
Reissue No. 4777, March 5, 1872.
Claim 3 limited to conform with original, and not infringed as limited, *Covell v. Pratt*, 18 Blatch., 126.
- 95004.** Davis, C. H. Sept. 21, 1869. Box Loop.
Reissue No. 6974, March 7, 1876.
On comparison with original, held to be within the scope of a reissue; is novel, valid and infringed, *Crandal v. Walters*, 9 Fed. Rep., 659. Held properly reissued; not anticipated by a device requiring exercise of invention to adapt it to patentee's invention, *Crandal v. Parker Carriage Goods Co.*, 20 Fed. Rep., 851.
- 95262.** Pelham, T. M. Sept. 28, 1869. Hod Elevator.
Limited to specific device in view of prior invention, and held not infringed, *Pelham v. Demarest*, 12 Fed. Rep., 494.
- 95458.** Garver, D. L. Oct. 5, 1869. Harrows.
Reissue No. 9148, Apr. 13, 1880.
Held not enlarged by reference to state of art inserted therein. The seven claims held separately included within the broad construction given the single original claim; sustained and held infringed, *Reed v. Chase*, 25 Fed. Rep., 94.
- 95465.** Graebe & Liebermann. Oct. 5, 1869. Artificial Alizarine.
Reissue No. 4321, Apr. 4, 1871. Product.
Construed; is for same invention as original; a proper case for reissue and valid, *Badische Anilin, etc., Co. v. Higgins*, 15 Blatch., 290. Construed; held novel, sustained, and infringed, *Badische Anilin, etc., Co. v. Cochrane*, 16 Blatch., 155. Construed to be for a new manufacture and composition of matter, and sustained, *Badische Anilin, etc., Co. v. Hamilton*, 3 Ban. & Ard., 235.
Construed, and limited to a product identical with that produced by the original process, and not infringed as limited, *Cochrane v. Badische Anilin, etc., Co.*, 111 U. S., 293. Held to be for a new article of manufacture which is new in fact, *Badische Anilin, etc., Co. v. Cummins*, 4 Ban. & Ard., 489.
- 95466.** Graham, S. P. Oct. 5, 1869. Carriage Body and Seat.
Reissue No. 4780, March 5, 1872.
Doubted whether it is for a patentable substitution of material; held novel and infringed, *Comstock v. Sandusky Seat Co.*, 3 Ban. & Ard., 188.
- 95517.** Riley & Bissell. Oct. 5, 1869. Composition for Covering Boilers.
Reissue No. 4134, Sept. 27, 1870.
Held novel and valid, *United States & Foreign Salamander Felting Co. v. Asbestos Felting Co.*, 10 O. G., 828. Construed, *United States & Foreign Salamander Felting Co. v. Merrimack Mfg. Co.*, 2 Ban. & Ard., 167. See, also, *United States & Foreign Salamander Felting Co. v. Haven*, 3 Dill., 131.
- 95655.** Coburn, G. L. Oct. 12, 1869. Calendar.
Ambler v. Whipple, 20 Wall., 246; *v. Choteau*, 107 U. S., 586.

- 95689.** Howard, J. Oct. 12, 1869. Machine for Preparing Paper for Roofing.
Held novel, useful, and not abandoned; patentee held first and original inventor, *Howard v. Cristy*, 2 Ban. & Ard., 457.
- 95894.** George, H. W. Oct. 19, 1869. Box Toes for Boots and Shoes.
Held to be for an analogous use, not involving invention, consisting in a change of location only, in placing inside of a shoe what had before been placed outside, *Truss v. Shuter*, 26 O. G., 1210.
- 96037.** Root, J. B. Oct. 19, 1869. Art of Making Metallic Tubes.
Construed and limited in view of state of art; sustained, and held not infringed, *Root v. Lamb*, 7 Fed. Rep., 222.
- 96605.** Milligan, J. C. Nov. 9, 1869. Biscuit Pan.
Held wanting in novelty, *Lalace & Grosjean Mfg. Co. v. U. S. Stamping Co.*, 23 Fed. Rep., 800.
- 96778.** Collignon, N. & C. O. Nov. 16, 1869. Folding Chairs.
Construed and held infringed by formal change, *Collignon v. Hayes*, 8 Fed. Rep., 912.
- 96959.** Race & Matthews. Nov. 16, 1869. Hydrant Casing.
Held wanting in novelty, *Matthews v. Boston Machine Co.*, 105 U. S., 54.
Reissue No. 10,452, Feb. 26, 1884.
Construed to be for an improvement on, and not for same invention as his prior patent; properly reissued in view of above decision holding the original claim too broad, *Matthews v. Flower*, 33 O. G., 887.
- 97236.** Grimsley & Shelly. Nov. 23, 1869. Side-saddle Tree.
Construed as limited by claim, and held not infringed, *Burns v. Meyer*, 100 U. S., 671.
- 97375.** Farnham, J. M. Nov. 30, 1869. Bedstead Frame.
Sustained and held infringed, *Woven Wire Mattress Co. v. Whittlesey*, 8 Biss., 23.
Reissue No. 7704, May 29, 1877.
Held novel and not anticipated by prior abandoned experiment; claim construed to be for a combination, and held infringed by a colorable evasion, *Whittlesey v. Ames*, 9 Biss., 225. Claims 1 and 3 sustained and held infringed, *Woven Wire Mattress Co. v. Wire Web Bed Co.*, 1 Fed. Rep., 222; 8 Fed. Rep., 87. Construed in view of original drawings and specifications; limited in view of state of art and prior decisions, and claims 1 and 2 held not infringed, *Woven Wire Mattress Co. v. Simmons*, 10 Biss., 394. Construed and held infringed in conformity with prior decisions, *Woven Wire Mattress Co. v. Palmer*, 5 Ban. & Ard., 455. Claims 1 and 2 construed and limited in conformity with original. Claims 3 and 4 sustained and infringed by use with a superadded result, *Hartford Woven Wire Mattress Co. v. Peerless Wire Mattress Co.*, 23 Fed. Rep., 587.
- 97418.** Lyman, H. A. Nov. 30, 1869. Corsets.
Reissue No. 6100, Oct. 27, 1874.
Decreed valid, *Thompson v. Jacobs*, 12 O. G., 890.
- 97454.** Spill, D. Nov. 30, 1869. Xyloidine.
Construed; held novel, sustained, and infringed, *Spell v. Celluloid Mfg. Co.*, 18 Blatch., 190. Limited and held not infringed, *Ibid.*, 10 Fed. Rep., 290. Held that in so far as it is only for using a solvent weaker than had been used before, it does not involve invention, *Ibid.*, 21 Fed. Rep., 631. See, also, *Spill v. Celluloid Mfg. Co.*, 22 Fed. Rep., 94.
- 97920.** Holcomb, D. I. Dec. 14, 1869. Fruit Jars.
Construed; held novel and sustained; not anticipated by a prior combination omitting one of its elements, *Watson v. Cunningham*, 4 Fish., 528; *McCully v. Cunningham*, 19 Pitts. L. J., 142.
- 98087.** Montague, C. Dec. 21, 1869. Printing Press.
Held a novel and valid combination of old elements; patentee held first and original inventor, *Child v. Boston & Fairhaven Iron Works*, 1 Holmes, 303. See, also, *Child v. Boston & Fairhaven Iron Works*, 19 Fed. Rep., 258; *Boston & Fairhaven Iron Works, In re*, 23 Fed. Rep., 880.

1870.

- 98571.** Dennett, C. C. Jan. 4, 1870. Concrete Arches for Buildings.
Laver v. Dennett, 25 O. G., 882.
- 98727.** Welling, Wm. M. Jan. 4, 1870. Composition resembling Horn.
Construed, in view of state of art, to involve mechanical skill only, and held wanting in novelty, *Welling v. Crane*, 14 Fed. Rep., 571.
- 98787.** McLaughlin, F. Jan. 11, 1870. Brush.
Construed; held not anticipated by an abandoned experiment; is infringed, *Murphy v. Eastman*, 1 Holmes, 113. The combination held infringed by a similar combination embracing an additional feature, *Murphy v. Kissling*, 1 Holmes, 432.

- 98854.** Dittmar, C. Jan. 18, 1870. Explosive Compound.
Construed to be for a composition made by process specified, and not infringed by omission of essential step of process, *Dittmar v. Rix*, 1 Fed. Rep., 342.
- 98865.** Harris, W. Jan. 18, 1870. Non-conducting Boiler Covering.
Construed and limited in view of reference to specification, *Evans v. Kelly*, 9 Biss., 251.
- 99032.** Theberath, C. M. Jan. 18, 1870. Covering Harness Trimming.
Held invalid for public use more than two years prior to date of application, *Theberath v. Rubber and Celluloid Harness Trimming Co.*, 15 Fed. Rep., 246. Held infringed, *Ibid.*, 3 Fed. Rep., 151. See, also, *Theberath v. Celluloid Mfg. Co.*, 3 Fed. Rep., 143.
- 99299.** Doyle, P. Feb. 1, 1870. Molds for Ingots.
Construed. Not defeated by knowledge here of its use abroad, patentee being innocent of such knowledge. Held novel and valuable in view of state of art, and infringed by mechanical equivalent and by improvement, *Doyle v. Spaulding*, 19 Fed. Rep., 744.
- 99425.** Franz & Pope. Feb. 1, 1870. Knitting Machine.
Declared good, valid, and infringed, *Franz & Pope Knitting Machine Co. v. Lamb Knitting Machine Mfg. Co.*, 19 O. G., 1000.
- 99426.** Franz & Pope. Feb. 1, 1870. Knitting Machine.
Decreed valid, *Franz & Pope Knitting Machine Co. v. Bickford*, 18 O. G., 734.
- 99443.** Irwin, J. H. Feb. 8, 1870. Lamp.
Held novel, *Irwin v. Dane*, 9 O. G., 642. See, also, *Irwin v. McRoberts*, 16 O. G., 853; *v. Dane*, 2 Biss., 442.
- 99765.** Dunks, C. H. Feb. 15, 1870. Spring Bed Bottom.
Dunks v. Grey, 5 Ban. & Ard., 634.
- 100053.** Miller, R. P. Feb. 22, 1870. Dies.
Reissue No. 8694, May 6, 1879.
Claim 1 held to be for matter distinctly disclaimed in original and is void for new matter; claim 2 held valid and infringed, *Atwater Mfg. Co. v. Beecher Mfg. Co.*, 8 Fed. Rep., 608. Claim 1 held as above, and is wanting in novelty; claim 2 construed to be for an aggregation, *Beecher Mfg. Co. v. Atwater Mfg. Co.*, 114 U. S., 523.
- 100121.** Crandall, W. E. Feb. 22, 1870. Children's Carriage.
Reissue No. 4223, Jan. 7, 1871.
Claims 1, 2, 3 and 5 held wanting in novelty, *Crandall v. Richardson*, 8 Fed. Rep., 808; *v. Dare*, 11 Fed. Rep., 902.
- 100143.** Hayes, G. Feb. 22, 1870. Sky-light.
Reissue No. 8674, April 15, 1879.
Held to involve invention; sustained, held novel and infringed, *Hayes v. Borkel*, 11 Fed. Rep., 87. Construed, and claims sued on held to be for a different invention from original and void, *Hayes v. Seton*, 12 Fed. Rep., 120. Claim 8 void, *Hayes v. Bickelhaupt*, 21 Fed. Rep., 567. See, also, *Hayes v. Bickelhaupt*, 19 O. G., 177; *v. Dayton*, 18 O. G., 1406; *v. Leton*, 5 Fed. Rep., 521.
- 100229.** Willis, H. L. Feb. 22, 1870. Sand Paper Holder for Buffing Shoes.
Construed, in view of state of art, to be for a patentable invention; claim 1 infringed, *Buzzell v. O'Connell*, 4 Fed. Rep., 325.
- 100335.** Spear, J. March 1, 1870. Base Burning Stove.
Reissue No. 6206, Jan. 5, 1875.
Claims 4, 6, 7, 8 and 12 invalid for substitution not involving invention, and for aggregation, *Perry v. Co-operative Foundry Co.*, 12 Fed. Rep., 436.
- 100354.** Bauman, C. A. March 1, 1870. Steam Boiler Covering.
Held invalid, *United States & Foreign Salamander Felting Co. v. Asbestos Felting Co.*, 13 Blatch., 454. Claim 1 held invalid on interference with No. 114, 711, *Ibid.*, 18 Blatch., 312.
- 100715.** Blackburn & Woodside. March 15, 1870. Fare Register.
Reissue No. 7120, May 16, 1876.
Construed; limited, and held not infringed in view of state of art, *Passenger Fare Enumerator, etc., Co. v. Metropolitan R. Co.*, 4 Ban. & Ard., 116.
- 100839.** Andrews, W. D. March 15, 1870. Friction Wheel for Gearing.
Wanting in novelty; patentee held not first and original inventor, *Delamater v. Woodruff*, 11 Fed. Rep., 414.
- 101140.** Lawyer & Gasten. March 22, 1870. Sewing Machine.
Claim 2 not novel, *Raymond v. Singer Mfg. Co.*, 11 Fed. Rep., 427.
- 101175.** Spill, D. March 22, 1870. Xyloidine.
Construed, held novel, sustained and infringed, *Spill v. Celluloid Mfg. Co.*, 18 Blatch., 190. Claim 2 construed to be for the application of an old process to analogous use not involving invention, *Ibid.*, 21 Fed. Rep., 631. See, also, *Spill v. Celluloid Mfg. Co.*, 22 Fed. Rep., 94.

- 101295.** Mellen, G. H. March 29, 1870. Children's Carriage.
Not infringed, *Tibbats v. Daby*, 11 Fed. Rep., 903.
- 101529.** Smith, F. April 5, 1870. Die for Chord-bar Heads.
Construed to be for a change in form not involving invention, and wanting in novelty, *Smith v. American Bridge Co.*, 8 Biss., 312.
- 101583.** Clarke, E. April 5, 1870. Registering Steam Gauge.
Reissue No. 4775, March 5, 1872.
Construed, limited, and held infringed, *United States Steam Gauge Co. v. American Steam Gauge Co.*, 1 Holmes, 309.
- 101590.** Cowing, T. April 5, 1870. Wood Pavement.
Construed, and held novel; application not abandoned, *Ballard v. City of Pittsburgh*, 12 Fed. Rep., 783.
- 101931.** Simonds, N. J. April 12, 1870. Leather Cutting Press.
Claim 4 limited to specific mechanism, in view of state of art, and held not infringed, *Richardson v. Bresnahan*, 23 Fed. Rep., 897.
- 101994.** Forseyth, J. B. April 19, 1870. Elastic Roller Manufacture.
Reissue No. 5081, Oct. 1, 1872.
Construed to be for a combination of old elements in an old mode to produce a new and useful result; limited, and not infringed in view of state of art, *Forseyth v. Clapp*, 1 Holmes, 278.
- 102179.** Stewart, A. W. April 19, 1870. Folding Chair.
Reissue No. 6076, Oct. 6, 1874.
Construed; claim 1 sustained as novel and useful; claim 2 void for want of novelty, *Stewart v. Mahoney*, 5 Fed. Rep., 302.
- 102187.** Warth, A. April 19, 1870. Stop Valve for Petroleum Packages.
Construed, limited, and claim held not infringed, *Meissner v. Devoe Mfg. Co.*, 9 Blatch., 363.
- 102218.** Brown, H. April 26, 1870. Oil Stone Holder.
Sustained and held infringed by improvement embodying the patented invention, *Union Stone Co. v. Allen*, 14 Fed. Rep., 353.
- 102529.** Franz & Pope. May 3, 1870. Knitting Machine.
Declared good, valid, and infringed, *Franz & Pope Knitting Machine Co. v. Lamb Knitting Machine Mfg. Co.*, 19 O. G., 1000.
- 102587.** Pearl, O. May 3, 1870. Bobbins and Spindles.
Reissue No. 6036, Sept. 1, 1874.
Construed and limited; claim 3 held infringed, *Pearl v. Appleton Co.*, 3 Fed. Rep., 153.
Construed, limited, held novel, and to involve invention; claims 1, 2 and 3 infringed, *Pearl v. Ocean Mills*, 2 Ban. & Ard., 469.
- 102662.** Dickerson & Whipple. May 3, 1870. Process and Apparatus for Liquid Fuel for Light and Heat.
Ambler v. Whipple, 20 Wall., 546.
- 102748.** Adams, I. May 10, 1870. Electro-deposition of Nickel.
Held valid, novel and infringed, *United Nickel Co. v. Authes*, 1 Holmes, 155; *v. Keith*, 1 Holmes, 328; *v. Melchior*, 17 Fed. Rep., 340.
- 102913.** Mason, J. L. May 10, 1870. Fruit Jar.
Construed to be for a combination; seems not to involve invention, in view of disclaimer; invalid for abandonment by use more than two years prior to date of application, *Consolidated Fruit Jar Co. v. Wright*, 12 Blatch., 149. Void for abandonment by sale more than two years prior to date of application, *Ibid.*, 94 U. S., 92.
- 102936.** Hancock, W. S. May 10, 1870. Broom.
Gillespie v. Cummings, 3 Sawyer, 259.
- 103125.** Barker, A. May 17, 1870. Soldering Iron.
Reissue No. 8781, July 1, 1879.
Construed to be for a combination, in which form is of the essence of the invention; limited to that shown in drawings and specification, and held not infringed, *McMurry v. Mallory*, 4 Hughes, 265. Held not reissued for the purpose of a more perfect description, because of the identity of drawing and description. Claims 1, 2 and 3 void, being broader than original; claims 4 and 5 not infringed, *Ibid.*, 111 U. S., 97.
- 103406.** Woolcocks, T. J. May 24, 1870. Speaking Tube Whistle.
Construed; not abandoned; claim 1 infringed by use of substantial equivalent in form for one of its elements, *Woolcocks v. Many*, 9 Blatch., 139.
- 103594.** Flynn, F. May 31, 1870. Top for Rubber Shoes.
Construed, and held wanting in patentable novelty, *Woonsocket Rubber Co. v. Candee*, 23 Fed. Rep., 797.

- 103834.** Blood, H. S. June 7, 1870. Derrick.
Converse *v.* Cannon, 2 Woods, 7.
- 104271.** Clough, T. June 14, 1870. Gas Burner.
Claim 1 held wanting in novelty; claim 2 limited and sustained in view of state of art, and held not infringed, Clough *v.* Gilbert & Barker Mfg. Co., 3 Ban. & Ard., 523. Claims 1 and 2 construed, held novel, valid, and patentee being first in the art, infringed by substitution of known equivalents, *Ibid.*, 106 U. S., 166.
- 104318.** Irwin, J. H. June 14, 1870. Lantern.
Considered, Steam Gauge & Lantern Co. *v.* Miller & Co., 8 Fed. Rep., 314. Claim 1 construed, and infringed by use of an equivalent form, *Ibid.*, 21 Fed. Rep., 514. Infringement doubted, Steam Gauge & Lantern Co. *v.* St. Louis Railway Supply Mfg. Co., 33 O. G., 889.
- 104323.** Knox & Osborn. June 14, 1870. Ore Roasting Furnace.
Infringed by change in location of parts without change of function, Knox *v.* Great Western Quicksilver Mining Co., 3 Sawyer, 422; 6 Sawyer, 430. Not infringed, *Ibid.*, 4 Fed. Rep., 809; Knox *v.* New Ideria Mining Co., 4 Fed. Rep., 813.
- 104376.** Thatcher, J. M. June 14, 1870. Fire-place Heater.
Claims 1 and 2 construed to be for aggregations of old parts, and void, Thatcher Heating Co. *v.* Burtis, 12 Fed. Rep., 569. Held infringed, Thatcher Heating Co. *v.* Drummond, 3 Ban. & Ard., 138.
- 104412.** Bostwick, J. A. June 21, 1870. Soldering Iron.
Reissue No. 8466, Oct. 29, 1878.
Construed to be for a combination in which form is of the essence of the invention; limited to that shown in the drawings and specification, and held not infringed, McMurry *v.* Mallory, 4 Hughes, 265. Claim 1 held to be for a different invention from original, and void; claim 2 not infringed, *Ibid.*, 111 U. S., 97.
- 104585.** Hardy & Wood. June 21, 1870. Rotary Blower.
Infringed by use of equivalent, Hyndman *v.* Roots, 97 U. S., 224.
- 105030.** Bigelow, H. H. July 5, 1870. Heel Machine for Boots and Shoes.
United States *v.* Thatcher, 2 MacArthur, 24.
- 105187.** Franz & Pope. July 12, 1870. Knitting Machine.
Declared good, valid and infringed, Franz & Pope Knitting Machine Co. *v.* Lamb Knitting Machine Mfg Co., 19 O. G., 1000.
- 105338.** Hyatt, J. W. & I. S. July 12, 1870. Treating, etc., Pyroxeline.
Reissue No. 5928, June 23, 1874.
Celluloid Mfg. Co. *v.* Goodyear Dental Vulcanite Co., 13 Blatch., 375.
- 105599.** Schillinger, J. J. July 19, 1870. Concrete Pavement.
Reissue No. 4364, May 2, 1871.
Construed in view of disclaimer and held infringed, Schillinger *v.* Gunther, 14 Blatch., 152. Construed in view of disclaimer, *Ibid.*, 15 Blatch., 303. Sustained as not insufficient from fraudulent intent, *Ibid.*, 17 Blatch., 66. Construed and sustained in accordance with prior decisions, Schillinger *v.* Greenway Brewing Co., 17 Fed. Rep., 244. Held valid in view of prior decisions; infringed by a difference in degree only, consisting in the use of a known equivalent, Kuhl *v.* Mueller, 21 Fed. Rep., 510. See, also, California Artificial Stone Paving Co. *v.* Molitor, 31 O. G., 1044. Construed and held infringed, California Artificial Stone Paving Co. *v.* Perine, 7 Sawyer, 190. Held not infringed by one mode used; is infringed by the other, California Artificial Stone Paving Co. *v.* Freeborn, 17 Fed. Rep., 735.
- 105768.** Barker, J. F. July 26, 1870. Gas Burner.
Held valid, for new, useful and patentable modifications, Clough *v.* Gilbert & Barker Mfg. Co., 106 U. S., 178.
- 105833.** Nye, S. R. July 26, 1870. Horse Hay Rake.
Reissue No. 9731, May 31, 1881.
Claims 1 and 5 void, as expanded claims, Nye *v.* Allen, 15 Fed. Rep., 114.
- 106021.** Anderson, J. H. Aug. 2, 1870. Broom.
Gillespie *v.* Cummings, 3 Sawyer, 259.
- 106089.** Smith, Wm. Aug. 2, 1870. Water Closet Receiver.
Construed; held novel, useful, and not on public sale more than two years prior to date of application, Smith *v.* O'Connor, 2 Sawyer, 461.
- 106094.** Topham, Wm. H. Aug. 2, 1870. Spittoon.
Reissue No. 5514, July 29, 1873.
Claim 2 is for same invention as original; held wanting in novelty, Havemeyer *v.* Bonnell, 21 Fed. Rep., 406; *v.* Randall, 21 Fed. Rep., 404.

- 106101.** Warth, A. Aug. 2, 1870. Cloth Cutting Machine.
Reissue No. 5186, Dec. 10, 1872.
Limited, and held not infringed, *Warth v. Browning*, 5 Ban. & Ard., 341.
- 106157.** Hayes, G. Aug. 9, 1870. Skylight.
Reissue No. 8675, Apr. 15, 1879.
Held to involve invention; sustained, and is infringed, *Hayes v. Borkel*, 11 Fed. Rep., 870. Claim 2 construed, limited, and not infringed, *Hayes v. Seton*, 12 Fed. Rep., 120. Claims 1, 2, and 7, introduced after nine years' delay, held void, *Hayes v. Bickelhaupt*, 21 Fed. Rep., 567. Claim 2 construed, in view of words "as specified," to include elements in the original, but omitted in the reissue claim, and thus held to correspond with original; is not infringed, *Ibid.*, 23 Fed. Rep., 183. Claim 6 held not infringed, *Hayes v. Dayton*, 20 Fed. Rep., 690. See, also, *Hayes v. Bickelhaupt*, 19 O. G., 177; *v. Leton*, 5 Fed. Rep., 521; *v. Dayton*, 18 O. G., 1406.
- 106597.** Mann, R. J. Aug. 23, 1870. Sieve.
Construed, and limited to particular combination, and held not infringed, *Adams Mfg. Co. v. St. Louis Wire, etc., Co.*, 3 Ban. & Ard., 77.
- 107817.** Scaife, W. B. Sept. 27, 1870. Boiler for Stoves.
Reissue No. 4467, July 17, 1871.
Decreed invalid and void, *Scaife v. Mageus*, 19 O. G., 791.
- 108055.** Riley, J. Oct. 4, 1870. Composition for Covering Steam Boilers.
Construed, *United States & Foreign Salamander Felting Co. v. Merrimack Mfg. Co.*, 2 Ban. & Ard., 167.
- 108270.** Knight, G. W. Oct. 11, 1870. Spinning Ring Holder.
Draper v. Wattles, 16 O. G., 629.
- 108300.** Sessions, A. J. Oct. 11, 1870. Trunk Rollers.
Construed, and strictly limited in view of state of art; if limited, not infringed; is for a double use, *Sessions v. Gould*, 33 O. G., 1139.
- 108384.** Norton, C. P. Oct. 18, 1870. Cultivator.
Reissue No. 5557, Aug. 26, 1873.
Construed, and limited to combination of old parts, and held not infringed, *Pattee v. Moline Plow Co.*, 10 Biss., 377.
- 108408.** Tilghman, B. C. Oct. 18, 1870. Sand Blast.
Held novel and valid; claim 1 construed to be for a process or art, and is infringed, *Tilghman v. Morse*, 9 Blatch., 421. See, also, *Tilghman v. Hartell*, 2 Ban. & Ard., 260; *Hartell v. Tilghman*, 99 U. S., 547.
- 108753.** Boomer, Boschert & Morse. Nov. 1, 1870. Cheese Press.
Reissue No. 5256, Jan. 28, 1873.
Construed; is for same invention as original; novel and valid, *Boomer v. United Power Press Co.*, 13 Blatch., 107.
- 108827.** Rayer & Lincoln. Nov. 1, 1870. Sewing Machine Attachment.
Reissue No. 9176, April 27, 1880.
Claims 1 and 3 construed to be enlarged, and void for delay in reissuing, *Rayer & Lincoln Seaming Machine Co. v. American Printing Co.*, 19 Fed. Rep., 428.
- 108898.** Fischer, H. Nov. 1, 1870. Bottle Faucet.
Held valid; not void for prior foreign use without publication, and is infringed, *Worswick Mfg. Co. v. Steiger*, 17 Fed. Rep., 250.
- 109372.** Ball & Fitts. Nov. 22, 1870. Water Meter.
Reissue No. 5806, March 24, 1874.
Construed to be for a combination, and not infringed by omission of one of its parts, *Union Water Meter Co. v. Desper*, 101 U. S., 337.
- 109444.** Parker, J. Nov. 22, 1870. Fly-trap.
Reissue No. 6811, Dec. 21, 1875.
Construed, in view of state of art, to be for mechanical skill only; held wanting in patentable novelty and invalid, *National Mfg. Co. v. Meyers*, 15 Fed. Rep., 237. See, also, *National Mfg. Co. v. Meyers*, 7 Fed. Rep., 355.
- 109446.** Perkins, G. C. Nov. 22, 1870. Woven Wire Mattress Fabrics.
Construed, in view of state of art, to involve mechanical skill only, *Hartford Woven Wire Mattress Co. v. Peerless Wire Mattress Co.*, 23 Fed. Rep., 587.
- 110070.** Potter, C. L. Dec. 13, 1870. Attaching Button Shanks.
Construed, limited, sustained, and held not infringed, *Potter v. Thayer*, 1 Holmes, 293.
- 110205.** Coll, H. Dec. 20, 1870. Siphon Pump.
Reissue No. 9199, May 18, 1880.
Construed, in view of original, and held invalid for claim expanded after nine years' acquiescence, *Sheriff v. Fulton*, 12 Fed. Rep., 136.

- 110222.** Fisher. Dec. 20, 1870. Hydraulic Mining Apparatus
Reissue No. 5193, Dec. 17, 1872.
Claim 2 construed to be for a mechanical substitution and held anticipated; combination claims 1 and 3 held not infringed, *Fisher v. Craig*, 3 Sawyer, 69.

1871.

- 110630.** Cauhapé, P. Jan. 3, 1871. Pill Manufacture.
Held novel; claim 2 construed to be for a combination and not an aggregation, and is infringed, *McKesson v. Carndick*, 19 Blatch., 158.
- 110722.** Ball, A. Jan. 3, 1871. Plow.
Cook v. Birdwell, 20 O. G., 1083.
- 110779.** Needham, C. Jan. 3, 1871. Casting Car Wheels.
Held wanting in novelty and patentability, *Needham v. Washburn*, 4 Cliff., 254.
- 110803.** Tillinghast, C. P. Jan. 3, 1871. Car Ventilator.
Reissue No. 9572, Feb. 15, 1881.
Tillinghast v. Hicks, 23 O. G., 739.
- 110839.** Fetter, D. Jan. 17, 1871. Drive-screw.
Reissue No. 8121, March 12, 1878.
Sustained and held infringed, *Fetter v. Newhall*, 17 Fed. Rep., 841. Construed and not infringed, *Ibid.*, 20 Fed. Rep., 113; *Fetter v. Oliver Bros. & Phillips*, 20 Fed. Rep., 114.
- 111001.** Raecke, L. Jan. 17, 1871. Filter.
Reissue No. 8894, Sept. 16, 1876.
Construed and limited in view of state of art; held invalid for expanded claim, *Lansburgh v. Hasbrouck*, 16 Fed. Rep., 566.
- 111403.** Thompson, S. Jan. 31, 1871. Cleaning and Polishing Coffee.
Held infringed, *New York Coffee Polishing Co. v. Wilson*, 2 Fed. Rep., 904.
- 111564.** Patterson & Bishop. Feb. 7, 1871. Ratchet Coupling for Barges.
Held a patentable combination involving invention, and is valid; patentee held first inventor, *Patterson v. Duff*, 20 Fed. Rep., 641.
- 111585.** Todd, W. Feb. 7, 1871. Washboard.
Reissue No. 6673, Oct. 5, 1875.
Construed and limited and held not infringed, in view of state of art, *Duff v. Stirling Pump Co.*, 107 U. S., 636. Claim 2, in form for a combination, construed in view of specification to be for an article of manufacture, and sustained, *Duff v. Calkins*, 25 O. G., 601. Construed and limited in conformity with prior decision and not infringed, *Duff v. St. Louis Wooden Ware Works*, 22 Fed. Rep., 340.
- 111632.** Goodrich & Colburn. Feb. 7, 1871. Planing Machine.
Reissue No. 8438, Oct. 1, 1878.
Claim 4 construed to be for elements contained by implication in original claim, limited in order to be sustained, and, as limited, not infringed, *Fay v. Fraser*, 11 Biss., 422. Broad claim construed, and limited in view of original and state of art, and held not infringed, *Fay v. Preble*, 14 Fed. Rep., 652.
- 111798.** Adams, T. Feb. 14, 1871. Chewing Gum.
Held useful; not invalidated by prior foreign public use not known to patentee; construed to be for the application of an old contrivance to a new use, and held wanting in invention, *Adams v. Loft*, 4 Ban. & Ard., 495.
- 111881.** Seibert, N. Feb. 14, 1871. Lubricator.
Held void on an interference, as being a later patent for the same invention, and patentee not being first inventor, *Garratt v. Seibert*, 98 U. S., 75; *Seibert v. Garratt*, 8 O. G., 600.
- 111962.** Meyer & Evans. Feb. 21, 1871. Rubber Overshoes.
Reissue No. 4977, July 16, 1872.
Construed to be for a double use, and held wanting in patentable novelty and invention, *Meyer v. Pritchard*, 12 Blatch., 101. See, also, *Meyer v. Goodyear Rubber Co.*, 11 Fed. Rep., 891.
- 112137.** Fricke, J. R. Feb. 28, 1871. Copper Cable Lightning Rods.
Construed, limited, and held not infringed, *Fricke v. Hum*, 22 Fed. Rep., 302.
- 112594.** Hays, G. March 14, 1871. Sky-light.
Reissue No. 8688, April 22, 1879.
Construed to be for a patentable combination involving invention; held novel, valid, and infringed, *Hayes v. Borkel*, 11 Fed. Rep., 87. Claims 1, 3 and 5 construed to be for different invention from original, and held void; claim 2 limited, and not infringed as limited, *Hays v. Seton*, 12 Fed. Rep., 120. Claim 2 held identical with original claim 1; held valid and infringed, *Hays v. Bickelhaupt*, 23 Fed. Rep., 183. Claim 2 held not infringed; claim 6

- held void for expansion, *Hays v. Dayton*, 20 Fed. Rep., 690. See, also, *Hays v. Bickelhaupt*, 19 O. G., 177; *v. Leton*, 5 Fed. Rep., 521; *v. Dayton*, 18 O. G., 1406.
- 112930.** Kreisler, B. March 21, 1871. Tiling for Fire-proof Buildings.
Reissue No. 5174, Dec. 3, 1872.
Held wanting in novelty, in view of prior state of art, *Fryer v. Maurer*, 20 Fed. Rep., 916. Construed to be for introducing in a known structure a known equivalent for one of its features, and held wanting in invention, *Ibid.*, 19 Fed. Rep., 756.
- 112937.** Locke, J. C. March 21, 1871. Trunk Fastening.
Reissue No. 8520, Dec. 10, 1878.
Construed; if broadly, is invalid; if limited, not infringed, *Cowell v. Sessions*, 17 Fed. Rep., 450.
- 112977.** Sternbergh, W. March 21, 1871. Cheese Hoops.
Reissue No. 8832, Aug. 5, 1879.
Construed; limited, held novel and not infringed, *Tyler v. Welch*, 18 Blatch., 209. Claim 1, if construed broadly, will enlarge the invention; if limited, is a duplication of claim 2; held void; claim 2 held valid and infringed, *Tyler v. Galloway*, 12 Fed. Rep., 567. See, also, *Tyler v. Galloway*, 22 Fed. Rep., 1294.
- 113055.** Hyatts & Perkins. March 28, 1871. Dental Plates from Pyroxyline.
Celluloid Mfg. Co. *v.* Goodyear Dental Vulcanite Co., 13 Blatch., 375.
- 113328.** New, T. April 4, 1871. Waterproof Collars.
Reissue No. 7920, Oct. 23, 1877.
Construed and held void for want of novelty, *New v. Lawrence*, 3 Fed. Rep., 714.
- 113612.** Adams, I. April 11, 1871. Electro-plating with Nickel.
United Nickel Co. *v.* Authes, 1 Holmes, 155.
- 113649.** Gamewell, J. N. April 11, 1871. Fire Alarm Telegraph.
Reissue No. 8891, Sept. 9, 1876.
Gamewell Fire-alarm Telegraph Co. *v.* City of Chillicothe, 7 Fed. Rep., 351.
- 113832.** Ashcroft, J. April 18, 1871. Treating Coffee.
Reissue No. 4479, July 25, 1871, Division A.
Construed and sustained in view of specification, and not infringed by omission of an element of the process, *Arnold v. Phelps*, 20 Fed. Rep., 315.
- 114068.** Van Hagan, I. April 25, 1871. Pressing and Stamping Sheet Metal.
Decreed null and void subsequent to interference, *Sturges v. Van Hagen*, 6 Fish., 572.
- 114711.** Riley, J. May 9, 1871. Composition for Covering Steam Boilers.
Sustained on interference, *United States & Foreign Salamander Felting Co. v. Asbestos Felting Co.*, 18 Blatch., 312. Held infringed, *Ibid.*, 18 Blatch., 310. Held novel; claims 1 and 2 infringed by substitution of well known equivalent. Construed, *United States & Foreign Salamander Felting Co. v. Lawrence Mfg. Co.*, 2 Ban. & Ard., 167. See, also, *United States & Foreign Salamander Felting Co. v. Asbestos Felting Co.*, 10 O. G., 828.
- 115232.** Peard, J. May 23, 1871. School Desk.
Claims 1 and 2 construed to be for aggregations, *Peard v. Johnson*, 23 Fed. Rep., 507. See, also, *National School Furniture Co. v. Paton*, 16 Blatch., 563.
- 115565.** Bull, H. C. June 6, 1871. Apparatus for Cleaning Privies.
Reissue No. 6962, Feb. 29, 1876.
Construed; held to involve invention; is novel, and sustained, *Odorless Excavating Apparatus Co. v. Clements*, 4 Ban. & Ard., 540. Construed to be for a mistake (if any) apparent on face of patent, consisting in the claiming of a combination of too many elements; and held dedicated to public by delay in reissuing until after intervening rights had accrued to third parties, *Clements v. Odorless Excavating Apparatus Co.*, 109 U. S., 641.
- 115760.** McMurray & Hollingsworth. June 6, 1871. Soldering Tool.
Nominally for a combination of four elements, construed to be for one of three only; held in view of a prior patent to be for a change in form and not in substance, by the use of a mechanical equivalent not involving invention but mechanical skill only, *McMurray v. Miller*, 16 Fed. Rep., 471.
- 116138.** Barker, W. C. June 20, 1871. Bucket for Chain Pumps.
Reissue No. 6531, June 6, 1875.
Claims 1 and 2 held wanting in novelty, *Barker v. Stowe*, 15 Blatch., 49. Construed broadly; claims 1 and 2 infringed, *Ibid.*, 4 Ban. & Ard., 485. Construed, held novel, valid and infringed, *Barker v. Shoots*, 18 Fed. Rep., 647. Decree in favor of reissue set aside on account of a collusive case, *Barker v. Todd*, 15 Fed. Rep., 265. See, also, *Barker v. Todd*, 22 O. G., 1448; *v. Stowe*, 11 Fed. Rep., 303.
- 116266.** Cary, A. June 27, 1871. Method of Tempering Springs.
Process held infringed by substituting cooling by water for cooling by air, the substance of the invention being taken, *Cary v. Lowell Mfg. Co.*, 32 O. G., 1009. Construed to be

for a new application of an old process, producing a new, highly useful result; held patentable, and infringed by use of process with a higher degree of heat, *Cary v. Wolff*, 32 O. G., 257.

- 116922.** Blakeslee, E. E. July 11, 1871. Threading Sheet Metal Screws.
Detweiler v. Voegel, 19 Blatch., 482.
- 116935.** Day, C. T. July 11, 1871. Skate.
Reissue No. 8590, Feb. 18, 1879.
Held novel and infringed, *Spaeth v. Gibson*, 15 Fed. Rep., 810. See, also, *Spaeth v. Barney*, 22 Fed. Rep., 828.
- 117255.** Buffum, A. K. P. July 25, 1871. Machine for Making Wooden Gutters for Buildings.
Reissue No. 6675, Oct. 5, 1875.
Construed and limited in view of state of art; is for same invention as original; novel, and not infringed, *Buffum v. Oakland Mfg. Co.*, 4 Ban. & Ard., 599.
- 117430.** Knox & Osborn. July 25, 1871. Ore Roasting Furnace.
Construed and held not infringed, *Knox v. New Ideria Mining Co.*, 4 Fed. Rep., 813; *v. Quicksilver Mining Co.*, 4 Fed. Rep., 809.
- 117627.** Hatch, J. W. Aug. 1, 1871. Apparatus for Crimping the Stiffenings of Boots and Shoes.
Reissue No. 6319, March 9, 1875.
Broad claim 5 for process void, not being in original; claim 3 infringed, *Hatch v. Moffitt*, 15 Fed. Rep., 252.
- 117831.** Truby, J. W. Aug. 8, 1871. Show-case Sockets.
Reissue No. 5748, Jan. 27, 1874.
Construed to be for a substitution of material wanting in patentable invention, *Terhune v. Phillips*, 99 U. S., 592.
- 117841.** Westinghouse, Jr., G. Aug. 8, 1871. Steam-power Car-brake.
Reissue No. 5506, July 29, 1873.
Held valid; novel, patentable and infringed, *Westinghouse v. Gardner, etc.*, Air-brake, 2 Ban. & Ard., 55.
- 117925.** Pollard, W. H. Aug. 8, 1871. Gas Pump.
Gould's Mfg Co. v. Cowing, 12 Blatch., 243; 14 Blatch., 315; 105 U. S., 253.
- 118404.** Tate, W. J. Aug. 22, 1871. Quilting Machine.
Claim 8 construed and infringed, *Tate v. Thomas*, 22 Fed. Rep., 660.
- 118440.** Eastman, R. Aug. 29, 1871. Composition for Soap.
Sustained, and held infringed by material changes and additions in percentage composition, *Eastman v. Hinckel*, 5 Ban. & Ard., 1.
- 118617.** Cornell, G. B. Aug. 29, 1871. Bung Brush and Wrench.
Reissue No. 5026, Aug. 6, 1872.
Construed to be for a combination, and not infringed, *Schumacher v. Cornell*, 96 U. S., 549.
Reissues Nos. 5026 and 5027, Aug. 6, 1872.
Construed; limited, and held not infringed, *Cornell v. Littlejohn*, 2 Ban. & Ard., 324; 9 O. G., 922. Construed; are for patentable subject-matter, and infringed by change in form, *Cornell v. Downer & Bemis Brewing Co.*, 7 Biss., 346.
- 118622.** Marsh, T. Aug. 29, 1871. Cut Ring Supporter.
Draper v. Wattles, 16 O. G., 629.
- 118725.** Knapp, A. H. Sept. 5, 1871. Curtain Fixtures.
Reissue No. 6925, Feb. 15, 1876.
Claim 3 held to be for matter not found in original, *Knapp v. Shaw*, 15 Fed. Rep., 115. See, also, *Shaw v. Soule*, 20 Fed. Rep., 790.
- 119212.** Yale, Jr., L. Sept. 19, 1871. Post-office Box.
Reissue No. 8783, July 1, 1879.
Claims 4 and 5 void for new matter; claims 1, 2 and 3 sustained and infringed, *Yale Lock Mfg. Co. v. Scovill Mfg. Co.*, 18 Blatch., 248. Original held not inoperative or defective; reissue held not reissued for mistake in original; claim 2 construed and limited in view of file-wrapper and contents, and not infringed, *Yale Lock Mfg. Co. v. James*, 20 Fed. Rep., 903. Not infringed, *Yale Lock Mfg. Co. v. Scovill Mfg. Co.*, 15 Fed. Rep., 342.
- 119561.** Bogart, A. L. Oct. 3, 1871. Electric Gas Lighter.
Claim 1 construed in view of state of art; sustained, and held not anticipated by a burner made of substantially the same material but without thought of its insulating properties, and held to involve invention, *Bogart v. Hinds*, 34 O. G., 1510.
- 119705.** Heath, E. A. Oct. 10, 1871. Cuspadore.
Construed to be for substitution of material involving mechanical skill and not inven-

- tion; wanting in novelty, *Ingersoll v. Turner*, 7 Fed. Rep., 859. Construed to be for a novel and patentable invention; held valid and sustained, *United States Stamping Co. v. King*, 17 Blatch., 55. Held novel, valid, and infringed, *United States Stamping Co. v. Jewett*, 18 Blatch., 469. See, also, *Ingersoll v. Musgrove*, 14 Blatch., 541; *v. Jewett*, 16 Blatch., 378.
- 119846.** Henry, A. Oct. 10, 1871. Rifled Fire-arms.
Held to have expired with end of original foreign term, and not of extended foreign term; void for public use more than two years prior to date of application, *Henry v. Providence Tool Co.*, 3 Ban. & Ard., 501.
- 120057.** Gramme & D'Ivernois. Oct. 17, 1871. Magneto-electric Machine.
Held to have expired with termination of prior Austrian patent, *Gramme Electrical Co. v. Arnoux & Hochhausen Electrical Co.*, 17 Fed. Rep., 838.
- 120133.** Van Hoevenberg, H. Oct. 17, 1871. Printing Telegraph.
Construed and held not infringed, *Gold & Stock Telegraph Co. v. Wiley*, 17 Fed. Rep., 234.
- 120638.** Griggs, G. H. Nov. 7, 1871. Spark Arrester.
Reissue No. 5050, Sept. 10, 1872, and 5051, Sept. 10, 1872.
Construed, held novel and infringed, *Pike v. Providence & Worcester R. Co.*, 1 Holmes, 445.
- 120874.** Holmes & Roome. Nov. 14, 1871. Electrical Safe Covering.
Construed, and sustained for specific improvement; not void because of lapse of prior English patent for failure to pay tax, *Holmes Electric Protective Co. v. Metropolitan Burglar Alarm Co.*, 21 Fed. Rep., 458. Not limited by expiration of an English patent in which the device was not patented, *Ibid.*, 22 Fed. Rep., 341.
- 120949.** Doane & McKee. Nov. 14, 1871. Band Sawing Machine.
Construed and held not infringed, *Fay & Co. v. Cordesman Bros.*, 109 U. S., 408.
- 121119.** Morse, G. F. Nov. 21, 1871. Ornamenting Glass and Metal Surfaces.
Tilghman v. Morse, 9 Blatch., 421.
- 121158.** Cooke, C. L. Nov. 21, 1871. Railway Switches.
Reissue No. 7690, May 22, 1877.
Construed; held to cover a patentable improvement, and is novel, *Cooke v. New York Central & H. R. R. Co.*, 4 Ban. & Ard., 308.
- 121544.** Phillips, R. C. Dec. 5, 1871. Wooden Pavement.
Construed, and held infringed by a block with sides sliced off, as a subterfuge, *Phillips v. City of Detroit*, 2 Flip., 92. Construed to be for a change of material, and held void for want of invention and of novelty, *Ibid.*, 4 Ban. & Ard., 347. Construed in view of common knowledge, and held to involve mechanical skill only, *Ibid.*, 111 U. S., 604.
- 121569.** Alden, C. Dec. 5, 1871. Preserving Vegetable and Animal Substances.
Reissue No. 5648, Nov. 11, 1873.
Process claim 1 held wanting in novelty, *Alden Evaporating Fruit Co. v. Bowen*, 32 O. G., 1355.
- 121746.** Bauman, A. H. Dec. 12, 1871. Apparatus for Drying Sand.
Construed liberally, as not including in the combination claimed an element not mentioned therein, and not indispensable to its operation; sustained and infringed, *Bradley v. Dull*, 19 Fed. Rep., 913.
- 121920.** Winchell, J. F. Dec. 12, 1871. Fare-box.
Void for want of invention, *Slawson v. Grand Street, etc., R. Co.*, 17 Blatch., 512. Held to be for a new application of an old device not involving invention, 107 U. S., 649.
- 122001.** Eagleton, J. J. Dec. 19, 1871. Furniture Spring.
Held invalid, in view of unauthorized amendment constituting the essence of the invention, inserted in original application by attorney, *Eagleton Mfg. Co. v. West, Bradley & Cary Mfg. Co.*, 18 Blatch., 218. Held invalid for want of novelty, and not patentee's invention, *Ibid.*, 111 U. S., 490.
- 122030.** Kelleher & Randlett. Dec. 19, 1871. Boot and Shoe Pads.
Reissue No. 6698, Oct. 27, 1874.
Claim 4 invalid for new matter.
Reissues Nos. 6098 and 6099, Oct. 27, 1874.
Sustained and infringed, *Kelleher v. Darling*, 4 Cliff., 424.
- 122215.** Beckwith, N. F. Dec. 26, 1871. Saw-mill Dogs.
Construed; not anticipated by prior unsuccessful experiment; held novel, and infringed, *Allis v. Buckstaff*, 22 O. G., 1705. See, also, *Allis v. Stowell*, 5 Ban. & Ard., 458; 19 O. G., 727; 9 Fed. Rep., 304; 16 Fed. Rep., 783; 23 O. G., 1033; *Neacy v. Allis*, 22 O. G., 1621.

1872.

- 122520.** Frazer, M. B. Jan. 9, 1872. Cheese Hoop.
Tyler *v.* Galloway, 22 O. G., 2072.
- 123325.** Blackman, E. Feb. 6, 1872. Lamp Chimney.
Reissue No. 7417, Dec. 5, 1876.
Void for want of identity of invention with original, Blackman *v.* Hibbler, 17 Blatch., 333.
- 123603.** Albright, A. Feb. 13, 1872. Dies for Rubber-coated Harness.
Reissue No. 5155, Nov. 26, 1872.
Construed, and held infringed by a substitution involving colorable variation only; patentee held first inventor, Albright *v.* Celluloid Harness Trimming Co., 2 Ban. & Ard., 629.
See, also, Albright *v.* Teas, 23 O. G., 829.
- 123625.** Fish, W. L. Feb. 13, 1872. Sewing Machine Bobbin.
Fish *v.* Domestic Sewing Machine Co., 12 Fed. Rep., 495.
- 123687.** Franz & Pope. Feb. 13, 1872. Knitting Machine.
Declared good, valid, and infringed, Franz & Pope Knitting Machine Co. *v.* Lamb Knitting Machine Mfg. Co., 19 O. G., 1000.
- 123670.** Blessing, J. H. Feb. 13, 1872. Steam Trap.
Reissue No. 5549, Aug. 26, 1873.
Construed, and limited, in view of state of art; claim 1 held wanting in novelty; claim 5 not infringed, Albany Steam Trap Co. *v.* Felthousen, 20 Fed. Rep., 633.
- 123811.** Crowell, L. C. Feb. 20, 1872. Paper Bag.
Patentee held prior inventor on interference with No. 134,244, Union Paper Bag Machine Co. *v.* Crane, 1 Holmes, 429.
- 123927.** Parker, B. S. Feb. 20, 1872. Dies for Forging Ox-shoes.
Reissue No. 6113, Nov. 3, 1874.
Validity of claim 3 doubted, Gunn *v.* Savage, 25 Fed. Rep., 101.
- 124011.** Ritchie, D. A. Feb. 27, 1872. Tube.
Held valid, in view of sufficient description of the making of the article, Lamb *v.* Hamblen, 11 Fed. Rep., 722.
- 124180.** Warth, A. Feb. 27, 1872. Cloth Cutting Machine.
Limited and not infringed, Warth *v.* Browning, 5 Ban. & Ard., 341.
- 124218.** Pattee, J. H. March 5, 1872. Cultivator.
Reissue No. 6080, Oct. 6, 1874.
Construed, and limited to combination of old elements, and held not infringed, Pattee *v.* Moline Plow Co., 10 Biss., 377. Claim 2 held expanded beyond legal limits, and void, Pattee Plow Co. *v.* Kingman, 23 Fed. Rep., 801.
- 124319.** Beecher & Swift. March 5, 1872. Paper Box.
Construed, and limited to description; combination claim 1 held not infringed, Munson *v.* Hall, 19 Fed. Rep., 320.
- 124340.** Dalton, J. March 5, 1872. Ladies' Hair Nets.
If broadly construed, is for a substitution of material not involving invention; if limited to specific combination, is not infringed, Dalton *v.* Jennings, 12 Blatch., 96. Void for want of novelty and of invention, *Ibid.*, 93 U. S., 271.
- 124590.** Kells, P. H. March 12, 1872. Brick Machine.
Reissue No. 8867, Aug. 19, 1879.
Void for new matter, Kells *v.* McKenzie, 9 Fed. Rep., 248.
- 124878.** Blood, H. S. March 26, 1872. Derrick.
Converse *v.* Cannon, 2 Woods, 7.
- 125250.** Andrews, S. B. April 2, 1872. Spring Bed Bottoms.
Construed, and limited, in view of limitation in description, to a wooden frame in combination, and not infringed by an iron one, Harris *v.* Allen, 15 Fed. Rep., 106.
- 125329.** Price, D. C. April 2, 1872. Portable Show and Circus Seats.
Held not infringed, Price *v.* Kelley, 2 Ban. & Ard., 543; 20 O. G., 1452.
- 125421.** Turnbull & Webb, April 9, 1872. Bed Bottoms.
Reissue No. 5312, March 4, 1873.
Claim 2 construed broadly; is not valid; if limited, is not infringed; claim 3 construed, in view of state of art, to be for mechanical skill, not involving invention, National Wire Mattress Co. *v.* New York Braided Wire Mattress Co., 20 Fed. Rep., 119.
- 125547.** Day, A. April 9, 1872. Railway Track Cleaner.
Reissue No. 8388, Aug. 27, 1878.
Held infringed, Day *v.* Detroit City Railway Co., 22 O. G., 946. Claim 4 construed, in view of state of art, to be for a combination not involving invention, but mechanical skill only, Day *v.* Fairhaven & W. R. Co., 23 Fed. Rep., 189.

126285. Graves, R. C. April 30, 1872. Grates.

Reissue No. 9959, Dec. 6, 1881.

Construed, and limited, in view of state of art, to the particular combination described, and not infringed by use of less than all its elements, *Gould v. Spicer*, 20 Fed. Rep., 317.**126446.** Cochran, J. W. May 7, 1872. Breech Loader.Not abandoned by laches in prosecuting the application, nor by prior experimental use, *United States Rifle & Cartridge Co. v. Whitney Arms Co.*, 14 Blatch., 92.**126847.** Stearns, J. B. May 14, 1872. Duplex Telegraph.

Reissue No. 10,035, Feb. 7, 1872. Division C.

Claim 2 held valid and reissued within a reasonable time, in view of ambiguous original claim, which was not apparent on the face of the patent, *Western Union Telegraph Co. v. Baltimore & O. Telegraph Co.*, 25 Fed. Rep., 30.**126938.** Demartini & Chertizza. May 21, 1872. Ballasting Vessels.Not infringed by substituting for one element of the combination a new mode, not a mechanical equivalent, *American Ballast Log Co. v. Barnes*, 4 Hughes, 278. Sustained in conformity with prior decisions in other circuits, *American Ballast Log Co. v. Cotter*, 11 Fed. Rep., 728.**126968.** Keller, N. J. May 21, 1872. Sand and Gravel Separator.*Keller v. Stolzenbach*, 20 Fed. Rep., 47.**127045.** Gardner, G. May 21, 1872. Chair Seat.

Reissue No. 9094, Feb. 24, 1880.

Construed, in view of prior decisions, to be for applying an old process to an old material to obtain an old form, which, although mechanically better, does not involve invention, *Gardner v. Herz*, 12 Fed. Rep., 491.Reissue No. 7203, July 4, 1876, construed and held wanting in novelty, *Ibid.*, 16 Blatch., 303.**127090.** Moffitt, J. R. May 21, 1872. Heel-stiffener.

Reissue No. 6162, Dec. 8, 1874.

Claim 1 void for new matter, *Moffitt v. Rogers*, 106 U. S., 423. If broadly construed, is invalid; if limited, is not infringed, *Ibid.*, 4 Ban. & Ard., 225.**127098.** Osgood, J. H. May 21, 1872. Base Ball Cover.

Reissue No. 7046, April 11, 1876.

Construed to be for unpatentable mechanical adaptation, *Mahn v. Harwood*, 3 Ban. & Ard., 515. Invalid for unreasonable delay in reissuing the new and enlarged claims, *Ibid.*, 112 U. S., 354.**127159.** Draper, G. May 28, 1872. Bobbin and Spindle.

Reissue No. 6016, Aug. 18, 1874.

Held novel, useful and patentable; not void for new matter; claims 1, 3, 4 and 6 infringed, *Draper v. Potomska Mill Corporation*, 3 Ban. & Ard., 214.**127211.** Aram & Williams. May 28, 1872. Carriage Axle Turning Machine.Construed to be not merely for a combination of old elements, but to be for a new element made efficient when used with older devices; held novel and infringed, *Aram v. Moline Wagon Co.*, 16 Fed. Rep., 236.**127858.** Dorlan, J. M. June 11, 1872. Sizing Paper.*Dorlan v. Guie*, 25 Fed. Rep., 816.**127933.** Snow, G. B. June 11, 1872. Steam Bell Ringer.Construed and limited, *Snow v. Lake Shore & Mich. S. R'y Co.*, 18 Fed. Rep., 602.**127964.** Dedrick, C. H. June 18, 1872. Manufacture of Soles from Hides.Decreed to be void, claim being found to embrace what was in a former patent, *Adamson v. Dedrick*, 2 O. G., 523.**128411.** Matthews, J. June 25, 1872. Soda Fountain.

Reissue No. 8834, Aug. 5, 1879.

Construed; held broader than original, and void for delay in reissuing, *Matthews v. Iron-clad Mfg. Co.*, 21 Fed. Rep., 641. See, also, *Matthews v. Green*, 19 Fed. Rep., 649; *v. Iron-clad Mfg. Co.*, 19 Fed. Rep., 321.**128925.** Taylor, A. T. July 9, 1872. Trunk.Claim 3 construed to be for a combination, infringed by mere mechanical changes; held novel in view of state of art. Doubted whether all the claims can be joined in one patent, *Sessions v. Romadka*, 21 Fed. Rep., 124.**129018.** Fisher, Wm. B. July 16, 1872. Seed Steaming Apparatus.

Reissue No. 8615, March 11, 1879.

Held void for expanded claims, *Gage v. Kellogg*, 23 Fed. Rep., 891.**129338.** Hatch, J. W. July 16, 1872. Heel-stiffener.

Reissue No. 6388, April 20, 1875.

Validity doubted, *Hatch v. Moffitt*, 15 Fed. Rep., 252.

- 129844.** McCreary, J. July 23, 1872. Coupling and Steering Apparatus.
Reissue No. 5630, Oct. 28, 1873.
Sustained as for invention identical with original, and held not affected by immaterial alterations in the drawings; held novel and infringed, *McCreary v. Pennsylvania Canal Co.*, 5 Fed. Rep., 367.
- 129858.** Olmsted, J. July 23, 1872. Insulating Telegraph Wires.
Reissues Nos. 6954 (Process) and 6955 (Product), Feb. 29, 1876.
Invention construed to be for application of old process to a new subject, without substantial alteration, and not to involve invention; both reissues void, *Western Electric Mfg. Co. v. Ansonia Brass & Copper Co.*, 9 Fed. Rep., 706. Process construed, in view of state of art, to be for application of old process to same subject, without change in manner of applying it, and with no substantially distinct result, and is invalid for want of novelty, *Ibid.*, 114 U. S., 447.
- 129893.** Knapp, A. H. July 30, 1872. Curtain Fixture.
Reissue No. 7182, June 20, 1876.
Claim 2 held infringed, *Knapp v. Shaw*, 15 Fed. Rep., 115. See, also, *Shaw v. Soule*, 20 Fed. Rep., 790.
- 129901.** Osgood, E. July 30, 1872. Process for rendering Leather Flexible.
Reissue No. 8186, April 16, 1878.
Product claim 1 held abandoned, and void for laches in reissuing; claim 2 construed, and held not infringed. *Union Tubing Co. v. Patterson & Co.*, 23 Fed. Rep., 79.
- 130440.** Poling, G. Aug. 13, 1872. Cultivator.
Construed and limited to combination of old elements, and held not infringed, *Pattee v. Moline Plow Co.*, 10 Biss., 377.
- 130514.** Mann, R. J. Aug. 13, 1872. Sieve.
Dayton v. Wright & Herring, 11 O. G., 197.
- 130529.** Pennock, J. L. Aug. 13, 1872. Rolling Mill.
Rejected claim held a novel, useful and patentable combination, *Pennock, Ex parte*, 1 MacArthur, 531.
- 130672.** Sutro, H. Aug. 20, 1872. Cards for Wrapping Threads.
Reissue No. 6751, Nov. 13, 1875.
Construed, limited, sustained, and not infringed, *Sutro v. Moll*, 19 Blatch., 89.
- 130770.** Tirrell, J. P. Aug. 20, 1872. Electric Apparatus for Lighting Street Lamps.
Reissue No. 9743, June 7, 1881.
Construed; claim 5 held to be for a combination not in original, being for mechanism to operate the device claimed in original, *Electric Gas Lighting Co. v. Smith & Rhodes Electric Co.*, 23 Fed. Rep., 195. Claims 2 and 5 held invalid, being for matter not claimed in original, and delay in reissuing, intervening rights having accrued, *Electric Gas Lighting Co. v. Tillotson*, 21 Fed. Rep., 568.
- 130871.** Rouse, R. R. Aug. 27, 1872. Well Tubes.
Rouse v. Fletcher, 9 O. G., 838.
- 130961.** Webster, Wm. Aug. 27, 1872. Loom.
Specification held insufficient; claim 5 is for an aggregation, *Webster Loom Co. v. Higgins*, 15 Blatch., 447. Claim 5 construed to be for a combination of six elements, and infringed by substituting a well-known equivalent for one of them, *Webster v. New Brunswick Carpet Co.*, 1 Ban. & Ard., 84. Description held sufficient; claim 5 construed to be for a combination involving invention and not for an aggregation, and is infringed. Patentee held first and original inventor, *Webster Loom Co. v. Higgins*, 105 U. S., 580. See, also, *Webster Loom Co. v. New Brunswick Carpet Co.*, 2 Ban. & Ard., 67; *v. Higgins*, 13 Blatch., 349; *v. Short*, 10 O. G., 1019.
- 131004.** Huntington, F. M. Sept. 3, 1872. Machine for Punching and Stamping Metal.
Interfering patent No. 114,068 decreed void, *Sturges v. Van Hagen*, 6 Fish., 572.
- 131098.** Harper, J. M. Sept. 3, 1872. Fly-trap.
Reissue No. 6493, June 22, 1875.
Construed; limited and sustained, in view of state of art, and is infringed, *Harper v. Cook*, 5 Ban. & Ard., 50. See, also, *National Mfg. Co. v. Meyers*, 23 O. G., 1443.
- 131201.** Williams, L. F. Sept. 10, 1872. Overshoe.
Construed as not limited to specific shape of cut of each part of extension shown in drawing, and held infringed, *Williams v. Candee*, 18 Blatch., 140.
- 131217.** Hoe, R. M. Sept. 10, 1872. Printing Press.
Patent issued to joint inventors, one of whom, as sole inventor, filed caveat; held valid; claims 3 and 4 construed, and infringed, *Hoe v. Kahler*, 12 Fed. Rep., 111. Construed and above affirmed, *Ibid.*, 25 Fed. Rep. 271. See, also, *Hoe v. Boston Daily Advertiser*, 14 Fed. Rep., 914.

- 131616.** Hyde, I. Sept. 24, 1872. Water Wheel and Sewing Machine Combined.
Reissue No. 5590, Oct. 7, 1873.
Patentability doubtful; anticipated by description in prior English provisional specification, *Backus Water Motor Co. v. Tuerk, Jr.*, 17 Fed. Rep., 350.
- 131695.** Mason, J. L. Sept. 24, 1872. Fruit Jar.
Consolidated Fruit Jar Co. v. Whitney, 1 Ban. & Ard., 356.
- 131936.** Carter & Dwyer. Oct. 8, 1872. Base Burning Stove.
Reissue No. 6979, March 7, 1876.
Decreed valid and infringed, *Detroit Stove Works v. Michigan Stove Co.*, 12 O. G., 189.
- 132074.** Heyel, H. R. Oct. 8, 1872. Boxes.
Construed strictly in view of state of art, and held not infringed, *Ketcham v. Jaques*, 22 Fed. Rep., 399.
- 132111.** Stebins, T. Oct. 8, 1872. Hydraulic Elevator.
Construed and held infringed, *Stebins Hydraulic Elevator Mfg. Co. v. Stebins*, 4 Fed. Rep., 445.
- 132112.** Stebins, T. Oct. 8, 1872. Safety Devices for Elevators.
Held infringed, *Stebins Hydraulic Elevator Co. v. Stebins*, 4 Fed. Rep., 445.
- 132128.** Adams, A. H. Oct. 15, 1872. Corn-sheller.
Sustained as novel in view of state of art, and infringed by device differing in degree only, *Adams v. Joliet Mfg. Co.*, 3 Ban. & Ard., 1.
- 132208.** Hobbs, J. H. Oct. 15, 1872. Glass Ware.
Held novel, sustained, and infringed by improvement, *Hobbs v. King*, 8 Fed. Rep., 91.
- 132368.** Palmer, C. T. Oct. 2, 1872. Paper Boxes.
Claim 1 void for want of novelty, *Patterson v. Stapler*, 7 Fed. Rep., 210.
- 132547.** Snow, G. K. Oct. 29, 1872. Method of Cutting out Collars.
Construed to be for a neat application of a well known operation, not patentable in view of state of art, *Snow v. Taylor*, 14 O. G., 861.
- 132566.** Dederick, P. K. Oct. 29, 1872. Hay and Cotton Press.
Reissue No. 8130, March 19, 1878.
Claims 3, 5, 7, 8, 10 and 11 held invalid, *Dederick v. Cassell*, 9 Fed. Rep., 306. Reissue No. 8316, July 2, 1878. Claim 2 invalid; claim 1 valid, *Ibid.*, 9 Fed. Rep., 306.
- 132639.** Dederick, P. K. Oct. 29, 1872. Hay and Cotton Press.
Reissue No. 7984, Dec. 11, 1877.
Claim 5 invalid; claims 2 and 3 valid, *Dederick v. Cassell*, 9 Fed. Rep., 306.
Reissue No. 8312, July 2, 1878.
Claim 6 invalid, *Ibid.*, 9 Fed. Rep., 306.
- 132909.** Hull, D. C. Nov. 12, 1872. Whip Stock Manufacture.
Reissue No. 5651, Nov. 11, 1873.
Construed; claim 1 held novel and infringed; claim 2 void for want of novelty, *American Whip Co. v. Hampden Whip Co.*, 4 Fed. Rep., 536.
- 133217.** Garratt, W. T. Nov. 19, 1872. Lubricator.
Reissue No. 5328, March 18, 1873.
Sustained in interference for priority of invention, *Garratt v. Siebert*, 98 U. S., 75. Decreed void in interference, patentee not being first and original inventor, *Siebert v. Garratt*, 8 O. G., 600.
- 133601.** Stover, E. & D. C. Dec. 3, 1872. Windmill.
Reissue No. 6101, Oct. 27, 1874.
Held novel; claims 3, 4, 5 and 6 infringed, *Eclipse Windmill Co. v. Woodmanse Windmill Co.*, 32 O. G., 1605.
- 134105.** Snow, G. K. Dec. 17, 1872. Uniting Paper and Cloth.
Construed and held novel, *Snow v. Tapley*, 3 Ban. & Ard., 228.
- 134128.** Daddow, S. H. Dec. 24, 1872. Squib for Blasting.
Wanting in novelty, *Richards v. Hays*, 32 O. G., 1011.
- 134244.** Benner, L. D. Dec. 24, 1872. Paper Bags.
Held on interference subsequent to No. 123,811, *Union Paper Bag Machine Co. v. Crane*, 1 Holmes, 429.
- 134404.** Stow, H. M. Dec. 31, 1872. Wood Pavement.
Construed to be for the omission of an element in a prior combination; held wanting in invention, and void for want of novelty, *Stow v. City of Chicago*, 8 Biss., 47. Construed, limited and held wanting in novelty, *Ibid.*, 104 U. S., 547.
- 134486.** Price, D. C. Dec. 31, 1872. Portable Show and Circus Seats.
Held not infringed, *Price v. Kelley*, 2 Ban. & Ard., 534; 20 O. G., 1452.

1873.

- 134653.** Donn, H. D. Jan. 7, 1873. Saw-dog.
Reissue No. 6733, Nov. 9, 1875.
Claim 1 construed to be an expanded claim and held void, *Neacy v. Allis*, 22 O. G., 1621.
- 134690.** Manning, J. Jan. 7, 1873. Isinglass Manufacture.
Declared invalid for public use more than two years prior to date of application, *Manning v. Cape Ann Isinglass & Glue Co.*, 23 O. G., 2413.
- 135650.** Lloyd, E. Feb. 11, 1873. Puddling Furnace.
Construed; limited, sustained, and not infringed, *Lloyd v. Miller*, 19 Fed. Rep., 915.
- 135815.** Keene, G. A. Feb. 11, 1873. Carriage Step.
Construed; held novel and not anticipated by a rejected application, *Rubber-step Co. v. Metropolitan R. Co.*, 13 O. G., 549.
- 135899.** Foote, E. Feb. 18, 1873. Wire Bag Fastener.
Held not anticipated, and is novel, *Foote v. Frost*, 3 Ban. & Ard., 607.
- 136763.** Reed, G. A. March 11, 1873. Head Lining for Barrels.
Construed to be for mechanical skill, and held wanting in patentable invention, *Reed v. Reed & Folts*, 12 Blatch., 366.
- 136801.** Wollensak, J. F. March 11, 1873. Transom Lifter.
Reissue No. 9307, July 20, 1880.
Construed, and limited to particular combination described, in view of state of art, and held not infringed, *Wollensak v. Reiher*, 115 U. S., 87.
- 137702.** Matthews, J. April 8, 1873. Soda Fountain.
Reissue No. 8837, Aug. 5, 1879.
Held to have been on sale more than two years prior to date of application, *Matthews v. Iron Clad Mfg. Co.*, 21 Fed. Rep., 641. See, also, *Matthews v. Iron Clad Mfg. Co.*, 19 Fed. Rep., 321.
- 137873.** Albright, A. April 15, 1873. Rubber Coated Harness Trimming Manufacture.
Infringed by an experimental use only, *Albright v. Celluloid Harness Trimming Co.*, 2 Ban. & Ard., 629.
- 137893.** Cohn, M. April 15, 1873. Corset.
Invalid for want of novelty, *Cohn v. United States Corset Co.*, 12 Blatch., 225. Void because of prior published description in an English provisional specification, *Ibid.*, 93 U. S., 366.
- 137911.** Gilbert, C. April 15, 1873. Apparatus for Starch Manufacture.
Sustained, *New York Grape Sugar Co. v. American Grape Sugar Co.*, 10 Fed. Rep., 835. See, also, *New York Grape Sugar Co. v. Buffalo Grape Sugar Co.*, 20 Fed. Rep., 505; 32 O. G., 1356; *v. Peoria Grape Sugar Co.*, 21 Fed. Rep., 878.
- 138209.** Spooner, A. F. April 22, 1873. Baby Jumper.
Construed; held novel and infringed, *Spooner v. Dorn*, 24 Fed. Rep., 700.
- 138243.** Gates, J. April 29, 1873. Lubricator.
Sustained; patentee being prior inventor, *Siebert Cylinder Oil Cup Co. v. Phillips Lubricator Co.*, 10 Fed. Rep., 677.
- 138462.** Woodbury, J. P. April 29, 1873. Planing Machine.
Patentee held not original inventor; invention held abandoned subsequent to application, *Woodbury Patent Planing Machine Co. v. Keith*, 101 U. S., 479. Patentee held not original inventor; invention held not abandoned, *Ibid.*, 4 Ban. & Ard., 100.
- 138490.** Field, E. S. May 6, 1873. Bed Bottom.
Reissue No. 9919, Nov. 1, 1881.
Claims 1 and 2 void for expansion; if limited, not infringed, *National Wire Mattress Co. v. New York Braided Wire Mattress Co.*, 20 Fed. Rep., 119.
- 138491.** Field, E. S. May 6, 1873. Bed Bottom.
Reissue No. 9920, Nov. 1, 1881.
Nothing that is valid of the expanded reissue is infringed, *National Wire Mattress Co. v. New York Braided Wire Mattress Co.*, 20 Fed. Rep., 119.
- 139121.** Davis, J. W. May 20, 1873. Pantaloon Pocket Fastener.
Reissue No. 6335, March 16, 1875.
Held novel; involving patentable invention, and not mere double use or aggregation, *Strauss v. King*, 18 Blatch., 88.
- 139348.** Wood, T. H. May 27, 1873. Carriage Spring.
Reissue No. 6018, Aug. 18, 1874.
Sustained, *Brewster v. Parry*, 14 Fed. Rep., 694.
- 139365.** Bruce, D. W. May 27, 1873. Printing-type.
Construed, and held in view of specification to involve invention; is novel, *Bruce v. Marder*, 10 Fed. Rep., 750.

139784. Grebner, M. June 10, 1873. Wire Cage.

Reissue No. 8594, Feb. 25, 1879.

Construed to be for an enlargement of the original device, and held void, *Meyer v. Maxheimer*, 9 Fed. Rep., 99.**139820.** Sawyer, C. P. June 10, 1873. Cotton Gin.

Reissue No. 6169, Dec. 8, 1874.

Specification held insufficient; subject-matter involves a change of form only, wanting in invention; patentee is not first and original inventor, *Sawyer v. Miller*, 12 Fed. Rep., 725. Held, on interference, subsequent in date of invention to No. 167,679 (?), and declared void in part, *Sawyer v. Massey*, 25 Fed. Rep., 144.**139846.** McKeever, S. June 10, 1873. Cartridge Box.*McKeever v. United States*, 14 Court of Claims, 396; 18 Court of Claims, 757.**140020.** Eppinger, I. June 17, 1873. Bunch and Plug Tobacco.Sustained as a novel and patentable change of form, involving invention, *Eppinger v. Richey*, 14 Blatch., 307.**140536.** Pope, F. L. July 1, 1873. Electric Railroad Signal.Held not infringed; patentee not first and original inventor, *Electric R. R. Signal Co. v. Hall R. R. Signal Co.*, 6 Fed. Rep., 603. Construed to be for a new combination of old devices to accomplish a new result; limited, in view of specification, and held not infringed by an inherently different combination, *Ibid.*, 114 U. S., 87.**140619.** Firth, J. B. July 8, 1873. Cake Pans.Construed to be for a manufacture; held to involve invention; not anticipated by single uncombined elements; limited and infringed by improvement, *Bell v. United States Stamp- ing Co.*, 19 Fed. Rep., 312.**140635.** Merrill, Geo. July 8, 1873. Knitting Machine.Construed and limited in view of patent office requirements acquiesced in by patentee; as limited, is not infringed, *New York Belting & Packing Co. v. Sibley*, 15 Fed. Rep., 386.**141357.** Joyce, J. L. July 29, 1873. Boot and Shoe Manufacture.

Reissue No. 6480, June 8, 1875.

Construed, held valid and infringed, *Stevens v. Pritchard*, 4 Cliff., 417.**141473.** Thompson, S. R. Aug. 5, 1873. Bushing for Faucet Holes.

Reissue No. 8483, Nov. 12, 1878.

Construed to be for a different invention from original and invalid; combination in- fringed by sale of part with intent to procure infringement, *New York Bung & Bushing Co. v. Hoffman*, 9 Fed. Rep., 199.

Reissue No. 10,368, Aug. 25, 1883.

Claim 1 construed, in view of state of art, to be for a substitution of material not in- volving invention; if limited, not infringed, *New York Bung & Bushing Co. v. Doelger*, 23 Fed. Rep., 191. Decided in conformity with above, *New York Bung & Bushing Co. v. Foehrenbach*, 23 Fed. Rep., 195.**141587.** Painter, W. Aug. 5, 1873. Pump Valve.Held infringed, *Odorless Excavating Co. v. Lauman*, 12 Fed. Rep., 788; *v. McCauley*, 2 Ban. & Ard., 570.**142154.** Eachus, J. Aug. 26, 1873. Machine for Cutting Paper Boards.

Reissue No. 6315, March 2, 1875.

Original construed, and limited, in view of the then state of art, to the particular combi- nation of mechanical elements claimed; reissue process claim compared and held to be for a different invention from original, and void, *Eachus v. Broomall*, 115 U. S., 429.**142323.** Blessing, J. H. Sept. 2, 1873. Steam Traps.

Reissue No. 8286, June 18, 1878.

Construed and limited in view of state of art, and not infringed, *Albany Steam Trap Co. v. Felthousen*, 20 Fed. Rep., 633; 32 O. G., 1239.**142377.** Dunks, C. H. Sept. 2, 1873. Spring Bed Bottoms.*Dunks v. Grey*, 5 Ban. & Ard., 634.**142661.** Aston, J. B. Sept. 9, 1873. Black Washing Molds.*Smith v. Marshall & Co.*, 10 O. G., 375.**142810.** O'Haire, J. A. Sept. 16, 1873. Street Car.Construed, and held anticipated by a prior abandoned device demonstrated to be capable of accomplishing the result sought, *Stephenson v. Brooklyn Cross-Town R. Co.*, 19 Blatch., 473. Held wanting in novelty both as to the elements and the combination, in view of state of art at date of application; is not infringed, *Ibid.*, 114 U. S., 149.**142933.** Nation & Little. Sept. 16, 1873. Cooking Stove.Construed; claim 1 held void for want of novelty, *Bussey v. Excelsior Mfg. Co.*, 110 U. S., 131.

- 142934.** Nation & Little. Sept. 16, 1873. Cooking Stove.
Construed; claims 1 and 2 held void for want of novelty; claim 3 for aggregation, *Bussey v. Excelsior Mfg. Co.*, 110 U. S., 131.
- 143149.** Hayes, G. Sept. 23, 1873. Sky-light.
Reissue No. 8676, April 15, 1879.
Claim 1, if construed broadly, is not novel; if limited, not infringed, *Hayes v. Dayton*, 20 Fed. Rep., 690. See, also, *Hayes v. Bickelhaupt*, 19 O. G., 177; *v. Dayton*, 18 O. G., 1406; *v. Leton*, 5 Fed. Rep., 521.
- 143153.** Hayes, G. Sept. 23, 1873. Sky-light.
Reissue No. 8689, April 29, 1879.
Claim 3 held not infringed, *Hayes v. Seton*, 12 Fed. Rep., 120; *v. Dayton*, 20 Fed. Rep., 690. Claim 3 construed in view of disclaimer; held novel, valid, and infringed, *Hayes v. Bickelhaupt*, 23 Fed. Rep., 183. Construed, sustained, and infringed, *Ibid.*, 21 Fed. Rep., 567. See, also, *Hayes v. Bickelhaupt*, 19 O. G., 177; *v. Dayton*, 18 O. G., 1406; *v. Leton*, 5 Fed. Rep., 521.
- 143359.** Lippman, P. Sept. 30, 1873. Corset Clasp.
Construed to be for making and selling part of an old and known manufacture, as a new way of trade, and held not valid, *Seligman v. Day*, 14 Blatch., 72.
- 143396.** Daddow, E. A. Sept. 30, 1873. Squib for Blasting.
Reissue No. 8364, Aug. 6, 1878.
Held wanting in novelty, *Richards v. Hays*, 32 O. G., 1011.
- 143421.** Richardson, H. M. Oct. 7, 1873. Children's Carriage.
Construed and limited to specific device, *Richardson v. Noyes*, 2 Ban. & Ard., 398.
Reissue No. 10363, Aug. 7, 1883.
Claim 1 construed in view of state of art, and held to involve invention; is infringed, *Parker v. Stow*, 23 Fed. Rep., 252. Construed and sustained in view of above, and is infringed, *Parker v. Montpelier Carriage Co.*, 23 Fed. Rep., 886. See, also, *Parker v. McKee*, 32 O. G., 137.
- 143600.** Vinton, J. J. Oct. 14, 1873. Manufacture of Iron from Slag.
Construed to be for a double use, and void for want of novelty and invention, *Vinton v. Hamilton*, 104 U. S., 485.
- 143783.** Platts & Walden. Oct. 21, 1873. Crimping and Folding Leather.
Platts & Walden, *Ex parte*, 15 O. G., 827.
- 144164.** Teas, A. Oct. 28, 1873. Saddle-tree.
Teas v. Albright, 22 O. G., 2069; *Albright v. Teas*, 106 U. S., 613.
- 145726.** Crosby, G. H. Dec. 23, 1873. Pressure Gauges.
Construed; held novel and infringed, *Crosby Steam Gauge & Valve Co. v. Ashcroft Mfg. Co.*, 17 Fed. Rep., 85.
- 145787.** Collender, H. W. Dec. 23, 1873. Billiard Table.
Reissue No. 6469, June 1, 1875.
Construed; held wanting in novelty, *Collender v. Griffith*, 18 Blatch., 110.
- 146012.** Mége, H. Dec. 30, 1873. Treating Animal Fats.
Reissue No. 5868, May 12, 1874.
If broadly construed, is invalid; if limited, not infringed, *United States Dairy Co. v. Smith*, 19 Fed. Rep. See, also, *Brosnahan, In re*, 4 Dill., 1.
- 146085.** Mayall & Williams. Dec. 30, 1873. Printing Press Sheet Deliverer.
Reissue No. 7786, July 3, 1877.
Decree directing the issuing of the reissue, *Mayall & Williams*, 11 O. G., 1107.

1874.

- 146120.** Backus, O. J. Jan. 6, 1874. Water Motor.
Claim 1 held to involve mechanical skill only; claim 2 held not infringed, *Backus Water Motor Co. v. Tuerk, Jr.*, 17 Fed. Rep., 350.
- 146597.** Klein, J. C. Jan. 20, 1874. Picks.
Reissue No. 6951, Feb. 29, 1876.
Held novel and patentable, in view of new step in process, and is infringed, *Klein v. Kloman, Park & Co.*, 3 Ban. & Ard., 145.
- 146614.** Rice, H. W. Jan. 20, 1874. Steam Boiler.
Reissue No. 6422, May 4, 1875.
Construed to be for a different invention from original; held wanting in novelty and void, *Heald v. Rice*, 104 U. S., 437. See, also, *Rice v. Heald*, 13 Pac. L. R., 33.
- 146832.** Little, S. A. Jan. 27, 1874. Time Lock.
Reissue No. 8550, Jan. 21, 1879.
Claim 7 construed, and limited in view of state of art; held to involve invention, and is

- novel; claims 1 and 7 infringed, *Yale Lock Mfg. Co. v. Norwich National Bank*, 19 Blatch., 123. Claims 1 and 7 sustained, and infringed, *Yale Lock Mfg. Co. v. Berkshire National Bank*, 17 Fed. Rep., 531.
- 147045.** Cottle, S. Feb. 3, 1874. Chain, etc., for Necklace.
Reissue No. 5774, Feb. 24, 1874.
Construed, and limited to the described material; held a novel and patentable invention, and sustained, *Mulford v. Pearce*, 13 Blatch., 173. Claim 1 construed to involve mechanical skill only, and void for want of patentability, if not for novelty; claim 2 held void for want of novelty, *Pearce v. Mulford*, 102 U. S., 112. See, also, *Mulford v. Pearce*, 14 Blatch., 141.
- 147288.** Simonds & Emery. Feb. 10, 1874. Machinery for Molding Heel Stiffenings.
Not abandoned by experimental use, *Emery v. Cavanagh*, 17 Fed. Rep., 242.
- 147343.** Miles, P. Feb. 10, 1874. Bail-ears for Pails.
Construed, in view of state of art, to be for mechanical skill, and held not patentable; claim 2 void for aggregation, *Double Pointed Tack Co. v. Two Rivers Mfg. Co.*, 9 Biss., 258; 109 U. S., 117. Claim 2 held void for aggregation; claims 1 and 3 void; are for mere change of form, and not patentable, *Double Pointed Tack Co. v. Mann*, 5 Ban. & Ard., 465.
- 147423.** New, T. Feb. 10, 1874. Tank for Asphalt.
Reissue No. 6683, Oct. 5, 1875.
Held not infringed, *New v. Warren*, 22 O. G., 587.
Reissue No. 6684, Oct. 5, 1875.
Construed to be for the mere operation of a machine, and not patentable as a process. Invalid, not being claimed in original, *New v. Warren*, 22 O. G., 587.
- 147629.** Gale, H. Feb. 17, 1874. Plow-jointer.
Reissue No. 6824, Dec. 28, 1875.
Construed and sustained, *Gale Mfg. Co. v. Prutzman*, 17 O. G., 743.
- 147906.** Coté, L. Feb. 24, 1874. Machinery for Forming Boot and Shoe Stiffeners.
Reissue No. 7356, Oct. 24, 1876.
Held novel, and infringed, *Coté v. Moffitt*, 8 Fed. Rep., 15. See, also, *Coté v. Moffitt*, 15 Fed. Rep., 345.
- 148368.** Jones, W. March 10, 1874. Self-lubricating Axle.
Reissue No. 6129, Nov. 10, 1874.
Jones v. Field, 12 Blatch., 494.
- 148447.** Hahl, A. March 10, 1874. Electric Elevator Indicator.
Construed to be for a combination, and not an aggregation; is sufficiently described, novel, and involves invention, *Western Electric Mfg. Co. v. Chicago Electric Mfg. Co.*, 14 Fed. Rep., 691.
- 148497.** Saladee. March 10, 1874. Running Gear for Vehicles.
Reissue No. 9729, May 31, 1881.
Construed and limited, in view of state of art, and not infringed by omission of elements of the claim, *Saladee v. Racine Wagon and Carriage Co.*, 20 Fed. Rep., 686.
- 148538.** Wollensak, J. F. March 10, 1874. Transom Lifter.
Reissue No. 10,264, Dec. 26, 1882.
Claims alleged infringed; void for delay in reissuing, *Wollensak v. Reiher*, 22 Fed. Rep., 651. Held that the omission in the original of the reissue claims was a mistake apparent on face of patent, on examination with reasonable care, and void for unexplained delay in reissuing, *Ibid.*, 115 U. S., 96.
- 148596.** Clark, N. D. March 17, 1874. Lawn Sprinkler.
Pennington v. Hunt, 20 Fed. Rep., 195.
- 148737.** Millner, J. C. March 17, 1874. Tobacco Curing Furnace.
Reissue No. 9108, March 2, 1880.
Construed to be for a combination of old parts, and wanting in novelty and invention, *Millner v. Voss*, 4 Hughes, 262.
- 148747.** Pentlarge, P. March 17, 1874. Bungs for Casks.
Reissue No. 5937, June 30, 1874.
Claim 1 construed and held not infringed, *Pentlarge v. New York Bung & Bushing Co.*, 5 Ban. & Ard., 594. See, also, *Pentlarge v. Beetson*, 15 Blatch., 347; 15 Blatch., 352; 18 Blatch., 38.
- 148765.** Shorey, S. W. March 17, 1874. Sewing Machine Attachment.
Reissue No. 10,067, March 28, 1882.
Construed; held novel, useful and patentable. Properly reissued to correct seemingly inaccurate description; claim held identical with original; infringed by structural difference in form and size only, *Sewing Machine Co. v. Frame*, 28 O. G., 96.

- 149092.** Brainard, C. R. March 31, 1874. Compositor's Copy Distributor.
Sustained as involving patentable invention; held novel and infringed, *Brainard v. Pulsifer*, 7 Fed. Rep., 349. Held wanting in patentable novelty, in view of state of art, *Brainard v. Evening Post Ass'n*, 19 Fed. Rep., 422.
- 149276.** Wilson, J. W. March 31, 1874. Preserving Meat.
Reissue No. 6370, April 6, 1875.
Patentability doubted, *Wilson Packing Co. v. Clapp*, 8 Biss., 154. Construed and held void for want of novelty, *Wilson Packing Co. v. Hunter*, 10 Biss., 559. Construed and limited, in view of disclaimers to process set forth in specification; held to be for an aggregation, and void for want of novelty and of invention, *Ibid.* (Packing Co. Cases), 105 U. S., 566.
- 149480.** Hurcombe. Apr. 7, 1874. Umbrella Cases.
Construed and held infringed, *Odiorne v. Denney*, 3 Ban. & Ard., 278.
- 149589.** Lindsay & Kalb. Apr. 14, 1874. Fire Brick.
Foster v. Lindsay, 8 O. G., 1032; 3 Dill., 126.
- 149875.** McNish, C. A. April 21, 1874. Annealing Box.
Void for prior public use and abandonment, *McNish v. Everson*, 2 Fed. Rep., 899.
- 149896.** Van Geasen, H. Apr. 21, 1874. Clothes Tag.
Construed, limited and not infringed, *Kimball v. Cunningham*, 22 Fed. Rep., 445.
- 149954.** Royer, H. Apr. 21, 1874. Treating Raw Hide.
Process construed, limited and not infringed; doubted that patentee was first inventor, *Royer v. Chicago Mfg. Co.*, 20 Fed. Rep., 853.
- 150195.** Searls, A. Apr. 28, 1874. Whip Socket.
Reissue No. 9297, July 13, 1880.
Sustained and held infringed, *Searls v. Bouton*, 12 Fed. Rep., 140. Void for being broader than original, *Ibid.*, 12 Fed. Rep., 874; 12 Fed. Rep., 625. Held novel, *Searls v. Van Nest*, 5 Ban. & Ard., 456.
- 150305.** Dodge, J. W. Apr. 28, 1874. Finishing Tool for Boot and Shoe Edges.
Held to be for a practical machine; claims 4 and 5 held, in view of state of art, to involve invention; are valid and infringed, *Fifield v. Whittemore*, 17 Fed. Rep., 513.
- 150683.** Glidden, J. F. May 12, 1874. Barbed Fence Wire.
Reissue No. 6913, Feb. 8, 1876.
Construed; held to involve invention, and sustained, *Washburn & Moen Mfg. Co. v. Haish*, 10 Biss., 83. Held novel in view of state of art; useful, valid, and infringed, *Ibid.*, 10 Biss., 65. Construed in view of original; void for expanded claim and laches in reissuing, *Washburn & Moen Mfg. Co. v. Fuchs*, 16 Fed. Rep., 661. See, also, *Washburn & Moen Mfg. Co. v. Crowell*, 1 Fed. Rep., 225; *Iowa Barbed Steel Wire Co., In re*, 5 Ban. & Ard., 279.
- 150854.** Foster, A. F. May 12, 1874. Fire Brick Composition.
Foster v. Lindsay, 3 Dill., 126; 8 O. G., 1032.
- 150921.** Whitnum, S. May 12, 1874. Coal Scuttle.
Limited in view of patentee not being first in the art; not infringed, *Whitnum v. Seaman*, 4 Fed. Rep., 436.
- 150933.** Barton, E. C. May 19, 1874. Toy Bell.
Reissue No. 6644, Sept. 14, 1875.
Held novel, valid, and claims 1 and 2 infringed, *Gong Bell Mfg. Co. v. Clark*, 13 O. G., 274.
- 151477.** Dederick, P. K. June 2, 1874. Hay and Cotton Press.
Reissue No. 8292, June 18, 1878.
Dederick v. Cassell, 20 O. G., 1233.
- 151703.** Irwin, J. H. June 9, 1874. Lantern.
Considered, *Steam Gauge & Lantern Co. v. Miller & Co.*, 8 Fed. Rep., 314. Construed; claim 2 infringed, *Ibid.*, 21 Fed. Rep., 514. Infringement doubted, *Steam Gauge & Lantern Co. v. St. Louis Railway Supplies Mfg. Co.*, 33 O. G., 889.
- 151730.** Theobald, G. June 9, 1874. Saddle Trees.
Construed, and held not to cover the articles which were marked as patented under it, *Tompkins v. Butterfield*, 33 O. G., 758.
- 152560.** King, W. R. June 30, 1874. Plastering Hair Bale.
Held void for want of novelty and of patentable invention, *King v. Frostel*, 8 Biss., 510. Void for want of invention, being for old process applied to old materials, *King v. Gallun*, 109 U. S., 99.
- 152636.** Heyl, H. R. June 30, 1874. Paper Boxes.
Reissue No. 7488, Feb. 6, 1877.
Claim 2 construed to be for same invention as original; limited in view of state of art, and is not infringed, *Novelty Paper Box Co. v. Stapler*, 5 Fed. Rep., 919.

- 152649.** Kimball, Wm. S. June 30, 1874. Preparing Tobacco.
Construed broadly in view of state of art, and is infringed by substitution of equivalent for part of the process, *Kimball v. Hess*, 15 Fed. Rep., 393.
- 152864.** Pickles, J. C. July 7, 1874. Car Spring.
Reissue No. 6321, March 9, 1875.
Held not anticipated by an abandoned experiment; sustained and infringed, *Pickering v. Miller*, 16 Fed. Rep., 450.
- 153110.** Pennock, J. L. July 14, 1874. Puddling Furnace.
Declared good and valid, *Pennock v. Beale*, 13 O. G., 125.
- 153225.** Spies, A. B. July 21, 1874. Harrow.
Construed and sustained in view of state of art, and held infringed, *Ward v. Grand Detour Plow Co.*, 14 Fed. Rep., 696.
- 153965.** Kennedy, C. Aug. 11, 1874. Barbed Fence Wire.
Held novel in view of state of art, useful and infringed, *Washburn & Moen Mfg. Co. v. Haish*, 10 Biss., 65.
- 154400.** Knapp, A. H. Aug. 25, 1874. Curtain Fixture.
Claim 5 held wanting in novelty and invalid, *Knapp v. Shaw*, 15 Fed. Rep., 115. See, also, *Shaw v. Soule*, 20 Fed. Rep., 790.
- 154985.** Hibbard, G. W. Sept. 15, 1874. Feather Duster.
Sustained; patentee being first and original inventor, and interfering patent No. 177,933 set aside, *National Feather Duster Co. v. Hibbard*, 9 Fed. Rep., 558. Invention doubted, *National Feather Duster Co. v. Dearborne Duster Co.*, 24 O. G., 497.
- 154989.** Joyce, J. O. Sept. 15, 1874. Lifting Jack.
Claim 1 limited to combination of described parts and held not infringed, *Joyce v. Chillicothe Foundry and Machine Works*, 15 Fed. Rep., 260.
- 155077.** Field, J. F. Sept. 15, 1874. Glove Fastening.
Construed, limited and not infringed, *Field v. De Comean*, 5 Ban. & Ard., 40; *v. Ireland*, 19 Fed. Rep., 835.
- 165110.** Messer, L. June 29, 1875. Pocket-book Clasp.
Reissue No. 8106, Feb. 26, 1878.
Construed, sustained, held novel and infringed, *Zinn v. Weiss*, 7 Fed. Rep., 914.
- 155374.** Guilder, A. R. Sept. 29, 1874. Middlings Purifier.
Reissue No. 8386, Aug. 20, 1878.
Construed to be for a new combination of old elements and held infringed, *Consolidated Middlings Purifier Co. v. Guilder*, 3 McCrary, 186.
- 155451.** Knapp, R. Sept. 29, 1874. Buckboard Wagon.
Construed in view of patentee being first in the art; sustained and held infringed, *Knapp v. Joubert*, 19 Blatch., 148.
- 155534.** McDonald, H. M. Sept. 29, 1874. Skirt Protector.
Limited, in view of disclaimer, and held novel, *McDonald v. Blackmer*, 9 O. G., 746. Sustained, and held infringed, *McDonald v. Shepard*, 4 Fed. Rep., 228; 4 Ban. & Ard., 343; *v. Siedenbergh*, 4 Ban. & Ard., 586. See, also, *McDonald v. Shepard*, 10 Fed. Rep., 919; *v. Blackmer*, 4 Ban. & Ard., 78.
- 155601.** Vogler, H. Oct. 6, 1874. Trunk.
Reissue No. 6849, Jan. 11, 1876.
Construed broadly in view of state of art; held novel and infringed, *Vogler v. Semple*, 7 Biss., 382.
- 155670.** Painter & Keizer. Oct. 6, 1874. Pump for Emptying Cess-pools.
Held novel and infringed, *Odorless Excavating Co. v. McCauley*, 2 Ban. & Ard., 570.
- 155806.** Miller, F. C. Oct. 13, 1874. Cigar Molds.
Reissue No. 6662, Sept. 28, 1875.
Held novel, useful and patentable, *Miller & Peters Mfg. Co. v. Du Brul*, 2 Ban. & Ard., 618.
- 155814.** Stockton, W. Oct. 13, 1874. Water Closet.
Claim 1 construed to be for a combination of old elements involving invention; sustained and held infringed, *Stockton v. Maddock*, 10 Fed. Rep., 132.
- 155962.** McKay & Fairfield. Oct. 13, 1874. Nailing Machine for Boots and Shoes.
Reissue No. 7014, March 28, 1876.
Construed to be a deliberate contradiction of original; enlarged claims 1, 2 and 3 invalid; claim 4 not infringed, *McKay v. Stowe*, 17 Fed. Rep., 516.
- 156149.** Frey, J. A. Oct. 20, 1874. Coal Oil Stove.
Reissue No. 7751, June 19, 1877.
Limited to original term of prior foreign patent, exclusive of any extension of such foreign term, *Reissner v. Sharp*, 16 Blatch., 383. Not void for new matter, *Reissner v. Anness*

- & Blauvelt, 3 Ban. & Ard., 176. See, also, *Reissner v. Anness & Blauvelt*, 3 Ban. & Ard., 148; 13 O. G., 7.
- 156195.** Wheeler, Wm. H. Oct. 20, 1874. Windmill.
Reissue No. 9493, Dec. 7, 1880.
Construed and held infringed by use of an equivalent, *Eclipse Windmill Co. v. May*, 17 Fed. Rep., 344. Held novel, and claim 1 infringed, *Eclipse Windmill Co. v. Woodmanse Windmill Co.*, 32 O. G., 1605.
- 156267.** Barber, L. L. Oct. 27, 1874. Sewing Machine Cutting Attachment.
Reissue No. 7860, Aug. 28, 1877.
Claims 2 and 8 infringed, *Barber v. Hallett*, 10 Fed. Rep., 130.
- 156277.** Clark, C. B. Oct. 27, 1874. Shutter Hinge.
Lull v. Clark, 22 O. G., 1535.
- 156302.** Miller, J. October 27, 1874. Bottle Stopper.
Reissue No. 9002, Dec. 23, 1879.
Void, being on its face for a different invention from original, *Putnam v. Tinkham*, 4 Fed. Rep., 411. Claim 1 void for matter disclaimed in original, not constituting mistake or inadvertence, also for delay in reissuing, *Putnam v. Hutchinson*, 12 Fed. Rep., 127. Sustained over interfering patent No. 225,476. Infringed by substitution of equivalent constituting a colorable departure, *Ibid.*, 12 Fed. Rep., 131. See, also, *Putnam v. Hollender*, 11 Fed. Rep., 75.
- 156311.** Quirolo, A. Oct. 27, 1874. Stereoscope.
Reissue No. 6557, July 27, 1875.
Construed to be for putting an old device to a new use, and held wanting in novelty, *Quirolo v. Ardito*, 17 Blatch., 400.
- 156429.** Lindsay, J. P. Nov. 3, 1874. Sleeve Supporter.
Lindsay v. Stein, 21 O. G., 1613.
- 156858.** Presbrey, E. F. Nov. 17, 1874. Ornamenting Bracelets, etc.
Reissue No. 10,239, Nov. 14, 1882.
Construed broadly and held infringed, *Royce v. Fifield*, 18 Fed. Rep., 262.
- 157124.** Glidden, J. F. Nov. 24, 1874. Barbed Fence Wire.
Wanting in invention, *Washburn & Moen Mfg. Co. v. Haish*, 10 Biss., 65. Held, in view of its great utility, to involve invention; not anticipated by single prior device established only by conflicting evidence in the memory of witnesses twenty-five years back; sustained, *Washburn & Moen Mfg. Co. v. Grinnel Wire Co.*, 24 Fed. Rep., 23.
- 157367.** Bright, J. M. Dec. 1, 1874. Horse-collar.
Construed and limited, in view of state of art, to specific device, and not infringed, *Osmer v. Sickles Saddlery Co.*, 23 Fed. Rep., 724.
- 157395.** Hersome, C. Dec. 1, 1874. Shoe Buckle.
Held, in view of state of art, to be a novel and patentable improvement, and is infringed, *Emerson v. Howe*, 8 Fed. Rep., 327.
- 157508.** Glidden & Vaughan. Dec. 8, 1874. Barbing Fence Wires.
Reissue No. 7566, March 20, 1877.
Washburn & Moen Mfg. Co. v. Crowell, etc., Co., 1 Fed. Rep., 225; *Iowa Barbed Steel Wire Co., In re*, 5 Ban. & Ard., 279.
- 158249.** Cone, H. D. Dec. 29, 1874. Ruled Paper Manufacture.
Construed, in view of state of art, to be for a mere changing the space of lines; cannot be sustained independent of method, and does not constitute invention of a new product, *Cone v. Powers*, 4 Ban. & Ard., 107.

1875.

- 158406.** De Quillfeldt, C. Jan. 5, 1875. Bottle Stopper.
Reissue No. 7722, June 5, 1877.
Sustained, and not anticipated by an abandoned experiment, *Putnam v. Hollender*, 19 Blatch., 49. Sustained, and not anticipated by an abandoned experiment; claims 1 and 9 infringed, *Putnam v. Vom Hofe*, 19 Blatch., 63.
- 158482.** Foye, W. H. Jan. 5, 1875. Plow.
Construed in view of drawing; held useful, novel, and claims 1, 4 and 5 infringed, *Foye v. Nichols*, 22 O. G., 2243.
- 158604.** Siedler, C. Jan. 12, 1875. Plug Tobacco Label.
Reissue No. 7362, Oct. 24, 1876.
Held novel and valid, *Lorillard & Co. v. Dohan*, 9 Fed. Rep., 509. Claims 1 and 3 held wanting in invention, *Lorillard & Co. v. Ridgeway*, 4 Ban. & Ard., 564. Claim 1 held not infringed, *Lorillard & Co. v. Drummond Tobacco Co.*, 22 O. G., 1208. Claims 1, 3 and 4 construed, and limited in order to be sustained, and held not infringed, *Lorillard Co. v.*

- McAlpin, 22 O. G., 1208. Construed, held novel, valid, patentable and infringed, *Lorillard & Co. v. McDowell*, 2 Ban. & Ard., 531.
- 158869.** Streit, C. Jan. 19, 1875. Rocking Chair.
Reissue No. 9046, Jan. 13, 1880.
Construed; claims 1, 6 and 7 held not infringed; claim 5 void for new matter, for laches in reissuing, and for claiming what was impliedly disclaimed in original, *Streit v. Lauter*, 11 Fed. Rep., 309.
- 158967.** Mundy, Jos. S. Jan. 19, 1875. Friction Drum.
Reissue No. 9289, July 13, 1880.
Claim 4 construed to be for a novel and patentable combination, involving invention, and not mere mechanical skill, and is for a simplification of a prior machine; infringed by equivalents in combination, although supported differently, *Mundy v. Lidgerwood Mfg. Co.*, 20 Fed. Rep., 114. Construed as above, and infringed by substitution of well known equivalents, *Mundy v. Kendall*, 23 Fed. Rep., 591. See, also, *Mundy v. Lidgerwood Mfg. Co.*, 20 Fed. Rep., 191.
- 159433.** Matthews, J. Feb. 2, 1875. Vessel for Containing Gases and Liquids Under Pressure.
Claim 5, if broadly construed, is wanting in novelty; if limited, is not infringed; its prior use held a public, not an experimental, use, *Matthews v. Iron-clad Mfg. Co.*, 21 Fed. Rep., 641.
- 159467.** Strobridge, T. Feb. 2, 1875. Coffee Mill.
Reissue No. 7583, March 27, 1877.
Construed to be for a novel and patentable combination, involving invention, *Strobridge v. Lindsay*, 2 Fed. Rep., 692. Claim 1 infringed by dividing patented device into two parts, which, united, produced the same result in substantially the same way, *Ibid.*, 6 Fed. Rep., 510. Held to be for same invention as original; claim 1 construed to be for a combination; held novel and infringed, *Strobridge v. Landers*, 11 Fed. Rep., 880.
- 159577.** Hyslop, Jr., J. Feb. 9, 1875. Shoe-shank Machine.
Claim held to describe an operative device; is novel, patentable and infringed, *Jenkins v. Gurney*, 23 Fed. Rep., 898.
- 159741.** Barker, V. Feb. 16, 1875. Green Corn Cutters.
Construed and limited in view of state of art, and held infringed, *Jones v. Barker*, 11 Fed. Rep., 597.
- 159921.** Hart, Jr., W. H. Feb. 16, 1875. Neckties.
Reissue No. 7909, Oct. 9, 1877.
Claim 2, if construed broadly, is for new matter; if limited, is not infringed, *Hart v. Thayer*, 10 Fed. Rep., 746; 22 O. G., 1787.
- 159995.** Wolfe, D. J. Feb. 16, 1875. Torpedo Filling Machine.
Lilliendahl v. Detwiller, 18 Fed. Rep., 176.
- 160933.** Megraw, Wm. March 16, 1875. Brushes.
Held useful, novel, and infringed by mechanical equivalent, *Megraw v. Carroll*, 5 Ban. & Ard., 324.
- 161012.** Day, T. D. March 23, 1875. Skirt Protector.
Held valid and infringed, *Day v. Schwab*, 2 Fed. Rep., 544.
- 161490.** Curran & Wilcox. March 30, 1875. Lumber Drier.
Reissue No. 8846, Aug. 12, 1879.
Construed, and held infringed by the use of all the elements of the combination except one, one of the elements being made to perform in addition the function of the omitted element, *Burdsall v. Curran*, 27 O. G., 1320.
- 161568.** Stephenson, J. March 30, 1875. Signaling Drivers on Street Cars.
Construed to be for placing an old device in a new place without change of result, and held wanting in invention, *Stephenson v. Brooklyn Cross-Town Co.*, 19 Blatch., 473; 114 U. S., 149.
- 161848.** Wilson, W. J. April 6, 1875. Sheet Metal Can.
Reissue No. 7923, Oct. 23, 1877.
Patentability doubted, *Wilson Packing Co. v. Clapp*, 8 Biss., 154. Construed to be for a result of mechanical skill only, and void, *Ibid.*, 8 Biss., 545. Claims 1 and 3 held wanting in novelty, *Wilson v. Hunter*, 10 Biss., 559; *Packing Cases*, 105 U. S., 566.
- 162157.** Downton, R. L. April 20, 1875. Flour Manufacture.
Construed and held void for want of novelty, and for uncertainty, *Downton v. Yaeger Milling Co.*, 1 McCrary, 26. Held anticipated by prior publication, *Ibid.*, 25 O. G., 697. See, also, *Downton v. Yaeger Milling Co.*, 3 McCrary, 414; *v. Allis*, 9 Fed. Rep., 766.
- 162400.** Maxheimer, J. April 20, 1875. Bird Cage.
Construed, held novel and sustained, *Maxheimer v. Meyer*, 9 Fed. Rep., 460.

- 162731.** White, J. April 27, 1875. Globe Holder.
Reissue No. 7286, Aug. 29, 1876.
Construed in view of claim, and held wanting in novelty, *White v. Gleason Mfg. Co.*, 8 Fed. Rep., 917. Construed, and held wanting in novelty; disclaimer disregarded as not performing its proper office, *i. e.*, to take away and not to add or change, *Ibid.*, 17 Fed. Rep., 159.
- 162886.** Bickford, D. May 4, 1875. Knitting Machine.
Held novel and is infringed, *Bickford v. Laporte*, 2 Fed. Rep., 214.
- 163474.** Goddu, L. May 18, 1875. Boot and Shoe Nailing Machine.
Held not infringed, *McKay v. Stowe*, 17 Fed. Rep., 516.
- 163537.** Shuey, Wm. H. May 18, 1875. Circus Seats.
Held not infringed, *Price v. Kelley*, 2 Ban. & Ard., 534; 20 O. G., 1452.
- 163794.** Messer, L. May 25, 1875. Pocket-book Clasp.
Reissue No. 8123, March 12, 1878.
Construed; sustained, held novel, and infringed by a colorable change, *Zinn v. Weiss*, 7 Fed. Rep., 914.
- 163825.** Wallick, W. May 25, 1875. Enameling Moldings.
Sustained and infringed, *Wallick v. Cantrell*, 12 Fed. Rep., 790.
- 164858.** Mehling, G. F. June 22, 1875. Wood Graining Process.
Construed to be for process, each step of which is essential; held not infringed by omission of first and last step, in which alone consists its claim to novelty. Novelty doubted, *Heller v. Bauer*, 19 Fed. Rep., 96.
- 164889.** Whidden, H. F. June 22, 1875. Shoe Nail.
Held valid and infringed, *Dunbar v. Albert Field Tack Co.*, 4 Fed. Rep., 543; *v. Estabrook*, 4 Fed. Rep., 545.
- 165110.** See ¶ 10, p. 812.
- 165832.** Hornum, W. H. July 20, 1875. Fare Register. Reissue No. 8013, Dec. 25, 1877.
Horman Patent Mfg. Co. v. Brooklyn City R. Co., 15 Blatch., 444.
- 166395.** Marks, M. Aug. 3, 1875. Caps.
Reissue No. 7808, July 24, 1877.
Construed to be for a patentable invention identical with original; held novel and infringed, *Marks v. Fox*, 18 Blatch., 502. Construed; infringement doubted, *Marks v. Corn*, 11 Fed. Rep., 900. Validity doubted in view of being for matter applied for in original application; rejected, and rejection acquiesced in, *Arnheim v. Finster*, 32 O. G., 256.
- 166669.** Williams, I. F. Aug. 10, 1875. Overshoes.
Reviewed and held infringed, *Williams v. Candee*, 18 Blatch., 140.
- 166700.** Illingworth, J. Aug. 17, 1875. Molds for Ingots.
Novelty doubted, *Illingworth v. Spaulding*, 9 Fed. Rep., 154. Construed; sustained, and infringed by mechanical equivalent, *Doyle v. Spaulding*, 19 Fed. Rep., 744.
- 166810.** Randel, W. Aug. 17, 1875. Button-hole Attachment.
Wright v. Randel, 19 Blatch., 495.
- 166819.** Shedd, J. Aug. 17, 1875. Shutter Fastener.
Construed and limited to particular device; held novel and valid, *Shedd v. Washburn*, 9 Fed. Rep., 904.
- 166907.** Teas, A. Aug. 17, 1875. Saddle Trees.
Teas v. Albright, 22 O. G., 2069; *Albright v. Teas*, 106 U. S., 613.
- 167040.** Theberath, C. M. Aug. 24, 1875. Harness Mountings.
Construed to be for change in form, proportion or degree only, and held wanting in patentable novelty, *Theberath v. Rubber and Celluloid Harness Trimming Co.*, 15 Fed. Rep., 246. Infringed, *Ibid.*, 3 Fed. Rep., 151. See, also, *Theberath v. Celluloid Mfg. Co.*, 3 Fed. Rep., 143.
- 167123.** Rogers, J. S. Aug. 24, 1875. Process of extracting Gelatine from salted Fish Skins.
Reissue No. 9296, July 13, 1880.
Held infringed, and not anticipated by an abandoned experiment, *Gloucester Isinglass & Glue Co. v. Brooks*, 19 Fed. Rep., 426.
- 167455.** Lockwood, R. Sept. 7, 1875. India Rubber Eraser.
Sustained; patentee held prior inventor in view of diligence in securing patent over a subsequent original inventor, *Lockwood v. Cleveland*, 18 Fed. Rep., 37; *v. Cutter Tower Co.*, 18 Fed. Rep., 653.
Construed and sustained in conformity with prior decisions, and held that disclaimer limited the claim to what had before been sustained, *Lockwood v. Hooper*, 25 Fed. Rep., 910. See, also, *Lockwood v. Cleveland*, 20 Fed. Rep., 164; 6 Fed. Rep., 721; *v. Cutter Tower Co.*, 11 Fed. Rep., 724.

167570. Royer, L. C. Sept. 7, 1875. Grain Separator.

Construed to be for an inoperative combination of old elements, and not infringed by an operative machine with material change in relations and functions, *Royer v. Russell & Co.*, 9 Fed. Rep., 696.

167585. Stephenson, J. Sept. 7, 1875. Street Cars.

Construed to be for a non-patentable aggregation, *Stephenson v. Brooklyn Cross-Town R. Co.*, 114 U. S., 149; 19 Blatch., 473.

167679. Massey, O. W. Sept. 14, 1875. Cotton Gin.

Awarded priority of invention on interference with patent No. 139,820, *Sawyer v. Massey*, 25 Fed. Rep., 144.

167814. Wolfe & Lilliendahl. Sept. 14, 1875. Torpedo Envelope Machine.

Lilliendahl v. Detwiller, 18 Fed. Rep., 176.

168164. Lawther, A. B. Sept. 28, 1875. Process for Treating Oleaginous Seed.

Construed, in view of state of art, to be for mechanical changes in carrying into effect the well known old steps of the process, and not for a process, as claimed; held that patent could not be sustained for a process. Questioned whether means for carrying out process are sufficiently described, *Lawther v. Hamilton*, 21 Fed. Rep., 811.

169855. Shenfield, A. Nov. 9, 1875. Suspender Button Strap.

Construed, and limited, in view of state of art, and held not infringed, *Shenfield v. Schirmer*, 21 Fed. Rep., 241.

169931. Ulman, W. F. Nov. 9, 1875. Pianoforte Pedals.

Wilson v. Chickering, 14 Fed. Rep., 917.

170462. Badger, G. W. Nov. 30, 1875. Boot Tree.

Held novel, useful and infringed, *Cox v. Ramsdell*, 4 Ban. & Ard., 326.

170809. Blatherwick, N. J. Dec. 7, 1875. Horse Shoe.

Construed in view of state of art; sustained, and held not infringed, *Blatherwick v. Cary*, 10 Biss., 494.

170852. Hayes, G. Dec. 7, 1875. Ventilating Louvers.

Claim 1 held to be for an aggregation; claim 5 is for mechanical skill only, *Hays v. Bickelhaupt*, 21 Fed. Rep., 566.

170916. Teas, A. Dec. 7, 1875. Harness-saddles.

Albright v. Teas, 106 U. S., 613; *Teas v. Albright*, 23 O. G., 2069.

170980. Badger, G. W. Dec. 14, 1875. Boring Machine.

Construed to be for a combination of old elements; claim 1 not infringed by omission of one of the elements; claim 2 limited, sustained, and infringed by use of a mere substitute for one of the elements, *Cox v. Ramsdell*, 4 Ban. & Ard., 326.

171133. Hornum, W. H. Dec. 14, 1875. Fare Register.

Reissue No. 8014, July 25, 1877.

Horman Patent Mfg. Co. v. Brooklyn City R. Co., 15 Blatch., 444.

171190. Sullivan, E. O. December 14, 1875. Fire-engine Harness.

Claim 3 broadly construed, patentee being first in the field of invention; is not for an abstraction, but for an apparatus to carry it out, and is infringed by improvements and equivalents. Patentee's claim to first inventorship held insufficiently disproved, *Worswick Mfg. Co. v. City of Buffalo*, 20 Fed. Rep., 126.

171568. Hull, A. J. Dec. 28, 1875. Wash-board.

Duff v. Stirling Pump Co., 107 U. S., 636.

1876.

171642. Ball, A. Jan. 4, 1876. Plow.

Cook v. Birdwell, 20 O. G., 1083.

171926. Eastman & Cottier. Jan. 11, 1876. Water-closet Ventilation.

Held not anticipated, *Cottier v. Stimson*, 20 Fed. Rep., 906.

172346. Royer, H. Jan. 18, 1876. Raw Hide Fulling Machine Attachment.

Construed to be for the application of an old device to an analogous use not involving patentable invention, *Royer v. Chicago Mfg. Co.*, 20 Fed. Rep., 853.

172534. Wheeler, N. Jan. 18, 1876. Filling Wood.

Not anticipated by a prior combination similar in chemical properties, but of different properties as applied; construed, held novel, and infringed, *Bridgeport Wood Finishing Co. v. Hooper*, 18 Blatch., 459.

172639. Mallett, F. W. Jan. 25, 1876. Grinding Needles.

Porter Needle Co. v. National Needle Co., 17 Fed. Rep., 536; 22 Fed. Rep., 829.

172896. Stebins, T. Feb. 1, 1876. Hydraulic Elevator.

Construed, *Stebins Hydraulic Elevator Mfg. Co. v. Stebins*, 4 Fed. Rep. 445.

- 172993.** Gray, E. Feb. 1, 1876. Electric Annunciator for Elevators.
Sustained, *Western Electric Mfg. Co. v. Chicago Electric Mfg. Co.*, 17 Fed. Rep., 691.
- 173124.** Judson, C. Feb. 8, 1876. Corset Spring.
Reissue No. 7729, June 12, 1877.
Construed to be for a combination of old elements; held novel and useful, valid, and infringed; not void for prior knowledge and use, *Judson v. Bradford*, 3 Ban. & Ard., 539.
Construed; infringement doubted, *Hardy v. Marble*, 10 Fed. Rep., 752.
- 173366.** Stockwell, E. Feb. 8, 1876. Time Lock.
Claim 1 construed, and held to involve mechanical skill only, *Yale Lock Mfg. Co. v. Norwich National Bank*, 19 Blatch., 123.
- 173371.** Teas, A. Feb. 8, 1876. Coach Pad.
Albright v. Teas, 106 U. S., 613; *Teas v. Albright*, 22 O. G., 2069.
- 174465.** Bell, A. G. March 7, 1876. Telephone.
Claim 5 construed, held valid and infringed, *American Bell Telephone Co. v. Spencer*, 8 Fed. Rep., 509. Construed; art infringed, *American Bell Telephone Co. v. Dolbear*, 15 Fed. Rep., 448. Held not anticipated by a prior instrument (Reis') capable of similar action to a very limited extent when used in a way not intended by its inventor, *Ibid.*, 17 Fed. Rep., 604. Sustained; patentee held first and original inventor, *American Bell Telephone Co. v. People's Telephone Co.*, 22 Fed. Rep., 309. Prior use of Drawbaugh's instrument held not established, *Ibid.*, 25 Fed. Rep., 725. See, also, *American Bell Telephone Co. v. Ghegan*, 23 O. G., 537.
- 174506.** Everest, H. B. March 7, 1876. Determining Grade of Lubricating Oil.
Construed to be for a process independent of the apparatus used; involves sufficient invention to sustain the patent; not invalidated by insufficiently proved prior use; sustained and infringed, *Everest v. Buffalo Lubricating Oil Co.*, 20 Fed. Rep., 848. See, also, *Everest v. Buffalo Lubricating Oil Co.*, 22 Fed. Rep., 252.
- 174684.** Kendall, T. W. March 14, 1876. Cultivator Runner.
Not infringed, *Pattee Plow Co. v. Kingman*, 23 Fed. Rep., 801.
- 176094.** Sutherland, D. A. April 11, 1876. Boot and Shoe Manufacture.
Reissue No. 7510, Feb. 13, 1877.
Held wanting in novelty in view of state of art; is for a different invention from original, and invalid, *Smith v. Merriam*, 6 Fed. Rep., 903.
- 176402.** Goodwin, W. F. April 18, 1876. Harvester.
Claim 14 construed and limited, in view of state of art, to the specific devices in combination, and held not infringed, *Goodwin v. Warren*, 21 Fed. Rep., 575.
- 176636.** Howard, E. L. April 25, 1876. Treadles.
Whiting v. Graves, 13 O. G., 455.
- 176719.** Westcott, J. M. April 25, 1876. Grain Drill.
Construed and limited, in view of state of art, and not infringed, *Grain Drill Manufacturer's Co. v. Rude*, 23 Fed. Rep., 348.
- 177020.** Simon, W. May 2, 1876. Traveling Bag.
Reissue No. 9772, June 21, 1881.
Claims 1 and 2 held valid; claim 3 is old; claims 4 and 5 held void for expansion made five years after grant of original. Not infringed by copying old parts only, *Simon v. Neumann*, 20 Fed. Rep., 196.
- 177216.** Dederick, P. K. May 9, 1876. Hay and Cotton Press.
Reissue No. 8296, June 25, 1878.
Dederick v. Cassell, 20 O. G., 1233.
- 177296.** Sutherland, D. A. May 9, 1876. Sewing Machine Presser-foot.
Reissue No. 7558, March 17, 1877.
Held valid and infringed, *Smith v. Merriam*, 6 Fed. Rep., 713.
- 177334.** Hutchins, A. B. May 16, 1876. Hydrocarbon Stove.
Held not infringed, *Sharp v. Riessner*, 15 Fed. Rep., 919. See, also, *Sharp v. Riessner*, 9 Fed. Rep., 445.
- 177466.** Brummitt, F. E. May 16, 1876. Utilizing Leather of old Card Clothing.
Construed and held wanting in novelty, *Brummitt v. Howard*, 3 Fed. Rep., 801.
- 177851.** Kells, P. H. May 23, 1876. Brick Machine.
Reissue No. 8127, March 19, 1878.
Void for being on sale for more than two years prior to date of application, *Kells v. McKenzie*, 9 Fed. Rep., 284.
- 177939.** Hibbard, S. M. May 30, 1876. Feather Duster.
Set aside, patentee of interfering patent No. 154,985 being held first and original inventor, *National Feather Duster Co. v. Hibbard*, 9 Fed. Rep., 588.

- 177953.** Niedringhaus, F. G. & W. F. May 30, 1876. Enameled Iron Ware.
Reissue No. 7779, July 3, 1877.
Construed to be for both process and product; is valid and infringed, *St. Louis Stamping Co. v. Quinby*, 4 Ban. & Ard., 192. See, also, *St. Louis Stamping Co. v. Quinby*, 5 Ban. & Ard., 275.
- 177986.** Belt & Perkins. May 30, 1876. Metallic Covering for Buildings.
Held wanting in novelty, *Belt v. Crittenden*, 1 McCrary, 209.
- 178287.** Gibbons, R. June 6, 1876. Pantaloon.
Held novel, and infringed, *Elfelt v. Steinhart*, 6 Sawyer, 480.
- 178428.** Gibbons, R. June 6, 1876. Pantaloon.
Construed, limited, and held not infringed by omission of an element of the combination, *Elfelt v. Steinhart*, 6 Sawyer, 480.
- 178463.** Peters, G. M. June 6, 1876. Tool for attaching Sheet Metal Moldings.
Claims 1 and 2 held wanting in novelty; claims 3 and 4 held not infringed, *Peters v. Active Mfg. Co.*, 21 Fed. Rep., 319.
- 178869.** Moffitt, J. R. June 20, 1876. Machine for Manufacturing Stiffeners for Boots and Shoes.
Process claim construed to be for uniting in one process of two old processes, and held void for want of novelty, *Moffitt v. Rogers*, 8 Fed. Rep., 147.
- 178896.** Bates, J. A. June 20, 1876. Rubber Boots.
Claims 1 and 2 held invalid; claims 5 and 6 held novel, *Moffitt v. Cavanagh*, 17 Fed. Rep., 336.
- 178916.** Dunbar, G. W. June 20, 1876. Preserving Shrimp.
Reissue No. 9957, Dec. 6, 1881.
Sustained, and held no enlargement of the original, *Dunbar v. White*, 15 Fed. Rep., 747.
See, also, *White v. Dunbar*, 26 O. G., 353.
- 178994.** Buzzell, J. G. June 20, 1876. Abrasive Paper for Finishing Shoes, etc.
Held wanting in novelty, *Buzzell v. Fifield*, 7 Fed. Rep., 465.
- 179190.** Hatch, Wm. B. June 27, 1876. Spring Bed Bottom.
Reissue No. 9576, Feb. 15, 1881.
Hatch v. Adams, 22 Fed. Rep., 434; *v. Hall*, 22 Fed. Rep., 438.
- 179316.** Irish, B. T. June 27, 1876. Photography.
Single claim construed to be dual, and to embrace two processes; one process held wanting in novelty, the other held valid and infringed, *Irish v. Knapp*, 5 Ban. & Ard., 47.
- 179581.** Lyman, W. C. July 4, 1876. Traps for Exhaust Steam Pipes.
Construed, and limited in order not to include forms of devices given to public by patentee more than two years prior to date of application; is not infringed, *Lyman v. Maypole*, 19 Fed. Rep., 735.
- 179583.** Matthews, J. July 4, 1876. Soda Fountain.
Claim 1 held not infringed; claim 2 held wanting in novelty, *Matthews v. Iron-clad Mfg. Co.*, 21 Fed. Rep., 641.
- 180001.** Bussey & McLeod. July 18, 1876. Cooking Stove.
Construed; limited in view of state of art, and held not infringed, *Bridge v. Excelsior Mfg. Co.*, 17 O. G., 259. Construed, and limited to specific device in view of state of art; as limited, is not infringed, *Ibid.*, 105 U. S., 618. See, also, *Bussey v. Excelsior Mfg. Co.*, 1 McCrary, 161.
- 180676.** Teas, A. Aug. 1, 1876. Harness Saddle-tree.
Albright v. Teas, 106 U. S., 613; *Teas v. Albright*, 22 O. G., 2069.
- 180717.** Isaacs, M. C. Aug. 8, 1876. Railway Track Brooms.
Construed to be for a patentable change in form and sustained; patentee held first and original inventor, *Isaacs v. Abrams*, 3 Ban. & Ard., 616.
- 180886.** Jackson, M. T. Aug. 8, 1876. Vehicle Running Gear.
Sustained and held infringed, *Grier v. Castle*, 17 Fed. Rep., 523.
- 181113.** Stebins, T. Aug. 15, 1876. Hydraulic Elevator.
Construed, *Stebins Hydraulic Elevator Mfg. Co. v. Stebins*, 4 Fed. Rep., 445.
- 181512.** Worley & McCabe. Aug. 22, 1876. Finishing Plug Tobacco.
Construed to be for a process, and held void for public use more than two years prior to date of application, *Worley v. Loker Tobacco Co.*, 104 U. S., 340.
- 182633.** Berton, L. T. Sept. 26, 1876. Mirror.
Construed; held valid and not anticipated, *Hall v. Stern*, 15 Fed. Rep., 463; 20 Fed. Rep., 788.
- 182973.** Votti, C. Oct. 3, 1876. Shade Holder for Lamp.
Reissue No. 7511, Feb. 13, 1877.
Construed, and in the absence of a sufficient description of part infringed, limited to

that shown in drawing, and held not infringed, *Schneider v. Lovell*, 10 Fed. Rep., 666. Claim 1 held void for want of invention, and patent held void for insufficient description in the specification, *Schneider v. Thill*, 5 Ban. & Ard., 565. See, also, *Schneider v. Thill*, 5 Ban. & Ard., 595; 18 Blatch., 241.

Reissue No. 10,087, April 11, 1882.

Declared *prima facie* valid, *Schneider v. Bassett & Co.*, 22 O. G., 1447. Held to remedy defects of original patent, and of prior reissue, by a sufficient description; held infringed by manufacture and sale of one element of the combination incapable of use except in such combination, *Schneider v. Pountney*, 21 Fed. Rep., 399.

183347. Waring, Jr., G. Oct. 17, 1876. Pocket Check Book.

Reissue No. 8199, April 23, 1878.

Construed to be for same invention as original; claim 1 held novel, sustained, and infringed, *Waring v. Johnson*, 19 Blatch., 38.

183545. Dickey & Perry. Oct. 24, 1876. Heating Stove.

Claim 2 held to be for an aggregation, and is invalid, *Perry v. Co-operative Foundry Co.*, 12 Fed. Rep., 436.

183809. Knapp, A. H. Oct. 31, 1876. Curtain Fixture.

Claim 1 held valid, and infringed, *Knapp v. Shaw*, 15 Fed. Rep., 115. See, also, *Shaw v. Soule*, 20 Fed. Rep., 790.

183913. Evarts, J. A. Oct. 31, 1876. Extension Lamp Fixtures.

Reissue No. 7628, April 4, 1877.

Construed; existence of a patentable combination doubted, *Bradley & Hubbard Mfg. Co. v. Charles Parker Co.*, 17 Fed. Rep., 240. Construed, and held that the part infringed, while shown in the drawing, and a mechanical feature of the patented device, was not in the mind of the patentee an essential part of his invention, nor was it made a distinctive part of the patented improvement, *Ibid.*, 34 O. G., 249.

184281. Dunham, H. Nov. 14, 1876. Boot and Shoe Nailing Machine.

Construed; combination claims 1, 2 and 3 infringed, *Dunham v. Kimball*, 17 Fed. Rep., 810.

184310. Walker, C. W. Nov. 14, 1876. Pocket Comb Cases.

Held not void for want of novelty, *Walker Glass Co. v. Souweine*, 32 O. G., 1466.

184352. Duffy, J. N. Nov. 14, 1876. Apparatus for Drying Hides.

Patentee held first and original inventor of claims 2, 3 and 4; infringement not shown, *Duffy v. Reynolds*, 33 O. G., 621.

184855. Funk, J. Nov. 28, 1876. Lamp.

Claim 2 in the reissue application held novel, and should be allowed, *Funk's Application*, 3 MacArthur, 460.

184896. Perkins, E. L. Nov. 28, 1876. Pasteboard Manufacturing Machine.

Void for public use more than two years prior to date of application, *Perkins v. Nashua Card, etc., Co.*; 2 Fed. Rep., 451.

184933. Vogeley, A. Nov. 28, 1876. Apparatus for labeling Glass Plates.

Construed; held sufficient to show the best mode of applying the invention, although not so shown in drawing, *Vogeley v. Noel*, 18 Fed. Rep., 827.

185119. Miller & Worley. Dec. 5, 1876. Finishing Plug Tobacco.

Reissue No. 8060, Jan. 29, 1878.

Held wanting in novelty, *Miller v. Foree*, 9 Fed. Rep., 603. Claim 1 held broader than original; construed to be for the application of an old process to the same material at a different stage, held not patentable and wanting in novelty, *Miller v. Foree*, 33 O. G., 1497. See, also, *Liggett & Myers Tobacco Co. v. Miller*, 1 McCrary, 31; *Miller v. Liggett & Myers Tobacco Co.*, 3 McCrary, 275.

185716. Beatty, J. P. Dec. 26, 1876. Hats.

Construed to be for an aggregation involving mechanical skill only, and is not novel, *Beatty v. Hodges*, 19 Blatch., 381.

1877.

186225. Beland, L. Jan. 16, 1877. Drill-clamp.

Construed to be for a combination, and held not infringed, *Rumsey v. Buck*, 20 Fed. Rep., 697.

186369. Sargent, J. Jan. 16, 1877. Time Lock.

Construed, and strictly limited in view of history of the application, and held not infringed, *Sargent v. Hall Safe & Lock Co.*, 114 U. S., 63.

186628. Schalscha, J. Jan. 23, 1877. Cigar.

Construed, limited and not infringed, *Schalscha v. Sutro*, 19 Fed. Rep., 319.

186787. Bell, A. G. Jan. 30, 1877. Telephone.

Held infringed, *American Bell Telephone Co. v. Dolbear*, 15 Fed. Rep., 448; 17

- Fed. Rep., 604. Sustained, American Bell Telephone Co. v. People's Telephone Co., 22 Fed. Rep., 309. Prior use of Drawbaugh instrument held not established, *Ibid.*, 25 Fed. Rep., 725. See, also, American Bell Telephone Co. v. Ghegan, 23 O. G., 537.
- 186860.** Maynard, W. Jan. 30, 1877. Hydrating Chlorine Gas.
Not infringed by sale of less than the entire combination, Maynard v. Pawling, 3 Fed. Rep., 711.
- 187100.** Clark J. Feb. 6, 1877. Cheese-former for Cider Press.
Void for aggregation and want of novelty, Clark Pomace Holder Co. v. Ferguson, 17 Fed. Rep., 79.
- 187516.** Cooley, Wm. Feb. 20, 1877. Obtaining Cream from Milk.
Construed to cover a process accomplished by a combination of mechanical devices; is infringed; held not anticipated by a prior use not proceeded with so far as to discover its utility, Boyd v. Cherry, 4 McCrary, 70.
- 187899.** Pattee, H. H. Feb. 27, 1877. Cultivator Axles.
Wanting in novelty, Pattee Plow Co. v. Kingman, 23 Fed. Rep., 801.
- 187964.** Clark, Wm. A. March 6, 1877. Lubricator.
Construed and limited in view of state of art, and not infringed as limited, Jenks v. Swift, 25 Fed. Rep., 722.
- 188691.** Stultz, S. March 20, 1877. Ore Washer.
Reissue No. 9011, Dec. 30, 1879.
Claim 5, omitted in original by mistake of attorney, held a proper case for, and valid in reissue; not void for delay, no intervening rights having accrued; claims 4 and 5 construed and sustained, Stultz v. Armstrong & Son, 20 Fed. Rep., 843. See, also, Stultz v. Armstrong & Son, 25 Fed. Rep., 147.
- 188879.** Eells & Lord. March 27, 1877. Ships Pumps.
Construed broadly in view of state of art, and held infringed, Loud v. Stone, 11 Fed. Rep., 721.
- 188950.** Rice, E. March 27, 1877. Trunk Fastening.
Construed and held not infringed, Cowell v. Sessions, 17 Fed. Rep., 450.
- 189220.** Hicks, O. H. April 3, 1877. Hoes.
Considered, Cook v. Sandusky Tool Co., 26 O. G., 1114.
- 189250.** Milligan, C. H. April 3, 1877. Sheet Metal Vessels.
Held to be for matter inserted by unauthorized act of attorney, and which was not invented by inventor; is void, Milligan v. Lalanc & Grosjean Mfg. Co., 21 Fed. Rep., 570.
- 189405.** Warner, I. De Ver. April 10, 1877. Corsets.
Reissue No. 8114, March 5, 1878.
Warner v. Bassett, 19 Blatch., 145.
- 189432.** Curran & Wilcox. April 10, 1877. Lumber Drier.
Reissue No. 8840, Aug. 12, 1879.
Construed and held infringed, Burdsall v. Curran, 27 O. G., 1320.
- 190184.** Beck, A. May 1, 1877. Quilting Machine.
Reissue No. 9097, Feb. 24, 1880.
Claim for invention not in original, held invalid; other claim held valid, but not infringed, Dryfoos v. Wiese, 19 Fed. Rep., 315.
- 190368.** Reynolds, A. Q. May 1, 1877. Fruit-drier.
Construed and held infringed by substitution of mechanical equivalents, Wilt v. Grier, 5 Fed. Rep., 450.
- 190563.** Day, A. May 8, 1877. Railway Track Cleaner.
Day v. Detroit City Railway Co., 22 O. G., 946.
- 190655.** White, H. May 8, 1877. Shoe Tip.
Reissue No. 8536, Jan. 7, 1879.
Construed and limited, White v. Lee, 14 Fed. Rep., 789. See, also, White v. Lee, 3 Fed. Rep., 222; 4 Fed. Rep., 916.
- 190816.** Brown, Wm. P. May 15, 1877. Cultivator Coupling.
Claim 1 held not ambiguous, and not vitiated by a useless part of the claim, which was not used by infringer; construed to be for change of location of parts involving invention; held novel and infringed, Brown Mfg. Co. v. Deere & Co., 21 Fed. Rep., 709. Claim 1 construed in conformity with above; claims 1 and 2 infringed, Brown Mfg. Co. v. Buford, 21 Fed. Rep., 714.
- 191102.** Brooke, H. May 22, 1877. Glass Molds for Shade-holders.
Void for public use and sale more than two years prior to date of application, Schneider v. Thill, 5 Ban. & Ard., 565.

- 191103.** Brooke, H. May 22, 1877. Molds for Glass Shades.
Void for public use and sale more than two years prior to date of application, *Schneider v. Thill*, 5 Ban. & Ard., 565.
- 191171.** Parshall, C. H. May 22, 1877. Lubricator.
Not anticipated by a drawing showing a perfect machine, but not reduced to practice. Claim 6 construed, and limited, in view of state of art; held to be for a combination involving invention, and not for an aggregation, *Detroit Lubricator Mfg. Co. v. Renchard*, 9 Fed. Rep., 293.
- 191224.** Brooke, H. May 29, 1877. Glass Shade Manufacture.
Void for public use and sale more than two years prior to date of application, *Schneider v. Thill*, 5 Ban. & Ard., 565. See, also, *Schneider v. Thill*, 18 Blatch., 241.
- 191233.** Fosburgh, C. E. May 29, 1877. Canopy Tops.
Dare v. Boylston, 18 Blatch., 548.
- 191244.** Ladd, H. W. May 29, 1877. Spring Bed Bottoms.
Held to involve more than mere mechanical substitution, and sustained, *Ladd v. Tucker Mfg. Co.*, 4 Ban. & Ard., 344.
- 191400.** Buzzell, J. G. May 29, 1877. Whitening and Shaving Leather.
Claim 1 construed strictly to be for a combination of old elements, and not infringed by a different machine which could be forced to produce a similar result, *Buzzell v. Andrews*, 25 Fed. Rep., 822.
- 191405.** Clark & Harris. May 29, 1877. Soldering Process.
Construed in view of state of art, and held wanting in novelty, *Adams & Westlake Mfg. Co. v. Wilson Packing Co.*, 21 Fed. Rep., 648.
- 191656.** Class, Wm. F. June 5, 1877. Apparatus for Pumping Fluids from Casks.
Reissues Nos. 8025 and 8026, Jan. 8, 1878.
Held valid, being properly reissued with broader claims within four months. Reissue 8025 held infringed, *Worswick Mfg. Co. v. Steiger*, 17 Fed. Rep., 250.
- 191798.** Cross, A. T. June 12, 1877. Stylographic Pen.
Reissue No. 9716, May 24, 1881.
Construed; infringement doubted, *Cross v. Livermore*, 9 Fed. Rep., 607.
- 192008.** Randel, Wm. June 12, 1877. Button Hole Attachment for Sewing Machines.
Wright v. Randel, 19 Blatch., 495.
- 192098.** Toohey, M. June 19, 1877. Plaiting Machine.
Construed, and held not infringed, *Toohey v. Harding*, 4 Hughes, 254.
- 192386.** Pentlarge & Hirsch. June 26, 1877. Vent Bung.
Reissue No. 10,175, Aug. 1, 1882.
Held not interfered with by patent No. 203,316; construed and limited in view of prior inventions, *Pentlarge v. New York Bung & Bushing Co.*, 20 Fed. Rep., 314. See, also, *Pentlarge v. Pentlarge*, 19 Fed. Rep., 817; 22 Fed. Rep., 412.
- 193038.** Rogers, J. J. July 10, 1877. Beverage.
Construed, in view of state of art, to be a new and useful composition of matter, consisting in the substitution of a new element, *Rogers v. Ennis*, 15 Blatch., 47.
- 193476.** Bowker, H. L. July 24, 1877. Sirups and Mineral Waters.
Held novel and patentable; infringed by sale of materials with intent to have them combined and to procure infringement, *Bowker v. Dows*, 3 Ban. & Ard., 518.
- 193867.** Hammerschlag, S. Aug. 7, 1877. Waxing Paper.
Reissue No. 8460, Oct. 22, 1878.
Sustained and held infringed, *Hammerschlag v. Garrett*, 9 Fed. Rep., 43; *v. Scamoni*, 20 O. G., 1448. Sustained; claim 5 construed to be for an art consisting of four successive steps; claims 1, 2, 3 and 5 infringed, *Hammerschlag v. Scamoni*, 7 Fed. Rep., 584. Claim 5 limited to process consisting of certain essential steps, and not infringed by the omission of one of them, *Hammerschlag v. Garrett*, 10 Fed. Rep., 479. Claim 5 construed in conformity with above, and held infringed, *Hammerschlag Mfg. Co. v. Wood*, 18 Fed. Rep., 175.
- 194059.** Stultz, S. Aug. 14, 1877. Ore-washer.
Claim 3 construed and held novel; valid, and is for a combination and not an aggregation, *Stultz v. Armstrong & Son*, 20 Fed. Rep., 843. See, also, *Stultz v. Armstrong & Son*, 25 Fed. Rep., 147.
- 194519.** Harris, A. Aug. 28, 1877. Soldering Tool.
Held infringed, *Adams & Westlake Mfg. Co. v. Wilson Packing Co.*, 21 Fed. Rep., 648.
- 194662.** Etheridge, M. V. Aug. 28, 1877. Automatically Measuring Hides of Leather.
Held not infringed by a machine made only for exhibition at a fair, *Standard Measuring Machine Co. v. Teague*, 15 Fed. Rep., 390.

- 194743.** Tapley & Porter. Aug. 28, 1877. Automatic Leather Measurer.
Reissue No. 9204, May 18, 1880.
Held novel and broadly construed, being an entirely new art; is infringed, Standard Measuring Machine Co. v. Teague, 15 Fed. Rep., 390.
- 195233.** Roemer, Wm. Sept. 18, 1877. Combined Traveling-bag Lock and Handle.
Infringed by use with an addition thereto, Roemer v. Simon, 20 Fed. Rep., 197. See, also, Roemer v. Neuman, 19 Fed. Rep., 98; 23 Fed. Rep., 447.
- 195415.** Still, H. C. & J. R. Sept. 18, 1877. Saddle Tree.
Still & Bro. v. Reading, 9 Fed. Rep., 40.
- 195539.** Sargent, J. Sept. 25, 1877. Combined Time Lock.
Reissue No. 7947, Nov. 13, 1877.
Claim 3 construed, in view of state of art, to be for a novel combination of old elements producing a new result, involving invention, and is not for an aggregation; held valid and infringed, Yale Lock Mfg. Co. v. Norwich National Bank, 19 Blatch., 123. Claim 3 construed to be for a double use, and does not involve patentable novelty; held void, also, as a claim for a principle, Yale Lock Mfg. Co. v. Berkshire National Bank, 17 Fed. Rep., 531.
- 195948.** Plummer, W. S. Oct. 9, 1877. Fruit Drier.
Sustained and infringed, Corvallis Fruit Co. v. Curran, 7 Sawyer, 270.
- 196006.** Gayton, Wm. C. Oct. 9, 1877. Window Cleaner.
Reissue No. 8393, Sept. 3, 1878.
Construed to be for a new use of an old and well known article, involving mechanical skill only, and not invention, Perfection Window Cleaner Co. v. Bosley, 9 Biss., 385.
- 196425.** Brush, C. F. Oct. 23, 1877. Illuminating Points for Electric Lights.
Brush v. Condit, 20 Fed. Rep., 826.
- 196778.** Bickford, E. F. Nov. 6, 1877. Rubber Boot.
Held wanting in novelty, Boston Rubber Shoe Co. v. Lamkin, 18 Fed. Rep., 93.
- 197314.** Bate, J. J. Nov. 20, 1877. Preserving Meat during Transportation.
Held not invalid for want of novelty; is infringed, Bate Refrigerating Co. v. Gillett, 9 Fed. Rep., 387. Term held limited by Canadian patent issued prior to domestic patent, but not delivered, *Ibid.*, 22 O. G., 1205. Held valid for full term of domestic patent, and not limited by prior five-year Canadian patent, which has been declared void *ab initio*, *Ibid.*, 20 Fed. Rep., 192. Sustained in view of prior construction and state of art; claims construed, limited, and held infringed, Bate Refrigerating Co. v. Eastman, 11 Fed. Rep., 902. See, also, Bate Refrigerating Co. v. Gillett, 32 O. G., 1466.
- 197369.** Hoffman, D. Nov. 20, 1877. Tripod-head for Surveying.
Construed to be for a novel and patentable combination of old elements, and sustained, Hoffman v. Young, 2 Fed. Rep., 74.
- 197528.** Schmidt, F. E. Nov. 27, 1877. Button-hole Machine Feed Mechanism.
Construed to be for a particular combination, and not infringed by substituting a sliding link for the lever in combination, Schmidt v. Freese, 12 Fed. Rep., 563.
- 197807.** Wilson, W. Dec. 4, 1877. Collars.
Reissue No. 8169, April 9, 1878.
Construed to be for same invention as original; held novel and sustained, Wilson v. Coon, 18 Blatch., 532. Claims 1 and 4 held enlarged where there was no inadvertence, and are invalid, Coon v. Wilson, 113 U. S., 268.
- 197913.** Warner, I. De Ver. Dec. 4, 1877. Corset.
Warner v. Bassett, 19 Blatch., 145.
- 198432.** Stultz, S. Dec. 18, 1877. Ore Washer.
Claim 3 held novel, Stultz v. Armstrong & Son, 20 Fed. Rep., 843. See, also, Stultz v. Armstrong & Son, 25 Fed. Rep., 147.
- 198467.** Rogers, J. J. Dec. 25, 1877. Beverage.
Construed to be a new and useful composition of matter, Rogers v. Ennis, 15 Blatch., 47. Held novel and not infringed, Rogers v. Beecher, 3 Fed. Rep., 639.

1878.

- 199621.** Cross, A. T. Jan. 29, 1878. Stylographic Pen.
Construed; infringement doubted, Cross v. Livermore, 9 Fed. Rep., 607. Claim 1 construed to be for a patentable combination; held novel and infringed, Cross v. MacKinnon, 11 Fed. Rep., 601.
- 199948.** Wilson, J. G. Feb. 5, 1878. Connecting Blind-slats.
Held novel and infringed, Whitman v. James, 5 Ban. & Ard., 575.

- 200068.** Lever, J. S. Feb. 5, 1878. Book Binding.
Reissue No. 8195, April 23, 1878.
Held, on interference, later in date of invention than No. 239,927, Wire Book Sewing Machine Co. v. Stevenson, 11 Fed. Rep., 155.
- 200078.** McDonald, J. W. Feb. 5, 1878. Unhairing and Scouring Hides.
Held valid, McDonald v. Whitney, 32 O. G., 1465.
- 200214.** Miller, W. E. Feb. 12, 1878. Carriage Axles.
Construed, limited, and held not infringed, Ives v. Hartford Spring & Axle Co., 11 Fed. Rep., 510.
- 200939.** Sanborn, Kanouse & Sanborn. March 5, 1878. Fabric for Collars and Cuffs.
Held novel, involves invention, and is infringed, Celluloid Mfg. Co. v. Chrolithion Collar & Cuff Co., 23 Fed. Rep., 397; 32 O. G., 383. Sustained, *Ibid.*, 25 Fed. Rep., 482.
- 201536.** Kirk, E. C. March 19, 1878. Bronze Alloy.
Construed and limited to proportions used, and held not infringed by an alloy differing in proportions and in which one element was present as an impurity and not artificially added, Kirk v. Elkins Mfg. Co., 19 Fed. Rep., 417.
- 201670.** Hewitt, H. L. March 26, 1878. Sulky Plow.
Hapgood v. Hewitt, 11 Fed. Rep., 422.
- 202158.** Davis, F. April 9, 1878. Door Bolt.
Reissue No. 9901, Oct. 18, 1881.
Void for unreasonable delay in reissuing, Ives v. Sargent, 17 Fed. Rep., 447.
- 202660.** MaGuire, T. M. April 23, 1878. Hydraulic Power Accumulator.
Validity of patent questioned, McGuire v. Eames, 15 Blatch., 312. Void for failure to discriminate between the old part and the improvement, the claim being co-extensive with the specification, Maguire v. Eames, 18 Blatch., 321.
- 202673.** Smith & Thayer. April 23, 1878. Neck-tie Shields.
Held subsequent in date of invention to No. 220,610, Thayer v. Hart, 20 Fed. Rep., 693; 20 Fed. Rep., 696.
- 202735.** Lindsay, J. P. April 23, 1878. Sleeve-supporter.
Construed, held to involve invention, and is not for a duplication or double use; not abandoned by sale more than two years prior to date of application, nor by filing new application; held novel, and claim 2 infringed, Lindsay v. Stein, 10 Fed. Rep., 907.
- 203069.** Pennington & Beggs. April 30, 1878. Lawn Sprinkler.
Held to involve invention; held valid and infringed, Pennington v. King, 7 Fed. Rep., 462.
- 203226.** Watson, C. R. April 30, 1878. Grain Car Doors.
Construed, and strictly limited to combination of specific devices, in view of disclaimer in specification, and not infringed by use of part of the combination; invention doubted, Watson v. Cincinnati, L., St. L. & C. R'y Co., 23 Fed. Rep., 443.
- 203316.** Borst, G. May 7, 1878. Bungs.
Held not to interfere with No. 192,386; construed, and limited in view of prior inventions, Pentlarge v. New York Bung & Bushing Co., 20 Fed. Rep., 314.
- 203411.** Brush, C. F. May 7, 1878. Electric Lamps.
Reissue No. 8718, May 20, 1879.
Construed in view of properly made disclaimer. and held anticipated by public use in a factory of a prior perfected invention, which was subsequently laid aside, Brush v. Condit, 20 Fed. Rep., 826.
- 204321.** Hand & Caulier. May 28, 1878. Wardrobe Bedstead.
Claim 1 construed to be for a combination, and not infringed by use of two of its elements where the omitted element had a function of its own not performed by the elements used. Claim 2 limited and not infringed, Tobey Furniture Co. v. Colby, 34 O. G., 1276.
- 205129.** Packard, F. June 18, 1878. Shoes and Gaiters.
Evory v. Burt, 23 O. G., 2121.
- 205193.** Lefever, D. M. June 25, 1878. Breach-loading Fire-arm.
Construed, and limited in view of state of art to specific claim; held novel, valid, and not infringed, Lefever v. Remington & Sons, 22 O. G., 1537.
- 205927.** Underwood, F. July 9, 1878. Railroad Track Drill.
Construed to be for a combination, and held not infringed, Underwood v. Warren, 24 Fed. Rep., 183. See, also, Underwood v. Warren, 21 Fed. Rep., 573.
- 205942.** Graham, W. A. July 9, 1878. Method and Apparatus for Extinguishing Fires.
Held constitutionally granted by special act, after a lapse of forty years after date of application; held not to interfere with vested rights; was novel at date of application; claims construed and held properly joined in one patent; novelty and validity of claims 2 and 3 doubted; claims 1 and 4 sustained; specification held not deceptive nor misleading,

- Graham v. Johnston, 21 Fed. Rep., 40. See, also, Fire Extinguisher Mfg. Co. v. Graham, 16 Fed. Rep., 543.
- 206061.** Westland, C. S. July 16, 1878. Lamp.
Infringed by an improved device embodying it, White v. Heath, 10 Fed. Rep., 291.
- 206077.** Boykin & Carmer. July 16, 1878. Fertilizing Compound.
Held to be for a change in degree only, and for substitution of a known equivalent; void for want of invention and of novelty, Boykin v. Baker, 4 Hughes, 282.
- 206141.** Shepard, A. July 16, 1878. Coffee and Spice Mill.
Reissue No. 8866, Aug. 19, 1879.
Held novel, Peck v. Lindsay, 2 Fed. Rep., 688.
- 206514.** Williams, D. C. July 30, 1878. Sand Washer.
Limited to combination specified, and not infringed by omission of an essential element, Williams v. Stolzenbach, 23 Fed. Rep., 39.
- 206835.** Selden, G. Aug. 6, 1878. Cigar-lighter.
Construed and held not infringed, Selden v. Stockwell Self-lighting Gas Burner Co., 19 Blatch., 544.
- 207484.** Blessing, J. H. Aug. 27, 1878. Steam Traps.
Limited in view of state of art, and held infringed, Albany Steam Trap Co. v. Felthousen, 20 Fed. Rep., 633.
- 207738.** Hill & Prentice. Sept. 3, 1878. Box Creamery.
Wooster held inventor on interference, and entitled to patent for certain improvements thereon, Wooster v. Hill, 22 Fed. Rep., 830. Held to have abandoned the unclaimed matter shown in patent by not claiming it, Hill v. Commissioner of Patents, 33 O. G., 757.
- 207822.** Shaw, P. Sept. 10, 1878. Milk Can.
Butler v. Shaw, 21 Fed. Rep., 321.
- 208157.** Covert, J. C. Sept. 17, 1878. Rope Clamp.
Held infringed, Covert v. Curtis, 25 Fed. Rep., 43.
- 208541.** Roemer, Wm. Oct. 1, 1878. Locks for Satchels.
Sustained and infringed, Roemer v. Headley, 19 Fed. Rep., 205.
- 208595.** Hetherington, J. E. Oct. 1, 1878. Artificial Honeycomb Foundations.
Reissue No. 8962, Nov. 11, 1879.
Claim 1 held, in view of state of art, wanting in invention, Van Deusen v. Nellis, 18 Fed. Rep., 596.
- 209070.** Norton, E. Oct. 15, 1878. Paint Can.
Construed to be for a combination of old elements, and limited to precise device, and not infringed by a combination substantially different in one of its parts, Norton v. Haight, 22 Fed. Rep., 787.
- 209266.** Irwin, J. H. Oct. 22, 1878. Telephone Transmitter.
Claims 1 and 2 construed, and held not infringed, Irwin v. Metropolitan Telephone & Telegraph Co., 9 Fed. Rep., 517.
- 209393.** Hammerschlag, S. Oct. 29, 1878. Waxing Paper.
Claim 1 construed to be for a method, claim 2 for a combination of machinery; both claims infringed, Hammerschlag v. Scamoni, 7 Fed. Rep., 584. Examined; sustained and held infringed, Hammerschlag v. Wood, 18 Fed. Rep., 175. See, also, Hammerschlag v. Garrett, 21 O. G., 1199.
- 209701.** McGill, G. W. Nov. 5, 1878. Buckle.
Claim construed, limited and held infringed, Holmes, Booth & Haydens v. Osborn & Cheesman, 7 Fed. Rep., 671.
- 209826.** Moffitt, J. R. Nov. 12, 1878. Machine for Forming Boot and Shoe Stiffeners.
Claim 2 held invalid; claims 1, 3 and 4 sustained and infringed, Moffitt v. Cavanagh, 17 Fed. Rep., 336.
- 210714.** Sheeder, J. F. Dec. 10, 1878. Paper Board Manufacture.
Claim 2 construed and limited to combination of specific devices in view of state of art, and held not infringed, Sheeder v. Shannon, 25 Fed. Rep., 824.
- 210780.** Hyatt, J. W. Dec. 10, 1878. Piano Key Manufacture.
Held to involve invention; claim 1 construed and limited to plastic composition named, and infringed by covering a substantial portion of the key-board in place of all of it; claim 2 held incorrect as a process claim, Celluloid Mfg. Co. v. Pratt, 21 Fed. Rep., 313. Construed in conformity with above and held not infringed, Celluloid Mfg. Co. v. Comstock, 23 Fed. Rep., 38.
- 210797.** McDonald, J. W. Dec. 10, 1878. Unhairing and Scouring Hides.
Held novel and valid, in view of conflicting evidence; construed and held infringed, McDonald v. Whitney, 32 O. G., 1465.

1879.

- 212487.** Morris, J. B. Feb. 18, 1879. Sash Fastener.
Held not interfered with by patent No. 284,506, *Morris v. Kempshall Mfg. Co.*, 20 Fed. Rep., 121.
- 213323.** Coupe, W. March 18, 1879. Stretching Raw Hide.
Claims 1 and 3 held infringed, *Coupe v. Weatherhead*, 16 Fed. Rep., 673.
- 214513.** Miller, L. B. April 22, 1879. Sewing Machine.
Held, in view of state of art, to involve invention; construed and limited to specific device, and infringed by use with improvement, *Singer Mfg. Co. v. Henry Stewart Mfg. Co.*, 8 Fed. Rep., 920.
- 214706.** Ross, N. G. & T. D. April 22, 1879. Barbed Wire Machine.
Construed and limited, in view of state of art, to the combination claimed, and held not infringed, *Washburn & Moen Mfg. Co. v. Fuchs*, 16 Fed. Rep., 669.
- 215024.** Starrett, L. S. May 6, 1879. Try Square.
Reissue No. 9419, Oct. 19, 1880.
Claim 6 sustained and infringed, *Starrett v. Athol Machine Co.*, 14 Fed. Rep., 910.
- 215034.** Adams, Jr., I. May 6, 1879. Coating Articles with Vulcanizable Rubber.
Construed, and held not anticipated by prior published indefinite statements in certain prior patents, *Hood v. Boston Car-spring Co.*, 21 Fed. Rep., 67.
- 215548.** Weir, F. C. May 20, 1879. Railroad-frog.
Reissue No. 8914, Sept. 30, 1879.
Claim 2 construed and limited to device described, and held not infringed, *Weir v. Mor-den*, 21 Fed. Rep., 243.
- 215679.** Meller, L. May 20, 1879. Process for making Beer.
Held not infringed, *New Process Fermentation Co. v. Baltz*, 10 Fed. Rep., 289. Held subsequent to patent No. 205,572, *New Process Fermentation Co. v. Koch*, 21 Fed. Rep., 580. Held in view of state of art, the process being well-known before, that the claims for a particular process, irrespective of the means by which that process has been reached, cannot be sustained; and the mechanical means not having been used, held, that patent was not infringed, *New Process Fermentation Co. v. Maus*, 20 Fed. Rep., 725.
- 216025.** Delong, B. June 3, 1879. Seeder.
Construed and limited in view of state of art, and held not infringed, *Delong v. Bickford*, 22 O. G., 2242.
- 216256.** Brightman & Burrell. June 10, 1879. Harness Box-loop.
Construed, and held infringed by substitution of mechanical equivalent, *Brighton v. Wilson*, 18 Fed. Rep., 378.
- 216276.** Ives, E. D. June 10, 1879. Carriage Axles.
Ives v. Hartford Spring and Axle Co., 22 O. G., 1037.
- 216293.** Robinson, A. June 10, 1879. Tobacco Resweating Apparatus.
Construed, held novel and infringed, *Robinson v. Sutter*, 10 Biss., 100; 11 Fed. Rep., 798.
- 216344.** Penney, B. F. June 10, 1879. Shingle Machine.
Held invalid for want of novelty and for public use for more than two years prior to date of application, *Gibson v. Scribner*, 22 Fed. Rep., 840.
- 217519.** Fanning, J. July 15, 1879. Lemon-squeezer.
Construed, sustained and held infringed, *Onderdonk v. Fanning*, 4 Fed. Rep., 148. Construed to be for a combination of old elements, and not infringed by the substitution of a solid for a perforated bed, *Ibid.*, 19 Blatch., 363. See, also, *Onderdonk v. Fanning*, 2 Fed. Rep., 568.
- 217909.** Smith & Shannon. July 29, 1879. Paper Holder.
Construed and limited in view of state of art; held novel, valid and infringed, *Shannon v. Jones*, 10 Biss., 498.
- 217964.** Travers, J. P. July 29, 1879. Hammock.
Claim construed to be for a combination of six elements, and not infringed by a use of three of them only, *Travers v. Palmer*, 23 Fed. Rep., 511.
- 218032.** Jennings, A. G. July 29, 1879. Lace Purling.
Sustained in view of doubtful evidence of anticipation, and is infringed, *Jennings v. Kibbe*, 32 O. G., 653.
- 218220.** Bigelow, J. Aug. 5, 1879. Sweat Leather.
Greenwood v. Bracher, 1 Fed. Rep., 856.
- 218427.** Canan, J. Aug. 12, 1879. Dredging Machine Shovel.
Valid for term of prior foreign patent, although not so limited on its face and although granted for full domestic term, *Canan v. Pound Mfg. Co.*, 23 Fed. Rep., 185.
- 218564.** Parmelee, H. S. Aug. 12, 1879. Automatic Fire Extinguisher.
Construed; held valid and infringed, *Parmelee v. Burrit Hardware Co.*, 24 Fed. Rep., 785.

218758. Maxheimer, J. Aug. 19, 1879. Bird Cage.

Sustained, and held not anticipated by a prior construction showing the device, but not known to have the effect contemplated by patentee, and only accidentally occurring in such prior construction, *Maxheimer v. Meyer*, 9 Fed. Rep., 460.

219455. Frazer, S. Sept. 9, 1879. Lubricant.

United States v. Frazer, 22 Fed. Rep., 106.

219462. Gray, R. Sept. 9, 1879. Hat.

Construed and held novel, *Bernard v. Heimann*, 9 Fed. Rep., 400. Construed; held to involve invention, and held novel, *Ibid.*, 22 O. G., 1134.

219656. Schmidt, F. E. Sept. 16, 1879. Feed Mechanism for Button-hole Machine.

Claims 1, 2 and 3 construed to be for combinations, and held not infringed by substantial change in structure, *Schmidt v. Freese*, 12 Fed. Rep., 563.

220002. Wallace, R. Sept. 23, 1879. Spoons and Forks.

Product held novel and infringed, *Wallace v. Noyes*, 23 O. G., 435.

220003. Wallace, R. Sept. 23, 1879. Making Spoons and Forks.

Process construed in view of state of art; claim 1 sustained for patentable novelty and held infringed; claim 2 held wanting in novelty, *Wallace v. Noyes*, 23 O. G., 435.

220126. Cook, A. Sept. 30, 1879. Braid Pin.

Infringement doubted, *White v. Harris & Sons Mfg. Co.*, 3 Fed. Rep., 161. Held not infringed by patent No. 221,721, *White v. Noyes*, 2 Fed. Rep., 782.

220610. Hart, Wm. H., Jr. Oct. 14, 1879. Neck-wear Pins.

Held infringed, and prior in date of invention to patent No. 202,673, *Thayer v. Hart*, 20 Fed. Rep., 693; *Hart, Jr. v. Thayer*, 20 Fed. Rep., 696. See, also, *Thayer v. Hart*, 24 Fed. Rep., 558.

220767. McCloskey, J. Oct. 21, 1879. Soft Metal Trap.

Held wanting in invention, *McCloskey v. Du Bois*, 19 Blatch., 205; 20 O. G., 371; *v. Hamill*, 15 Fed. Rep., 750. Construed to be for improved quality of old product, and held wanting in patentable novelty, *McCloskey v. Du Bois*, 9 Fed. Rep., 38.

221062. Hayes, L. S. Oct. 28, 1879. Folding Chairs.

Collignon v. Hayes, 20 O. G., 447.

221310. Hotchkiss, A. E. Nov. 4, 1879. Clock Movement.

Reissue No. 10,062, March 14, 1882.

Parker & Whipple Co. v. Yale Lock Co., 18 Fed. Rep., 43.

221482. Underwood, J. M. Nov. 11, 1879. Whip-socket.

Construed in view of state of art, and held invalid for want of invention, *Searls v. Merriam*, 22 O. G., 1040.

222143. Mackaye, S. Dec. 2, 1879. Theater Appliances.

Mallory v. Mackaye, 22 O. G., 945.

222264. Flagg, T. J. Dec. 2, 1879. Scarfs.

Held not to have essentially misrepresented the state of the art, and is sufficiently definite as to subject-matter improved on; claim 1 construed to be for a patentable combination, and not for an aggregation; claims 2 and 3 are for patentable combinations; is infringed, *Fisk, Clark & Flagg v. Hollander Bros., MacA. & MacK.*, 355.

222379. Burr, S. S. Dec. 9, 1879. Folding Bedstead.

Reissue No. 9393, Sept. 28, 1880.

Andrews v. Fielding, 20 Fed. Rep., 123.

222420. Peroni, L. Dec. 9, 1879. Thermometer.

Reissue No. 10,189, Aug. 29, 1882.

Construed, sustained, and held not anticipated by an abandoned experiment; convex front infringed by an acute, slightly rounded angle, *Hicks v. Otto*, 19 Fed. Rep., 749. See, also, *Hicks v. Otto*, 17 Fed. Rep., 539.

222814. Cherry, J. G. Dec. 23, 1879. Cans for Transporting Cream.

Reissue No. 9811, July 19, 1881.

Held anticipated and void, *Cherry v. Swab*, 21 Fed. Rep., 246.

1880.

223311. Booth, Wm. Jan. 6, 1880. Celluloid Comb Manufacture.

Held to be for a double use and void for want of invention, *Celluloid Mfg. Co. v. Noyes*, 25 Fed. Rep., 319.

224076. Cohn, M. Feb. 3, 1880. Corset.

Birdseye v. Heilner, 34 O. G., 1392.

225108. Caro, H. March 2, 1880. Coloring Matter from Alphanaphthol.

Product claim construed broadly in view of patentee being first in the art, and held novel; *prima facie* infringement in view of chemical identity of product, independent of process used, *Pickhardt v. Packard*, 22 Fed. Rep., 530.

225318. Atkinson, J. W. March 9, 1880. Corn Planter.
Runstetler *v.* Atkinson, 23 O. G., 940.
225388. Irwin, J. H. March 9, 1880. Telephone Transmitter.
Claim 5 construed and held not infringed, Irwin *v.* Metropolitan Telephone & Telegraph Co., 9 Fed. Rep., 517.
225476. Hutchinson, C. G. March 16, 1880. Bottle Stopper.
Held void on interference with reissue No. 9002 of patent No. 156,302, Putnam *v.* Hutchinson, 12 Fed. Rep., 131.
225492. Scott, M. G. W. & W. D. March 16, 1880. Saucepan.
Claim 1 construed in view of state of art; doubted whether it is more than a substitution of material which does not involve invention; held not infringed, Scott *v.* Evans, 11 Fed. Rep., 726.
226845. Glasgow, W. April 22, 1880. Machine for Enameling or Preparing Mouldings for Gilding.
Held void for want of novelty, Glasgow *v.* Fritts, 22 Fed. Rep., 391.
227061. Russell & McDonald. April 27, 1880. Flanging Machine.
Held not anticipated by an abandoned, unsuccessful experiment; held to involve invention, and is infringed, Phillips, Nimick & Co. *v.* Carroll & Co., 23 Fed. Rep., 249.
227416. Cross, A. T. May 11, 1880. Stylographic Pen.
Novelty doubted, Cross *v.* Livermore, 9 Fed. Rep., 607.
228136. Sprague, L. A. May 25, 1880. Machine for making Buckle Levers.
Construed, sustained and infringed, Sprague *v.* Smith, 13 Fed. Rep., 721.
228233. Wade, Wm. W. June 1, 1880. Button Machine.
Wade *v.* Metcalf, 16 Fed. Rep., 130.
229283. Starrett, L. S. June 29, 1880. Try Square.
Held to involve invention, is valid, and infringed, Starrett *v.* Athol Machine Co., 14 Fed. Rep., 910.
229998. Goss, F. L. July 13, 1880. Feed for Printing Press.
Claim 1 construed to be for a certain result by the means shown, and not for the result, and so limited; held not infringed by use of different means; claim 2 held not infringed, Goss *v.* Cameron, 23 O. G., 741.
230105. Burr, S. S. July 20, 1880. Bedstead.
Andrews *v.* Fielding, 20 Fed. Rep., 123.
230778. Howe, W. B. Aug. 3, 1880. Packing Stick Candy in Packages.
Reissue No. 9942, Nov. 22, 1881.
Construed to be for a combination and not infringed by omission of an essential element, Howe *v.* Neemes, 18 Fed. Rep., 40.
231021. Demarest, E. B. Aug. 10, 1880. Hod Elevator.
Pelham *v.* Demarest, 22 O. G., 772.
231104. Runstetler, M. Aug. 10, 1880. Corn Planter.
Reissue No. 10,155, July 11, 1882.
Construed to be for a different invention from original and held invalid, Farmer's Friend Mfg. Co. *v.* Challenger Corn Planter Co., 23 Fed. Rep., 42.
231199. Sprague, L. A. Aug. 17, 1880. Machine for making Buckle Levers.
Construed, sustained and infringed, Sprague *v.* Smith, 12 Fed. Rep., 721.
231207. Benton, J. B. Aug. 17, 1880. Fare Register.
Canceled, and patent No. 233,915 issued in its place; which see.
231510. Underwood, J. M. Aug. 24, 1880. Whip-sockets.
Held valid and infringed, Searls *v.* Bouton, 12 Fed. Rep., 625. See, also, Searls *v.* Bouton, 12 Fed. Rep., 140.
232435. Barnes, J. H. Sept. 21, 1880. Ballasting Vessels.
American Ballast Log Co. of N. Y. *v.* Barnes, 21 O. G., 1029.
232561. Smith, S. N. Sept. 21, 1880. Lacing-hook Stock.
Construed, sustained, and held infringed, Smith *v.* Halkyard, 16 Fed. Rep., 414.
232975. Johnson, M. C. Oct. 5, 1880. Cutting Pliers.
Patentee held not first and original inventor, Thompson *v.* Hall, 33 O. G., 1140.
233035. Smith, E. Oct. 5, 1880. Mowing Machine.
Claims 2 and 3 infringed by formal difference, Hussey Mfg. Co. *v.* Deering & Co., 20 Fed. Rep., 795.
233116. Ross, N. G. & T. D. Oct. 12, 1880. Barbed Wire Cable.
Construed and limited to combinations claimed, in view of state of art, and held not infringed, Washburn & Moen Mfg. Co. *v.* Fuchs, 16 Fed. Rep., 669.
233409. Gowen, Wm. Oct. 19, 1880. Saw Dog.
Allis *v.* Buckstaff, 22 O. G., 1705.

- 233497.** Frazer, S. Oct. 19, 1880. Lubricant.
United States *v.* Frazer, 22 Fed. Rep., 106.
- 233511.** Holton, F. H. Oct. 19, 1880. India Rubber Eraser.
Declared void, patentee not being prior inventor, and for public use more than two years prior to date of application, Lockwood *v.* Cleveland, 18 Fed. Rep., 37; *v.* Cutter Tower Co., 18 Fed. Rep., 653. See, also, Lockwood *v.* Cleveland, 20 Fed. Rep., 164.
- 233574.** Strong, J. J. & K. M. Oct. 19, 1880. Insect Protector.
Subject-matter held to be a patentable invention, in view of state of art, Strong, *Ex parte*, 17 O. G., 446.
- 233915.** Benton, J. B. Nov. 2, 1880. Fare Register.
Issued for the same invention, on cancellation of patent No. 231,207. Held entitled to seventeen years term from Nov. 2, 1880, and not from date of canceled patent, Railway Register Mfg. Co. *v.* North Hudson C. R. Co., 23 Fed. Rep., 593. Invention held sufficiently shown, and amended claims properly inserted in original application, without verification by inventor's oath; held novel, and infringed by use of mechanical equivalent, *Ibid.*, 33 O. G., 355.
- 233932.** Ives, E. D. Nov. 2, 1880. Carriage Axles.
Ives *v.* Hartford Spring and Axle Co., 22 O. G., 1037.
- 234549.** Duke, Wm. L. Nov. 16, 1880. Baling Press.
Duke *v.* Graham, 19 Fed. Rep., 647.
- 236052.** Marsh. Dec. 28, 1880. Steam-engine Valve Gear.
Marsh *v.* Nichols, 15 Fed. Rep., 914.

1881.

- 236350.** Morley, J. H. Jan. 4, 1881. Button Sewing Machine.
Liberal construed, yet limited to mechanism described, although patentee is first in the art, and held not to include groups of instrumentalities independent of such mechanism, and held not infringed, Morley Sewing Machine Co. *v.* Lancaster, 23 Fed. Rep., 344.
- 236425.** Filley, G. F. Jan. 11, 1881. Cooking Stove.
Held infringed, Filley *v.* Littlefield, 25 Fed. Rep., 282.
- 238703.** Mellon, P. H. March 8, 1881. Metallic Spring Bed.
Held void for want of novelty, Mellon *v.* Smith Davis Mfg. Co., 23 Fed. Rep., 153.
- 238720.** Scott, W. March 8, 1881. Printing Press.
Butterworth *v.* Hoe, 29 O. G., 615.
- 238940.** Low, J. E. March 15, 1881. Dentistry.
International Tooth Crown Co. *v.* Mills, 22 Fed. Rep., 659.
- 239089.** Eastwick, J. H. March 22, 1881. Sulphate of Alumina Manufacture.
Patentee held prior inventor, Damon *v.* Eastwick, 22 O. G., 1709.
- 239927.** Brehmer, H. April 12, 1881. Binding Books.
Held novel, valid, and prior in date of invention to reissue No. 8195 of patent No. 200,068, on interference, Wire Book Sewing Machine Co. *v.* Stevenson, 11 Fed. Rep., 155.
- 240586.** Fraim, E. T. April 26, 1881. Padlock.
Reissue No. 10,272, Jan. 16, 1883.
Contestant for priority held estopped by his acquiescence in patentee's action, and patentee held first inventor. Claims 2 and 3 infringed, Fraim *v.* Keen, 25 Fed. Rep., 820.
- 241916.** Boyington, L. C. May 24, 1881. Spring Bed Bottom.
Held to involve mechanical skill only, and not invention, Ames *v.* Carleton Spring Bed Co., 32 O. G., 1238.
- 242332.** Shuter & Davis. May 31, 1881. Tips for Insoles.
Sustained as involving invention, Shuter *v.* Davis, 16 Fed. Rep., 564.
- 243674.** Forncrook, J. June 28, 1881. Honey Frame.
Construed to be for a new use of an old and well known article, and wanting in invention, Forncrook *v.* Root, 21 Fed. Rep., 328.
- 244224.** French, H. Q. July 12, 1881. Roof for Burial Vault.
Construed in view of state of art, and held wanting in patentable invention, French *v.* Carter, 25 Fed. Rep., 41.
- 245251.** Williams, T. F. Aug. 2, 1881. Revolving Dip-net.
Held void for want of novelty and of invention, Williams *v.* McCord, 19 Fed. Rep., 643.
- 246270.** Zeum, K. L. Aug. 23, 1881. Hand Glass.
Held infringed, Zeum *v.* Kaldenberg, 16 Fed. Rep., 539.
- 246606.** Filley, G. F. Sept. 8, 1881. Door for Cooking Stove.
Held infringed, Filley *v.* Littlefield, 25 Fed. Rep., 282.
- 248272.** Barney, E. H. Oct. 18, 1881. Skate.
Spaeth *v.* Gibson, 23 O. G., 1732.

248646. Gordon, C. Oct. 25, 1881. Apparatus for Drawing and Cooling Beer.
Held anticipated, *Magin v. McKay*, 32 O. G., 1237.
250247. Holliday, J. Nov. 29, 1881. Rosanilin Colors Manufacture.
Holliday v. Pickhardt, 12 Fed. Rep., 147.
250954. Odell, U. H. Dec. 13, 1881. Roller Mill.
Reissue No. 10,139, June 22, 1882.
Held reissued with reasonable diligence for an inadvertent omission; sustained and held infringed; claim 1 held wanting in novelty; claim 4 held novel, and not anticipated by a deficient prior English patent, *Odell v. Stout*, 22 Fed. Rep., 159.
251456. Nicodemus, F. C. & A. K. Dec. 27, 1881. Processing Apparatus.
Construed to be for an unpatentable combination of old elements and wanting in invention, *Nicodemus v. Frazier*, 19 Fed. Rep., 260.

1882.

252054. Peterson, E. A. C. Jan. 10, 1882. Bake Oven.
Infringed, *Peterson v. Simpkins*, 25 Fed. Rep., 486.
252374. Hawlowetz, J. Jan. 12, 1882. Ostrich Feather Trimming.
Held valid (*dictum*), *Kass v. Hawlowetz*, 33 O. G., 1135.
253781. Stevens, S. M. Feb. 14, 1882. Barbed Wire Machine.
Construed and limited to combination claimed, in view of state of art, and is not infringed, *Washburn & Moen Mfg. Co. v. Fuchs*, 16 Fed. Rep., 669.
254540. Deis, C. March 7, 1882. Egg and Sugar Beater.
Construed and limited to combination described, in view of state of art, and held not infringed, *Deis v. Doll*, 21 Fed. Rep., 523.
256504. Rosenwasser, N. April 18, 1882. Percolator.
Held wanting in invention, in view of state of art, *Rosenwasser v. Berry*, 22 Fed. Rep., 841.
259597. Smith, S. N. June 13, 1882. Lacing-hooks for Shoes.
Held not anticipated, *Smith v. Halkyard*, 16 Fed. Rep., 414.
260526. Benton, J. B. July 4, 1882. Fare Register.
Validity held not affected by description in prior patent granted same inventor, the application being on file at date of grant; is not for an aggregation, *Railway Register Mfg. Co. v. Broadway & Seventh Ave. R. Co.*, 22 Fed. Rep., 655.
261518. Koechlin & Witt. July 18, 1882. Dye.
United States ex rel. K. & W. v. Marble, 22 O. G., 1365.
262094. Newbury, H. F. Aug. 1, 1882. Time Lock.
Construed and held not infringed, *Newbury v. Mossman*, 21 Fed. Rep., 579.
262505. Teter, W. L. Aug. 8, 1882. Process and Apparatus for cleaning Grain.
Reissue No. 10,275, Jan. 23, 1883.
Graham v. Teter, 33 O. G., 758.
265061. Gunning, J. Sept. 26, 1882. Letter and Figure.
Void, patentee having fraudulently alleged that he was the first and original inventor, when he was not, *United States v. Gunning*, 22 Fed. Rep., 653; 23 Fed. Rep., 668. See, also, *United States v. Gunning*, 18 Fed. Rep., 511.
265145. Ransom, N. A. Sept. 26, 1882. Fare Register.
Held not invalidated by public use for experimental purposes only; is infringed, *Railway Register Mfg. Co. v. Broadway & 7th Ave. R. Co.*, 22 Fed. Rep., 655. See, also, *Railway Register Mfg. Co. v. Broadway & 7th Ave. R. Co.*, 32 O. G., 257.
266185. Moulton, H. W. Oct. 17, 1882. Bustles.
Higby v. Columbia Rubber Co., 18 Fed. Rep., 601.
268591. Abbott, T. Dec. 5, 1882. Baggage Check Holder.
Construed to be for a combination and held not infringed, *Abbott v. Hoole Mfg. & Baggage Check Co.*, 31 O. G., 1561.
269329. Scheidler, R. Dec. 19, 1882. Bed Plate for Steam-engine.
Construed to be for the application of an old device in an old way without change of result, and held void for want of novelty, *Scheidler v. Tustin*, 23 Fed. Rep., 887.

1883.

273585. Mosler, M. March 6, 1883. Fire-proof Safe.
Claims construed to be for aggregations, *Mosler Safe & Lock Co. v. Mosler, Brahmman & Co.*, 22 Fed. Rep., 901.
274325. Himmer, V. March 30, 1883. Electric Clocks.
Time Telegraph Co. v. Carey, 19 Fed. Rep., 322.
275092. Taylor, H. H. April 3, 1883. Capsule Machine.
In interference with patent No. 305,336, *Hubel v. Tucker*, 24 Fed. Rep., 701.

- 276430.** Lambert, J. April 24, 1883. Gauge for forming Artificial Flower Foundations.
Held to involve invention and sustained, *Lambert v. Hofheimer*, 18 Fed. Rep., 653.
- 277933.** Richmond, A. S. May 22, 1883. Artificial Denture.
International Tooth Crown Co. v. Mills, 22 Fed. Rep., 659.
- 277941.** Richmond, C. M. May 22, 1883. Artificial Denture.
International Tooth Crown Co. v. Mills, 22 Fed. Rep., 659.
- 277943.** Richmond, C. M. May 22, 1883. Artificial Denture.
International Tooth Crown Co. v. Mills, 22 Fed. Rep., 659.
- 279259.** Leach, Wm. F. June 12, 1883. Tables for Tile Machines.
Construed and limited in view of state of art; claims 4, 5 and 6 held not infringed,
Leach v. Chandler, 33 O. G., 237.
- 281640.** Mosler, M. July 17, 1883. Fire-proof Safe.
Construed; claims 1 and 2 held to be for mechanical skill only, and invalid for want of invention; claim 3 is for an aggregation, *Mosler Safe & Lock Co. v. Mosler, Brahmman & Co.*, 22 Fed. Rep., 901.
- 283136.** Mosler, M. Aug. 14, 1883. Fire-proof Safe.
Construed to be for mechanical skill only, and held invalid for want of invention, *Mosler Safe & Lock Co. v. Mosler, Brahmman & Co.*, 22 Fed. Rep., 901.
- 283602.** Hatchman, R. Aug. 21, 1883. Fire Pot for Stoves.
Hatchman, In re, 26 O. G., 738.
- 283931.** Swift, A. W. Aug. 28, 1883. Lubricator.
Validity doubted in view of same device shown, but not claimed in patentee's prior patent of March 21, 1882, *Swift v. Jenks*, 19 Fed. Rep., 641.
- 283962.** Brick, S. R. Aug. 28, 1883. Safety Gas Tank for Vessels.
Brick v. Staten Island R'y Co., 25 Fed. Rep., 553.
- 284506.** Sparks, Wm. E. Sept. 4, 1883. Sash Fastener.
Held not to interfere with patent No. 212,487, *Morris v. Kempshall Mfg. Co.*, 20 Fed. Rep., 121.
- 289488.** Yoder, L. T. Dec. 4, 1883. Candy Manufacture.
Claims 3 and 4 are for combinations of mechanical devices. Claim 3 held valid and infringed. Patentee who conceived, and not defendant workman who embodied it, held inventor, *Yoder v. Mills*, 25 Fed. Rep., 821.

1884.

- 298249.** Smith, E. May 6, 1884. Mowing Machine.
Construed, sustained, and held infringed by a formal difference, *Hussey Mfg. Co. v. Deering & Co.*, 20 Fed. Rep., 795.
- 305867.** Tucker, Wm. A. Sept. 30, 1884. Capsule Cutter.
In interference with patent No. 275,092, *Hubel v. Tucker*, 24 Fed. Rep., 701.
- 309197.** Clark, M. Dec. 16, 1884. Cash Carriers for Store Service.
Continental Store Service Co. v. New York Store Service Co., 31 O. G., 1561.

 10368. Thompson, S. R. Aug. 14, 1883. Bushing for Faucet Holes. Original, No. 141,473.
 10452. Race & Matthews. Feb. 26, 1884. Hydrants. Original, No. 96,959.

TABLE 3.

A TABLE OF PARTICULAR PATENTS UPON WHICH SUIT HAS BEEN BROUGHT, ARRANGED TOPICALLY, ACCORDING TO SUBJECT-MATTER.

NOTE.—The number or date following the title is that of the patent, on reference to which, in Table 1, will be found thereunder the suits in which it was involved, as also the construction, etc., given it in such suits.

NOTE.—A topic marked thus † is that of a particular patent not found in Tables 1, 2 or 4, owing to the absence of sufficient data by which to identify it. It is followed by the suits in which it was involved; the construction of the patent in such suits; the reissues of such patent; the suits in which the reissue or reissues were involved, as also the construction given them in such suits.

Alizarine, Artificial. 95,465.
 Alkali. 15,957.
 Amalgamating Barrels. 43,462.
 Amalgamator. 40,874; 52,015.
 Animal Fats, Treating. 146,012.
 Annealing Box. 149,875.
 Anvil. 15,687.
 Apple-paring Machine. 10,078.
 Arches of Concrete. 98,571.
 Armor for Ships. 38,206.
 Auger. Pettibone. Feb. 12, 1814.
 Auger Handle. 35,856.
 Auger Machine. 56,869; 78,769.
 Axles for Carriages. 68,808; 200,214; 216,276; 233,932.
 Axles, Sand Box for Carriage. 62,232.
 Axles for Cultivators. 187,899.
 Axles, Self-lubricating. 148,368.
 Axle Bearing for Locomotive. 22,439.
 Axle Box Manufacture. 1252.
 Axle Box for Cars. 71,241; 71,873.
 Axle Box for Cars,† Lightner v. Brooks, 2 Cliff., 287; Same v. Kimball, 1 Lowell, 211; Same v. Boston & Albany R. R., 1 Lowell, 338.
 Axle Tree. Winans. July 20, 1831.
 Axle Turning Machine. 127,211.
 Baby Jumper. 79,534; 138,209.
 Baggage Check Holder. 268,591.
 Bail Ears for Pails. 147,343.
 Baling Press. 60,196; 234,549.
 Balance.† Vaughan v. East Tennessee, Va. & Ga. R. R., 1 Flip., 621.
 Bale Tie. 19,490; 23,291; 31,252; 59,144; 66,065.
 Ballasting Vessels. 126,938; 232,435.
 Bank Note Printing. Kneass. April 28, 1815.
 Barbed Wire Cable. 233,116.
 Barbed Wire Fence. 66,182; 67,117; 74,379; 84,062; 150,683; 153,965; 157,124.
 Barbed Wire Fence.† Barker Mfg. Co. v. Washburn & Moen Mfg. Co., 18 Fed. Rep., 172.
 Barbing Fence Wire. 157,508; 214,706; 253,781.
 Barrel Head Lining. 136,763.
 Base Ball Cover. 127,098.
 Bed Bottom. 33,685; 53,706; 125,421; 138,490; 138,491.
 Bed Bottom Spring. 93,096; 99,765; 125,250; 142,377; 179,190; 191,244; 241,916.
 Bed Plate for Steam-engine. 269,329.

TABLE 3.—TOPICAL LIST OF PATENTS.

Bedstead. Herbert. July 14, 1824. Nos. 797; 821; 58,437; 97,375; 204,321; 222,379; 230,105.
 Beer Cooler. 32,845.
 Beer Cooler.† Three patents. *Turrell v. Cammerer*, 3 Fish., 462.
 Beer Cooler and Drawer. 248,646.
 Beer Manufacture. 215,679.
 Bell. Parke. Dec. 19, 1808.
 Bell Ringer. 127,933.
 Bell Toy. 150,933.
 Bellows. 4912.
 Beverage. 193,038; 198,467.
 Bilge Lever for Ships. Thomas. Nov. 6, 1826.
 Billiard Register. 57,443.
 Billiard Table. 145,787.
 Billiard Table Cushion. 19,074; 60,656.
 Bird Cage. 162,400; 218,758.
 Bird Cage, Hanging.† *Perkins v. Hendryx*, 23 Fed. Rep., 418.
 Biscuit Pan. 96,605.
 Bit Stock. 73,279.
 Blind Slats. 199,948.
 Blowers, Cases for Rotary. 81,010.
 Blowers, Rotary. 104,585.
 Bobbins and Spindles. 102,583; 123,625; 127,159.
 Boiler. 107,817.
 Boiler. See, also, Paper Pulp Boiler.
 Boiler, Applying Waste Heat to. 1630.
 Boiler Covering. 95,517; 98,865; 100,354; 108,055.
 Boiler, Steam. 146,614.
 Boiler.† *Evans, C. Construed and limited. Cushing's Op.*, 7 Att'y Gen., 133.
 Boiler, Steam, Covering. 55,598; 114,711.
 Boiler, Steam, Safety Apparatus. 5254.
 Bolt. Reutgen. Nov. 17, 1776.
 Bolt Manufacture. 43,669.
 Bolt for Door. 48,555; 202,158.
 Bolting Flour. 37,317; 37,318; 37,319; 37,320; 37,321.
 Bonnet. 19,932; 33,978.
 Bonnet Machine. 15,570.
 Book Binding. 200,068; 239,927.
 Boot Burnisher. 28,181.
 Boot Seamer. Cahn. Subcombinations of combinations claimed in patentee's prior patents; held valid. *Cahn v. Wong Town On*, 19 Fed. Rep., 424.
 Boot Tree. 5876; 14,951; 19,508; 170,462.
 Boots and Shoes. Bedford. July 16, 1806. No. 59,375.
 Boots and Shoes, Manufacture. 29,561; 29,562; 141,357; 176,094.
 Boots and Shoes, Box Toes. 95,894.
 Boots and Shoes, Edges, Finishing Tool for. 150,305.
 Boots and Shoes, Heel Machine. 105,030.
 Boots and Shoes, Heel Polishing Machine. 39,546; 42,555.
 Boots and Shoes, Heel Stiffener. 127,090; 129,338.
 Boots and Shoes, Heel Stiffener Machine, 147,288; 147,906.
 Boots and Shoes, Nail. 164,889.
 Boots and Shoes, Nailing Machine. 155,962; 163,474; 184,281.
 Boots and Shoes, Paces. 122,030.
 Boots and Shoes, Stiffening Machine for Making. 117,627; 178,869; 209,826.
 Boots and Shoes, Soles Manufacture. 3857; 49,572; 127,964.
 Boots and Shoes, Tip. 26,329; 242,382.
 Boots and Shoes, Tip.† Held infringed by a valuable improvement embodying the patented machine. *Maynadier v. Tenney*, 2 Ban. & Ard., 615.
 Boring Machine. 13,606; 170,980.
 Bottle Stopper. 23,263; 36,266; 44,684; 48,300; 156,302; 158,406; 225,476.
 Box. 132,074.
 Box Loop. 95,004; 216,256.
 Box Manufacture. 40,507.
 Bracelet. 94,064.
 Bracelet, Ornamenting, etc. 156,858.

PATENTS.

- Brass-Kettle Machine. 8589; 12,227.
- Bread Finisher. Treadwell. Jan. 10, 1820.
- Bread Manufacture. Treadwell. May 18, 1826; Nevins. March 2, 1836.
- Brick, Fire-brick. 149,589; 150,854.
- Brick or Tile Manufacture, 97.
- Brick Machine. 2768; 17,999; 40,221; 124,590; 177,851.
- Bridge. 33,384; 50,723.
- Bridge.† Whipple v. Hutchinson, 4 Blatch., 190.
- Bristles Machine. 52,763; 54,033; 54,034; 59,286.
- Bristles, Preparing. 61,480.
- Bronze Alloy. 201,536.
- Bronzing Iron. 40,964.
- Bronzing Leather. 83,925.
- Broom. 59,733; 102,936; 106,021.
- Broom-making Machine. 18,770.
- Broom for Railroad Track. 180,717.
- Brush. 98,787; 160,933.
- Buckle. 26,013; 61,628; 209,701.
- Buckle.† Sargent Mfg. Co. v. Woodruff, 5 Biss., 444.
- Buckle Lever, Machine for making. 228,136; 231,199.
- Bung. 148,747; 192,386; 203,316.
- Bung Brush and Wrench. 118,617.
- Bung Cutter. 72,505.
- Bung, Rendering Wooden Bung impervious. 87,163.
- Burner for Gas. 17,530; 50,938; 104,271; 105,768.
- Burner for Vapor. 17,916; 20,324; 82,262; 88,287.
- Burner for Vapor.† Ward. Jeffries v. Wiester, 2 Sawyer, 135.
- Burning Fluid. 38,015.
- Burning Oil. 63,229.
- Bushing for Faucet Holes. 141,473.
- Bustles. 17,082; 54,323; 266,185.
- Bustles.† Hadlock, A. D. Hapgood v. Rosenstock, 23 Fed. Rep., 86.
- Button. 56,261.
- Button.† Wilde. Goddard v. White, 17 Fed. Rep., 845.
- Button-hole Attachment. 166,810.
- Button-hole Machine Feed Attachment. 197,528; 219,656.
- Button Machine. 228,233.
- Button. See Sewing Machine.
- Button Shanks. 110,070.
- Cake Pan. 140,619.
- Calendar. 95,655.
- Camera. 16,700.
- Camera, Plate Holder for. 12,700.
- Can. 43,371; 43,878; 94,947.
- Can for transporting Cream. 222,814.
- Can, Machine for making Tin Cans. 71,680.
- Can for Milk. 207,822; 222,814.
- Can for Paint. 24,748; 26,248; 109,070.
- Can of Sheet Metal. 38,974; 161,848.
- Candle Machine. 12,492.
- Candy Manufacture, 289,488.
- Candy, Packing Stick. 230,778.
- Cannon Manufacturer. See Ordnance.
- Canopy Top. 191,233.
- Caoutchouc. 1090; 10,339; 10,741.
- Caoutchouc Cutting Machine. 37,446.
- Caoutchouc.† Sustained, patentee having exercised reasonable diligence in applying therefor.
Ayling v. Hull, 2 Cliff., 494.
- Caps. 166,395.
- Capstan. 52,730; 63,917.
- Capsule Machine. 275,092; 305,867.
- Car for Coal. 5175.
- Car for Petroleum. 53,794.
- Car, Sleeper. 49,992.

TABLE 3.—TOPICAL LIST OF PATENTS.

Car, Sleeper.† Four patents. Woodruff v. Barney, 1 Bond, 528.
 Car, Street. 61,482; 93,322; 142,810; 167,585.
 Car for Railroad. Winans, Oct. 1, 1834. Cooper, Oct. 25, 1832. Knight, March 18, 1829. Nos. 389; 13,364.
 Car for Railroad.† Vaughan v. Central Pacific R. R., 4 Sawyer, 28.
 Car for Railroad.† Finch v. Rikeman, 2 Blatch., 301.
 Car for Railroad, Hand-car. 94,469.
 Car for Railroad, Doors for Grain Car. 203,226.
 Car Brake. 6762; 8552; 9109; 88,929; 117,841.
 Car Brake Shoe. 40,156; 45,106; 49,948.
 Car Brake Shoe.† Dunham v. Indiana & St. Louis R. R., 7 Biss., 223.
 Car Trucks.† Imlay, R. Gregerson v. Imlay, 4 Blatch., 503.
 Carburing Air Apparatus. 93,267; 93,268.
 Carding Engine. 6135.
 Carding Machine. 14,481; 18,124.
 Cards for Cotton and Wool. Whittemore. June 5, 1779.
 Cards for Wrapping Threads. 130,672.
 Carpet Lining. 52,835; 60,476.
 Carpet Lining Machine. 14,585.
 Carriage Axles. See Axles.
 Carriage for Children. 74,284; 100,121; 101,295; 143,421.
 Carriage Body and Seat. 95,466.
 Carriage Door. 53,075.
 Carriage Spring. 139,348.
 Carriage Step. 135,815.
 Carriage Thill Blank Manufacture. 66,130.
 Cartridge, 43,851.
 Cartridge Box. 139,846.
 Cartridge Case Machine. 27,094.
 Cash Carrier for Store Service. 309,197; 309,198; 309,199; 309,200; 309,201; 309,202; 309,505.
 Casters for Bedstead. 821.
 Caster for Salt. 39,889; 71,643.
 Caster for Syrup. 19,824.
 Celluloid Comb Manufacture. 223,311.
 Centrifugal Machine. 63,770.
 Chair. 127,045.
 Chair, Folding. 96,778; 221,062.
 Chair, Folding.† Stewart v. Mahoney, 5 Fed. Rep., 302.
 Chair, Rocking. 1531; 92,329; 158,869.
 Chair. See Seat.
 Chain, etc., for Necklace. 147,045.
 Chain-stretching Machine. 43,987.
 Check Book. 183,347.
 Cheese Former for Cider Press. 187,100.
 Cheese Hoop. 112,977; 122,520.
 Cheese Manufacture. 88,830.
 Cheese Press. 108,753.
 Chewing Gum. 111,798.
 Chlorine Gas, Hydrating. 186,860.
 Churns. 7531.
 Churns.† Thompson v. Canterbury, 2 McCrary, 332.
 Cigar. 186,628.
 Cigar Lighter. 206,835.
 Cigar Mold. See Mold.
 Clapboard Joint. 10,903.
 Clasp for Pocket-book. 47,135.
 Clock Dial. 23,950.
 Clock Escapement, Pallets of. 84,517.
 Clock Movement. 221,310.
 Cloth Cutting Machine. 106,101; 124,180.
 Clothes Tag. 149,896.
 Clothes Wringer. 21,029; 22,539; 61,680.
 Clover Huller. 20,249.
 Coach Pad. 173,371.

PATENTS.

Coal Breaker. 3292.
 Coal Car. See Car.
 Coal Scuttle. 62,807; 150,921.
 Coal Wagon. 73,684.
 Coating Compound. 86,841.
 Coffee, Treating. 111,403; 113,832.
 Coffee Mill. 159,467; 206,141.
 Coffin Lid. 38,713.
 Collar. 11,376; 38,961; 113,328; 132,547; 197,807.
 Collar. See Paper.
 Collar and Cuff. 23,771; 200,937.
 Columns. 35,582.
 Comb. 72,324; 223,311.
 Comb Case. 184,310.
 Comb-grates.† Held, in view of state of art, to involve mechanical skill only and not invention. *Weir v. N. Chicago Rolling Mill*, 9 Biss., 508.
 Comb-teeth. Tryon. Feb. 22, 1798.
 Compositor's Copy Distributor. 149,092.
 Conductor's Register. 76,646.
 Corn, Removing from Cob. 94,013; 55,614.
 Corn-cutter, Green. 159,741.
 Corn-sheller. 132,128; 38,002.
 Corn-planter. 40,789; 46,629; 225,318; 231,104.
 Corset. 42,591; 97,418; 137,893; 189,405; 197,913; 224,076.
 Corset and Bustle Manufacture. 22,532.
 Corset Clasp. 143,359.
 Corset Skirt Supporter. 39,910; 45,296.
 Corset Spring. 56,345; 173,124.
 Cotton Cleaner. 16,833; 29,971.
 Cotton Cleaning. 18,742; 52,008.
 Cotton and Wool Cleaning. 3120.
 Cotton Gin. 1839; 139,820; 167,679.
 Cotton Gin Rib. 777.
 Cotton Press. 3885.
 Cotton Press.† *Wicks v. Stevens*, 2 Woods, 310.
 Cotton and Hay Press. 132,566; 151,477; 177,216.
 Coupling for Barges. 111,564.
 Coupling for Horse-cars. 21,026.
 Coupling and Steering Apparatus. 129,844.
 Coupon and Bond Register. 63,419.
 Coupon Register.† *Munson v. Mayor, etc., of New York*, 19 Fed. Rep., 313.
 Covering for Boiler. See Boiler.
 Covering, Fastening Metallic. 17,331.
 Cream from Milk. 187,516.
 Creamery. 207,738.
 Crimping Machine. 37,033.
 Crusher. See Coal Breaker; Ore Crusher; Stone Crusher.
 Cuff. See Collar and Cuff.
 Cultivator. 4459; 10,467; 19,412; 22,859; 28,016; 31,133; 56,102; 69,255; 88,557; 91,144; 108,384; 124,218; 130,440; 174,684.
 Cultivator Axles. See Axles.
 Cultivator Coupling. 190,816.
 Cultivator Teeth. 16,364.
 Curing. See Preserving.
 Curtain Fixture. 69,176; 118,725; 129,893; 154,400; 183,809.
 Cut-off Gear. 6162; 8253.
 Cutlery. 2435.
 Cutting Pliers. 232,975.
 Dental Plate. 113,055.
 Dentistry. 238,940.
 Denture. 113,055; 277,933; 277,941; 277,943.
 Derrick. 103,834; 124,878.
 Desk. 86,440; 115,232.
 Desulphurizing Ores. 45,803.

TABLE 3.—TOPICAL LIST OF PATENTS.

Dies. 100,053; 101,529.
 Dies for Ox Shoes. 123,927.
 Dies for Rubber-coated Harness. 126,603.
 Dies for Swaging. 68,446.
 Dies Holder. 93,215.
 Dip Net. 245,251.
 Door Bolt. See Bolt.
 Door Fastening. 9765.
 Drawing Water from Wells. 15,273.
 Dredge-boat. 72,360.
 Dredging Machine Shovel. 218,427.
 Drier for Fruit. 190,368; 195,948.
 Drier for Hides. 184,352.
 Drier for Lumber. 79,661; 161,490; 189,432.
 Drier for Sand. 121,746.
 Drill for Railroad Track. 205,927.
 Drill for Rocks. 39,235; 52,960.
 Drill for Rocks.† American Diamond Rock Boring Co. v. Sutherland Falls Marble Co., 18 Blatch., 148.
 Drill for Wells. 49,129.
 Drill for Wells and Operating Engine.† Innis. Not void because of experimental public use and sale for more than two years prior to date of application. Innis v. Oil City Boiler Works, 22 Fed. Rep., 780.
 Drill Clamp. 186,225.
 Drilling Jars. 78,958.
 Driven Well. 73,425.
 Dummies for Clothing. 76,394.
 Dust Deflector. 13,676.
 Dye. 441; 225,108; 261,518.
 Dye Manufacture. 250,247.
 Dyeing Silk Woven Fabric. Stearns & Barrett. Sept. 9, 1818.
 Dyeing Yarn. 7446.
 Egg Beater. 23,694; 39,134; 254,540.
 Electric Annunciator for Elevator. 172,993; 148,447.
 Electric Bath. 38,389.
 Electric Battery.† Roosevelt. Roosevelt v. Western Electric Co., 20 Fed. Rep., 724.
 Electric Clock. 274,325.
 Electric Lamp. 203,411.
 Electric Lamp.† Weston. Brush v. Naugatuck R. Co., 32 O. G., 894.
 Electric Light. 317,676.
 Electric Light.† Consolidated Electric Light Co. v. Brush-Swan Electric Light Co., 20 Fed. Rep., 502.
 Electric Light, Illuminating Points. 196,425.
 Electric Light Pencil.† Consolidated Electric Light Co. v. Brush-Swan Electric Light Co., 20 Fed. Rep., 502.
 Electric Light, Treatment of Carbons.† Consolidated Electric Light Co. v. Brush-Swan Electric Light Co., 20 Fed. Rep., 502.
 Electric Light Regulator.† Ibid.
 Electric Light Lighter. 119,561; 130,770.
 Electric Railroad Signal. 140,536.
 Electric Safe Covering. 120,874.
 Electric Telephone. 174,465; 186,787.
 Electric Telephone Transmitter. 209,266; 225,388.
 Electric Telegraph. 1647; 4453; 4816; 6328; 6420; 42,842.
 Electric Telegraph, Duplex. 126,847.
 Electric Telegraph, Fire Alarm. 113,649.
 Electric Telegraph Printing. 76,993; 120,133.
 Electric Telegraph.† Morse v. O'Reilly, 6 Penn. L. J., 501.
 Electric Telegraph Wire. 65,019; 129,858.
 Electrical Machine. 93,563.
 Electrical Magneto-electric Machine. 120,057.
 Electrical Magneto-electric Machine.† Smith. Held not anticipated by foreign machines reaching the United States after the date of its invention. Claims 2 and 5 infringed. Western Dynamo Electric Machine v. Arnoux, 20 Fed. Rep., 112.

PATENTS.

Electro-deposition of Nickel. 93,157; 102,748; 113,612.
 Elevator. 25,061; 32,441; 60,442; 77,706.
 Elevator for Hay. 27,899; 44,129; 46,027; 53,345.
 Elevator for Hods. 95,262; 231,021.
 Elevator for Hods.† Construed, and limited in its scope to the arrangement described, and held not infringed by a device lacking an essential feature of the patented arrangement. *Dyer v. Nat. Hod Elevating Co.*, 24 Fed. Rep., 182.
 Elevator, Hydraulic. 132,111; 172,896; 181,113.
 Elevator for Grain. 34,992.
 Elevator Safety Device. 132,112.
 Enameling Moldings. 163,825.
 Engine, Regulating Steam for. 1868.
 Envelope Machine. 39,702; 41,395.
 Eraser. See India Rubber; Pencil.
 Ether. 4848.
 Excavator. 85,602.
 Excavator Scoop, 54,649.
 Exercise Apparatus. 77,933; 75,217; 75,218.
 Explosive. 47,458; 50,617; 78,317; 98,854.
 Fabric, Corded Elastic. 9653.
 Fare Box. 17,899; 121,920.
 Fare Register. 100,715; 165,832; 171,133; 231,207; 233,915; 265,145.
 Fat Bodies, Purifying. 11,766.
 Fats. See Animal; Rendering Lard.
 Faucet. 48,407; 81,948; 108,898.
 Feather Duster. 154,985; 177,939.
 Feed Water Feeder. 44,561; 93,244.
 Feed Water Heater. 81,132.
 Fertilizer. 206,077.
 Fire-alarm Signal. 92,275.
 Fire-alarm Telegraph. See Electric Telegraph.
 Fire-arms. Shaw, June 19, 1822. Colt, Feb. 25, 1836. Nos. 12,648; 12,649; 15,292; 16,797; 22,094; 28,951; 30,990; 37,052; 51,991; 119,846; 126,446; 205,193.
 Fire-arms.† *Smith v. Rifle Co.*, 3 Blatch., 545.
 Fire-engine. 1980.
 Fire Extinguishing. 88,844; 205,942; 218,564.
 Fire-place. 14,447.
 Fire-place Heater. 104,376.
 File-cutting Machine. 29,236.
 File Holder. 76,834.
 Filling Wood. 172,534.
 Filter. 111,001.
 Flanging Machine. 227,061.
 Flasks for Casting Iron Pipes. 37,037.
 Floor of Mosaic. 87,853.
 Flour Manufacture. 162,157.
 Flour Manufacture. See Bolting.
 Fluid Level. 7263.
 Fluting Machine. 53,633; 55,469; 56,365; 59,913; 62,492; 83,924.
 Fly-trap. 109,444; 131,098.
 Folding Guides.† *Wooster v. Marks*, 17 Blatch., 368.
 Foundation Strips.† *Ladd v. Cameron*, 25 Fed. Rep., 37.
 Friction Drum. 158,967.
 Friction Wheel for Gearing. 100,839.
 Fruit Drier. See Drier.
 Fruit Jars. 97,920; 102,913; 131,695.
 Furnace. 41,788; 71,244; 89,620; 92,822; 104,323.
 Furnace for Bagasse. 18,874.
 Furnace for Ore. 1396; 117,430.
 Furnace for Puddling. 135,650; 153,110.
 Furnace for Tobacco Curing. 148,737.
 Furnace for Tobacco Curing.† Construed to be for a combination, and not infringed by sale of some only of the elements. *Millner v. Schofield*, 4 Hughes, 258.
 Furnace for Wet Fuel. 20,616; 12,678.

TABLE 3.—TOPICAL LIST OF PATENTS.

Furnace Damper. 77,512.
 Furniture Spring. 122,001.
 Gauge for Forming Artificial Flower Foundations. 276,430.
 Gas Burner. See Burner.
 Gas Tank for Vessels. 283,962.
 Gate. 40,777.
 Gelatine from Fish Skins. 167,123.
 Gin. See Cotton.
 Glass Manufacture. 9789.
 Glass-cutting Tool. 91,150.
 Glass Ornamenting. 121,119.
 Glass Plate, Machine for Labeling. 184,933.
 Glass Shade Manufacture. 191,224.
 Glass-ware. 132,208.
 Globe Holder. 162,731.
 Glove Fastening. 155,077.
 Glue. 44,528.
 Grain Binders.† Seven patents. *Deering v. Winona Harvester Works*, 24 Fed. Rep., 90.
 Grain Cleaning. 262,505.
 Grain Drill. 66,578; 74,515; 85,472; 90,268; 93,369; 176,719.
 Grain Machinery.† *Murray v. Ager*, 20 O. G., 1311.
 Grain Separator. 9432; 19,637; 25,848; 41,232; 167,570.
 Grain Thresher and Cleaner. 542.
 Grates. 126,285.
 Grate-bars.† Seven reissue claims void for variance from original. *Gould v. Spicer*, 15 Fed. Rep., 344.
 Grist-mill. *Tyler*. Feb. 2, 1800.
 Gums, Artificial. 43,009.
 Gun Lock. 461.
 Hair Net. 124,340.
 Halter Ring. 32,180.
 Hammock. 217,964.
 Hammock.† *Palmer v. Travers*, 20 Fed. Rep., 501.
 Hand-stamp. 18,249; 37,175.
 Harness. 171,190.
 Harness Buckle. 47,574.
 Harness Mounting. 167,040.
 Harness Trimming, Covering. 99,032.
 Harrow. 95,458; 153,225.
 Harvester. *McCormick*. June 21, 1834. Nos. 2488, 3895; 5227; 5335; 6245; 8192; 8212; 8720; 8724; 9005; 9737; 10,038; 10,459; 10,967; 12,044; 12,367; 13,523; 15,044; 17,990; 18,975; 19,377; 20,719; 26,114; 30,651; 35,315; 37,630; 40,481; 51,364; 74,342; 75,383; 176,402; 233,035; 298,249.
 Harvester.† *Morse v. Davis*, 5 Blatch., 40.
 Harvester.† Held not anticipated by mere suggestion, and infringed by equivalent. *Graham v. Gammon*, 7 Biss., 490.
 Hat. 1503; 34,043; 74,392; 185,716; 219,462.
 Hat, Fabric for. 46,568.
 Hat Machinery. 14,845.
 Hat Bodies. *Grant*. Aug. 11, 1821.
 Hat Bodies, Machine for Making. 4472; 11,805.
 Hat Bodies, Manufacture. 9484; 9700.
 Hat Bodies, Pouncing Machine. 57,232.
 Hat Bodies, Stretching Machine. 46,553.
 Hat Brims, Curling. 30,379.
 Hat Lining, Sewing Machine for. 53,927.
 Hay Press. See Cotton and Hay.
 Heat, Generating and Applying. 2558.
 Heel-stiffener. See Boot and Shoe.
 Hernial Truss.† Construed, and limited, as claimed, to a combination, and held not infringed. *Becker v. Hastings*, 22 Fed. Rep., 827.
 Hide, Treating. 200,078; 210,797.
 Hide of Leather, Automatically Measuring. 194,662; 194,743.
 Hide, Raw Hide, Stretching. 213,323.

PATENTS.

Hide, Raw Hide, Treating. 149,954; 172,346.
 Hoe. 189,220.
 Hoisting Machine. 78,829.
 Hominy Machine. 24,104.
 Honey, Artificial. 17,264.
 Honey-comb Foundation, Artificial. 208,595.
 Honey Frame. 243,674.
 Hook, Self-mousing. 21,879.
 Hoop Skirt. 17,602; 20,681; 25,701.
 Hoop Skirt Spring. 74,672.
 Hopper-boy. Evans. Dec. 18, 1790.
 Horn Composition. 98,727.
 Horse Collar. 157,367.
 Horse Collar Pad. 89,646.
 Horse Power. 4595; 15,693.
 Horse Shoe. 170,809.
 Horse Shoe Machine. 17,665.
 Hose Coupling. 23,033; 34,476; 64,437; 68,656.
 Hose Pipe.† Reissue. Craig v. Fisher, 2 Sawyer, 345.
 Hotel Register. 63,889; 63,924.
 Hub. 61,900.
 Huller for Clover. 35,209.
 Hydrant. 38,694; 75,344.
 Hydrant Casing. 19,206; 96,959.
 Hydraulic Mining Apparatus. 110,222.
 Hydraulic Power Accumulator. 202,660.
 Hydrocarbon Oils. 90,284.
 Ice-Cutting Apparatus. Wyeth. March 18, 1829.
 Ice Pitcher. 18,546; 21,717.
 Illuminating Roofs. 63,332.
 India Rubber. 16; 3633; 8075.
 India Rubber.† Robinson, *Ex parte*, 2 Biss., 309.
 India Rubber Manufacture. 11,608.
 India Rubber, Coating Articles with. 215,034.
 India Rubber Coated Harness. 137,873.
 India Rubber, Dental. 58,901.
 India Rubber Eraser. 19,783; 66,938; 167,455; 233,511.
 India Rubber Boots. 178,896; 196,778.
 India Rubber Overshoes. 103,594; 111,962.
 India Rubber Overshoes.† Infringed. Cohn v. National Rubber Co., 15 O. G., 829.
 India Rubber Flocking Machine. 33,808.
 India Rubber, Shirred Fabric. 3461.
 Induction Coil and Circuit Breaker. 76,654.
 Injector for Boiler. 57,057; 86,152; 92,718.
 Ink. 7686; 41,887.
 Ink, Printer's. 43,192.
 Insect Protector. 233,574.
 Iron Manufacture. 25,235; 143,600.
 Iron, Manufacture of Wrought. 11,838.
 Iron Ware, Enameled. 177,953.
 Isinglass Manufacture. 134,690.
 Ivory, Artificial. 77,938; 89,531; 90,443.
 Jail. 24,307; 26,500; 27,222; 29,282.
 Jail Door Fastening. 26,108.
 Jelly Glass. 39,027.
 Kiln or Dry House.† Curran v. Craig, 22 Fed. Rep., 101.
 Kiln for Lime. 9736; 18,635.
 Knife for Removing Corn. 51,379.
 Knitting Needles. 6025.
 Knitting Machine. 9435; 9718; 9719; 13,586; 68,595; 73,697; 80,121; 92,146; 99,425; 99,426;
 102,529; 105,187; 123,687; 140,635; 162,886.
 Knitting Machine, Burrs for. 43,636.
 Knitting Needle Manufacture. 38,987.
 Knobs for Doors. 2197.

TABLE 3.—TOPICAL LIST OF PATENTS.

Lace Purling. 218,032.
 Lacing Hook. 259,597.
 Lacing Hook.† Construed to be for a combination; doubted that claims 1 and 7 are infringed by omission of an element. *Smith v. Halkyard*, 19 Fed. Rep., 602.
 Lacing Hook Stock. 232,561.
 Lacing Hook Stock.† Construed. *Smith v. Halkyard*, 19 Fed. Rep., 602.
 Lacteal Instrument. 22,018.
 Lamp. 12,550; 20,159; 21,576; 22,723; 28,762; 29,221; 30,381; 49,984; 50,591; 57,245; 65,230; 73,012; 86,549; 89,770; 99,443; 184,855; 206,061.
 Lamp for Locomotive. 35,122.
 Lamp Cap. 11,928.
 Lamp Chimney. 35,589; 79,985; 123,325.
 Lamp Fixture. 183,913.
 Lamp Shade Holder. 182,973.
 Lampblack. 3824.
 Lantern. 8154; 13,286; 42,520; 47,551; 49,290; 63,480; 104,318; 151,703.
 Lantern.† *Adams v. Meyrose*, 2 McCrary, 360.
 Latch. 39,280.
 Lathe. Blanchard, Sept. 6, 1819. Blanchard, Jan. 20, 1820. Nos. 4120; 16,936; 23,957; 29,534; 53,003; 81,432; 127,211.
 Lathe Chuck. 19,786.
 Lawn Sprinkler. 148,596; 203,069.
 Lead Pipe Machine. 5253; 2021.
 Lead Pipe. 74,613.
 Leather. Woodcock. May 8, 1809. No. 93,910.
 Leather, Crimping and Folding. 143,783.
 Leather Cutting Press. 101,931.
 Leather Ornamenting. 42,136.
 Leather, Rendering Flexible, 129,901.
 Leather, Splitting. 29,649; 191,400.
 Leather of old Card Clothing, Utilizing. 177,466.
 Lemon Squeezer. 217,519.
 Letter Block. 59,603.
 Letter and Figure. 256,061.
 Letter File. 9776.
 Letter Stamp. 38,175.
 Lever, Compound. Guyon. July 2, 1836.
 Lifting Jack. 154,989.
 Lightning Rod Machine. 25,534.
 Lightning Rod. 112,137.
 Liquid Fuel. 102,662.
 Locks. 30,140; 32,331; 57,574; 72,946.
 Locks.† *Greenleaf v. Yale Lock Mfg. Co.*, 17 Blatch., 253.
 Locks for Door. 2886; 32,521.
 Locks for Door, Keeper. 16,676.
 Locks for Satchel. 208,541.
 Locks, Time Lock. 146,832; 173,366; 186,369; 195,539; 262,094.
 Locks and Handle for Traveling Bag, Combined. 195,233.
 Locomotive Axle. See Axle.
 Loom. Stone, April 30, 1829. Arnold, July 15, 1829. Nos. 491; 3987; 6806; 6939; 63,353; 130,961.
 Loom Harness, Machine for Making. 80,774.
 Loom, Picker Staff Motion. 30,441.
 Loom Shedding, Mechanism for. 51,928.
 Loom, Shuttle Box, Mechanism for. 70,309.
 Loom, Take-up Mechanism for. 88,365; 93,441.
 Lubricant. 58,020; 79,279; 94,780; 111,881; 133,217; 138,243; 187,964; 191,171; 219,455; 233,497; 283,931.
 Lubricating Oil, Determining Grade of. 174,506.
 Mail Tags, Machine for Printing Wooden.† *Fayman*. Not infringed by use of a different machine and process. *Williams' Opinion*, 14 Att'y Gen., 209.
 Marking Wheel. 52,169.
 Martingale Ring. 37,941.
 Mat. 19,347.

PATENTS.

Matches. 68.
 Match Box. 63,104.
 Mattress Fabric, Woven Wire. 109,446.
 Mattress, Spring Mattress. 44,960.
 Mattress, Treating Moss for. 16,961.
 Meal, Cooling and Drying. 19,984.
 Mechanical Movement. 70,063.
 Medical Compound.† Construed and infringed by a variation in the proportions, but not in the principle. New York Pharmica! Asso. v. Tilden, 14 Fed. Rep., 740.
 Melodeon. 16,094.
 Metal, Cooling and Drying.† Herring v. Gas Consumers' Asso., 3 McCrary, 206.
 Metal, Coating with Metal. 57,271.
 Metal, Punching and Stamping. 131,004.
 Metallic Covering for Buildings. 177,986.
 Metallic Seams, Tool for Making.† Campbell v. Barclay, 5 Biss., 179.
 Metallic Shingles, Attaching.† American Iron Co. v. Anglo-American Roofing Co., 24 O. G., 1274.
 Middlings Purifier. 6148; 155,374.
 Mill for Grinding Bark. 1714.
 Mill Gearing. 79,528.
 Mill, Roller Mill. 250,954.
 Millstone, Balancing. 22,356.
 Millstone, Dressing. 38,670; 73,524.
 Millstone, Grinding. Smith. Jan. 29, 1830. No. 397.
 Mirror. 92,942; 182,633; 246,270.
 Miter Machine. 12,956.
 Mop Head. 22,990; 54,938; 67,643.
 Mortising Machine. 10,422.
 Mould for Bottles. 22,129.
 Mould for Buttons of Metal. Robbins. May 14, 1812.
 Mould for Cigar. 155,806.
 Mould for Glass Goblets. 68,633.
 Mould for Ingots. 99,299; 166,700.
 Mould for Rubber Pencil Head. 31,187.
 Mould for Shade-holder. 191,102; 191,103.
 Mould, Blackwashing. 142,661.
 Moulding and Casting. 53,883.
 Moulding Crucible Pots. 49,140.
 Moulding of Metal. 43,979.
 Moulding Machine. 10,204.
 Moulding Manufacture. 5575.
 Moulding, Machine for Enameling. 226,845.
 Mower. 9737; 18,975; 20,719; 51,364.
 Mower.† Bramer. Crandell v. Plano Mfg. Co., 32 O. G., 1123.
 Mower. See, also, Harvester.
 Nail. Perkins, Feb. 14, 1799. Reed, Feb. 22, 1807. Sawin & Skinner, Feb. 8, 1811. Nos. 78,644; 90,902; 92,355; 164,889.
 Nailing Machine. 38,924; 155,962; 163,474; 184,281.
 Necktie. 159,921.
 Necktie Shield. 207,673.
 Needles, Grinding. 172,639.
 Needles. See, also, Knitting.
 Nitro-glycerine. 50,617.
 Nuts. 8427.
 Nut Machine. 21,551.
 Nut Manufacture. 13,118.
 Nut and Washer Machine. 8322.
 Oil. 38,015; 63,229; 90,284; 102,662; 174,506.
 Oil-stone Holder. 102,218.
 Oil Well. 45,647.
 Oil Well, Increasing Capacity of. 59,936.
 Oil Well. See Drill; Packing; Pump.
 Oleaginous Seed, Treating. 168,164.
 Omnibus Step. 8119.

TABLE 3.—TOPICAL LIST OF PATENTS.

Ordnance. 13,927; 32,983; 32,984; 32,985.
 Ore Crusher.† Reissue held invalid for covering more than original, on comparison made with original drawing only. *Hendy v. Golden State & Miners' Iron Works*, 17 Fed. Rep., 515.
 Ore Washer. 188,691; 194,059; 198,432.
 Ostrich Feather Trimming. 252,374.
 Oven. 15,753; 28,130; 252,054.
 Overshoe. 131,201; 166,669.
 Packing Case. 62,378.
 Packing Candy. 230,778.
 Packing (Baling) Hay. 68,282.
 Packing (Baling) Plastering Hair. 152,560.
 Packing Kindling Wood. 93,775.
 Packing, etc., Powders. 41,097.
 Packing Thread. Langdon. June 20, 1821.
 Packings, Elastic. 54,554.
 Packings for Oil Well. 46,217; 49,903; 51,167; 59,319.
 Packings for Pistons. 29,576.
 Packings, Steam Packing.† *Allen v. Deacon*, 21 Fed. Rep., 122.
 Packings for Steam-engine, Metallic. 6491.
 Packings, Steam Packing. 17,855.
 Packings, Stuffing Box. 13,145.
 Padlock. 1243; 35,030; 240,586.
 Pail-graining Machine. 45,590.
 Paint. 66,773.
 Paint for Ships' Bottoms. 40,515.
 Palm Leaf, Preparing. *Smith*, April 3, 1835. *Smith*, March 3, 1833.
 Pan. See Biscuit; Cake; Sauce.
 Pantaloons. 139,121; 178,287; 178,428.
 Paper Bag. 48,036; 123,811; 134,244.
 Paper Bag Machine. 17,184; 24,734; 30,191; 37,726; 38,452; 49,951; 62,342.
 Paper Board Cutting Machine. 142,154.
 Paper Board Lining Machine. 87,359.
 Paper Board Manufacture. 210,714.
 Paper Box. 124,319; 132,368; 152,636.
 Paper and Cloth, Uniting. 134,105.
 Paper Collar. 38,664; 45,998; 47,107.
 Paper Collar.† Nine patents. *Merserole v. Union Paper Collar Co.*, 6 Blatch., 356.
 Paper Cuffs. 56,737.
 Paper Folding. 21,172.
 Paper Holder. 217,909.
 Paper Manufacture. 158,249.
 Paper Perforator. 32,370.
 Paper Pulp. 17,387.
 Paper Pulp Manufacture. 11,343; 21,161.
 Paper Pulp Boiler. 25,418; 38,901.
 Paper, Sizing Paper. 127,858.
 Paper for Twine, Machine for Cutting. 44,249.
 Paper, Waxing. 193,867; 209,393.
 Pasteboard Manufacture. 184,896.
 Paste. 52,779.
 Pavement. 11,491; 72,110; 74,862; 85,814; 88,765; 94,062; 94,063; 101,590; 105,599; 121,544; 134,404.
 Peat Machine. 53,011.
 Peg-cutting Machine. 2725.
 Pen. 8641; 73,255.
 Pen, Stylographic. 191,798; 199,621; 227,416.
 Pencil. 36,854.
 Pencil Case. 11,820.
 Pencil and Eraser. 19,783; 66,938.
 Pendulum Levels. 17,023.
 Peptone-pepsin.† *Jensen*. Held patentable, and not anticipated by prior publications giving mere suggestions and scientific speculations. *Jensen v. Keasbey*, 24 Fed. Rep., 144.
 Percolator. 256,504.
 Petroleum, Distilling Apparatus. 68,426.

PATENTS.

- Petroleum Car. See Car.
- Photography. 179,316.
- Photograph Printing Process.† Lilienthal v. Washburn, 8 Fed. Rep., 707.
- Photographic Shield. 21,829.
- Piano-key Manufacture. 210,780.
- Pianoforte Pedals. 169,931.
- Picks. 146,597.
- Pier for Bridges. 36,512.
- Pill Manufacture. 110,630.
- Pin. 2275; 2970.
- Pin for Braid. 220,126.
- Pin for Neck Wear. 220,610.
- Pipe Reamer and Squeezer. 91,201.
- Pipe Tongs. 22,157.
- Piston. 53,630.
- Pitching Barrels. 42,580.
- Plaiting Machine. 192,098.
- Plane. Isaacs. Nov. 17, 1819.
- Plane, Bench Plane. 67,398.
- Planing Machine. 32,904; 111,632; 138,463.
- Planing Mill. Woodworth. Dec. 27, 1828.
- Plaque.† Deplanque. Patentability doubted; held not infringed, Deplanque v. Ripka, 32 O. G., 1012.
- Plastic Compound for Vegetable Fibre. 65,267.
- Plates of Tin, Decorating. 43,463.
- Plow. Ogle, 1818. Wood & Brundage, Nov. 9, 1820. Davis, Oct. 1, 1825. Prouty & Mears, March 4, 1836. Nos. 14,287; 25,098; 25,843; 30,357; 55,630; 61,796; 71,560; 110,722; 158,482; 176,642.
- Plow.† Hall v. Speer, 6 Pitts. L. J., 403.
- Plow.† Reissue construed to be for a combination and held not infringed. Matteson v. Caine, 17 Fed. Rep., 525.
- Plow, Gang. 58,612; 83,283; 88,413.
- Plow Jointer. 147,629.
- Plow, Sulky. 201,670.
- Pocket-book Clasp. 165,110; 163,794.
- Pocket Lighter. 50,860.
- Postoffice Box. 119,212.
- Postage Stamp. 91,108.
- Preserving Animal Substances. 36,107.
- Preserving Animal and Vegetable Substances. 121,569.
- Preserving Corn. 34,928; 35,274; 35,346; 36,336.
- Preserving Fish. 31,736; 90,334.
- Preserving Fish (Curing).† Boneless Fish Co. v. Roberts, 12 Fed. Rep., 627.
- Preserving Fruit. 31,734.
- Preserving Meat. 12,530; 43,516; 78,932; 149,276; 197,314.
- Preserving Shrimp. 178,916.
- Press. See Baling; Cheese; Cotton; Printing.
- Pressing Machine for Tailors. 20,519.
- Pressure Gauge. 145,726.
- Printer's Galley. 60,151.
- Printing, Bank Note. See Bank Note.
- Printing Press. 9721; 16,263; 22,611; 38,200; 70,773; 73,943; 87,950; 98,087; 131,217; 238,720.
- Printing Press Sheet Deliverer. 146,085.
- Printing Press Feed. 229,998.
- Privy Cleaning Apparatus. 73,938; 115,565.
- Processing Apparatus. 251,456.
- Projectile. 26,904; 32,986; 34,059.
- Propeller. 9810; 10,124.
- Puddle Balls, Rolling. 1890.
- Pulley. 67,470.
- Pulvulent Acid. 14,722.
- Pump. Perkins, March 23, 1813. Reed, Aug. 5, 1831. Reed, Nov. 19, 1833. Nos. 42,126; 78,854; 90,143; 90,930; 110,205; 155,670; 188,879; 191,656.

TABLE 3.—TOPICAL LIST OF PATENTS.

Pump.† Reissue claim sustained, being a substantial repetition of the original claim. National
 Pump Cylinder Co. v. Gunnison, 17 Fed. Rep., 812.
 Pump.† Adair v. Thayer, 7 Fed. Rep., 920.
 Pump, Bucket for Chain. 116,138.
 Pump Filter. 51,145.
 Pump for Fire-engine. 42,920.
 Pump for Gas. 117,925.
 Pump for Oil Well. 47,133; 50,919.
 Pump, Steam Pump. 5352.
 Pump Valve. 141,587.
 Purifying Coal Oil. 45,502.
 Pyroxeline. 105,338.
 Pyroxeline Dental Plate. 113,055.
 Quilting Machine. 118,404; 190,184.
 Rake. 7813; 14,350; 21,712; 65,573; 69,713; 76,760; 105,833.
 Rake and Reel for Harvester. 46,300.
 Rails for Railroads. Stimpson. Aug. 23, 1831. Nos. 3889; 9703.
 Railroad Curves. Stimpson. Sept. 26, 1835.
 Railroad Draw. 13,258.
 Railroad Frog. 215,548.
 Railroad Switches. 121,158.
 Railroad Track Cleaner. 125,547; 190,563.
 Railway, Elevated. 89,233.
 Reed Organ. 87,241.
 Reel for Dyeing. Barrett. June 27, 1809.
 Reel for Harvester. See Rake and Reel.
 Reflector. 27,898.
 Reflecting Pictures for Slides.† Richardson v. Croft, 11 Fed. Rep., 800.
 Refrigerator. 13,802; 44,731.
 Register. See Billiard; Conductor; Coupon; Fare; Hotel.
 Registering Steam Gauge. 101,583.
 Rendering Lard, Apparatus for. 81,743.
 Retort for Gas. 36,065.
 Revenue Stamp. 93,391.
 Rice Cleaning.† Ager, W. Black's Opinion, 9 Att'y Gen., 403.
 Ring Supporter. 118,622.
 Rollers, Casting Chilled. Harley. March 3, 1835.
 Rollers, Elastic; Manufacture of. 101,994.
 Rollers, Spring. 11,638.
 Rollers for Trunks. 108,300.
 Rolling Coulters. 67,222; 76,343.
 Rolling Mill. 130,529.
 Roof for Burial Vault, 244,224.
 Roofing Composition, 46,495; 76,773.
 Roofing Fabric.† Ready Roofing Co. v. Taylor, 15 Blatch., 94.
 Roofing, Preparing Paper for. 91,133; 95,689.
 Rope Clamp. 208,157.
 Ruffles. 28,244; 42,403.
 Ruffler. 37,550.
 Ruffle Machine. 46,424.
 Running Gear for Vehicles. 148,497; 180,886.
 Saddle. Dixon. July 16, 1819. Nos. 4860; 5476.
 Saddle for Harness. 170,910.
 Saddle Pad for Harness. 86,112.
 Saddle Tree. 144,164; 151,730; 166,907; 195,415.
 Saddle Tree for Harness. 180,676.
 Saddle Tree, Side-Saddle. 97,236.
 Safe. Scott. Nov. 12, 1830. Nos. 3117; 273,585; 281,640; 283,136.
 Safe Door. 67,046.
 Sand Blast. 108,408.
 Sand Box for Axles. See Axles.
 Sand Paper Holder. 100,229.
 Sand Paper for Finishing Shoes. 178,994.
 Sand and Gravel Separator. 126,968.

PATENTS.

Sand Washer. 206,514.
 Saucepan. 225,492.
 Saw. 9807; 37,835.
 Saw.† American Saw Co. v. Emerson, 8 Fed. Rep., 806.
 Saw, Circular. Eastman & Jaquith. March 6, 1820. No. 70,728.
 Saw Dog. 134,653; 233,409.
 Saw Guide. 35,390; 78,880.
 Saw Mill. Crosby. March 27, 1835. No. 51,310.
 Saw Mill, Circular. 2174; 7027.
 Saw Mill Dog. 122,215.
 Saw Set. Aiken. May 24, 1830.
 Saw, Setting Teeth in. 32,270.
 Saw Dust, Machine for Burning.† Smith v. Sands, 32 O. G., 1467.
 Scarfs. 222,264.
 Scoops. 84,803.
 Screw. 110,839; 116,922.
 Screw Machine. 79; 1411; 9688; 37,433.
 Screw Peg for Boots and Shoes. 85,374.
 Scythe Snathes. 114.
 Seats. 12,017; 125,329; 134,486; 163,537.
 Seed Drill. 5522; 30,685; 31,819.
 Seed Planter. 9893; 12,231; 26,410; 46,615.
 Seed Steaming Apparatus. 129,018.
 Seeder. 18,083; 216,025; 88,971.
 Separator. See Grain: Sand.
 Sewing Machine. 4750; 6099; 6439; 7776; 7931; 8282; 8294; 8876; 10,597; 10,965; 10,974; 10,975; 11,971; 12,015; 12,116; 13,499; 16,030; 20,775; 21,659; 28,139; 29,785; 30,112; 36,163; 38,807; 42,292; 45,412; 53,927; 77,715; 83,909; 83,910; 101,140; 120,949; 214,513.
 Sewing Machine.† Singer Sewing Machine Co. v. Union Button-hole, etc., Co., 1 Holmes, 253.
 Sewing Machine.† Macaulay v. White Sewing Machine Co., 21 O. G., 496; Same v. Same, 9 Fed. Rep., 698.
 Sewing Machine.† Hicks, W. C. Webber v. Virginia, 103 U. S., 344.
 Sewing Machine Attachment. 108,827; 148,765.
 Sewing Machine Bobbin. 123,625.
 Sewing Machine, Button-hole Attachment. 192,008.
 Sewing Machine for Button-hole. 236,350.
 Sewing Machine, Cloth Marker. 28,633; 40,084.
 Sewing Machine, Cutting Attachment. 156,267.
 Sewing Machine, Feed Mechanism.† Wickersham. Held abandoned by two years' prior public use with inventor's consent. Wickersham v. Singer, 1 MacA. Pat. Cases, 645.
 Sewing Machine, Presser Foot. 177,296.
 Sewing Machine, Tuck Marker. 46,871.
 Sewing Machine, Tuck Creaser. 64,404; 80,269.
 Sewing Silk. 19,283.
 Sewing Silk Manufacture. 42,153.
 Shawl Strap. 82,606.
 Shears. 1092.
 Shearing Sheep. 42,572.
 Sheet Metal Moulding Machine. 74,068.
 Sheet Metal Moulding, Tool for Attaching. 178,436.
 Sheet Metal, Pressing and Stamping. 114,068.
 Sheet Metal Vessel. 189,250.
 Shell, Explosive. 14,133.
 Shingle Machine. Earle. Dec. 28, 1822. Nos. 11,858; 216,344.
 Ships, Securing from Decay. Mellus. Aug. 3, 1822.
 Shoe. See Boot and Shoe.
 Shoe Buckle. 157,395.
 Shoe Buttoner. 68,361.
 Shoe for Car Brake. See Car Brake.
 Shoe and Gaiters. 205,129.
 Shoe Last. 36,495.
 Shoe Pegging Machine. 9947; 23,361; 36,292.
 Shoe Shank Machine. 159,577.
 Shoe Tip. 190,655.

TABLE 3.—TOPICAL LIST OF PATENTS.

Show Card.† Steiger v. Heidelberger, 18 Blatch., 426.
 Show Case Socket. 117,831.
 Shower Bath. 5993.
 Shutter Fastener. 166,819.
 Shutter Hinge. 10,477; 156,277.
 Sieve. 106,597; 130,514.
 Signaling Device for Street Cars. 161,586.
 Silver, Apparatus for Recovering. 35,842.
 Sirups and Mineral Water. 193,476.
 Skate. 28,495; 55,901; 66,316; 116,935; 248,272.
 Skirt. 24,720.
 Skirt Binding. 61,172.
 Skirt Machine. 34,026; 37,124.
 Skirt Protector. 155,534; 161,012.
 Sky-light. 100,143; 106,157; 112,594; 143,149; 143,153.
 Slate Frame. 14,624.
 Sleeve Supporter. 156,429; 202,735.
 Sluice Fork.† Teese & Teese. Teese v. Huntingdon, 23 How., 2.
 Sluice Gate. 1517.
 Smut Mill. 8861.
 Snap-hook. 47,764.
 Snap-hook.† Fitch v. Bragg & Co., 16 Fed. Rep., 243.
 Soap. 65,186; 118,440.
 Soap Manufacture. 47,385; 56,259.
 Soda Fountain. 50,255; 128,411; 137,702; 179,583.
 Soda Water Apparatus. 22,697; 40,811.
 Soda Water Apparatus.† Matthews v. Lalance & Grosjean Mfg. Co., 18 Blatch., 43.
 Soldering. 191,405.
 Soldering Iron. 103,125; 104,412; 115,760.
 Soldering Tool. 194,519.
 Soles. See Boot and Shoe.
 Spark Arrester. 120,638.
 Spectacle Case Catch. 26,891.
 Speeder for Cotton. Moody. April 3, 1819. No. 3089.
 Spike or Hook. Burden. Dec. 2, 1834.
 Spike Manufacture. 1757.
 Spindles. See Bobbins and Spindles.
 Spinning Frame. 89,025.
 Spinning Ring Holder, 108,270.
 Spirit Meter. Tice, I. P. Nusbaum v. Emery, 3 Biss., 469.
 Spittoon. 106,094; 119,705.
 Spool Winding Machine. 26,415.
 Spoon Manufacture. Gale. Dec. 7, 1826.
 Spoon and Fork. 34,252; 220,002; 220,003.
 Spring. 10,280; 152,864; 238,703. See, also, Bed Bottom; Carriage; Corset; Furniture; Hoop-skirt; Tempering.
 Spring Fixture for Shades. 44,624.
 Spring Harrow Teeth.† Carver. Claims of the second reissue construed to be broader than the original. Tuttle v. Loomis, 30 O. G., 344.
 Square, Graduating, Carpenter's. 93,449.
 Square, Try Square. 215,024; 229,283.
 Squib for Blasting. 134,128; 143,396.
 Starch Manufacture. 65,664; 73,259.
 Starch Manufacture, Apparatus for. 137,911.
 Starch Separator. 81,888.
 Starch Tray. 78,320.
 Stave Cutting Machine. 21,856; 33,370.
 Steam Boiler. See Boiler.
 Steamboat. Fulton. Feb. 11, 1809.
 Steamboat.† Two patents. Livingston v. Van Ingen, 1 Paine, 45.
 Steamboat Staging. 31,147.
 Steam-engine. Emerson. March 8, 1834. Nos. 2872; 4199; 21,059; 26,901.
 Steam Gauge. 18,526.
 Steam Gauge Cock. 13,563.

PATENTS.

Steam Generator. 12,682.
 Steam Heater. 64,347.
 Steam Tow-boat. Sullivan. Dec. 4, 1816.
 Steam Trap. 207,484; 123,670; 142,323; 179,581.
 Steel Manufacture. 72,061.
 Step Cover. 62,406; 90,584.
 Stereoscope. 156,311.
 Stock for Bit. 62,232.
 Stone Crusher. 20,542; 68,248; 88,216.
 Stone Channeling Machine. 40,584.
 Stop Cock. Morris. May 15, 1822.
 Stove. Wilson, Oct. 10, 1834. Stanley, Dec. 17, 1832. Orr, Jan. 20, 1836. Nos. 505; 1157; 2636; 3876; 6086; 8047; 10,448; 19,956; 22,787; 28,482; 32,257; 39,535; 41,897; 45,957; 49,469; 51,085; 51,292; 53,251; 56,686; 67,283; 89,304; 100,335; 131,936; 142,933; 142,934; 177,334; 180,001; 183,545; 236,425.
 Stove, Oil Stove. 45,957; 156,149.
 Stove Door. 246,606.
 Stove, Gas Stove. 49,469; 79,989.
 Stove Guard-plate. 80,235.
 Stove Fire-pot. 283,602.
 Straw Cutter. 3431.
 Sugar Purifying. 37,548.
 Sulphate of Alumina Manufacture. 239,089.
 Surface-sizing Fibrous Matter. 41,214.
 Suspenders. Dawson. Nov. 6, 1806. No. 69,629.
 Suspender Button Strap. 169,855.
 Suspender End. 94,881.
 Suspension Ring for Business Cards. 77,482.
 Sweat Leather. 218,220.
 Syringe. 16,956; 28,196; 31,626.
 Table Slide, Extension. 44,073.
 Tan Bark, Extracting. 41,782.
 Tan Bark, Extracting Apparatus. 50,626.
 Tank for Asphalt. 147,423.
 Tapes, Device for Arranging. 50,318.
 Teeth, Setting Mineral. 8621.
 Teeth. See Comb; Dentistry; Spring Harrow.
 Telegraph. See Electric.
 Telegraph Wire. See Electric.
 Telephone. See Electric.
 Tempering Springs. 116,266.
 Tempering Wire and Steel. 21,286.
 Tenon of Metal. 76,491.
 Tent. 14,740.
 Theater Appliances. 222,143.
 Thermometer. 222,420.
 Tile Machine Table. 279,259.
 Tiles. See Brick.
 Tiling, Fire-proof. 112,930.
 Tillers, Method of Connecting with Rudder-heads. 3106.
 Timber Framing Machine.† Hockholzer v. Eager, 2 Sawyer, 361.
 Tobacco, Preparing. 152,649.
 Tobacco, Re-sweating Apparatus. 216,293.
 Tobacco, Plug Tobacco. 140,020.
 Tobacco, Plug Tobacco Finishing. 181,512.
 Tobacco, Plug Tobacco Finisher. 185,119.
 Tobacco, Plug Tobacco Label. 158,604.
 Tool. 56,166.
 Tool Grinding. 4204.
 Topsails, Extra Yard for. 11,125.
 Torpedo Envelope Machine. 167,814.
 Torpedo Filling Machine. 159,995.
 Toy, Elastic. 23,001.
 Transom Lifter. 136,801; 148,538.

TABLE 3.—TOPICAL LIST OF PATENTS.

Trap of Soft Metal. 220,767.
 Traveling Bag. 177,020; 56,801.
 Tray. 38,519.
 Treadle. 176,636.
 Tremolo. 48,366.
 Tripod Head for Surveying. 197,369.
 Truck for Locomotive. 34,377.
 Trunk. 72,988; 128,925; 155,601.
 Trunk Fastening. 74,723; 112,937; 188,950.
 Trunk Molding. 59,458.
 Truss Bridge. 4726; 30,577; 34,183.
 Truss and Supporter. 70,324.
 Tub for Distilling Oil. 86,115.
 Tube. 124,011.
 Tube of Leather. Pennock & Sellers. July 6, 1818.
 Tube, Manufacture of Metallic. 96,037.
 Tube, Flexible. 46,507.
 Turbine Wheel. 28,314.
 Type Manufacture. 55,299.
 Type for Printing. 139,365.
 Type Blocks, Forming Letters on. 64,410.
 Umbrella Cases. 149,480.
 Umbrella Rib, Tempering, 39,210.
 Valve. 2631; 3802; 41,471.
 Valve for Governors. 7755.
 Valve Governor for Water Closet. 11,113.
 Valve for Petroleum Packages. 102,187.
 Valve, Safety Valve. 58,294; 58,962; 85,963; 94,747.
 Valve, Steam Valve. 49,414; 236,052.
 Vapor Apparatus. 12,535.
 Vats for Tanning Hides. 7854.
 Vault Cover. 4266; 14,281.
 Velocipede, 46,706; 59,915.
 Veneer cutting by Machinery. Burnap. May 1, 1829.
 Ventilator. 94,203.
 Ventilator for Cars. 110,803.
 Ventilating Louvers. 170,852.
 Ventilation. 14,510.
 Ventilation of Water Closets. 171,926.
 Vessel for containing Gases and Liquids under Pressure. 159,433.
 Wagon. 155,451.
 Wagon Float.† Stanton, H. Held not infringed. Black's Opinion, 9 Att'y Gen., 332, 349.
 Wagon Gearing. 16,648.
 Wagon Reach. 69,789; 83,497.
 Washboard. 6835; 111,585; 171,568.
 Washing Machine. 14,818.
 Washing Shavings. 85,526.
 Watch. 61,207.
 Watch Chain Machine. Keplinger. May 4, 1820.
 Watchman's Time Detector. 48,048.
 Water Closet. 15,474; 21,734; 91,474; 155,814.
 Water Closet Receiver. 106,089.
 Water Dam. 80,492; 85,598.
 Water Meter. 109,372.
 Water Motor. 146,120.
 Water Supply Regulator. 87,413.
 Water Tank for Railroad. 63,418.
 Water Wheel. Parker. Oct. 19, 1829. Nos. 1658; 2708.
 Water Wheel and Sewing Machine, Combined. 131,616.
 Weaver's Harness. 12,175.
 Weaver's Temple. 8368.
 Weighing Scales. 14,119; 24,162; 25,148; 35,348.
 Weighing Scales.† Weeks v. Buffalo Scale Co., 11 Fed. Rep., 901.
 Well-forming Machine. 49,349.

PATENTS.

Well Reservoir. 53,584.
 Well, Sinking. 50,614.
 Well Tube. 65,648; 130,871.
 Wheels, Cast Iron. 640; 5112; 5531.
 Wheels for Cars.† Trescott. Sizer v. Many, 16 How., 98.
 Wheels for Cars, Casting. 110,779.
 Wheels for Cars, Wrought Iron. 6767
 Wheels for Carriages. 17,520.
 Wheels for Locomotives. 58,447.
 Wheels, Removing Truck. 4213.
 Whip. 60,606.
 Whip Socket. 43,858; 52,439; 70,075; 70,627; 150,195; 221,482; 231,510.
 Whip-socket Manufacture. 132,909.
 Whip Tip. 74,435.
 Whistle for Speaking Tube. 103,406.
 White Oxide of Zinc Manufacture. 8756; 13,416; 13,806.
 Wind Wheel. 87,628.
 Windmill. 68,674; 93,472; 133,601; 156,195.
 Window Cleaner. 196,006.
 Window Frame, Adjustable. 52,726.
 Window Sash Fastener. 88,318; 212,487; 284,506.
 Window Sash Supporter. 64,910.
 Window Sash Holder. 82,580.
 Winnowing Machine. 6757.
 Wire Bag Fastener. 135,899.
 Wire Cable. See Barbed.
 Wire Cage. 139,784.
 Wire Fence. 6106.
 Wire Fence. See, also, Barbed.
 Wire Grating Manufacture. 5006.
 Wire Staple. 19,747.
 Wood-graining Process. 164,858.
 Wood Gutter, Machine for Making. 117,255.
 Wood-splitting Machine. 12,857.
 Wood-bending Machine. 6951; 14,405.
 Wool-carding Machine. 4023.
 Wool-lubricating Machine. 36,603; 47,938.
 Wool Manufacture. Goulding. Dec. 15, 1826.
 Wrench. 40,590; 45,334; 50,364.
 Wrench. See Bung.
 Xyloidine. 97,454; 101,175.
 Zinc White Manufacture. 8756; 13,416; 13,806.

TABLE 4.

A TABLE OF PARTICULAR PATENTEES, UPON WHOSE PATENTS SUIT HAS BEEN BROUGHT, ARRANGED ALPHABETICALLY,

The patents themselves not occurring in Tables 1, 2 or 3 (owing to the absence of sufficient data by which to identify them), and giving after each patent the suits in which it was involved; the construction of the patent in such suits; the reissue of such patent; the suits in which the reissue or reissues were involved, as also the construction given them in such suits.

Bisbee & Doan. See Doan & Bisbee.
 Buckley. Buckley v. Sawyer Mfg. Co., 2 McCrary, 350.
 Clements & Fowler. Ladd v. Mills, 20 Fed. Rep., 792.
 Detmold. Corrected to date of his prior foreign patent. Nelson's Opinion, 4 Att'y Gen., 335.
 Doan & Bisbee. Claims 1, 2 and 3 infringed. Fay & Co. v. Allen, 32 O. G., 1355.
 Douglass (reissued to Wooster). Held not infringed. Wooster v. Muser, 20 Fed. Rep., 162.
 Fowler & Clements. See Clements & Fowler.
 Goodyear. Bourn v. Goodyear, 9 Wall., 811.
 Graves. Divisional reissue. Phillips' Opinion, 16 Att'y Gen., 560.
 Hayden, I. Hayden v. Oriental Mills, 15 Fed. Rep., 605.
 Hoffman & Spofford. See Spofford & Hoffman.
 Lock. Construed strictly in view of state of art, and of its rejected claims, and held not infringed. Fay & Co. v. Allen, 32 O. G., 1355.
 Putnam (Barb Wire Machine?) Washburn & Moen Mfg. Co. v. Grinnell Wire Co., 24 Fed. Rep., 23.
 Spofford & Hoffman. Goldsmith v. American Paper Collar Co., 18 Blatch., 82.

TABLE 5.

A TABLE OF DESIGN PATENT CASES, GIVING AFTER EACH CASE THE PATENT
SUED ON, AND THE SECTION WHERE THE CASE OCCURS IN THE DIGEST.

- Adams & Westlake Mfg. Co. v. St. Louis Wire Goods Co., 12 O. G., 940; 3 B. & A., 77. No. 4637.
 Bigelow Carpet Co. v. Dobson, 21 O. G., 1200; 10 Fed. Rep., 385. §§ 1921, 1922. See Table 8.
 Booth v. Garely, 1 Blatch., 247; Fish. Pat. Rep., 154. No. 139. §§ 1913, 1918, 1956.
 Burton v. Town of Greenville, 18 O. G., 411; 5 B. & A., 541; 3 Fed. R., 642. No. 10,497. § 1987.
 Collender v. Griffiths, 11 Blatch., 212; 3 O. G., 689. Billiard Tables. §§ 1951, 1960, 1966.
 Collender v. Griffiths, 18 Blatch., 110; 18 O. G., 241; 5 Ban. & Ard., 372. § 1972.
 Cone v. Morgan Envelope Co., 4 Ban. & Ard., 170.
 Dayton v. Wright, 11 O. G., 197; 2 Ban. & Ard., 449.
 Dobson v. Hartford Carpet Co.; v. Bigelow, 31 O. G., 787; 114 U. S., 439. Nos. 10,778; 10,870;
 11,074. §§ 1917, 1919, 1920, 1925, 1985.
 Dobson v. Bigelow; v. Hartford Carpet Co., 31 O. G., 787; 114 U. S., 439. Nos. 10,778; 10,870;
 11,074.
 Dryfoos v. Friedman, 18 Fed. Rep., 824. No. 4802. §§ 1938, 1952, 1953.
 Dryfus v. Schneider, 25 Fed. Rep., 481. No. 14,356. §§ 1947, 1986.
 Foster v. Crossin, 23 Fed. Rep., 400. Nos. 15,049; 15,050. §§ 1939, 1955.
 Gibbs v. Ellithorp, 1 MacA. Pat. Cases, 702. No. 1149. §§ 1976, 1977.
 Gorham Mfg. Co. v. White, 7 Blatch., 315; reversed, 14 Wall., 511. No. 1439. §§ 1941, 1942.
 Gorham Co. v. White, 14 Wall., 511; 2 O. G., 592; 2 Whit., 392; reversing *Ibid.*, 7 Blatch.,
 315. No. 1439. §§ 1910-1912.
 Hartford Carpet Co. v. Dobson, 21 O. G., 1200; 10 Fed. Rep., 385. Nos. 10,778; 10,870; 11,074.
 Jennings v. Kibbe, 22 O. G., 331; 10 Fed. Rep., 669. Nos. 10,388; 10,448. §§ 1935, 1936.
 Jennings v. Kibbe; v. Dolan, 32 O. G., 653; 24 Fed. Rep., 697. No. 10,448.
 Jennings v. Dolan; v. Kibbe, 32 O. G., 653; 24 Fed. Rep., 697. No. 10,448.
 Lehnbeuter v. Holthaus, 105 U. S., 91; 21 O. G., 1783. No. 8814. §§ 1950, 1971, 1990.
 Margot v. Schnelzer, 24 O. G., 101. § 1957.
 Miller v. Smith, 18 O. G., 1047; 5 Fed. Rep., 359. No. 10,045. §§ 1927, 1933, 1934, 1944, 1969,
 1980, 1982, 1984.
 Neidringhaus v. Comm'r of Patents, 2 MacA., 149; 8 O. G., 279. §§ 1931, 1961, 1968, 1973, 1978.
 Northrup v. Adams, 12 O. G., 340; 2 B. & A., 567. Design for Provision Safe. §§ 1915, 1962.
 Perry v. Starrett, 14 O. G., 599; 3 Ban. & Ard., 485. No. 7456. §§ 1932, 1943, 1949, 1975.
 Post v. Richards Hardware Co., 25 Fed. R., 905. Design for Curtain and Loop. §§ 1930, 1954.
 Pratt v. Rosenfeld, 18 Blatch., 234; 21 O. G., 866; 5 Ban. & Ard., 488. No. 7914. § 1963.
 Root v. Ball, 4 McLean, 177. §§ 1940, 1948, 1964, 1989.
 Simpson v. Davis, 12 Fed. Rep., 144. §§ 1916, 1979.
 Simpson v. Davis, 22 Fed. Rep., 444. Design for Newel Posts. §§ 1923, 1924.
 Sparkman v. Higgin, 1 Blatch., 205; Fish. Pat. R., 110. Design for Oil Cloth. §§ 1914, 1928, 1965.
 Sparkman v. Higgin, 2 Blatch., 29; Fish. Pat. R., 135. Design for Oil Cloth. §§ 1958, 1959.
 Theberath v. Rubber & Celluloid Harness Trimming Co., 23 O. G., 1112; 15 Fed. Rep., 246.
 No. 5006. §§ 1981, 1988.
 Theberath v. Rubber & Celluloid Harness Trimming Co., 3 Fed. R., 151; 5 B. & A., 584. No. 5006.
 Tomkinson v. Willets Mfg. Co., 31 O. G., 918; 32 O. G., 382; 23 Fed. Rep., 895. No. 13,295.
 §§ 1926, 1945, 1946.
 Untermeyer v. Jeannot, 20 Fed. Rep., 503. No. 12,485. § 1929.
 Werner v. Reinhardt, 20 O. G., 1163; 10 Fed. Rep., 676. No. 11,186.
 Western Electric Mfg. Co. v. Odell, 18 Fed. Rep., 321. § 1967.
 Wood v. Dalbey, 19 Blatch., 214; 20 O. G., 523. No. 11,409. §§ 1937, 1970, 1983.
 Wooster v. Crane, 5 Blatch., 282. No. 1834. § 1974.

TABLE 6.

A TABLE OF PARTICULAR DESIGN PATENTS UPON WHICH SUIT HAS BEEN BROUGHT, ARRANGED CHRONOLOGICALLY,

And giving under each patent the suits in which it was involved, and the construction, etc., of the patent.

NOTE.—For Design Patents not found in this list look in the Topical list, No. 7.

139. Booth, D. A. July 24, 1847. Buttons. *Booth v. Garely*, 1 Blatch., 248.
1149. Ellithorp, S. B. Sept. 27, 1859. Sewing Machine Frames. Awarded priority on interference. *Gibbs v. Ellithorp*, 1 MacA. Pat. Cases, 702.
1439. Gorham, Thurber & Dexter. July 16, 1861. Handles of Table Spoons and Forks. *Gorham Mfg. Co. v. White*, 5 Fish., 94; 14 Wall., 511.
1834. Wooster, E. C. Oct. 20, 1863. Reel. *Wooster v. Crane*, 5 Blatch., 282.
4637. Mann, R. J. Feb. 7, 1871. Sieve. Not novel. Patentability doubted. *Adams & Westlake Mfg. Co. v. St. Louis Wire Goods Co.*, 3 Ban. & Ard., 77; *Dayton v. Wright & Herring*, 2 Ban. & Ard., 449.
4802. Walton, Wm. H. April 11, 1871. Printed Material for Gored Skirts. Construed, limited, not infringed. *Dryfoos v. Friedman*, 18 Fed. Rep., 824.
5006. Theberath, C. M. June 13, 1871. Harness Trimming. Held infringed. *Theberath v. Rubber & Celluloid Harness Trimming Co.*, 3 Fed. Rep., 151; 15 Fed. Rep., 246.
7456. Perry, Dickey & Williams. May 26, 1874. Stove. *Perry v. Starrett*, 14 O. G., 599.
7914. Farmer, G. P. Dec. 8, 1874. Card of Buttons. *Pratt v. Rosenfeld*, 21 O. G., 866.
8814. Lehnbeuter & Claes. Nov. 30, 1875. Show Case. *Lehnbeuter v. Holthaus*, 21 O. G., 1783.
10045. Miller & Miller. June 5, 1877. Studs and Buttons. *Miller v. Smith*, 18 O. G., 1047.
10388. Jennings, A. G. Jan. 1, 1878. Lace Purling. *Jennings v. Kibbe*, 22 O. G., 331.
10448. Jennings, W. P. Feb. 12, 1878. Fringed Lace. *Ibid.*, 22 O. G., 331. Construed and held not infringed. *Ibid.*, 32 O. G., 653.
10497. Burton, G. D. Feb. 19, 1878. Street Lamp. *Burton v. Town of Greenville*, 18 O. G., 411.
10778. Christie, H. Aug. 13, 1878. Carpets. *Dobson v. Hartford Carpet Co.*, 21 O. G., 1200. Sustained, not invalid for joinder of several claims to design as a whole and to its separate elements. *Ibid.*
10870. MaGee, C. Oct. 15, 1878. Carpet. *Ibid.*, 21 O. G., 1200. Held valid; is not for an aggregation, *Ibid.*
11074. Jacobs, W. L. March 18, 1879. Carpet. *Ibid.*, 21 O. G., 1200. Held valid, notwithstanding joinder of nineteen claims. *Ibid.*
11186. Werner, R. May 6, 1879. Trimming. *Werner v. Reinhardt*, 20 O. G., 1163.
11409. Wood, C. F. Sept. 9, 1879. Jewelry setting. *Wood v. Dalbey*, 20 O. G., 523.
12485. Untermeyer, H. Sept. 20, 1881. Watch Case. *Untermeyer v. Jeannot*, 20 Fed. Rep., 503. Limited and not infringed.
13295. Slater, J. Sept. 12, 1882. Vegetable Dish. *Tomkinson v. Willets Mfg. Co.*, 23 Fed. Rep., 895. Held valid and infringed.
14356. Dryfus, B. Oct. 23, 1883. Pendant. *Dryfus v. Schneider*, 25 Fed. Rep., 481. Held novel and infringed.
15049. Foster, T. W. June 10, 1884. Jewelry-pin. *Foster v. Crossin*, 23 Fed. Rep., 400. Held novel.
15050. Same. *Ibid.*, 23 Fed. Rep., 400. Construed to relate to design of the finished product, and not to method of manufacture.

TABLE 7.

A TABLE OF PARTICULAR DESIGN PATENTS UPON WHICH SUIT HAS BEEN BROUGHT, ARRANGED TOPICALLY,

According to subject-matter, and not occurring in Table 6 (owing to the absence of sufficient data by which to identify them), and giving under each patent the suits in which it was involved, and the construction, etc., of the patent.

Billiard Table. Collender v. Griffith, 3 O. G., 689.

Curtain and Loop. Post v. Richards Hardware Co., 25 Fed. Rep., 905.

Newel Post. Simpson v. Davis, 22 Fed. Rep., 444.

Oil Cloths. Sparkman & Kelsey. July 25, 1846. Sparkman v. Higgins, 1 Blatch., 205; 1 Blatch., 135; 2 Blatch., 29.

Provision Safe. Northrup v. Adams, 12 O. G., 430.

TABLE 8.

A TABLE OF PATENT CASES OVERRULED, MODIFIED OR REVERSED.

NOTE.—The sections given indicate where the cases occur in this volume.

- American Cotton Tie Co. v. Simmons*, 3 Ban. & Ard., 320; 13 O. G., 967. §§ 5935, 5936. Reversed, 106 U. S., 89. §§ 5864, 5865.
- American Nicholson Pavement Co. v. Elizabeth*, 1 Ban. & Ard., 439. §§ 238-240, 1485, 1595-1597, 1625-1627, 1643, 1661, 1662, 1689*k*-1689*m*, 1689*p*, 4184, 4435. Reversed as to accountability for profits, 97 U. S., 126. §§ 6378-6386.
- Atlantic Giant Powder Co. v. California Powder Works*, 3 Saw., 448; 2 Ban. & Ard., 131. §§ 5352, 5545, 5660. Reversed as to reissues 4816 and 4819, 98 U. S., 126. §§ 1229, 4831, 5351, 5455, 5538, 5560, 5561.
- Atwater Mfg. Co. v. Beecher Mfg. Co.*, 8 Fed. R., 608. §§ 5543, 5611. Reversed, *Beecher Mfg. Co. v. Atwater Mfg. Co.*, 114 U. S., 523. § 3643.
- Badische Anilin & Soda Fabrik v. Cochrane*, 16 Blatch., 155; 4 Ban. & Ard., 215. §§ 1247, 3561, 4198, 4304, 5122. Reversed, 111 U. S., 293. §§ 1141, 5124.
- Battin v. Taggart*, 2 Wall. Jr., 101. §§ 5440, 5627. Overruled in part, 17 How., 42. §§ 98, 3970, 5443, 5499, 5614, 5761, 5775, 5809.
- Benedict, etc., Mfg. Co. v. Hollister*, 5 Ban. & Ard., 136; 4 Fed. R., 83. Pat. No. 93,391. Reversed, 113 U. S., 59. § 3817.
- Bigelow Carpet Co. v. Dobson*, 10 Fed. R., 385; 21 O. G., 1200. §§ 1921, 1922. Reversed as to estimation of damages, 114 U. S., 439. §§ 1917, 1919, 1920, 1925, 1985. Design.
- Blanchard v. Puttman*, 2 Bond, 84; 3 Fish., 186. §§ 896, 989, 2699, 4310, 4342, 4630, 4710, 5967. Reversed, 8 Wall., 420. §§ 2295, 4274, 4436.
- Booth v. Parks*, 1 Ban. & Ard., 225; 1 Flip., 381. §§ 2069, 3321. Modified as to interest on profits, 102 U. S., 96. §§ 78, 1698, 4388; 5172, 6022, 6081, 6578, 6579.
- Brady v. Atlantic Works*, 4 Cliff., 408; 2 Ban. & Ard., 436. §§ 1340, 2610, 2616, 2622-2624, 3563, 3810, 4667, 4668. Reversed, 107 U. S., 192. §§ 1722, 3581, 3785.
- Burdell v. Denig*, 2 Fish., 588. §§ 188, 433, 453, 1317, 1440, 1508, 1575, 5387. Reversed, 92 U. S., 716. §§ 1303, 1558, 3969.
- Burdett v. Estey*, 15 Blatch., 349; 4 Ban. & Ard., 7. §§ 806, 1999, 3274, 4751. *Ibid.*, 16 Blatch., 105; 4 Ban. & Ard., 141. §§ 973, 1214, 2143, 2960, 3423. *Ibid.*, 19 Blatch., 1; 5 Ban. & Ard., 308. §§ 235, 1628, 1683, 1684, 1694, 2002, 2905. Reversed, 109 U. S., 633. Pat. No. 87,241.
- Bussey v. Excelsior Mfg. Co.*, 5 Ban. & Ard., 135; 1 McC., 161. § 1310. Reversed, 110 U. S., 131. Patents Nos. 56,686; 142,933; 142,934.
- Campbell v. James*, 5 Ban. & Ard., 630. §§ 1490, 5873. *Ibid.*, 17 Blatch., 42; 18 O. G., 979. §§ 428, 2301, 2302, 2615, 2625, 3712, 5407, 5453, 5804, 6320, 6321, 6350, 6493, 6528, 6532. Reversed, 104 U. S., 356. §§ 5330-5336.
- Clough v. Gilbert & Barker Mfg. Co.*, 15 O. G., 1009; 3 Ban. & Ard., 523. Pat. No. 104,271. Reversed, 106 U. S., 166. §§ 2146, 4415.
- Consolidated Safety Valve Co. v. Crosby Steam-gauge Co.*, 7 Fed. R., 768. Pats. Nos. 58,294; 85,963. Reversed, 113 U. S., 157. § 3924.
- Dennis v. Eddy*, 4 Fish., 423. Pat. No. 19,412. Reversed, 95 U. S., 560. Pat. No. 19,412.
- Downton v. Yaeger Milling Co.*, 3 McC., 414; 5 Ban. & Ard., 112. §§ 423, 2200, 3575. Reversed, 108 U. S., 466. § 5153.
- Evans v. Eaton, Pet. C. C.*, 322; 1 Robb, 68. §§ 382, 688, 950, 1331, 1352, 1837, 2289, 2723, 2810, 3727, 3736, 3743, 3781, 4386, 4791, 4792, 4942, 5091, 5972, 6754. Reversed, 3 Wheat., 451. §§ 1153, 3678, 3828, 4260, 6112, 6132, 6592, 6695, 6719.
- Evans v. Hettrick*, 3 Wash., 408; 1 Robb, 166. § 6071. Overruled in part as to taking depositions of witnesses, 5 Pet., 604.
- Foote v. Silsby*, 2 Blatch., 260. §§ 950, 2707, 2710. Modified, 20 How., 378. §§ 1991, 2006, 4900.

PATENTS.

- Gorham Mfg. Co. v. White, 7 Blatch., 315. §§ 1941, 1942. Reversed, 14 Wall., 511. §§ 1910-1912. Design.
- Graham v. Mason, 1 Holmes, 88; 5 Fish., 290. §§ 1602, 1645, 1670, 1672, 1673, 1686, 5815. *Ibid.*, 4 Cliff., 88; 5 Fish., 1. §§ 2703, 2819, 2996, 4439, 4653. Reversed as to costs, 23 Wall., 261. §§ 1648, 1685.
- Herring v. Gage, 14 Blatch., 293; 3 Ban. & Ard., 55. §§ 367, 894, 2807, 3812, 3813, 5435, 5478, 5584, 5585. Reversed, 107 U. S., 640. §§ 989, 2012, 5577, 5578, 5606, 5762.
- Jenkins v. Nicholson Pavement Co., 1 Abb., 567; 4 Fish., 201. §§ 507, 510. Reversed, 14 Wall., 452. § 502.
- Jones v. Moorehead, 3 Wall. Jr., 306. Pat. No. 2886. Reversed, 1 Wall., 155. § 156.
- Jones v. Sewall, 3 Cliff., 563; 6 Fish., 343. §§ 20, 26, 70, 107, 1729, 3782, 4691, 4720, 4721, 5119, 6400-6402, 6418, 6420, 6573. Reversed, 91 U. S., 171. §§ 116, 1255, 2847, 2858-2861, 3578, 3738, 6037.
- King v. Werner, 12 Blatch., 270; 1 Ban. & Ard., 386. Pat. No. 62,492. Reversed, 96 U. S., 218. §§ 2853, 2888.
- Locomotive, etc., Co. v. Pennsylvania R. R., 1 Ban. & Ard., 470; 6 O. G., 927. §§ 49, 6392, 6393. Reversed, 110 U. S., 490. § 6351.
- McCormick v. Seymour, 2 Blatch., 240. §§ 57, 58, 1456, 1607, 1640, 1664, 2161, 2709, 2841, 3982, 4601. Reversed, 16 How., 480. §§ 1482, 1510, 1586, 1603.
- McCormick v. Seymour, 3 Blatch., 209. §§ 1461, 1612, 1996, 3585, 3588, 3740, 6192. Modified as to costs, 19 How., 96. §§ 2008, 5177.
- Mitchell v. Tilghman, 19 Wall., 287; 5 O. G., 299. §§ 749, 4953, 6621, 6725, 6726. Overruled, 102 U. S., 707. §§ 5046-5059.
- Mulford v. Pearce, 13 Blatch., 173; 2 Ban. & Ard., 190. § 6023. *Ibid.*, 14 Blatch., 141; 2 Ban. & Ard., 542. §§ 1523, 1524. Reversed, 102 U. S., 112. § 3583.
- Myers v. Dunbar, 8 Blatch., 446; 4 Fish., 493. § 3135. Reversed, 94 U. S., 187. §§ 991, 2024, 2060, 2061, 3543, 4605, 4626, 6095.
- Odorless, etc., Co. v. Clements, 4 Ban. & Ard., 540; 16 O. G., 854. § 1779. Reversed, 109 U. S., 641. § 5589.
- Piper v. Brown, 1 Holmes, 20; 4 Fish., 175. §§ 2313, 2404, 4117, 5062, 5067, 5075, 5086. Reversed, 91 U. S., 37. §§ 6354-6357.
- Rice v. Heald, 13 Pac. L. R., 33. §§ 950, 989, 1449, 2556, 2720, 2721, 4341, 4733, 6664. Reversed, 104 U. S., 737. §§ 5457, 5556.
- Seymour v. Osborn, 3 Fish., 55. §§ 2155, 2879, 5773, 6199. Reversed, 11 Wall., 516. §§ 5292-5321.
- Smith v. Ely, 5 McL., 76; Fish. Pat. Rep., 339. §§ 4488, 4766, 4805, 4806, 4943, 6297. Overruled, 15 How., 137. §§ 4811, 6297.
- Spaulding v. Tucker, Deady, 649. §§ 1537, 2291, 2438, 2745, 4187, 4661, 6226, 6743. Reversed, 13 Wall., 453. § 2666.
- Tilghman v. Hartell, 2 Ban. & Ard., 260. §§ 4052, 4770. Reversed, 99 U. S., 547. § 3863.
- Tilghman v. Mitchell, 9 Blatch., 1; 4 Fish., 599. §§ 1670, 1689a, 2132 — reversed — and, 9 Blatch., 18; 4 Fish., 615. §§ 2478, 3016 — overruled — 19 Wall., 287. §§ 749, 4953, 6621, 6725, 6726.
- Troy Iron & Nail Factory Co. v. Corning, 1 Blatch., 467; 6 Fish., 85. § 1300. Reversed, 14 How., 193. § 4046.
- Union Metallic Cartridge Co. v. United States Cartridge Co., 7 Fed. R., 344. §§ 2036, 2932. Reversed, 112 U. S., 624. §§ 2021, 2022, 2040.
- Vance v. Campbell, 1 Fish., 483. §§ 991, 6627, 6638, 6665. Reversed, 1 Black, 427. §§ 998, 1758, 2349, 2354, 6103.
- Webster Loom Co. v. Higgins, 15 Blatch., 446; 4 Ban. & Ard., 88. §§ 203, 1210, 1724, 6012, 6013. Reversed, 105 U. S., 580. §§ 381, 1847, 3658, 4994, 5006, 5009, 6035, 6098.
- Welling v. Rubber Coated, etc., Co., 1 Ban. & Ard., 282; 7 O. G., 606. §§ 679, 1044. Reversed as to novelty, 97 U. S., 7. Patent No. 37,941.
- Whitney v. Mowry, 4 Fish., 207. §§ 4172, 4173, 6666. Reversed, 14 Wall., 620. §§ 5036-5045.
- Wilson v. Coon, 18 Blatch., 532; 19 O. G., 482. §§ 4380, 4827, 5403, 5414, 5788, 5997, 6066. Reversed, 113 U. S., 268. Pat. No. 197,807.
- Woodbury Patent Planing Mach. Co. v. Keith, 4 Ban. & Ard., 100. §§ 77, 1069, 4373, 6454. Reversed as to abandonment, 101 U. S., 479. §§ 1-13.

TABLE OF PATENT CASES.

Cases marked thus † are reversed or modified. See Table 8.

A star (*) following the name of a case indicates that the case will not be published in full.

The full-face figures refer to cases in full, the others to digest matter.

Where numbers and dates of patents are given, consult Table 1, *ante*.

Where only the number of the patent is given, and no reference to the section numbers of the digest, all that is material occurs under the number in Table 1, *ante*.

Where a case has several titles, they will all be found in the table, but the section numbers are grouped under only one. For example, see *Adams v. Baron; v. Bellair Stamping Co.* The section references are under the latter title. See, also, *American Diamond Rock Boring Co. v. Gilson; v. Sheldons; v. Sutherland Falls Co.* The references are under *American Diamond Rock Boring Co. v. Sheldons*.

Cases, MacArthur's Patent Cases. Whit., Whitman's Patent Cases. O. G., Official Gazette, United States Patent Office. W. & M., Woodbury & Mott.

Abbe v. Clark,* 3 B. & A., 211; 13 O. G., 274. Same case as Gong Bell Mfg. Co. v. Clark. No. 150,933.

Abbett v. Zusi,* 5 B. & A., 38. § 4051.

Abbott v. Hoole Mfg. & Baggage Check Co.,* 31 O. G., 1561. No. 268,591.

Adair v. Thayer,* 2 McC., 360. § 4892.

Adair v. Thayer,* 20 O. G., 523; 5 B. & A., 118; 17 Blatch., 468. No. 78,854. §§ 4893, 4894.

Adams v. Baron;* v. Bellair Stamping Co., 33 O. G., 623; 25 Fed. Rep., 270.

Adams v. Bellair Stamping Co.;* v. Baron, 33 O. G., 623; 25 Fed. Rep., 270. §§ 4545, 6159.

Adams v. Bridgewater Iron Co., 6 Fed. Rep., 179. § 211.

Adams v. Burke, 17 Wall., 453-460; 5 O. G., 118; 2 Whit., 449; *Ibid.*, 1 Holmes, 40, affirmed. No. 38,713. §§ 5186, 5187.

Adams v. Burke,* 1 Holmes, 40; 4 Fish., 293; 1 O. G., 282; affirmed, *Ibid.*, 17 Wall., 449. No. 38,713. §§ 5199, 5931.

Adams v. Edwards,* 1 Fish., 1. No. 3117. §§ 319, 337, 2558, 2657, 4587, 4598, 5156, 6476, 6641, 6699.

Adams v. Howard,* 26 O. G., 825; 19 Fed. Rep., 317. Nos. 47,551; 50,591. §§ 1408, 1894, 3530, 3923, 4484, 4531, 5001.

Adams v. Howard,* 21 O. G., 264; 20 Blatch., 38. §§ 1908, 4914.

Adams v. Howard,* 22 Fed. Rep., 656; 22 Blatch., 47. Nos. 47,551; 50,591. §§ 4002, 4003, 4810, 5208.

Adams v. Illinois Mfg. Co.,* 18 O. G., 412; 4 B. & A., 543. No. 50,591.

Adams v. Joliet Mfg. Co.,* 12 O. G., 93; 3 B. & A., 1. No. 132,128. §§ 984, 985, 4749.

Adams v. Jones,* 1 Fish., 527; 2 Pitts. R., 73. No. 16,676. §§ 1874, 3674.

Adams v. Loft,* 4 B. & A., 495. No. 111,798. §§ 6426, 6636.

Adams v. Meyrose,* 2 McC., 360; 7 Fed. Rep., 208; v. Thayer. § 595.

Adams v. Meyrose, 10 Fed. Rep., 671. No. 49,290. § 585.

Adams & Westlake Mfg. Co. v. Meyrose,* 12 Fed. Rep., 440. No. 49,290. § 5496.

Adams & Westlake Mfg. Co. v. St. Louis Wire Goods Co.,* 12 O. G., 940; 3 B. & A., 77. No. 106,597. Design Patent 4637. § 3091.

Adams & Westlake Mfg. Co. v. Wilson Packing Co.,* 21 Fed. Rep., 648. Nos. 191,405; 194,519.

Adamson v. Dedrick,* 2 O. G., 523. No. 127,964. § 5859.

Adjustable Window Screen Co. v. Boughton,* 31 Leg. Int., 254; 1 B. & A., 327; 10 Phila. Rep., 251. No. 52,726. § 686.

Agawam Co. v. Jordan,* 7 Wall., 533; 2 Whit., 187. §§ 17, 2484, 2604, 4987, 5755, 6232, 6456, 6554.

Ager v. Murray, 21 O. G., 1197; 15 Otto, 126-132. § 5916.

Aiken, In re,* 1 MacA. Pat. Cases, 126. §§ 270, 4464, 4465, 4940.

Aiken, In re,* 1 MacA. Pat. Cases, 130. No. 7676. §§ 269, 300, 310, 6630.

Aiken v. Bemis, 3 W. & M., 348; 2 Robb., 644. Aiken, H., May 24, 1830. §§ 2270, 4224, 4236.

Aiken v. Dolan,* 3 Fish., 197. No. 6025. §§ 434, 1307, 3267, 6587.

Aiken v. Manchester Print Works,* 2 Cliff., 435. §§ 2941, 5185, 5188, 5825.

Albany Steam Trap Co. v. Felthousen,* 20 Fed. Rep., 633; 22 Blatch., 169. Nos. 64,347; 123,670; 142, 323; 207,484.

Albany Steam Trap Co. v. Felthousen,* 32 O. G., 1239; 24 Fed. Rep., 699. No. 142,323.

Albright v. Celluloid Harness Trimming Co.,* 12 O. G., 227; 2 B. & A., 629. Nos. 137,873; 123,603. §§ 2412, 4305, 5544, 6411.

Albright v. Teas, 23 O. G., 829; 106 U. S., 613-620. Nos. 123,603; 144,164; 166,907; 170,916; 173,371; 180,676. § 3836.

- Alcott v. Young,* 16 O. G., 403; 4 B. & A., 197; 16 Blatch., 134. No. 93,775. § 204.
- Alden v. Dewey,* 1 Story, 336; 2 Robb., 17. Story, J., 1840. No. 144. §§ 1499, 2706, 4445, 4446, 4650, 6227.
- Alden Evaporating Fruit Co. v. Bowen,* 32 O. G., 1355; 24 Fed. Rep., 787. No. 121,569.
- Allen v. Blunt,* 3 Story, 742; 2 Robb., 288. No. 461. §§ 1068, 2432, 4343, 5342, 5684, 5770, 6341.
- Allen v. Blunt,* 2 W. & M., 121; 2 Robb., 530. No. 461. §§ 237, 245, 1493, 1502, 1535, 2238, 2308, 2309, 2325, 2361, 3713, 3967, 4221, 4234, 4471, 5462-7, 5613, 5709, 5717, 6564.
- Allen v. Blunt,* 1 Blatch., 480; Fish. Pat. Rep., 303. No. 461. §§ 3829, 3866, 4245.
- Allen v. City of Brooklyn,* 4 Fish., 598; 8 Blatch., 535. No. 12,017. §§ 1377, 1378.
- Allen v. City of New York,* 17 O. G., 1281; 5 B. & A., 57; 17 Blatch., 350. No. 12,017. §§ 1374, 1382, 4704.
- Allen v. City of New York,* 18 Blatch., 239; 5 B. & A., 461; 7 Fed. Rep., 483. No. 12,017. § 4879.
- Allen v. Deacon,* 21 Fed. Rep., 122; 10 Saw., 210. § 2990.
- Allen v. Hunter,* 6 McLean, 303. No. 8621. §§ 1135, 1183, 1194, 1220, 2294, 2428, 2437, 3697, 3735, 3746, 4644, 5141, 5176, 6029, 6245, 6657.
- Allen v. Sprague,* 1 Blatch., 567; Fish. Pat. Rep., 388. No. 461. § 3221.
- Allis v. Buckstaff,* 22 O. G., 1705; 13 Fed. Rep., 879. Nos. 122,215; 233,409. §§ 232, 233, 6572, 6576.
- Allis v. Stowell,* 18 O. G., 465; 5 B. & A., 458; 10 Biss., 57; 5 Fed. Rep., 203. No. 122,215. § 5270.
- Allis v. Stowell,* 16 Fed. Rep., 783. No. 122,215. §§ 4835, 5236.
- Allis v. Stowell,* 19 O. G., 727. No. 122,215. §§ 1264, 1265, 2913, 2950, 3405.
- Allis v. Stowell,* 9 Fed. Rep., 304. No. 122,215. § 4422.
- Allis v. Stowell,* 23 O. G., 1033; 15 Fed. Rep., 242. No. 122,215. §§ 630, 3080.
- Alteneck, In re,* 23 O. G., 269; MacArthur & Mackey, 353. §§ 1094, 6531.
- Ambler v. Choteau,* 107 U. S., 586. Nos. 95,655; 102,662. § 3952.
- Ambler v. Whipple, 20 Wall., 546. Nos. 95,655; 102,662. § 4547.
- Ambler v. Whipple, 23 Wall., 278. § 5281.
- American Ballast Log Co. of N. Y. v. Barnes,* 21 O. G., 1029; 4 Hughes, 278; 9 Fed. Rep., 465. Nos. 126,938; 232,435. § 1062.
- American Ballast Log Co. v. Cotter,* 21 O. G., 1030; 11 Fed. Rep., 728. No. 126,938. § 5909.
- American Bell Telephone Co. v. Dolbear,* 23 O. G., 535; 15 Fed. Rep., 448. Nos. 174,465; 186,787. §§ 4984, 4985, 5070, 5071.
- American Bell Telephone Co. v. Dolbear,* 17 Fed. Rep., 604. No. 174,465. § 4401.
- American Bell Telephone Co. v. Ghegan,* 23 O. G., 535. Nos. 174,465; 186,787.
- American Bell Telephone Co. v. People's Telephone Co.,* 29 O. G., 1029; 22 Fed. Rep., 309; 22 Blatch., 531. Nos. 174,465; 186,787. §§ 2362, 3807, 4425, 6744.
- American Bell Telephone Co. v. People's Telephone Co.,* 34 O. G., 561; 25 Fed. Rep., 725. Nos. 174,465; 186,787. §§ 1788, 3706, 6755.
- American Bell Telephone Co. v. Spencer,* 20 O. G., 299; 8 Fed. Rep., 509. Nos. 174,465; 186,787. §§ 680, 1407.
- American Carpet Lining Co. v. Beale,* 5 B. & A., 529. No. 52,835. § 3137.
- American Carpet Lining Co. v. Wingfield,* 20 O. G., 372; v. Manhattan Carpet Lining Co.
- American Carpet Lining Co. v. Manhattan Carpet Lining Co.;* v. Wingfield, 20 O. G., 372. No. 14,585. § 5565.
- American Cotton Supply Co. v. Bullard,* 17 O. G., 389; 4 B. & A., 520; 17 Blatch., 160. Nos. 23,291; 31,252. §§ 2938, 4031-4033, 5822, 5907.
- American Cotton Tie Supply Co. v. McCready,* 17 O. G., 565; 4 B. & A., 588; 17 Blatch., 291-302. Nos. 23,291; 31,252. §§ 1114-1116.
- American Cotton Tie Co. v. Simons,* 13 O. G., 967; 3 B. & A., 320. Nos. 23,291; 31,252. §§ 5935, 5936.†
- American Cotton Tie Co. v. Simmons, 16 Otto, 89-95; 22 O. G., 1976; 26 Alb. L. J., 499. Nos. 19,490; 23,291; 31,252. §§ 5864, 5865, 4930.
- American Diamond Drill Co. v. Sullivan Machine Co.,* 28 O. G., 811; 21 Fed. Rep., 74; 22 Blatch., 298. No. 39,235. §§ 1773, 5380.
- American Diamond Rock Boring Co. v. Gilson;* v. Sheldons; v. Sutherland Falls Co., 32 O. G., 1240; 24 Fed. Rep., 374. No. 39,235.
- American Diamond Rock Boring Co. v. Gilson;* v. Sheldon; v. Sutherland Falls Co., 33 O. G., 1598; 25 Fed. Rep., 768. No. 39,235.
- American Diamond Rock Boring Co. v. Rutland Marble Co.,* 18 Blatch., 146; 5 B. & A., 345; 2 Fed. Rep., 355. § 3400.
- American Diamond Rock Boring Co. v. Rutland Marble Co.,* 18 Blatch., 147; 5 B. & A., 346; 2 Fed. Rep., 356. § 3337.
- American Diamond Rock Boring Co. v. Sheldon,* 17 Blatch., 209; 4 B. & A., 551. No. 39,235. §§ 4502, 4773.
- American Diamond Rock Boring Co. v. Sheldon,* 17 Blatch., 303; 4 B. & A., 603. No. 39,235. §§ 664, 6272, 6295.
- American Diamond Rock Boring Co. v. Sheldons;* v. Gilson; v. Sutherland Falls Co., 32 O. G., 1240; 24 Fed. Rep., 374. No. 39,235. § 5263.
- American Diamond Rock Boring Co. v. Sheldons;* 18 Blatch., 50; 5 B. & A., 292; 1 Fed. Rep., 870. No. 39,235. § 3336.
- American Diamond Rock Boring Co. v. Sheldons;* v. Gilson; v. Sutherland Falls Co., 33 O. G., 1598; 25 Fed. Rep., 768. No. 39,235. §§ 5510, 5605, 6091.
- American Diamond Rock Boring Co. v. Sheldon;* v. Sutherland Falls Co., 18 Blatch., 148; 5 B. & A., 347; 2 Fed. Rep., 353.

- American Diamond Rock Boring Co. v. Sullivan Co.,* 14 Blatch., 119; 1 B. & A., 522. No. 39,235. §§ 3003, 3186.
- American Diamond Rock Boring Co. v. Sutherland Falls Co.;* v. Gilson; v. Sheldons, 32 O. G., 1240; 24 Fed. Rep., 374. No. 39,235.
- American Diamond Rock Boring Co. v. Sheldon;* v. Sutherland Falls Marble Co., 18 Blatch., 148; 5 B. & A., 347; 2 Fed. Rep., 353. § 3375.
- American Diamond Rock Boring Co. v. Sutherland Falls Co.;* v. Gilson; v. Sheldons, 33 O. G., 1598; 25 Fed. Rep., 768. No. 39,235. § 5626.
- American Hide and Leather Splitting and Dressing Mch. Co. v. American Tool and Machine Co.,* 1 Holmes, 503; 4 Fish., 284. No. 29,649. §§ 38, 50, 96, 660, 2092, 3552, 3775, 6404, 6458, 6494, 6499, 6525, 6588.
- American Iron Co. v. Anglo-American Roofing Co.,* 24 O. G., 1274; 16 Fed. Rep., 915; 21 Blatch., 324. § 6373.
- American Manufacturing Co. v. Lane,* 14 Blatch., 438; 15 O. G., 421; 3 B. & A., 268. No. 39,210.
- American Middlings Purifier Co. v. Atlantic Middlings Co., 3 B. & A., 168; 4 Dill., 100. Nos. 37,317; 37,318; 37,321. §§ 3012, 4812, 5723.
- American Middlings Purifier Co. v. Atlantic Middlings Co.;* v. Christian, 15 O. G., 467; 4 B. & A., 148; 5 Dill., 127. No. 37,317. § 5553.
- American Middlings Purifier Co. v. Christian,* 5 Dill., 127; 15 O. G., 467; 4 B. & A., 148; v. Milling Co. No. 37,317.
- American Middlings Purifier Co. v. Christian,* 4 Dill., 448; 3 B. & A., 42. Nos. 37,317; 37,318; 37,321. §§ 142, 3013, 3014, 3309, 4813, 5896, 5897, 5900.
- American Middlings Purifier Co. v. Vail,* 15 Blatch., 315; 4 B. & A., 1. Nos. 37,317; 37,318. § 3273.
- American Nickel Co. v. Jackson; v. Manhattan Brass Co.,* 16 Blatch., 68; 4 B. & A., 173. See United Nickel, etc.
- American Nickel Co. v. Manhattan Brass Co.; v. Jackson,* 16 Blatch., 68; 4 B. & A., 173. See United Nickel, etc.
- American Nicholson Pavement Co. v. City of Elizabeth,* 4 Fish., 189. No. 11,491. §§ 3043, 3045, 3092, 3155.
- American Nicholson Pavement Co. v. City of Elizabeth,* 6 Fish., 424; 3 O. G., 522. No. 11,491. §§ 1872, 1873, 2753, 4628, 5425, 5721, 5722, 6547.
- American Nicholson Pavement Co. v. City of Elizabeth,* 6 O. G., 764; 1 B. & A., 439;† approved, City of Elizabeth v. Pavement Co., 7 Otto, 126. No. 11,491. §§ 238-240, 1485, 1595-1597, 1625-1627, 1643, 1661, 1662, 1689*k*, 1689*l*, 1689*m*, 1689*p*, 4184, 4435.
- American Nicholson Pavement Co. v. Hatch,* 3 Fish., 432; 4 Saw., 692. No. 11,491. § 941.
- American Nicholson Pavement Co. v. Jenkins,* 14 Wall., 452; 5 Fish., 491; 1 O. G., 465; 2 Whit., 388. No. 11,491.
- American Pin Co. v. Oakville Co.,* 3 Blatch., 190. Nos. 2970; 2275. §§ 817, 3594, 4680, 5974.
- American Saddle Co. v. Hogg,* 1 Holmes, 133; 5 Fish., 353; 2 O. G., 59. No. 86,112. §§ 4432, 6105.
- American Saddle Co. v. Hogg,* 1 Holmes, 177; 6 Fish., 67; 2 O. G., 595. No. 86,112. §§ 1346, 1860, 4243.
- American Saw Co. v. Emerson,* 8 Fed. Rep., 806. § 1610.
- American Shoe Tip Co. v. National Shoe Toe Protector Co.,* 11 O. G., 740; 1 B. & A., 551. No. 26,329. §§ 2037, 3030.
- American Whip Co. v. Hampden Whip Co.,* 5 B. & A., 122; 1 Fed. Rep., 87. No. 74,435.
- American Whip Co. v. Hampden Whip Co.,* 5 B. & A., 125; 4 Fed. Rep., 536. No. 132,909.
- American Whip Co. v. Lombard,* 14 O. G., 900; 3 B. & A., 598; 4 Cliff., 495. No. 53,003. §§ 2141, 2403.
- American Wood Paper Co. v. Fibre Disintegrating Co.,* 6 Blatch., 27; 3 Fish., 362. Nos. 11,343; 17,387; 25,418; 38,901. §§ 785, 5093.

I. IN GENERAL. COMMON LAW RIGHT. PROPERTY IN MANUSCRIPT.

SUMMARY — *Right depends on statute, §§ 1, 3.— Property in manuscript, §§ 2, 4, 5.— Effect of publication of a literary work, § 5.— Representation of a play in public, §§ 5-8.— Property in manuscript continues till publication, § 9.— Unauthorized representation of a play; assent of author not presumed, § 10.— Play written under agreement, § 11.*

§ 1. There is no exclusive right in a published work in its author in the United States, except under the laws of congress relating to copyright. *Wheaton v. Peters*, §§ 12-16.

§ 2. Before publication an author has an exclusive right of property in his manuscript, and the unauthorized publication of the whole or of an essential part will be enjoined, and such right is not abandoned by permitting the manuscript to be copied. *Bartlett v. Crittenden*, §§ 17-21.

§ 3. There was no common law copyright. *Ibid.*; *Boucicault v. Hart*, §§ 22-29.

§ 4. The right of the author of a dramatic composition to retain and use the same without publication for his own exclusive benefit exists at common law, but cannot be protected by the federal courts in an action between citizens of the same state. *Boucicault v. Hart*, §§ 22-29.

§ 5. The author of a dramatic or literary work has at common law the sole property in the manuscript and its contents, and of copies of the same, so long as he does not publish it or part with the right of property therein. And the representation of a play with the consent of the author is not such a publication thereof as deprives the author of such exclusive right; and this is true where such exclusive right is claimed in this country as to a play which has been acted in England, where, by statute, such acting was equivalent to a publication. *Crowe v. Aiken*, §§ 30-34.

§ 6. The author of a dramatic composition does not abandon his right therein, or dedicate it to the public, or publish it, by causing it to be acted for his benefit. *Boucicault v. Hart*, §§ 22-29.

§ 7. The representation of a play is not a dedication thereof to the public, except possibly so far as those who witness the performance can recollect it, and spectators have no right to secure its reproduction by phonographic or other *verbatim* report, independent of memory. *Crowe v. Aiken*, §§ 30-34.

§ 8. The representation of a manuscript and uncopyrighted play at a theater under an arrangement with the author is not an abandonment thereof by the author or a dedication to the public or to the theatrical profession, and does not prevent the subsequent copyrighting thereof. *Boucicault v. Fox*, §§ 35-39.

*The digesting on this subject was done by CHARLES N. BROWN, Esq., of Madison, Wisconsin; the arrangement, and the selection and rejection of cases, by the general editor.

§ 9. The literary property in a manuscript continues in the author so long as he exercises control over it, and, until its publication, no one has a right to use it or its contents without his consent. Any special use thereof, therefore, by him in public, for his own benefit, is a use perfectly consistent with his exclusive right to its control, and is no evidence of abandonment. *Ibid.*

§ 10. The assent of the author of a play to its unauthorized representation will not be inferred from the fact that it was presented nine times consecutively without objection from him, especially when the person presenting it knew that the right of his licensor to dispose of the play was disputed by the author. *Ibid.*

§ 11. A dramatic author agreed to write a play, for a certain compensation, which he was to assist in acting, and which was to be presented at a certain theater so long as it would run. *Held*, that the author was entitled to take a copyright thereof, and, when no longer produced at the theater named, it might be exclusively produced elsewhere by him or his licensees. *Ibid.*

[NOTES.— See §§ 40-96.]

WHEATON *v.* PETERS.

(8 Peters, 591-700. 1834.)

APPEAL from U. S. Circuit Court, District of Pennsylvania.

Opinion by MR. JUSTICE McLEAN.

STATEMENT OF FACTS.— The complainants in their bill state that Henry Wheaton is the author of twelve books, or volumes, of the reports of cases argued and adjudged in the supreme court of the United States, and commonly known as Wheaton's Reports; which contain a connected and complete series of the decisions of said court from the year 1816 until the year 1827. That before the first volume was published, the said Wheaton sold and transferred his copyright in the said volume to Matthew Carey, of Philadelphia; who, before the publication, deposited a printed copy of the title-page of the volume in the clerk's office of the district court of the eastern district of Pennsylvania, where he resided. That the same was recorded by the said clerk according to law, and that a copy of the said record was caused by said Carey to be inserted at full length in the page immediately following the title of said book. And the complainants further state that they have been informed, and believe, that all things which are necessary and requisite to be done in and by the provisions of the acts of congress of the United States, passed the 31st day of May, 1790, and the 29th day of April, 1802 (2 Stats. at Large, 171), for the purpose of securing to authors and proprietors the copyrights of books, and for other purposes, in order to entitle the said Carey to the benefit of the said acts, have been done.

It is further stated that said Carey afterwards conveyed the copyright in the said volume to Matthew Carey, Henry C. Carey, and Isaac Lea, trading under the firm of Matthew Carey & Sons; and that said firm, in the year 1821, transferred the said copyright to the complainant, Robert Donaldson. That this purchase was made by an arrangement with the said Henry Wheaton, with the expectation of a renewal of the right of the said Henry Wheaton under the provisions of the said acts of congress; of which renewal he, the said Robert Donaldson, was to have the benefit, until the first and second editions of the said volume which he, the said Donaldson, was to publish, should be sold. That at the time the purchase was made from Carey & Sons, a purchase was also made of the residue of the first edition of the first volume, which they had on hand; and in the year 1827 he published another edition of said volume, a part of which still remains unsold.

The bill further states that for the purpose of continuing to the said Henry Wheaton the exclusive right, under the provisions of the said acts of congress, to the copy of the said volume for the further term of fourteen years, after the

expiration of the term of fourteen years from the recording of the title of the said volume in the clerk's office as aforesaid, the said Robert Donaldson, as the agent of Wheaton, within six months before the expiration of the said first term of fourteen years, deposited a printed copy of the title of the said volume in the clerk's office of the district court of the southern district of New York, where the said Wheaton then resided; and caused the said title to be a second time recorded in the said clerk's office; and also caused a copy of the said record to be a second time published in a newspaper printed in the said city of New York, for the space of four weeks, and delivered a copy of the said book to the secretary of state of the United States; and that all things were done agreeably to the provisions of the said act of congress of May 31, 1790, and within six months before the expiration of the said term of fourteen years.

The same allegations are made as to all the other volumes which have been published; that the entry was made in the clerk's office and notice given by publication in a newspaper, before the publication of each volume; and that a copy of each volume was deposited in the department of state.

The complainants charge that the defendants have lately published and sold, or caused to be sold, a volume called "Condensed Reports of Cases in the Supreme Court of the United States," containing the whole series of the decisions of the court from its organization to the commencement of Peters' Reports at January term, 1827. That this volume contains, without any material abbreviation or alteration, all the reports of cases in the said first volume of Wheaton's Reports, and that the publication and sale thereof is a direct violation of the complainants' rights, and an injunction, etc., is prayed.

The defendants in their answer deny that their publication was an infringement of the complainants' copyright, if any they had; and further deny that they had any such right, they not having complied with all the requisites to the vesting of such right under the acts of congress.

The bill of the complainants was dismissed by the decree of the circuit court; and they appealed to this court.

Some of the questions which arise in this case are as novel, in this country, as they are interesting. But one case involving similar principles, except a decision by a state court, has occurred; and that was decided by the circuit court of the United States for the district of Pennsylvania, from whose decree no appeal was taken. The right of the complainants must be first examined. If this right shall be sustained as set forth in the bill, and the defendants shall be proved to have violated it, the court will be bound to give the appropriate redress.

The complainants assert their right on two grounds. First, under the common law. Secondly, under the acts of congress.

And they insist, in the first place, that an author was entitled, at common law, to a perpetual property in the copy of his works, and in the profits of their publication; and to recover damages for its injury, by an action on the case, and to the protection of a court of equity. In support of this proposition, the counsel for the complainants have indulged in a wide range of argument, and have shown great industry and ability. The limited time allowed for the preparation of this opinion will not admit of an equally extended consideration of the subject by the court.

Perhaps no topic in England has excited more discussion among literary and talented men than that of the literary property of authors. So engrossing was the subject, for a long time, as to leave few neutrals among those who

were distinguished for their learning and ability. At length the question, whether the copy of a book or literary composition belongs to the author at common law, was brought before the court of king's bench, in the great case of *Miller v. Taylor*, reported in 4 Burr., 2303. This was a case of great expectation, and the four judges, in giving their opinions, *seriatim*, exhausted the argument on both sides. Two of the judges and Lord Mansfield held that, by the common law, an author had a literary property in his works; and they sustained their opinion with very great ability. Mr. Justice Yeates, in an opinion of great length, and with an ability, if equalled, certainly not surpassed, maintained the opposite ground.

Previous to this case, injunctions had issued out of chancery to prevent the publication of certain works, at the instance of those who claimed a property in the copyright, but no decision had been given. And a case had been commenced, at law, between Tonson and Collins, on the same ground, and was argued with great ability, more than once, and the court of king's bench were about to take the opinion of all the judges, when they discovered that the suit had been brought by collusion, to try the question, and it was dismissed.

This question was brought before the house of lords, in the case of *Donaldson v. Beckett* and others, reported in 4 Burr., 2408. Lord Mansfield, being a peer, through feelings of delicacy, declined giving any opinion. The eleven judges gave their opinions on the following points: 1. Whether at common law an author of any book or literary composition had the sole right of first printing, and publishing the same for sale; and might bring an action against any person who printed, published, and sold the same without his consent. On this question there were eight judges in the affirmative, and three in the negative.

2. If the author had such right originally, did the law take it away, upon his printing and publishing such book or literary composition; and might any person afterward reprint and sell, for his own benefit, such book or literary composition against the will of the author? This question was answered in the affirmative by four judges, and in the negative by seven.

3. If such action would have lain, at common law, is it taken away by the statute of 8 Anne; and is an author, by the said statute, precluded from every remedy except on the foundation of the said statute, and on the terms of the conditions prescribed thereby? Six of the judges, to five, decided that the remedy must be under the statute.

4. Whether the author of any literary composition and his assigns had the sole right of printing and publishing the same in perpetuity, by the common law. Which question was decided in favor of the author by seven judges to four.

5. Whether this right is any way impeached, restrained or taken away by the statute of 8 Anne. Six, to five, judges decided that the right is taken away by the statute. And the lord chancellor seconding Lord Camden's motion to reverse, the decree was reversed.

It would appear from the points decided that a majority of the judges were in favor of the common law right of authors, but that the same had been taken away by the statute. The title and preamble of the statute, 8 Anne, ch. 19, is as follows: "An act for the encouragement of learning by vesting the copies of printed books in the authors or purchasers of such copies during the times therein mentioned.

"Whereas, printers, booksellers and other persons have of late frequently

taken the liberty of printing, reprinting and publishing, or causing to be printed, reprinted and published, books and other writings without the consent of the authors or proprietors of such books and writings, to their very great detriment, and too often to the ruin of them and their families," etc.

In 7 Term R., 627, Lord Kenyon says: "All arguments in the support of the rights of learned men in their works must ever be heard with great favor by men of liberal minds to whom they are addressed. It was probably on that account that, when the great question of literary property was discussed, some judges of enlightened understanding went the length of maintaining that the right of publication rested exclusively in the authors and those who claimed under them for all time; but the other opinion finally prevailed, which established that the right was confined to the times limited by the act of parliament. And that, I have no doubt, was the right decision." And in the case of the University of Cambridge *v.* Bryer, 16 East, 319, Lord Ellenborough remarked: "It has been said that the statute of 8 Anne has three objects; but I cannot subdivide the first two; I think it has only two. The counsel for the plaintiffs contended that there was no right at common law; and perhaps there might not be; but of that we have not particularly anything to do."

From the above authorities, and others which might be referred to if time permitted, the law appears to be well settled in England that, since the statute of 8 Anne, the literary property of an author in his works can only be asserted under the statute; and that, notwithstanding the opinion of a majority of the judges in the great case of *Miller v. Taylor*, 4 Burr., 2303, was in favor of the common law right before the statute, it is still considered in England as a question by no means free from doubt.

§ 12. *An author at common law has a property in his manuscript.*

That an author at common law has a property in his manuscript, and may obtain redress against any one who deprives him of it, or, by improperly obtaining a copy, endeavors to realize a profit by its publication, cannot be doubted; but this is a very different right from that which asserts a perpetual and exclusive property in the future publication of the work, after the author shall have published it to the world. The argument that a literary man is as much entitled to the product of his labor as any other member of society cannot be controverted. And the answer is that he realizes this product by the transfer of his manuscripts or in the sale of his works when first published.

A book is valuable on account of the matter it contains, the ideas it communicates, the instruction or entertainment it affords. Does the author hold a perpetual property in these? Is there an implied contract by every purchaser of his book that he may realize whatever instruction or entertainment which the reading of it shall give, but shall not write out or print its contents? In what respect does the right of an author differ from that of an individual who has invented a most useful and valuable machine? In the production of this his mind has been as intensely engaged, as long, and perhaps as usefully to the public as any distinguished author in the composition of his book.

The result of their labors may be equally beneficial to society, and in their respective spheres they may be alike distinguished for mental vigor. Does the common law give a perpetual right to the author, and withhold it from the inventor? And yet it has never been pretended that the latter could hold, by the common law, any property in his invention, after he shall have sold it publicly. It would seem, therefore, that the existence of a principle may

well be doubted, which operates so unequally. This is not a characteristic of the common law. It is said to be founded on principles of justice, and that all its rules must conform to sound reason.

Does not the man who imitates the machine profit as much by the labor of another as he who imitates or republishes a book? Can there be a difference between the types and press with which one is formed, and the instruments used in the construction of the others? That every man is entitled to the fruits of his own labor must be admitted; but he can enjoy them only, except by statutory provision, under the rules of property, which regulate society, and which define the rights of things in general. But, if the common law right of authors were shown to exist in England, does the same right exist, and to the same extent, in this country?

§ 13. *No common law of the United States.*

It is clear there can be no common law of the United States. The federal government is composed of twenty-four sovereign and independent states; each of which may have its local usages, customs and common law. There is no principle which pervades the Union, and has the authority of law, that is not embodied in the constitution or laws of the Union. The common law could be made a part of our federal system, only by legislative adoption. When, therefore, a common law right is asserted, we must look to the state in which the controversy originated. And in the case under consideration, as the copyright was entered in the clerk's office of the district court of Pennsylvania, for the first volume of the book in controversy, and it was published in that state, we may inquire whether the common law, as to copyrights, if any existed, was adopted in Pennsylvania.

It is insisted that our ancestors, when they migrated to this country, brought with them the English common law, as a part of their heritage. That this was the case, to a limited extent, is admitted. No one will contend that the common law, as it existed in England, has ever been in force, in all its provisions, in any state in this Union. It was adopted so far only as its principles were suited to the condition of the colonies; and from this circumstance we see what is common law in one state is not so considered in another. The judicial decisions, the usages and customs of the respective states, must determine how far the common law has been introduced and sanctioned in each.

In the argument, it was insisted that no presumption could be drawn against the existence of the common law, as to copyrights, in Pennsylvania, from the fact of its never having been asserted until the commencement of this suit. It may be true, in general, that the failure to assert any particular right may afford no evidence of the non-existence of such right. But the present case may well form an exception to this rule.

If the common law, in all its provisions, has not been introduced into Pennsylvania, to what extent has it been adopted? Must not this court have some evidence on this subject? If no right, such as is set up by the complainants, has heretofore been asserted, no custom or usage established, no judicial decision been given, can the conclusion be justified, that, by the common law of Pennsylvania, an author has a perpetual property in the copyright of his works? These considerations might well lead the court to doubt the existence of this law in Pennsylvania; but there are others of a more conclusive character.

The question respecting the literary property of authors was not made a subject of judicial investigation in England until 1760; and no decision was

given until the case of *Miller v. Taylor* was decided in 1769. Long before this time, the colony of Pennsylvania was settled. What part of the common law did Penn and his associates bring with them from England? The literary property of authors, as now asserted, was then unknown in that country. Laws had been passed regulating the publication of new works under license. And the king, as the head of the church and the state, claimed the exclusive right of publishing the acts of parliament, the Book of Common Prayer and a few other books. No such right at the common law had been recognized in England when the colony of Penn was organized. Long afterwards, literary property became a subject of controversy, but the question was involved in great doubt and perplexity; and a little more than a century ago it was decided by the highest judicial court in England, that the right of authors could not be asserted at common law, but under the statute. The statute of 8 Anne was passed in 1710.

Can it be contended that this common law right, so involved in doubt as to divide the most learned jurists of England, at a period in her history as much distinguished by learning and talents as any other, was brought into the wilds of Pennsylvania by its first adventurers? Was it suited to their condition?

But there is another view still more conclusive. In the eighth section of the first article of the constitution of the United States it is declared that congress shall have power "to promote the progress of science and useful arts, by securing for limited times, to authors and inventors, the exclusive right to their respective writings and discoveries." And in pursuance of the power thus delegated, congress passed the act of the 31st of May, 1790. This is entitled "An act for the encouragement of learning, by securing the copies of maps, charts and books, to the authors and proprietors of such copies, during the times therein mentioned." In the first section of this act it is provided "that from and after its passage, the author and authors of any map, chart, book or books, already printed within these United States, being a citizen, etc., who hath or have not transferred to any other person the copyright of such map, chart, book or books, etc., shall have the sole right and liberty of printing, reprinting, publishing and vending such map, book or books, for fourteen years."

In behalf of the common law right, an argument has been drawn from the word *secure*, which is used in relation to this right, both in the constitution and in the acts of congress. This word, when used as a verb active, signifies to protect, insure, save, ascertain, etc. The counsel for the complainants insist that the term, as used, clearly indicates an intention, not to originate a right, but to protect one already in existence.

§ 14. *The meaning of a word in a statute must be compared with the words and sentences with which it stands.*

There is no mode by which the meaning affixed to any word or sentence, by a deliberative body, can be so well ascertained as by comparing it with the words and sentences with which it stands connected. By this rule the word *secure*, as used in the constitution, could not mean the protection of an acknowledged legal right. It refers to inventors as well as authors, and it has never been pretended, by any one, either in this country or in England, that an inventor has a perpetual right, at common law, to sell the thing invented. And if the word *secure* is used in the constitution in reference to a future right, was it not so used in the act of congress? But, it is said, that by that part of the first section of the act of congress which has been quoted, a copyright is not only

recognized as existing, but that it may be assigned, as the rights of the assignee are protected, the same as those of the author.

As before stated, an author has, by the common law, a property in his manuscript; and there can be no doubt that the rights of an assignee of such manuscript would be protected by a court of chancery. This is presumed to be the copyright recognized in the act, and which was intended to be protected by its provisions. And this protection was given, as well to books published under such circumstances, as to manuscript copies.

That congress, in passing the act of 1790, did not legislate in reference to existing rights, appears clear from the provision that the author, etc., "shall have the sole right and liberty of printing," etc. Now if this exclusive right existed at common law, and congress were about to adopt legislative provisions for its protection, would they have used this language? Could they have deemed it necessary to vest a right already vested? Such a presumption is refuted by the words above quoted, and their force is not lessened by any other part of the act.

§ 15. *Copyright is created in the United States by statute; has no existence at common law. Steps to secure copyright.*

Congress, then, by this act, instead of sanctioning an existing right, as contended for, created it. This seems to be the clear import of the law, connected with the circumstances under which it was enacted. From these considerations it would seem that, if the right of the complainants can be sustained, it must be sustained under the acts of congress. Such was, probably, the opinion of the counsel who framed the bill, as the right is asserted under the statutes, and no particular reference is made to it as existing at common law. The claim, then, of the complainants must be examined in reference to the statutes under which it is asserted.

There are but two statutes which have a bearing upon this subject; one of them has already been named, and the other was passed the 29th of April, 1802. The first section of the act of 1790 provides that an author, or his assignee, "shall have the sole right and liberty of printing, reprinting, publishing and vending such map, chart, book or books, for the term of fourteen years from the recording of the title thereof in the clerk's office, as hereinafter directed; and that the author, etc., in books not published, etc., shall have the sole right and liberty of printing, reprinting, publishing and vending such map, chart, book or books, for the like term of fourteen years from the time of recording the title thereof in the clerk's office, as aforesaid. And at the expiration of the said term, the author, etc., shall have the same exclusive right continued to him, etc., for the further term of fourteen years: provided he or they shall cause the title thereof to be a second time recorded, and published in the same manner as is hereinafter directed, and that within six months before the expiration of the first term of fourteen years."

The third section provides that "no person shall be entitled to the benefit of this act, etc., unless he shall first deposit, etc., a printed copy of the title in the clerk's office," etc. "And such author or proprietor shall, within two months from the date thereof, cause a copy of said record to be published in one or more of the newspapers printed in the United States, for the space of four weeks." And the fourth section enacts that "the author, etc., shall, within six months after the publishing thereof, deliver or cause to be delivered to the secretary of state, a copy of the same, to be preserved in his office."

The first section of the act of 1802 provides that "every person who shall

claim to be the author, etc., before he shall be entitled to the benefit of the act entitled an act for the encouragement of learning, by securing the copies of maps, charts, and books, to the authors and proprietors of such copies, during the time therein mentioned, he shall, in addition to the requisites enjoined in the third and fourth sections of said act, if a book or books, give information by causing the copy of the record which by said act he is required to publish, to be inserted in the page of the book next to the title." These are substantially the provisions by which the complainants' right must be tested. They claim under a renewal of the term, but this necessarily involves the validity of the right under the first as well as the second term. In the language of the statute, the "same exclusive right" is continued the second term that existed the first.

It will be observed that a right accrues, under the act of 1790, from the time a copy of the title of the book is deposited in the clerk's office. But the act of 1802 adds another requisite to the accruing of the right, and that is, that the record made by the clerk shall be published in the page next to the title-page of the book. And it is argued with great earnestness and ability, that these are the only requisites to the perfection of the complainants' title. That the requisition of the third section, to give public notice in the newspapers, and that contained in the fourth, to deposit a copy in the department of state, are acts subsequent to the accruing of the right, and, whether they are performed or not, cannot materially affect the title.

The case is compared to a grant with conditions subsequent, which can never operate as a forfeiture of the title. It is said also that the object of the publication in the newspapers, and the deposit of the copy in the department of state, was merely to give notice to the public; and that such acts, not being essential to the title, after so great a lapse of time, may well be presumed. That if neither act had been done, the right of the party having accrued before either was required to be done, it must remain unshaken. This right, as has been shown, does not exist at common law; it originated, if at all, under the acts of congress. No one can deny that when the legislature are about to vest an exclusive right in an author or an inventor, they have the power to prescribe the conditions on which such right shall be enjoyed; and that no one can avail himself of such right who does not substantially comply with the requisitions of the law.

This principle is familiar as it regards patent-rights; and it is the same in relation to the copyright of a book. If any difference shall be made, as it respects a strict conformity to the law, it would seem to be more reasonable to make the requirement of the author rather than the inventor. The papers of the latter are examined in the department of state, and require the sanction of the attorney-general; but the author takes every step on his own responsibility, unchecked by the scrutiny or sanction of any public functionary.

The acts required to be done by an author, to secure his right, are in the order in which they must naturally transpire. First, the title of the book is to be deposited with the clerk, and the record he makes must be inserted in the first or second page; then the public notice in the newspapers is to be given; and within six months after the publication of the book, a copy must be deposited in the department of state. A right undoubtedly accrues on the record being made with the clerk, and the printing of it as required; but what is the nature of that right? Is it perfect? If so, the other two requisites are wholly useless.

How can the author be compelled either to give notice in the newspapers or deposit a copy in the state department? The statute affixes no penalty for a failure to perform either of these acts; and it provides no means by which it may be enforced. But we are told they are unimportant acts. If they are indeed wholly unimportant, congress acted unwisely in requiring them to be done. But whether they are important or not is not for the court to determine, but the legislature; and in what light they were considered by the legislature we can learn only by their official acts. Judging then of these acts by this rule, we are not at liberty to say that they are unimportant, and may be dispensed with. They are acts which the law requires to be done, and may this court dispense with their performance?

But the inquiry is made, shall the non-performance of these subsequent conditions operate as a forfeiture of the right? The answer is that this is not a technical grant of precedent and subsequent conditions. All the conditions are important; the law requires them to be performed; and, consequently, their performance is essential to a perfect title. On the performance of a part of them the right vests; and this was essential to its protection under the statute; but other acts are to be done, unless congress have legislated in vain, to render the right perfect.

The notice could not be published until after the entry with the clerk, nor could the book be deposited with the secretary of state until it was published. But these are acts not less important than those which are required to be done previously. They form a part of the title, and until they are performed the title is not perfect. The deposit of the book in the department of state may be important to identify it at any future period should the copyright be contested or an unfounded claim of authorship asserted. But, if doubts could be entertained whether the notice and deposit of the book in the state department were essential to the title, under the act of 1790, on which act my opinion is principally founded, though I consider it in connection with the other act, there is, in the opinion of three of the judges, no ground for doubt under the act of 1802. The latter act declares that every author, etc., before he shall be entitled to the benefit of the former act, shall, "in addition to the requisitions enjoined in the third and fourth sections of said act, if a book, publish," etc.

Is not this a clear exposition of the first act? Can an author claim the benefit of the act of 1790 without performing "the requisites enjoined in the third and fourth sections of it?" If there be any meaning in language, the act of 1802, the three judges think, requires these requisites to be performed "in addition" to the one required by that act, before an author etc., "shall be entitled to the benefit of the first act." The rule by which conditions precedent and subsequent are construed in a grant can have no application to the case under consideration, as every requisite, in both acts, is essential to the title.

A renewal of the term of fourteen years can only be obtained by having the title-page recorded with the clerk and the record published on the page next to that of the title, and public notice given within six months before the expiration of the first term. In opposition to the construction of the above statutes as now given, the counsel for the complainants referred to several decisions in England on the construction of the statute of 8 Anne and other statutes.

In the case of *Beckford v. Hood*, 7 Term R., 620, the court of king's bench

decided "that an author whose work is pirated before the expiration of twenty-eight years from the first publication of it may maintain an action on the case for damages against the offending party, although the work was not entered at Stationers' Hall." But this entry was necessary only to subject the offender to certain penalties provided in the statute of 8 Anne. The suit brought was not for the penalties, and, consequently, the entry of the work at Stationers' Hall was not made a question in the case. In the case of *Blackwell v. Harper*, 2 Atk., 95, Lord Hardwicke is reported to have said, upon the act of 8 Anne, ch. 19: "The clause of registering with the Stationers' Company is relative to the penalty, and the property cannot vest without such entry;" for the words are, "that nothing in this act shall be construed to subject any bookseller, etc., to the forfeitures, etc., by reason of printing any book, etc., unless the title to the copy of such book hereafter published shall, before such publication, be entered in the register book of the Company of Stationers."

The very language quoted by his lordship shows that the entry was not necessary to an investiture of the title, but to the recovery of the penalties provided in the act against those who pirated the work. His lordship decided in the same case that "under an act of parliament providing that a certain inventor shall have the sole right and liberty of printing and reprinting certain prints for the term of fourteen years, and to commence from the day of first publishing thereof, which shall be truly engraved with the name of the proprietor on each plate, and printed on every such print or prints," the property in the prints vests absolutely in the engraver, though the day of publication is not mentioned." The authority of this case is seriously questioned in the case of *Newton v. Cowie*, 4 Bing., 241. And it would seem, from the decision of Lord Hardwicke, that he had doubts of the correctness of the decision, as he decreed an injunction without by-gone profits. And Lord Alvanly, in the case of *Harrison v. Hogg*, cited in 4 Bing., 242, said "that he was glad he was relieved from deciding on the same act, as he was inclined to differ from Lord Hardwicke."

By a reference to the English authorities in the construction of statutes, somewhat analogous to those under which the complainants set up their right, it will be found that the decisions often conflict with each other; but it is believed that no settled construction has been given to any British statute, in all respects similar to those under consideration, which is at variance with the one now given. If, however, such an instance could be found, it would not lessen the confidence we feel in the correctness of the view which we have taken.

The act of congress under which Mr. Wheaton, one of the complainants, in his capacity of reporter, was required to deliver eighty copies of each volume of his reports to the department of state, and which were, probably, faithfully delivered, does not exonerate him from the deposit of a copy under the act of 1790. The eighty volumes were delivered for a different purpose, and cannot excuse the deposit of the one volume as specially required. The construction of the acts of congress being settled, in the further investigation of the case it would become necessary to look into the evidence and ascertain whether the complainants have not shown a substantial compliance with every legal requisite. But on reading the evidence we entertain doubts which induce us to remand the cause to the circuit court, where the facts can be ascertained by a jury.

And the cause is accordingly remanded to the circuit court, with directions

to that court to order an issue of facts to be examined and tried by a jury, at the bar of said court, upon this point, viz.: whether the said Wheaton as author, or any other person as proprietor, had complied with the requisites prescribed by the third and fourth sections of the said act of congress, passed the 31st day of May, 1790, in regard to the volumes of Wheaton's Reports in the said bill mentioned, or in regard to one or more of them, in the following particulars, viz.: whether the said Wheaton or proprietor did, within two months from the date of the recording thereof in the clerk's office of the district court, cause a copy of the said record to be published in one or more of the newspapers printed in the resident states, for the space of four weeks; and whether the said Wheaton or proprietor, after the publishing thereof, did deliver or cause to be delivered to the secretary of state of the United States, a copy of the same to be preserved in his office, according to the provisions of the said third and fourth sections of the said act. And if the said requisites have not been complied with in regard to all the said volumes, then the jury to find in particular in regard to what volumes they or either of them have been so complied with.

§ 16. *A reporter can have no copyright in the written opinions of the supreme court of the United States.*

It may be proper to remark that the court are unanimously of opinion that no reporter has or can have any copyright in the written opinions delivered by this court; and that the judges thereof cannot confer on any reporter any such right.

Reversed. (a)

(a) MR. JUSTICE THOMPSON dissented, holding, from a review of the authorities, that, "by the common law of England, down, at least, to the decision in the case of *Donaldson v. Beckett*, 4 Burr., 2408, an author was considered as having an exclusive right, in perpetuity, to his literary compositions. That this right, as a branch of the common law, was brought into Pennsylvania with the first settlers as early as the year 1682. That whatever effect and operation the statute of Anne may have been deemed to have had upon the common law in England, that statute never having been in force in Pennsylvania, the common law right remains unaffected by it." After examining the statutes on the subject, he says: "But if the complainants in the court below have not made out a complete right under the acts of congress, there is no ground upon which the common law remedy can be taken from them. If there be a common law right, there certainly must be a common law remedy. The statute contains nothing in terms, having any reference to the common law right; and if such right is considered abrogated, limited, or modified by the acts of congress, it must be by implication; and to so construe these acts is in violation of the established rules of construction, that where a statute gives a remedy in the affirmative, without a negative expressed or implied, for a matter which was actionable at common law, the party may sue at common law, as well as upon the statute. 1 Chitty's Pl., 144. This is a well settled principle, and fully recognized and adopted in the case of *Almy v. Harris*, 5 Johns., 175.

"Whatever effect the statute of Anne may have had in England, as to limiting or abridging the common law right there, no such effect upon any sound rules of interpretation can grow out of our acts of congress. There is a wide difference in the phraseology of the laws. The statute of Anne contains negative words. It declares that the author shall have the sole right and liberty of printing, etc., for the time contained in the statute, and no longer; and these are the words upon which the advocates for the limitation of the common law right mainly rest; and it was, for a long time, considered by the ablest judges in England that even these strong words did not limit or abridge the common law right; and the question, at this day, is not considered free from doubt.

"This act, and the construction which it had received in England, were well known and understood when the act of congress was passed, and no such limitation is inserted or intended, or any matter at all repugnant to the continuance of the common law right, in its full extent. These laws proceed on the ground that the common law remedy was insufficient to protect the right, and provide additional security, by means of penalties, for a violation of it. Congress having before them the statute of Anne, and apprised of the doubt entertained in England as

BARTLETT v. CRITTENDEN.

(Circuit Court for Ohio: 5 McLean, 32-43. 1849.)

Opinion of the Court.

STATEMENT OF FACTS.— This bill is brought to protect the copyright of the complainant, in a manuscript work on book-keeping, of which he claims to be the author; and the defendant is alleged to have published a work on the same subject, which the complainant charges was copied from his manuscript. For twelve years and upwards the complainant has been engaged in teaching the art of keeping books, and has used his work, which is still in manuscript, in his school, with the view of rendering it more perfect, and with the intention of publishing it. The work of the defendant contains two hundred and seven pages, ninety-two of which are alleged to have been taken from the plaintiff's manuscript, with only colorable alterations. The answers deny the allegations in the bill.

A reference was made to a master, with special instructions, who reports "that the book of the respondents contains a portion of plaintiff's manuscript, with only slight alterations; and he says that it is impossible that the book and the manuscript could have been composed by two persons, neither having for his guide the entries of the other. The balance sheets are the same in both. As regards the plan and arrangement, they are the same. The book contains explanations, which are valuable to the learner, that are not in the manuscript. Both works consist of a series of brief sets of mercantile books by double entry."

The master reports that the plan of the work in the manuscript and in print is substantially the same; that in the book there are explanations interspersed through the series of sets, which the manuscript does not contain; that these explanations are of great use to the learner, but that they may be verbally given with equal advantage. The system in the manuscript, the master states, is superior to any he has seen, except that of the book published by the defendant, which is the same in substance; "that, unlike all the systems he had seen, the manuscript is made up of a few brief sets of mercantile books, which show the entire process of ordinary double entry book-keeping, and in a compass of very little magnitude;" and he says, that "he discovers in other treatises nothing bearing a resemblance to the manuscript plan. He therefore concludes that the plan is original."

"The manuscript, in its present state (the master says), contains substantially a system of book-keeping, suitable to be used by a teacher in his school." "As the system, when published, becomes its own teacher, it should be accompanied with such precise explanations as may be necessary to a proper understanding and use of it by the uninitiated. It should also be accompanied with forms of the auxiliary books."

Jonathan Jones, of St. Louis, a witness, states that, in 1841, he opened a school in St. Louis, as the partner of the complainant, for instruction in book-keeping on Bartlett's plan, which consists "of eleven sets of books, with a balance sheet for each set, and an inventory attached, showing property on hand, and that Bartlett was the author of them; that his manuscript contains

to its effect upon the common law right, if it had been intended to limit or abridge that right, some plain and explicit provision to that effect would doubtless have been made; and not having been made, is, to my mind, satisfactory evidence that no such effect was intended."

BALDWIN, J., also dissented.

a perfect system of book-keeping, and differs from all others in arrangement, being composed of short exercises." The defendant, Crittenden, entered the school ignorant of book-keeping; and after completing the course, he took charge of the writing department for a short time.

In 1846, Crittenden called on the witness with a copy of his work, which, on examining, the witness found to be Bartlett's system. And Crittenden then told him that when he was in Bartlett & Co.'s school he took a precise copy of the manuscript, with the view of publishing it; and that he did publish it in 1845. And the witness says, if all of Bartlett's manuscript were struck from Crittenden's book, there would not be enough left for a title-page. A copy of Bartlett's manuscript was used at the St. Louis school, and witness never prohibited any of the learners from copying it. Crittenden knew that it was Bartlett's manuscript, and that he intended to publish it as soon as he could make the necessary arrangements. Witness has heard Bartlett frequently say so. Witness gave Crittenden a letter to Bartlett referring to the published work, that Bartlett might see it.

To Josiah Bliss, a witness, Crittenden said that his system was the same as Bartlett's. Nine other witnesses, who are book-keepers, being sworn, state that Bartlett's system of book-keeping is new; and that its plan and arrangement are preferable to any other. And they say that Crittenden's book is the same in substance.

On the part of the defendant, James T. Annan was sworn, who says that he has been a book-keeper for fifteen years,—has examined Bartlett's system, and finds nothing new or original in it, either in the forms of stating the accounts, or in the arrangement, or in any particular; that the materials are not new in matter or form; nothing could be taught by it without rules and explanations, and auxiliary books; and that it is wholly unfit for publication; that a cash book is essential to a complete system, and that Bartlett substitutes for it a cash account. The individual who conducts the business is not named in the exhibit, and there are no indexes.

Richard Miller, who has been a book-keeper for twenty-five years, agrees with the statement of Annan, and adds that, in Bartlett's plan, there is properly no day-book, only a waste-book, from which to make the day-book entries.

John Gundry has been a book-keeper and teacher for seven years, and he agrees with Annan. He says Bartlett has more sets than usual; but he had used the same, or about the same, number more or less. Bartlett's plan contains no definition of terms, such as drafts, bills of exchange, acceptances, etc.,—no mercantile forms, such as bills receivable and payable, account of sales, account current, etc.,—no forms of calculations, viz.: interest, discount, commission, equation of payments, reduction of currencies. But he says that no work has come to his knowledge wherein the theory has been carried out to so great an extent as in Bartlett's, though many authors have recommended it. He never saw the identical entries until the spring of 1842, when he examined Bartlett's manuscript. In 1845 witness united with Bacon to teach book-keeping, who had been using Bartlett's system, and they continue to use it in the school.

The complainant claims relief on two grounds: 1. At common law. 2. Under the act of congress, 3d February, 1831. In the case of *Wheaton v. Peters*, 8 Pet., 655 (§§ 12-16, *supra*), the supreme court say: "That an author, at common law, has a property in his manuscript, and may obtain redress against any one who deprives him of it, or, by improperly obtaining a copy, endeavors

to realize a profit by its publication, cannot be doubted." And again, page 661: "An author has, by the common law, a property in his manuscript; and there can be no doubt that the rights of an assignee of such manuscript would be protected by a court of chancery."

§ 17. *A writer has property in his own manuscript.*

In combating the argument in the same case, that an author had a common law right to republish his own works, and to prohibit others from doing so, the court showed that, after the statute of Anne, there was no such right in England, and that, if such right were shown to exist there, it did not follow that it exists to the same extent in Pennsylvania. That the common law in this country exists in the different states, as modified by them by statutory enactments and judicial decisions. But the question under consideration is very different from the one decided in the above case. We have to say whether the writer has a right of property in his own manuscript. That he has such a property in his own literary labor, until he shall relinquish it by contract or by some unequivocal act, would seem to be clear. This is laid down in *Maughon on Lit. Property*, 74 and 137; *Webb v. Rose*, 4 Burr., 2330; *Pope v. Curl*, 2 Atk., 342; *Manley v. Owens*, Burr., 2320; *Southey v. Sherwood*, 2 Meriv., 434; 2 Story on Eq., sec. 943.

Lord Mansfield, and some others distinguished for their great learning and ability, have considered the publication of a work not as such a dedication of it to the public by the author, at common law, as to deprive him of an exclusive right to republish it.

§ 18. *A publication of a work is a dedication to the public.*

With the greatest respect for these opinions, we think there is a difference in principle between the right to republish a printed work and the exclusive right of an author to publish his own manuscript. A man may write without any intention to publish. He may treat of principles and characters without restraint — with a view to his mental improvement, or from some other motive, without incurring any responsibility so long as the manuscript remains unpublished. It is, therefore, essential, in all proceedings for a libel, to prove publication. And there is no law which can compel an author to publish. No one can determine this essential matter of publication but the author. His manuscripts, however valuable, cannot, without his consent, be seized by his creditors as property. They are valueless to all the world except to the author and his representatives; or to such persons as he shall transfer them. But the author who publishes his work dedicates it to the public. He voluntarily incurs all the responsibility of a publisher. His object is to instruct or amuse mankind, and the more his work is circulated, the greater is the compliment to his ability as a writer. There is no reason, then, against a republication of the work by any one, except that it may reduce the profits of the author. And, on this ground, he cannot complain, as he has failed to secure the right under the statute.

If the common law protects the rights of an author, as contended for, the statute was useless. An action for damages and an injunction would as effectually protect the rights of an author as any provisions of the statutes. But there is another view, which is still more conclusive, against the exclusive right to republish a printed work. The statute limits the right to a term of years. The common law right, if it exist, is without limitation. To hold, then, that there is a common law right, independently of the statute, is to disregard the statute. Whilst the common law protects the right of the author

to his manuscripts, it cannot be made to extend to the republication of a published work. As well might it be contended that the inventor of a machine, after it has gone into general use, by the acts of the inventor, may, by the common law, claim the exclusive right of making and selling it.

But we think this case is within the act of congress referred to. The section 9 of that act (4 Peters' Stat., 438) provides: "That any person or persons who shall print or publish any manuscript whatever, without the consent of the author or legal proprietor first obtained, shall be liable to suffer, and pay to the author or proprietor, all damages occasioned by such injury, to be recovered by a special action on the case founded on this act." "And the several courts of the United States empowered to grant injunctions to prevent the violation of the rights of authors and inventors are hereby empowered to grant injunctions," etc.

That the complainant is the author of the manuscript in question is proved. And it also appears, from the statement of the experts, and by the reports of the master, that the manuscript contains a new and useful system of book-keeping. The novelty consists in the mode of keeping accounts. It can consist in nothing else. The names and figures used in the items of debit and credit are of no importance, as they are only used to illustrate the mode or principle of the work. The manuscript was contained on different sheets or cards, for the convenience of teaching; but this is immaterial. Its parts were necessarily connected. Three or four of the witnesses state that there is no novelty in the manuscript — nothing that had not been taken from or might not be found in different works on book-keeping. But this is contrary to the views of the witnesses generally, and, especially, to the report of the master.

§ 19. *A manuscript is protected from piracy, though incomplete on account of a lack of explanatory notes.*

The objection that the manuscript does not contain a complete system, as explanatory notes, etc., are necessary and usual in such works, to enable the student to learn the art of book-keeping without an instructor, is not sustainable. A surreptitious publication of an important part of the manuscript is equally within the principle of the statute. But the notes are only explanatory of the system, as contained in the body of the work. They facilitate the progress of the learner, but they add nothing to the system. From the weight of the evidence including the master's report, Bartlett's system may be said to be complete for the purpose of teaching. Was there a publication of the manuscript of the complainant by the defendant? He has denied in his answer, somewhat equivocally, the charge of publication as made in the bill. He confessed to Jones that he took a copy of the manuscript with a view of publishing it, and that he did publish it in 1845. After the publication of his book, he admitted, to other witnesses, that the system of his work was the same as Bartlett's. It seems Crittenden became a student in the school of Bartlett and Jones, conducted by Jones at St. Louis, and in which he acquired his knowledge of book-keeping. The manuscript of Bartlett was used in that school, and it was there that the defendant made out his copy.

Independently of this proof, a comparison of the book with the manuscript will show that at least ninety-two pages of the book were substantially copied from the manuscript. The master says that they could not be the production of two minds. So nearly are they identical, that no one can read them without at once perceiving that one must have been copied from the other. The system is the same in both, and the discrepancies that appear only show the

intent of the copyist. It is believed that there is no case in the books where the piracy is more palpable.

The inconsistency of Jones in giving a letter to Crittenden, recommending him and his book to Bartlett, is explained in his testimony. He gave the letter to bring the fact of publication to Bartlett's notice. This act of the witness, though apparently inconsistent with his statements, does not destroy his credibility. He must have known, as he states, that the book contained Bartlett's system; but it was not for him to say, or to know, whether Crittenden, under the circumstances, was liable to an action for the publication. The facts of the case go strongly to show the probability that Crittenden told Jones, as he swears, that he copied Bartlett's manuscript.

§ 20. *The whole of a manuscript need not be published to constitute a violation of the copyright act.*

It is argued, to bring the case within the ninth section, that the whole of any manuscript must be published; that the principle of law in relation to colorable alterations of a printed book, or a fair abridgment of it, does not apply under this section to a manuscript. If the whole of the manuscript must be published, will the omission of a line or a word evade the statute? That it will, would seem to be the argument of the counsel. Under such a construction, the question might well be asked, of what value to an author is the statute? It purports to protect him against a fraudulent use of his manuscript; but practically it gives him no protection. It has been passed in mockery of his right. He is the sport of every man who has the disposition and the opportunity to pirate his manuscript. No such rule of construction is admissible. Has a substantial part of the manuscript been published? Does the book of the defendant contain Bartlett's system of book-keeping? Of this there can be no doubt. Such a publication is within the above section. It renders the manuscript valueless.

§ 21. *Property in manuscript does not depend upon the intention of the author as to publication.*

Was there an abandonment of the manuscript by Bartlett? This is the only remaining point to be considered, and it is the one most relied on in the defense. It satisfactorily appears from the evidence that Bartlett intended to publish his manuscript. And this is only material on the question of abandonment. His right of property in no way depends on his intention in this respect.

His manuscript was used in the school taught by himself in Cincinnati, and by the partnership school taught by Jones in St. Louis. In both these schools the manuscript was studied by the pupils, and they were required to copy certain parts of it, and were at liberty to copy the whole. These schools, and especially the one at Cincinnati, have been in operation several years. And under these circumstances, it is contended, there was an abandonment of the manuscript.

Bartlett's right of property in his manuscript may be transferred or abandoned, the same as any other right of property. Where the copyright of a published work is secured, under the statute, the author, by using the work in imparting instruction to his pupils, or by disposing of it to a friend, does not thereby transfer his exclusive right to publish it, or incur a suspicion that he intends to abandon it. And how does this differ from the case under consideration? In both cases the law gives a right of property to the author, and a remedy to enforce that right. And in both cases he may transfer or abandon that right. The evidence of a transfer or abandonment must be

as clear and as specific in the one case as in the other. An acquiescence in the publication of his manuscript, or in the republication of his printed book, would authorize the presumption of an assignment or of an abandonment. To make a gift of a copy of the manuscript is no more a transfer of the right, or abandonment of it, than it would be a transfer or an abandonment of an exclusive right to republish, to give the copy of a printed work.

In his treatise on Equity, section 943, Mr. Justice Story says: "In cases of literary, scientific and professional treatises in manuscript, it is obvious that the author must be deemed to possess the original ownership, and be entitled to appropriate them to such uses as he shall please. Nor can he justly be deemed to intend to part with that ownership by depositing them in the possession of a third person, or by allowing a third person to take and hold a copy of them. Such acts must be deemed strictly limited, in point of right, use and effect, to the very occasions expressed or implied, and ought not to be construed as a general gift or authority for any purposes of profit or publication, to which the receiver may choose to devote them." And he says, to prevent the publication of manuscripts, without the consent of the author, an injunction should be issued. Even the publication of private letters by the person to whom they were addressed may be enjoined. This is done upon the ground that the writer has a right of property in his letters, and that they can only be used by the receiver for the purposes for which they were written. So far as this, and in justification or defense, an individual has an interest in letters received by him. *Eden on Inj.*, ch. 13, pp. 275, 276; *Duke of Queensbury v. Shebbeare*, 2 *Eden*, 329; *Southey v. Sherwood*, 2 *Meriv.*, 434, 436; *Macklin v. Richardson*, *Ambl.*, 694; *Pope v. Curl*, 2 *Atk.*, 342; *Lord Perceval v. Phipps*, 2 *Ves. & Beam.*, 19, 24; *Gee v. Prichaid*, 2 *Swanst.*, 403, 415, 422, 425.

"No length of time will authorize the publication of an author's original manuscript without his consent." In 1804, the court of sessions of Scotland interdicted, at the instance of the children, the publication of the manuscript letters of the poet Burns. *Cadell v. Stewart*, 1 *Bell's Com.*, 116*n*. Lectures, oral or written, cannot be published without the consent of the lecturer, though taken down when delivered.

Manuscript reports were copied by the clerk of a gentleman, to whom the author had lent them, and the chancellor granted an injunction to restrain the publication. *Forrester v. Waller*, 2 *Eden*, 328; *Eden on Inj.*, 322. The Earl of Clarendon delivered to defendant's ancestor the manuscript of the second part of his father's *History of the Rebellion*, with liberty to take a copy of it, and make what use of it he thought fit. Complainant, who was Lord Clarendon's representative, obtained an injunction from Lord Northington, who said that it could not have been the donor's intention that the donee should print the work, though he might make every use of it except that. *Duke of Queensbury v. Shebbeare*, 2 *Eden*, 329.

Lord Eldon refused to grant an injunction until the right was tried at law, where the manuscript had been in the hands of a publisher twenty-three years, and had not been called for by the plaintiff. *Southey v. Sherwood*, 2 *Meriv.*, 435. Sparks had procured from the representatives of Washington the right of publishing his letters and other writings, and had done so in twelve volumes. Upham, in his *Life of Washington*, had taken many of these letters from Sparks, they never having been published before. On a bill filed, Mr. Justice Story said: "Unless there be a most unequivocal dedication of private letters

and papers by the author, either to the public or some private person, I hold that the author has a property therein, and that the copyright thereof exclusively belongs to him." And he granted an injunction. *Folsom v. Marsh*, 2 Story, 100 (§§ 249-56, *infra*). The manuscript of Bartlett was used in his school at Cincinnati, and in the school at St. Louis, for the purpose of imparting instruction to the pupils, and it does not appear, from the evidence, that copies were required or permitted to be taken of it for any other purpose. There is nothing in the testimony from which an implication can arise that Bartlett consented to the publication of his manuscript by the defendant, or that he ever abandoned it. It seems he was much excited when he was informed of the publication of Crittenden, and shortly afterwards instituted this suit.

An injunction will be granted to restrain the defendants from a further publication of the first ninety-two pages of the work, or sale of it; and a reference is made to a master to ascertain the number of copies sold, and the number on hand, etc., and that he report at the next term.

BOUCICAULT *v.* HART.

(Circuit Court for New York: 13 Blatchford, 47-60. 1875.)

Opinion by HUNT, J.

STATEMENT OF FACTS.—The facts as alleged in the bill are as follows: The complainant, Dion Boucicault, a citizen of the United States and a resident of the state of New York, before October 26, 1874, composed and wrote a dramatic composition called the "Shaughraun," of which he is sole proprietor. On the 26th of October, 1874, he mailed to the librarian of congress a printed copy of the title of this play, and received from the said librarian the usual certificate setting forth the said filing of the title of said dramatic composition, "the right whereof he" (said Boucicault) "claims as author and proprietor in conformity with the laws of the United States respecting copyrights." He complied in all respects with all the provisions of the Revised Statutes of the United States as to copyrights. On the 24th of November, 1874, Boucicault caused said play to be performed before persons licensed by him to witness the same, at Wallack's Theater, for the especial benefit of said Boucicault, and such performances have continued there for his benefit and profit, and said drama has never been performed otherwise or elsewhere with his consent. Boucicault never printed said play for circulation or publication or sale, and the play is still in manuscript, and has never been published, circulated or sold, or copied, or used in any way, with the permission of Boucicault, unless in the said performance of said play at Wallack's Theater for Boucicault's benefit. The defendant Hart is owner of a theater on Broadway called the Theater Comique. He possessed himself, surreptitiously, without the consent of Boucicault, of the manuscript of the "Shaughraun," thus made himself acquainted with its contents, and printed and published the manuscript, or a material part thereof, under the name of the "Skibbeah," a play which professed to be "arranged" by one G. L. Stout. This play has twelve scenes, and eight of them are copied from Boucicault's play of the "Shaughraun." Defendant has printed and published said "Skibbeah," and publicly announced his intention to sell copies of the same, containing these eight scenes of Boucicault's play, without the license or consent of Boucicault. Defendant did also, on the 26th of January, 1875, and continuously since then, up to the granting

of an injunction in this suit, publicly represent this "Skibbeah" at his Theater Comique on Broadway. Boucicault at that time remonstrated with the defendant, in writing, against his representing this play. The "Skibbeah," as far as these eight scenes are concerned, is merely a copy of Boucicault's "Shaughraun." It is, in plot, situation, stage business, language, costumes, scenery, incidents and series and sequence of events, identical with Boucicault's play of the "Shaughraun." The four scenes which are not taken from the "Shaughraun" are taken from a play of which one Reeve is author, called "Pyke O'Callaghan," and these four scenes are merely introductory and accessory to the other eight scenes, which contain the material part of the said "Skibbeah," and are a mere copy of Boucicault's "Shaughraun." The bill prays for an injunction restraining the defendant from performing and representing the said play, or from printing or publishing any copy of the same, and for other relief.

To this bill the defendant demurs upon the following grounds, viz.: For that it appears, on the face of the bill, that the said drama called "Shaughraun" has been, for a greater period than ten days prior to the commencement of this suit, publicly performed, and caused to be publicly performed, by the complainant, upon the stage of a theater; and it does not appear by said amended bill that two printed copies of said drama, or any copies thereof, were filed in the office of the librarian of congress, or sent by mail to said librarian of congress, at Washington, District of Columbia, within ten days after the public performance thereof, or at any other time; and for that it is alleged, in said amended bill, that the complainant has never published, or caused to be published, the said drama called "Shaughraun;" and for that it does not appear, by said amended bill, that the complainant has ever given any notice that he has complied with the requirements of the acts of congress respecting copyrights; and for that it does not appear, by said amended bill, that the complainant has ever given any notice that the said drama is secured by copyright.

It is admitted, by these pleadings, that the plaintiff is the author of the literary work in question. It is also admitted that the defendant, without the consent and against the remonstrance of the complainant, made use of said work for his own benefit, by performing the same at his theater, and by printing and publishing copies thereof. The defendant insists that, in so doing, he has violated no law of the land; in other words, that the complainant has not taken the measures necessary to secure to himself the exclusive right to the performance or the publication of the drama called the "Shaughraun." The complainant relies upon the deposit of a printed copy of the title with the librarian of congress, as the act upon which the grant of copyright depends, and, having performed the act, insists that his copyright is complete. The defendant takes the position, that, no copies of the work being filed with the librarian, there is no right to sue; and that, to entitle an author to copyright, the author must deposit the book, as well as the title, with the librarian. This is the first question to be considered.

§ 22. *Acts of congress on the subject of copyright. Must be fully complied with.*

There is no common law of copyright which can affect this case. *Wheaton v. Peters*, 8 Pet., 657 (§§ 12-16, *supra*). The rights of the complainant to a copyright, if any he has, are conferred by the constitution and the statutes of the United States. It is there that we must look for them, and, unless there found, they do not exist. If conditions are imposed by statute, as preliminary

to the existence of such rights, their performance must be shown. All the conditions clearly imposed by congress are important, and their performance is essential to a perfect title. *Wheaton v. Peters, supra.* The constitution, in section 8, article 1, gives to congress power "to promote the progress of science and useful arts, by securing, for limited times, to authors and inventors, the exclusive right to their respective writings and discoveries." The first act of congress upon this subject was passed May 31, 1790. 1 U. S. Stat. at Large, 124. The first section of that act secured to the author the sole right of printing, publishing and vending his map, chart or book for the term of fourteen years "from the recording the title thereof in the clerk's office, as is hereinafter directed." The third section provided that "no person shall be entitled to the benefit of this act," where such book has been already published, "unless he shall first deposit, and in all other cases, unless he shall before publication deposit, a printed copy of the title . . . in the clerk's office," etc. "And such author . . . shall, within two months, . . . cause a copy of the said record to be published in one or more of the newspapers printed in the United States, for the space of four weeks." The fourth section required that, within six months after the publishing thereof, a copy of the book should be delivered to the secretary of state to be preserved in his office. The sixth section provided that any person who shall print or publish any manuscript without the consent of the author, etc., shall be liable to damages.

By a statute passed April 29, 1802 (2 U. S. Stat. at Large, 171), it was enacted that, in addition to the above requisites, the author should give information by causing a copy of the required record to be inserted in the title-page or the page of the book next to the title. This act of 1802 was repealed and the copyright acts were amended in 1831 (Act of February 3, 1831; 4 U. S. Stat. at Large, 436). Section 4 of that act provided that no person should be entitled to the benefit of the act unless he should, before publication, deposit a printed copy of the title of the book, etc., with the clerk of the district court where the author resided. It also provided that the author or proprietor of such book, etc., should, within three months from the publication of said book, etc., deliver a copy of the same to the clerk. The fifth section of that act provided that no person should be entitled to the benefit of the act unless he should give information of copyright being secured, by causing to be inserted in each copy of each edition published the words "Entered according to act of congress," etc. In July, 1870, congress passed an act to revise, consolidate and amend the statutes respecting patents and copyrights (16 U. S. Stat. at Large, 198). By section 90 of that act it was provided "that no person shall be entitled to a copyright unless he shall, before publication, deposit in the mail a printed copy of the title of the book, or other article, or a description of the painting, drawing, etc., for which he desires a copyright, addressed to the librarian of congress, and, within ten days from the publication thereof, deposit in the mail two copies of such copyright book or other article, . . . to be addressed to said librarian of congress, as hereinafter to be provided." The librarian is then directed to make a record of the name of such copyright book in words specifically described, and to give a copy of the same to the proprietor. By section 93 the proprietor of every copyright book is required to mail to the librarian of congress, within ten days after its publication, two complete printed copies thereof, and a copy of every subsequent edition. Section 97 enacts that no person shall maintain an action for the infringement of his copyright unless he shall insert a notice

thereof on the title-page or the page immediately following. The various acts mentioned have been referred to to show to some extent the history and previous condition of the law on the subject under consideration. They are all superseded by the Revised Statutes of the United States, a work undertaken by authority of a statute passed June 27, 1866 (14 U. S. Stat. at Large, 74), and taking effect on the 1st day of December, 1873 (§ 5595). Those statutes provide as follows: Section 4952 provides that the author of any book, map, dramatic composition, etc., on complying with the provisions of the chapter, shall have the sole liberty of publishing and printing the same, and, in the case of a dramatic composition, of publicly representing the same. Section 4953 provides that copyrights shall be granted for the term of twenty-eight years from the time of recording the title thereof in the manner thereafter directed. Section 4956 provides that no person shall be entitled to a copyright unless he shall, before publication, mail to the librarian of congress a printed copy of the title of the book or other article, etc., for which he desires copyright, nor unless, within ten days from publication, he mails two copies of the copyright book or other article to the librarian. Section 4957 provides that, immediately on receipt of the printed copy of the title of the copyright book or other article, the librarian is forthwith to record the same; and that he shall give a copy of the same when required. Section 4959 requires the delivery to the librarian of congress of two copies of the book, within ten days after publication. Section 4960 provides that the proprietor of a copyright book or other article, failing to mail printed copies of the book, etc., is to pay a penalty of \$25. Section 4964, referring to books, provides that if any person, after the recording of the title of any book, shall, without the consent of the proprietor of the copyright first had in writing, print or publish any copy of said book, he shall forfeit the copy, and be liable to an action. Section 4965 makes a similar provision as to maps, charts, etc., and protects them from the time of the recording of the title. Section 4966 provides that any person publicly performing any dramatic composition for which a copyright has been obtained shall be liable to damages. Section 4967 provides that any person who shall print or publish any manuscript without the consent of the author, who is a resident of the United States, shall be liable for all damages occasioned by such publication.

§ 23. *To secure the copyright of a book, etc., two copies must be filed with the librarian of congress within a reasonable time after the printed title of the work has been filed.*

In applying these statutes to the question before us, viz., whether a copyright becomes a perfected right upon the filing of the title of the book or composition with the librarian, or whether a deposit of the book is also necessary to complete that right, two points are apparent. The first is that the letter of the law does not, in any of the statutes cited, former or present, require the book to be filed, to confer a copyright. Under all of the statutes referred to, from that of 1790 to the Revised Statutes, the words of the law refer to filing the title-page and not to the deposit of the book. The second suggestion is, that it seems to be assumed throughout all of the statutes, that a copy of the book will, and must, within a short time after filing the title-page, be filed with the librarian of congress. Of this idea, section 4956 of the Revised Statutes affords an illustration. It had been enacted in the previous sections, that a copyright should be secured to authors, designers and composers; and, in this section, a definition is given, in a negative form, of the persons entitled to the

benefit of the law. "No person shall be entitled to a copyright, unless he shall, before publication, deliver at the office of the librarian of congress, or deposit in the mail, addressed to the librarian of congress, . . . a printed copy of the title of the book, etc., nor unless he shall also, within ten days from the publication thereof, deliver, etc., or deposit, etc., addressed to the librarian, etc., two copies" of the book, etc. Any person shall be entitled to a copyright, who, before publication, first, shall deliver to the librarian a printed copy of the title of the book, and second, shall, within ten days after the publication thereof, deliver to the librarian two copies of the same. The book may not be printed or published when the title-page is filed, and some right (inchoate perhaps) seems intended to be secured as of that date, although an actual printing or publication is not then made. But the expression "before publication" is based upon the idea that a printing or publishing will soon occur. This is put into clear meaning by the next clause of the section, that the author shall not be entitled to copyright, unless, "within ten days from the publication," he shall deliver two copies to the librarian. This means that the author is required to publish his work, and, after he has so published it, and within ten days, he shall deliver two copies to the librarian. It is not a fair interpretation of this section to hold that the filing of the title entitles to a copyright fully and absolutely, and that this may be defeated by a publication and failure to deliver two copies, but, as long as there is no publication, although it continue indefinitely, there is no lapse of the right. This construction is not permitted either by that idea which secures benefits to the author or inventor, upon the theory that the public is to be benefited, as well as himself, by his works, or by the principle pervading all this branch of the laws of patents, trade-marks, and copyrights, that an author or inventor must put his claim into the form of a well defined specification, work or composition, and so place it upon record that he cannot alter it to suit circumstances, and so that other authors and inventors may know precisely what it is that has been written or invented. The idea that an inventor may secure a patent for an invention of which he should not be required to file a specification would not be tolerated. He may file preliminary or precautionary papers until his invention shall be completed, he may amend his specifications, and he may obtain reissues. It was never heard, however, that he could conceal the particulars of his invention, and, by filing a general statement of a discovery or improvement, cut off the rights and claims of others. The principle I conceive to be the same in regard to a copyright, and I hold that, to secure a copyright of a book or a dramatic composition, the work must be published within a reasonable time after the filing of the title-page, and two copies be delivered to the librarian. These two acts are, by the statute, made necessary to be performed, and we can no more take it upon ourselves to say that the latter is not an indispensable requisite to a copyright than we can say it of the former.

§ 24. *All the requisites of the law must be complied with, in order to secure a copyright. Case cited.*

In examining the rights of parties under the statutes of 1790 and of 1802, the court held, in *Wheaton v. Peters*, 8 Pet., 664 (§§ 12-16, *supra*), that, to secure a copyright, all the requisites of the statute must be complied with. "The acts required," say the court, "to be done by an author to secure his right are in the order in which they must naturally transpire. First, the title of the book is to be deposited with the clerk, and the record he makes must be inserted in the first or second page; then the public notice in the newspa-

pers is to be given; and, within six months after the publication of the book, a copy must be deposited in the department of state. A right undoubtedly accrues on the record being made with the clerk and the printing of it, as required; but what is the nature of that right? Is it perfect? If so, the other two requisites are wholly useless. . . . But we are told they are unimportant acts. If they are indeed wholly unimportant, congress acted unwisely in requiring them to be done. But whether they are important or not is not for the court to determine, but the legislature. . . . They are acts which the law requires to be done, and may this court dispense with their performance? . . . The notice could not be published until after the entry with the clerk, nor could the book be deposited with the secretary of state until it was published. But these are acts which are not less important than those which are required to be done previously. They form a part of the title, and, until they are performed, the title is not perfect. The deposit of the book in the department of state may be important to identify it at any future period, should the copyright be contested or an unfounded claim of authorship be asserted."

The language of the Revised Statutes is stronger than that of the act of 1870. By the latter act (16 U. S. Stat. at Large, 213) it was provided that no person should be entitled to a copyright unless he should file the title-page with the librarian, "and, within ten days from the publication thereof, deposit in the mail two copies of such copyright book," etc. In the Revised Statutes two negatives are distinctly specified, and in either case the defect is fatal. He must file his title-page — if he fails in this he fails in all — but he cannot then have his copyright, "unless he shall also" deliver two copies within ten days from publication. In addition to the first he must also perform the second requirement. See the opinion of Sawyer, C. J., in *Parkinson v. Lasalle*, 21 Int. Rev. Rec., 163; *Ewer v. Coxe*, 4 Wash., 490; *Baker v. Taylor*, 2 Blatch., 82.

In this case the title-page was filed on the 26th of October, 1874. The bill, verified in February, 1875, does not allege any publication of the work, or any delivery of copies, or any reason why the same has not been done.

§ 25. *The exclusive right to print and the exclusive right to perform a play depend upon copyright.*

The complainant also insists that this action can be sustained by virtue of section 4966 of the Revised Statutes. That section provides that any person publicly performing any dramatic composition for which a copyright has been obtained, without the consent of the proprietor, shall be liable in damages, as therein stated. If no copyright has been obtained by the complainant for this composition, there has been no violation of a right secured by this section, and he takes nothing under this claim. By the act of August 18, 1856 (11 U. S. Stat. at Large, 138), it was enacted that the granting of a copyright to the author of a dramatic composition should be deemed to confer upon him the sole right to perform and represent the same on any stage during the period for which the copyright was obtained. The same power is found in section 101 of the statutes of 1870 (16 U. S. Stat. at Large, 214). Like the exclusive right to print, the exclusive right to perform, so far as these statutes are concerned, is dependent upon the existence of a copyright.

§ 26. *What is forbidden by section 4967, Revised Statutes.*

The bill alleges, also, that the defendant has, without the consent of the complainant, printed and published eight scenes of his play, and has publicly announced his intention to sell copies of the same. This proceeding is in vio-

lation of section 4967 of the Revised Statutes, which provides that every person who shall print or publish any manuscript without the consent of the author, if such author is a citizen of the United States, or resident therein, shall be liable to the author for all damages occasioned by such injury. The demurrer admits this publication, and the defendant must be restrained from printing or publishing the play.

The defendant seeks to avoid the effect of this allegation by the statement that the bill does not aver that such publication took place after the recording of the title of the complainant's play. This averment is not expressly made, but it must be taken to be the fact, upon the pleadings. It is averred that the complainant composed and wrote the play previously to November 14, 1874; that in October he filed a copy of the title-page, and the librarian recorded the same in the proper book kept for that purpose; that on the 14th of November he caused the same to be performed at Wallack's Theater; that he has never printed the play for circulation; and that the defendant, by means unknown to him, has obtained a knowledge of the contents of the manuscript, and, without his consent, has printed the same. The fair meaning of this is that this action of the defendant took place after the title of the play had been deposited and recorded.

§ 27. *A demurrer does not admit conclusions of law.*

In dealing with this case, I have given no effect to the general allegation of the bill, that the "complainant has complied in all respects with the requirements of the Revised Statutes," that were necessary to enable him to copyright his composition. A demurrer admits allegations of fact only, not allegations or inferences of law. That the allegation in question is not one of fact is well illustrated by this case. Does the allegation include an averment that the complainant has deposited with the librarian printed copies of his work as well as of his title-page? If such deposit is a requirement of the statute, it does include it. If it is not, it does not include it. We are thus directed at once to the solution of a question of law instead of a point of fact. Instead of averring that he has deposited a copy of his title-page, and also two copies of the body of the book, the bill alleges that the complainant has deposited a copy of his title-page, and that he has never published his work, and was, therefore, not required by the statute to deposit copies of the work. This is the legal effect of the averment.

§ 28. *What not a publication or a dedication.*

I am also of the opinion that there has never been a publication by the complainant of this work within the meaning of the statute. The work has not been printed by the author, nor has it been abandoned or dedicated to the public. The author has permitted and procured its representation for his own benefit, and through his selected channels. This does not amount to a publication within the statute, or a dedication to the use of the public. *Coleman v. Wathen*, 5 Term R., 245; *Palmer v. De Witt*, 2 Sweeny, 547; S. C., 47 N. Y., 532; *Bartlette v. Crittenden*, 4 McL., 300; *Roberts v. Myers*, 23 Monthly Law Rep., 396; *Keene v. Kimball*, id., 660. The English decision (*Boucicault v. Delafield*, 9 Law Times, new series, 709), cited to the contrary, is based upon the peculiar language of the English statute, and is not an authority in this case.

§ 29. *A federal court has no right to administer common law relief in a suit between two citizens of the same state. Author's rights at common law.*

I am of the opinion, however, that the defendant has violated the complain-

ant's common law right of ownership in his dramatic composition. The copyright law is intended to preserve to the complainant his exclusive right to multiply copies, to publish, and, in my judgment, only attaches perfectly where a publication is made. The ownership, however, and the right of an author to retain and use his dramatic works, for his personal benefit, without publication, is a common law right. It is recognized and defined by the statutes cited, but it exists independently of the statutes. In *Palmer v. De Witt*, 2 Sweeny, 547, the court says: "Whatever may have been the conflict of judicial opinion upon the effect of copyright laws upon the common law rights of authors, it has never been disputed, that, by the common law, an author has, until publication, a property in his literary work, capable of being held and transmitted, and in the exclusive possession and enjoyment of which he and his assignees will be protected." In the opinion of Monell, justice, in that case, all the authorities are collected and presented. The same case is reported in 47 N. Y., 532. It is there held that the representation of a play on the stage is not such a publication or dedication to the public as authorizes others to print and publish it without the author's permission. The manuscript and the author's right are still within the protection of the law. The common law rights of authors to their literary productions, as they existed at common law, are now recognized. The author has the exclusive right to the first publication of his work, but no exclusive right to multiply copies or control the subsequent issues. This latter right is the creation of the statute of the United States. *Boucicault v. Fox*, 5 Blatch., 97 (§§ 35-39, *infra*); *Boucicault v. Wood*, 7 Am. L. Reg., 550. Assuming this to be so, the difficulty arises that this court has no power to administer common law relief in a suit between citizens of the same state. The courts of the state are the proper, and, usually, the exclusive tribunals for the performance of that duty. The United States have jurisdiction of common law questions when the controversy is between citizens of different states. When the controversy is between citizens of the same state, its jurisdiction is limited to questions arising upon or under the laws or authority of the United States.

The result of my examination is, that the portions of the bill based upon alleged violations of the statute respecting copyright cannot be sustained; that the portions thereof based upon the alleged violation of section 4967 of the Revised Statutes are well laid, and the cause of action therein set forth is a good one; and that the common law right of the complainant to a protection in the performance of his play constitutes a good cause of action, but, by reason of the parties being citizens of the same state, this court has no jurisdiction to enforce the same.

The demurrer must therefore be overruled, and the defendant is allowed to answer within thirty days after service of a copy of the order overruling the demurrer.

CROWE *v.* AIKEN.

(Circuit Court for Illinois: 2 Bissell, 208-215. 1870.)

Opinion by DRUMMOND, J.

STATEMENT OF FACTS.—The bill in this case was filed to prevent the performance in Chicago of a drama called *Mary Warner*, by the defendant, who is manager of a theater. It is based not upon any copyright statutes, but on the principles of the common law and of equity. Mr. Tom Taylor, a subject of the queen of Great Britain, is the author of the drama. The plaintiff is the

husband of an actress of distinction known to the public as Miss Kate J. Bateman. The play, written by Mr. Taylor for Miss Bateman, and the principal character to be personated by her, in pursuance of a contract between the plaintiff and Mr. Taylor made in February, 1869, at London, was not intended for publication, but for representation on the stage. After it was completed the author duly transferred in writing to the plaintiff all his right in the play and in the manuscript thereof, together with the exclusive right to its representation on the stage in the United States for five years from June 1, 1869. The manuscript was accordingly delivered to the plaintiff, and the play was represented at the Haymarket theater, in London, in June, 1869. Afterward the plaintiff and his wife came to the United States, and Mary Warner has been performed at Booth's theater in the city of New York.

The foregoing facts do not appear to be controverted. The bill alleges that the play has always been kept in manuscript; that it has never been printed by Mr. Taylor, by the plaintiff, nor by Miss Bateman, nor with the consent or acquiescence of any one of them, nor published with the consent or acquiescence of any one of them, otherwise than by a representation on the stage, and that the defendant did not produce it at his theater by means of the memory of those who had witnessed its representations on the stage, but by a copy wrongfully and surreptitiously obtained from the manuscript, or from a printed copy wrongfully and fraudulently printed. An injunction was issued by the court, and the performance of Mary Warner by the defendant's company stopped. The defendant now appears and moves to dissolve the injunction.

The motion has been fully argued by the counsel of the defendant upon two grounds: *First*, the law of the case as settled in England and in this country. *Second*, on the facts contained in the affidavits of Robert M. De Witt and Charles J. Clarke, both of New York.

The affidavit of De Witt states that he furnished the defendant with a copy of the play used by him; that he procured it from a person in London, on or about the 29th of July, 1869, who obtained the same only from repeated representations on the stage at the Haymarket theater; that there was no restriction or prohibition against any of the spectators using such play as they saw fit. He also states he is advised that by section 20 of 5 and 6 Victoria, chapter 45, "The first representation or performance of any dramatic piece in England is deemed equivalent to the first publication of a book."

The affidavit of Clarke states that the play of Mary Warner was in print in the city of New York as early as August, 1869; that he bought a printed copy of the play at a public news-stand in New York, where the same was publicly exposed for sale.

The copy furnished to the defendant has been exhibited in court. It is not in the usual form of a published play, but consists of printed slips fastened together in pamphlet form, with plats and stage directions as if for dramatic use only.

Various affidavits have been introduced by the plaintiff, from which it is apparent that the play of Mary Warner has never been printed with the knowledge or consent of Mr. Taylor, the plaintiff, nor Miss Bateman. It is not for sale generally in New York, and not at all in England. It is a fair inference, I think, from all that appears in the case, that the only printed copy in evidence was printed by Mr. De Witt, or under his direction, and is kept for sale at a high price to the theatrical managers. Mr. Clarke's affidavit was made on the 14th of December, and the copy referred to by him

may have been, and probably was, purchased directly or indirectly of De Witt or through his instigation, and as he does not state when, it may have been since this bill was filed.

It would seem, in answer to the allegations of the bill, the defendant ought to show that his copy of the play came from a printed or other copy authorized by the author or his assignee or from the memory of those present when the play was performed. The manner in which the play was procured in London is rather vaguely stated. It was from repeated representations only. But was it from the memory of those who heard it performed, or from phonographic reporters? The statement is entirely consistent with the latter source of information.

§ 30. *The common law right of property of an author in his work previous to publication.*

The author of any literary or dramatic work is the sole proprietor of the manuscript and its contents, and of copies of the same, independently of legislation, so long as he does not publish it, or part with the right of property. This is called a common law right, and exists irrespective of copyright statutes. This right of property he can transfer, and a court of equity will protect him or his assignee, in a proper case, just as it will the owner of any other species of property. Those judges who maintained this common law right in the cases of *Miller v. Taylor*, and in *Donaldson v. Becket*, decided a hundred years ago, it has always been thought, had the strength of the argument on their side in the great discussion to which they gave rise. Subject to the qualification stated, it has been generally admitted in this country.

§ 31. *The representation of a play on the stage is not at common law a publication.*

Mr. Taylor, then, was the proprietor of the drama *Mary Warner* when finished, and when transferred to the plaintiff the latter became the proprietor on the terms of the transfer. Has the right of property been lost?

It is conceded that it would be lost by any general publication of the play by the proprietor which could be regarded as a dedication to the public, but, save this, it is difficult to fix on any rule which shall meet the case. The giving of a copy or of several copies of a manuscript will not necessarily be a publication. The representation of a play on the stage was decided in England, before the statutes of 5 and 6 Victoria, not to be a publication.

There are cases in some of the courts of this country which hold that the representation of a play is a qualified publication, viz.: to the extent in which the memory of the auditors can retain its language, scenery or incidents, and if it is reproduced only in that way the author of the work has no remedy. Of these cases it may perhaps be said that, in some instances, the court has not looked very rigidly into the proofs, considering the intrinsic difficulty of the subject. Indeed, as some of the affidavits in this case show, and as all experience proves, to write out a play from memory alone is well nigh impossible.

None of the cases cited by counsel have gone so far as to decide that a reporter can take down the words of an unpublished play as they are uttered by the actors, and thus make it public against the wishes of the author, while, on the other hand, it has been frequently held that such action of a reporter can be prevented because not warranted by express or implied conditions. In some instances stress has been laid on the fact of representations of a play being had without restriction, and it is claimed *Mary Warner* was so

produced in England. This, however, is denied, and it is asserted public notice was given both in London and in New York of the private property in the play. It is not easy to see, however, how a notice can have any effect upon the rights of the author or of the auditor. If the latter had the right to carry the play away in his memory, or to take it down phonographically, and, in either case, to use or publish it, the notice prohibiting it could not affect or change that right.

§ 32. *The statute of 8 Anne took away the common law property of an author in a published book.*

The principal reason, probably, why courts are so much inclined to construe with great strictness the common law right of an author in a manuscript work, partially imparted to the public, is because the right is perpetual. All claims under copyright statutes are for a limited time only. This reason may have had great weight in the discussion which took place in England in the two cases already referred to, and the result of which was the adoption of the principle that the statute of 8 Anne, chapter 19, took away the common law property of an author in a published work. But this common law right is always under the control of the legislative power, and it has been exercised in England; and even under the qualified publication of a play by representation, there can be no doubt that under the rule now established in the courts it might become public property, in the manner heretofore stated, after repeated representations.

§ 33. *The statute 5 and 6 Victoria does not affect the rights of the author of a play in the United States.*

There was some question whether the author of a play had, at common law, the sole right of representation; but so long as the play existed in manuscript, and was unpublished, and not in some way dedicated to the public, the sole right of representation or performance would seem to follow from the exclusive right of property. But the twentieth section of the statute of 5 and 6 Victoria, chapter 45, put an end to this question, by declaring that the first public representation or performance of any dramatic piece should be deemed equivalent, in the construction of the act, to the first publication of any book; and I understand it has been decided in England that the public performance, even in a foreign country, of a play of which an English subject is the author, defeats his claim to a copyright under the British statutes.

It is insisted that as by this statute representation was publication, the play *Mary Warner*, by performance in England, was published there, and all right of property in the play was consequently lost, as well there as in the United States. This necessarily leads to the conclusion, and that is substantially the position of defendant's counsel, that there is no right of property in this country in the play, except that conferred by the statutes, and particularly that of August 18, 1856. 11 U. S. Statutes at Large, 138. I do not understand that the authorities have gone that far, and it does not follow because his claim under the statutes is gone, that everything is lost. He may still stand on his natural, inherent right as the author and creator of the play, and maintain that right until in some mode, in reason or by statute, it is dedicated to the public. It cannot be true in this country that the lecturer has no rights of property in his unpublished and unprinted lecture; that the clergyman has no rights of property in his unpublished sermon — the work, it may be, in each case, of weeks of thought and labor — merely because he has repeated it to an audience. And I cannot comprehend why, because congress has legislated

about dramatic compositions, the author of a play should occupy different ground. The object of all copyright laws is to protect and regulate property in the product of the brain, not to annihilate it.

There can be no doubt of the authority of congress to legislate on the subject of literary property, and to prescribe the terms upon which copyrights shall be granted, and when it has so legislated it may be truly said to create those rights under the law; and this is the sense of the language of the supreme court in the case of *Wheaton v. Peters*, 8 Pet., 661 (§§ 12–16, *supra*), that congress, instead of sanctioning an existing right, created it, because the court admits the right at common law. Neither, perhaps, can there be any doubt that congress can declare what sort of publications of a literary or dramatic work shall constitute a dedication to the public.

It follows from what has been said that a definition of the word representation by a British statute is not operative as such in this country, and in all the cases which have arisen here recently upon the rights of authors to unpublished plays written by Englishmen, the objection that their rights in this country were destroyed in consequence of the clause already referred to in section 20 of 5 and 6 Victoria, chapter 45, seems not to have been taken either by counsel or the court.

§ 34. *The representation of a play does not dedicate it to public uses.*

I am of opinion that upon principle and authority the author, or his assignee, of an unpublished play, has a right of property in the manuscript and its incorporeal contents; that is, in the words, ideas, sentiments, characters, dialogue, descriptions, and their connection, independent of statutes, and that a court of equity can protect it. I am also of opinion that as the law now exists in this country, the mere representation of a play does not of itself dedicate it to the public, except, possibly, so far as those who witness its performance can recollect it, and that the spectators have not the right to secure its reproduction by phonographic or other *verbatim* report, independent of memory.

These being my conclusions, the only other question is whether the defendant has brought himself within the condition named; and, after what has been said, it necessarily follows that in my judgment he has not. I cannot doubt that De Witt obtained the copy of the play of Mary Warner, which he furnished to the defendant in this case, either in whole or in part, through a short-hand reporter, or in some other unauthorized or wrongful way, and not by memory only. The case will therefore go to proofs in the regular way, and the injunction stand until the hearing.

BOUCICAULT v. FOX.

(Circuit Court for New York: 5 Blatchford, 87–102. 1862.)

Opinion by SHIPMAN, J.

STATEMENT OF FACTS.—The plaintiff, who is an actor and a dramatic author, made an arrangement with one Stuart, then the lessee of the Winter Garden theater in the city of New York, by which the former was to become the stage manager and general director of the theater. The particulars of this arrangement are of no importance here, as the undisputed proof in the case is that it was either never definitely settled in all its terms, or, if it was, that it was abandoned before the production of the play in question. Under that arrangement, however, such as it was, the plaintiff performed the duties of

stage manager for some weeks, during which the theater was at first successful, but, the receipts falling off, a new arrangement was made, under which "The Octoroon" was written and brought out by the plaintiff. It appears incidentally in the evidence that Stuart had, some time before, assigned his interest as lessee of the theater to one Fields, in trust for the benefit of certain of his creditors, although he continued to direct its operations, with the approbation and under the control of his trustee. The agreement under which "The Octoroon" was produced was, therefore, made with the assent of this trustee, and the assignment is here mentioned only for the purpose of explaining that fact, as it has no bearing on the merits of the controversy. By one of the terms of this agreement the plaintiff was to write this play, and he and his wife were to perform in it as long as it would run at the Winter Garden. He wrote it, and it was brought out about the 6th of December, 1859. The plaintiff and his wife took part in performing it until the 13th of the same month, when they withdrew, and the plaintiff declined to continue his own or his wife's services any longer. The play was, however, kept on the stage at this theater for several weeks after, although the plaintiff's connection with the theater had ceased on the 13th of December. On the 12th of December the plaintiff took out a copyright for the play. On the 17th of December he commenced a suit in equity in this court to restrain Stuart and Fields from any further representations of the piece. The performance of the play continued at the Winter Garden until Saturday evening, the 21st of January, 1860, when it was withdrawn, and on the Monday evening following it was brought out by the defendants at the New Bowery theater, where it was performed for nine successive nights. It is for these nine performances at the latter theater that this action was brought.

While the performance of the play was proceeding at the Winter Garden, a negotiation was opened between the defendants through their treasurer and agent, one Tryon, and Stuart, for the purchase of whatever rights the latter had in the manuscript, and also for the purchase of the scenery by which the performance was illustrated, which resulted in a verbal agreement between them, by which the defendants were to have all the rights of Stuart to the manuscript, and in its representation, for \$100. A further sum was agreed on for the scenery. The play was then announced for the New Bowery theater by the defendants in the following card: "To the public: Messrs. Fox and Lingard beg to inform their patrons and the public that they have purchased of W. Stuart, Esq., the proprietor of the 'Winter Garden,' the successful drama of 'The Octoroon,' with all the scenery, properties, music, machinery and everything appertaining to the piece, which will be produced in the," etc. During the negotiations between the defendants' agent and Stuart, the latter informed him that his right to the play was in suit, then pending, but the agent insisted that the right to the manuscript and to the performance of the play was in Stuart, and concluded the alleged purchase and received from Stuart a copy, the original being still in the hands of the plaintiff. This copy had been taken by Stuart (whether with or without the consent of the plaintiff does not appear) before the latter withdrew from the Winter Garden, as Stuart says, "for fear of accidents," and it would seem that it was from this copy, whenever reference to it was needed, that the piece was performed at this theater after the plaintiff withdrew.

On the trial the plaintiff proved the performance of the piece at the defendants' theater for nine nights, from the 23d of January to the 1st of February,

inclusive. On this point there was no opposing proof. The plaintiff also proved, from the record of copyrights in the possession of the clerk of the district court for the southern district of New York, that he obtained a copyright for the play on the 12th of December, 1859. The record of the suit in equity brought by the plaintiff against Stuart and Fields was also offered in evidence for the purpose of fixing the dates of the commencement and termination of that suit, to which the defendants objected. The court admitted the evidence only for the purpose for which it was offered, and the defendants excepted. This exception has not been noticed, on this argument, on the ground, no doubt, that the subsequent facts proved by the defendants' witness, Stuart, that such a suit was pending, and that he communicated the fact to the agent of the defendants when he proposed to purchase the play, renders the dates proved from this record clearly relevant. This exception requires, therefore, no further notice.

§ 35. *The United States courts are not empowered to grant a nonsuit where evidence has been taken in the cause.*

The plaintiff having rested his case, the defendants moved for a nonsuit, on the ground that the declaration did not allege that any copyright of the play had ever been taken out by the plaintiff, and on the further ground that the plaintiff had, by his own showing, by performing the piece for hire, dedicated the right to others, and abandoned his right to play the piece and to a copyright, except as regarded the mere right to print and publish the same. The court overruled this motion, on the ground that the courts of the United States are not empowered to grant nonsuits in cases where evidence has been taken; to which the defendants excepted. This exception, too, has not been mentioned on the argument. The ruling of the court was in conformity to well-settled authority and long practice. *Doe v. Grymes*, 1 Pet., 469; *D'Wolf v. Rabaud*, id., 476, 497 (CONTRACTS, §§ 1772-75).

§ 36. *Whenever matter which is in print or writing is presented to a court or jury for construction, the documents themselves must be produced, or reasons shown for their non-production.*

The defendants then introduced in evidence, among other things, the agreement between Stuart and the defendants, through their agent, for the purchase of the play, which has already been mentioned. They also proved that bills and advertisements announcing the play at the New Bowery theater stated that it was to be performed there by permission of Stuart, and that the plaintiff saw some of the bills and posters making this announcement, and did not object to or forbid the performance. The defendants also called as a witness John S. Dasalle, who stated that he was one of the editors of the Sunday Times newspaper; that he had seen the performance of "The Octoroon;" that he knew a novel called "The Quadroon," written and published by Mayne Reid; that it was published before "The Octoroon" was heard of; and that he was familiar with its contents. The defendants' counsel then put the following question to this witness: "Can you state whether the incidents contained in 'The Quadroon' are the same as those contained in the drama of 'The Octoroon?'" This question was objected to, on the ground that the book itself was not produced, and the question was excluded, and an exception was taken. The witness was then asked if he could state, from recollection, any passages contained in "The Quadroon" which were similar to those in "The Octoroon." This question was objected to, and the court excluded it, to which the defendants excepted. The defendants then offered to prove, by the statements of

the witness, that the play was dramatized from the book, and was not an original play. This evidence, in this form, was objected to and excluded. Finally, the defendants produced the book and asked the witness to take it and say whether the scenery, incidents and language were not substantially the same as those of the play. This question, also, was excluded. As these rulings were excepted to, and have been referred to on the argument, we will notice them here. Of all except the last it needs only to be said that neither the book nor the play had been produced in court. The book was in print and could easily have been obtained. To undertake to prove a part of its contents, or to ask the witness whether such part was identical with or resembled passages in the play, was wholly inadmissible under any known rule of evidence. Whenever matter which is in print or in writing is presented to a court or a jury, for the purposes of construction, or to establish proof of identity, resemblance or dissimilarity, the documents themselves must be presented for the inspection of the triers, or, on proper reason for their non-production being shown, their contents must be proved. The rule is trite, familiar and imperative. Nor was the difficulty removed by producing the book, prior to the last question put to the witness. The witness was asked to take the book and say whether the scenery, incidents and language were not substantially the same as those of the play. The play had not been produced, nor had its contents been proved; nor was the witness called upon to give any passage from it, for comparison with any part of the book. To take the opinion of the witness, under these circumstances, would be to substitute his judgment for that of the triers, and that, too, in the absence of the evidence upon which his judgment was founded. The rulings of the court excluding these questions were therefore correct.

At the close of the evidence the defendants requested the court to charge the jury as follows: 1. That the employment of the plaintiff by Stuart, to write the play, and its production and performance by the plaintiff, for hire, was a dedication to the profession of players, of the right to play the piece; 2. That the writing the play for hire and compensation paid to the author, and its delivery to Stuart, gave not only the title to the play, but a right to its use, as a literary composition; 3. That the voluntary public performance of the play, for hire, is such a publication as to amount to a dedication of the play to the use of the public; 4. That it was the duty of the plaintiff, under the circumstances of this case, to have given notice of his dissent to its performance by the defendants, and his failure to do so estops him from alleging a want of assent. This last request was subsequently modified, and the court was asked to charge that if the jury were satisfied that the plaintiff daily, or during the time, frequently saw one of the defendants at the place at which the piece was being performed, and saw the announcement of it, and knew that it was being played there, it was, as matter of law, his duty to express his dissent from the playing; otherwise the jury have the right, if they think proper, to draw the inference that it was with his assent. The court refused to charge according to the several requests of the defendants, to which refusal they excepted. They also excepted to the charge in the following particulars: 1. That the piece was an original play, and that the plaintiff was the author and entitled to a copyright; 2. That the plaintiff was entitled to the literary property in the play; 3. That the neglect to dissent did not constitute assent; 4. That there was no evidence of the abandonment of the play by the plaintiff; 5. That Stuart had no right that he could sell to the defendants in this suit. The charge of the

court will sufficiently appear, as we proceed to examine the following propositions, which condense the points presented in this controversy. The last of these propositions is not strictly in the case, but, by a liberal arrangement of counsel, it is submitted for our examination. These points are: 1. Was this, on the undisputed evidence in the case, an original play, and the production of the plaintiff? 2. Was the literary property in the composition, and the exclusive right to its representation, in the plaintiff? 3. Is there any evidence that he had abandoned to the public any of his rights? 4. Is there any evidence, except that which was submitted to the jury, that he assented to the performance of the play by the defendants? 5. By a careful comparison of the book called "The Quadroon" with this play, is there any evidence disclosed of a want of originality in the latter, which would be sufficient to support a verdict for the defendants, founded upon that evidence?

The first point we have to consider relates to the authorship of the play. On this, the evidence of Stuart, the defendants' witness, is clear and decisive, at least sufficiently so to establish a *prima facie* case, both as to authorship and originality. He states that the play was written by the plaintiff, under the special arrangement already referred to. It was to be a new play, and as such was put on the stage and had a successful run. Its originality does not appear to have been doubted by Stuart, who was familiar with the current dramatic literature of the day. It was virtually conceded on the trial, that the plaintiff constructed and wrote the play, although it was insisted that he drew his materials from "The Quadroon," to such an extent, and with so little modification, as to destroy his claim to originality. But the evidence offered in support of this latter claim was, we think, properly ruled out for the reasons already given. A clear *prima facie* case on this point having been made out, and nothing having been shown to rebut it, there would have been no error if the charge had assumed the fact as proved. This, however, was not the precise form of the charge. The language used was, that "if it was the original production of the plaintiff, the title was in him." But it is unnecessary to discuss this point at any length. A verdict for the defendants, resting on this feature of the case and on the evidence as it stood, could not be sustained. It would be clearly a verdict against evidence. The question whether or not, in point of fact, the use made of the materials of "The Quadroon," in the construction of the piece, was such as to deny to the latter the claim of originality, will be hereafter considered.

§ 37. *The title to literary property is in the author, and remains in him until transferred by contract to another.*

Our next inquiry is: Was the literary property in the composition, and the exclusive right to its representation, in the plaintiff? The questions under this head relate to the bearing on the plaintiff's title of the fact that he wrote the drama while in the employ of Stuart, and for hire, and also to the proof of his copyright. It is proper here to revert to the agreement under which this play was produced by the author. That agreement was, that he should write this play and, perhaps, some other plays, and that he should contribute his and his wife's services at the Winter Garden theater, as long as the plays would run there, and receive half the profits as a compensation. This cannot be construed into a contract conferring upon Stuart, or any one else, the legal or equitable title to this drama. The title to literary property is in the author whose intellect has given birth to the thoughts and wrought them into the composition, unless he has transferred that title, by contract, to an-

other. In the present case, no such contract is proved. The most that could possibly be said in regard to the right of Stuart, or his trustee, in the play, is that the arrangement entitled them to have it performed at the Winter Garden as long as it would run. There is not the slightest foundation upon which they, or either of them, can rest a claim to the literary property in the manuscript. That property was in the plaintiff, subject, at most, to a license or privilege, in favor of Stuart and Fields, to have the piece performed at the Winter Garden. Whether the plaintiff was guilty of a breach of that part of his agreement which bound him to bestow his own and his wife's services, we need not inquire here. Such a breach, if proved, would not vest the proprietors of the theater with the title to "The Octoroon." A man's intellectual productions are peculiarly his own, and, although they may have been brought forth by the author while in the general employment of another, yet he will not be deemed to have parted with his right and transferred it to his employer, unless a valid agreement to that effect is adduced. Publishers, when they employ authors in particular literary enterprises, of course settle, in the terms of their contracts, the rights of each party and the ownership of the copyright. This was not the case of writing a book for publication and general circulation. The play was to be produced, so far as Stuart and Fields were concerned, for a special purpose, and their rights are co-extensive only with that special purpose, which was that the play should be brought out by the plaintiff at the Winter Garden, and be performed as long as it would run. The contract cannot, by the most liberal construction, be expanded beyond this. Under these circumstances, the plaintiff was entitled to the copyright which he obtained. The proof of the obtaining of such copyright made a clear *prima facie* case, and no countervailing evidence was offered. The evidence in the present case is the same as in the case of *Roberts v. Myers*, 23 Monthly Law Rep., 396.

§ 38. *The public performance of a manuscript play by the author thereof cannot be regarded as any evidence of his abandonment of such manuscript to the public or to the profession of players.*

We come now to the third proposition: Is there any evidence in the case that the plaintiff had abandoned his rights to the public? It appears, in the proof, that the play was performed at the Winter Garden under the agreement, and, of course, with the consent of the plaintiff, for some six nights before the copyright was taken out. This is all the evidence there is of an abandonment to the public. From this the defendants argue that such a public representation for profit, prior to the taking out of a copyright, was a dedication to the public, or at least the theatrical public, including the profession of players, of the right to represent the play on the stage. No printed copy of the play having ever been circulated, it is not seriously contended that the plaintiff deprived himself of the right to print and publish it. This naturally brings us to an examination of the statute upon which the plaintiff rests for protection, and upon which his suit is founded. It is the act of August 18, 1856 (11 U. S. Stat. at Large, 138), and provides that "any copyright hereafter granted under the laws of the United States, to the author of any dramatic composition designed or suited for public representation, shall be deemed and taken to confer upon the said author or proprietor, his heirs or assigns, along with the sole right to print and publish the said composition, the sole right also to act, perform or represent the same, or cause it to be acted, performed or represented, on any stage or public place, during the whole period for which the copyright is obtained."

The object of this statute is apparent, at a glance. It is to secure to the author of a copyrighted play the sole right to its performance in any public place, after it is printed. While it is in manuscript he needs no protection. Manuscripts are protected by the common law, as well as by the ninth section of the act of February 3, 1831 (4 U. S. Stat. at Large, 438). *Wheaton v. Peters*, 8 Pet., 591, 657 (§§ 12-16, *supra*); *Jones v. Thorne*, 1 N. Y. Leg. Obs., 408; *Bartlett v. Crittenden*, 4 McL., 300; 5 McL., 32, 36. Whether a copyright had been taken out by the plaintiff or not, the defendants would have had no right to the use of his manuscript play; and, although they had obtained a copy without the consent of the plaintiff, a court of equity would have promptly restrained them from any use of such copy, beyond what the plaintiff had authorized. The reading of a manuscript lecture or discourse, or the performance of a manuscript play in public, by the author, does not confer upon the hearer any title to the manuscript, or any right to a copy, or to the unauthorized use of a copy, which may surreptitiously, or accidentally, pass into his hands. The jurisdiction of the courts of the United States is, indeed, confined, by the ninth section of the act of February 3, 1831, to cases of threatened or actual printing and publication, and would probably not include the public performance of a manuscript play, unless, indeed, the parties should be citizens of different states. But the jurisdiction of the state courts, in suits to protect the owners of manuscripts, is complete in all other emergencies. The plaintiff, then, being the original author of this play, his performance of it in public, or the performance of it by the company at the Winter Garden, with his consent, for a compensation to him, cannot be regarded as any evidence of his abandonment of the manuscript to the public, or to the profession of players. The copy taken by Stuart, whether with or without the consent of the author, was evidently intended by the latter for no other use than that connected with its performance at the Winter Garden, and Stuart had no right to put it to any other use, and could confer none upon the defendants. The common law protected this play, so long as it was in manuscript, or, at least, it was protected by equitable remedies. *Macklin v. Richardson*, Amb. R., 694; *Curtis on Copyright*, 103. The act of February 3, 1831, protects the right of the author to print and publish it. The act of August 18, 1856, superadds to the rights of the author, the exclusive right to the public representation of the play, after the copyright for printing and publishing it has been granted. The only effect of this act on the rights of the author, while his production is in manuscript, is, that it gives him a remedy at law against a party, after he has taken out his copyright, when, before, he possibly had only a remedy in equity. There can be no evidence of abandonment to the public of any rights growing out of the authorship of a manuscript, drawn from the mere fact that the manuscript has, by the consent and procurement of the author, been read in public by him, or another, or recited, or represented, by the elaborate performances and showy decorations of the stage. If the reading, recitation or performance is conducted by his direction, by his agents, for his benefit and profit, with the sanction of the law, how can it be said to be evidence of his intention to abandon his production to the public? Suppose Mrs. Kemble were to read, in her unrivaled manner, a drama of her own production, would the reading be a dedication to the public, and authorize any elocutionist to read it, who could obtain a copy, against the consent of the author? How would it change the matter, if she should, instead of reading the play, have it brought out by a company at Wallack's or the Winter Garden, with all the

embellishments which the stage can lend? The true doctrine is, that the literary property in the manuscript continues in the author so long as he exercises control over it, or has the right to control it; and, until its publication, no one has a right to its use or that of its contents, without his consent. Therefore, any special use of it by him, in public, for his own benefit, is a use perfectly consistent with his exclusive right to its control, and is no evidence of abandonment. *Roberts v. Myers*, 23 Monthly Law Rep., 396.

As to the fourth proposition very little need be said. It appeared in proof that the plaintiff several times passed the theater of the defendants during the time the play was in progress there, and that it was announced by large bill posters, which he must have seen. Indeed, it is conceded that while the piece was being played there the plaintiff knew it, and did not object, during the nine nights in question. The court was asked to charge the jury that, as matter of law, he ought to have objected, and that his failure to do so would warrant the jury in inferring his assent to the performance. If the defendants had been ignorant of the plaintiff's right, and had gone on under a misapprehension of the facts, or if they had supposed he assented, they might make this claim with a better grace. But the evidence shows conclusively that Stuart distinctly informed the defendants' agent, when he went to purchase the play, that his (Stuart's) right to it was disputed by the plaintiff in a suit then pending. It shows further that, instead of relying on the consent of the plaintiff, they impliedly disclaimed it, by publicly announcing in their cards and bill posters that the piece was purchased exclusively from Stuart, and was played with his consent. The plaintiff would be entitled to have a verdict against him on the ground of his assent, if one had been rendered against him on the evidence in this case, promptly set aside. The defendants knew before their purchase that the plaintiff was contesting, in a court of equity, Stuart's right to the play, even his right to perform it at the Winter Garden, and when they purchased it from him with this knowledge they took with it the most solemn form of dissent known to the law, and a notice that, if they played the piece, relying on Stuart's conveyance, it was at their own peril. But the jury were not directed on this point of assent, although it is conceived they might properly have been, on the ground that the proof of dissent was clear. They were instructed that if the plaintiff assented to the performance by the defendants then he could not recover; and that, in determining whether he did thus assent or not, they could take into consideration his silence when the piece was being performed at the New Bowery theater in connection with the other evidence. There was no error on this point.

§ 39. *Test of originality of literary productions.*

We come now to the last topic in this controversy, which relates to the originality of this drama, when compared with the novel of Mayne Reid, called "The Quadroon." Though, as already remarked, not strictly in the record, yet the question is one little fitted for investigation by a jury, and, for reasons already given, was not submitted to them. The counsel, however, have consented that the court may compare the two works, and, if the play cannot be sustained as an original production, then the verdict is to be set aside and a new trial is to be granted.

It is difficult to lay down any precise rule which can be applied, in all cases, as a test of originality. A work may be original in the eye of the law when it is not in the eye of the critic. Mr. Curtis, in his instructive work on copy-

right, well remarks: "A book may also be original, in the sense of the law, although the materials of which it is composed, the hints and sources from which its matter was derived, can all be traced out in former works, provided the author has exercised selection, arrangement and combination, and has thereby produced anything new." Curtis on Copyright, p. 177. These are just reflections, and a rule fully as liberal as that stated by the writer must be applied to dramatic compositions where the materials on which the author works are often old and well known. Many of the plays of Shakespeare are framed out of materials which existed long before his time, and were gathered by him from ancient chronicles and other dusty receptacles of antiquated literature. But these dry bones of the past the poet combined anew, pouring over them the effulgence of his own genius, until they were quickened with a new life and adorned with a hitherto unknown beauty. Of this, Macbeth is an instance. The original tale, from Hollingshed, whether a fable or a verity, was of very indifferent quality; but Shakspeare, as remarked by Sir Walter Scott, "adorned it with a lustre similar to that with which a level beam of the sun often invests some fragment of glass, which, though shining at a distance with the lustre of a diamond, is, by a near investigation, discovered to be of no worth or estimation."

A thorough comparison of the novel and the play in this case will clearly show that the latter is an original work, in the sense of the law. It is not a copy of "The Quadroon," nor an abridgment of it. The most that can be said in favor of their similarity is, that the *dramatis personæ* of the play are, a portion of them at least, suggested by those that figure in the novel. The prominent characters in each have some features in common, and move in and are acted upon by the same social organization; but there are points of marked contrast, both in the fictitious persons sketched, and the vicissitudes they experience. Some of the actors in the drama are almost wholly dissimilar to their supposed prototypes in the novel; and, were it not for their relation to the central figure, which is a quadroon girl in both the book and the play, their resemblance would hardly have been noticed. The author of "The Quadroon" has no just cause of complaint against this plaintiff. His vested rights have not been invaded by the latter, and the policy of the law is to encourage literary labor, so far as it can be done without infringing upon the rights already granted to others. Plagiarism and servile imitations are not to be encouraged. Those literary thefts which are committed upon copyrighted works, the law promptly suppresses. The mere copyist, or the slavish imitator who reproduces old materials, substantially in their old form, without new combination, is entitled to no protection under the statute. But the law rests upon no code of comparative criticism. It protects alike the humblest efforts at instruction or amusement, the dull productions of plodding mediocrity, and the most original and imposing displays of intellectual power. This law should be liberally construed in favor of authors, and leaving their comparative merits to be settled by critics, at the tribunal of public opinion, it should protect and encourage their labors. The fruits of their literary toils should be secured to them by the highest title, for they keep open the springs of thought which feed the intellectual life of the nation.

We are of the opinion that there is no error in the record, and that the validity of the copyright is fully supported by the originality of the play. A new trial is denied.

§ 40. There is no common law of copyright in the United States. *Stevens v. Gladding*, 17 How., 447 (§§ 387-89).

§ 41. Copyright exists only by virtue of the statute, and is not a common law right. *Clayton v. Stone*,* 2 Paine, 382; 1 Leg. Int. & Rev., 69.

§ 42. Property in manuscript.—Before the publication of a play the author is entitled at common law, and independently of the statute, to the exclusive right of property in the manuscript. He may sell it or authorize its performance by others, but he may, by permitting it to be acted for a long time without license or objection, lose such exclusive privilege. After publication he must rely on the statute for protection. *Boucicault v. Wood*,* 2 Biss., 34; 7 Am. L. Reg. (N. S.), 539.

§ 43. State laws.—An author, or his assignee, is entitled to a copyright under the laws of congress, irrespective of the provisions of a state constitution. *Little v. Gould*,* 2 Blatch., 362.

§ 44. An equitable title to a copyright, standing in the name of another, will be protected by a court of equity by an injunction. *Little v. Gould*, 2 Blatch., 165 (§§ 115-23).

§ 45. Citizenship.—Even under section 86 of the act of July 8, 1870, only the works of artists and authors who are citizens of the United States can be copyrighted. *Yuengling v. Schile*, 12 Fed. R., 97; 2 Blatch., 452 (§§ 141-44).

§ 46. Resident.—A person is a resident of the United States, within the meaning of the copyright acts, if he is here with an existing intention of remaining here, though he is a boarder or lodger and does not reside in his own house. *Boucicault v. Woods*,* 2 Biss., 34; 7 Am. L. Reg. (N. S.), 539.

§ 47. A person who is a mere transient visitor in this country, whose family, business, intentions and relations are all abroad, is not a resident of this country within the meaning of the copyright laws of this country; and the fact of the filing of his intention to become a citizen is immaterial. *Carey v. Collier*,* 56 Niles' Reg., 362.

§ 48. Photographs.—The act of congress providing for the copyright of photographs is not so obviously unconstitutional that it will be so declared by a *nisi prius* court. *Sarony v. Burrow-Giles Lithographic Co.*,* 17 Fed. R., 591.

§ 49. A label cannot properly be copyrighted if used before filed in the patent office. *Marsh v. Warren*,* 14 Blatch., 263.

§ 50. It seems that labels for goods may be copyrighted. *Blackwell v. Armistad*,* 3 Hughes, 163.

§ 51. Laws of New York construed.—Section 22 of article VI of the New York constitution of 1846, relating to the publication of judicial decisions, simply confers on all persons the original right to prepare and print them, but after they have been prepared and printed another may not appropriate the work and reprint it. This section is not therefore repugnant to the constitution of the United States. *Little v. Gould*, 2 Blatch., 165 (§§ 115-23).

§ 52. Section 2 of the act of the New York legislature of April 9, 1850, declaring that the copyright of any notes and references made by any state reporter to the reports of the court of appeals should be vested in the secretary of state for the benefit of the people of the state, is not repugnant to section 22, article VI, of the state constitution of 1846. *Ibid.*

§ 53. The word "notes" in that part of the act of the legislature of New York of April 9, 1850, which provides that the copyright of the notes and references made by the state reporter to the decisions of the court of appeals should be taken by the secretary of state, includes the head-notes stating the points decided, and the reporter's statement of the argument, together with such foot-notes as are prepared by the reporter, so far as they pertain to the business of reporting such decisions, but no further. *Ibid.*

§ 54. Official letters written to the government or a department thereof, so far as the public are concerned, are the private property of the writer. *Folsom v. Marsh*, 2 Story, 100 (§§ 249-56).

§ 55. Private letters.—The author of any letters, and his representatives, whether such letters are literary compositions, or familiar letters, or letters of business, possess the sole and exclusive copyright therein, and no person, either those to whom they are addressed, or other persons, have any right or authority to publish the same upon their own account, or for their own benefit. The only right of publication which the persons to whom they are addressed have in them is to use them upon such occasions as require or justify the publication or public use of them; and third persons not in privity with the writer or receiver have no rights of publication. *Ibid.*

§ 56. The fact that the letters of Washington have been purchased by act of congress, and have become national property, does not give private persons the right to publish them, especially as they were purchased subject to an existing copyright. *Ibid.*

§ 57. Suit by assignee.—The assignee of the exclusive right of acting a certain play in the United States, excepting in five specified cities, for the term of one year, may maintain an

action for an infringement in his own name without joining the author. *Roberts v. Myers*,* 23 Law Rep., 396; 13 Law Rep. (N. S.), 396.

§ 58. No pseudonym can give an author any rights which he would not have under his own name. So a publisher who has collected uncopyrighted published writings of an author may publish them as the work of the author, and may apply the author's pseudonym thereto in the same manner that he might apply the author's name. *Clemens v. Belford*,* 11 Biss., 459; 14 Fed. R., 728; 27 Alb. L. J., 293; 29 Int. Rev. Rec., 53; 15 Rep., 227.

§ 59. An assignment by the foreign author of a play of the right to perform the same in this country is at law inoperative, but in equity it is valid, for this country, for such literary property as could exist in his composition. *Keene v. Wheatley*,* 4 Phila., 157; 9 Am. L. Reg., 33.

§ 60. Contract with owner of theater.—An agreement between an author and the owner of a theater, that the author should write a play which was to be performed at the latter's theater as long as it should draw, does not prevent the author from taking the copyright in his own name. The contract is but a license to use the play at a particular theater, and not an assignment of the right of property in the play. *Roberts v. Myers*,* 23 Law Rep., 396; 13 Law Rep. (N. S.), 396.

§ 61. False imprint of copyright.—Under the act of congress of 1831 forbidding the imprint of a copyright on a work not legally copyrighted, and giving a penalty to the person who shall sue for the same, but one person can sue for and recover the penalty. *Ferrett v. Atwill*, 1 Blatch., 151.

§ 62. Section 4963, Revised Statutes of the United States, imposing a penalty for falsely affixing a notice of copyright upon articles, relates only to such articles as may be copyrighted. *Rosenbach v. Dreyfuss*,* 2 Fed. R., 217; 2 Alb. L. J., 472; 17 O. G., 1153.

§ 63. Ownership.—A copyright is *prima facie* evidence that the copyrighted work is the original production of the person procuring the copyright, and the burden of proof to show the contrary is on the person attacking. *Reed v. Carusi*,* 8 Law Rep., 410.

§ 64. A person who has no literary property in a dramatic composition cannot enjoin another from exhibiting or performing it. *Martinetti v. Maguire*,* Deady, 216; S. C., 1 Abb., 356.

§ 65. A grant of a copyright to a person is *prima facie* evidence that he is the author of the copyrighted production. *Reed v. Carusi*,* Taney, 72.

§ 66. In an action of debt for an infringement of the copyright of a musical composition, the question whether the plaintiff was really the author of the composition is one of fact for the jury. If such composition was borrowed altogether from a former one, or was made up of different parts copied from older musical compositions without any material change, and put together into one tune, with slight and unimportant alterations or additions, then the compiler is not the author within the meaning of the copyright law; but the circumstance of its corresponding with older musical compositions, and belonging to the same style of music, does not constitute it a plagiarism provided the air in question was, in the main design, and in its material and important parts, the effort of his own mind. *Ibid.*

§ 67. Contract—Construed.—G., the author of a medical work, assigned a part of the copyright to M., W. & K., under an agreement that they should sell only in the northern states, and that they should furnish G. with the work at cost, and that he should sell it only in the southern states. G. sold his interest to M., who withdrew from the firm, and the firm sold their interest to B. A disagreement as to the price at which books were to be furnished to M. arose, in which M. claimed that the failure to furnish books at a reasonable price abrogated the contract. M. therefore published G.'s work with some additions, and proceeded to sell it in the territory reserved to M., W. & K. under the original contract. *Held*, that the provisions of the contract as to furnishing the books and the division of the territory were independent, and that even the failure to furnish the books according to the contract did not justify M. in invading the territory reserved to the firm. *Baldwin v. Baird*,* 25 Fed. R., 293.

§ 68. An agreement between an author and his publishers that the latter shall have the copyright, "to them and their assigns forever," conveys to the publishers the right to an additional term afterwards granted by congress. *Paige v. Banks*,* 13 Wall., 608.

§ 69. An author, before publication, entered into a contract with his publishers by which they were to print an edition of a thousand copies, paying him a certain sum therefor, and if a second edition was called for he should correct it and they would print and stereotype it and might print as many as they could sell, paying him a certain sum per copy. The first edition was printed and the copyright taken in the publishers' name. A second edition being called for, was corrected and printed and large sales made. *Held*, that as the copyright had been taken in the name of the publishers with the knowledge and acquiescence of the author, the publishers were the lawful owners thereof, but that they could not transfer it, and that they had a right to hold it and to print copies of the work as long as they could sell them, and that though the publishers could not transfer the copyright they could sell the plates and transfer

all their rights under the contract, accounting to the author pursuant thereto. *Pulte v. Derby*,* 5 McL., 328.

§ 70. **Right of renewal.**—A court reporter entered into a contract with a firm of publishers in 1830 by which he agreed to furnish manuscript which they were to print, taking the copyright in their own names, which was to belong to them and their assigns forever, and were to pay the reporter a certain sum per volume. *Held*, that the reporter had parted with all his interest, and that after the expiration of the copyright in 1858 he could not renew the copyright in his name for fourteen years longer. *Paige v. Banks*,* 7 Blatch., 152.

§ 71. **Principal and agent.**—In an action to recover the penalty prescribed by statute for the copying and publishing of a copyrighted picture, the doctrine of the responsibility of a principal for the act of his agent does not apply, and an employer is not responsible for such copying and publishing done by his agent. *Schreiber v. Sharpless*,* 6 Fed. R., 175.

§ 72. **Employer and employee.**—An engraver employed by the United States to engrave a chart has no copyright in such chart, and may be enjoined from selling copies thereof. Copyright,* 7 Op. Att'y Gen., 656.

§ 73. When an author renders gratuitous services for another in whose name the copyright of the work on which such services were rendered is taken, the title to the work of the author is in the person for whom the services were rendered, and no written assignment from the author is necessary to enable such person to take the copyright in his own name. *Lawrence v. Dana*, 4 Cliff., 1; 2 Am. L. T. (N. S.), 402 (§§ 257-69).

§ 74. An author furnished gratuitously to the widow of the author of a book notes and emendations for two editions of the original work, under an agreement that the notes should belong to him afterwards. The widow having taken the copyright in her name, it was held that equity would compel her to assign to him her interest in the copyright of his notes. *Ibid*.

§ 75. A person was not entitled, under the act of congress of April 29, 1802, to a copyright for a work of art which he has paid another to design and execute. *Binns v. Woodruff*,* 4 Wash., 48.

§ 76. An author and inventor who by a contract agrees to use his ability in producing works and inventions for a stipulated compensation, the title to which should be in his employer, absolutely divests himself by the contract of any rights to his productions and inventions, and even on a breach of the contract by his employer such title does not revert in him. *Mackaye v. Mallory*,* 12 Fed. R., 328.

§ 77. An artist accompanied a government expedition with the express agreement that all sketches and pictures made by him should become the property of the government. After the report of the expedition, including the pictures, was prepared and ordered printed, the artist entered his pictures for copyright. *Held*, that he was not entitled to a copyright therein, as by becoming the property of the government they became the property of the public. *Heine v. Appleton*,* 4 Blatch., 125.

§ 78. An artist cannot enjoin the publication of pictures of his which he was paid for preparing for publication by the persons whom he seeks to enjoin. *Ibid*.

§ 79. Written additions to a manuscript play, made either by the proprietor of the play or by a person in his employ, are accessions whose proprietorship is incidental to that of the play. The relation of employer and employee would prevent the latter from acquiring literary property in such additions. *Keene v. Wheatley*,* 4 Phil., 157; 9 Am. L. Reg., 33.

§ 80. Unwritten additions to a play made by an actor in the employ of the proprietor of the play, and performed by him, are not the property of the owner of the play; but where such actor has communicated such additions to the proprietors of another theater, their use will be enjoined. *Ibid*.

§ 81. **No question of copyright—Jurisdiction.**—Comstock, the reporter of the New York court of appeals, as such reporter, together with the comptroller and secretary of state, entered into a contract with a firm of publishers for the publication of his reports for five years. The contract provided that the copyright should be in the publishers. The law provided that the copyright of the reports of that court should be taken by the secretary of state for the use of the people of the state, and forbade the reporter or any other person to acquire the copyright. Three volumes of Comstock's reports were published when, within the five years, Comstock was succeeded by Selden as reporter. He had in his possession manuscript opinions, which he prepared for publication, and of which he sold the copyright to another firm of publishers. The first publishers sought to enjoin the publication in a federal court, but the court held that they had no property in the manuscript from which the publication was made, and that therefore there was no question arising under the copyright law of the United States, and the court was without jurisdiction. *Little v. Hall*,* 18 How., 165.

§ 82. It is competent for a state officer to take out a copyright on a volume of reports as assignee of the reporter, under a state statute. *Little v. Gould*,* 2 Blatch., 362.

§ 83. A publication of a book will be inferred from a sale thereof, in the absence of proof to the contrary. And, if such sales were made before the deposit of the title-page, the copyright is vitiated. *Baker v. Taylor*,* 2 Blatch., 82.

§ 84. The mere delivery of printed volumes of judicial decisions by the official reporter to the state is not proof of publication of the reports, in the absence of any proof of the distribution of the volumes. *Myers v. Callaghan*,* 10 Biss., 139; 5 Fed. R., 726.

§ 85. Publication abroad.—The fact that an unpublished play, after being entered for copyright in this country, was published in England, will not interfere with the exclusive right of the author unless such publication was by his consent. *Boucicault v. Wood*,* 2 Biss., 34; 7 Am. L. Reg. (N. S.), 539.

§ 86. The author of certain copyrighted articles allowed the same to appear in an encyclopædia published in Great Britain. *Held*, that there was sufficient doubt as to whether such author could use such copyright to prevent the reprint and publication of the encyclopædia in this country, in which he had allowed the article to appear, to deter the court from enjoining the publication of the reprint by preliminary injunction: *Lodge v. Stoddart*,* 9 Rep., 137; 19 Am. L. Reg. (N. S.), 433.

§ 87. *Quære*: Whether the copyright and publication in this country, by a foreigner, of an unpublished work purchased from an American citizen, is valid. *Ibid*.

§ 88. Dedication to public.—Where a drama is an original literary effort, the permitted publication of a novel founded on the incidents of the drama is not such a dedication to the public as will permit an unauthorized representation of the drama. *Shook v. Rankin*,* 3 Cent. L. J., 210.

§ 89. A literary work, as a play, is dedicated to the public by a general publication. Such a publication is general whenever the communication effecting it is unrestricted, both as to the persons to whom and the purpose for which it is made. Such general publication is a dedication to the public for such unlimited uses, including all modes of publishing and republishing, as it may be the means, directly or secondarily, of enabling any person to make. A general performance of a play at a theater is a general publication thereof, and the proprietor of the play cannot restrain a representation thereof, if, by means of such representation, either primarily or secondarily, such unauthorized representation is possible by means of the retention of the words in the memory of persons in the audience. Otherwise if the unauthorized representation has been made by other means. *Keene v. Wheatley*,* 4 Phil., 157; 9 Am. L. Reg., 33.

§ 90. G. and S., the authors of "The Mikado," a comic opera, employed one T., a citizen of the United States, to prepare a pianoforte arrangement of the opera from the original orchestral score, which was copyrighted in the United States, and was sold in England with the vocal score with the consent of T. and G. and S. The orchestral score was never published, but was kept in manuscript by G. and S. D. purchased in England a copy of the libretto, vocal score and pianoforte arrangement, and procured a musician to make an independent orchestration therefrom. He was about to produce the opera in this country with costumes, scenery and stage effect imitated from the representations of G. and S., with the vocal score and the independent orchestration, but without representing or claiming that the orchestration was that of the original. *Held*, that the right of G. and S. to exclusively represent any part of the opera except the original orchestral score was lost by the publication of the libretto and vocal score, and that all right to represent the opera as an entirety, except as to the orchestral score, was dedicated to the public, and that the only right retained by them was that of multiplying copies of their orchestral score. *Held*, also, that the musical arrangement was a musical composition, and not a dramatic composition, and that the only right given by our statutes in the case of musical compositions was the exclusive right to multiply copies, but not the exclusive right to represent, and that therefore the representation by D. would not be enjoined at the suit of the assignee of G. and S. *Carte v. Duff*,* 25 Fed. R., 183.

§ 91. The common law right runs only to the time of the publication of the manuscripts by consent. After that the right of multiplying copies, or of representing, if the work is dramatic, is abandoned to the public, and it is immaterial in what country the publication is made. *Ibid*.

§ 92. *Quære*: Where an author publishes his manuscript in the public newspapers, whether he can afterwards publish it in a different form, and claim a copyright: and whether the deposit of the title-page, before the manuscript is prepared, will be effective. *Miller v. McElroy*,* 1 Am. L. Reg. (O. S.), 198.

§ 93. Plaintiff, an American citizen, was the assignee, from a foreign author, of a comedy, which was never printed, nor published otherwise than by representation on the stage. She took the necessary steps to protect herself by copyright, except the deposit of a copy of the book. Additions and changes were made by an actor in the employ of the plaintiff. The defendants obtained a copy of the play from a party who obtained it abroad, and, after acquiring the aforesaid additions and changes from the said actor, produced the play in their theater.

Held, that the public representation of the play by plaintiff was a publication, and that she could not, under the statutes for the protection of literary property, protect her rights as against persons who might reproduce the play from memory; but further, that equity would afford her relief as against the defendants, who did not rely upon such publication, but upon the copy obtained as above indicated; that the additions and changes by the actor belonged to plaintiff, and would also be protected. *Keene v. Wheatley*,* 9 Am. L. Reg. (O. S.), 33; 4 Phil., 157.

§ 94. The foreign proprietors of a musical and dramatic composition permitted the vocal parts with piano accompaniment to be published in this country, but kept the orchestral score in manuscript for the use of themselves and their assigns. *Held*, that a performance of the production by other parties, with an independent orchestral score composed and arranged from the published score by another person, will not be enjoined, but such person will not be allowed in his advertisements of the performance to lead the public to believe he is using the original orchestration. *Carte v. Ford*,* 15 Fed. R., 439.

§ 95. A drama may be copyrighted though it has been previously acted in a public theater. *Roberts v. Myers*,* 23 Law Rep., 396; 13 Law Rep. (N. S.), 396.

§ 96. The exclusive right of property of an author in an unpublished manuscript is not lost by permitting copies thereof to be taken, nor is the piracy thereof excused by the fact that it was unfinished, or that it was used by a teacher for the instruction of his pupils, who were allowed to take and use copies thereof. *Bartlett v. Crittenden*,* 4 McL., 300.

II. WHAT PROTECTED BY COPYRIGHT.

SUMMARY — *Instructions for cutting clothes*, § 97. — *Judicial decisions*, § 98; *copyright taken for benefit of state*, § 99. — *Compilations*, §§ 100, 101. — *System of book-keeping*, § 102. — *Notes to an existing work*, § 103. — *Title to work*, §§ 104, 105. — *Pictures*, §§ 106-111.

§ 97. A chart with printed instructions intended to be used in cutting ladies' and children's clothing, printed on a single piece of paper, is a *book* within the statutes of the United States relating to copyright. *Drury v. Ewing*, §§ 112-114.

§ 98. The reporters of judicial decisions are entitled to the benefit of the copyright laws of the United States to the extent of their authorship in the composition of their reports. But this does not include the written opinions of the court, because the reporter is not the author thereof. *Little v. Gould*, §§ 115-123.

§ 99. A contract was made between C., the reporter of the court of appeals of New York, the secretary of state, the comptroller, and L., a publisher, by the terms of which L. was to publish the state reports for five years upon certain terms. L. was to have the exclusive benefit of the copyright of all matter furnished by C., and the title thereto was to be taken in the secretary of state pursuant to a law of the state which provided that the copyright of the reporter's notes and references should be taken in the name of the secretary for the benefit of the people of the state. The contract purported to be an assignment of the copyright to L. The statute of the state provided that the reporter should have his salary only, and that neither he nor any other person should have a copyright in the reports. A volume of reports was prepared by C. and printed by L., and the copyright was taken in the name of the secretary of state as required by law. Within five years G. reprinted the volume. *Held*, that G. would be restrained from printing and publishing any volume of C.'s reports containing any of the matter prepared by him, or any colorably altered therefrom. On a motion to dissolve the injunction after answer, it was held that the secretary of state might properly take the copyright in his name, as the statute and contract operated as an assignment thereof to him, and that he also might take the title in trust for the people of the state. *Ibid.*

§ 100. A compilation of information in reference to postoffices, railroad stations and freight and express lines is subject to copyright under the laws of congress. *Bullinger v. Mackey*, §§ 124-126.

§ 101. In order to give an author of a compilation a copyright in the plan, combination and arrangement of his materials, it must appear that his plan is essentially new and original with him. *Ibid.*

§ 102. The exclusive property in a system of book-keeping cannot be claimed under the copyright laws, by means of a book in which that system is explained. *Baker v. Selden*, §§ 127, 128.

§ 103. Notes to an existing work, compiled by the author from various sources, may properly be copyrighted by him, though they are not new, if they have been collected by him from the various original sources; and a copying of such notes by another annotator of the same work is an infringement of his copyright. *Gray v. Russell*, §§ 129-133.

§ 104. The mere title of a copyrighted production is not, as separated from the production itself, protected by such copyright from use by others. *Osgood v. Allen*, §§ 134, 135.

§ 105. In determining whether the title of a periodical infringes the title of another, considered as a trade-mark, the question is as to the liability of the subsequent title to deceive the public. *Ibid.*

§ 106. The word "manuscript," as used in the statutes relating to copyright, does not include a picture, and it may be reproduced as a chromo by the owner without the written assent of the artist, which is required by the statute in case of a manuscript. *Parton v. Prang*, §§ 136-140.

§ 107. An absolute and unconditional sale of a picture by the artist, and a similar sale by the purchaser to another, confers upon the second purchaser the right to reproduce the picture as a chromo, when the artist, after being apprised of the purpose of the second purchaser, did not object. *Ibid.*

§ 108. A chromo having artistic merit is a subject of copyright, though intended to be used for advertising purposes. *Yuengling v. Schile*, §§ 141-144.

§ 109. Chromo lithographs are "prints" within the meaning of section 103 of the act of congress of July 8, 1870, and section 4971, Revised Statutes of the United States. *Ibid.*

§ 110. Photographs of a large picture, of which the photographer is the owner, are not protected by the copyright law of 1831 from being copied by the photographic process by others. *Wood v. Abbott*, § 145.

§ 111. The representation of a copyrighted engraving by means of photography is a copying thereof within the meaning of the copyright laws, and is forbidden. *Rossiter v. Hall*, §§ 146, 147.

[NOTES.— See §§ 148-186.]

DRURY v. EWING.

(Circuit Court for Ohio: 1 Bond, 540-554. 1862.)

Opinion of the COURT.

STATEMENT OF FACTS.—The bill in this case was filed June 28, 1860. The complainants aver that the said Lavinia Drury is the "authoress and proprietress" of a chart entitled "The ladies' chart for cutting dresses and basques for ladies, and coats, jackets, etc., for boys," a copy of which was duly deposited in the office of the clerk of the district court of the United States for the southern district of Ohio, April 25, 1859, by which the exclusive right of publishing, using and vending the same was secured to her, by the act of congress on that subject, for the period of twenty-eight years. The bill further alleges that the said Sarah C. Ewing, in conjunction with her husband and others, has caused to be published and sold a large number of said charts, and was then publishing and selling the same, without any license or authority from the said Jonas and Lavinia Drury, and in violation of their rights and greatly to their injury. The bill prays for an injunction to restrain the defendants from any further publication of said charts, and for other relief. A provisional injunction in accordance with the prayer of the bill was ordered July 2, 1860.

The answer of Ewing and wife was filed September 3, 1860. The answer admits, in substance, the sale of Mrs. Drury's charts, but alleges they were sold or used under an arrangement between the parties, by which Mrs. Ewing was constituted the agent of Mrs. Drury, and as such was authorized to vend and use the charts. And the defendants deny that they have in any way infringed the exclusive right of the complainants by such sale and use.

The case came on for hearing on the bill, answer, exhibits and proofs, January 21, 1861, and resulted in a decree for the complainants, and the award of a perpetual injunction against the defendants.

On May 10, 1862, upon a proper showing by the complainants, a rule was entered against Ewing and wife, requiring them to show cause why they

should not be attached as for a contempt in violating the injunction. This rule was duly served, and the defendants, Ewing and wife, appeared, and in response thereto filed an answer denying that they had violated the injunction, or had intentionally disregarded the order of the court, and praying to be discharged from the rule. In the progress of the investigation growing out of the motion for an attachment, it was made to appear that in September, 1860, Ewing and wife had deposited, in the office of the clerk of the district court of the United States for the eastern district of Missouri, a copy of what is described as "the ladies' guide" for taking the measures and cutting garments for females, of which Mrs. Ewing claimed to be the authoress or inventress, and for which she had thus secured a valid copyright. It was also proved on such hearing, and not controverted by the defendants, that Mrs. Ewing had printed a large edition of her guide, and that she had sold many copies of the same after the service of the injunction upon the defendants. In resisting the application for an attachment, it was assumed by the counsel of the Ewings that the guide which they had copyrighted in Missouri was substantially different from Mrs. Drury's, and that the use and sale of them did not therefore involve a violation of the injunction or any infringement of her rights. This posture of the application for an attachment presented the question of the identity of Mrs. Drury's chart and Mrs. Ewing's guide. And, upon this issue, a great mass of testimony has been taken by these parties, and, after a protracted hearing and very elaborate arguments, the question has been submitted for the action of the court.

In this connection, it should be stated that in addition to the issue of identity, if the court should adjudge it to be established by the testimony, it is strenuously urged by counsel that the motion for an attachment cannot be entertained, and the Ewings held to be guilty of a contempt, for the reason that the copyright of Mrs. Drury is a nullity as not being a legitimate subject of a copyright within the scope and intention of the act of congress.

§ 112. *On a motion for an attachment for violating an injunction the original decree cannot be impeached except for fraud or defect of jurisdiction.*

This point first claims the attention of the court. And in relation to it, it is obvious to remark, that whatever ground there may have been for contesting the validity of the copyright on the hearing of the original case, it is now too late to do so. The defendants are clearly concluded by the admissions of their answer, and by the facts adjudged true by the decree of the court, and which could properly have been contested at the hearing on the merits. The bill, as before noticed, contains the distinct averment that Mrs. Drury is the authoress and proprietress of the chart copyrighted to her, and that the exclusive right to publish, use and vend the same vested in her. These allegations are not controverted or put in issue by the answer. They are, at least by the strongest implication, admitted to be true. The answer does not allege the invalidity of Mrs. Drury's copyright, either on the ground that it is not within the act of congress, or that it was not her original invention. Indeed, these points are conceded in the answer, as in that, the Ewings rest their vindication of the sales of the charts up to that time, on the ground that Mrs. Ewing was the agent of Mrs. Drury. This is wholly inconsistent with the position now taken, that her copyrighted chart is a nullity in law. This point not having been brought to the notice of the court at the hearing, it was clearly not its duty, *sua sponte*, to pass upon it, even if there had been doubts as to the validity of the copyright. The court therefore found the facts

alleged in the bill to be sufficiently verified, and entered a decree to that effect. The decree assumes that Mrs. Drury's copyright was valid, and that she was entitled to protection against its infringement. It also finds that the defendants had so violated that right as to justify an order for an injunction, and the award of damages in favor of the complainants in accordance with the statute.

In this state of the case no proposition can be clearer than that the defendants, upon the pending motion, cannot impeach the decree thus entered. Several entire terms of the court have intervened since its entry, and it would be an unheard of exercise of jurisdiction, in this collateral way, to revise and reverse it. No court will do this in a proceeding looking only to the enforcement of the decree, except on a clear showing of fraud in its rendition, or a want of jurisdiction as to the subject-matter of the suit. There is no pretense or allegation of fraud in the decree, nor is there a doubt of the jurisdiction of the court in the suit. This is given in such express terms by the statute, as to leave no room for controversy. If there was any error in the facts found by the decree, or the legal conclusions of the court, the obvious and only remedy was an appeal to a higher court having ample power to revise and reverse the decree. This principle is so well settled as scarcely to need the citation of authorities for its support. It has been repeatedly affirmed by this court, and distinctly held by the supreme court of the United States. 10 Pet., 474; 14 How., 588.

§ 113. *A chart of a single sheet of paper may be a "book" within the meaning of the copyright laws.*

But it is by no means clear that the objection now urged to the validity of the complainant's copyright could have been sustained, if it had been presented in the proper way and at the proper time. The point made by the defendant's counsel is that the chart copyrighted to Mrs. Drury is neither a *book*, nor a *chart*, nor a *print*, within the terms of the act of congress, and therefore not within its protection. Upon this point no American authorities have been referred to, nor am I aware that it has been decided in this country. In the English courts I know of but one case in which it has been fully considered. This will be presently referred to as having a direct bearing on the question adverted to.

Section 1 of the act of congress of February 3, 1831 (4 Statutes of the United States, 436), secures to the author of any *book* or *books*, map, chart or musical composition, or to any one who shall invent, design, etch, engrave, work, or cause to be engraved, etched or worked, from his own design, the exclusive right of printing, reprinting, publishing and vending the same for the term of twenty-eight years, by complying with certain requirements of the statute. The question presented is, whether the chart for which Mrs. Drury has procured a copyright under the statute falls within any of the foregoing designations. I do not propose to consider this question at any length. As a first impression, from an inspection of the chart, the mind repudiates the conclusion that it is a *book*; and when the point was first suggested, it occurred to me it would require a forced construction of the statute to bring it fairly within the meaning of that term. The chart as printed and published for use is contained on one large sheet, representing a series of diagrams, interspersed with printed instructions as to the mode of using them in taking measurements for and cutting certain parts of ladies' dresses. As necessary to the practical use of the diagrams they are pasted on thick paper or pasteboard, corresponding

with and showing precisely the forms of the diagrams. The exact dimension and form of every part of the garment intended to be cut is indicated by a series of numerals placed along the outer edges of the diagrams thus arranged, and by means of dots or marks at the proper figures the exact size and course of each section of the garment is ascertained with mathematical precision.

Now it may well be conceded that the chart as printed on the sheet, or as pasted in parts for practical use, is not a *book*, according to the more popular sense of the word. But, in giving effect to the statute according to its obvious design and spirit, I can see no necessity for restricting the word to a volume. The origin and derivation of the word *book* does not justify this restricted sense. Without intending to make any show of learning on this subject, or attempting a critical investigation, I may remark what is well known, that the Latin word *liber* — book — had no reference to the collection of writings in a volume, but primarily signifies the bark of a tree. Webster, in his dictionary, says our word *book* is derived from the Saxon, *boc*, meaning a beech-tree; and in other languages of the north of Europe it has the same derivation. The supposition is that either the bark of the beech or, what is more probable, thin polished plates of the wood of that tree, were used for writing. It is a fact well established that the Chinese, before the discovery of the art of making paper, used the latter mode for that purpose. It is also well known to the readers of the Bible and other ancient writings that in referring to books the collection of literary materials in a volume is not intended. The *papyrus* was first used for writing, and at a later period the skins of animals made into parchments; but they are called books, though the manuscripts were in the form of rolls or loose leaves, unbound, and not in volumes according to the modern sense of the term.

But I should certainly have hesitated in adopting this view as a judicial conclusion if it was not sustained by an authority entitled to high respect. The English courts, after the fullest investigation, have decided this question in a case to which I will now refer. The statute of 8 Anne, on the subject of copyrights, enumerating in section 1 the works intended to be protected by it, contains the words *book or books* precisely as in our statute. In the case of *Clementi v. Golding*, 2 Camp., 25, the court held that the form of the publication was not material in determining whether it was or was not a book, within the meaning of the statute. That was a suit for a piracy in reprinting and selling a song, which had been published on a *single sheet*, and in that form copyrighted. The objection was made that it was not a *book* entitled to the protection of the statute. Lord Ellenborough, contrary to his opinion in a previous case, overruled the objection and directed the jury to return a verdict for the plaintiff, with leave to move for a new trial. He is reported to have said: "I do not see at present why a composition printed on a single sheet of paper should not be entitled to the privileges of the statute." . . . He adds: "I was at first startled at a single sheet of paper being called a *book*, but I was afterward disposed to think it might be so considered within the meaning of the act of parliament, and when the matter came before the court, the other judges inclined to the same opinion." After the argument of the motion for a new trial, the reporter adds: "The judges seemed unanimously of opinion that it could not depend on the form of the publication whether it were entitled to the privileges of the statute or not; that a composition on a single sheet might well be a *book* within the meaning of the legislature, and that the verdict of the jury ought not to be disturbed." See same case, 11 East, 244

(new ed., vol. 6, 125); also case of *Hime v. Dale*, decided in 1803, referred to 2 Camp., 27; Curtis on Copyrights, 105 *et seq.*; 2 Wat.; Eden on Injunc., 322.

It will be seen by reference to the case of *Clementi v. Golding*, that the question was very fully and carefully considered by the full court. No case has been referred to, and I am not aware there is any, in which the doctrine then settled has been reconsidered or overruled by the English courts. And the construction of the statute of Anne, on the point under consideration, may be regarded as law in England. And I cannot perceive on what ground the principle can be impugned as against good sense and reason. I am, therefore, inclined to adopt the liberal construction given by the English courts to their statute, and to hold that Mrs. Drury's chart is within the protection of our statute. She could doubtless have given it to the world in a succession of sheets, bound together and constituting a volume, but it is obvious that the chart for practical purposes is more easily understood, and therefore more useful, printed on a single sheet large enough to exhibit all the diagrams at one view. I cannot perceive why her rights as an authoress or inventress should be prejudiced by this form of publication. If the chart, as the court is bound, for reasons before intimated, to presume, is original with her — the product of thought and mental toil — her claim is by no means destitute of merit, and she is justly entitled to all the benefits which the law confers. It is clearly no objection to the validity of her copyright, that her production does not claim a standing as a work of great literary merit. The statute does not make this a necessary element of a legal copyright; and it is well known there are works of great practical utility, having no pretension to literary merit, which are yet within not only the words, but the scope and design of the statute.

Adopting this view of the law, it is not necessary to decide whether Mrs. Drury's copyright can be sustained as a *chart* or *print*. These words are used in the statute as legitimate subjects of a copyright, and it would not imply a very forced construction to hold that the copyrighted work of Mrs. Drury is included in one or both of these terms. The authorities, I think, would fully sustain such a conclusion.

§ 114. *What is a piracy of a copyrighted work.*

The only question which remains is, whether the complainant's chart and Mrs. Ewing's guide are legally identical. If they are so, it follows necessarily that the use and sale of the latter is an infringement of Mrs. Drury's exclusive right and a violation of the injunction. And here the true inquiry undoubtedly is, not whether the one is a *fac-simile* of the other, but whether there is such a substantial identity as fairly to justify the inference that, in getting up the guide, Mrs. Ewing has availed herself of Mrs. Drury's chart and has borrowed from it its essential characteristics. And the decision of this question is in no way affected by the fact — if conceded to be the fact — that the guide is in some respects an improvement of and of superior utility to the chart of the complainants. This would confer no right to appropriate and use the prior invention or discovery of Mrs. Drury. The law on this subject is stated by Judge McLean (4 McL., 308) as follows: "The same rule of decision should be applied to a copyright as to a patent for a machine. The construction of any other machine which acts on the same principle, however its structure may be varied, is an infringement of the patent. The second machine may be recommended by its simplicity and cheapness; still if it act on the same principle of the one first patented, the patent is violated." And in the same case, the learned judge asserts the principle strongly, that in the case of a copy-

right, if the work alleged to be a piracy is of a character to render the original "less valuable by superseding its use in any degree, the right of the author is infringed."

In the case of *Folsom v. Marsh*, 2 Story, 115 (§§ 249-56, *infra*), it is decided that it is "not necessary to constitute an evasion of a copyright, that the whole of a work should be copied, or even a large portion of it, in form or substance. If so much is taken that the value of the original is sensibly diminished, or the labors of the original author substantially, to an injurious extent, appropriated by another, that is sufficient in point of law to constitute a piracy *pro tanto*. The entirety of the copyright is the property of the author, and it is no defense that another has appropriated a part, and not the whole, of any property." To the same effect are the views of Judge Story in the case of *Emerson v. Davies*, 3 Story, 795 (§§ 270-79, *infra*). He says: "To amount to an infringement, it is not necessary that there should be a complete copy or imitation in use throughout, but only that there should be an important and valuable portion, which operates injuriously to the copyright of the plaintiff." In the same case the learned judge, in defining a piracy of a copyright, after a reference to the English authorities, says: "I think it may be laid down as the clear result of the authorities in cases of this nature, that the true test of piracy or not is to ascertain whether the defendant has in fact used the plan, arrangements and illustrations of the plaintiff as the model of his own book, with *colorable* alterations and variations only, to disguise the use thereof."

Judge Woodbury, on this point, says the true inquiry in these cases is, "Whether the book of the defendant, taken as a whole, is substantially a copy of the plaintiff's; whether it has virtually the same plan and character throughout, and is intended to supersede the other in the market with the same class of readers and purchasers by introducing no considerable new matter, or little or nothing new except colorable deviations." *Webb v. Powers*, 2 Woodb. & M., 514 (§§ 280-87, *infra*). To the same effect are the numerous English decisions on this point. 2 Mylne & C., 740; 30 Eng. L. & E., 461; 36 *id.*, 321.

These authorities seem to be decisive of the point under consideration. And the single inquiry in this case therefore is, whether there is a substantial identity as between the chart copyrighted to Mrs. Drury and the guide used and sold by Mrs. Ewing. On this issue, I shall not attempt a critical notice of the mass of testimony introduced on the hearing of the present motion. It is to be regretted that under the impulse of their heated passions and intemperate zeal, these excited females have put themselves to unnecessary trouble and expense in taking depositions on the question of identity. It lies within narrow limits and presents no great difficulty in its solution. It is to be borne in mind that Mrs. Ewing does not allege, and has not proved, that she is the inventress or authoress of the system copyrighted to her; nor does she deny in her original answer, nor does she now deny, that Mrs. Drury's chart is the basis of her guide. Her claim is simply that she has so far varied from and improved the chart as to constitute her guide an original work, and that, therefore, it is no infringement. But it is obvious from inspection that the two embody substantially, if not literally, the same principle. The diagrams in each are essentially the same in form, dimensions, etc., and have the same arrangement of numerals. It is true, the different scales or rules for taking measurements are designated by names differing in the guide from those used in the chart, but this does not destroy the identity of the two. In practice

they produce the same curves or forms for the same identical purpose. The device of Mrs. Ewing in placing on what she calls the back scale one number higher than on the front scale, thus making a seeming difference between her plan and that of Mrs. Drury, cannot affect the question of legal identity. This clearly involves no change of principle. And the same remark applies to the claim of a want of identity, on the ground that Mrs. Ewing's plan as alleged requires five measurements, whereas Mrs. Drury provides for three only. The mere increase of the number of measurements does not constitute an essential difference in the two plans. But it is by no means clear that Mrs. Ewing, in her system as copyrighted, requires more than the three measurements. The weight of evidence well justifies the conclusion that until this controversy arose, in practice three only were used, and that the subsequent addition of the two measurements was an afterthought resorted to for an obvious purpose.

But there is one fact that seems wholly conclusive on this question of identity, and dispenses with the necessity of a minute inquiry into the alleged discrepancies between the two plans. Some nine or ten witnesses, practical and intelligent dressmakers, well acquainted with the theory and practice of taking measurements, and cutting dresses upon the plan of these parties, testify that the two are substantially the same, and in practice produce the same result. Some of these witnesses swear they have cut dresses by both plans, and that when the directions of each are strictly pursued, the results are substantially the same. One witness with great apparent candor and intelligence states that by an actual experiment with the two plans, when he dropped the surplus number on the back scale of Mrs. Ewing, the measurements were precisely identical, and that when that number was used there was but a trifling difference. Such an experiment affords an unerring test of truth, and if the witness is credible, the force of the fact stated by him cannot be overcome by the speculative opinions of any number of witnesses testifying adversely to him.

Without noticing other material discrepancies between the chart of Mrs. Drury and Mrs. Ewing's guide, I am led to the conclusion that they are essentially the same, within the scope of the authorities to which I have referred. Mrs. Ewing has, with some adroitness, so arranged and transposed some parts of Mrs. Drury's diagrams as to present to the unexperienced eye the impression that they are dissimilar, but in doing this she has utterly failed to prove that there is any difference in the principle of the two. There is, also, a substantial identity between the printed directions and instructions accompanying the chart and the guide. True, the words and sentences used by Mrs. Ewing are not the same as those used by Mrs. Drury, but they are of the same import, and intended for the same purpose. In this remark, I do not forget that it is strenuously urged by the counsel for the complainants that what is designated by Mrs. Ewing as her third pupil's instruction is more full and minute than those connected with the chart, and so far unlike them. It is enough to say, in reference to this, that the evidence fully warrants the conclusion that these constituted no part of the rules or instructions as claimed by Mrs. Ewing, and copyrighted to her in Missouri. They have been appended recently with the obvious purpose of negating the identity of the two plans. It is another evidence of the consciousness of Mrs. Ewing, that something was needed to avoid the otherwise inevitable conclusion, that in getting up her guide she was interfering with and pirating on the prior exclusive right of

Mrs. Drury. It cannot be doubted that she has adopted all the essential parts of Mrs. Drury's system, and that so far as there are any apparent alterations they are colorable and evasive. It must be conceded that Mrs. Ewing's course does not commend her to the favorable consideration of a court of equity. She seems to have taken a dishonorable advantage of her position as the agent of Mrs. Drury, with the expectation of pecuniary benefits to which she was neither morally nor legally entitled. Her intelligence and adroitness, as developed throughout this controversy, repel the inference that she acted in ignorance of the fact that she was invading the just rights of the complainants. And when by the decree of this court an injunction was granted to restrain her from the further sale and use of her guide, it was a duty of which she could not have been ignorant to respect and obey it. She has wilfully violated the injunction, and the complainants, as they had a right to do, have asked for and obtained a rule to show cause why she should not be dealt with as for a contempt of court. No sufficient showing against such a judgment has been made, and I cannot do otherwise than find her guilty of the alleged contempt.

The only embarrassment on the part of the court arises from the difficulty of determining what order shall now be made in the case. It is necessary that the supremacy of the law should be vindicated and the rights of the complainants protected as far as practicable. To this end it is unquestionably competent for the court to order the imprisonment of Mrs. Ewing as a punishment for the contempt. But in the case of a female I am exceedingly reluctant to make such an order. And if any assurance can be given that there will be no repetition of the offense, and that the rights of the complainants will hereafter be respected, I will not now adopt that stringent course. For the present, with the intimation that such future action, as circumstances may require, will be taken by the court, it is now ordered that the defendants, Ewing and his wife, surrender to the clerk of this court, within twenty days, all the published copies of the guide in their possession or within their control, together with the plate or plates on which they are printed; and also that within that time they pay the costs of this proceeding.

LITTLE v. GOULD.

(Circuit Court for New York: 2 Blatchford, 165-186. 1851.)

STATEMENT OF FACTS.—The plaintiffs in this case claimed the exclusive right to publish and sell volume 3 of the reports of cases of the court of appeals of New York, and they filed their bill to enjoin the defendants from infringing that right. The plaintiffs claimed their right under a contract made, by virtue of a statute of New York, with Comstock, the official reporter, the secretary of state and the comptroller. The statute, which is set out in the opinion, provided that the copyright of any notes and references made by the reporter should be vested in the secretary of state for the benefit of the people of the state.

Opinion by CONKLING, J.

To maintain the denial by the defendants of the plaintiffs' title, their counsel rely mainly upon a provision contained in the constitution of the state of New York. By the constitution and laws of the United States, authors are invested with the exclusive right and liberty, for a limited period, of printing, reprinting, publishing and vending their books; and this right is extended to

their executors, administrators and assigns. The right is held to belong to the reporters of judicial decisions in common with other authors, to the extent of their authorship in the composition of their works. It does not comprise the written opinions of the judges, because of these the reporter is not the author, and it has been said by the supreme court of the United States that the judges of that court cannot confer on the reporter of its decisions any copyright in the written opinions delivered by them.

Under this well known state of the law of the land, as declared in the constitution and statutes of the United States, and by the authoritative interpretations they had received, the people of the state of New York saw fit, in 1846, by the twenty-second section of the sixth article of the constitution adopted in that year, to ordain as follows: "The legislature shall provide for the speedy publication of all statute laws, and of such judicial decisions as it may deem expedient. And all laws and judicial decisions shall be free for publication by any person." According to the interpretation given by the counsel for the defendants to the second member of this section, its direct and sole design was, so far as judicial decisions are concerned, to secure to all persons the right to do precisely what the court is now called upon to restrain the defendants from doing — the right to reprint and sell, *ad libitum*, any volume of reports published in pursuance of any law of the state enacted in obedience to the injunction contained in the first branch of this section. The counsel insist, therefore, that the act of April 9, 1850, mentioned in the bill of complaint, purporting, to a limited extent, to invest the secretary of state, for the benefit of the people of the state, with the copyright of reports to be prepared by the state reporter, is unconstitutional and void.

§ 115. *The provision of section 22, article VI of the constitution of New York of 1846, is not repugnant to the constitution and laws of the United States.*

One of the answers given to this objection is, that the expression "judicial decisions," occurring in the last member of this section of the constitution, does not admit of being restricted to the sense thus ascribed to it; but that the provision embraces, by its very terms, "all" judicial decisions, whether required by law to be published or not, and would extend, therefore, to the reports which have been, and are likely to continue to be, published of the decisions of other courts of the state of New York, as well as to the reports now in controversy. And it is rightly argued that, if this is the true construction, and if it is true, also, that the absolute common right intended to be secured was that of reprinting reports prepared and published by others, it would follow that this provision of the constitution of the state of New York is repugnant to the constitution and laws of the United States, and therefore void; for it is undeniable that a state cannot in any form interfere in this respect with the rights of private persons. For this reason, unless this interpretation of the language of the state constitution is unavoidable, it ought to be rejected; and, after carefully considering the ingenious argument of the counsel for the defendants, designed to show that the judicial decisions referred to in the last member of the section under consideration are such only as shall be designated by the legislature for publication in obedience to the first part of the section, I am of opinion that this proposition cannot be maintained. It is inconsistent with the phraseology actually used, and with the omission of words which, if such an interpretation had been intended, would naturally have been employed. The words "*all* judicial decisions" must be held to mean what they naturally import — not all *such* judicial decisions only as the legislature

should direct to be published, which is what they do not import. It follows, then, that if the license designed to be secured to all persons extends to the reprinting of all reports prepared and published by others, notwithstanding a copyright may be asserted therein by the author, this provision is obnoxious to the objection that it transcends the limits of state authority, and is consequently invalid. It is necessary, therefore, as already observed, to seek for it some other interpretation, which, while consistent with the language of the provision, and with its spirit, so far as that can be discerned, shall be consistent also with the constitution and laws of the United States; and, in my judgment, there is no serious difficulty in finding such an interpretation, although it may be no easy task to discover the precise nature of the evil against which the provision was designed to guard.

On looking into the proceedings of the convention, I observe that this section was proposed by a member, after the adoption, on the same day, of a resolution to arrest all further debate on the article relating to the judiciary, and having been decided by the president to fall within the scope of this resolution, the vote upon it was taken immediately, without explanation or debate, and it was adopted by a majority of twenty-seven. Its language is mandatory, and it is addressed to the legislature. It directs (1) That provision shall be made by law for the speedy publication of *all* statute laws, and of *such* judicial decisions as the legislature may deem expedient; and (2) that all laws and judicial decisions shall be free for publication by any person. This last direction is obviously intended to promote and extend the design of the first. This design was expressed in the section, as originally proposed and adopted, by the addition, to what now stands as the first sentence, of the words "so as to render the same easy of acquisition by the people;" and then followed, separated only by a semicolon, the words which now stand as the second sentence. The words just quoted were expunged in the process of final revision, doubtless because they were seen to be wholly unnecessary, the object being too apparent to require elucidation, and a period was substituted for the semicolon. I have narrated the history of this section, not because it appears to me to shed much light upon the question under consideration, but because it is relied on by the counsel for the defendants to support the interpretation on which they insist. A deliberate review of their argument on this point has failed to convince me of its soundness. The just view of the subject appears to me to be this: The first part of the section having peremptorily enjoined the speedy publication of the more authoritative and important judicial decisions of which it most concerned the public to be speedily apprised, the rest was left to private enterprise; but, lest some impediment should be thrown in the way (not by the claim on the part of the author to copyright, which was beyond the power of the convention), but by the legislature or the courts, or in some other way not easily divined, it was, by the second part of the section, ordained that no such restriction should be imposed, and it was made the duty of the legislature, if necessary, to see that this should not be done. In other words, it was declared, not that when one person had performed the labor of preparing, and incurred the expense of printing from manuscript, a volume of reports, any other person should be at liberty, in spite of the author or his assignee, to intercept and appropriate, or destroy, the just rewards of the enterprise, by rapaciously seizing upon the book and reprinting it, but that the right to engage in such original enterprises should remain common to all.

Assuming this, as I feel warranted in doing, to be the just interpretation of this constitutional provision, I dismiss it from further consideration.

§ 116. *The act of the legislature of New York of April 9, 1850, is not inconsistent with the constitution of New York.*

But it is further objected by the counsel for the defendants that, conceding the validity of the act of April 9, 1850, in virtue of which the copyright of the book in question is claimed by the plaintiffs, still the defendants are not chargeable with any infringement of this right, because, as they argue, the book does not contain anything which can properly be denominated "notes or references," to which alone a copyright in behalf of the people of the state of New York is asserted by the act. The answer given to this objection by the learned counsel for the plaintiffs is, that the prohibition contained in this act against the securing or taking by any person of a copyright for the reports of cases decided by the court of appeals, with the exception therein mentioned, is in conflict with the provisions of the constitution and laws of the United States securing, absolutely, to authors and their assignees, the exclusive right to the fruits of their intellectual labors. But to this it may be replied that Mr. Comstock, having consented to accept and hold his office, and to prepare the book in question for the press, under a law of the state expressly declaring that he should have no pecuniary interest in the work, and that no copyright should be taken therefor, except to a limited extent by the secretary of state, for the benefit of the people of the state, must be considered as having surrendered his rights as author, and was incompetent to confer them on another; or, it may be said — which, however, would be little else than the assertion of the same principle in a different form — that the rights and disabilities of his office being prescribed by law, are to be regarded as conditions of the tenure by which it was held, which were binding upon him, and which a court of justice ought not to aid him in violating. But it is to be further observed that the enjoyment of the right in question is by law made to depend, except in the case of an unpublished manuscript, upon the condition of taking certain steps demonstrative of the author's intention to insist upon his rights in this respect, and adapted to convey notice to all others of such intention, and that, if he omits this precaution, he is to be deemed to have abandoned his claim to protection. Now, in the present case, the author has not complied with this condition. It is said, indeed, that Mr. Morgan is the assignee of the rights of the author, and, as such, has taken the required measures for their security. But Mr. Morgan acted throughout in a fiduciary and representative character, as the agent of the people of the state of New York, and in execution of a trust imposed upon him by law. And it thence follows, I think, that he could not in that character acquire, and that he was therefore incompetent to convey to the plaintiffs, any rights cognizable in a judicial tribunal, except those of which, according to the terms of the laws under which he acted, he was to become the recipient. To this extent, however, it may be assumed, as I do not understand it to be denied, that he might lawfully act, and that his acts ought to be held valid and effectual by this court, provided the laws under which he acted are, as I hold them to be, not inconsistent with the constitution of the state of New York. It becomes necessary, therefore, in the next place, to ascertain the limits of the authority vested in the secretary of state, in trust for the people, by the act of April 9, 1850; and for this purpose, before proceeding to notice more particularly the provisions of this act, I propose to advert to some antecedent enactments relating to the subject.

§ 117. *New York legislation on the subject of the reporting of judicial decisions.*

At the session of the legislature next after the adoption of the constitution, an act was passed providing for the appointment, by the governor and lieutenant-governor, of a reporter of the decisions of the court of appeals, to be denominated "state reporter," who should hold his office for three years, unless sooner removed by the concurrent vote of both branches of the legislature. This act (Act of May 12, 1847, ch. 280, §§ 73, 74) contains the following enactment: "The reporter shall have no pecuniary interest in such reports, but they shall be published by the secretary of state, under the supervision of the reporter, by contract to be entered into pursuant to the provisions of the act entitled 'An act in relation to the public printing,' passed March 5, 1846. Such contract shall be made with the person who, in addition to furnishing the said secretary sixty-four copies of each volume of said reports, bound in leather, as soon as may be after the same is prepared, shall agree to publish and to sell them at the lowest price by the number and volume, according to the pages therein contained. Such reports shall be published in numbers every second month. And the reporter shall prepare for each volume such digests and tables of contents as are usually prepared for similar reports. If the reporter shall neglect to discharge his duty faithfully, it shall be the duty of the said court to report that fact to the legislature, to the end that he may be removed from office. The reporter shall not practice as an attorney, counselor or solicitor in any court." Of the copies to be delivered to the secretary of state, the act requires one copy to be by him delivered to the clerk of each county of the state. It was under this act that Mr. Comstock, as alleged in the bill, was, on the 27th day of December, 1847, appointed state reporter. By another act, passed on the same day, the salary of this officer had been fixed at the sum of \$2,000.

By an amendatory act passed April 11, 1848, the mode of appointing the state reporter was changed by the association of the attorney-general with the governor and lieutenant-governor for that purpose, and it was again enacted that the reporter should "have no pecuniary interest" in the reports to be prepared by him as such reporter, but that the same should "be published under the supervision of the reporter, by contract to be entered into by the reporter, secretary of state and comptroller, with the person or persons who, in addition to furnishing the said secretary of state with sixty-four copies of each volume, shall agree to publish and sell the said reports on terms the most advantageous to the public, and at a rate not exceeding the price of \$3 for a volume of five hundred pages, regard being had to the proper execution of the work." The third section of this act is as follows: "§ 3. It shall not be lawful for the reporter, or any other person within this state, to secure or obtain any copyright for said reports, notes or references, but the same may be published by any persons." It may not be amiss here also to recite the remaining provisions of this act. They are contained in the fourth section and are as follows: "As often as the reporter shall have prepared for publication sufficient of the said reports, with notes and references, to constitute two hundred and fifty pages of the usual size of law reports, he shall cause the same to be published in pamphlet form, with such headings as will appear in the bound volumes, and shall furnish a copy thereof to each county clerk's office at the expense of the state, and keep the same on sale at contract prices for all persons who may want to purchase; such printing to be done by the

person who shall contract to publish the reports under this act at and in proportion to the prices stipulated in his contract." Act of April 11, 1848, ch. 224.

The only remaining enactments which it is necessary to notice are contained in an act to amend that last cited, the third section of which is thereby declared to be amended so as to read as follows: "§ 3. It shall not be lawful for the reporter, or any other person within this state, to secure or obtain any copyright for said reports of the judicial decisions of the court of appeals, but the same may be published by any person." The act further provides: "§ 2. The copyright of any notes or references made by the state reporter to any of said reports shall be vested in the secretary of state, for the benefit of the people of this state." Act of April 9, 1850, ch. 245.

§ 118. *What are "notes and references" as used in the New York act of April 9, 1850.*

Now, the question is whether, according to the proper construction of the words, "any notes or references made by the state reporter to any of said reports," contained in the last mentioned act, these words comprise any, and, if so, what portion or portions of the volume in controversy. The counsel for the defendants strenuously insist they are referable exclusively to such original notes or references as the state reporter might see fit of his own accord to superadd to what would otherwise be in themselves complete reports of the cases by him reported; and the example of the late Mr. Justice Cowen, while reporter to the supreme court of the state of New York, to whom the profession were so much indebted for the learned essays with which his great industry and love of jurisprudence impelled him to accompany his reports, is adduced as an example.

The words "notes or references," as we have seen, first occur in the act of April 11, 1848, chapter 224. By the third section of that act the state reporter and all other persons are expressly forbidden "to secure or obtain any copyright for said reports, notes or references;" and the fourth section directs the immediate publication of the reports, from time to time, as often as "the said reports, with notes and references," shall be sufficient to make two hundred and fifty pages. Now, it is to be observed that the words in question, in the sense in which they are understood by the counsel for the defendants, import nothing that has ever been supposed to pertain to the business of reporting judicial decisions, and nothing, therefore, which a reporter has ever done except at his own option merely. It is what few reporters have in fact done to any considerable extent, and what others have altogether omitted. There is nothing in either of the statutes relative to the subject, expressive of any design to exact this kind of labor of the reporter, and nothing in any other part of them indicative of any expectation that he would engage in it. It was what the state reporter might, perhaps, lawfully do to a moderate extent if he should see fit, but what he certainly was at liberty to omit at his pleasure, and what it could not therefore reasonably be assumed he was likely to undertake. It was what, if he should perform it, would be the fruits of his extraordinary labor, and that to the pecuniary profits of which, therefore, he would in justice be exclusively entitled. Without stopping, then, to inquire whether the legislature had the power, is it probable that it entertained the design to deprive him of the reward due to his enterprise and learning? And, having done this by the prohibition contained in the third section of the act, is it probable that it would have been assumed, as it seems to have been done

in the next succeeding section, that the reporter would nevertheless gratuitously accompany his reports with such notes or references? I am of opinion that these questions must be answered in the negative; and, unless the words in question are to receive a different interpretation in the act of April 9, 1850, which, to the extent of its provisions, must govern the rights of the plaintiffs, so far as they depend on state legislation, it follows that the rights with which the act invests the secretary of state are not restricted to the narrow limits insisted on by the counsel for the defendants. The two acts being *in pari materia*, the presumption is strong that the words "notes or references" were not designed to be used in different senses. But, in truth, the interpretation which they appear to me, as I have already stated, to require in the act of 1848, is fortified, in its application to them, in the act of 1850. This act declares that the copyright of any notes or references made, etc., shall be vested in the secretary of state for the benefit of the people. Now, bearing in mind the nature of the notes or references of which the words of the act are supposed by the defendants' counsel to be descriptive, and the improbability that the reporter would even take the trouble to make them at all, is it to be imagined that the legislature thought it worth while, to say nothing of the injustice of doing so, solemnly to claim them as the property of the state? I think not, and it follows, therefore, that these words were intended to designate some portion or portions of the reports, constituting an essential ingredient of their integral composition, and which the state reporter, as such, was therefore bound to supply. The next question, then, is, What part or parts of the reports are to be considered as comprised by these words? And herein lies the chief difficulty of determining their true interpretation.

§ 119. *The word "notes," in the act of April 9, 1850, of New York, comprises the summary immediately following the title of the suit, the foot-notes, and the statement of the arguments of counsel.*

The word *note* has many significations. Among the fifteen definitions given of it by Webster, the greatest lexicographer of the English language that has yet appeared, the twelfth is this: "Annotation; commentary; as the *notes* in Scott's Bible; to write *notes* on Homer." This is the definition insisted on by the defendants' counsel, but which, for the reasons already assigned, I hold to be inadmissible. The third definition given by Dr. Webster is this: "A short remark; a passage or explanation in the margin of a book;" and his fourth definition is this: "A minute, memorandum or short writing, intended to assist the memory." These are all the definitions which it is pertinent to notice, and the two last mentioned furnish, in my opinion, the proper guide in determining the scope of the word *note* in the statute. That it comprises the summary of the points decided by the court, which immediately follows the title of the suit in each case reported, and the foot-notes, in the volume in question, is indubitable. Does it embrace, also, the arguments of counsel? The process by which this portion of the report of a case is prepared is well known. The arguments are unwritten, and addressed to the court *ore tenus*, and a minute or memorandum, or short writing, intended to assist the memory of the reporter, is made by him at the time, from which he constructs the arguments which ultimately appear as one of the constituent elements of his report. I am of opinion, therefore, that they ought to be adjudged to fall within the scope of the expression, "any notes made by the reporter."

§ 120. *What are "references."*

The only remaining portions of the matter contained in the book in ques-

tion (which I understand to be, in fact, the *first part* of volume III. of Comstock's Reports, this being all that I have seen, and all that the defendants in their affidavit admit to have been published) that are susceptible of being made the subject of copyright, even independently of the state law, are the abstracts of the pleadings and statements of facts, which form the basis of the decisions reported. These can, in no proper sense, be denominated *notes*, nor am I able to perceive that they fall under the denomination of "references." If the book contains anything embraced by this latter word, it is the table of contents, entitled "cases reported," which consists of the titles of the suits comprised in the book, with *references* to the several particular pages where the cases are to be severally found. This constitutes but a very inconsiderable portion of the work; and, as it would be inapplicable to a reprint, unless its pages corresponded exactly with those of the original, I presume it has not been appropriated by the defendants, though I have not seen their book.

§ 121. *An equitable title in a copyright will authorize an injunction in favor of its owner.*

It appearing, from this review of the course of state legislation, that a copyright in the work in dispute was reserved to the people of the state, and the authority to secure it for their benefit vested in Mr. Morgan, the next question for consideration is, whether, in virtue of the contract with the plaintiffs, set forth in their bill of complaint, they obtained such a title to the subject of the controversy as is requisite to enable them to maintain their suit.

In some of the English cases to which I am referred, it is said that, to entitle a plaintiff to an injunction, in a case of this nature, he must establish a valid legal title to the copyright. Undoubtedly, when he relies upon a legal title, he is bound to set it forth, and it must appear to be at least *prima facie* valid. But it has also been held that there are cases in which an equitable title is sufficient to entitle its possessor to protection in this form. In the present case, an agreement has been entered into between the plaintiffs and certain officers of the state, designated by law for that purpose, the author of the work in question and the secretary of state being of the number, by which it is stipulated that, upon the terms therein mentioned, the plaintiffs shall have the exclusive right to the publication of the decisions of the court of appeals, and to the benefit of the copyright to be taken out in behalf of the state therefor, during the period of five years. By an act of the legislature then recently passed, it was declared that the copyright of certain specified portions of the reports of such decisions should be vested in the secretary of state, for the benefit of the people of the state. With respect to the particular manner in which this right should be made advantageous to the people, the act was not explicit. This was left, therefore, measurably, to the discretion of the secretary. He and his associates were, however, expressly required by law to see that the reports were speedily published and exposed to sale at a price not exceeding \$3 per volume. Perhaps they would have been authorized to contract for their publication and sale at that price, on condition that the publisher would pay a certain sum to the state for the privilege, provided a suitable person could have been found willing to become a party to such a contract. But they saw fit, and in strict accordance with the policy adopted by the legislature, of providing a sufficient supply of the reports at moderate prices, so to use the copyright as to make it conducive to that end, by offering to confer the emoluments arising therefrom, for a portion of the period during which it was to continue, on the publisher who would agree to furnish the required supply

of the reports at the lowest prices. The plaintiffs having, as it is to be presumed, offered the most favorable terms, the contract was made with them, they stipulating to publish and sell the reports at the very low rate of \$2.50 for a volume of five hundred pages.

§ 122. *Validity of copyright taken out by a state.*

It is objected that this contract was entered into before the book in controversy was prepared for the press. But, from the nature of the case, this could not have been otherwise without incurring delays subversive of the policy of the laws under which the agents of the state were acting. It seems clear therefore, without pursuing the subject further, that these gentlemen, in entering into this contract, acted in strict accordance with the laws of the state, and that the plaintiffs are justly entitled to all the benefits arising from it which the state could confer. If it is not valid and effectual to the extent contended for by the plaintiffs, it is altogether nugatory, and the plaintiffs must seek redress, not from a judicial tribunal for the violation of their copyright, but from the state for the breach of its plighted faith. It is true they are not the assignees of the entire privilege reserved by the state, of asserting a copyright to the volumes of the reports to be prepared by the state reporter as they shall be successively issued from the press through all future time; but to the beneficial interest in the copyright of the volumes to be published during the stipulated term of five years, it was designed to give them a perfect title. So far as this could be done by the supreme authority of the state, it has been done; and I am not aware of any grounds on which I should be warranted in deciding that it has not been done effectually. If it has not been, it must be because the subject is not in its nature susceptible of municipal regulation. But, in the compact between the state and the state reporter, by which the latter relinquishes and the former assumes the copyright in the reports, I can discern nothing inconsistent with the constitution and laws of the United States. It may be regarded as an assignment by operation of law. Can it be successfully contended that the exclusive right guarantied by the laws of the Union has in this instance become extinct? If not, it must have vested in the state and passed temporarily to the plaintiffs, who alone at the present time are competent to enforce it. Assuming this to be so, I think it follows that the plaintiffs have shown themselves to be in possession of a title to the work in question, of which this court is bound to take cognizance. Indeed there is no want of precedent in our own courts on this point, if it were necessary to invoke it. Thus, in the case of *Folsom v. Marsh*, 2 Story, 100 (§§ 249-56, *infra*), which was a bill in equity to restrain the infringement of Dr. Sparks' copyright in the writings of Washington, the interest claimed by the plaintiffs was described in the bill to consist in their having "assumed a part of the risk and responsibility of publishing the said work;" and the suit was maintained and a perpetual injunction awarded.

§ 123. *As to the granting of injunctions in case of doubt and uncertainty.*

Under this view of the substantial merits of the controversy, it remains only to determine whether an injunction ought to be withheld for the reasons so earnestly addressed by the learned counsel for the defendants to the discretion of the court. It certainly must be conceded that the case involves questions by no means entirely free from obscurity and doubt; and if, as the counsel seem to suppose, this ingredient of itself always constitutes a conclusive objection to the grant of a provisional injunction to restrain an alleged

piracy of a copyright, the only duty which would remain to me after making this concession would be the simple denial of the motion. But it is for the express purpose of resolving doubts with respect to the rights and responsibilities of parties, that courts are instituted; and, even on a motion of this nature, it is not every kind or degree of doubt that will absolve a judge from the responsibility of deciding questions presented for his consideration, much less from the labor of investigation and reflection. It must at least be a serious doubt which remains after the faithful application of his faculties to its solution. If it were otherwise, this form of redress would be illusory. Doubts affecting a plaintiff's title may arise either from uncertainty with respect to the facts, or with respect to the law on which the title depends. In the present case I do not understand that there is any dispute concerning the facts—certainly none respecting which there is any probability, not to say possibility, that any conflicting evidence could be adduced. There is nothing, therefore, which it would be proper to submit to the decision of a jury. The questions on which the rights of the parties depend are questions of law, arising mainly out of certain provisions contained in the constitution and statutes of the state of New York, and these questions the court is bound, at some stage of the controversy, to decide. But it is objected that they are new, never having been settled by acquiescence, or *by the adjudication of any court*. An injunction in a case of this kind, it is said, has never been granted in England without a trial at law; and it is broadly intimated that to do it in this case would be *iniquitous*. It would, it is argued, be to prejudge the case to decide it, and to award execution before trial. These are grave objections, and, if well founded, certainly ought to be held to be decisive. But it is because these questions have never before been judicially determined that they are now before this court for decision; and, with respect to the practice of English courts of chancery, of sending pure questions of law to be settled in a suit at law, the adoption of this practice by the circuit courts of the United States would, for obvious reasons, be an absurdity. As to the assertion that to allow an injunction now would be to decide the cause without a trial, it is proper to remind the counsel that the case has already been elaborately argued; and it is easy to see that its legal features are not likely to be essentially changed by the substitution of a formal answer for the affidavit of one of the defendants. The parties, therefore, have already had a trial of the only kind they ever can have, while the question is not, as it would be on a final hearing, whether the defendants should be perpetually enjoined, but whether this shall be done temporarily, leaving them at liberty, if they see fit, to re-argue the case on a final hearing.

If any additional reasons were wanting why I should not hold myself at liberty fastidiously to decline the responsibility of giving effect to the conclusions at which I have, however doubtingly, arrived, by granting an injunction, such reasons might easily be found in the demerits of the defendants. There can be no injustice in assuming that they have acted with full knowledge of all the facts detailed in the bill of complaint. Their extraordinary letter, already mentioned, shows this. They are chargeable, therefore, not only with a wilful and apparently very discreditable encroachment upon the rights of the plaintiffs, but with openly arraying themselves against the supreme authority of the state. There may possibly be circumstances, growing out of a spirit of rivalry between the parties, affording some palliation for conduct ap-

parently so unjust and audacious; but of this I know nothing, and it may at least be safely assumed that they can furnish no shadow of justification to the defendants.

I am of opinion, therefore, that the plaintiffs are entitled to an injunction restraining the defendants, their agents, servants and workmen, until the further order of the court, from further printing, publishing, selling, or otherwise disposing of any copy or copies of the reports of cases argued and determined in the court of appeals of the state of New York, already published or to be hereafter published by the plaintiffs in pursuance of their contract with the state set forth in their bill, containing any of the head-notes or summary statements of points decided, or any arguments of counsel, or any foot-notes, copied, taken or colorably altered from any book so published by the plaintiffs.

BULLINGER *v.* MACKEY.

(Circuit Court for New York: 15 Blatchford, 550-562. 1879.)

Opinion by BENEDICT, J.

STATEMENT OF FACTS.—This is a suit in equity for damages and an injunction by reason of an alleged infringement by the defendant of a copyright of the plaintiff. The bill avers that heretofore, and before the 26th day of March, 1870, the plaintiff was the proprietor of a certain book, the title whereof was "Supplement to the Counting House Monitor;" that, in the year 1872, he published his book, revised and amended, under the title "Monitor Post Office, Banking and Shippers' Guide;" that, in 1873, he revised and amended and published his said book under the title "The Monitor Post Office, Telegraph, Express and Shipping Guide for the United States and Canada;" and that, in 1876, he revised and amended and published his said book (designated in this case plaintiff's exhibit H), under the title "The Monitor Guide to Post Office and Railroad Stations in the United States and Canada, with shipping directions by express and freight lines. A supplement to the Counting House Monitor." These books the plaintiff asserts have a value by reason of certain peculiarities of structure and the mode of using arbitrary signs and figures, and he avers that the said plan, combination, arrangement and peculiarity of structure were the original work of the plaintiff, and that the exclusive right thereto belongs to him. In regard to each of said publications, the bill avers due performance of all the acts required by statute to be performed to secure a copyright thereof, as to which there is no controversy. The bill then charges that the defendant, in February, 1877, published a book (designated, in this case, defendant's exhibit J) entitled "Mackey's Shippers' Guide, or Mackey's Guide to all the Express, Telegraph, Money Order and Post Offices in the United States and Canada, with a complete list of all railroads, their length, starting point and terminus, giving each station and by what road it is reached, and, in addition, shows what express and freight lines will deliver goods to all the above points." This book, the plaintiff avers, is copied and printed from the books of the plaintiff described in the bill, and is an infringement on the plaintiff's said copyright, in that it is, in all respects, identical with the plaintiff's books, in the plan, combination, arrangement and method of imparting the same information. The defendant, in his answer, denies that his book was copied from the plaintiff's books. He also denies that the plan, combination, arrangement

and peculiarities of structure displayed in the plaintiff's books are the original work of the plaintiff, or that he is entitled to the exclusive right to use the same. He further avers that, since 1862, he has published periodicals containing information of the same character as that contained in the plaintiff's work; that all the information contained in the plaintiff's books had been given to the public in substantially the same form by other publications, including those of the defendant, prior to the publication of the plaintiff's works, and that the plan, arrangement or combination of matters in the plaintiff's books were not new, nor were the materials contained in them brought together in a new form for the first time by the plaintiff, but the same had been given to the public in substantially the same form in certain prior publications designated in the answer. Testimony having been taken upon the issue thus raised, it was referred to a master to report to the court, among other things, "the identity, if any, and in what particulars, of plan, arrangement, combination of materials and the method of imparting instruction, between complainant's exhibit H, and defendant's exhibit J; also, the identity, if any, and in what particulars, of plan, combination of materials, arrangement and the methods of imparting information, between the complainant's publication set forth in the bill, and such of the publications set forth in the answer as may appear to have been made prior to the date of complainant's copyright, in the respect, if any, where exhibits H and J shall be found to be identical." The master reported, among other things, the following conclusions of fact: "Complainant's exhibit H and defendant's exhibit J are identical in the following particulars of plan, viz.: There are compilations of tables or lists which show how to ship goods from New York to any place that is a railroad station or post-office in the United States or the dominion of Canada, by railroad, express line or freight line. They are identical in the following particulars of arrangement, viz.: They are in two general divisions, covering the United States and the dominion of Canada. In the first general division are title-pages, publisher's notice and explanations, list of railroads in the United States, list of places in the United States, but not arranged in identically the same way. In the second general division are lists of places in the dominion of Canada alphabetically arranged. Shipping directions upon the last leaf of both. They are identical in the following particulars of combination of materials: The lists of railroads in each division are arranged alphabetically, with numbers for reference set against each name, but not the same numbers. In the list of places are combined the name of the place; the county in which it is; the railroad, by reference number, upon which it is; if it be on a railroad, the name or abbreviation thereof; the express company by which it may be reached; the names of postoffices are in roman type; the names of railroad stations, not postoffices, are in italic type; money order postoffices are marked by a star; county seats, in some cases, are marked by letters c. h. These combinations are made in the second division alphabetically for the whole dominion. Upon each page of the body of the work, in both divisions, are given explanations of the signs used and references to other pages of the work. They are identical in the following particulars of their method of imparting information: They give information of the county and state in which any given place is located, the express lines from New York by which it may be reached, and the railroad, by reference numbers, on which it is a station, if it be on a railroad, by arranging the names and numbers in corresponding columns, but not in identically the same form of arrangement. They

give information whether a place is or is not a money-order postoffice by placing a star against the names of places that are such postoffices. They give, in some cases, information whether places are county seats by placing the letters c. h. against their names. They give information whether a place is or is not a railroad station as well as a postoffice by putting the names of such stations as are not also postoffices in italic type. They give generally, but not in all cases, a reference upon each page of list of places to other pages where other directions how to ship goods for those places are given. They give information about freight lines, grouped by states." The master further reported as follows: "All the particulars of plan, arrangement, combination of materials and method of imparting information, as above described by him, are not found in any one of the prior publications set up in the answer. In no one of said prior publications is there the identical plan above described by him and found in the plaintiff's exhibit H and the defendant's exhibit J. In one of said prior publications, viz., Teller's American Shipping Express Guide, there is the same general arrangement as described by him and found in plaintiff's exhibit H and defendant's exhibit J. Many of such prior works contain lists of places arranged alphabetically, as in exhibit H, but in none are there the same lists or the same arrangement of places in the list. Some of said prior works contain lists of railroads alphabetically arranged, with reference numbers; others contain lists of places, combining name of place, county, railroad (but not by reference numbers) and express, but, in some cases, the express line on which it or its nearest railroad station is located is not, as in the plaintiff's book, the express that carries goods from New York. Some of said prior publications convey the same information conveyed by the plaintiff's work, but by a different method. In some of the prior publications money-order postoffices are, as in the plaintiff's work, indicated by a star or some equivalent sign; in some a county seat is indicated by the letters c. h. Many of the prior publications contain list of places, of postoffices, of railroads, of freight lines, alphabetically arranged. Many group their information by states. These prior publications were published for some part or parts of the same general purpose as the complainant's exhibit H and the defendant's exhibit J, and contain some part or parts of the same information, but not in the same form or arrangement or combination of materials in any case."

To this report of the master various exceptions were taken, and the case was brought to a hearing upon such exceptions, and the pleadings and proofs, at the same time. Owing to the restricted form of the order of reference, the master's report does not cover all the questions of fact necessary for a disposal of the case. As far as it goes, however, upon the evidence, it must be deemed conclusive of the facts stated therein. The other questions of fact, and the questions of law applicable thereto, are now to be determined by the court.

In regard to the exceptions it is sufficient, therefore, to say that I see no reason to differ with the master as to any of his conclusions of fact, and none of the exceptions appear to be well taken.

§ 124. *A compilation of information respecting railroads, etc., is a proper subject of a copyright.*

In disposing of the questions raised by the answer it will be convenient to notice, first, the point made by the defendant that the plaintiff's work cannot be a subject of copyright, because not within the scope of the provision of the constitution which grants the power "to promote the progress of science and useful arts, by securing for limited times to authors and inventors the exclu-

sive right to their respective writings and discoveries." Upon this point it is sufficient to say that I am unable to find a substantial distinction between the plaintiff's works and those works that in other cases have been adjudged to be within the scope of the constitution and the copyright laws, such, for instance, as maps, "The Advertiser's and Collector's Chart," hereafter referred to, "The Ladies' Chart for cutting dresses and basques for ladies." *Drury v. Ewing*, 1 Bond, 541 (§§ 112-14, *supra*).

§ 125. *How the fact that the plan, arrangement and combination of a copyrighted work originated in the brain of the author may be proved.*

I next notice the point made that the plaintiff has not produced proper evidence to show himself the author or proprietor of his works, within the meaning of the copyright laws. The argument here is that no one but the plaintiff himself can legally establish the fact that the plan, arrangement and combination of his works originated in his brain. But there is evidence showing that the plaintiff, by his own labor and that of persons employed by him and working under his direction, gathered together from various original sources the material of his book; that the manuscript in which the matter was arranged was partly in his handwriting; and that from the manuscript the work was printed for him at his expense. It was not necessary that these acts of the plaintiff should be proved by the testimony of the plaintiff. The testimony of any person who saw them done is primary and direct evidence of their having been done, and, in the absence of any testimony to the contrary, established the fact that the plaintiff gathered together the information conveyed by his book, arranged that information as it appears in the book, and caused it to be printed in that form. The acts of the plaintiff thus proved to have been done in preparing his work are those of a compiler. A compiler is an author, within the meaning of the constitution and the copyright laws.

A more important question is raised by the averment in the bill that the defendant's book, exhibit J, was copied from the books of the plaintiff. If this averment has been proved, the defendant has infringed upon the plaintiff's copyright, for it is not to be doubted that the plaintiff acquired the right to prevent any person from appropriating the fruits of his labor by making a transcript of his book, without any other skilled labor or expense than that involved in making and publishing the copy, and it is equally true that a copy so made would infringe upon the plaintiff's copyright, notwithstanding it might appear that colorable alterations had been introduced into the copy for the purpose of disguising the fact that the work was but a transcript. But the evidence wholly fails to support the averment that the defendant's book is copied from the plaintiff's books. Notwithstanding the similarity between the plaintiff's exhibit H and the defendant's exhibit J, which the master has pointed out, it is impossible to find that the only labor expended by the defendant was that of making a transcript of the plaintiff's book. Here the character and object of the works, as well as their subject-matter, must not be overlooked. When these features are considered, it is very easy to see how two works of this character may be as similar as the master has found these to be, and yet the one not a transcript from the other. The points of similarity found by the master may well have arisen from the character of the publication, the object intended to be served, and the nature of the information sought to be conveyed; and there are many points of difference. The master was not required to report the points of difference between the conflicting publications, but many such are obvious from an inspection of the two books,

plaintiff's exhibit H and defendant's exhibit J. Among other differences may be noticed the general appearance of the books and their title-pages. In these respects they are so dissimilar that it would be impossible for any intelligent person to mistake the one for the other. Evidently there was no effort on the part of the defendant to impose upon the public by issuing a book similar in appearance to the plaintiff's books. The two books do not convey the same information. To notice one instance, the defendant's list of railroads, under the letter A, contains twenty-five main lines, while the plaintiff's list, under letter A, gives but fourteen lines. The lists of railroads are not identical in the names given. The defendant, in his table, gives the starting point and termination of each railroad, with its length, while the plaintiff's table gives no such information. The plaintiff arranges his list of postoffices and railroad stations for each division alphabetically, while in the defendant's book, postoffices and railroads are arranged alphabetically by states. This is a very substantial difference, sufficient, I apprehend, in some cases, to determine a choice between the two books. In the plaintiff's books, the information respecting freight lines is given in a place by itself, to which reference is made on each page of the table. In the defendant's book, information of the same character, but not the same information, is conveyed by inserting in the tables a list of reference numbers, by which reference is made to certain freight lines given at the bottom of each page of the tables. The directions for shipping freight are wholly dissimilar in the two books. The method of numbering the railroads is not the same in both books, nor are reference numbers used according to the same system. According to the system of the plaintiff's books, each main line of railroad is given its reference number, and to each line that is a branch of a main line is given the number of its main line, with a "superior" number attached thereto, whereby it is indicated that the line is a branch of such main line. In the defendant's book, both main line and branch lines of said roads are numbered continuously. These are not mere colorable differences, made for the purpose of concealing a literary piracy, but they are substantial, and forbid the conclusion that the defendant has copied the plaintiff's books. Moreover there is direct evidence, uncontradicted, showing that the defendant's book was compiled by him from original sources of information, by the exercise of labor and skill of his own, and the expenditure of his money, and was not made by transcribing from the plaintiff's book the information there collected.

In regard to the defendant's use of reference numbers attached to a list of railroads, and set opposite the names of towns, in the list of towns, to indicate the railroad by which that town can be reached, I think it may properly be inferred, from the facts proved, that the use of this method in the plaintiff's book, exhibit H, suggested to the defendant its use in his book, exhibit J. But it is not sufficient to show that it may have been suggested by the plaintiff's work. *Emerson v. Davies*, 3 Story, 768, 787 (§§ 270-79, *infra*). It must also appear that it was new and original with the plaintiff. Here the contrary appears, for the same system is found in actual use, in connection with a list of railroads, in "The Travelers' Official Guide," published in 1871, defendant's exhibit 10.

§ 126. *A compilation made from original sources is a new work.*

Upon the evidence, therefore, it cannot be held that the defendant's book is a copy of the plaintiff's books, within the meaning of the copyright laws. In such cases, each new compilation, where it is the result of labor devoted to

gathering from original sources, and to arranging in convenient form, facts open to be published by any one, is a new work. The one compiler is as much entitled to the fruit of his labor as the other to the fruit of his, and both are, by the copyright laws, protected in an equal degree against the appropriation of that labor by one who does not compile but only copies.

Works of this character appear to me to stand upon very much the same footing with maps, of which it is said, in *Emerson v. Davies*, 3 Story, 768, 781 (§§ 270-79, *infra*), by Story, J.: "A man has a right to the copyright of a map of a state or county which he has surveyed, or caused to be compiled from existing materials at his own expense of skill or labor or money. Another man may publish another map of the same state or county, by using the like means or materials and the like skill, labor and expense. But then he has no right to publish a map taken substantially and designedly from the map of the other person, without any such exercise of skill or labor or expense." What has been already said disposes of the charge in the bill that the defendant's book is copied from the plaintiff's books.

The remaining charge in the bill, demanding attention, is, that the defendant's book is, in all respects, identical with the plaintiff's books, in the plan, combination, arrangement and method of imparting the same information, and for this reason is an infringement on the plaintiff's copyright. It appears by the master's report that the defendant's book is identical with the plaintiff's books in certain particulars of plan, combination, arrangement and method of imparting information; and it also appears from the proofs, that, in certain other particulars of plan, arrangement and method of imparting information, the books are wholly dissimilar in the information they convey. Now, it may be conceded that there is nothing in the character of the plaintiff's work to make it an exception to the rule that has been declared in cases respecting other compilations, that "every author of a book has a copyright in the plan, arrangement and combination of his materials, if it be new and original in substance." But, before the plaintiff can invoke an application of this rule, he must make it appear that his book exhibits a substantially new and original system of arranging material of that character, which system was his own invention. This he has not been able to do. Not every method of arranging material requires invention. No invention, in the legal sense, would be required to arrange a list of names in the reverse order of the alphabet, or to indicate a relation between two things by placing them in corresponding columns, or to state a fact in a short way, by attaching a star to a name, or adding the letters c. h. thereto, or by using different styles of type. None of the methods of imparting information employed by the plaintiff, which the master has found also employed in the defendant's book, involve invention. Nor are any of them new and original with the plaintiff. In this respect the plaintiff's case very much resembles the case of *Lawrence v. Cupples*, 9 Pat. Off. Gaz., 254, decided by Judge Shepley. There, the plaintiff issued a monthly chart, published each month, and containing information in regard to a certain class of debtors, which information was conveyed by means of a list of the debtors arranged alphabetically, with the address of the debtor, the address of the creditor, the amount of the claim, and, in some instances, the discount at which the claim would be sold for cash, arranged in tabular form. The charge was that the defendant, in a work of similar character, had adopted the plaintiff's plan in arranging the names and residences of debtors and creditors, and in stating the amounts, and in the object and purposes of said arrangement. But the

court held that, although the plan or arrangement of a book may be secured to the author, if it be the product of his own genius, there did not seem to be anything in the plaintiff's work which possessed any such novelty of plan or arrangement as would preclude any other person from making and publishing, from his own independent sources of information, similar lists. I am of the opinion that the same conclusion must be reached in regard to the work of the plaintiff. The plan, arrangement and method adopted by the plaintiff, as well as by the defendant, is such as would naturally, if not necessarily, occur to any intelligent person intending to impart information of this character. These methods spring from the necessities of the case and the character of the information intended to be conveyed; and their use by the defendant is not sufficient to constitute his book a servile imitation of the plaintiff's books. Notwithstanding the similarity of the methods visible in these books, it still remains true that the defendant's book "is the result of his own labor, skill and use of common materials and common sources of knowledge open to all men, and the resemblances are either accidental or arising from the nature of the subject." Story, J., in *Emerson v. Davies*, 3 Story, 768, 793 (§§ 270-79, *infra*).

But it is said that the plaintiff was the first to combine the methods employed by him to convey his information, and is, therefore, the author of a new combination of methods, to which he has the exclusive right. It is true that, in no single prior publication, is there to be found in use all the methods of conveying information employed by the plaintiff in his work, but each of those methods has been used before, and none are original with him. What he has done is to aggregate various methods, which, when aggregated, stand now collected for the first time on a single page. This is not like the case of the arithmetic (*Emerson v. Davies*, 3 Story, 768; §§ 270-79, *infra*), where a plan of lessons, an arrangement of tables to illustrate those lessons, a gradation of examples to precede each table, in such manner as to form, with the table, a peculiar appearance of the page and an illustration of the lessons, by attaching to each example unit marks representing the numbers embraced in the example, were so combined as to constitute, in the aggregate, a new method of illustrating the subject of arithmetic. Here, there is no new combination of material, constituting a new and original work. There is a use, perhaps, a combination, of old methods, but it can scarcely be said that a new method of illustrating the subject has been produced. I say perhaps, because it may be doubtful whether there is any just analogy between the combination of methods made by the plaintiff and a patentable combination of elements in a machine. Besides, in regard to patentable combinations even, it is said that "merely bringing old devices into juxtaposition and then allowing each to work out its own effect, without the production of something novel, is not invention." *Hailes v. Van Wormer*, 20 Wall., 353 (PATENTS, §§ 867-72).

Again, if the use of the old methods selected by the plaintiff makes him the author of a new and original combination of materials, and hence the author of a new book, the defendant's position is the same; for he has not selected the same methods. His combination is, therefore, different from that of the plaintiff, not colorably, but substantially, different, and the result a work new and original with him, to which he acquired as much right as did the plaintiff when he adopted, for instance, several methods used in the prior work of Teller. To hold that, in any such case, an exclusive right can be acquired to the combination of methods employed, would be to prevent any improvement in books of the character.

My conclusion, therefore, is, that, for the reasons above stated, the plaintiff has failed to show any infringement upon his rights by the defendant, and his bill must, accordingly, be dismissed, with costs.

BAKER *v.* SELDEN.

(11 Otto, 99-107. 1879.)

APPEAL from U. S. Circuit Court, Southern District of Ohio.

Opinion by MR. JUSTICE BRADLEY.

STATEMENT OF FACTS.—Charles Selden, the testator of the complainant in this case, in the year 1859 took the requisite steps for obtaining the copyright of a book entitled “Selden’s Condensed Ledger, or Book-keeping Simplified,” the object of which was to exhibit and explain a peculiar system of book-keeping. In 1860 and 1861, he took the copyright of several other books, containing additions to and improvements upon the said system. The bill of complaint was filed against the defendant, Baker, for an alleged infringement of these copyrights. The latter, in his answer, denied that Selden was the author or designer of the books, and denied the infringement charged, and contends on the argument that the matter alleged to be infringed is not a lawful subject of copyright.

The parties went into proofs, and the various books of the complainant, as well as those sold and used by the defendant, were exhibited before the examiner, and witnesses were examined on both sides. A decree was rendered for the complainant, and the defendant appealed.

The book or series of books of which the complainant claims the copyright consists of an introductory essay explaining the system of book-keeping referred to, to which are annexed certain forms or blanks, consisting of ruled lines and headings, illustrating the system and showing how it is to be used and carried out in practice. This system effects the same results as book-keeping by double entry; but, by a peculiar arrangement of columns and headings, presents the entire operation, of a day, a week, or a month, on a single page, or on two pages facing each other, in an account-book. The defendant uses a similar plan so far as results are concerned; but makes a different arrangement of the columns, and uses different headings. If the complainant’s testator had the exclusive right to the use of the system explained in his book, it would be difficult to contend that the defendant does not infringe it, notwithstanding the difference in his form of arrangement; but if it be assumed that the system is open to public use, it seems to be equally difficult to contend that the books made and sold by the defendant are a violation of the copyright of the complainant’s book considered merely as a book explanatory of the system. Where the truths of a science or the methods of an art are the common property of the whole world, any author has the right to express the one, or explain and use the other, in his own way. As an author, Selden explained the system in a particular way. It may be conceded that Baker makes and uses account-books arranged on substantially the same system; but the proof fails to show that he has violated the copyright of Selden’s book, regarding the latter merely as an explanatory work; or that he has infringed Selden’s right in any way, unless the latter became entitled to an exclusive right in the system.

§ 127. *The copyright of a book does not secure the exclusive right of a system of book-keeping, set forth and expounded in that book.*

The evidence of the complainant is principally directed to the object of

showing that Baker uses the same system as that which is explained and illustrated in Selden's books. It becomes important, therefore, to determine whether, in obtaining the copyright of his books, he secured the exclusive right to the use of the system or method of book-keeping which the said books are intended to illustrate and explain. It is contended that he has secured such exclusive right, because no one can use the system without using substantially the same ruled lines and headings which he has appended to his books in illustration of it. In other words, it is contended that the ruled lines and headings, given to illustrate the system, are a part of the book, and, as such, are secured by the copyright; and that no one can make or use similar ruled lines and headings, or ruled lines and headings made and arranged on substantially the same system, without violating the copyright. And this is really the question to be decided in this case. Stated in another form, the question is, whether the exclusive property in a system of book-keeping can be claimed, under the law of copyright, by means of a book in which that system is explained? The complainant's bill, and the case made under it, are based on the hypothesis that it can be.

It cannot be pretended, and indeed it is not seriously urged, that the ruled lines of the complainant's account-book can be claimed under any special class of objects, other than books, named in the law of copyright existing in 1859. The law then in force was that of 1831, and specified only books, maps, charts, musical compositions, prints and engravings. An account-book, consisting of ruled lines and blank columns, cannot be called by any of these names unless by that of a book.

There is no doubt that a work on the subject of book-keeping, though only explanatory of well-known systems, may be the subject of a copyright; but then it is claimed only as a book. Such a book may be explanatory either of old systems, or of an entirely new system; and, considered as a book, as the work of an author, conveying information on the subject of book-keeping, and containing detailed explanations of the art, it may be a very valuable acquisition to the practical knowledge of the community. But there is a clear distinction between the book, as such, and the art which it is intended to illustrate. The mere statement of the proposition is so evident that it requires hardly any argument to support it. The same distinction may be predicated of every other art as well as that of book-keeping. A treatise on the composition and use of medicines, be they old or new; on the construction and use of plows, or watches, or churns; or on the mixture and application of colors for painting or dyeing; or on the mode of drawing lines to produce the effect of perspective, would be the subject of copyright; but no one would contend that the copyright of the treatise would give the exclusive right to the art or manufacture described therein. The copyright of the book, if not pirated from other works, would be valid, without regard to the novelty, or want of novelty, of its subject-matter. The novelty of the art or thing described or explained has nothing to do with the validity of the copyright. To give to the author of the book an exclusive property in the art described therein, when no examination of its novelty has ever been officially made, would be a surprise and a fraud upon the public. That is the province of letters patent, not of copyright. The claim to an invention or discovery of an art or manufacture must be subjected to the examination of the patent office before an exclusive right therein can be obtained; and it can only be secured by a patent from the government.

§ 128. *The difference between copyright and patent-right.*

The difference between the two things, letters patent and copyright, may be illustrated by reference to the subjects just enumerated. Take the case of medicines. Certain mixtures are found to be of great value in the healing art. If the discoverer writes and publishes a book on the subject (as regular physicians generally do), he gains no exclusive right to the manufacture and sale of the medicine; he gives that to the public. If he desires to acquire such exclusive right, he must obtain a patent for the mixture as a new art, manufacture, or composition of matter. He may copyright his book, if he pleases; but that only secures to him the exclusive right of printing and publishing his book. So of all other inventions or discoveries.

The copyright of a book on perspective, no matter how many drawings and illustrations it may contain, gives no exclusive right to the modes of drawing described, though they may never have been known or used before. By publishing the book, without getting a patent for the art, the latter is given to the public. The fact that the art is described in the book by illustrations of lines and figures which are reproduced in practice in the application of the art makes no difference. Those illustrations are the mere language employed by the author to convey his ideas more clearly. Had he used words of description instead of diagrams (which merely stand in the place of words), there could not be the slightest doubt that others, applying the art to practical use, might lawfully draw the lines and diagrams which were in the author's mind, and which he thus described by words in his book.

The copyright of a work on mathematical science cannot give to the author an exclusive right to the methods of operation which he propounds, or to the diagrams which he employs to explain them, so as to prevent an engineer from using them whenever occasion requires. The very object of publishing a book on science or the useful arts is to communicate to the world the useful knowledge which it contains. But this object would be frustrated if the knowledge could not be used without incurring the guilt of piracy of the book. And where the art it teaches cannot be used without employing the methods and diagrams used to illustrate the book, or such as are similar to them, such methods and diagrams are to be considered as necessary incidents to the art, and given therewith to the public; not given for the purpose of publication in other works explanatory of the art, but for the purpose of practical application.

Of course, these observations are not intended to apply to ornamental designs, or pictorial illustrations addressed to the taste. Of these it may be said that their form is their essence, and their object the production of pleasure in their contemplation. This is their final end. They are as much the product of genius and the result of composition as are the lines of the poet or the historian's periods. On the other hand, the teachings of science and the rules and methods of useful art have their final end in application and use; and this application and use are what the public derive from the publication of a book which teaches them. But as embodied and taught in a literary composition or book, their essence consists only in their statement. This alone is what is secured by the copyright. The use by another of the same methods of statement, whether in words or illustrations, in a book published for teaching the art, would undoubtedly be an infringement of the copyright.

Recurring to the case before us, we observe that Charles Selden, by his books, explained and described a peculiar system of book-keeping, and illus-

trated his method by means of ruled lines and blank columns, with proper headings on a page, or on successive pages. Now, whilst no one has a right to print or publish his book, or any material part thereof, as a book intended to convey instruction in the art, any person may practice and use the art itself which he has described and illustrated therein. The use of the art is a totally different thing from a publication of the book explaining it. The copyright of a book on book-keeping cannot secure the exclusive right to make, sell and use account-books prepared upon the plan set forth in such book. Whether the art might or might not have been patented is a question which is not before us. It was not patented, and is open and free to the use of the public. And, of course, in using the art, the ruled lines and headings of accounts must necessarily be used as incident to it.

The plausibility of the claim put forward by the complainant in this case arises from a confusion of ideas produced by the peculiar nature of the art described in the books which have been made the subject of copyright. In describing the art, the illustrations and diagrams employed happen to correspond more closely than usual with the actual work performed by the operator who uses the art. Those illustrations and diagrams consist of ruled lines and headings of accounts; and it is similar ruled lines and headings of accounts which, in the application of the art, the book-keeper makes with his pen, or the stationer with his press; whilst in most other cases the diagrams and illustrations can only be represented in concrete forms of wood, metal, stone, or some other physical embodiment. But the principle is the same in all. The description of the art in a book, though entitled to the benefit of copyright, lays no foundation for an exclusive claim to the art itself. The object of the one is explanation; the object of the other is use. The former may be secured by copyright. The latter can only be secured, if it can be secured at all, by letters patent.

The remarks of Mr. Justice Thompson in the circuit court in *Clayton v. Stone*, 2 Paine, 392, in which copyright was claimed in a daily price current, are apposite and instructive. He says: "In determining the true construction to be given to the act of congress, it is proper to look at the constitution of the United States to aid us in ascertaining the nature of the property intended to be protected. 'Congress shall have power to promote the progress of science and useful arts by securing for limited times to authors and inventors the exclusive right to their writings and discoveries.' The act in question was passed in execution of the power here given, and the object, therefore, was the promotion of science; and it would certainly be a pretty extraordinary view of the sciences to consider a daily or weekly publication of the state of the market as falling within any class of them. They are of a more fixed, permanent and durable character. The term 'science' cannot, with any propriety, be applied to a work of so fluctuating and fugitive a form as that of a newspaper or price current, the subject-matter of which is daily changing, and is of mere temporary use. Although great praise may be due to the plaintiffs for their industry and enterprise in publishing this paper, yet the law does not contemplate their being rewarded in this way; it must seek patronage and protection from its utility to the public, and not as a work of science. The title of the act of congress is, 'for the encouragement of learning,' and was not intended for the encouragement of mere industry, unconnected with learning and the sciences. . . . We are, accordingly, of opinion that the

paper in question is not a book the copyright to which can be secured under the act of congress."

The case of *Cobbett v. Woodward*, Law Rep., 14 Eq., 407, was a claim to copyright in a catalogue of furniture which the publisher had on sale in his establishment, illustrated with many drawings of furniture and decorations. The defendants, being dealers in the same business, published a similar book, and copied many of the plaintiff's drawings, though it was shown that they had for sale the articles represented thereby. The court held that these drawings were not subjects of copyright. Lord Romilly, M. R., said: "This is a mere advertisement for the sale of particular articles which any one might imitate and any one might advertise for sale. If a man, not being a vendor of any of the articles in question, were to publish a work for the purpose of informing the public of what was the most convenient species of articles for household furniture, or the most graceful species of decorations for articles of home furniture, what they ought to cost, and where they might be bought, and were to illustrate his work with designs of each article he described, such a work as this could not be pirated with impunity, and the attempt to do so would be stopped by the injunction of the court of chancery; yet if it were done with no such object, but solely for the purpose of advertising particular articles for sale, and promoting the private trade of the publisher by the sale of articles which any other person might sell as well as the first advertiser, and if in fact it contained little more than an illustrated inventory of the contents of a warehouse, I know of no law which, while it would not prevent the second advertiser from selling the same articles, would prevent him from using the same advertisement; provided he did not in such advertisement by any device suggest that he was selling the works and designs of the first advertiser."

Another case, that of *Page v. Wisden*, 20 L. T. (N. S.), 435, which came before Vice-Chancellor Malins in 1869, has some resemblance to the present. There a copyright was claimed in a cricket scoring-sheet, and the vice-chancellor held that it was not a fit subject for copyright, partly because it was not new, but also because "to say that a particular mode of ruling a book constituted an object for a copyright is absurd."

These cases, if not precisely in point, come near to the matter in hand, and, in our view, corroborate the general proposition which we have laid down.

In *Drury v. Ewing*, 1 Bond, 540 (§§ 112-14, *supra*), which is much relied on by the complainant, a copyright was claimed in a chart of patterns for cutting dresses and basques for ladies, and coats, jackets, etc., for boys. It is obvious that such designs could only be printed and published for information, and not for use in themselves. Their practical use could only be exemplified in cloth on the tailor's board and under his shears; in other words, by the application of a mechanical operation to the cutting of cloth in certain patterns and forms. Surely the exclusive right to this practical use was not reserved to the publisher by his copyright of the chart. Without undertaking to say whether we should or should not concur in the decision in that case we think it cannot control the present.

The conclusion to which we have come is, that blank account-books are not the subject of copyright; and that the mere copyright of Selden's book did not confer upon him the exclusive right to make and use account-books, ruled and arranged as designated by him, and described and illustrated in said book.

The decree of the circuit court must be reversed, and the cause remanded with instructions to dismiss the complainant's bill; and it is so ordered.

GRAY v. RUSSELL.

(Circuit Court for Massachusetts: 1 Story, 11-21. 1839.)

STATEMENT OF FACTS.—The complainants in this case alleged that they were the owners of the copyright of a book entitled “Adam’s Latin Grammar,” with notes and additions by Gould. The work complained of was entitled “Adam’s Latin Grammar,” and was edited by Cleveland.

Opinion by STORY, J.

The question now before the court is upon the confirmation of the master’s report. No exception has been taken to the facts and detailed statements in the master’s report; and, therefore, the point is narrowed down to the inquiry, whether the conclusion drawn from these facts by the master is correct. I am of opinion that it is, and that the report ought to be confirmed; and, as consequent thereon, that a perpetual injunction ought to be granted, prohibiting the sale of the edition of Cleveland’s Adam’s Latin Grammar in the pleadings mentioned by the defendant.

§ 129. *Notes, collected from various sources and arranged, may be protected by copyright.*

The argument proceeds mainly upon this ground, that there is nothing substantially new in Mr. Gould’s notes to his addition of Adam’s Latin Grammar; and that all his notes in substance, and many of them in form, may be found in other works antecedently printed. That is not the true question before the court. The true question is, whether these notes are to be found collected and embodied in any former single work. It is admitted that they are not so to be found. The most that is contended for is that Mr. Gould has selected his notes from very various authors, who have written at different periods, and that any other person might, by a diligent examination of the same works, have made a similar selection. It is not pretended that Mr. Cleveland undertook or accomplished such a task by such a selection from the original authors. Indeed, it is too plain for doubt, that he has borrowed the whole of his notes directly from Mr. Gould’s work; and so literal has been his transcription that he has incorporated the very errors thereof.

Now, certainly, the preparation and collection of these notes from these various sources must have been a work of no small labor and intellectual exertion. The plan, the arrangement and the combination of these notes, in the form in which they are collectively exhibited in Gould’s Grammar, belong exclusively to this gentleman. He is, then, justly to be deemed the author of them in their actual form and combination, and entitled to a copyright accordingly. If no work could be considered by our law as entitled to the privilege of copyright which is composed of materials drawn from many different sources, but for the first time brought together in the same plan and arrangement and combination, simply because those materials might be found scattered up and down in a great variety of volumes, perhaps in hundreds, or even thousands, of volumes, and might therefore have been brought together in the same way and by the same researches of another mind, equally skilful and equally diligent,—then, indeed, it would be difficult to say that there could be any copyright in most of the scientific and professional treatises of the present day. What would become of the elaborate commentaries of modern scholars upon the classics, which, for the most part, consist of selections from the works and criticisms of various former authors, arranged in a new form, and combined together by new illustrations, intermixed with them? What would

become of the modern treatises upon astronomy, mathematics, natural philosophy and chemistry? What would become of the treatises in our own profession, the materials of which, if the works be of any real value, must essentially depend upon faithful abstracts from the reports, and from juridical treatises, with illustrations of their bearing? Blackstone's Commentaries is but a compilation of the laws of England, drawn from authentic sources open to the whole profession; and yet it was never dreamed that it was not a work which, in the highest sense, might be deemed an original work; since never before were the same materials so admirably combined and exquisitely wrought out, with a judgment, skill and taste absolutely unrivaled. Take the case of the work on insurance, written by one of the learned counsel in this cause, and to which the whole profession are so much indebted; it is but a compilation, with occasional comments upon all the leading doctrines of that branch of the law, drawn from reported cases, or from former authors, but combined together in a new form, and in a new plan and arrangement; yet, I presume, none of us ever doubted that he was fully entitled to a copyright in the work, as being truly, in a just sense, his own.

§ 130. *In the matter of compilations, each author must investigate for himself; he cannot copy the work of another author.*

There is no foundation in law for the argument that, because the same sources of information are open to all persons, and, by the exercise of their own industry and talents and skill, they could, from all these sources, have produced a similar work, one party may, at second hand, without any exercise of industry, talents or skill, borrow from another all the materials which have been accumulated and combined together by him. Take the case of a map of a county, or of a state, or an empire; it is plain that, in proportion to the accuracy of every such map, must be its similarity to, or even its identity with, every other. Now, suppose a person has bestowed his time and skill and attention, and made a large series of topographical surveys in order to perfect such a map, and has thereby produced one far excelling every existing map of the same sort. It is clear that, notwithstanding this production, he cannot supersede the right of any other person to use the same means, by similar surveys and labors, to accomplish the same end. But it is just as clear that he has no right, without any such surveys and labors, to sit down and copy the whole of the map already produced by the skill and labors of the first party, and thus to rob him of all the fruit of his industry, skill and expenditures. See *Wilkins v. Aiken*, 17 Ves., 424, 425; *Eden on Inj.*, ch. 13, pp. 282, 283; 2 *Story on Eq. Juris.*, secs. 939-942. It would be a downright piracy.

§ 131. *It is not material in what form the works of another author are used.*

Neither is it of any consequence in what form the works of another author are used; whether it be by a simple reprint or by incorporating the whole or a large portion thereof in some larger work. Thus, for example, if in one of the large encyclopædias of the present day the whole or a large portion of a scientific treatise of another author, as, for example, one of Dr. Lardner's, or Sir John Herschel's, or Mrs. Somerville's treatises, should be incorporated, it would be just as much a piracy upon the copyright as if it were published in a single volume.

§ 132. *Abridgments. Extracts for purposes of a review.*

In some cases, indeed, it may be a very nice question what amounts to a piracy of a work or not. Thus, if large extracts are made therefrom in a re-

view, it might be a question whether those extracts were designed *bona fide* for the mere purpose of criticism, or were designed to supersede the original work under the pretense of a review, by giving its substance in a fugitive form. The same difficulty may arise in relation to an abridgment of an original work. The question in such a case must be compounded of various considerations: whether it be a *bona fide* abridgment or only an evasion by the omission of some unimportant parts; whether it will, in its present form, prejudice or supersede the original work; whether it will be adapted to the same class of readers; and many other considerations of the same sort which may enter as elements in ascertaining whether there has been a piracy or not. Although the doctrine is often laid down in the books that an abridgment is not a piracy of the original copyright, yet this proposition must be received with many qualifications. See 2 Story, Eq. Juris., secs. 939-942; Sweet v. Shaw, before the vice-chancellor in 1839, The [English] Jurist for 1839, p. 212.

§ 133. *In deciding whether a copyright has been infringed, it is not only quantity, but value, which is looked to.*

In many cases the question may naturally turn upon the point, not so much of the quantity as of the value of the selected materials. As was significantly said on another occasion, *Non numerantur ponderantur*. The quintessence of a work may be piratically extracted, so as to leave a mere *caput mortuum*, by a selection of all the important passages in a comparatively moderate space. In the recent case of Bramwell v. Halcomb, 3 Mylne & Craig, 737, it was held that the question whether one author has made a piratical use of another's work does not necessarily depend upon the quantity of that work which he has quoted or introduced into his own book. On that occasion Lord Cottenham said: "When it comes to a question of quantity, it must be very vague. One writer might take all the vital part of another's book, though it might be but a small proportion of the book in quantity. It is not only quantity, but value, which is looked to. It is useless to look to any particular cases about quantity." See the lord chancellor's opinion in Bell v. Whitehead, The [English] Jurist, 1839, p. 14; Sweet v. Shaw, before the vice-chancellor, 1839, The [English] Jurist for 1839, p. 212. The same subject was a good deal considered by the same learned judge in Saunders v. Smith, 3 Mylne & Craig, 711, 728, 729, with reference to copyright in reports, and how far another person was at liberty to extract the substance of such reports, or to publish select cases therefrom, even with notes appended. In the case of Wheaton v. Peters, 8 Pet., 591 (§§ 12-16, *supra*), the same subject was considered very much at large. It was not doubted by the court that Mr. Peters' Condensed Reports would have been an infringement of Mr. Wheaton's copyright (supposing that copyright properly secured under the act), if the opinions of the court had been or could be the proper subject of the private copyright by Mr. Wheaton. But it was held that the opinions of the court, being published under the authority of congress, were not the proper subject of private copyright. But it was as little doubted by the court that Mr. Wheaton had a copyright in his own marginal notes, and in the arguments of counsel as prepared and arranged in his work. The cause went back to the circuit court for the purpose of further inquiries as to the fact whether the requisites of the act of congress had been complied with or not by Mr. Wheaton. This would have been wholly useless and nugatory, unless Mr. Wheaton's marginal notes and abstracts of arguments could have been the subject of a copyright (for that was

all the work which could be the subject of copyright); so that if Mr. Peters had violated that right Mr. Wheaton was entitled to redress.

But we are spared from any nice inquiries of this sort in the present case. The master's report finds that the substance of all Mr. Gould's notes are used in Mr. Cleveland's book, and for the most part literally copied. It is, therefore, a clear infringement of Mr. Gould's copyright, not, indeed, in Adam's Latin Grammar (for he has none in that), but in his own notes, first collected together by him in their present form, and in the plan and arrangements (also his own), in which they are actually embodied.

Under these circumstances I shall decree a perpetual injunction. In consideration that the defendants have already struck out of their editions of Mr. Cleveland's book now sold by them all the notes of Mr. Gould, and that the defendants are insolvent, the plaintiffs have waived any decree for an account. I shall therefore pass that over, and only decree costs for the plaintiffs. Decree accordingly.

OSGOOD *v.* ALLEN.

(Circuit Court for Maine: 1 Holmes, 185-195. 1872.)

Opinion by SHEPLEY, J.

STATEMENT OF FACTS.—The complainants are the proprietors and publishers of an illustrated magazine for boys and girls entitled "Our Young Folks," which has been published monthly in the city of Boston, under the same title, since December, 1864. Previous to the publication of the first number, the publishers duly entered the title of their magazine for securing the copyright thereof. The publication and sale have been continued in regular monthly numbers by the firm of Ticknor & Fields and their successors, including the complainants; and the copyright of each number was taken out and secured according to law previous to its publication. Complainants allege that when the copyright of the first number was taken out, the title "Our Young Folks" had not been adopted, and was not in use for any other similar publication, and has not been used for any similar publication since except by the defendant; that they have expended large sums of money in publishing and selling the same; that by reason of their expenditure and the care and skill by them bestowed, the magazine has acquired an extensive and valuable reputation throughout the United States and elsewhere as a publication for young people, under the title of "Our Young Folks," and was a source of profit to complainants.

The defendant, a publisher at Augusta, Me., announced by advertisements and otherwise that he would publish on the first and fifteenth days of each month, commencing October 1, 1871, an illustrated publication for young people, under the title "Our Young Folks' Illustrated Paper." It is admitted that he accordingly did issue a very large edition of his illustrated publication, a copy of which is filed with the proofs in the case; and that, upon demand by the complainants before publication, he refused, and still refuses, to withdraw the announcement of the publication, or to change the title, and has published and sold large numbers under said title.

The complainants claim that they are entitled to a remedy under the law of copyright, and also that they have a right to the exclusive use of the name "Our Young Folks," as indicating a periodical, according to the doctrine of

trade-marks as applied to the protection of literary publications. It is apparent upon inspection, and not disputed, that the publications of the complainants and the defendant are in no respect the same, or even similar, except in the use by both of the words "Our Young Folks" as a part of the title. The title of the one on the title-page is, "Our Young Folks: an Illustrated Magazine for Boys and Girls;" of the other, "Our Young Folks' Illustrated Paper." Both are illustrated periodicals for the young. The reading matter and the illustrations are not the same, or similar.

§ 134. *Laws of congress on the subject of copyright.*

Copyright laws are designed for the encouragement of learning, by securing to authors and their representatives the exclusive right to the publication of their literary compositions, as patent laws secure to inventors certain exclusive rights in their discoveries. The constitution conferred upon congress the power to promote the progress of science and the useful arts "by securing, for limited times, to authors and inventors the exclusive rights to their respective writings and discoveries." Accordingly, in 1790, congress passed an act for the encouragement of learning, by securing the copies of maps, charts and books to the authors and proprietors of such copies, during the times therein mentioned. This act provided that the author and authors of any map, chart, book or books . . . "shall have the sole right and liberty of printing, reprinting, publishing and vending such map, chart, book or books, for fourteen years from the time of recording the title thereof." The remedy provided by this statute was a right of action given to the proprietor of the copyright, against any person who, without his consent, should publish, sell or expose to sale, or cause to be published, sold or exposed to sale, any copy of such map, chart, book or books.

The act of 1870, "to revise, consolidate and amend the statutes relating to patents and copyrights," provides that the author . . . or proprietors of any books, etc., shall, upon complying with the provisions of this act, have the sole liberty of printing, reprinting, publishing, completing, copying, executing, finishing and vending the same. The nineteenth section provides that no person shall be entitled to the benefit of the act unless he shall, before publication, deposit in the mail, for the librarian of congress, a printed copy of the title of such book, and shall, within ten days after publication, mail to the librarian two copies of such copyright book. The remedy of the author or proprietor under this statute is against the person who, without the consent in writing of the proprietor of the copyright, shall print, publish or import, or, knowing the same to be so printed, published or imported, shall sell or expose to sale, any copy of such book.

§ 135. *The word "book" defined. Whether the title of a book is protected.*

By the plain terms of the statute, the copyright protected is the copyright in "the book," the word "book" being used to describe any literary composition. Although a printed copy of the title of such book is required, before the publication, to be sent to the librarian of congress, yet this is only as a designation of the book to be copyrighted; and the right is not perfected under the statute until the required copies of such copyright book are, after publication, also sent. It is only as a part of the book, and as the title to that particular literary composition, that the title is embraced within the provision of the act. It may possibly be necessary in some cases, in order to protect the copyrighted literary composition, for courts to secure the title from piracy, as well as the other productions of the mind of the author in the book. The right secured

by the act, however, is the property in the literary composition,—the product of the mind and genius of the author, and not in the name or title given to it. The title does not necessarily involve any literary composition; it may not be, and certainly the statute does not require that it should be, the product of the author's mind. It is not necessary that it should be novel or original. It is a mere appendage, which only identifies, and frequently does not in any way describe, the literary composition itself, or represent its character. By publishing, in accordance with the requirements of the copyright law, a book under the title of the life of any distinguished statesman, jurist or author, the publisher could not prevent any other author from publishing an entirely different and original biography under the same title. When the title itself is original, and the product of the author's own mind, and is appropriated by the infringement, as well as the whole, or a part of, the literary composition itself, in protecting the other portions of the literary composition, courts would probably also protect the title. But no case can be found, either in England or this country, in which, under the law of copyright, courts have protected the title alone, separate from the book which it is used to designate. In *Jollie v. Jaques*, 1 Blatch., 627, Mr. Justice Nelson says: "The title or name is an appendage to the book or piece of music for which the copyright is taken out, and if the latter fails to be protected, the title goes with it as certainly as the principal carries with it the incident." The only doubt expressed by Mr. Justice Nelson in that case is as to how the question might be decided in case of a valid copyright of a book and an infringement of the title by the defendant. While expressing no opinion upon this question, the reasoning by which he arrives at the conclusion that when the book fails to be protected the title goes with it, would seem clearly to point to a similar result in a case of alleged infringement of copyright of the book; namely, that if there was no piracy of the copyrighted book, there could be no remedy under the act for the use of a title which could not be copyrighted independently of the book. The injunction granted in the case of *Hogg v. Kirby*, 8 Ves., 215, was not founded on copyright, but on the power a court of equity has to restrain one person from carrying on a trade, or from publishing a work, under a fraudulent representation that such trade or work is that of another. The chancellor (Lord Eldon), in the opinion in that case, says: "In this case, protesting against the argument that a man is not at liberty to do anything which affects the sale of another work of this kind, and that because the sale is affected therefore there is an injury (for if there is a fair competition by another original work really new, be the loss what it may, there is no damage or injury), I shall state the question to be, not whether this work is the same, but, in a question between these parties, whether the defendant has not represented it to be the same; and whether the injury to the plaintiff is not as great, and the loss accruing ought not to be regarded in equity upon the same principles between them, as if it was in fact the same work. Upon the point whether the work was in fact meant to be represented to the public as the same, I do not say that it is not a question proper for a jury." In the case of *Jollie v. Jaques*, Mr. Justice Nelson declined to consider the question whether the court will interfere to prevent the use of a title in fraud of the plaintiff, upon principles relating to the good-will of trades, because, in the case before him, both parties were residents, and, for aught that appeared in the case, citizens, of New York; and, therefore, independently of copyright, the court had no jurisdiction in the case.

In the case before this court, the bill is filed by complainants as citizens of the commonwealth of Massachusetts against the defendant, a citizen of Maine. Relief is sought not only under the law of copyright, but upon the general ground of equity, as related to the good-will of trades and the doctrine of trade-marks. It becomes necessary for the court to determine, in this case, how far the complainants are entitled to a remedy, upon these grounds of equity jurisdiction, and upon the general principles governing courts of equity jurisdiction. Property in the use of a trade-mark or name has very little analogy to that which exists in copyrights or patents for inventions. In all cases where rights to the exclusive use of a trade-mark are invaded, the essence of the wrong consists in the sale of the goods of one manufacturer or vendor as those of another. It is only when this false representation is directly or indirectly made that the party who appeals to a court of equity can have relief. *Canal Company v. Clark*, 13 Wall., 311, 322 (§§ 453-56, *infra*). Words or devices may be adopted as trade-marks which are not original inventions of the one who adopts and uses them. Words in common use may be adopted, if, at the time of adoption, they were not used to designate the same or similar articles of production. A generic name, or a name merely descriptive of an article of trade, or its qualities or ingredients, cannot be adopted as a trade-mark, so as to give a right to the exclusive use of it. The office of a trade-mark is to point distinctively to the origin or ownership of the article to which it is affixed. Marks which only indicate the names or qualities of products cannot become the subjects of exclusive use, for, from the nature of the case, any other producer may employ, with equal truth and the same right, the same marks for like products. Geographical names, which point out only the place of production, and not the producer, cannot be appropriated exclusively, so as to prevent others from using them and selling articles produced in the districts they describe under these appellations. In the case of *Brooklyn White Lead Company v. Masury*, 25 Barb., 416, the court said that, as both plaintiff and defendant dealt in the same article, and both manufactured it at Brooklyn, each had the same right to describe it as "Brooklyn White Lead." Lord Langdale, master of the rolls, well expresses the whole law of trade-marks by names, in the case of *the Collins Company v. Cowen*, 3 Kay & Johns., 428. He says: "There is no such thing as property in a trade-mark as *an abstract name*. It is the right which a person has to use a certain name for articles which he has manufactured, so that he may prevent another person from using it, because the mark or name denotes that articles so marked were manufactured *by a certain person*, and no one else can have the right to put the same name upon his goods, and then represent them to have been manufactured by the person whose mark it is."

Applying these principles to the case before the court, the question presented on this branch of the case is, whether the defendant has so simulated the mark of the complainant as to deceive the public, so that the public will naturally mistake his publication for that of the complainant.

Complainants aver that defendant, fraudulently designing to procure the custom and trade of persons who are in the habit of buying their magazine, and to induce them and the public to believe that his publication is in fact the complainants', and in order to obtain for himself the benefit of the reputation of complainants' publication, advertises, prints and offers for sale his publication under that title; and allege that the public will be deceived by the title and led to purchase defendant's publication under the belief that it is the

magazine of the complainants. The agreed statement of facts is silent on the question whether the public are deceived, or are in danger of being deceived, as alleged; and whether the customers of the complainants or the public are induced to believe, or are in danger of being induced to believe, that defendant's publication is in fact the complainants', and thereby led to purchase the defendant's magazine under the belief that it is the complainants'.

The case will therefore be referred to a master to ascertain and report the fact upon the foregoing questions to the court; and further proceedings in the case will be stayed until the coming in of the master's report.

PARTON *v.* PRANG.

(Circuit Court for Massachusetts: 3 Clifford, 537-552. 1872.)

STATEMENT OF FACTS.—Parton was an artist of New York, and, among other like productions, painted a landscape which he entitled "A View of Claverack Creek," etc., which he sold in his studio in New York after the usual custom of artists. The purchaser sent or carried the picture to Boston, where it was sold to defendant Prang, who was a publisher of chromos, engravings, etc. Prang caused a chromo of the "Claverack" picture to be prepared and copies of it to be made which he sold. Parton filed this bill claiming a copyright in his picture for copying purposes, although he had sold the picture itself. He prayed for an injunction and an account. The case was heard on bill and answer.

Opinion by CLIFFORD, J.

The case now stands in the same posture as if a demurrer had been filed to the bill, which would admit that everything well pleaded in the answer was fully proved. 2 Danl. Chan. Prac. (3d ed.), 998; *Gettings v. Burch*, 9 Cranch, 372; *Leeds v. Marine Ins. Co.*, 2 Wheat., 380; *Brinckerhoff v. Brown*, 7 Johns. Ch., 217; *Dale v. McEvers*, 2 Cow., 118. Viewed in the light of that well-settled rule of practice, it must be assumed as fully proved that the complainant sold the picture for a valuable consideration to the vendor of the respondent, and that the same was delivered by the complainant to the purchaser unconditionally and without any reservation, and that the purchaser from the complainant in like manner sold the picture for a valuable consideration to the respondent, and that he delivered the same to the respondent unconditionally and without any reservation.

§ 136. *Provisions of the copyright law.*

Copyright may be granted, under the copyright act, to the author of any book, map, chart or musical composition falling within the classes described in section 1 of the act, if the author is a citizen of the United States or permanently resident therein, and the same privilege is also extended by the same section to any such citizen or permanent resident who shall invent, design, etch, engrave, work, or cause to be engraved, etched or worked from his own design, any print or engraving; and section 1 also provides that such persons and their executors, administrators or legal assigns shall have the sole right and liberty of printing, reprinting, publishing and vending such book, map, chart, musical composition, print, cut or engraving for the term of twenty-eight years from the time of recording the title as therein directed. 4 Stat. at Large, 436. Persons printing, publishing or importing any copy of a book so copyrighted, or causing the same to be printed, published or imported without the consent of the person legally entitled to the copyright first

had and obtained in writing, signed in presence of two or more credible witnesses, shall forfeit every copy of such to the person legally entitled at the time to the copyright thereof, and the same penalty is imposed upon any person who, knowing the same to be so printed or imported, shall publish, sell or expose to sale any copy of such book without such consent in writing, and that the offender shall also forfeit and pay fifty cents for every such sheet which may be found in his possession, either printed or printing, published, imported or exposed to sale contrary to the intent of that act. 4 Ibid., 438. Protection is also afforded by section 7 of the act to any cut or engraving, map, chart or musical composition so copyrighted; and the provision is that if any person shall within the term engrave, etch or work, sell or copy, or cause to be engraved, etched, worked or sold, or copied, or shall print or import for sale, or cause to be imprinted or imported for sale, any such map, chart, musical composition, print, cut or engraving, without the consent in writing of the proprietor, signed in the presence of two credible witnesses, or, knowing the same to be so printed or imported without such consent, shall publish, sell or expose to sale any such map, chart, musical composition, engraving, cut or print, shall forfeit to the proprietor the plate or plates on which such map, chart, musical composition, cut or print shall be copied, and also one dollar for every sheet of such map, chart, musical composition, print, cut or engraving which may be found in his possession, printed or published, or exposed to sale contrary to the true intent and meaning of that act. 4 Ibid., 438. Provision is also made by section 9 of the same act that any person or persons who shall print or publish any manuscript whatever, without the consent of the author or legal proprietor first obtained as aforesaid, if a citizen of the United States or resident therein, shall be liable to suffer and pay to the author or proprietor all damages occasioned by such injury, to be recovered by a special action on the case, and the federal courts, empowered to grant injunctions to prevent the violation of the rights of authors and inventors, are thereby empowered to grant injunctions in like manner to restrain such publication of any manuscript. 4 Ibid., 438.

§ 137. *The word "manuscript" in section 9 of the copyright act does not include a picture, and the purchaser of a painting may acquire a title thereto by oral contract with the owner.*

Based upon that section of the copyright act, the proposition of the complainant is that the respondent did not acquire, by the alleged purchase of the picture, any right whatever to reproduce the picture or to make a chromo of the same, as he admits in his answer he has done; that he could not acquire such a right by any oral contract of sale, or of sale and delivery, even though the sale and delivery were for a valuable consideration, and were absolute and unconditional; that he could only acquire such a right by the consent of the author or legal proprietor in writing, signed in the presence of two credible witnesses, as required by that section, in order to acquire the right to print or publish a manuscript, which the pleadings show the respondent in that form never obtained. Manuscripts of every kind are embraced in that section, but pictures are not named in the provision and cannot be regarded as entitled to that special protection, unless it be held that the word manuscript includes pictures, which is affirmed by the complainant and denied by the respondent, and that issue presents the principal question in the case. Standard lexicographers certainly do not concur with the complainant, as, for example, Webster treats the word as derived from Latin, *manus*, the hand, and *scribere*,

scriptum, to write, and as synonymous with *manuscriptum*, meaning literally something written with the hand; a book or paper written with the hand, or a written, as distinguished from a printed, document. On the other hand, the same learned author treats the word picture as derived from Latin *pingere*, *pictum*, to paint, and as synonymous with *pictura*, and defines the word as meaning that which is painted, a likeness drawn in colors, hence any graphic representation, as of a person, a landscape or a building; and he adopts the language of Bacon, in which he says that pictures and shapes are but secondary objects, showing that in his view the picture presents the objects to the observer as a whole, whereas the manuscript only describes the parts or elements of the object, leaving the mind of the reader to aggregate those parts or elements into an entire figure or whole. Worcester's definition of those two words is substantially the same as the definitions given by Webster. He treats the word manuscript as derived from the Latin words *manus*, the hand, and *scriptum*, something written, and defines its meaning as a paper written, a writing of any kind, in contradistinction to printed matter. His definition of the word "picture" also corresponds with that given by the first-named author. He derives it from the Latin word *pictura*, and defines it as a representation or likeness in colors, a painting or drawing. Bouvier also defines manuscript as a writing, a writing which has never been printed, and refers to the right of an author as secured by the copyright act, and as conceded at common law, but adds that these rights will be considered as abandoned, if the author publishes his manuscript without securing the copyright under the act of congress. Mere definitions, however, do not portray the difference between a manuscript and a picture as fully or as strikingly as it is seen when the two things are compared and contrasted as means of instruction, or of imparting an idea or description of the object or subject-matter of the manuscript or picture. Separate description of each element of the object is required in the manuscript describing the several parts of which it is composed, the nature, material, appearance, size, color, dimensions, use and everything essential to enable the reader to form an idea of what the object is which is embraced in the description given in the manuscript; all these must be considered and combined by the reader in order that he may be able to form an ideal picture of the object described or the subject-matter of the entire description. His ideal picture may or may not be in accordance with the object actually described in the manuscript, as the object itself is not presented to the senses of the reader. On the contrary, he is left to portray in his own mind the outlines of the object from the written description, and so to combine the same as to suggest an ideal picture of the object described.

Whatever conclusion the reader of the manuscript may form, it is but an ideal picture, made in his own mind from the written description of the object, and necessarily calls into exercise all the creative faculties of the mind. No such operation of the mind is involved where the picture or painting of the object is presented to the observer, as the object itself in a secondary form, "drawn in colors," is presented externally to the sense of sight. In the latter case, no ideal of the mind is necessary, as the thing itself is presented physically to the natural eye. Briefly stated, the picture is the thing itself, but the manuscript is only the description of it in language, and leaves the mind of the reader to make the picture, or in other words, the picture presents, at a glance, all the characteristics of the object exactly as it exists, but the manuscript only enumerates and describes those characteristics one by one, imposing

upon the mind of the reader the labor of aggregating the same into a whole, and presenting to his perceptions an ideal of the described object. Different communities employ diverse characters for letters and even for phrases, but it can make no difference what the characters are that are employed in describing such an object, not even if they are arbitrary signs, so long as it remains true that the manuscript is a description of the object, and not the presentation of the object itself or its portrait, as the manuscript, while it retains that character, is simply the registry of certain thoughts or ideas about a thing and not the exhibition of the thing itself, as in the case of a picture. Unsupported as the proposition of the complainant is, by any legal adjudication, the argument of the respondent is a forcible one that the construction of section 9 of the copyright act must be controlled by the well-established rule, that the words of a statute, if of common use, are to be taken in their natural, plain, obvious and ordinary signification and import, unless it clearly appears from the context or other parts of the enactment that the words were intended to be applied differently from their ordinary or their legal acceptance. 1 Kent, Com. (11th ed.), 462; *Martin v. Hunter*, 1 Wheat., 326 (APPEALS, §§ 682-729); *Waller v. Harris*, 20 Wend., 561; *Doane v. Phillips*, 12 Pick., 226. Nothing is shown in the context of the enactment to favor the theory of the complainant, and inasmuch as the usual and ordinary signification and import of the two words is opposed to such a theory, it is difficult to see how it can be adopted without doing violence to the most approved canons of construction. Dwarris on Stat. (2d ed.), 573; Smith, Com., §§ 505, 545.

§ 138. *The consent of the author, signed in the presence of two credible witnesses, is not necessary to obtain the right to reproduce or "chromo" a picture.*

Strong support to the opposite view is derived as a legislative expression, from section 86 of the subsequent and recent copyright act, which, in terms, extends the privilege of copyright to the author, inventor, designer or proprietor of a painting, drawing, chromo, statue, statuary, and models and designs intended to be perfected as works of the fine arts, as well as to the author, inventor, designer or proprietor of any book, map, chart, dramatic or musical composition, engraving, cut, print or photograph or negative thereof, giving to such authors, inventors, designers and proprietors the sole liberty of printing, publishing, completing, copying, executing, finishing and vending the same for the term of years therein mentioned. All persons without the consent of the proprietor of the copyright in writing, signed in the presence of two or more credible witnesses, are forbidden to engrave, etch, work, copy, print, publish or import any copy of such map or other article, and the provision of section 100 is that if any person shall violate the prohibition as therein expressed he shall forfeit to the said proprietor all the plates on which the same shall be copied, and every sheet thereof, and in case of a painting, statue or statuary, he shall also forfeit \$10 for every copy of the same in his possession. Unquestionably the provision, so far as it relates to a picture, is entirely new, and it will be observed that it does not embrace a manuscript; but section 102 is substantially the same as section 9 in the prior act, and that both alike are in terms confined exclusively to the protection of manuscripts. 16 Stats. at Large, 212, 214. Viewed in the light of these suggestions, the court is of the opinion that the word "manuscript," as used in section 9 of the copyright act, does not include a picture, and that a purchaser of a picture, such as the one described in the bill, may acquire a title to the same by an oral contract with the lawful owner; that the consent of the author or proprie-

tor in writing, signed in the presence of two credible witnesses, was not necessary under that act to obtain the right to reproduce or chromo the same, provided such consent was fairly and understandingly obtained, and for a valuable consideration.

§ 139. *Rights at common law of an author or his assigns in his manuscript before publication. Effect of publication on those rights.*

Suppose it is not necessary that the consent of the author or proprietor of a picture should be in writing to render the sale valid, still it is contended by the complainant that neither the sale in this case to the vendor of the respondent, nor the purchase of the same by the respondent from the vendee of the complainant, even though the sale and delivery of the picture in each case was absolute and unconditional, or both combined, had the effect to transfer to the respondent the right to reproduce or chromo the picture, that in selling and delivering the picture, and subsequently suffering his vendee to sell and deliver the same to the respondent, he only parted with the result of his labor as property; that he did not part with the right to reproduce or chromo-lithograph the picture; that the right to multiply copies of the picture was vested in him as the author and proprietor of the same, and that he still retains that right notwithstanding the sale and delivery by himself and the subsequent purchase by the respondent. Undoubtedly, the author of a book or of an unpublished manuscript, or of any work of art, has at common law, and independently of any statute, a property in his work until he publishes it or it is published by his consent or allowance, and that property unquestionably exists in pictures as well as in any other work of art. He has the undisputed right to his manuscript; he may withhold or he may communicate it; and communicating, he may limit the number of persons to whom it shall be imparted, and impose such restrictions as he pleases upon the use of it. He may annex conditions and proceed to enforce them, and for their breach he may claim compensation. *Jeffreys v. Boosey*, 4 H. L. Cas., 815-961; *Millar v. Taylor*, 4 Burr., 2396; *Queensbury v. Shebbeare*, 2 Eden, 329. Numerous other decided cases also affirm the same proposition, that the author of an unpublished manuscript has the exclusive right of property therein, and that he may determine for himself whether the manuscript shall be made public at all; that he may in all cases forbid its publication by another before it has been published by him or by his consent or allowance; that a painter also has at common law the same right before publication to prevent any person from copying it, and that the purchaser and owner of the picture holding the title from the painter or his assigns, has the same right, before publication, to prevent another from multiplying copies of it or reproducing the picture, but the authorities all agree that, after publication, that right is lost. *Turner v. Robinson*, 10 Jr. Ch., 121. Same case on appeal, 10 Jr. Ch., 510; *Fisher v. Fold*, 1 Jones, Exch., 12; *Wheaton v. Peters*, 8 Pet., 591; *Keene v. Wheatley*, 9 Am. L. Reg., 33; *Bartlett v. Crittenden*, 5 McL., 37 (§§ 17-21, *supra*). An author, said Hoar, J., in *Keene v. Kimball*, 16 Gray, 549, has at common law a property in his unpublished works, which he may assign, and in the enjoyment of which equity will protect his assignee as well as himself. This property continues until, by publication, a right to its use has been conferred upon or dedicated to the public.

§ 140. *In communicating the contents of his manuscript, an author may prescribe limitations and impose restrictions on its use.*

Independently of legislation, the sole proprietorship of a manuscript is in the

author and his assigns until he publishes it, but an unqualified publication, such as is made by printing and offering copies for sale, dedicates the contents to the public, unless the sole right and liberty of printing, reprinting, publishing and vending the same is secured to the author or proprietor by copyright. But there may be a limited publication by communication of the contents by reading, representation or restricted private circulation which will not abridge the right of the author any further than necessarily results from the nature and extent of such limited use as he has made or allowed others to make of the manuscript or painting, or, as Lord Brougham said in *Jeffreys v. Boosey*, 4 H. L. Cas., 961, he may withhold or he may communicate it, and, communicating, he may prescribe limitation and impose such restrictions as he please as to the extent of its use, which fully justifies the conclusion in *Keene v. Kimball* that, when a literary proprietor has made a publication in any mode not restricted by any condition, other persons acquire unlimited rights of republishing in any mode in which his publication may enable them to exercise such a right. *Keene v. Kimball*, 16 Gray, 550. Assignments of a manuscript are required to be in writing by the copyright act, but enough has been remarked to show that a picture under that act might be transferred by an oral contract, and it is well settled law that even copyright is an incident to the ownership of a manuscript, and that it passes at common law with the transfer of a work of art. *Turner v. Robinson*, 10 Jr. Ch., 121; *Power v. Walker*, 3 M. & S., 9. Hence the remark of the court in *Turner v. Robinson*, that it was a strange proposition that the transfer of property should destroy and extinguish that which principally constitutes the value of the thing transferred, meaning not that the right to publish did not pass by the sale, but that the exclusive right of publication which attached to the manuscript was not lost by the transfer. Such a transfer of the manuscript or picture is not a publication of the same unless it was so intended by the parties, but if the sale was an absolute and unconditional one, and the article was absolutely and unconditionally delivered to the purchaser, the whole property in the manuscript or picture passes to the purchaser, including the right of publication, unless the same is protected by copyright, in which case the rule is different. *Baker v. Taylor*, 2 Blatch., 82; *Ryan v. Goodwin*, 3 Sum., 518; *Wood v. Zimmer*, Holt, N. P., 60; *Pennock v. Dialogue*, 2 Pet., 14.

Personal property is transferable by sale and delivery, and there is no distinction in that respect, independent of statute, between literary property and property of any other description. Owners of personal property have the right to sell and transfer the same as inseparable incidents of the property, and the author or proprietor of a manuscript or picture possesses that right as fully and to the same extent as the owner of any other personal property, the same being incident to the ownership. Sales may be absolute or conditional, and they may be with or without qualifications, limitations and restrictions, and the rules of law applicable in such cases to other personal property must be applied in determining the real character of a sale of literary property. Proper attention to these considerations will furnish the true explanation of many, if not all the cases referred to by the complainant, which are supposed to support the second proposition for which he contends. *Prince Albert v. Strange*, 1 Hall & Twells., 1; *Queensbury v. Shebbeare*, 2 Eden, 329; *Bishop v. Griffin*, 16 Sum., 196; *Steven v. Cady*, 14 How., 528; *Stevens v. Gladding*, 17 How., 447 (§§ 387-89, *infra*); *Abernethy v. Hutchinson*, 1 Hall & Twells., 28.

Beyond doubt, the right of first publication is vested in the author; but he

may sell and assign the entire property to another, and if he does so his assignee takes the entire property; and it is a great mistake to suppose that any act of congress, at the date of the sales of the picture in this case, required that such an assignment should be in writing; and the pleadings show that the sale and delivery in each case were absolute and unconditional, and without any qualification, limitation, or restriction, showing that the entire property was transferred from the complainant and became vested in the respondent. *Sims v. Marryatt*, 17 Ad. & Ell., 281; *Adderly v. Dixon*, 1 Sim. & S., 607. Confirmation of that view, if any be needed beyond what appears in the express allegations of the answer to that effect, is also found in the further allegation that the respondent called upon the complainant immediately after the sale and delivery to him, and informed the complainant that he intended to publish the picture as a chromo, and that the complainant made no objection to the proposed publication, showing that the complainant as well as the respondent understood that the entire property of the picture was vested in the respondent. It is insisted by the respondent that the acts and declarations of the complainant on that occasion, as more fully set forth in the answer, estop the complainant from making any such claim as that set up in the bill; but it is unnecessary to decide that question, as the court is of the opinion that those acts and declarations amount to a practical affirmance of the contract of sale and delivery of the entire property of the picture, as understood and claimed by the respondent. *Freeman v. Cooke*, 6 D. & L., 187; *Boucicault v. Fox*, 5 Blatch., 100 (§§ 35-39, *supra*); *Bigelow on Estoppel*, 475. Neither a conditional sale nor any unfairness is shown, and as neither exists in the case, it must be held that the complainant parted with the entire property in the picture. *Pope v. Curl*, 2 Atk., 142; *Thompson v. Stanhope*, Amb., 737; *Mayall v. Higbey*, 1 H. & C., 147; *Jones v. Thorne*, 1 N. Y. Obs., 408; *Dalglisch v. Jarvie*, 2 McN. & G., 231; *Martin v. Wright*, 6 Sim., 297; *Read v. Conquest*, 9 C. B. (N. S.), 755. Unfairness is not pretended in this case, and inasmuch as the sale and delivery were in their terms absolute and unconditional and without any reservation, restriction, or qualification of any kind, the court is of the opinion that complainant is not entitled to relief.

YUENGLING *v.* SCHILE.

(Circuit Court for New York: 12 Federal Reporter, 97-108. 1882.)

Opinion by BROWN, J.

STATEMENT OF FACTS.—The plaintiff moves, upon a bill of complaint and affidavits, for a preliminary injunction to restrain an infringement of the plaintiff's rights under a copyright alleged to have been obtained by him on the 23d of August, 1880, upon a "chromo" entitled "Gambrinus and his followers." The moving papers allege that the complainant on that day was a citizen of the United States, and "proprietor of said chromo;" that he filed on that day, before publication, in the office of the librarian of congress, the title or description thereof, and on the same day deposited in his office two copies of the same, and gave notice of his copyright by inscribing on the visible front of such chromo, near the bottom, the words: "Copyrighted 1880, by D. G. Yuengling, Jr., New York;" that he has been at great expense in producing such chromo, and that the same is of great value to him; that he has used it as a gratuitous advertisement in his business as a lager-beer brewer;

and that the defendant is about to issue a piratical imitation of such chromo, in violation of the plaintiff's right in such copyright.

The complainant's chromo is of evident artistic merit. It is designed as a symbolic glorification of lager-beer drinking. In the center is a conspicuous figure of King Gambrinus, his left arm resting upon a keg of lager, and his right holding aloft a foaming glass of that beverage. On either side of him are a dozen figures of persons representing various classes in life, into whose eager hands his page is distributing the drink. This chromo, by its subject, its brilliant coloring, its excellent finish, and the artistic grouping of its figures, forms a striking picture, suitable for hanging in saloons, and well calculated to draw attention to the plaintiff, whose name is printed in large type beneath the figures as a person engaged in the lager-beer business, and constituting, therefore, a valuable mode of advertising. Among the Germans, and in the lager-beer trade, "Gambrinus" is familiarly known as the inventor of lager beer, while king of Flanders, as the legend goes, who used it first as a potion or draught.

The defendant's chromo, claimed to be an infringement, is a few inches smaller than the first, and presents the same general grouping, expression, and coloring of the figures, though having some conspicuous changes. Upon the head of the lager-beer cask the words "Bock Beer" are conspicuously printed; and the figure of a goat, with its forefeet upon the top of the cask, appears prominently in the foreground beside the king. The troubadour, who in the first picture is reclining upon the ground beside a maid drawing beer at the spigot, is omitted in the defendant's chromo, which also contains at the left a prominent typical figure of "Brother Jonathan," who is substituted in the place of a tailor in the first. There are various other minor changes.

Upon the whole it is plain that the defendant's chromo is formed upon the same general design as the first, although with very important variations, and is an infringement of it, if the first was lawfully copyrighted before any publication of it. The defendant's chromo is designed as a card advertising the sale of "bock beer" which is sold mainly in the months of April and May.

From the defendant's affidavits it, however, appears that the complainant's chromo was designed in Europe by G. Bartsch, an alien European artist, whose name is engraved on the face of the print; that in the right-hand corner beneath are printed the words, "Wittemann Bros., Publishers of Art Lithographs, New York;" that the work is strictly a chromo-lithographic print; that all the complainant's copies of it were printed and completed in Europe, whence it was imported to this city by the complainant, who thereupon undertook to take out a copyright by depositing two copies with the librarian of congress, as above stated, and stamping upon the left-hand corner the words added by the complainant, "Copyrighted 1880, by D. G. Yuengling, Jr., New York;" that the defendant has long been a designer, and is also engaged in the lager-beer advertising business; that in the summer of 1880, at the book-printer's establishment of Keely & Bartholom, 22 College place, in this city, where he had previously been accustomed to get work done, he was shown a copy of all the colored portion of this chromo, but without the copyright stamp thereon; that he was informed by them at that time that it was a German work, not copyrighted, and had shortly before been imported and received by them from Europe; that he was then allowed to take this copy away with him, and had retained it ever since, and had made his own chromo therefrom, with the variations above pointed out; that he never saw any copy with any copyright

stamp upon it, and had no knowledge of any such copyright until the commencement of this suit.

§ 141. *A chromo, if really a work of art, is a proper subject of copyright, although gratuitously distributed as an advertisement.*

It is urged on the part of the defendant that the plaintiff's chromo is not the subject of a copyright, because it was designed, used, and circulated by him as a gratuitous advertising card for the benefit of his private business as a lager-beer brewer, and not for the instruction or improvement of the public. The case of *Cobbett v. Woodward*, Law Rep., 14 Eq., 407, relied on by the defendant, was a case where the catalogue of an upholsterer, containing engravings of the articles offered by him for sale and circulated gratuitously, was held not to be the subject of copyright on this ground. A similar decision was made in this court in the case of *Collender v. Griffith*, 11 Blatch., 212, concerning engravings of billiard tables offered for sale; but in that case it was held that the engravings were not works of art, and did not have any value or use as such, and that it was a mere mode of advertising the tables for sale. The case of *Ehret v. Pierce*, 18 Blatch., 302 (S. C., 10 Fed. R., 553), was decided upon the same principle. The case of *Cobbett v. Woodward*, *supra*, has not been followed in England, but was substantially overruled in the subsequent case of *Grace v. Newman*, Law Rep., 19 Eq., 623.

The plaintiff's chromo in the present case is not a mere engraving or print of any article which the complainant offers for sale. It is a work of the imagination, and has such obvious artistic qualities as, in my judgment, render it fairly a subject of copyright, without regard to the use which the plaintiff has made or may intend to make of it. Where the work in question is clearly one of artistic merit, it is not material, in my judgment, whether the person claiming a copyright expects to obtain his reward directly through a sale of the copies, or indirectly through an increase of profits in his business to be obtained through their gratuitous distribution.

§ 142. *Who are entitled to the protection of copyright. Authors directly, proprietors derivatively.*

There are several grounds, however, why the preliminary injunction sought in this case should not, I think, be granted. 1. It being conceded that the complainant is not the author or designer of this chromo, it is incumbent upon him to show how he became entitled to any exclusive copyright of it. In *Green v. Bishop*, 1 Cliff., 186, 198 (§§ 242-48, *infra*), Clifford, J., says: "It is undoubtedly true that when a party comes into a court of law or equity seeking protection of a copyright, he must show that he is the author of the work, or that his title is derived from one sustaining that relation to the publication. *Little v. Gould*, 2 Blatch., 181 (§§ 115-23, *supra*). The plaintiff does not show any such derivative title, and it appears that he is not the author."

The owner or proprietor of a work has not, since the act of 1870, any more than before, in that character alone any right of copyright. It is only to "authors and inventors," or to persons representing the author or inventor, that congress is authorized by the constitution to grant a copyright. Const., art. 1, § 8. The right of any other person than the author or inventor must therefore be a purely secondary and derivative one, and in enforcing any alleged copyright such a person must show an exclusive right lawfully derived from the author or inventor; and this the plaintiff has not done. I find no other averment in the papers save that in the bill that on the 23d of August, 1880, he was "the proprietor of said chromo." This is not enough. It does

not show any exclusive right derived from an original author. It appears, in opposition, that the work was designed and printed in Europe by an alien artist, and that copies of this design were imported into this country and came into defendant's hands independently of the complainant. There is no averment either that the design itself was *new*, or that the lithographic stones for the print were engraved by any person employed by the plaintiff or in his behalf, or that any right of copyright was ever transferred, or intended to be transferred, to the plaintiff by the author or artist. The "chromo" may be a mere copy of an European painting long since published in Europe, and free to be copied by any one. For aught that appears, the whole design may have been common property for an indefinite period, as would seem to be the case with the typical form of King Gambrinus. The complainant may have been the "proprietor" of the chromos which he imported, and may have "produced them at great expense," and yet have no exclusive right whatever, as between himself and the European artist, to the sole use even of the lithographic stones in Europe for the multiplication of any additional copies, much less to the original design. In that case he could acquire no copyright which would exclude the defendant, or any other person, from availing himself, either wholly or in part, of other copies obtained from Europe, either from the same stones or from the common source of the design.

In *Johnson v. Donaldson*, 3 Fed. R., 22 (18 Blatch., 287), in reference to an alleged infringement of the copyright of a chromo, it was held by Wallace, J., that if the plaintiff acquired his copyright by appropriating a sketch from a foreign publication, he would not become a proprietor thereof, and could acquire no exclusive copyright; that even if the plaintiff were the artist and designer of the picture so appropriated, the "defendant would not be liable if he did not avail himself, directly or indirectly, of the plaintiff's production."

In *Rosenbach v. Dreyfuss*, 2 Fed. R., 217, it is said by Choate, J.: "It is not enough that the defendant *may* be liable if the facts stated in the complaint be true. It must appear that he *is* liable if the complaint is true." And judgment was for the defendant on demurrer, because it did not certainly appear that the articles described were articles for which a copyright could be granted under the laws of the United States.

In this case it appears affirmatively, from the defendant's affidavits, that in making his chromo he has not availed himself of any copy of the chromo imported by the plaintiff; while from the want of any averment, either that the design was new, or that the plaintiff had ever acquired the exclusive rights of the foreign artist, in case the artist had any such exclusive right, it is impossible to say that the defendant, in availing himself of parts of a foreign copy, independently imported, violated any right of the author, much less of the plaintiff, who could only claim through the author.

§ 143. *Construction of statute, act of 1870, and Revised Statutes, section 4952 — on copyright. Does not protect "proprietors," except as representatives of authors. The law protects only native talent.*

2. The plaintiff claims that the act of July 8, 1870 (16 St. at Large, § 86; R. S., § 4952), authorizes a citizen or resident of this country, if he be "proprietor" of any book, map, print, chromo, etc., to obtain a copyright therefor, although the author, inventor or designer is an alien. The act of 1870, for the first time, uses the word "proprietor" in connection with the words "author, inventor or designer," as one of the persons to whom a copyright

may be granted, although ever since the act of 1790 a proprietor might obtain a copyright if he were the lawful representative of the exclusive rights of a native or resident author. Thus, though the connection in which the word "proprietor" is used in the act of 1870 is new, the use of the word itself in relation to copyrights is as old as the laws of copyright. 1 St. at Large, p. 125, §§ 2, 3, 4, 6; 2 St. at Large, p. 171, §§ 1, 3; 4 St. at Large, p. 437, § 3; 11 St. at Large, p. 139, § 1; 13 St. at Large, p. 540, § 2; 8 Geo. II., ch. 13, § 1; 17 Geo. III., ch. 57.

The literal reading of the section of the act of 1870, now embodied in section 4952 of the Revised Statutes, does not require that both the "author" and "proprietor" shall be citizens or residents of the United States. It provides that "any citizen of the United States or resident therein, who shall be the author, inventor, designer or proprietor of any book, map, chart, dramatic or musical composition, engraving, cut, print or photograph, or negative thereof, or of a painting, drawing, chromo, statue, statuary, and of models or designs intended to be perfected as works of the fine arts, and the executors, administrators or assigns of any such person," may obtain a copyright; and section 103 of the act of 1870, embodied in section 4971 of the Revised Statutes, provides that "nothing therein shall be construed to prohibit the printing, publishing, importation or sale of any book, map, chart, dramatic or musical composition, print, cut, engraving or photograph, written, composed or made by any person not a citizen of the United States, nor resident therein." By virtue of the latter section an exclusive copyright in the work of any foreign author or artist in the subjects mentioned in that section is prohibited; but this section does not embrace the words "painting, drawing, chromo, statue, statuary and models," which were introduced into the copyright law for the first time in the act of 1870; and on this ground it is urged by the complainant that a "proprietor" may obtain a copyright on the last-mentioned subjects, though the artist or author is an alien, because these are not prohibited by section 4971.

There are three objections to the plaintiff's contention in this respect: *First*, that it involves a reversal of the policy of the government from its foundation to protect American artists and authors only; *second*, that the word "proprietor," as used in the copyright laws, in itself means the representative of an artist or author who might himself obtain a copyright; and, *third*, that chromos are in reality embraced under the description of a "print" in the restrictive section, 4971.

It cannot be doubted that the purpose of the copyright laws from the foundation of the government has been to encourage native talent, and to protect American authors and artists only (Drone, Copyright, 231, 257), as the English acts were designed "to protect only those works which were designed, engraved, etched, or worked in Great Britain." Page v. Townsend, 5 Sim., 395, 404.

In the first act on the subject, that of May 31, 1790, the prohibition against an extension of the copyright to alien authors was as broad as the section authorizing copyright in favor of resident authors. 1 St. at Large, p. 124, §§ 1, 2, 5. With every extension of the subjects of copyrights made by subsequent statutes a corresponding restriction was inserted in the prohibitory section relating to foreign authors or artists until the act of 1870, when the few additional subjects above mentioned were added to the subjects of copyright without any corresponding insertion in the restrictive clause as respects

foreign authors or artists. But even this omission, which was probably accidental, would not of itself have sufficed to admit copyright upon the works of foreign authors or artists, because the section authorizing the granting of copyright has always been limited to authors or artists being citizens or residents of the United States, or to their lawful representatives or assigns. It is only by the introduction of the word "proprietor" into the authorizing clause of the act of 1870, section 86, that any doubt could arise in regard to the new subjects of copyright then first introduced and not expressly restricted as respects foreign artists; and its effect, by a mere literal reading, to allow a copyright on the works of foreign artists, has the appearance of being accidental only. After a policy, so early established and so constantly upheld, in reference to every subject of copyright, through all the extensions of the law up to 1870, to limit its protection to the works of native or resident authors, there is certainly a strong presumption that no change in this policy was intended in respect to a few articles only, added for the first time by the act of 1870, as subjects of copyright. There is nothing apparent in the nature of these new subjects of copyright themselves to distinguish them from the subjects of copyright previously existing which can serve as a probable foundation for any such supposed change of policy.

A copyright here, upon such articles designed and manufactured abroad, would be a double injury to American authors and designers. It would not only encourage the employment of foreign artists to the neglect and detriment of native designers, but it would prevent the use by the latter in this country of the foreign material, which would otherwise find its way here to the education and development of our native artists, and which would serve as models or suggestions for their own work. If all foreign works of this kind can be copyrighted in this country, through a mere transfer to some resident dealer, or agent of the foreign authors, our native artists will be thereby effectually foreclosed and debarred from availing themselves of all such materials for the improvement of their own works. Every intendment and every presumption to be derived from the history of copyright in this country, and from other parts of the act of 1870, seem to me to be against any such intention in that act. The effect of the literal construction contended for by the plaintiff would, moreover, be to make the act of 1870 inaugurate two diverse and conflicting policies in reference to the articles which may be copyrighted under section 86, now section 4952, Revised Statutes; one policy virtually protecting foreign artists by copyright in respect to the few subjects first introduced into the law of 1870, and another policy of excluding them in regard to all the other and much larger number of subjects of copyright named in that act. I cannot believe, in the light of the history of the copyright acts, that, in reference to these few new subjects, congress intended to inaugurate any such change of policy, or to grant an exclusive copyright upon the importation of works wholly designed, manufactured, and completed abroad, upon merely depositing copies of lithographs in the congressional library by some resident owner. Such a construction would in effect confer upon foreign authors and artists, in respect to these subjects of copyright, all the advantages of an international copyright act, without any reciprocal rights or advantages whatever in favor of our own authors and artists.

The argument for the plaintiff rests wholly upon the use of the word "proprietor" in the authorizing clause (section 86) of the act of 1870. But the history of the use of the term "proprietor," ever since the act of 1790, shows that

it has always been used in the copyright laws in the limited and restricted sense of a person who, by purchase or otherwise, has lawfully acquired the exclusive rights of some native or resident author or artist, and in no other manner.

By section 1 of the act of 1790, the right to obtain a copyright is granted to a resident author upon *his* works, or to a resident, or to any other person being *a citizen or resident*, "who has *purchased* and legally acquired the copyright of any *such* work," or the executors, administrators or assigns of such persons. Section 2 imposes a penalty for publishing, etc., "without the consent of the author or proprietor." The same expression, "author or proprietor," is again several times used in sections 2, 3 and 4 of that act. Thus, in this early act, the term "proprietor" is used to embrace all the persons except the original author himself, who, by section 1, might obtain a copyright, viz., the author's executors, administrators or assigns, or any person who had "purchased or legally acquired the copyright." By section 1 it is seen, moreover, that the purchasers referred to are the purchasers of "*such* map, chart, book or books;" *i. e.*, of the works of *resident* authors only. It is the same in all the subsequent statutes above cited.

From the act of 1790 down to 1870 there could be no "proprietor," in the sense of the copyright law, except the owner of the work of a citizen or resident author, including a transfer of such resident's right of copyright.

In the case of *Keene v. Wheatly*, 9 Am. Law Reg., 33, Cadwallader, J., says (page 45): "The other sections concern copyright. They apply only to authors who, if not citizens, must be residents of the United States, and proprietors under derivations of title from *such* authors. No other proprietor can obtain a copyright under the act." A third person may become such an owner or "proprietor" through a transfer or assignment, verbal or written, embracing the right of copyright, after the work is completed, or by virtue of an original employment under a contract with the author, which, by agreement, is to confer upon the employer the complete ownership both of the work itself and of any copyright that may be obtained thereon. Upon such a contract, "the person who remunerates," says the vice-chancellor J. in *Grace v. Newman*, L. R., 19 Eq., 623, "must be taken to be the equitable assignee" of the copyright. *Parton v. Prang*, 3 Cliff., 537, 547, 551 (§§ 136-40, *supra*); *Boucicault v. Fox*, 5 Blatch., 87 (§§ 35-39, *supra*); *Little v. Gould*, 2 Blatch., 362; *Sheldon v. Houghton*, 5 Blatch., 285; *Paige v. Banks*, 7 Blatch., 152; 13 Wall., 608; *Drone*, Copyright, 238, 243-5, 257-9.

To a mere owner of a work as such, to a "proprietor" in that sense only, without any express or implied transfer from the author or inventor of his right to a copyright, congress, as above observed, is not, by the constitution, vested with the power to grant a copyright. Congress is not, indeed, prohibited from protecting foreign authors and artists, if it choose to do so; but, in view of its inflexible refusal to do so up to this time, the phraseology of the statute of 1870, in section 86, is not, to my mind, a sufficient indication of any such change of purpose. When, therefore, in the act of 1870, the word "proprietor" is found used, for the first time, in connection with the words "author, inventor, designer," as a person to whom copyrights may be granted, it must be construed, if possible, in harmony with the inflexible policy and intent of the copyright law up to that date, and be held to be used in the same sense in which the word had always before been used in the copyright law of this country, viz., as meaning the lawful owner and representative, whether by

assignment, employment, death, or other lawful succession, of the exclusive rights of some native or resident author or artist only. It must be construed in harmony with the policy of the copyright law, rather than upon its literal and independent reading. Upon the same principle the supreme court, in the late case of *Wilmot v. Mudge*, 103 U. S., 217, 220, held that the literal reading of an amendment of the section of the bankrupt law, as to the effect of a discharge of a fraudulent debt by a composition, must give way to the manifest general purpose and intent of the act. In that case the court says:

"It is conceded that the defendants in error came within the terms of this provision, and it is insisted that they must be bound by the composition. We admit the apparent force of the logic. But, as we have already said, these several statutes, sections and provisions are to be construed as parts of one entire system of bankrupt law. . . . There is no injustice nor any difficulty in restraining the language of the composition section, as regards its binding force, to persons whose debts are capable of being discharged by the bankrupt law. . . . In this manner both provisions of the bankrupt law can stand and be consistent."

Upon the same principle, the word "proprietor" should be construed so as to produce a harmonious rather than a contradictory policy in the different parts of the copyright law by giving that word the restricted meaning and sense in which it has been used in all the past copyright acts of this country. As respects this chromo, the plaintiff was not a "proprietor" of a native work, and, upon the construction here given, he was not, therefore, a "proprietor" within the meaning of section 4952, even had he shown an exclusive right from the foreign artist, and he is therefore not entitled to the benefits of the copyright law in this chromo.

§ 144. *A chromo is a "print."*

3. The chromo in question is nothing but a lithographic *print* in colors. Lithographs were undoubtedly embraced in the term "print" under the act of 1831, both in the authorizing and the restricting clauses. 4 Stat. at Large, p. 436, §§ 1, 8. The only difference between chromo-lithographic prints and other lithographs is that the former are printed from several stones, namely, one for each color, while the latter are printed from one stone, with ink of some kind. It cannot be contended that a "print" is any the less a "print" because struck off in different colors; and it has been held that playing cards printed in colors are "prints." *Richardson v. Miller*, 3 Law & Eq. Rep. (Am.), 614. A print is "a mark or form made by impression or printing; anything printed; that which, being impressed, leaves its form, as a cut in wood or metal, to be impressed on paper; the impression made; a picture; a stamp; the letters in a printed book; an impression from an engraved plate; a picture impressed from an engraved surface," etc. *Webst. Dict.*; *Worces. Dict.*; *Wood v. Abbott*, 5 Blatch., 325 (§ 145, *infra*). "It means, apparently, a picture; something complete in itself, similar in kind to an engraving, cut or photograph." *Rosenbach v. Dreyfuss*, 2 Fed. R., 217, 221.

Chromo-lithographs were therefore copyrightable as "prints" under the act of 1831, and as such were within the restriction of section 8 of that act. As chromo-lithographs became largely dealt in, and, under the slang name of "chromos," became a considerable article of trade, it was not unnatural that for greater certainty they should be mentioned by name in the revision of the copyright act of 1870. But congress did not thereby abolish the restriction which already existed upon copyrighting them when made by alien artists,

because such chromo-lithographic prints are included in the word "print," which is contained both in section 103 of the act of 1870, and in section 4971 of the Revised Statutes. Under that general designation of "prints," being restricted before, they are restricted still; for in the use of the new and specific word "chromo" in the act of 1870, and in section 4952 of the Revised Statutes, there is nothing incompatible with the restriction under the more general word "print," which both statutes continue in force as before. *U. S. v. Sixty-five Terra Cotta Vases, etc.*, 10 Fed. R., 880.

The preliminary injunction should therefore be denied.

WOOD *v.* ABBOTT.

(Circuit Court for New York: 5 Blatchford, 325-329. 1866.)

Opinion by SHIPMAN, J.

STATEMENT OF FACTS.—The plaintiffs charge the defendants with pirating certain alleged "prints or engravings," the copyrights of which the plaintiffs allege belong to them. The case presented by the proofs is a novel one, at least in this court, and requires a statement of the facts in order to see the precise point which the judgment of the court determines.

The plaintiffs are photographers in the city of New York, and are engaged in business as partners under the name of the New York Photographing Company. One Fish, an artist, drew in crayon two original drawings or designs of the human figure, one called "The Golden Age," and the other "School Days." These pictures he sold to the plaintiffs, and assigned to them, so far as he could legally do so, all the rights which he had to or growing out of the same. The object of this sale and assignment by Fish and purchase by the plaintiffs was to enable the latter to manufacture and copyright photographs of the original drawings. To carry out this object the plaintiffs caused what are known in photography as "negatives" to be taken. From these negatives they produced great numbers of copies of the original designs, but of a very much smaller size. Before the publication and sale of these copies, the plaintiffs deposited in the clerk's office of the United States district court for the southern district of New York, printed titles of the designs, together with photographic copies thereof. They also, before the publication and sale of such copies, impressed on the latter the words "Entered according to act of congress," etc. There is some dispute in the evidence as to whether or not these words were impressed on all of the pictures before they left the hands of the plaintiffs, but, for the purposes of this motion, I shall assume that they were placed on them all. These photographic copies were quite small, and were mounted on cards of nearly the same size, about two and a half inches by four. The pictures themselves were on a piece of thin paper, and these were pasted on the cards. The words "Entered according to act of congress," etc., were not on the thin paper upon which the pictures were taken, but were impressed on the cards upon which they were pasted, just at the foot of the pictures. The defendants insist that inasmuch as the statute requires these words to be "impressed on the face thereof" in order to entitle the party to the benefit of the act, the impression of the words on the card at the foot of the picture was not a compliance with this requirement, and that therefore the alleged copyright furnishes no protection to the publishers. It is not necessary to determine this point in the present case, for there is another one more

prominent and strongly marked which, in the judgment of the court, is decisive of the controversy between these parties.

The defendants having purchased a copy of each of these small photographic pictures made negatives from them, and from such negatives printed and sold in the market copies almost identical with those made and sold by the plaintiffs. The plaintiffs insist that, upon these facts, they have shown valid copyrights for these small photographs, made from the original designs in their possession, and that the defendants have infringed their rights in the premises, and the question is, whether the verdict taken at the trial can be supported by the first section of the act of 1831, upon which the alleged copyrights are founded. That section provides that "any person or persons being a citizen or citizens of the United States, or resident therein, who shall . . . invent, design, etch, engrave, work, or cause to be engraved, etched or worked, from his own design, any print or engraving, and the executors, administrators or legal assigns of such person or persons, shall have the sole right of printing, reprinting, publishing and vending such . . . print, cut or engraving, in whole or in part, for the term of twenty-eight years from the time of recording the title thereof, in the manner hereinafter directed." A glance at this section will show that the question in controversy is, whether or not these photographs are prints, cuts or engravings, and, therefore, protected by the statute.

The principal ground upon which the plaintiffs claim the validity of the copyright is that, as they allege, the photographs are "prints." The process by which these photographs are taken is substantially as follows: The original picture is transferred to a prepared glass plate, according to the well-known practice of photographers. This copy of the original is called a negative, and, as seen in the medium of transmitted light, the lights and shadows of the original are reversed. A sheet of prepared paper is then laid upon the plate, both paper and plate are put into a frame of the proper size, in which pressure is applied to the paper by appropriate means, so as to bring the paper into contact with the plate throughout its entire surface, and then the plate is exposed to the light of the sun. The rays of light transmitted through the glass throw the picture on the prepared paper and fix it there in positive light and shadow. By this means reduced copies of the original are extensively multiplied. The pressing of the paper upon the glass plate is to make the contact of their surfaces perfect throughout, in order to prevent the diffusion of the light and the consequent blurring of parts of the picture, which would occur in spots where this contact did not take place. In other words, the pressure is to hold the paper to the glass plate in such a way as to secure a uniform chemical action of the light on the paper, controlled or disturbed in no way except by the shadowy image on the glass itself. The rays of light paint or delineate, by chemical action, the image on the paper, guided by the image on the glass. These rays paint it in just the same way in which they paint the negative on the glass, except that, in the latter case, they are reflected from the original, while in this they pass directly through the transparent plate. This is a new and beautiful art, discovered long after the statute in question was enacted. It is not a development of the art of making prints or engravings which existed at the date of the act. Then a print was defined to be "a mark or form made by impression or printing; anything printed; that which, being impressed, leaves its form, as a butter print; a cut in wood or metal to be impressed on paper; the impression made; a picture; a stamp; the letters in a printed book," etc.

As used in this statute it was synonymous with the term "engraving," with which it is connected in the act, which means, in this relation, "an engraved plate; an impression from an engraved plate." This new art of photography, and all its kindred processes, is an entirely original and independent mode of taking pictures of material objects, and multiplying copies of such pictures at pleasure. That combination of creative or imitative power and mechanical skill by which the artist works out his own conception, or the embodied conception of another, in a fixed form, the fruits of which the law was intended to protect, is not brought into play. No block, plate or stone is engraved. No figure is drawn, etched, raised or worked on any surface from which copies are to be produced by impression or printed. The image thrown by light reflected from the original and passed through a camera produces a negative, and, when the light passes through the transparent negative on to paper held in contact with glass, it produces a positive. The image is no more formed by pressure when the positive is made on the paper held in contact with the glass plate, than when the negative is made on the glass by rays reflected from the original at a distance. In both cases, the only force that contributes to the formation of the image is the chemical force of light, operating on a surface made sensitive to its power. The springs in the pressure frame hold the paper firmly in contact with the glass, and thus prevent the diffusion of the light after it passes through the negative. This position of the paper and plate renders the operation of the light direct and strong, and brings out the lines of the picture clearly and sharply.

§ 145. *Photographic printing cannot be protected by copyrights by force of the effect of any clause or provision of the act of February 3, 1831.*

The manufacture of these positives is called, in the language of this new art, photographic printing. But names are not things. It is not printing in any sense known to the arts at the time this copyright act was passed; nor is it an extension of the old processes, or a new development of the art of printing or the art of engraving, as those arts were then understood. It is an entirely original and independent method of producing and multiplying pictures — an art, not of printing or engraving, but of securing the delineation of pictures by light operating on sensitive surfaces. In no just sense, therefore, can it be said to be within the act of 1831. Congress, proceeding upon this view, by the act of March 3, 1865 (13 U. S. Stat. at Large, 540), extended the protection of the copyright act to this new art of photography. This, however, was not done till after the copyrights in question were taken out, and this suit was brought. These plaintiffs, therefore, have no remedy in the present case. The verdict must, therefore, be set aside.

ROSSITER v. HALL.

(Circuit Court for New York: 5 Blatchford, 362-366. 1866.)

Opinion by BENEDICT, J.

STATEMENT OF FACTS.—This case comes before me upon a motion for an injunction to restrain the defendants from producing and selling photographs of an engraving known as "The Home of Washington." The papers read show that the engraving in question is a duly copyrighted engraving, owned by the plaintiffs, and that the defendant, by the photographic process, has produced a negative representation of this engraving, from which he prints photographs of it in various sizes, and is disposing of the same without the

consent of the plaintiffs. This the defendant claims the right to do, upon the ground that the copyright laws do not forbid the making of photographs of copyrighted engravings.

The act of February 3, 1831 (4 U. S. Stat. at Large, 436), in the first section, declares that any person who shall invent, design, etch, engrave, work, or cause to be engraved, etched or worked, from his own design, any print or engraving, shall have the sole right and liberty of printing, reprinting, publishing and vending such print, cut or engraving, in whole or in part; and in the seventh section it declares that, if any person shall engrave, etch or work, sell or copy, or cause to be engraved, etched, worked or sold, or copied, either on the whole or by varying, adding to or diminishing the main design, with intent to evade the law, such offender shall forfeit the plate on which such engraving, cut or print shall be copied, and shall further forfeit \$1 for every sheet of such print, cut or engraving which may be found in his possession.

§ 146. *A reproduction of a print or picture by photography is a manner of copying, within the meaning of the act of February 3, 1831, and therefore an infringement of a copyright, where such print or picture has been previously copyrighted.*

The argument of the defendant is that the exclusive privilege given by the first section of the act does not include the photographing the copyrighted engraving, because that is not a "printing" or a "reprinting," and that the general words of the seventh section cannot be held to forbid in others what has not been exclusively reserved to the author by the words of the first section; and further, that photographing could not have been within the intent of the law-makers, as the art of photography had not been discovered when the act was passed. In support of such a construction the decision of Judge Shipman in the case of *Wood v. Abbott*, 5 Blatch., 325 (§ 145, *supra*), is cited. I cannot agree to the construction of the act which is contended for. In my opinion, sections 1 and 7 should be read together; and, so taken, the words used disclose a clear intent to protect a copyrighted work from such a mode of duplication as is practiced by the defendant. Section 7 provides that any person who shall engrave, etch or work, sell or copy the engraving, shall be an offender. The word *copy* is a general term, added to the more specific terms before used, for the very purpose of covering methods of reproduction not included in the words engrave, etch or work, and, if it covers anything, should cover the photographic method, which, more nearly than any other, produces a perfect copy. This construction of the American act is sustained by the construction given by the English courts to the British act, which contains the word *copy*, used in a similar connection. Hence, in *Gambart v. Ball*, 14 C. B., new series, 306, where the question was whether the copyright of the engraving of Rosa Bonheur's "Horse Fair" was infringed by photographing it, Erle, C. J., says: "Is a reproduction of the print by photography a manner of copying? To that I answer in the affirmative." And the three other judges express the same opinion. Indeed, to hold otherwise would work a substantial repeal of the copyright laws in many cases. For not only engravings, but books may be reproduced by the photographer, and, under the construction claimed by the defendant, authors and publishers would be in no way protected against such reproduction of their works, while the art has been carried to such perfection that the photographic copies of certain classes of engravings, which can be produced at a trifling cost, are, for the purposes of trade, nearly or quite equal to the orig-

inals. It needs but an allusion to the amendment to the copyright law of 1831, passed in 1865 (Act of March 3, 1865, 13 U. S. Stat. at Large, 540), to dispel any doubt as to the proper construction of the act of 1831. This amendment was passed in order to protect original photographs, which were supposed not to be embraced by the words "print, cut or engraving," used in the act of 1831. In order to accomplish that, it simply provides that the provisions of the act of 1831 "shall extend to and include photographs and the negatives thereof, which shall hereafter be made, and shall inure to the benefit of the authors of the same, in the same manner and to the same extent, and upon the same conditions, as to the authors of prints and engravings." But it does not add the word "photograph" to the words used in the seventh section. If, then, the word *copy* does not cover the photographic process, photographs can with impunity be reproduced by the only method ever likely to be resorted to for the purpose, and the amendment gives them no protection at all. The construction I have given to the act of 1831 is necessary to render of any beneficial effect the amendment of 1865.

This conclusion is entirely consistent with the construction given to the act of 1831 in the decision of Judge Shipman cited by the defendant. What Judge Shipman decided in that case was, that, previous to the amendment of 1865, a photograph could not be the subject of a copyright, as it was not a print, cut or engraving, within the meaning of the first section of the act of 1831. The learned judge did not decide or discuss the question whether the word *copy* in the seventh section includes photographic copies, which is the question here.

§ 147. *Notice to the effect that the print or picture is copyrighted may be placed either on the face of the picture or within the line of a reasonable margin, where it would not be covered if properly framed.*

Another point taken by the defendant should also be noticed, which is, that the plaintiffs' engraving did not have upon it the information that it was a copyright, required, by the fifth section of the act, "to be impressed on the face thereof." It appears that the usual legal memorandum of copyright was, in this case, in engraved letters, placed some three inches below the picture itself, and printed with the picture from the plate. The affidavit of Mr. Knoedler shows that the notice would be seen in the margin of the print when properly framed, and that it was placed in the usual position. The defendant claims that the words of the act, "impressed on the face thereof," require the notice to be placed on the picture itself instead of on the margin. But I think, that, when the required notice is plainly engraved on the plate from which the print is taken, within the line of a reasonable margin, and where it would not be covered when properly framed, it is impressed on the face, within the meaning of the act.

It seems, therefore, quite clear, that the defendant is infringing upon the plaintiffs' copyright, and I must grant the motion for an injunction to restrain him.

§ 148. **Book, not printed.**—A book may be the subject of copyright when composed, though it is not printed. *Roberts v. Myers*,* 23 Law Rep., 396; 13 Law Rep. (N. S.), 396.

§ 149. **A book**, within the meaning of the acts of congress relating to copyright, need not be a book in the ordinary acceptation of the term, but may consist of only one sheet, as a song with accompanying music. *Clayton v. Stone*,* 2 Paine, 382; 1 Leg. Int. & Rev., 69.

§ 150. **Translations.**—A translator of a play from a foreign language may obtain a copyright therefor, and all persons will be enjoined from acting the play as thus translated without the assent of the translator or his assigns, though they may use other translations if they

do not use the whole or any part of the translation belonging to the complainant. *Shook v. Rankin*,* 6 Biss., 477; 2 L. & Eq. Rep., 236; 8 Ch. Leg. N., 345.

§ 151. **Foreign works.**—No exclusive right to republish the published works of a foreign author can be acquired in this country. New matter and illustrations may be included, and they may be protected by copyright, but the protection of the copyright laws can extend no further. *Sheldon v. Houghton*, 5 Blatch., 285.

§ 152. **Engraving of patented article.**—A person who manufactures a patented article of a given form cannot, by copyrighting an engraving of the article manufactured by him, prevent another person having the right to manufacture such articles in the same form from publishing a picture of them as a means of advertising them. *Collender v. Griffith*, 11 Blatch., 212.

§ 153. **Photographs.**—So far as a photograph is an original work of art and the product of intellectual invention, it may lawfully be the subject of copyright under the eighth section of article 1 of the constitution. *Lithographic Co. v. Sarony*,* 111 U. S., 53.

§ 154. **A second edition** of a work may be published in a less number of volumes than the first and still be protected by the original copyright if notice thereof is properly published. *Dwight v. Appleton*,* 1 N. Y. Leg. Obs., 195.

§ 155. A copyright affords no protection to what was not in existence when it was granted, and notes and additions incorporated in a subsequent edition of a work are not protected by the original copyright. *Lawrence v. Dana*, 4 Cliff., 1 (§§ 257-69).

§ 156. **A daily price current** is not within the protection of the acts of congress of May 31, 1790, and April 29, 1802, relating to copyrights. *Clayton v. Stone*,* 2 Paine, 382; 1 Leg. Int. & Rev., 69.

§ 157. **A map** is not the subject of copyright except so far as it is based upon original labor, and the right therein is violated only when another person by copying therefrom avails himself of the skill and labor of the first; but merely colorable alterations are insufficient to protect the infringer. *Blunt v. Patten*,* 2 Paine, 397.

§ 158. A new edition of a map is protected by a copyright of the former edition, where the title is unchanged, even though there is a change in the date and on the face of the map in some particulars. *Farmer v. Calvert Lithographing, etc., Co.*, 1 Flip., 228 (§§ 288-97).

§ 159. **Private letters.**—Unless there is a most unequivocal dedication of private letters and papers by the author to the public, or to some private person, the author has a property therein and the copyright thereof belongs exclusively to him. *Folsom v. Marsh*, 2 Story, 100 (§§ 249-56).

§ 160. **A label** of medicine setting forth its name and valuable qualities is not a book within the meaning of the copyright law, and is not the subject of copyright. *Scoville v. Toland*,* 6 West. L. J., 84.

§ 161. **Paintings.**—The president of a corporation made a design from a wood cut belonging to the corporation, and a painting was made therefrom by an artist employed by the corporation. *Held*, that the corporation might copyright the painting, though it was of a size such that lithographic copies were adapted for labels. *Schumacher v. Schwencke*,* 25 Fed. R., 466.

§ 162. **Chart.**—A folded sheet of paper exhibiting tabulated and methodically arranged information is not a "chart" within the meaning of the copyright law. *Taylor v. Gilman*,* 24 Fed. R., 632.

§ 163. **Old materials.**—An author who has compiled and written a new work upon a new and original plan, arrangement and combination of materials, and who has not servilely copied or evasively imitated another, is entitled to a copyright of his work even though all the materials employed by him are old. *Greene v. Bishop*, 1 Cliff., 186 (§§ 242-48).

§ 164. A new plan, arrangement and combination of materials by an author entitles him to a copyright whether the materials are new or old. The author cannot thereby appropriate to himself materials which were common to all persons before him, but he has the exclusive right to use such materials with his improvements added, whether they consist in plan, illustrations, arrangement or combinations. *Emerson v. Davies*, 3 Story, 768; 8 Law Rep., 294; 4 West. L. J., 261 (§§ 270-79).

§ 165. A play may be original and entitled to the protection of a copyright though it is to some extent formed out of existing materials, provided that it is not merely copied or slavishly imitated. *Boucicault v. Fox*, 5 Blatch., 87 (§§ 35-39).

§ 166. Copyright may be justly claimed by an author who has taken existing materials from sources common to all writers and arranged and combined them in a new form, and given them an application before unknown. Others may use the old materials for a different purpose, but they cannot copy and use his improvement, which includes his plan, arrangement and combination of materials, as well as the materials themselves. *Lawrence v. Dana*, 4 Cliff., 1; 2 Am. L. T. (N. S.), 402 (§§ 257-269).

§ 167. An author may have a copyright in his notes to an older work, though the materials collected are not new, if they have never before been collected and embodied. *Ibid.*

§ 168. **Judicial opinions.**—In the absence of a state statute making them the subject of copyright, the written opinions of the judges of the state supreme court, together with the head-notes and statements of fact by them, are not the subject of copyright, though the work of the official reporter is, and that only is protected by the copyright of the volume of reports. *Banks v. Manchester*,* 23 Fed. R., 143.

§ 169. The reporter of the supreme court of New Hampshire has no copyright in the opinions of the court and of the head-notes prepared by the judges writing the opinion. *Chase v. Sanborn*,* 4 Cliff., 306; 6 O. G., 932.

§ 170. A state reporter of judicial decisions is an author within the meaning of the constitution and the copyright laws of the United States. *Little v. Gould*,* 2 Blatch., 362.

§ 171. In the absence of any express legislation by the state indicating a contrary principle, the state reporter of judicial decisions is entitled to a copyright in his volumes of reports for what is the work of his mind and hand, notwithstanding he may have no copyright in the opinions of the court. *Myers v. Callaghan*,* 10 Biss., 139; 5 Fed. R., 726.

§ 172. The reporter of the supreme court of the United States has no copyright in the written opinions thereof. *Wheaton v. Peters*, 8 Pet., 591 (§§ 12-16).

§ 173. **Ownership of a title of a work.**—The person who deposits for copyright the title of a drama, which title is not original with him, cannot thereby secure such title to himself to the exclusion of others who, before such title was deposited, have applied the same title to a dramatic composition founded on the same story. *Benn v. Leclercq*,* 18 Int. Rev. Rec., 94.

§ 174. A dramatic author by copyrighting his production secures only what is his own in it. He cannot prevent others from composing and publishing a similar book on the same subject, provided they do not pirate from his copyrighted book, but rely on their own intellects and mental powers. *Ibid.*

§ 175. A suit for infringement may be maintained by the author of a dramatic composition after the title of his work has been filed but before publication, under the act of congress of August 18, 1856. *Boucicault v. Wood*,* 2 Biss., 34; 7 Am. L. Reg. (N. S.), 539.

§ 176. In order to entitle a dramatic composition to the benefit of the copyright laws it must be fit to be acted,—it must not be immoral or indecent. *Martinetti v. Maguire*,* Deady, 216; S. C., 1 Abb., 356.

§ 177. A mere spectacle, such as *Black Crook*, in which the dialogue is scant and meaningless, and is a mere accessory to the action of the piece, is not a dramatic composition, and is not entitled to protection under the copyright laws. *Ibid.*

§ 178. **Musical compositions.**—If a given musical composition was borrowed from a former one, or was made up of different parts copied from older musical compositions without any material change, and put together into one tune, with only slight and unimportant alterations or additions, then the compiler is not the author within the meaning of the law. But the circumstances of its corresponding with older musical compositions, and belonging to the same style of music, does not constitute it a plagiarism, provided the air in question, in its main design, and in its material and important parts, is the effort of his own mind. *Reed v. Carusi*,* 8 Law Rep., 410.

§ 179. An original arrangement of an existing piece of music is the subject of copyright, though it is not entirely an original composition, and a publication of a piece of music substantially like such adaptation is an infringement. *Schuberth v. Shaw*,* 19 Am. L. Reg. (N. S.), 248.

§ 180. It seems that a person is not entitled to a copyright in a musical production which has been altered and improved by his procurement, but by other persons. *Atwill v. Ferritt*, 2 Blatch., 39.

§ 181. If a piece of music is not protected by copyright, its title is not, and others may use it. *Jollie v. Jaques*,* 1 Blatch., 618; 9 N. Y. Leg. Obs., 10.

§ 182. A musical composition which is merely a copy of an imported piece differently arranged and adapted, or transposed, is not entitled to copyright. *Ibid.*

§ 183. A dedication to the public by a composer of an oratorio of a score for the piano, with marginal notes showing the instruments employed in orchestration, does not permit an unauthorized person to reproduce or copy the orchestral score, and the production of such oratorio by an unauthorized person with orchestral score will be enjoined at the suit of the assignee of the right to produce it, even though the orchestration is by another person than the composer, and the full score is not attempted to be reproduced. *Thomas v. Lennon*,* 14 Fed. R., 849; 16 Cent. L. J., 108; 15 Rep., 258.

§ 184. **Instances.**—A print of a balloon or of a hanging basket with printing for embroidery and cutting lines is not a copyrightable article. *Rosenbach v. Dreyfuss*,* 2 Fed. R., 217; 2 Alb. L. J., 472; 17 O. G., 1153.

§ 185. A card upon which are exhibited specimens of paint is not subject to copyright under the act of congress of February 3, 1831. *Ehret v. Pierce*,* 18 Blatch., 302; 10 Fed. R., 553.

§ 186. A claim to an exclusive method of advertising, as by exhibiting different colors of paint in squares upon a card, cannot be acquired under the copyright laws. *Ibid.*

III. SECURING COPYRIGHT.

SUMMARY — *Deposit of copies of work*, §§ 187, 188.

§ 187. The owner of a copyright cannot recover for an infringement thereof unless he shows by competent evidence that, within ten days after publication, he deposited two copies in the office of the librarian of congress, or deposited them in the mail, properly addressed to such officer. *Merrell v. Tice*, §§ 189-91.

§ 188. An unsigned memorandum appended to the signed and sealed certificate of the librarian of congress of the proper deposit of a copy of the title-page of a book, that two copies of the publication were deposited, is not admissible evidence of such deposit in an action against an infringer of the copyright. *Ibid.*

[NOTES.— See §§ 192-215.]

MERRELL v. TICE.

(14 Otto, 557-562. 1881.)

ERROR to U. S. Circuit Court, Eastern District of Missouri.

Opinion by MR. JUSTICE BRADLEY.

STATEMENT OF FACTS.— This was an action at law to recover damages for the infringement of a copyright. Tice, the plaintiff below, is the author of an almanac known as “Professor Tice’s Almanac.” The copyright alleged to be infringed was that of the almanac for 1877. The declaration contained the proper averments, and the answer a general denial. On the trial the plaintiff produced a copy of his almanac, having on its title-page the words required by the act, “Entered according to act of congress,” etc.; and then, to show that he had complied with the law of copyright, produced a certificate of the librarian of congress, under his seal of office, in the words following:

“ {	LIBRARY OF CONGRESS, COPY-	LIBRARY OF CONGRESS,
{	RIGHT OFFICE, UNITED STATES	COPYRIGHT OFFICE,
{	OF AMERICA.	WASHINGTON.

No. 12,579 G.

“To wit: Be it remembered that on the 13th day of November, anno Domini 1876, John H. Tice, of St. Louis, Mo., has deposited in this office the title of a book, the title or description of which is in the following words, to wit:

“*Professor Tice’s Almanac for the year 1877, etc.*

“The right whereof he claims as proprietor in conformity with the laws of the United States respecting copyrights.

“ {	LIBRARIAN OF CONGRESS, COPY-	(Signed)
{	RIGHT OFFICE, UNITED STATES	A. R. SPOFFORD,
{	OF AMERICA.	Librarian of Congress.

“I, A. R. Spofford, Librarian of Congress, hereby certify that the foregoing is a true copy of the original record of copyright in the Library of Congress.

“In witness whereof I have hereunto set my hand and affixed the seal of my office, this 11th day of May, 1878.

“A. R. SPOFFORD,
“Librarian of Congress.

“Two copies of the above publication deposited December 6, 1876.”

To the introduction of that portion of said paper in the words "two copies of the above publication deposited December 6, 1876," the defendant objected, on the ground that it was no part of the certificate, but a mere anonymous statement, when and by whom made not appearing, and incompetent; which objection the court overruled and permitted the statement to go to the jury; to which ruling the defendant excepted. No other evidence was given to show that any copy or copies of the book had been deposited with the librarian or in the mail. The infringement was proved to the satisfaction of the jury, who, under the charge of the court, rendered a verdict for the plaintiff. Other exceptions to evidence appear in the bill of exceptions, but it is unnecessary to consider them. The questions to which we have given attention, and which are decisive of the case, are:

First, Whether the plaintiff was bound to prove that two copies of the book had been deposited with the librarian or in a postoffice, according to the requirements of the law?

Secondly, If he was, whether the proof adduced was competent for that purpose?

These questions will be considered together.

§ 189. *To secure a copyright the party must, within ten days after publication, deliver or deposit in the mail addressed to the librarian of congress two copies of the work sought to be copyrighted.*

The acts of congress relating to the subject are found in sections 4956 to 4961 of the Revised Statutes.

Section 4956 declares that no person shall be entitled to a copyright unless he shall, before publication, deliver at the office of the librarian of congress, or deposit in the mail addressed to the librarian, at Washington, a printed copy of the title of the book or other article, etc.; nor unless he shall also, within ten days from the publication thereof, deliver at the office of the librarian, or deposit in the mail addressed to him, at Washington, two copies of such copyright book or other article, etc.

Section 4957 requires the librarian to record the name of the book or other article in a book to be kept for that purpose in the words following: "Library of congress, to wit: Be it remembered that on the — day of —, A. B. of — hath deposited in this office the title of a book (map, chart or otherwise, as the case may be, or description of the article), the title or description of which is in the following words, to-wit: (here insert the title or description), the right whereof he claims as author, etc., in conformity with the laws of the United States respecting copyrights. C. D., Librarian of Congress." The librarian is required to give a copy of the title or description, under the seal of the librarian of congress, to the proprietor whenever he shall require it.

Section 4958 prescribes the librarian's fees: "First, for recording the title or description of any copyright book or other article, fifty cents; second, for every copy under seal of such record actually given to the person claiming the copyright, or his assigns, fifty cents," etc.

Section 4959 declares that the proprietor of every copyright book, etc., shall deliver at the office of the librarian of congress, or deposit in the mail addressed to him, within ten days after its publication, two complete printed copies thereof, of the best edition issued, and a copy of every subsequent edition wherein any substantial changes are made.

Section 4960 imposes a penalty of \$25 for failure to deposit the published copies as required in the previous sections.

Section 4961 declares as follows: "The postmaster to whom such copyright book, title or other article is delivered shall, if requested, give a receipt therefor; and when so delivered he shall mail it to its destination."

On a mere inspection of these enactments it is very obvious that the deposit of two copies of the book, after its publication, either with the librarian of congress or in the mail addressed to him, is an essential condition of the proprietor's right, and must, in some way, be proved in an action for infringement. The words of the law are: "No person shall be entitled to a copyright unless he shall also within ten days, etc., deliver at the office of the librarian of congress, or deposit in the mail, etc., two copies of such copyright book." Nothing can be plainer than this.

Then what is competent proof of such a deposit? If, after complying with all the requisite conditions, the law had authorized letters patent for the copyright to be issued to the proprietor, such letters would be competent, if not conclusive, evidence that the conditions had been complied with. But no such letters are issued in the case of copyrights. It is contended, indeed, that the librarian's certificate answers the same purpose. But it is plain that this certificate was only an exemplification of the record required to be made on the filing of the title before publication. Its form, as prescribed by the law, and its contents as shown by the copy produced in evidence, show that it relates to nothing else. The publication of the book, and the deposit of copies thereof, may not take place until the lapse of months afterward. The certificate, therefore, has no relation to the deposit of the books. The record of which it is an exemplification is made without reference to any such deposit.

§ 190. *Quære: Whether the certificate of the librarian of congress that two copies of the book had been deposited would be proof of the fact.*

Whether, after the deposit has been made, the certificate of the librarian, under his official seal, that the books were deposited on such a day, would be competent evidence of the fact, is not now the question; and it may admit of considerable doubt. Perhaps a certificate of the librarian attached to a copy of the book, certifying that two copies of the same book, or of which that is a true copy, were deposited in his office on such a day, would be competent evidence, inasmuch as the librarian's office is a public one; the copyright books deposited with him are quasi-records, kept in his custody for public examination,—one object no doubt being to enable other authors to inspect them in order to ascertain precisely what was the subject of copyright. But we express no opinion whether such a certificate would be competent or not. In the present case no such certified copy of the books deposited, nor a certificate of the fact that they were deposited, was adduced in evidence.

§ 191. *An unsigned memorandum under a certificate is no part of the certificate and not evidence of the fact stated.*

The memorandum under the certificate had no validity as evidence. It might have been put there by any person. It would be unsafe to hold that a memorandum under a certificate, or indorsed upon it, is part of the certificate. A certificate under seal, when invested with legal force and effect, is a solemn instrument, and ought to be complete, certain, and final in itself, without any collateral addition or commentary. Its very form and character as a certificate presuppose that it has the verification and protection of the authenticating signature and seal. Any matter extraneous, that is, not contained in the body of the instrument, has not this verification and protection. Such extraneous matter may be added by other persons, or may be erased or altered, without

involving the offense of forgery or alteration of the certificate. Memoranda of various kinds are frequently indorsed on instruments of this sort for the convenience of the possessors, either to indicate their contents, or to furnish other information with regard to their subject-matter. To hold that such memoranda are evidence, except as against the party making them, would be wholly inadmissible.

We are satisfied that the evidence offered and objected to was incompetent for any purpose in the cause. The judgment must be reversed, and the cause remanded to the circuit court with directions to award a new trial; and it is so ordered.

§ 192. **Strict compliance required.**—Under the acts of congress of May 31, 1790, and of April 29, 1802, relating to copyrights, there must be a strict compliance with the requirements of the law relating to the publication of the record of the entry, and the deposit of a copy in the department of state, in order to entitle a copyright to judicial protection. *Wheaton v. Peters*, 8 Pet., 591 (§§ 12-16).

§ 193. In order to entitle a publication to the protection of the copyright laws it must not only appear that the printed title-page was deposited with the clerk of court, but that it was deposited before publication, and in addition it must not only appear that the copies required by law were deposited as required, but deposited within the time limited after publication. *Chase v. Sanborn*,* 4 Cliff., 306; 6 O. G., 932.

§ 194. In order to entitle a person to maintain an action for an infringement of a copyright he must show a full compliance on his part with the requirements of the act of congress relating to copyrights. In this case a demurrer to the bill was sustained because it did not allege the delivery of copies to the librarian of congress. *Parkinson v. Laselle*,* 3 Saw., 330.

§ 195. The first and third sections of the act of congress of May 31, 1790, and the act of April 29, 1802, relating to copyrights, are mandatory and not directory, and the publication of the record of the entry is essential to acquiring a copyright. *Ewer v. Coxe*,* 4 Wash., 487.

§ 196. **Deposit of title.**—In order to entitle a person to a copyright of a book under the copyright act of 1831, the title must be deposited with the clerk of the proper court before publication, and a copy of the printed work within three months after publication. *Struve v. Schwedler*,* 4 Blatch., 23.

§ 197. Under the copyright law of 1831 the record of the clerk made in the form prescribed by the act is *prima facie* evidence that the title deposited was such as the statute requires. *Roberts v. Myers*,* 23 Law Rep., 296; 13 Law Rep. (N. S.), 396.

§ 198. When it appears that the title-page of a book was deposited in the clerk's office on the same day that the printed volume was deposited, it will be presumed, in the absence of evidence to the contrary, that the deposit of the title-page preceded that of the printed volume. *Myers v. Callaghan*,* 10 Biss., 139; 5 Fed. R., 726.

§ 199. The title of a book was deposited in the office of the librarian of congress as follows: "Over One Thousand Receipts. The Lake-Side Cook-Book. A Complete Manual of Practical, Economical, Palatable and Healthful Cookery. Chicago: Donnelley, Lloyd & Co." The title-page of the book as printed was, "The Lake-Side Cook-Book, No. 1. A Complete Manual of Practical, Economical and Palatable and Healthful Cookery. By N. A. D."—with the place of publication, name of publishers and notice of copyright. *Held*, that the variance between the title deposited and the title-page was immaterial; that the name of the book was substantially the same in each, and that there had been such a substantial compliance with the requirements of the copyright act as entitled the publishers to the copyright. *Donnelley v. Ivers*,* 20 Blatch., 381; 18 Fed. R., 592; 13 Rep., 389.

§ 200. The printed copy of the title of a publication sought to be copyrighted, which is required by section 4956, Revised Statutes of the United States, may be printed with a pen with or without the aid of tracing paper. The result and not the means is what the law provides for. *Chapman v. Ferry*,* 9 Saw., 395; 18 Fed. R., 539.

§ 201. **Deposit of printed copies.**—In order to entitle an author to a copyright, he must publish the work within a reasonable time after filing the title, and within the time limited after publication deposit two copies of the work with the librarian of congress. And if it simply appears that the title has been deposited, and does not appear that a deposit of printed copies has been made as required by law, an action for an infringement cannot be sustained. *Boucicault v. Hart*, 13 Blatch., 47; 4 Am. L. Rec., 726; 8 Ch. Leg. N., 257 (§§ 22-29).

§ 202. In order to recover the penalty prescribed by section 4966, Revised Statutes of the United States, for the unauthorized performance of a dramatic composition, it must appear that the composition is copyrighted. *Ibid.*

§ 203. The act of congress requiring copies of every work sought to be copyrighted to be deposited in the mail for the librarian of congress within ten days after publication is complied with by making such deposit after the work is printed and before it is offered for sale. *Chapman v. Ferry*,* 9 Saw., 395.

§ 204. The provision of the tenth section of the act of congress of August 10, 1846, establishing the Smithsonian Institution, that every author of a copyrighted work should within three months after publication deliver a copy to the Smithsonian library, is directory merely, and a copyright otherwise valid is not void for want of such deposit. *Jollie v. Jaques*,* 1 Blatch., 618; 9 N. Y. Leg. Obs., 10.

§ 205. A copy of a work sought to be copyrighted may be deposited with the secretary of state under the fourth section of the act of May 31, 1790, after six months after publication, where it has been published by no one else, and such deposit will avail from the time it is made. *Copyrights*,* 1 Op. Att'y Gen., 532.

§ 206. The delivery of the first volume of a copyrighted work to the secretary of state within six months after publication, and the rest of the volumes before an infringement, is such a compliance with the copyright law as will enable the owner of the copyright to recover for the infringement. *Dwight v. Appleton*,* 1 N. Y. Leg. Obs., 195.

§ 207. Notice.—The various provisions of the law in relation to copyright should have a liberal construction in order to give effect to what may be considered the inherent right of an author to his own work. So where a person has in good faith attempted to comply with the copyright act of 1831, the fact that the notice of copyright stated that the book was entered in 1866, when in fact it was entered in 1867, was held not to vitiate the copyright. *Myers v. Callaghan*,* 10 Biss., 139; 5 Fed. R., 726.

§ 208. The author and proprietor of a map who has neglected to impress the notice of copyright upon the face of his map, as required by the acts of congress relating to copyrights, has no right to any benefit under such acts. *King v. Force*,* 2 Cr. C. C., 208.

§ 209. Under the copyright laws of the United States a copyright title is not perfected until there is a strict compliance with the provisions of the statutes; and the publication of the notice of the entry of the title-page in a wrong year by a mistake is fatal. *Baker v. Taylor*,* 2 Blatch., 82.

§ 210. In 1871 the rules of practice in the courts of New York were published with annotations and copyrighted. In 1874 new rules were adopted, which were annotated, published and copyrighted by the same publishers. *Held*, that the edition of 1874 was a new work, and not a new edition of the work of 1871, and that it was necessary that a notice of the copyright of the edition of 1871 should be inserted therein. *Banks v. McDivitt*,* 13 Blatch., 163.

§ 211. Where a work is published in several volumes appearing successively, it is sufficient to insert the notice of copyright in the proper place in the first volume. *Dwight v. Appleton*,* 1 N. Y. Leg. Obs., 195.

§ 212. It is a sufficient compliance with the act of congress requiring the name of the party procuring a copyright to be inscribed on the copyrighted article, to indicate the given name by its initial. *Sarony v. Burrow-Giles Lithographic Co.*,* 17 Fed. R., 591.

§ 213. The requirement of the copyright act of June 18, 1874, as to inscribing notice of copyright on all copyrighted articles, is complied with by inscribing thereon the word "copyright," with the date and the name of the person; and such name may properly consist of the surname and the initial of the given name. *Lithographic Co. v. Sarony*,* 111 U. S., 53.

§ 214. The notice of the copyright of an engraving required by act of congress may be presented on the picture itself, or within the margin that would not be covered when the picture was properly framed. *Rossiter v. Hall*, 5 Blatch., 362 (§§ 146, 147).

§ 215. The original notice of the entry of a copyrighted book need not be reprinted in copies of subsequently copyrighted editions of the same book within the term of the original copyright. It is sufficient if the time of the original is stated. *Lawrence v. Dana*, 4 Cliff., 1 (§§ 257-69).

IV. ASSIGNMENT.

§ 216. In general.—Upon the testimony it was decided that transactions between the parties did not amount to an assignment of a copyright. *Hubbard v. Thompson*,* 25 Fed. R., 188.

§ 217. Right to renewal.—An assignment of a copyright, during the first fourteen years, confers on the assignee no right to the renewed copyright; and this notwithstanding a usage among book sellers to the contrary, provided such usage was not known to the owner of the copyright. *Pierpont v. Fowle*,* 2 Woodb. & M., 22.

§ 218. Assignment not in writing.—A person who acquires from the holder of a copyright of an annotated work the right to republish the work with knowledge of the equitable title of

the annotator to his notes is liable to the annotator for an infringement if his notes are republished, though there is no written assignment. *Lawrence v. Dana*, 4 Cliff., 1 (§§ 257-69).

§ 219. **Estoppel.**—The testimony of the author of a copyrighted work in an action brought by his assignees against a third party for an infringement, and in which the question of ownership of the copyright was in issue, that he had parted with his whole interest, will estop his legal representatives from claiming that he only parted with the right to the copyright for the first term of fourteen years, especially where such testimony was given after the expiration of such term as to a portion of the work. *Cowen v. Banks*,* 24 How. Pr., 72.

§ 220. **Assignment not recorded.**—In a suit for an infringement of a copyright brought by assignees of the original owner against persons not claiming under the complainant's assignor, it is immaterial that the assignment to the complainant was not recorded. *Webb v. Powers*, 2 Woodb. & M., 497; 10 Law Rep., 152 (§§ 497-524).

V. INFRINGEMENT.

SUMMARY—*Abridgment*, §§ 221, 233, 234.—*Not necessary that the whole or a larger part of a work be taken*, §§ 222, 224, 226.—*Copying*, §§ 223, 226.—*Test of infringement*, §§ 223, 224, 227.—*Internal evidence of copying*, §§ 226, 229.—*Extraneous evidence*, § 227.—*Use of a part enjoined*, § 228.—*Intent not material*, § 230.—*Privileges of a subsequent writer*, § 231.—*Burden of proof*, § 232.—*As to dictionaries and other similar works*, §§ 235, 237.—*Compilations*, §§ 236-238.—*Maps*, § 238.—*Dramatic compositions*, §§ 239-241.

§ 221. The mere copying of a portion of the materials of a copyrighted work, without any essential condensation of the same, cannot bring the later work within the legal description of an abridgment. *Greene v. Bishop*, §§ 242-248.

§ 222. It is not necessary that the whole or even a larger portion of a work should be taken in order to constitute an invasion of a copyright. It is sufficient that so much is taken that the value of the original is sensibly and materially diminished, or the labors of the original author are substantially, to an injurious extent, appropriated by another. *Ibid.*

§ 223. In questions of the infringement of a copyright, the main inquiry is whether the author of the work alleged to be a piracy has resorted to the original sources alike open to him and to all other writers, or whether he has adopted and used the plan and materials of the work which it is alleged he has infringed without resorting to the sources from which he had a right to borrow. Copying is not confined to literal repetition, but includes also the various modes in which the matter of any publication may be adopted, imitated or transferred, with more or less colorable alterations to disguise the piracy. *Ibid.*

§ 224. The true test of whether there is an infringement of a copyrighted work is to ascertain whether there is a servile or evasive imitation of the former author's work, or whether there is a *bona fide* original compilation made up from common sources or common materials, with resemblances which are purely accidental, or result from the nature of the subject. *Daly v. Palmer*, §§ 298-302.

§ 225. It is not necessary, in order to constitute an invasion of a copyright, that the whole of the work should be copied, or even a large portion thereof, in form and substance. If so much is taken that the value of the original is sensibly diminished, or the labors of the original author are substantially, to an injurious extent, appropriated by another, that is sufficient in point of law to constitute an infringement *pro tanto*. *Folsom v. Marsh*, §§ 249-256.

§ 226. Copying is essential to constitute an infringement of a copyright, but identity of contents, arrangement and combination is strong evidence that the second book was borrowed from the first. Copying is not confined to literal repetition, but includes also the various modes in which the matter of any publication may be adopted, imitated or transferred, with more or less colorable alterations to disguise the source from which the material was derived. Nor is it necessary that the whole or even a larger part of a work should be taken to constitute an infringement. *Lawrence v. Dana*, §§ 257-269.

§ 227. To constitute a violation of a copyright, the copyrighted work must be copied or the differences between it and the infringing work be merely colorable; and where the differences are not apparent on inspection, extraneous testimony is admissible. *Emerson v. Davies*, §§ 270-279.

§ 228. A person will be enjoined from using an important and valuable part of a copyrighted book, though the whole is not copied, if such copying is to the injury of the owner of the copyright. *Ibid.*

§ 229. In cases of an alleged infringement of a copyright, the fact that the respondent's book contains the same errors and peculiarities as the complainant's, in corresponding similar portions, is strong proof of copying. *Lawrence v. Dana*, §§ 257-269.

§ 230. Evidence of innocent intention is immaterial when it appears that there has been an infringement of a copyright. *Ibid.*

§ 231. The privilege of a copyrighted work accorded by law to a subsequent writer is such, and such only, as will not cause substantial injury to the proprietor of the original work. *Ibid.*

§ 232. The burden of proving an infringement of a copyright is upon the party making the charge. *Ibid.*

§ 233. A *bona fide* abridgment or digest of a published literary work is no infringement of the original; but a mere selection or different arrangement of parts of the original work in a smaller compass is not such an abridgment. *Ibid.*

§ 234. An abridgment is not an infringement of the copyright of the larger work if the true design is to abridge and cheapen the price, and that is done by mental labor faithfully performed, though it is otherwise if the abridgment is colorable merely. *Webb v. Powers*, §§ 280-287.

§ 235. In determining the question of infringement of copyright in the case of dictionaries and similar works, some similarities and some use of prior works, even to the copying of small parts, are tolerated, if the main design and execution are in reality novel, and not a mere cover for important piracies from others. *Ibid.*

§ 236. While, in the cases of compilations, a prior compiler is not permitted to monopolize what was not original in himself, and what must be nearly identical in all such works on a like subject, yet he who uses it subsequently to another must not employ so much of the prior arrangement and materials as to show that the last work is a substantial invasion of the other, and is not characterized by enough new matter to indicate new toil and talent. *Ibid.*

§ 237. In cases of an alleged violation of a compiled work of a lexicographical character, the material inquiry is, whether the book of the defendants, taken as a whole, is substantially a copy of the plaintiff's; whether it has virtually the same plan and character throughout, and is intended to supersede the other in the market with the same class of readers and purchasers, by introducing no considerable new matter, or little or nothing new, except colorable deviations. *Ibid.*

§ 238. The compiler of a map is entitled, without exposing himself to a charge of piracy, to make use of preceding maps, where he bestows such mental labor upon what he has taken, and subjects it to such revision and correction as to produce an original result, provided that he does not deny the use made of such preceding works, and the alterations are not merely colorable. So the copying to any considerable extent of the boundaries of a series of towns, without change except as to scale, is an invasion of the copyright of the map copied. *Farmer v. Calvert Lithographing, etc., Co.*, §§ 288-297.

§ 239. A dramatic composition is a written or literary work in which the narrative is not related, but is represented by dialogue and action by persons who represent it as real by countenance, voice or gesture. A written work consisting wholly of directions set in order for conveying the ideas of the author on a stage or public place by means of characters who represent the narrative wholly by action, is as much a dramatic composition as if dialogue was used to convey the same ideas. *Daly v. Palmer*, §§ 298-302.

§ 240. A dramatic author whose composition is copyrighted is protected against the infringement of a single scene in his composition. *Ibid.*

§ 241. The sale of an infringing dramatic composition renders the seller liable for a representation thereof by the vendee, and such sale will be enjoined. *Ibid.*

[NOTES.—See §§ 303-332.]

GREENE v. BISHOP.

(Circuit Court for Massachusetts: 1 Clifford, 186-203. 1858.)

STATEMENT OF FACTS.—This bill was filed to enjoin the sale of a book entitled "Covell's Digest of English Grammar," on the ground that it infringed the copyrights of plaintiff's books, entitled "Greene's Analysis," and "Greene's First Lessons in Grammar." The matter was referred to a master, the material part of whose finding, for an understanding of the points decided, was as follows:

"2d. That the plan of the defendant's book, taken as a whole, is not similar to the plan of either of the plaintiff's books, but that, in that part of the defendant's book which treats of analysis, and which is contained between sections 138 and 181 inclusive, the system on which the materials are arranged,

the logical order in which the subject is displayed, and the mode by which it is set forth, and illustrated by copious models and examples, are similar to those of the plaintiff's entire book entitled 'Greene's Analysis.'"

Opinion by CLIFFORD, J.

[After considering and overruling certain exceptions to the master's report, the court proceeded with the merits as follows:]

At this stage of the case the complainant moves for an injunction, and that the respondent may be ordered to render an account in pursuance of the prayer in the bill of complaint. That motion must be considered and determined on the basis that the report of the master is correct, and wholly irrespective of any matters alleged in the exceptions. Any argument founded upon such matters cannot now avail, as the exceptions have been overruled, and the report of the master confirmed. For the purposes of any further examination of the case, and especially in determining the question under consideration, it must be assumed that the facts are as they have been found to be in the report of the master. Matters not included in the findings, and not embraced in the order of reference, if any, will depend upon the evidence, and must be heard and determined by the court, as in other cases, upon final hearing. All the matters found by the master, and embraced in the order of reference, must now be taken to be true. These findings show in effect that the system on which the materials are arranged in that part of the respondent's book which treats of analysis, as well as in the logical order in which the subject is displayed, and the mode by which it is set forth and illustrated, are similar to those of the entire book of the complainant, entitled "Greene's Analysis;" that the parts and matters of the respondent's book specified in the schedule are similar to the parts and matters in the complainant's book, which are also specified in the opposite schedule; and that the parts and matters thus specified in the logical connection in which they stand, and in which they are used by the respondent, form an original part of an original system of grammar set forth in the complainant's book; and they also show that the use of those parts and matters by the defendant tends to prejudice the sale of so many copies of the same as there are sold copies of the respondent's book. On that state of the case the counsel for the respondent contend:

1. That the system of analysis and classification of sentences set forth in the complainant's book is not original with the complainant.

2. That the respondent, or those he represents, did not copy from the complainant's book what in judgment of law was exclusively secured to the complainant.

3. That the use made by Covell of the analysis of the complainant, if any, was in the fair exercise of his powers as an author engaged in good faith in composing an original work, and fairly availing himself of ideas and terms found in other scientific treatises upon the same subject; and that he did not servilely copy from the complainant's work so much thereof in quantity and value as amounts to an infringement of his copyright.

4. That the complainant is not entitled to an injunction or to an account, under the circumstances of this case.

§ 242. *One claiming protection of the copyright law must show that he is the author of the work, or that he derives title from the author.*

Some additional observations upon the objection embraced in the first proposition may be useful and necessary, notwithstanding it is identical in principle with the third exception, which has already been considered and overruled.

By the first section of the act of the 3d of February, 1831, it is provided that the author of any book "shall have the sole right and liberty of printing, reprinting, publishing and vending such book;" but it is undoubtedly true, as contended by the counsel for the respondent, that when a party comes into a court of law or equity, seeking protection to a copyright, he must show that he is the author of the work, or that his title is derived from one sustaining that relation to the publication. Curtis on C., ch. 5, p. 169. An author, as was remarked by Grier, J., in *Stowe v. Thomas*, 2 Wall. Jr., 564, may be said to be the inventor or creator of the ideas contained in his book, and the combination of words to express them. But when he has published his book, and given his thoughts to the world, he can no longer have their exclusive possession, for the reason that such an appropriation then becomes impossible, and inconsistent with the object of the publication; and he accordingly held to the effect that, when an author has published and sold his book, he ceases to have any exclusive claim to the ideas, sentiments or thoughts therein expressed, considered merely as abstractions, and dissevered from the language, idiom, style or the outward semblance or exhibition of them to the eyes of another; and that the only property which he reserves to himself, and which the law gives him under such circumstances, is the exclusive right to multiply the copies of that particular combination of characters which exhibits to others the ideas intended to be conveyed.

§ 243. *The author of a compilation of old materials is entitled to a copyright.*

Assuming the doctrine there laid down to be correct, of which, as a general proposition, or as one applicable to that case, there can be no doubt, it by no means follows, as seems to be supposed, that an author who has compiled and written a new work upon a new and original plan, arrangement and combination of materials, not servilely copied or evasively imitated from another, is not entitled to a copyright for the work, even though all the materials employed by him were old. Elementary writers and jurists concur that the law does not require that the subject of a book should be new, or the materials original, in order to entitle the author to a copyright; and all appear to admit that there may be a valid copyright in the plan of a book, as connected with the arrangement and combination of the materials, and the mode of displaying and illustrating the subject, although all the materials employed and the subject of the work may be common to all other writers. Reference to two or three decided cases upon the point will be sufficient at the present time, although there are several others which assert the same doctrine; and it will be observed that one of the examples put by Mr. Curtis, in his valuable work on copyright, to illustrate the doctrine, is that of a scientific treatise written and published for the purposes of instruction. Speaking of the question under consideration, he says, in effect, that the author of a book who takes existing materials from sources common to all writers, and arranges and combines them in a new form, and gives them an application unknown before, is protected in the exclusive enjoyment of what he has thus collected and produced, for the reason that he has exercised selection, arrangement and combination, and thereby has produced something that is new and valuable. Curtis on C., pp. 179, 180; *Gray v. Russell*, 1 Story, 17 (§§ 129-33, *supra*); *Emerson v. Davies*, 3 Story, 768 (§§ 270-79, *infra*); *Lewis v. Fullerton*, 2 Beav., 6; *Story v. Holcombe*, 4 McL., 309. Judge Story held, in *Emerson v. Davies*, that every author of a book has a copyright in the plan, arrangement and combination

of his materials, and in his mode of illustrating his subject, if it be new and original in its substance; and remarked that if no book could be the subject of copyright which was not new and original in the elements of which it is composed, then there could be no ground for any copyright in modern times. All the well considered cases upon the subject show that the state of facts found by the master is sufficient to entitle the books of the complainant to protection under his respective copyrights; and, as before remarked, the evidence in the case fully warrants the findings of the master.

§ 244. *Copying, what constitutes.*

Little more need be remarked respecting the second proposition than to refer to the findings of the master, and what has already been said in determining the one which precedes it, and which involves the same general considerations. Copying is not confined to literal repetition, but includes also the various modes in which the matter of any publication may be adopted, imitated or transferred, with more or less colorable alterations to disguise the piracy. In all such cases, says Mr. Curtis (Curtis on C., 253), the main question is whether the author of the work alleged to be a piracy has resorted to the original sources alike open to him and to all writers, or whether he has adopted and used the plan of the work which it is alleged he has infringed, without resorting to the other sources from which he had a right to borrow. Within these principles both the report of the master and the evidence on which it is founded show that the respondent has copied what, in judgment of law, was exclusively secured to the complainant, under and by virtue of his respective copyrights.

§ 245. *To what extent one author may copy from another. Right of quotation. Abridgment.*

Great difficulties oftentimes surround the inquiry whether an alleged act of copying from an original author amounts to piracy, or whether it may or may not be justified on the ground of fair quotation, or that the use made of the book or its contents does not exceed what the law permits to another engaged in composing a new work upon the same subject. None of those difficulties, however, arise in the present case, as all the authorities agree that it is not necessary that the whole, or even the larger portion, of a work should be taken in order to constitute an invasion of a copyright; and they affirm the doctrine that if so much is taken that the value of the original is sensibly and materially diminished, or the labors of the original author are substantially, to an injurious extent, appropriated by another, that such taking or appropriation is sufficient in point of law to maintain the suit. *Folsom v. Marsh*, 2 Story, 100 (§§ 249-56, *infra*); *Wilkins v. Aiken*, 17 Ves., 424; *Mawman v. Tegg*, 2 Russ., 385; *Roworth v. Wilkes*, 1 Camp., 94; *Saunders v. Smith*, 3 My. & Cr., 711; *Lewis v. Chapman*, 13 Beav., 8; *Webb v. Powers*, 2 Wood. & M., 514 (§§ 280-87, *infra*).

Whatever doubts may have been formerly entertained, says McLean, J., in *Story v. Holcombe*, 4 McL., 315, it is now clear that a book may in one part of it infringe the copyright of another book, and in other parts be no infringement; and, in such a case, the remedy will not be extended beyond the injury; and the same learned judge held that extracts made for the purpose of a review, or for a compilation, are governed by the same rule; but that they cannot be so extended in either case as to convey the same knowledge as the original work, nor can the privilege be so exercised as to supersede the original book. *Bramwell v. Halcomb*, 3 My. & Cr., 738. Apply these principles

to the facts stated in the last finding of the master, and it is clear that this proposition cannot be sustained. Whether a fair and *bona fide* abridgment of an original work is, or is not, an invasion of the copyright of the original author, is not a question at the present time, nor is it necessary on the facts of this case to determine, or even consider, what constitutes such an abridgment in the sense of the law. It is clear that the mere copying a portion of the materials, without any essential condensation of the same, cannot be held to bring the work within the legal description of such a publication; and it will not change the rule of law if the new publication also contains the system on which the materials are arranged, the logical order in which the subject is displayed, and the mode by which it is set forth and illustrated in the prior work. One other suggestion of the counsel for the respondent deserves to be considered before leaving this branch of the case. They also contend, in effect, that the respondent is an original author, without having copied or had access to the complainant's books. On this point it will be sufficient to remark, that the weight of the evidence is greatly otherwise, as appears from the testimony of the witnesses, as well as from the inspection of the book and the colorable alterations made in the second edition.

§ 246. *Delay in prosecuting for infringement of copyright.*

Two grounds are assumed in support of the fourth proposition, which will now be briefly considered. First, that the complainant is not entitled to relief on account of the delay in instituting the suit, and because it is prosecuted against the vendor of the book, and not against the author or publishers. Second, because it is brought merely for a technical violation of the legal right, and because the facts show that the complainant has suffered injury only to a nominal amount. A few remarks respecting each of these suggestions will be sufficient at the present time. Both the bill and the answer disclose the fact that the first edition of the respondent's book was published in 1852, in another state; and the second, in 1853, by the same publishers, while the complainant was residing in this district, and this bill was filed during the following year. At what time the complainant became possessed of the knowledge of these publications does not appear; and there is no evidence tending to show that he ever in any manner acquiesced in the claim of the respondent, or recognized the validity of his acts, except what may be inferred from the omission to prosecute. No other laches appears on the face of the bill, and no such defense is set up in the answer. Attention is drawn to two cases, decided in this court, to show that it is incumbent upon the complainant to set forth in the bill the circumstances, if any, which explain the delay to institute the suit. One is the case of *Stearns v. Page*, 1 Story, 204, in which the bill prayed for an account of an intestate's estate after a lapse of more than twenty years; and the other is the case of *Fisher v. Boody*, 1 Curt., 218 (EQUITY, §§ 765-71), which prayed to set aside a conveyance of land, after an acquiescence in the validity of the sale for a period of nine years. Without entering into any further examination of the numerous authorities bearing upon the question, or attempting at this time to lay down any general rule upon the subject, it will be sufficient to say that the cases cited are not applicable to the facts of this case, and that the point cannot avail the respondent as a defense to this suit. *Wagner v. Baird*, 7 How., 234; *De Lane v. Moore*, 14 How., 268 (DOM. REL., §§ 352-55).

§ 247. *Vendor of infringing book liable.*

Vendors are liable for the sale of a book which invades the copyright of

another, on the same principle, and for the same reasons, that the vendor of a machine or other mechanical structure, in the case of patent-rights, is held liable for selling the manufactured article without the license or consent of the patentee; and no reason is perceived for withholding from the complainant the common remedies for the injuries he has suffered by the acts of the respondent, merely because he has elected to seek redress in this district instead of going into another circuit to pursue it against the publishers.

§ 248. *Relief in equity refused where injury is slight.*

Decided cases have been cited by the counsel for the respondent, which show that, when the invasion of a copyright is slight, and the copying consists of indefinite or small parts, so scattered through the work that it is difficult or nearly impossible to estimate either the amount of the injury to the complainant or the profit to the respondent, relief in equity has sometimes been refused, and the party turned over to his remedy at law. Those decisions were doubtless correct as applied to the facts and circumstances under which they were made; but it is clear, both from the finding of the master and all the evidence on which it is based, that no such difficulty can arise in this case; and consequently I hold that the complainant is entitled to an injunction, to be limited according to the second finding of the master, and also to an account.

FOLSOM v. MARSH.

(Circuit Court for Massachusetts: 2 Story, 100-119. 1841.)

§ 249. *Infringement of copyright. Copying. Privileges of a reviewer. Abridgments.*

Opinion by STORY, J.

This is one of those intricate and embarrassing questions arising in the administration of civil justice in which it is not, from the peculiar nature and character of the controversy, easy to arrive at any satisfactory conclusion, or to lay down any general principles applicable to all cases. Patents and copyrights approach nearer than any other class of cases, belonging to forensic discussions, to what may be called the metaphysics of the law, where the distinctions are, or at least may be, very subtle and refined, and sometimes almost evanescent. In many cases, indeed, what constitutes an infringement of a patented invention is sufficiently clear and obvious, and stands upon broad and general agreements and differences; but, in other cases, the lines approach very near to each other, and sometimes become almost evanescent, or melt into each other. So, in cases of copyright, it is often exceedingly obvious that the whole substance of one work has been copied from another, with slight omissions and formal differences only, which can be treated in no other way than as studied evasions; whereas, in other cases, the identity of the two works in substance, and the question of piracy, often depend upon a nice balance of the comparative use made in one of the materials of the other; the nature, extent and value of the materials thus used; the objects of each work; and the degree to which each writer may be fairly presumed to have resorted to the same common sources of information, or to have exercised the same common diligence in the selection and arrangement of the materials. Thus, for example, no one can doubt that a reviewer may fairly cite largely from the original work, if his design be really and truly to use the passages for the purposes of fair and reasonable criticism. On the other hand, it is as clear that, if he thus cites the most important parts of the work with a view not to criticise, but to supersede the use

of the original work and substitute the review for it, such a use will be deemed in law a piracy. A wide interval might, of course, exist between these two extremes, calling for great caution and involving great difficulty, where the court is approaching the dividing middle line which separates the one from the other. So, it has been decided that a fair and *bona fide* abridgment of an original work is not a piracy of the copyright of the author. See *Dodsley v. Kinnersley*, Ambler, 403; *Whittingham v. Wooler*, 2 Swanst., 428, 430, 431, note; *Tonson v. Walker*, 3 Swanst., 672 to 679; *id.*, 681. But, then, what constitutes a fair and *bona fide* abridgment, in the sense of the law, is one of the most difficult points, under particular circumstances, which can well arise for judicial discussion. It is clear that a mere selection, or different arrangement of parts of the original work, so as to bring the work into a smaller compass, will not be held to be such an abridgment. There must be real, substantial condensation of the materials, and intellectual labor and judgment bestowed thereon; and not merely the facile use of the scissors; or extracts of the essential parts, constituting the chief value of the original work. See *Tyler v. Wilcox*, 2 Atk., 141.

STATEMENT OF FACTS.—In the present case, the work alleged to be pirated is the Writings of President Washington, in twelve volumes, royal octavo, containing nearly seven thousand pages, of which the first volume contains a Life of Washington, by the learned editor, Mr. Sparks, in respect to which no piracy is asserted or proved. The other eleven volumes consist of the Letters of Washington, private and official, and his messages and other public acts, with explanatory notes and occasional illustrations by the editor. That the original work is of very great, and, I may almost say, of inestimable value, as the repository of the thoughts and opinions of that great man, no one pretends to doubt. The work of the defendants is in two volumes, duodecimo, containing eight hundred and sixty-six pages. It consists of a Life of Washington, written by the learned defendant (the Rev. Charles W. Upham), which is formed upon a plan different from that of Mr. Sparks, and in which Washington is made mainly to tell the story of his own life, by inserting therein his letters and his messages, and other written documents, with such connecting lines in the narrative as may illustrate and explain the times and circumstances, and occasions of writing them. Now, as I have already said, there is no complaint that Mr. Upham has taken his narrative part, substantially, from the Life by Mr. Sparks. The *gravamen* is, that he has used the Letters of Washington, and inserted, *verbatim*, copies thereof from the collection of Mr. Sparks. The master finds, by his report, that the whole number of pages in Mr. Upham's work, corresponding and identical with the passages in Mr. Sparks' work, are three hundred and fifty-three pages out of eight hundred and sixty-six, a fraction more than one-third of the two volumes of the defendants. Of these three hundred and fifty-three pages, the report finds that three hundred and nineteen pages consist of Letters of Washington, which have been taken from Mr. Sparks' work, and have never been published before; namely, sixty-four pages are official letters and documents, and two hundred and fifty-five pages are private letters of Washington. The question, therefore, upon this admitted state of the facts, resolves itself into the point whether such a use, in the defendants' work, of the letters of Washington, constitutes a piracy of the work of Mr. Sparks.

It is objected, in the first place, on behalf of the defendants, that the letters of Washington are not, in the sense of the law, proper subjects of copyright,

for several reasons; (1) because they are the manuscripts of a deceased person, not injured by the publication thereof; (2) because they are not literary compositions, and, therefore, not susceptible of being literary property, nor esteemed of value by the author; (3) because they are, in their nature and character, either public or official letters, or private letters of business; and (4) because they were designed by the author for public use, and not for copyright or private property.

§ 250. *The writer of private letters has a property therein, and the copyright belongs to him.*

Now, in relation to the last objection, it is most manifest that President Washington deemed them his own private property, and bequeathed them to his nephew, the late Mr. Justice Washington, through whom the late Mr. Chief Justice Marshall and Mr. Sparks acquired an interest therein; and, as appears from the contract between these gentlemen, annexed to the report, the publication of these writings was undertaken by Mr. Sparks, as editor, for their joint benefit; and the work itself has been accomplished at great expense and labor, and after great intellectual efforts, and very patient and comprehensive researches, both at home and abroad. The publication of the defendants, therefore, to some extent must be injurious to the rights of property of the representatives and assignees of President Washington. Indeed, as we shall presently see, congress have actually purchased these very letters and manuscripts, at a great price, for the benefit of the nation, from their owner and possessor under the will of Mr. Justice Washington, as private and most valuable property. That President Washington, therefore, intended them exclusively for public use, as a donation to the public, or did not esteem them of value as his own private property, appears to me to be a proposition completely disproved by the evidence. Unless, indeed, there be a most unequivocal dedication of private letters and papers by the author, either to the public or to some private person, I hold that the author has a property therein and that the copyright thereof exclusively belongs to him.

§ 251. — *as to the distinction between private or business letters, and those which may be treated as literary compositions.*

Then as to the supposed distinction between letters of business, or of a mere private or domestic character, and letters which, from their character and contents, are to be treated as literary compositions, I am not prepared to admit its soundness or propriety. It is extremely difficult to say what letters are or are not literary compositions. In one sense all letters are literary, for they consist of the thoughts and language of the writer reduced to written characters, and show his style and his mode of constructing sentences and his habits of composition. Many letters of business also embrace critical remarks and expressions of opinion on various subjects, moral, religious, political and literary. What is to be done in such cases? Even in compositions confessedly literary the author may not intend, nay, often does not intend them for publication; and yet no one on that account doubts his right of property therein, as a subject of value to himself and to his posterity. If subsequently published by his representatives, would they not have a copyright therein? It is highly probable that neither Lord Chesterfield, nor Lord Orford, nor the poet Gray, nor Cowper, nor Lady Russell, nor Lady Montague ever intended their letters for publication as literary compositions, although they abound with striking remarks and elegant sketches, and sometimes with the most profound as well as affecting exhibitions of close reflection, and various knowl-

edge and experience, mixed up with matters of business, personal anecdote, and family gossip.

§ 252. *The author of letters of every description has the sole copyright therein.*

There is no small confusion in the books, in reference to the question of copyright in letters. Some of the *dicta* seem to suppose that no copyright can exist except in letters which are professedly literary; while others again recognize a much more enlarged and liberal doctrine. See Godson on Patents and Copyright, p. 327 to 332 (ed. 1840, London); *Gee v. Pritchard*, 2 Swanst., 403, 405, 426, 427; *Perceval v. Phipps*, 2 Ves. & Beam., 19, 24, 25, 28. Without attempting to reconcile or even to comment upon the language of the authorities on this head, I wish to state what I conceive to be the true doctrine upon the whole subject. In the first place, I hold that the author of any letter or letters (and his representatives), whether they are literary compositions or familiar letters or letters of business, possess the sole and exclusive copyright therein; and that no persons, neither those to whom they are addressed nor other persons, have any right or authority to publish the same upon their own account or for their own benefit.

§ 253. — *rights of persons to whom letters are addressed.*

But, consistently with this right, the persons to whom they are addressed, may have, nay, must, by implication, possess the right to publish any letter or letters addressed to them upon such occasions, as require or justify the publication or public use of them; but this right is strictly limited to such occasions. *Gee v. Pritchard*, 2 Swanst., 415, 419. Thus, a person may justifiably use and publish, in a suit at law or in equity, such letter or letters as are necessary and proper to establish his right to maintain the suit or defend the same. So, if he be aspersed or misrepresented by the writer, or accused of improper conduct in a public manner, he may publish such parts of such letter or letters, but no more, as may be necessary to vindicate his character and reputation, or free him from unjust obloquy and reproach. If he attempt to publish such letter or letters on other occasions not justifiable, a court of equity will prevent the publication by an injunction, as a breach of private confidence or contract, or of the rights of the author; and *a fortiori*, if he attempt to publish them for profit; for then it is not a mere breach of confidence or contract, but it is a violation of the exclusive copyright of the writer. In short, the person to whom letters are addressed has but a limited right or special property (if I may so call it) in such letters as a trustee or bailee, for particular purposes, either of information or of protection, or of support of his own rights and character. The general property, and the general rights incident to property, belong to the writer, whether the letters are literary compositions or familiar letters, or details of facts, or letters of business. The general property in the manuscripts remains in the writer and his representatives, as well as the general copyright. *A fortiori*, third persons standing in no privity with either party are not entitled to publish them to subserve their own private purposes of interest, or curiosity or passion. If the case of *Perceval v. Phipps*, 2 Ves. & Beam., 21, 28, before the then vice-chancellor (Sir Thomas Plumer), contains a different doctrine, all I can say is, that I do not accede to its authority; and I fall back upon the more intelligible and reasonable doctrine of Lord Hardwicke in *Pope v. Curl*, 2 Atk., 342, and Lord Apsley in the case of *Thompson v. Stanhope*, Amb., 737, and of Lord Keeper Henley in the case of *The Duke of Queensbury v. Shelburn*, 2 Eden, 329; 4 Burr., 2330, which Lord Eldon has not scrupled to hold to be binding authorities upon

the point in *Gee v. Pritchard*, 2 Swanst., 403, 414, 415, 419, 426, 427. But I do not understand that Sir Thomas Plumer did, in *Perceval v. Phipps*, deny the right of property of the writer in his own letters; and so he was understood by Lord Eldon in *Gee v. Pritchard*; who, however, said that that case admitted of much remark.

Indeed, if the doctrine were otherwise, that no person or his representatives could have a copyright in his own private or familiar letters, written to friends upon interesting political and other occasions, or containing details of facts and occurrences passing before the writer, it would operate as a great discouragement upon the collection and preservation thereof; and the materials of history would become far more scanty than they otherwise would be. What descendant or representative of the deceased author would undertake to publish, at his own risk and expense, any such papers; and what editor would be willing to employ his own learning and judgment, and researches, in illustrating such works, if, the moment they were successful, and possessed the substantial patronage of the public, a rival book-seller might republish them, either in the same or in a cheaper form, and thus either share with him or take from him the whole profits? It is the supposed exclusive copyright in such writings which now encourages their publication thereof from time to time, after the author has passed to the grave. To this we owe, not merely the publication of the writings of Washington, but of Franklin and Jay, and Jefferson and Madison, and other distinguished statesmen of our own country. It appears to me that the copyright act of 1831 (ch. 16, § 9) fully recognizes the doctrine for which I contend. It gives, by implication, to the author or legal proprietor of any manuscript whatever, the sole right to print and publish the same, and expressly authorizes the courts of equity of the United States to grant injunctions to restrain the publication thereof by any person or persons without his consent.

§ 254. — *as to official letters addressed to the government.*

In respect to official letters addressed to the government, or any of its departments, by public officers, so far as the right of the government extends, from principles of public policy, to withhold them from publication or to give them publicity, there may be a just ground of distinction. It may be doubtful whether any public officer is at liberty to publish them, at least in the same age, when secrecy may be required by the public exigencies, without the sanction of the government. On the other hand, from the nature of the public service or the character of the documents, embracing historical, military or diplomatic information, it may be the right and even the duty of the government to give them publicity, even against the will of the writers. But this is an exception in favor of the government, and stands upon principles allied to or nearly similar to the rights of private individuals to whom letters are addressed by their agents, to use them and publish them upon fit and justifiable occasions. But assuming the right of the government to publish such official letters and papers under its own sanction, and for public purposes, I am not prepared to admit that any private persons have a right to publish the same letters and papers without the sanction of the government, for their own private profit and advantage. Recently the Duke of Wellington's dispatches have (I believe) been published by an able editor, with the consent of the noble duke and under the sanction of the government. It would be a strange thing to say that a compilation involving so much expense and so much labor to the editor, in collecting and arranging the materials, might be pirated and repub-

lished by another book-seller, perhaps to the ruin of the original publisher and editor. Before my mind arrives at such a conclusion, I must have clear and positive lights to guide my judgment or to bind me in point of authority. However, it is not necessary in this case to dispose of this point, because, of the letters and documents published by the defendants, not more than one-fifth part are of an official character.

§ 255. *The letters of Washington were sold to the government subject to the existing copyright.*

Another and distinct objection urged on behalf of the defendants is that congress have purchased the manuscripts of these letters and documents and they have become public property, and may be published by any one. An answer, in part, has been already given to this objection. Congress have, indeed, authorized the purchase of these manuscripts from the owner and possessor thereof, and paid the liberal price of \$25,000 therefor; and they have thus become national property. But it is an entirely inadmissible conclusion that, therefore, every private person has a right to use them and publish them. It might be contended with as much force and correctness that every private person had an equal right to use any other national property at his pleasure, such as the arms, the ammunition, the ships, or the custom-houses belonging to the government. But a reason which is entirely conclusive upon this point is that the government purchased the manuscripts subject to the copyright already acquired by the plaintiffs in the publication thereof. The vendor took them subject to that copyright, and could convey no title which he did not himself possess, or beyond what he possessed. Nor is there any pretense to say that he either did convey or intended to convey to the government the property in these manuscripts, except subject to the copyright already acquired.

§ 256. *The copying of a part of a work may constitute an infringement.*

The next and leading objection is, that the defendants had a right to abridge and select and use the materials which they have taken for their work, which, though it embraces the number of letters above stated, is an original and new work, and that it constitutes, in no just sense, a piracy of the work of the plaintiffs. This, in truth, is the real hinge of the whole controversy, and involves the entire merits of the suit. It is certainly true that the defendants' work cannot properly be treated as an abridgment of that of the plaintiffs; neither is it strictly and wholly a mere compilation from the latter. So far as the narrative goes, it is either original, or derived (at least as far as the matter has been brought before the court) from common sources of information, open to all authors. It is not even of the nature of a collection of beauties of an author; for it does not profess to give fugitive extracts, or brilliant passages from particular letters. It is a selection of the entire contents of particular letters, from the whole collection or mass of letters of the work of the plaintiffs. From the known taste and ability of Mr. Upham, it cannot be doubted that these letters are the most instructive, useful and interesting to be found in that large collection.

The question then is, whether this is a justifiable use of the original materials, such as the law recognizes as no infringement of the copyright of the plaintiffs. It is said that the defendant has selected only such materials as suited his own limited purpose as a biographer. That is doubtless true; and he has produced an exceedingly valuable book. But that is no answer to the difficulty. It is certainly not necessary, to constitute an invasion of copy-

right, that the whole of a work should be copied, or even a large portion of it, in form or in substance. If so much is taken that the value of the original is sensibly diminished, or the labors of the original author are substantially, to an injurious extent, appropriated by another, that is sufficient, in point of law, to constitute a piracy *pro tanto*. The entirety of the copyright is the property of the author; and it is no defense that another person has appropriated a part, and not the whole, of any property. Neither does it necessarily depend upon the quantity taken, whether it is an infringement of the copyright or not. It is often affected by other considerations, the value of the materials taken, and the importance of it to the sale of the original work. Lord Cottenham, in the recent cases of *Bromhall v. Halcombe*, 3 Mylne & C., 737, 738, and *Saunders v. Smith*, 3 Mylne & C., 711, 736, 737, adverting to this point, said: "When it comes to a question of quantity, it must be very vague. One writer might take all the vital part of another's book, though it might be but a small proportion of the book in quantity. It is not only quantity, but value, that is always looked to. It is useless to refer to any particular cases as to quantity." In short, we must often, in deciding questions of this sort, look to the nature and objects of the selections made, the quantity and value of the materials used, and the degree in which the use may prejudice the sale, or diminish the profits, or supersede the objects of the original work. Many mixed ingredients enter into the discussion of such questions. In some cases, a considerable portion of the materials of the original work may be fused, if I may use such an expression, into another work, so as to be undistinguishable in the mass of the latter, which has other professed and obvious objects, and cannot fairly be treated as a piracy; or they may be inserted as a sort of distinct and mosaic work, into the general texture of the second work, and constitute the peculiar excellence thereof, and then it may be a clear piracy. If a person should, under color of publishing "Elegant Extracts" of poetry, include all the best pieces at large of a favorite poet, whose volume was secured by a copyright, it would be difficult to say why it was not an invasion of that right, since it might constitute the entire value of the volume. The case of *Mawman v. Tegg*, 2 Russ., 383, is to this purpose. There was no pretense in that case that all the articles of the encyclopædia of the plaintiffs had been copied into that of the defendants; but large portions of the materials of the plaintiffs' work had been copied. Lord Eldon, upon that occasion, held that there might be a piracy of part of a work, which would entitle the plaintiffs to a full remedy and relief in equity. In prior cases he had affirmed the like doctrine. In *Wilkins v. Aikin*, 17 Ves., 422, 424, he said: "There is no doubt that a man cannot, under the pretense of quotation, publish either the whole or a part of another's book, though he may use, what in all cases it is difficult to define, fair quotation." In *Roworth v. Wilkes*, 1 Camp., 94, Lord Ellenborough said: "A review will not, in general, serve as a substitute for the book reviewed; and even there, if so much is extracted that it communicates the same knowledge with the original work, it is an actionable violation of literary property. The intention to pirate is not necessary in an action of this sort; it is enough that the publication complained of is, in substance, a copy whereby a work vested in another is prejudiced. A compilation of this kind (an encyclopædia) may differ from a treatise published by itself; but there must be certain limits fixed to its transcripts; it must not be allowed to sweep up all modern works, or an encyclopædia would be a recipe for completely breaking down literary property." The vice-chancellor (Sir L. Shadwell), in *Sweet v. Shaw* (The

Jurist [London], vol. I, p. 212), referring to the remarks of Lord Ellenborough, cited by counsel, said: "That does not mean a substitute for the whole work. From what you state, suppose a book to contain one hundred articles, and ninety-nine were taken, still it would not be a substitute." And in this very case he granted an injunction, being of opinion that there was *prima facie*, at law, an invasion of the plaintiffs' right; not only an injury, but also a damage to the plaintiffs in copying from several volumes of reports published by the plaintiffs, although eleven only had been copied *verbatim*, but a considerable number of what were called abridged cases were, in truth, copies of the plaintiffs' volumes, with little, or trifling, alterations. It is manifest, also, from what fell from Lord Chancellor Cottenham, in *Saunders v. Smith*, 3 Mylne & Cr., 711, that he entertained no doubt (although he did not decide the point) that there might be a violation of the copyright of volumes of reports by copying *verbatim* a part only of the cases reported. Much must, in such cases, depend upon the nature of the new work, the value and extent of the copies, and the degree in which the original authors may be injured thereby. In *Lewis v. Fullarton* (The Jurist [English], vol. II, p. 127; S. C., 2 Beav., 6), Lord Langdale, in the case of a topographical dictionary, held that largely copying from the work in another book having a similar object was a violation of that copyright, although the same information might have been (but, in fact, was not) obtained from common sources, open to all persons. On that occasion he said: "None are entitled to save themselves trouble and expense by availing themselves, for their own profit, of other men's works, still entitled to the protection of copyright;" and, accordingly, in that case, he granted an injunction as to the parts pirated, although it was admitted, on all hands, that there was much which was original in the new work.

In the present case I have no doubt whatever that there is an invasion of the plaintiffs' copyright; I do not say designedly, or from bad intentions; on the contrary, I entertain no doubt that it was deemed a perfectly lawful and justifiable use of the plaintiffs' work. But if the defendants may take three hundred and nineteen letters, included in the plaintiffs' copyright, and exclusively belonging to them, there is no reason why another bookseller may not take other five hundred letters, and a third, one thousand letters, and so on, and thereby the plaintiffs' copyright be totally destroyed. Besides, every one must see that the work of the defendants is mainly founded upon these letters, constituting more than one-third of their work, and imparting to it its greatest, nay, its essential value. Without those letters in its present form the work must fall to the ground. It is not a case where abbreviated or selected passages are taken from particular letters; but the entire letters are taken, and those of most interest and value to the public, as illustrating the life, the acts and the character of Washington. It seems to me, therefore, that it is a clear invasion of the right of property of the plaintiffs, if the copying of parts of a work, not constituting a major part, can ever be a violation thereof; as upon principle and authority I have no doubt it may be. If it had been the case of a fair and *bona fide* abridgment of the work of the plaintiffs, it might have admitted of a very different consideration.

I have come to this conclusion, not without some regret, that it may interfere, in some measure, with the very meritorious labors of the defendants in their great undertaking of a series of works adapted to school libraries. But a judge is entitled in this case, as in others, only to know and to act upon his

duty. I hope, however, that some means may be found to produce an amicable settlement of this unhappy controversy.

The report of the master must stand confirmed, and a perpetual injunction be awarded, restraining the defendants, their agents, servants and salesmen, from further printing, publishing, selling or disposing of any copy or copies of the work complained of, the "Life of Washington," by the Rev. Charles W. Upham, containing any of the three hundred and nineteen letters of Washington, stated in the report of the master, and never before published; and that it be referred to a master to take an account of the profits made by the defendants in the premises, with leave for either party to apply to the court for further directions.

LAWRENCE *v.* DANA.

(Circuit Court for Massachusetts: 4 Clifford, 1-88. 1869.)

STATEMENT OF FACTS.—The complainant in this case alleged that in 1853, under an arrangement with Catharine Wheaton, widow of Henry Wheaton, deceased, he prepared for publication a new edition of Wheaton's Elements of International Law, appending such notes as to him seemed fit, and writing an appendix and an introduction, and a life of the author. It was also alleged by complainant in his bill that by virtue of the agreement only a limited interest in the copyright passed to the said Catharine, and that beyond such interest he retained all right and interest in his annotations and additions. The ground of complaint is that the owners of the original work and the publishers caused a new edition of the work to be prepared by Dana, which they had published and publicly sold.

Opinion by CLIFFORD, J.

[After devoting several pages to a consideration of the agreement between the complainant and Mrs. Wheaton, and the interest which the former had in the notes, etc., prepared by him, the court proceeded with the question of infringement.]

. . . Before proceeding to examine the question of infringement, it will be necessary to reproduce, as concisely as possible, some of the principal issues upon the subject as presented in the pleadings.

The statement of the complainant is that, prior to the last edition annotated by him, there was no book of international law in which all the authorities bearing upon the different questions discussed or referred to in the original work of the author, or in his antecedent annotations, were collected and presented in a convenient form for reference. Such authorities, as he represents, consisted of judicial decisions, diplomatic discussions by distinguished diplomatists, and dissertations, treatises and lectures of learned publicists and writers upon the law of nations; that he undertook to collect and present, and by a considerable amount of labor and intellectual exertion did collect and present, in his notes and in a convenient form, with reference to each question so discussed, the discussions and opinions as aforesaid, translating such as were in any foreign language, and giving them in full where they seemed sufficiently important to be so presented, and in other cases referring to them, giving the name of the book and the page where the passage could be found; that many of the authorities so collected, and particularly those relating to diplomatic discussions and negotiations, and those showing the way

in which cases involving principles of international law have arisen between different nations and been determined, are to be found in newspapers, gazettes, legislative debates, the series of books such as the Annual Register, and others named or referred to in the bill of complaint, not treatises on international law; that there is no book which can serve as an index or digest to assist an author in any material respect, in collecting such authorities; that the number of books and papers of that nature examined by him in searching for the authorities and matters cited by him is so great, that it is only possible to make such collection by devoting much attention to the subject for many years, and by making and preserving memoranda of such matters bearing upon the subject, as from time to time they come to the knowledge of a person giving a large share of his attention to such matters, and reading all such books as relate to the subject, and availing himself of much intercourse with persons conversant with such matters. The corresponding statement of the respondent is, that the plan of work he adopted was to take the text of the author of the book with his notes, and annotate the same with original notes of his own, in the same manner as if they had never before been annotated; that it was no part of his plan to revise, reduce or alter the complainant's notes, even in such manner as the law of copyright would have permitted if the complainant had had a copyright therein; but that his course was, after reading a topic in the text, if he thought it required annotation, to examine all the works to which he had access bearing upon the topic, and, among others, but not more or differently than others, the contributions of the complainant. When he had made all the examination he thought necessary, the allegation is that he then gave the subject the best reflection he could, and subsequently wrote out a new and original note in every instance, in manuscript throughout, in his own hand or that of an amanuensis, and without other reference to, or assistance from, any notes of the complainant than as above stated.

The complainant also alleges that in preparing the text of his edition he exercised a considerable amount of skill and judgment in the arrangement of his annotations, and in combining and connecting them with the text, and that he prepared a complete index to the same; and he charges that the respondents in their book have copied, conformed to and pirated the said annotated book and the annotations of the same which he prepared; and that they have used and availed themselves of the said book and annotations and the said labors of the complainant. Responsive to the charge that his notes are in a great part taken and copied from those of the complainant, and that he has pirated and unduly used the contributions of the complainant, the respondent totally denies the same and every part thereof. Evidence to show that the notes in the two annotated editions of Wheaton's Elements of International Law, as prepared by the complainant, involved great research and labor beyond what appears in those two works, is unnecessary, especially as the allegations in the bill of complaint to that effect are not directly denied in the answer; and it is equally obvious and clear that the results of the research and labor there exhibited could not well have been accomplished by any person other than one of great learning, reading and experience in such studies and investigations. Such a comprehensive collection of authorities, explanations and well-considered suggestions is nowhere, in the judgment of the court, to be found in our language, unless it be in the text and notes of the author of the original work. Uncontradicted as these propositions are, it is unnecessary to add anything further in their support. Much, also, has been

accomplished by the last editor of the work in the same direction, and in the collection and presentation of similar matters wholly distinct and separate from what was antecedently collected and presented by the complainant. But the review and comparison of the merits of the respective books are not matters within the province of the court, except so far as the same become necessary in order to decide the issues involved in the pleadings. Stripped of all mere form, the charge against the respondent is that he has infringed the rights of the complainant; and that question is the only one of much importance which remains to be considered.

Apart from the testimony of the parties themselves, and the comparison of the books, the evidence in the case consists mainly of the testimony of the two experts, and the result of the respective comparisons made by them of the notes and citations of authorities contained in one of the books, with those of a corresponding character contained in the other, together with the opinion of each expert witness whether the several notes and citations so examined and compared are, or are not, of the same character. Though admissible in all such cases, the opinions of experts are nevertheless in their nature secondary evidence; but the comparisons made by them in this case have very much facilitated the investigations made by the court. Considerable aid has been derived from that source, and from the testimony of the parties; but the court has found it necessary to re-examine the comparisons made by the witnesses, and to make others for themselves, in order to come to a satisfactory conclusion. Regarded as a basis to enable the court to compare one book with the other, the results given by the experts, as exhibited in their depositions, have proved to be of great service to the court in estimating the weight to be given to their respective opinions. Complicated as the facts are, the examination of the case has imposed much labor upon the judges; but the investigation has been made with care, and continued from time to time until both are satisfied that the court is prepared to render a just decision.

Like other controversies of a similar character, the issue upon the merits presents two questions, one of fact and the other of law. Stated in brief terms, the question of fact is, what use did the respondent who edited the edition in question make of the complainant's notes? And the question of law presented, inasmuch as it is conceded that he used the same to some extent, is, was that use allowable, or was it of a character and to such an extent that it infringed the complainant's rights?

§ 257. *The burden of proving infringement is on the party alleging it.*

Direct evidence upon the subject is unattainable, because the respondent states that he cannot remember nor undertake to give the authors from whom he derived any particular class of citations. Difficult though it be to make proof, still the complainant is not entitled to any decree unless he proves infringement, as alleged, to the satisfaction of the court, as the burden in that issue is always upon the party making the charge. Except that the burden is upon the complainant, the same difficulty is experienced by the respondents in their efforts to prove the affirmative allegations of the answer, and consequently both parties are obliged to rely chiefly upon a comparison of the contents of the respective books, as the best evidence which either party is able to produce. Examination of the notes contained in the respective books will show that the description given of them by one of the respondents' witnesses is quite accurate. He states to the effect that they are either statements of historical events, accounts of legislative debates, narratives of diplomatic discussions,

negotiations or correspondence, abstracts of cases in the courts or judicial tribunals of different countries, or summaries of other text-writers or essayists on international law, and other kindred topics, accompanied with references to the books and documents where the matters are to be found. Such authorities and references of the kind mentioned are very numerous in the edition containing the notes of the complainant, and he contends that the respondent has made a much larger use of such notes, references and authorities, including those collected and presented by him to illustrate particular topics of international law, than the law of copyright or the agreement between him and Mrs. Wheaton, as expressed in the memorandum, will permit. Numerous instances are given where the same topics are illustrated in the two works by reference to the same historical facts or diplomatic negotiations, and where the views expressed are supported by the citation of the same books, pamphlets, debates and newspapers; and the complainant contends that these coincidences occur in instances so numerous that it is past belief that they could be accidental; and he insists that the just inferences to be drawn from these coincidences, when taken in connection with the admission of the respondent that he did make some use of the complainant's book, for the purposes of reference, fully sustain the burden of proof on his part, and justify the conclusion that, in each particular instance in which the citations and authorities are the same, they were in fact taken from his book, unless the respondent can explain these coincidences, or show that the citations and authorities were derived from some other quarter. Weighed as required by the rules of circumstantial evidence, the complainant contends that these coincidences of fact, as exhibited in the two books, are not only consistent with the charge of infringement, but that they, taken as a whole, are absolutely inconsistent with any other theory, which is the test usually applied in cases where proof is required beyond any reasonable doubt.

§ 258. *Latitude allowed in the reception of indirect evidence.*

Great latitude is justly allowed by the law to the reception of indirect or circumstantial evidence; the aid of which is constantly required in the administration of justice; and whenever the necessity for a resort to such evidence arises, either from the nature of the inquiry or the failure of direct proof, objections to testimony on the ground of irrelevancy, even in common-law suits, are not favored, for the reason that the force and effect of circumstantial facts usually and almost necessarily depend upon their connection with each other. Circumstances altogether inconclusive, if separately considered, may, by their number and joint operation, especially if corroborated by moral coincidences, be sufficient to constitute full and conclusive proof. *Castle v. Bullard*, 23 How., 187; 1 Stark. Ev., 58, 862.

§ 259. *Coincidence of errors as evidence of copying.*

Instances quite numerous are also given where clerical and typographical errors and peculiarities, including special translations, are reproduced in the edition prepared by the respondent; and the court is reminded in argument that cases have arisen where the strongest proof of copying consisted "in the coincidence of errors." *Jeremy*, Eq. Jur., 322. Where the question is whether the defendant, in preparing his book, had before him and copied or imitated the book of the plaintiff, it is manifest, says Mr. Curtis, that this kind of evidence is the strongest proof, short of direct evidence, of which the fact is capable. *Curtis on Copyright*, 255; *Murray v. Bogue*, 1 Drewry, 367; *Spiers v. Brown*, 6 W. R., 353. Other authorities may be cited where the presumptions arising from the identity of inaccuracies is carried much further, and where it is held

that when a considerable number of passages are proved to have been copied by the copying of the blunders in them, other passages which are the same with passages in the original book must be presumed, *prima facie*, to be likewise copied, though no blunders occur in them. *Mawman v. Tegg*, 2 Russ., 394; *Longman v. Winchester*, 16 Ves. Jr., 269.

§ 260. — *or coincidence of citation.*

Coincidence of citation is also invoked by the complainant as evidence of copying; and the instances given as examples are many where the authorities are cited in the same way; that is, by volume and page, or by chapter and section, as the case may be, and from the same edition of the work, and from the same place.

Identity in the plan and arrangement of the notes, and in the mode of combining and connecting the same with the text, is also invoked by the complainant, as strongly supporting the charge of infringement; and it is quite apparent, on a comparison of the two books, that the instances of identity in that respect are numerous and pervading.

§ 261. *Copyright on a new arrangement of materials common to all writers.*

Copyright may justly be claimed by an author of a book who has taken existing materials from sources common to all writers, and arranged and combined them in a new form, and given them an application unknown before, for the reason that, in so doing, he has exercised skill and discretion in making the selections, arrangement and combination, and, having presented something that is new and useful, he is entitled to the exclusive enjoyment of his improvement, as provided in the copyright act. *Gray v. Russell*, 1 Story, 11 (§§ 129–33, *supra*); *Lewis v. Fullarton*, 2 Beav., 6; *Greene v. Bishop*, 1 Cliff., 199 (§§ 242–48, *supra*); *Emerson v. Davies*, 3 Story, 768 (§§ 270–79, *infra*); *Story v. Holcombe*, 4 McL., 309. Books “made and composed” in that manner are the proper subjects of copyright; and the author of such a book has as much right in his plan, arrangement and combination of the materials collected and presented, as he has in his thoughts, sentiments, reflections and opinions, or in the modes in which they are therein expressed and illustrated; but he cannot prevent others from using the old material for a different purpose. All he acquires by virtue of the copyright is “the sole right and liberty of printing, reprinting, publishing and vending such book” for the period prescribed by law. Others may use the old materials for a different purpose, but they cannot copy and use his improvement, which includes his plan, arrangement and combination of the materials, as well as the materials themselves, of which the book is made and composed. *Emerson v. Davies*, 3 Story, 768 (§§ 270–79, *infra*); *Curtis on Copyright*, 180; *Gray v. Russell*, 1 Story, 17 (§§ 129–33, *supra*).

Many other facts and circumstances are adduced by the complainant in support of the charge of infringement; but the classes mentioned will be sufficient for the present investigation, as it is not the purpose of the court to enter into the details of the evidence. Infringement in any and every form, as alleged in the bill of complaint, is denied in the answer; and the respondent, in addition to such denials, has presented in proof and in argument very elaborate and minute explanations of all the principal facts and instances adduced by the complainant in support of the charge of infringement. Separate examination at this time of each one of the explanations so given would be impracticable, and any partial review of them in the opinion would necessarily be unsatisfactory, as it would afford ground for inference that the resi-

due had been overlooked, or that they had not been duly considered. Suffice it to say, that they have all been read, studied, and made the subject of careful comparison with the facts and circumstances adduced by the complainant; but the conclusion of the court is, that they are not of a character, speaking generally, to rebut the particular proofs of the complainant, to which it was intended they should be applied. But the respondent contends that, even if it be true that matters of fact, citations and authorities have been borrowed to a considerable extent, he had a right to take them, as the use he made of them was substantially new, and different from that made by the complainant in the two prior annotated editions of the work, because they were used by him in illustration of new and original propositions. Secondly, he contends that the complainant is not entitled to any decree on account of any use he has made of the matters of fact, citations and authorities exhibited in those editions, because, as he insists, the use he so made amounts to no more than a fair and original abridgment of the former editions.

§ 262. *As to the doctrine of a new and different use of old materials collected and arranged by another.*

The doctrine of new and different use in the law of copyright applies more particularly to the old materials, and not the materials of a work like that of the last annotated edition of the complainant, where the materials collected are much abridged, and sometimes paraphrased and newly arranged, and combined with the text of the original work. Beyond all doubt, he might take the old materials, as found in the sources from which the matters of fact, citations and authorities of the complainant were drawn, and use them as he pleased, in illustration of new and original propositions, or for any other purpose not substantially the same as that to which they are applied in the annotated editions edited by the complainant; but he could not borrow the materials as therein collected and furnished, nor could he rightfully use the plan and arrangement, or the mode by which they are combined with the text, beyond the extent falling within the definition of fair use, which rule is only applicable to the materials, and not to the plan, arrangement and mode of operation. Proper attention to the nature of the charge in the bill of complainant will show that the doctrine of new and different use is wholly inapplicable to the matter in issue between the parties, because the charge is that the respondent has borrowed the matters of fact, citations and authorities, collected and presented in the notes of the complainant, and not that he has made the same use of the old materials. On the contrary, the charge is, that he has not consulted the old materials at all, but that he has borrowed the matters of fact, citations and authorities exhibited in his book, from the matters of fact, citations and authorities as collected, arranged and combined with the text in those two annotated editions. Even supposing the rule to be otherwise, and that a second writer may take bodily the matters of fact, citations and authorities collected, arranged and combined, as in the two annotated editions before the court, if the use he makes of the materials is substantially new and different, still the concession will not benefit the respondent, as his edition of the work, except the new materials collected and presented, occupies the same field and was designed for the same class of readers, and was "made and composed" for the same general purpose. Unsupported by the evidence, as the theory of fact involved in the proposition is, it is quite clear that it cannot furnish any defense for the respondent, even if the principle is correct. Argument to show that an author may have a copyright in his notes to an older

work, though the materials collected are not new, is unnecessary, as the proposition is elementary, if it appear that they have never before been collected and embodied. *Gray v. Russell*, 1 Story, 11 (§§ 129-33, *supra*).

§ 263. *Right of abridgment of a work.*

The respondent's second proposition deserves more consideration, as it presents a defense applicable to the main issue involved in the pleadings. Concisely stated, the proposition is, that, even conceding that he borrowed materials from the prior annotated editions to a considerable extent, still the quantity so taken and used did not amount to more than a fair and original abridgment of the former annotated editions. Third persons cannot make any use of a patented invention, without the consent or license of the patentee, because he acquires, by virtue of his letters patent issued under the patent act, the full and exclusive right and liberty of making and using his invention, as well as of vending it to others to be used, for the term allowed by law; but the right secured to the author or proprietor of a book is only "the sole right and liberty of printing, reprinting, publishing and vending such book," which, as construed by the courts, means the exclusive right to multiply copies for the benefit of the author or his assigns. *Stephens v. Cady*, 14 How., 529; *Reade v. Lacy*, 1 Johns. & H., 526; *Millar v. Taylor*, 4 Burr., 2311. Courts have sometimes supposed that the same rule of decision should be applied to a copyright as to a patent for a machine, and consequently that an abridgment of an original work, made and condensed by another person without the consent of the author of the original work, ought to be regarded as an infringement; but the language of the respective acts of congress making provision for the protection of such rights is different; and the opposite doctrine has been too long established to be considered at the present time as open to controversy. *Story v. Holcombe*, 4 McL., 309. Whatever might be thought if the question was an open one, it is too late to agitate it at the present time, as the rule is settled that the publication of an unauthorized but *bona fide* abridgment or digest of a published literary copyright, in a certain class of cases at least, is no infringement of the original. *Phillips on C.*, 171; *Newbery's Case*, Loft, 775; *Dodsley v. Kinnersley*, Amb., 403; *Whittingham v. Wooler*, 2 Swanst., 428; *Gyles v. Wilcox*, 2 Atk., 342.

§ 264. — *a bona fide abridgment is allowable.*

Strong doubts are expressed by Mr. Curtis, whether the definition of an allowable abridgment, as given in the earlier cases, can be sustained, except as applied to such works as histories, or works composed of translations, and others of like kind; but it was decided in this court in the case of *Folsom v. Marsh*, 2 Story, 105 (§§ 249-56, *supra*), that an abridgment in which there is a substantial condensation of the materials of the original work, and which required intellectual labor and judgment to make the same, does not constitute an infringement of the copyright of the original author; and the court, as now constituted, is inclined to adopt that rule in cases where it also appears that the abridgment was made *bona fide* as such, and that it is not of a character to supersede the copyrighted publication. Unless it be denied that a legal copyright secures to the author "the sole right and liberty of printing, reprinting, publishing and vending the book" copyrighted, it cannot be held that an abridgment or digest of any kind of the contents of the copyrighted publication, which is of a character to supersede the original work, is not an infringement of the franchise secured by the copyright. What constitutes a fair and *bona fide* abridgment in the sense of the law is, or may be, under particular

circumstances, one of the most difficult questions which can well arise for judicial consideration; but it is well settled that a mere selection or different arrangement of parts of the original work into a smaller compass will not be held to be such an abridgment. *Campbell v. Scott*, 11 Sim., 38, and note; *Gyles v. Wilcox*, 2 Atk., 342; *Folsom v. Marsh*, 2 Story, 107 (§§ 249-56, *supra*). Substantially the same views are expressed in the case of *Tinsley v. Lacy*, 1 Hem. & M., 753; and the vice-chancellor in that case, in speaking of the authorities by which fair abridgments have been sustained, goes on to say that the courts have gone far enough in that direction, and adds that it is difficult to acquiesce in the reason sometimes given that the compiler of an abridgment is a benefactor to mankind, by assisting in the diffusion of knowledge.

§ 265. *What will amount to copying. Literal repetition not necessary.*

Viewed in the light of these principles it is quite clear that the 'book of the respondent, even if it could be regarded as an abridgment of the prior editions, must still be held to be an infringement of the same; but the court is of the opinion that it is not an abridgment of those editions in any sense known to the law of copyright. Instead of being an abridgment of the prior editions it is precisely what it purports to be, a reprint of the text of the author, with notes by a new editor; and the proofs are full to the point that he was employed to edit a new edition of the work to supersede the antecedent editions annotated by the complainant. Instructed as he was to make no use of the complainant's notes, his principal defense still is that he complied with those instructions, and that he did not make any use of the notes in his edition beyond what is allowable as fair quotations from the published work of a prior author treating upon the same subject. Copying is not confined to literal repetition, but includes also the various modes in which the matter of any publication may be adopted, imitated or transferred, with more or less colorable alterations to disguise the source from which the material was derived; nor is it necessary that the whole or even the larger portion of the work should be taken in order to constitute an invasion of a copyright. Some use may be made by a subsequent writer of the contents of a book or treatise antecedently made, composed and copyrighted by another person, in making and composing a new book upon the same subject, whether the contents of the antecedent book or treatise were wholly original, or were partly original and partly made up of selections from other authors. Copyright differs in this respect from patent-right, which admits of no use of the patented thing without the consent or license of the patentee. Persons making, using, or vending to others to be used, the patented article, are guilty of infringing the letters patent, even though they may have subsequently invented the same thing without any knowledge of the existence of the letters patent; but the re-composition of the same book without copying, though not likely to occur, would not be an infringement. Coincidence, if perfect, is sufficient to prove the infringement of a patent, as the charge is that the defendant, if it be a machine, has made machines in the similitude of the patented machine and with the same mode of operation. Copying is essential to constitute an infringement of copyright, but identity of contents, arrangement and combination is strong evidence that the second book was borrowed from the first, because it is highly improbable that two authors would express their thoughts and sentiments in the same language, throughout a book or treatise of any considerable

size, or adopt the same arrangement or combination in their publication. *Reade v. Lacy*, 1 Johns. & H., 526.

§ 266. *Evidence of innocent intention on the question of infringement.*

Great difficulty attends every attempt to define in precise terms the privilege allowed by law to a subsequent writer to use without consent or license the contents of a book or treatise antecedently made, composed and copyrighted by another author; or to mark the boundaries of the privilege of such subsequent writer to borrow the materials in a book like the annotated editions of the complainant, where the materials have been selected from such a variety of sources, and where the materials so selected are arranged and combined with certain chosen passages of the text of the original work, and in a manner showing the exercise of discretion, skill, learning, experience and judgment. Decided cases are referred to where the principal criterion of determination is held to be the intent with which the person acted who is charged with infringement. Remarks to that effect are to be found in the opinion of the court in the case of *Cary v. Kearsley*, 4 Esp., 170, and the decision in the case of *Spiers v. Brown*, 6 W. R., 353, refusing the application for an injunction, turned to some extent upon the same consideration; but the vice-chancellor (now chancellor) refused to apply that doctrine in the subsequent case of *Scott v. Stanford*, L. R., 3 Eq., 722, and explained the grounds of his ruling in the former case, which show that he would not sanction that rule in any case unless it appeared that the defendant had bestowed such mental labor upon what he had taken as to produce an original result. Evidence of innocent intention may have a bearing upon the question of "fair use;" and where it appeared that the amount taken was small, it would doubtless have some probative force in a court of equity in determining whether an application for an injunction should be granted or refused; but it cannot be admitted that it is a legal defense where it appears that the party setting it up has invaded a copyright. *Cary v. Faden*, 5 Ves., 23; *Reade v. Lacy*, 1 Johns. & H., 526; *Bramwell v. Halcomb*, 3 Myl. & Cr., 738.

§ 267. *Limits within which subsequent writers are restricted.*

Few judges have devised safer rules upon the subject than Judge Story. He held that, to constitute an invasion of copyright, it was not necessary that the whole of a work should be copied, nor even a large portion of it, in form or substance; that if so much is taken that the value of the original is sensibly diminished, or the labors of the original author are substantially, to an injurious extent, appropriated by another, that is sufficient in point of law to constitute an infringement; that, in deciding questions of this sort, courts must "look to the nature and objects of the selections made, the quantity and value of the materials used, and the degree in which the use may prejudice the sale or diminish the profits, or supersede the objects of the original work." *Folsom v. Marsh*, 2 Story, 116 (§§ 249-56, *supra*). Mere honest intention on the part of the appropriator will not suffice, said Vice-Chancellor Wood, as the court can only look at the result, and not at the intention in the man's mind at the time of doing the act complained of, and he must be presumed to intend all that the publication of his work effects. *Scott v. Stanford*, L. R., 3 Eq., 723; *Hodges v. Welsh*, 2 Ir. Eq., 266. Twenty years before that decision was made, Mr. Curtis, in his valuable work on the law of copyright, expressed the same views, and this court entertains no doubt they are correct. *Curtis on Copyright*, 240. Recent decisions afford more ample protection to copyright

than those of an earlier date, and they also restrict the privilege of the subsequent writer or compiler in respect to the use of the matter protected by the copyright, within narrower limits. The decision in *Kelley v. Morris*, L. R., 1 Eq., 697, is, that in the case of a map, guide-book or directory, or the like, where there are certain common objects of information which must, if described correctly, be described in the same words, a subsequent compiler is bound to do for himself that which was done by the first compiler; that he is not entitled to take one word of the information published without independently working out the matter for himself, so as to arrive at the same result from the same common sources of information, and that the only use he can make of a previous publication of that kind is to verify his own calculations and results when obtained. Rights secured by copyright are property within the meaning of the law of copyright, and whoever invades that property beyond the privilege conceded to subsequent authors commits a tort, and is liable to an action. None of these rules of decision are inconsistent with the privilege of a subsequent writer to make what is called a fair use of a prior publication; but their effect undoubtedly is, to limit that privilege so that it shall not be exercised to an extent to work substantial injury to the property which is under the legal protection of copyright.

§ 268. *Privileges of reviewers.*

Reviewers may make extracts sufficient to show the merits or demerits of the work, but they cannot so exercise the privilege as to supersede the original book. Sufficient may be taken to give a correct view of the whole; but the privilege of making extracts is limited to those objects, and cannot be exercised to such an extent that the review shall become a substitute for the book reviewed. *Story v. Holcombe*, 4 McL., 309.

Examined as a question of strict law, apart from exceptional cases, the privilege of fair use accorded to a subsequent writer must be such, and such only, as will not cause substantial injury to the proprietor of the first publication; but cases frequently arise in which, though there is some injury, yet equity will not interpose by injunction to prevent the further use, as where the amount copied is small and of little value, if there is no proof of bad motive, or where there is a well-founded doubt as to the legal title, or where there has been long acquiescence in the infringement, or culpable laches and negligence in seeking redress, especially if it appear that the delay has misled the respondent. *Sweet v. Cater*, 11 Sim., 580; *Tinsley v. Lacy*, 1 Hem. & M., 752; *Spiers v. Brown*, 6 W. R., 353; *Strahan v. Graham*, 15 W. R., 487; *Bramwell v. Halcomb*, 3 Myl. & Cr., 738; *Reade v. Lacy*, 1 Johns. & H., 527; *Jarrold v. Houlston*, 3 Kay & J., 717; *Lewis v. Fullarton*, 2 Beav., 6; *Bell v. Whitehead*, 17 L. T., 141; *Curtis on Copyright*, 326; *Saunders v. Smith*, 3 Myl. & Cr., 711.

Guided by the rules of law, as already explained, the court, after having examined the whole case with care, is of the opinion that many of the notes presented in the edition edited by the respondent whose case is under consideration do infringe the corresponding notes in the two editions edited and annotated by the complainant, and that the respondent borrowed very largely the arrangement of the antecedent edition, as well as the mode in which the notes in that edition are combined and connected with the text. Judge Story held, in the case of *Emerson v. Davies*, 3 Story, 780 (§§ 270-79, *infra*), that every author had a copyright in the plan, arrangement and combination of his materials, and in his mode of illustrating his subject, if it be new and original; and it was also held, in *Greene v. Bishop*, 1 Cliff., 199 (§§ 242-48, *supra*), that

there may be a valid copyright in the plan of a book, as connected with the arrangement and combination of the materials; and no doubt is entertained that both those decisions were correct; but it is a mistake to suppose that a subsequent writer can be held to have infringed a book where he has not borrowed any of the materials of which the book is composed. New materials are certainly the proper objects of copyright; and old materials, when subsequently collected, arranged and combined in a new and original form, are equally so; and in either case, the plan, arrangement and combination of the materials are as fully protected by the copyright as the materials embodied in the plan, arrangement and combination. Damages may be recovered in either of the supposed cases for the infringement of the property protected by the copyright; but the property in the latter case consists chiefly, if not entirely, in the plan, arrangement and combination of the materials collected and presented in the book, as any other person may collect from the original sources the same materials, and arrange and combine them in any other manner not substantially the same as that of the antecedent author. *Barfield v. Nicholson*, 2 Sim. & S., 6.

§ 269. *Difficult and complex cases will be referred to a master.*

A detailed specification of the instances of infringement, as shown by a comparison of the two books, would be impracticable, and will not be attempted; as the settled practice in equity is, where the works are voluminous and of a complex character, containing, as in this case, much original matter mixed with common property, the cause will, at some stage of the case, be referred to a master, to state the facts, together with his opinion, for the consideration of the court. It is a better course to make the reference before the final hearing; but the parties in this case waived any reference at that stage of the cause, and elected to proceed to final hearing without any such report. Cases arise where the court, under such circumstances, would not order a reference, but would proceed to compare the books and ascertain the details of the infringement; but the case before the court is far too complex to admit of that course of action. *Curtis on Copyright*, 325; *Mawman v. Tegg*, 2 Russ., 400; 2 Story, Eq. Jur., § 941. Details have been examined as far as practicable, consistent with the claims of other official duties, but the judges are of the opinion that they should be further examined, and the results classified, before the court proceeds to determine the extent of the infringement, as the danger of injustice cannot well be avoided in any other way. New matter of value has been collected and presented by the respondent, and he has added much that is valuable in his references to events which have occurred since the publication of the last preceding annotated edition. Whatever may have been the rule in the earlier history of equity jurisprudence, it is now settled law in this court, that a book may in one part of it infringe the copyright of another, while in other parts it may be entirely original and the proper object of a copyright; and in such a case, it was held, in *Greene v. Bishop*, 1 Cliff., 201 (§§ 242-48, *supra*), that the remedy will not be extended beyond the injury. Preceding that decision, the same rule had been adopted in *Story v. Halcombe*, 4 McL., 315, in which the opinion was given by the late Mr. Justice McLean. The modern practice in the chancery courts of England is the same as appears in the case of *Jarrold v. Houlston*, 3 Kay & J., 721, in which the opinion was given by Vice-Chancellor Wood, since promoted to the office of chancellor. *Kelly v. Morris*, L. R., 1 Eq., 701; *Carnan v. Bowles*, 2 Bro. Ch. C., 80; *Curtis on Copyright*, 325. It is suggested that it will be impossible to separate that

which is original from that which was borrowed, and to some extent the suggestion may be of weight; but the court is of the opinion that the difficulties in that behalf, when the matters pass under the searching examination of a master, will be much less than is apprehended by the parties. Should the difficulty in any instance or class prove to be insurmountable, then the rule in equity is, that if the parts which have been copied cannot be separated from those which are original without destroying the use of the original matter, he who made the improper use of that which did not belong to him must suffer the consequences of so doing. If a second writer mixes the literary matter of another, which is under the protection of a copyright, with his own, without the license or consent of the proprietor, he must nevertheless be restrained from publishing what does not belong to him, and if the parts of the work cannot be separated, so that the injunction prevents also the publication of his own literary production, so mixed with that of another, he has only himself to blame. *Mawman v. Tegg*, 2 Russ., 390; *Lewis v. Fullarton*, 2 Beav., 11. It is believed that an extended application of that rule will not be required, in view of the proofs exhibited in the record, and of the facilities afforded by the comparison of the notes in the respective editions, to separate what is original from that which has been copied.

Attention is called by the respondent to the fact that some of the notes in the edition edited by him are entirely original, that in others the material copied is much condensed, or the notes reduced to a mere reproduction of the authorities cited in the prior edition, and that other notes have been enlarged and improved by the addition of new matter; and in view of those circumstances, he contends that the edition edited by him should be regarded as a new and original work; but the decisive answer to the first and last suggestion is, that no man is entitled to avail himself of the previous labors of another for the purpose of conveying to the public the same information, even though he may append additional information to that already published. *Scott v. Stanford*, L. R., 3 Eq., 724; 2 Story, Eq. Jur., § 940; 2 Kent, Com., 382, 383; *Cary v. Faden*, 5 Ves., 25, and note; *Wheaton v. Peters*, 8 Pet., 591 (§§ 12-16, *supra*); *Bramwell v. Halcomb*, 3 Myl. & Cr., 737.

Additional remarks in respect to the alleged fact that the contents of the notes copied were condensed is unnecessary, as it is quite clear, as before explained, that the change made in that behalf is not of a character to afford the respondent any defense.

Supported by these reasons, the conclusions of the court are as follows:

1. That the complainant in a court of equity is the equitable owner of the notes in the two annotated editions described in the pleadings as arranged, and the mode in which they are combined and connected with the text.

2. That the title to the entire text, together with the title to the memoir and indices, is in the proprietor of the book, and not in the complainant as alleged in the bill of complaint.

3. That there are notes in the edition edited by the respondent, of substantial importance in point of number, and the value of the materials, which do infringe the equitable rights of the complainant, as explained and defined by the court.

4. That all the respondents had notice of the claim of the complainant, as explained and defined by the court.

5. That there are notes in that edition of substantial importance in point of

number, and the value of the materials, which do not infringe any rights of the complainant.

6. That the notes in that edition consisting wholly of citations found in the corresponding notes of the complainant do infringe his rights, as explained and defined by the court, though many of them are unaccompanied by the extracts collected and presented in the next preceding edition.

7. That notes consisting of authorities or collections of authorities copied in like manner as described in the preceding proposition, and without remarks or comments, do also infringe the complainant's rights, though they are found inserted in or prefixed or appended to notes otherwise not objectionable.

8. That notes of which the whole or some substantial and material part is condensed from the corresponding notes in the preceding edition, or from the extracts therein printed and published, without any marks of original labor, or of any such labor except the study of the note copied and adopted, do also infringe the complainant's rights, as explained and defined.

9. That notes wholly original do not infringe.

10. That notes partly original and partly copied from the preceding edition do not infringe, except for the matter copied, if it be practicable to ascertain and define the separate proportions and make the separation of the same; but if not, still the respondent at the proper stage of the case must be restrained from using the part copied.

11. That the cause must be referred to a master to examine the pleadings and proofs, and report the extent of the infringement as adjudged by the court in this investigation, and also to examine and ascertain what, if any, other instances of the alleged infringements within the principles here explained are proved; and if any, to classify the same and report the details, together with the reasons for his conclusions, for the consideration of the court.

12. That all other matters in the cause will be reserved until the coming in of the master's report.

13. That the cause is referred to Henry W. Paine as master, for his examination and report in the premises, in conformity to the opinion and directions of the court.

Equity suits for the infringement of a copyright are usually referred to a master before the final hearing, to ascertain whether the charge is proved, and if so, for a report as to the nature and extent of the infringement; and in such cases the general rule is that the complainant, if he prevails in the suit, is entitled, if at all, to an injunction at the time the decretal order is entered, to restrain the respondent from any further violation of his rights, as the whole case is then before the court. Even when the case is heard before any such reference and report, if the charges of infringement are few and of a character that the extent of the infringement can be conveniently determined by the court without sending the case to a master, the court, if the case be one where an injunction is the proper remedy, will order it at the same time that the decision is announced upon the merits. But where the cause comes to a final hearing without any such report, the court, if the charges of infringement are numerous and of a character to require extended examination before the extent of the infringement can be ascertained, will ordinarily send the case to a master for further examination and report in respect to all matters not previously adjudged by the court; and the general rule in such cases is that the injunction will not be granted until the nature and extent of the in-

fringement are fully ascertained and determined, as its effect and operation might work great injustice. Obviously the present case falls within the latter rule, and therefore an injunction will not be ordered until the court shall have acted finally upon the report of the master.

EMERSON v. DAVIES.

(Circuit Court for Massachusetts: 3 Story, 768-799. 1845.)

Bill in equity for the infringement of a copyright of a work entitled Emerson's North American Arithmetic. The work complained of was an arithmetic by Davies. The facts are stated in the opinion.

Opinion by STORY, J.

This cause has been argued with great ability, and with great fullness of the examination of the evidence. The merits of the case, however, seem to me to depend mainly, if not altogether, upon two points. First, whether the plaintiff's book contains anything new and original, entitling him to a copyright. Secondly, whether, if the plaintiff has a title by copyright, the defendants have infringed that copyright by the book published by them, or, as it is technically expressed, whether they have printed the work of the plaintiff.

§ 270. *New plan, arrangement, or employment of old materials will entitle the author to a copyright of his book.*

Upon the first question, at least, upon the evidence in the case, there does not appear to me to be any reasonable ground of doubt. The book of the plaintiff is, in my judgment, new and original, in the sense in which those words are to be understood in cases of copyright. The question is not whether the materials which are used are entirely new, and have never been used before; or even that they have never been used before for the same purpose. The true question is, whether the same plan, arrangement and combination of materials have been used before for the same purpose or for any other purpose. If they have not, then the plaintiff is entitled to a copyright, although he may have gathered hints for his plan and arrangement, or parts of his plan and arrangement, from existing and known sources. He may have borrowed much of his materials from others, but if they are combined in a different manner from what was in use before, and *a fortiori*, if his plan and arrangement are real improvements upon the existing modes, he is entitled to a copyright in the book embodying such improvements. See *Lewis v. Fullerton*, 2 Beav., 6. It is true that he does not thereby acquire the right to appropriate to himself the materials which were common to all persons before, so as to exclude those persons from a future use of such materials; but then they have no right to use such materials with his improvements superadded, whether they consist in plan, arrangement, or illustrations or combinations; for these are strictly his own. A man who constructs a new machine is entitled to a patent therefor, if the combination and arrangements thereof are new and his own invention, although he uses old materials and old mechanical apparatus and powers in constructing such machine. He may use wheels, or levers, or screws, or toggle-joints, or cranks, or any other known modes of accomplishing given mechanical ends, if he combines them in a new manner, and thus produces a beneficial result. The steam-engine, the steamboat, the cut-nail machine, the carding machine, the grooving machine, are all but new combinations of old materials, old processes, and old mechanical powers and apparatus.

In truth in literature, in science and in art there are, and can be, few, if any,

things which, in an abstract sense, are strictly new and original throughout. Every book in literature, science and art borrows, and must necessarily borrow and use, much which was well known and used before. No man creates a new language for himself, at least, if he be a wise man, in writing a book. He contents himself with the use of language already known and used and understood by others. No man writes exclusively from his own thoughts, unaided and uninstructed by the thoughts of others. The thoughts of every man are, more or less, a combination of what other men have thought and expressed, although they may be modified, exalted or improved by his own genius or reflection. If no book could be the subject of copyright which was not new and original in the elements of which it is composed, there could be no ground for any copyright in modern times, and we should be obliged to ascend very high, even in antiquity, to find a work entitled to such eminence. Virgil borrowed much from Homer; Bacon drew from earlier as well as contemporary minds; Coke exhausted all the known learning of his profession; and even Shakspeare and Milton, so justly and proudly our boast as the brightest originals, would be found to have gathered much from the abundant stores of current knowledge and classical studies in their days. What is La Place's great work but the combination of the processes and discoveries of the great mathematicians before his day with his own extraordinary genius? What are all modern law-books but new combinations and arrangements of old materials, in which the skill and judgment of the author in the selection and exposition and accurate use of those materials constitute the basis of his reputation as well as of his copyright? Blackstone's Commentaries and Kent's Commentaries are but splendid examples of the merit and value of such achievements.

§ 271. *An author has a copyright in the plan, arrangement and combination of his materials, and in his mode of illustrating his subject. Translations, maps, etc.*

In truth, every author of a book has a copyright in the plan, arrangement and combination of his materials and in his mode of illustrating his subject, if it be new and original in its substance. Sir John Leach, in *Barfield v. Nicholson*, 2 Sim. & Stu., 1, 6, recognized this doctrine in its fullest extent; and there stated that a copyright might well be taken where the composition is either new or there is a new arrangement thereof. Nay, the right to a copyright goes much further. A man has a right to a copyright in a translation upon which he has bestowed his time and labor. To be sure, another man has an equal right to translate the original work and to publish his translation; but then it must be his own translation, by his own skill and labor, and not the mere use and publication of the translation already made by another. *Wyatt v. Barnard*, 3 Ves. & Beam., 77. A man has a right to the copyright of a map of a state or country, which he has surveyed or caused to be compiled from existing materials at his own expense, or skill, or labor, or money. Another man may publish another map of the same state or country, by using the like means or materials, and the like skill, labor and expense. But then he has no right to publish a map taken substantially and designedly from the map of the other person, without any such exercise of skill, or labor, or expense. If he copies substantially from the map of the other, it is a downright piracy; although it is plain that both maps must, the more accurate they are, approach nearer in design and execution to each other. *Mathewson v. Stockdale*, 12 Ves., 270; *Wilkins v. Aiken*, 17 Ves., 422.

§ 272. *One who, by his own skill, labor and judgment, writes a new work, and does not merely copy from another, is entitled to a copyright therein.*

He, in short, who, by his own skill, judgment and labor, writes a new work, and does not merely copy that of another, is entitled to a copyright therein; if the variations are not merely formal and shadowy from existing works. He who constructs by a new plan and arrangement, and combination of old materials, in a book designed for instruction either of the young or the old, has a title to a copyright, which cannot be displaced by showing that some part of his plan or arrangement or combination has been used before.

The case of *Gray v. Russell*, 1 Story, 11 (§§ 129-33, *supra*), affords a strong illustration of the doctrine, as that was a case confessedly of a mere improvement of an old work, Adams' Latin Grammar, a subject that had been discussed and treated in many hundred works, and in which little more could be done than to arrange the materials upon a new plan, or in a new combination, with additional illustrations and initial remarks. Yet the court held it clearly to be the subject of a copyright; and from the doctrine therein stated, I feel not the slightest inclination to depart. It was upon the like ground that an action has been held to lie for the recovery of damages for pirating the new corrections and additions to an old work (*The Itinerancy of England*). Upon that occasion, Lord Kenyon said: "The courts of justice have been long laboring under an error, if an author have no copyright in any part of a book, unless he have an exclusive right to the whole book." See, also, *Trusler v. Murray* and *Tonson v. Walker*, cited in 1 East, 360, 361, and notes. Another illustration may be found in the cases of histories and dictionaries, as stated by Lord Mansfield in *Sayre v. Moore*, 1 East, R., 361, note. "In the first, a man may give a relation of the same facts, and in the same order of time; in the latter an interpretation is given of the identical same words. But he must not servilely copy the words of another on either subject. An author has as much right in his plan, and in his arrangements, and in the combination of his materials, as he has in his thoughts, sentiments, opinions, and in his modes of expressing them. The former, as well as the latter, may be more useful or less useful than those of another author; but that, although it may diminish or increase the relative values of their works in the market, is no ground to entitle either to appropriate to himself the labor or skill of the other, as embodied in his own work."

§ 273. *Where the plan, arrangement and illustration of a school book are new, the taking of them is a violation of copyright.*

It is a great mistake to suppose, because all the materials of a work, or some parts of its plan and arrangements, and modes of illustration, may be found separately or in a different form, or in a different arrangement in other distinct works, that therefore, if the plan or arrangement or combination of these materials in another work is new, or for the first time made, the author or compiler, or framer of it (call him which you please), is not entitled to a copyright. The reverse is the truth in law, and, as I think, in common sense also. It is not, for example, in the present case, of any importance that the illustrating of lessons in arithmetic by attaching unit marks representing the numbers embraced in the example may be formed by dots in Wallis' *Opera Mathematica* (p. 28); or in Colburn's *Arithmetic* in the form of upright linear marks, in a pamphlet detached from the main work. That is not what the plaintiff purports to found his copyright upon. He does not claim the first use or invention of unit marks for the purpose above mentioned. The use of these is a

part of and included in his plan, but it is not the whole of his plan. What he does claim is, 1. The plan of the lessons in his book; 2. The execution of that plan in a certain arrangement of a set of tables in the form of lessons to illustrate those lessons; 3. The gradation of examples to precede each table in such manner as to form with the table a peculiar and symmetrical appearance of each page; 4. The illustration of his lessons by attaching to each example unit marks representing the numbers embraced in the example. It is, therefore, this method of illustration in the aggregate that he claims as his invention, each page constituting of itself a complete lesson; and he alleges that the defendants have adopted the same plan, arrangement, tables, gradation of examples and illustrations by unit marks, in the same page, in imitation of the plaintiff's book, and in infringement of his copyright, and in confirmation of this statement he refers to divers pages of his own book in comparison with divers pages of the book of the defendants. Now I say that it is wholly immaterial whether each of these particulars, the arrangement of the tables and forms of the lessons, the gradation of the examples to precede the tables, the illustration of the examples by unit marks, had each existed in a separate form in different and separate works before the plaintiff's work, if they had never been before united in one combination or in one work, or on one page, in the manner in which the plaintiff has united and connected them. No person had a right to borrow the same plan, and arrangement, and illustrations, and servilely to copy them into any other work. The same materials were certainly open to be used by any other author, and he would be at liberty to use unit marks and gradations of examples and tables and illustrations of the lessons, and to place them in the same page. But he could not be at liberty to transcribe the very lessons and pages and examples and illustrations of the plaintiff, and thus to rob him of the fruits of his industry, his skill, and his expenditures of time and money.

I have dwelt the more upon this point because it seems to me that some of the learned witnesses whose evidence is in the case have entirely misunderstood the law upon this subject; and some portions of the argument at the bar seem to me to have proceeded upon an equally inadmissible ground, that if none of the materials of the plaintiff's book were new, or invented by him, that new combinations or arrangements or illustrations of the old materials would give a title to a copyright. My judgment is far otherwise; and as far as the evidence in this case goes, it is clear to my mind that the plaintiff has a good copyright in his book; that, taking his plan, arrangements, lessons, examples and illustrations as a whole, they are not to be found combined in any former work. I must confess that it strikes me that the plaintiff's method is a real and substantial improvement upon all the works which had preceded his and which have been relied on in the evidence; but whether to be better or worse is not a material inquiry in this case. If worse, his work will not be used by the community at large; if better, it is very likely to be so used. But either way he is entitled to his copyright, *Valere quantum valere potest*.

§ 274. *To constitute piracy of copyright it must appear that the original work was either copied or so imitated as to be a mere evasion of the copyright.*

The second question is the real and important question in the cause; and certainly it is not without its difficulties. It falls within that class of cases where the differences between different works are of such a nature that one is somewhat at a loss to say whether the differences are formal or substantial; whether they indicate a resort to the same common sources to compile and

compose them, or one is (as it were) *uno flatu* borrowed from the other, without the employment of any research or skill, with the disguised but still apparent intention to appropriate to one what in truth belongs exclusively to the other, and with no other labor than that of mere transcription, with such omissions or additions as may serve merely to veil the piracy. It is like the case of patented inventions in art or machinery, where the resemblances or diversities between the known and the unknown, and between invention and imitation, are so various or complicated, or minute or shadowy, that it is exceedingly difficult to say what is new or not, or what has been pirated and what is substantially different. The approaches on either side may be almost infinitely varied, and the identity or diversity sometimes becomes almost evanescent. In many cases the mere inspection of a work may at once betray the fact that it is borrowed from another author with merely formal or colorable omissions or alterations. In others, again, we cannot affirm that identity in the appearance or use of the materials is a sufficient and conclusive test of piracy, or that the one has been fraudulently or designedly borrowed from the other. Take the case, for example (already referred to), of two maps of a city, a county, or a country. We cannot predicate that the one is a piracy from the other, simply because their external appearance is in nearly all respects the same, with or without some additions or alterations or omissions. Take the case of two engravings copied from the same picture, or two pictures of natural objects by different artists;—it would not be practicable, in many cases, from the mere inspection of them and their apparent identity, to say that the one was a transcript of the other. It would be necessary to resort to auxiliary and supplementary evidence to establish the fact either way.

And this leads me to remark that the bill directly charges “that the said work of the defendant Davies is copied and pirated from that” of the plaintiff, and is an infringement of his copyright in the particulars set forth in the bill. These particulars we shall have occasion hereafter to consider. The defendant Davies, in his answer, alleges from his own knowledge, and the other defendant Barnes alleges from information and belief, “that neither the said work composed by the defendant Davies, nor any part thereof, is copied, adopted or taken from the said book of the said complainant, or any part thereof.” Now this part of the answer, being directly responsive to the charge made in the bill, is positive evidence of the fact for the defendants, unless it is overcome by the clear testimony of two witnesses, or of one witness and equivalent circumstances. In short, the true exposition of this rule in equity is, that where the answer is responsive to the charge in the bill, it is to be taken as true, unless its credibility is impeached in such a manner as renders it unsafe and improper to place confidence in it; and this may be by direct testimony, or by circumstantial evidence sufficient to overthrow its credibility.

It has been suggested at the bar, and it is a suggestion not without weight, that the answer of the defendants nowhere denies that Davies had seen the plaintiff's book before his own was compiled and published. The omission of such denial would have been more stringent if the bill had contained any interrogatory pointed directly to the fact that Davies had seen it. Not containing any such interrogatory, the attention of the defendants may not have been drawn to the importance of such a denial, if it could be correctly made. Still, as the book of Emerson was published in 1829, and had a wide circulation, and that of Davies was not published until 1840, the natural inference certainly is, that composing a book on the same subject, for the same professed

object, the instruction of beginners in arithmetic, he should, considering his local position in New York, have examined all the existing works published and on sale in the neighboring states upon the same subject. I rather incline, therefore, to think that, under all the circumstances, it must be taken as a fact by the court that Davies, when he compiled his work, had seen and read that of Emerson. But then this circumstance does not necessarily displace the substance of the answer to the charge in the bill. It may be true that Davies had seen and read Emerson's book, and yet that he may not have copied or adopted or taken any part of it from that of Emerson, but from common sources open to all authors and compilers. It should be added that the answer expressly alleges that the similarity of appearance between certain pages of the two books alleged in the bill, "if such similarity of appearance do exist, which the defendants deny, was purely accidental and was not intended, expected or desired by this defendant, Davies." There is some evidence that the arrangement of the whole matter of one lesson on one and the same page was the act of the stereotyper, and was afterwards adopted by Davies. But the stereotyper did not change the arrangement by Davies of the matter of each lesson; and if that matter had been on different pages, and yet it had been a mere transcript from Emerson's book, it would have been a clear invasion of his copyright. The question is not in what part of one or more pages the matter is found, but whether it is borrowed or pirated from the plaintiff, without any substantial alteration or difference. In truth, however, the placing each lesson in one and the same page, having been finally accepted and acted upon by Davies, binds him just as much as if he had originally authorized or directed it.

§ 275. *Distinction between a copy of a work and an imitation or resemblance.*

The case, therefore, comes back at last to the naked consideration, whether the book of Davies, in the parts complained of, has been copied substantially from that of Emerson, or not. It is not sufficient to show that it may have been suggested by Emerson's, or that some parts and pages of it have resemblances, in method and details and illustrations, to Emerson's. It must be further shown that the resemblances in those parts and pages are so close, so full, so uniform, so striking, as fairly to lead to the conclusion that the one is a substantial copy of the other, or mainly borrowed from it. In short, that there is substantial identity between them. A copy is one thing, an imitation or resemblance another. There are many imitations of Homer in the *Æneid*; but no one would say the one was a copy from the other. There may be a strong likeness without an identity; and as was aptly said by the learned counsel for the plaintiff in the close of his argument, *Facies non omnibus una, non diversa tamen, qualem debet esse sororum*. The question is, therefore, in many cases, a very nice one, what degree of imitation constitutes an infringement of the copyright in a particular work. It is very clear that any use of materials, whether they are figures or drawings, or other things which are well known and in common use, is not the subject of a copyright, unless there be some new arrangement thereof. Still, even here, it may not always follow, that any person has a right to copy the figures, drawings or other things, made by another, availing himself solely of his skill and industry, without any resort to such common source. A striking case to illustrate the first part of this proposition is *Barfield v. Nicholson*, 2 Sim. & Stu., 1, 6. There the question was whether a work called *The Practical Builder* was an improvement upon *The Architectural Dictionary*, both works having been compiled by the same

gentleman, Mr. Nicholson, and both being, plainly, on the same subject, the science of architecture and the art of building. On that occasion, Sir John Leach (the vice-chancellor) said: "The Architectural Dictionary, and The Practical Builder, are plainly both works upon the same subjects, namely, the science of architecture and the art of building. The question is, whether the latter work is a piracy upon any part of the former work, which the author of that work had a right to claim as his own property, in respect that it was his own composition.

"Composition is either in new matter or new arrangement. The arrangement in the two works is altogether different. In The Architectural Dictionary, the information is scattered through the whole work, under the head of each particular term of science or art, arranged in alphabetical order; in the Practical Builder, the information is conveyed in the connected form of a treatise. If there be piracy here, it must be piracy of the matter of The Architectural Dictionary. The general answer of the defendant is, that The Practical Builder was conceived and planned by him as a speculation on his own account, and that he employed various artists in the execution of this work, and, among others, Nicholson and his son; and especially in the plates; and that he paid for everything as original design; and that, if it be a piracy, he is himself imposed upon.

"The Practical Builder, as far as published, consists of forty-six plates; and the affidavits allege that thirteen of these plates contain one, two, three or four figures, which are imitations of figures contained in The Architectural Dictionary; and the particular figures are pointed out in the affidavits. The entire resemblance of these figures, though in some instances denied, is generally admitted; but it is said this resemblance is no proof of imitation. The figures of geometry must necessarily resemble each other in all works; and, in a great degree, this applies to the figures of architecture or building, where they are descriptions of things in use, as, for instance, in one of the articles, roofs. Where two works describe the figures of roofs in use, they must necessarily produce resembling figures. And the defendant then proceeds to show that the figures used in his plates, supplied by the Nicholsons, are not, in fact, piratical copies of the plaintiff's works. The defendant does not deny (what could not be denied) that if the Nicholsons, whom he employed, piratically copied these figures from the plaintiff's work, that he is bound by their acts, as the acts of his agents, and that piracy in the Nicholsons is piracy in him.

"As to those figures in which he admits resemblance, he says there is not one of them which was not given to the public in some or many works prior to The Architectural Dictionary; that some of these prior works were the works of Nicholson himself, as the articles of architecture in Rees' Cyclopaedia, and the same articles in Brewster's Encyclopedia, and The Carpenter's Guide, published in 1792. And he says further, that not only were these figures extant prior to The Architectural Dictionary, but that the Nicholsons had not, in fact, recourse to The Architectural Dictionary for them, nor to any materials collected for The Architectural Dictionary. Upon reference to the prior publications, it is proved to be indisputably true, that there is not one of these figures which had not been given to the world prior to The Architectural Dictionary; and the matter not being new, the author of The Architectural Dictionary could acquire no property in these figures except by a new arrangement; but there is clearly no novelty in his arrangement. The figures of The

Architectural Dictionary are introduced to illustrate the letter-press; and so are all figures in prior works, as well as in The Practical Builder.

"If, therefore, the figures furnished by Nicholson for The Practical Builder had in fact been copied from The Architectural Dictionary, this would have been no piracy, because the author of The Architectural Dictionary had no property in these figures. But the Nicholsons, both father and son, positively swear that these figures were not copied from The Architectural Dictionary, nor from any materials collected for The Architectural Dictionary.

"With respect to the letter-press, the affidavits filed by the plaintiff do not point out particular instances of invasion; but upon the motion, I was referred to the article Roofs, which is nearly a *verbatim* copy of the same article in The Architectural Dictionary. The defendant's answer here is the same as to the figures. This article was published *verbatim* in the Encyclopedia prior to The Architectural Dictionary, and is not therefore the property of the plaintiff."

The other part of the proposition may be illustrated by the case, already stated, of maps and engravings borrowed from copyright maps and engravings, without any resort to the originals or to any common sources. *Wilkins v. Aiken*, 17 Ves., 422, 424, 425; *Mathewson v. Stockdale*, 12 Ves., 270; *Longman v. Winchester*, 19 Ves., 269. In *Roworth v. Wilkes*, 1 Crompt., 94, which was, among other things, an action for pirating certain prints in a work on fencing, it appeared in evidence that three of the engravings of the defendant represented figures in exactly the same attitudes as the plaintiff's, but disguised by a different costume. Lord Ellenborough, on that occasion, said: "But it is still to be considered whether there be such a similitude and conformity between the prints that the person who executed the one set must have used the others as a model. In that case, he is a copyist of the main design. But if the similitude can be supposed to have arisen from accident, or necessarily from the nature of the subject, or from the artist having sketched designs merely from reading the letter-press of the plaintiff's work, the defendant is not answerable. It is remarkable, however, that he has given no evidence to explain the similitude, or to repel the presumption which that necessarily causes." And the verdict was for the plaintiff. Now, it is quite as remarkable that the defendant Davies has not (as far as I recollect) given any evidence as to what sources he examined in the compilation of his own work; and this coupled with the fact that he has offered no denial, or proof that he had not seen or read the plaintiff's book before his own compilation was made, is certainly a circumstance of some significance. It is in the highest degree probable that he had seen and read some of the works on arithmetic, referred to by the witnesses, before his compilation was made, such as Colburn's Arithmetic, Leslie's Philosophy of Arithmetic, Adams' Arithmetic, Develey's Arithmetique d'Emile, for they are all to be found in the library at West Point, where he was a professor. But it is far from being certain that he had ever seen Francoeur's Cours complet de Mathematique Pures, or Jonaune's Arithmetique Elementaire; and there is no pretense to say that he had seen or used Wallis' Arithmetic. But neither of these works embraces in itself the same plan, method, arrangement, tables and examples, in the same connection, or for the same purposes, or in the same progressive order of lessons, as the plaintiff's. Adams' Arithmetic is wholly different. Colburn's Arithmetic approaches the nearest to the plaintiff in its use of unit marks. But it differs from the plaintiff's in this material respect: that in Colburn's, the unit marks

are in a separate pamphlet from the text, and need, of course, the aid of an instructor. In the plaintiff's, they are united, and the child instructs himself.

Now, it is by no means clear that the defendant Davies, without consulting the plaintiff's work, was in fact led to the same course of lessons, examples, and illustrations, and tables, which he has used in the first twenty pages of his work on Addition, and which bears so close a resemblance to the first eighteen pages of the plaintiff's work. And the question then comes to this: whether he has, in substance, copied these pages in plan, method, arrangement, illustrations and tables, from the plaintiff's work, with merely colorable alterations and devices to disguise the copy, or whether the resemblances are merely accidental, and naturally or necessarily grew out of the objects and scheme of the defendant Davies' work, without any use of the plaintiff's. If the defendant Davies had before him, at the time, the work of the plaintiff, and used it as a model for his own plan, arrangements, examples and tables, then I should say, following the doctrine of Lord Ellenborough in *Roworth v. Wilkes*, that it was an infringement of the plaintiff's copyright, notwithstanding the alterations and disguises in the forms of the examples and unit marks. Lord Mansfield, in *Sayre v. Moore* (cited 1 East, 361, 362), said: "In all these cases the question of fact to come to a jury is, whether the alteration be colorable or not. There must be such a similitude as to make it probable and reasonable to suppose that one is a transcript of the other, and nothing more than a transcript. So in the case of prints; no doubt different men may take engravings from the same picture. The same principle holds in regard to charts: that a man who has it in his intention to publish a chart may take advantage of all prior publications. There is no monopoly in the subject here, any more than in the other instances. But upon a question of this nature the jury will decide whether it be a servile imitation or not." Observe, his lordship does not say a mere literal copy, but a servile imitation. In *Trusler v. Murray*, 1 East, 362, note, Lord Kenyon put the point in the same light, and said: "The main question here was, whether, in substance, the one work is a copy and imitation of the other; for, undoubtedly, in a chronological work (the case before the court was of that nature), the same facts must be related." The same doctrine was recognized by the court of king's bench, in *Cary v. Longman & Rees*, 1 East, 358; and it was fully acted on in *Mathewson v. Stockdale*, 12 Ves., 270, and *Longman v. Winchester*, 16 Ves., 269, and *Wilkins v. Aiken*, 17 Ves., 422, 424, 425, in the court of chancery.

§ 276. *True test of piracy.*

I think it may be laid down as the clear result of the authorities in cases of this nature, that the true test of piracy or not is to ascertain whether the defendant has, in fact, used the plan, arrangements, and illustrations of the plaintiff, as the model of his own book, with colorable alterations and variations only to disguise the use thereof; or whether his work is the result of his own labor, skill, and use of common materials and common sources of knowledge, open to all men, and the resemblances are either accidental or arising from the nature of the subject. In other words, whether the defendant's book is, *quoad hoc*, a servile or evasive imitation of the plaintiff's work, or a *bona fide* original compilation from other common or independent sources.

§ 277. *As to the use in a book of old tables.*

In respect to the Abacus, I throw it, at once, out of the case. The controversy is not, here, in respect to a patent for a machine, embodying the Abacus, but in respect to the copyright of a book, instructing by lessons in an entirely

different form and method. The Abacus may have suggested means of instruction by signs; but it is not a book, and has not the same identical objects, uses, and methods of instruction. In comparing the book of the plaintiff with that of the defendant Davies, in the first eighteen to twenty pages, the tables appear to be identical. It is said that there is nothing new in these tables. That they are well known, and were in common use, long before the plaintiff's work was published. Be it so. The question is not whether such tables existed before, but whether the use and arrangement of them as a part of plaintiff's book is new and has not been borrowed by the defendant from the plaintiff. In each book they stand at the bottom of the page or lesson, and are used for the same purpose, to fix in the memory what has been previously taught in the lesson which precedes it. Then again, the mode of illustration by progressive lessons, and visible unit marks, is the same in each, and is used for precisely the same purpose. Take, for example, pages 10 and 11 of Davies and compare them with pages 8 and 9 of Emerson; each puts the question in the same form, and each suggests the answer by visible unit marks. The unit marks in Davies are, uniformly, a star; the unit marks in Emerson are various — trees, apples, horses, chairs, etc. But will it be contended, that, if in all other respects these twenty pages were identical, the substitution of a star for other figures, or of one figure for another, would have made these pages substantially different? I presume not. The change of costume of the fencing figures, in the case before Lord Ellenborough, was treated as a mere evasion.

The two principal differences between the book of the defendant Davies and that of the plaintiff, in the pages in Addition, already referred to, seem to be, first, that Davies uniformly uses stars as unit marks, and the plaintiff a great variety of different figures to illustrate the questions; and secondly, that Davies there omits all the different modes of illustrating the questions by putting cases which the plaintiff uniformly uses. Thus Davies puts the question, "One and two are how many," merely, and then places a star under one, and two stars under two; whereas the plaintiff puts the case thus: "Tell me how many trees are one and two trees," placing the figure of a tree by itself, and then the figures of two trees together, and then comes the question in the abstract, "One and two are how many." Davies, however, puts divers illustrative examples (see pages 20, 21), but they are placed in a subsequent page, and are not a part of the original lesson, nor put in juxtaposition. In each book (as has been already remarked), tables exactly alike follow at the bottom of the page, to be committed to memory as the result of the lesson. The resemblances in the title or section of Subtraction in Davies are not so striking. The questions there put, and the tables there given, are of a similar nature; but the stars are omitted. But it is principally in the title or section of Addition that the resemblances are so close and exact as directly to raise the question whether the title or section of the one book was borrowed, with colorable alterations only, from the other.

§ 278. *The injunction may go to a part of an infringing work.*

If it was, then, *quoad* this title or section, the injunction ought to be granted, although the rest of the work of Davies may not infringe any part of that of the plaintiff; for, to amount to an infringement, it is not necessary that there should be a complete copy or imitation in use throughout; but only that there should be an important and valuable portion, which operates injuriously to the copyright of the plaintiff. The case of *Wilkins v. Aiken*, 17 Ves., 422, and *Bram-*

hall v. Holcomb, 3 Mylne & C., 737, 738, and Campbell v. Scott, 11 Simons, 31, fully establish this position. See, also, Mawman v. Tegg, 2 Russ., 385, 397-400. Nor is it any objection to the injunction, that if it goes to part of a work it may render the other part, which is original, wholly without value, or injuriously diminish its value. The answer to this suggestion, if made, is to be found in the language of Lord Eldon, in Mawman v. Tegg, 2 Russ., 388, 390. His lordship there said: "As to the hard consequences which would follow from granting an injunction, when a very large proportion of the work is unquestionably original, I can only say, that, if the parts which have been copied cannot be separated from those which are original, without destroying the use and value of the original matter, he who has made an improper use of that which did not belong to him must suffer the consequences of so doing. If a man mixes what belongs to him with what belongs to me, and the mixture be forbidden by the law, he must again separate them, and he must bear all the mischief and loss which the separation may occasion. If an individual chooses in any work to mix my literary matter with his own, he must be restrained from publishing the literary matter which belongs to me; and if the parts of the work cannot be separated, and if by that means the injunction, which restrained the publication of my literary matter, prevents also the publication of his own literary matter, he has only himself to blame."

§ 279. *An imitation may amount to an infringement.*

It has been truly said that the subject of both of these works is of such a nature that there must be close resemblances between them. But the real question on this point is not whether such resemblances exist, but whether these resemblances are purely accidental, and undesigned, and unborrowed, because arising from common sources accessible to both the authors, and the use of materials open equally to both; whether, in fact, the defendant Davies used the plaintiff's work as his model, and imitated and copied that, and did not draw from such common sources or common materials. Then, again, it has been said that, to amount to piracy, the work must be a copy and not an imitation. That, as a general proposition, cannot be admitted. It is true the imitation may be very slight and shadowy. But, on the other hand, it may be very close, and so close as to be a mere evasion of the copyright, although not an exact and literal copy. And again, it is said that the plan of the work of the defendant Davies is different from that of the plaintiff's. The volume is but the commencement of a course of mathematics. It may be true (but into this I do not inquire) that, taking the entire volume, the other parts may not be executed upon the same plan as the plaintiff's. But, then, if it substantially includes the essential parts of the plaintiff's plan, of his arrangement, examples and tables, so as to supersede the work of the plaintiff, it is a violation of his copyright. It is like the case of publishing the substance of an article of an author in an encyclopedia; or the substance of a volume of poems of an author in a work purporting to contain extracts from his works and those of other authors. Yet in each of these cases the copyright of the author is violated. The cases of Mawman v. Tegg, 2 Russ., 388, and Campbell v. Scott, 11 Simon, 31, abundantly establish this. The plaintiff's volume consists but of forty-eight pages; and if it turns out that twenty or more of them have been so closely imitated by the defendant Davies, and that it superseded that of the plaintiff, it will be difficult to say that it is not an infringement of his copyright.

I have bestowed a good deal of reflection upon this case; and, at last, I

feel constrained to say that I am unable to divest myself of the impression that, in point of fact, the defendant Davies had before him, when he composed his own work, the work of the plaintiff, and that he made it his model, and imitated it closely in his title or section of Addition, and, in a great measure, in that of Subtraction also. The coincidences in plan, arrangement, modes of illustration and tables appear to me to be too exact and various to have been wholly accidental and without resort to the plaintiff's work. Both of the works appear to me to be highly meritorious; which is the most useful and convenient in practice it is no part of my duty to consider or decide. That properly belongs to another tribunal—the public. Nor do I mean to suggest that the defendants have not acted with entire good faith; although I cannot but think they have acted under a mistake of the law. I strongly incline to the opinion, although I admit the case is not free from all difficulty, that it is my duty to order an injunction as to all the book of the defendant Davies, from the tenth to the nineteenth pages inclusive, and from the twenty-fifth to the thirty-fourth pages inclusive.

My only doubt has been whether, under all the circumstances of the case, I ought not to direct an issue to try the question of the violation of the copyright as was done in *Bramhall v. Holcomb*, 3 Mylne & C., 737. If such an issue were directed I should order it to be tried by a jury at the bar of this court, in the following form, and confined to that: the jury to find whether the defendant Davies, in his book entitled *First Lessons in Arithmetic*, stated in the case, in the pages thereof from the tenth to the nineteenth pages inclusive, and from the twenty-fifth to the thirty-fourth pages inclusive, and from the thirty-seventh to the forty-fourth pages inclusive, did use the work of the plaintiff entitled *The North American Arithmetic, Part First*, stated in the case, as a model, and copy or imitate the plan, arrangement, mode of illustration, and tables thereof, or whether the same pages of the work of the said Davies were prepared without knowledge or use of or reference to the said work of the plaintiff, and the coincidences therein arose from the use of common sources of information and common materials, open to both, and were accidental and undesigned. If the defendants shall elect the trial of such an issue, I shall be willing to grant it upon the terms that they pay the ordinary taxable costs of the suit to the plaintiff up to the present time, the expense of the printing of the record being divided between the plaintiff and the defendants; and the future costs to abide the result of the verdict and decree of the court.

In case such an issue shall be elected, no other evidence is to be laid before the jury except that contained in the record and the works therein referred to—with this qualification and enlargement, that the defendants shall be at liberty to offer evidence (if they choose) to show what were, in point of fact, the original sources and works to which the defendant Davies resorted, or which he used in compiling his work; and the plaintiff shall also be at liberty to offer evidence (if he chooses) that the defendant Davies had before, or in compiling his work, seen, known and used the plaintiff's work; and for this, and for no other purpose, the plaintiff shall be at liberty to require the defendant Davies to answer upon oath such written interrogatories as to his having seen, known or used the plaintiff's work before or in compiling his own work, as he shall be advised.

The defendants are to elect whether they will take an issue or not, on or before the 1st day of September.

WEBB v. POWERS.

(Circuit Court for Massachusetts: 2 Woodbury & Minot, 497-524. 1847.)

STATEMENT OF FACTS.—Plaintiffs claimed to be the owners by assignment of the copyright of a work called “Flora’s Interpreter,” prepared by Mrs. S. J. Hale. The work complained of, as an infringement of their copyright, was “The Flower Vase,” by Miss S. C. Edgerton. The answer denied plaintiffs’ title, the validity of their alleged copyright, or that defendants had infringed. The master, to whom a reference was made, found that there was no infringement.

§ 280. *Assignment of copyright. Validity as between the parties without recording.*

Opinion by WOODBURY, J.

Several objections are urged in this case against a recovery by the plaintiffs, which are formal rather than substantial. One is, that the assignments, under which they claim, do not appear to have been recorded. But they are still valid as between the parties, and as to all persons like the defendants, not claiming under the assignors. See cases in *Leland v. The Medora*, Mass. Dist., October, 1846, 2 Woodb. & Min., 92.

§ 281. *An allegation of citizenship not denied in the answer is taken to be true.*

Another is, that the plaintiffs are not proved to be citizens of the United States. But that being averred in the bill, and not denied by the answer, must be considered as admitted. There are some other objections which have either been removed by evidence, or probably may be; and hence, if the case can be decided on the merits, without delay and expense as to any formal objection, it will be better for both parties that this should be done.

§ 282. *A master’s report in chancery, though presumably correct, may be re-examined.*

Passing by, then, the other preliminary exceptions, how does this case stand on the merits? The report of the master is in favor of the defendants. From the care evinced in the examination and the high character of the gentleman who made it, much weight must be given to its conclusions. But the parties are entitled to a revision of it here, and, though the presumptions are in its favor at the outset of the examination, yet if it cannot stand the scrutiny to which it has been subjected in argument, and which the court is bound to bestow on it, the plaintiffs ought to succeed.

§ 283. *In some kinds of books, such as dictionaries, etc., the copying of small parts and other like similarities are tolerated.*

It may conduce to a more lucid exposition of the merits between these parties, as to the originality of their respective books, to ascertain first what each claims as novel or peculiar. Neither of the parties makes any pretense to be inventors of dictionaries of flowers. Whether arranging them alphabetically or scientifically, and whether describing and defining them in prose or poetry, according to their classes and orders, or their medical virtues, or the sentiments they are accustomed to inspire, and whether illustrated by engravings of them, or the opinions of those most experienced in the beautiful hues and figurative language of flowers,—all this had been done before the first of these publications. It had been done, too, not only abroad, but in this country, and more especially in the “Flora’s Dictionary,” published in Baltimore in 1830, and republished in 1831, with the reputation of having been compiled by Mrs.

Wirt. In the preface to the plaintiffs' book Mrs. Hale acknowledges her obligations to other writers on this subject, and more especially to the author of *Flora's Dictionary*, just described. And in the preface to the book of the defendants, Miss Edgerton also expresses her indebtedness to others who had labored in this garden before her, and especially to the "*Flora's Interpreter*" of the plaintiffs. Again, there is much discrimination to be used, in inquiries of this character, between different kinds of books, some of which, from their nature, cannot be expected to be entirely new. Thus, dictionaries of all descriptions when on like subjects, philological, lexicographical, professional or scientific, must contain many definitions and descriptions almost identical; as must gazetteers, grammars, maps, arithmetics, almanacs, concordances, cyclopædias, itineraries, guide books and similar publications. In these, if great errors have not previously existed, or unusual ignorance to be corrected, no great novelty is practicable or useful; unless it be to add new discoveries or inventions, new names, or words, or decisions, so as to post up the subject to more recent periods, or unless it be to abridge and omit details and condense a more voluminous work into a smaller and cheaper form, so as to bring its purchase and use within the reach of new and less wealthy classes in society. Some similarities and some use of prior works, even to copying of small parts, are in such cases tolerated, if the main design and execution are in reality novel or improved, and not a mere cover for important piracies from others. *Trusler v. Murray*, 1 East, 362, note; *Gray v. Russell*, 1 Story, 11 (§§ 129-33, *supra*); 12 Ves., 270; 16 id., 269; 17 id., 422.

What was there novel then in the combination and materials of the plaintiffs' book which the defendants have copied? Nothing in the arrangement, except that the "class and order and description of the flower" are placed on the same page with its name and interpretation, instead of being in notes at the end, as in the second edition of *Flora's Dictionary*. In the materials there is also a novelty in the special designation of the sentiment in the plaintiffs' book, which is not in *Flora's Dictionary*. But the defendants have not imitated that, and hence it becomes unimportant. All, then, which the defendants have copied in the arrangement which did not exist in other books than the plaintiffs', and to which the plaintiffs of course have no exclusive claim, is the mere transfer of the notes to the same page with the flower to which they relate,—a closer juxtaposition; and all in the materials of the plaintiffs which are original, and have been copied *verbatim*, are a few "poetic significations" or definitions, being about twenty in one hundred and forty-eight, and consisting of only one hundred and fifty-six words out of the whole volume. In three or four other instances some of the significations are varied in form slightly, but not in substance; and, in nineteen cases, parts of the descriptions of flowers, and their localities, in prose, are used by the defendants, which were employed by the plaintiffs. The defendants offered to prove, in explanation of this, that the plaintiffs had copied in this way still more extensively from others; and it is difficult to conceive of different works, describing the appearance and locality of the same plants, not using like language, and often in some particulars the same, if the plant or flower has been long known; and the notices of them are as in these cases very brief, being embodied frequently in a single line.

§ 284. *Rights of compilers of old materials.*

In compiling dictionaries of all kinds, gazetteers and similar works, the materials of all must, to a considerable extent, be the same, and to such an

extent are allowable; and the novelty or improvement, as before remarked, can be substantial in scarcely any case, unless the matter is usefully abridged in bulk and price, or a material change is made in arrangement, or more modern information is added in valuable quantities, or important errors are corrected, or important omissions are supplied. While, on the one hand, a prior compiler is not permitted to monopolize what was not original in himself, and what must be nearly identical in all such works on a like subject, yet he who uses it subsequently to another must not employ so much of the prior arrangement and materials as to show that the last work is a substantial invasion on the other, and is not characterized by enough new or improved to indicate new toil and talent, and new property and rights in the last compiler. That is the cardinal distinction.

Thus a material addition is made to a common dictionary which shall, like Webster's, add definitions of a large number of words before omitted; or quotations from the authors who have employed the words in the sense adopted, like Johnson's; or rules for the proper pronunciation of each word, like Walker's; or the roots from which the word has been derived, like several others. And no one would complain of a new dictionary as an infringement on former ones if it contained any of these important additions, and had not in other respects servilely copied but a few definitions of old words from any one former author. Now, was the defendants' book of this character or otherwise? A little further scrutiny into this case will show whether the change here by the defendants was real or only colorable. They followed, to be sure, the arrangement of the plaintiffs, but that arrangement was not novel with them, except putting on the same page one part of the account of the flowers which before had been placed in notes at the end. This could hardly be deemed of sufficient importance to justify a prosecution, unless connected with other infringements as to materials and design, or unless this was a change more essential in some other respects than a mere transfer of similar matter from one page to another. But of this more hereafter. Besides this, however, it is contended that the defendant has copied materials, and design also, to such an extent as to be convicted of a substantial infringement.

§ 285. *Leading inquiry in this case on the question of infringement.*

The leading inquiry then arises, which is decisive of the general equities between these parties, whether the book of the defendants, taken as a whole, is substantially a copy of the plaintiffs'? whether it has virtually the same plan and character throughout, and is intended to supersede the other in the market with the same class of readers and purchasers, by introducing no considerable new matter, or little or nothing new, except colorable deviations?

We have already stated the quantity of materials literally copied, amounting to only about one hundred and fifty-six words. Perhaps half as many more may be considered substantial uses of the plaintiffs' book. But what are the differences? numerous or not? essential or trivial? To illustrate the differences in these two works, in order to see whether they are substantial or otherwise, it will be necessary to compare first their prefaces. They of course profess to relate to like subjects, as do all modern Floras of this character, and must therefore, as before remarked, contain something of the same matter. But do they really and materially in any respects differ? Their claims and pretensions, in the prefaces, are certainly not the same. The book of the plaintiffs claims merely some novelty in its arrangement, and the use of American poetry to illustrate what is there called the sentiment of flowers. The

novelty in arrangement, as before shown, does exist, but is very trifling so far as regards anything imitated by the defendants. But there was another novelty, perhaps more material, which was not imitated by them, in giving first some European or anonymous poetry on the signification of each flower, and then separately some remarks by American authors, illustrative of the sentiment inspired by each flower. This last, and this substitution of American sentiments and authors for foreign ones, seem to me to constitute the great novelty and attraction of the plaintiffs' book, in its matter, over others on this subject, which had preceded it. In this way quotations are introduced from sixty to seventy different American poets, and twenty to forty pieces from some of them, besides the many beautiful extracts given from foreign poets under the other head of illustrating the "signification of flowers." In this way the authoress of the plaintiffs' book was original, in these important particulars, but not in giving a poetical language to flowers, or discussing a sentiment in them, a symbol of affection, as these had existed here before and in Europe, and in the East for ages, if not since Paradise. This authoress also attempted to unite some botanical instruction with poetry; but that was not a new union or combination, nor did she, however highly gifted and favorably known, in other respects, pretend to furnish any scientific information beyond what is contained in Linnæus, Jussieu, Eaton and other botanists, nor even to emulate Darwin's "Loves of the Plants."

On the other hand, what novelty did the authoress of the defendants' book aim at? the same? or none? She claimed none in the arrangement, and that of other writers on flowers, and that especially in the plaintiffs' book, where original, was in some degree followed, as before shown, in transposing notes from the end to the page to which they apply. But even in arrangement the last was not like the plaintiffs' in a few important particulars. There is not one piece of poetry cited to show the signification, and another piece to show the sentiment, as in the plaintiffs', but generally only a single piece for each flower, and that to illustrate merely what she calls the sentiment. But in materials, the defendants' book furnishes, and professes to furnish, a striking difference. The poetry, instead of being quoted from American authors of celebrity, like the plaintiffs', claims to be chiefly original by Miss Edgerton herself, and her title to it is not denied in the answer or the argument. The substance, the staple of the book, is then truly original, and not colorably so; as much as if she had undertaken to publish a volume of poetry, chiefly original, on the subject of flowers.

Again, Mrs. Hale's book, belonging to the plaintiffs, is one in several respects of higher and more ambitious pretensions than the defendants'; pretensions, too, well sustained. It is an octavo volume. It consists of some two hundred and twenty-four pages. It has two colored engravings; has a double index, one to the flowers and one to their interpretations, and double pieces of poetry to each flower, usually extracted for one purpose from distinguished foreign poets, and for the other from distinguished Americans; and has five pages of instruction and explanations in botanical science as an introduction; and has been sold per copy at \$1 or \$1.25. While, on the other hand, the defendants, in the preface, claim only the merit of a book on the subject much less expensive, and chiefly original in all its poetry instead of extracts from eminent writers; and it is only a small duodecimo instead of an octavo, with but one hundred and fifty-one pages of that reduced size instead of two hundred and twenty-four, and of larger size; and it has no scientific intro-

duction on botany, has no plates or engravings, and only one index to the flowers; has no double illustrations of the signification and sentiments, and sells for merely twenty-five cents a copy, or less than one-fourth of the price of the other.

On a computation it will be found that the plaintiffs' book is on so different a scale as to contain near three times more matter than the defendants', besides being so different in the substance and originality of it; and that it illustrates many more flowers, being two hundred and thirty, while the defendants' illustrates only one hundred and forty-eight. The stock used in each per volume differs in a still greater ratio; and in the defendants', from its smaller type as well as less matter, is probably not one-fourth of that in the plaintiffs'.

For a further illustration, using their own favorite language and symbols, both of these works are flowers, and not destitute of charms; but one is more like the magnolia grandiflora or japonica in size and attraction, and the other like the wayside violet or anemone. They both come from females, with loveliness peculiar to their sex, but they still essentially differ; as one develops matronly experience and more ripened graces, while the other is just opening her buds and blossoms.

It will thus be seen that the book of the defendants is much less complete and useful than that of the plaintiffs; is suited for a different and humbler class of readers; and would, in truth, be little more than an abridgment if its poetry was not chiefly original and some of its other features so different. See the case of Johnson's *Rasselas*, in *Dodsley v. Kinnersley*, Amb., 403; *Bell v. Walker*, 1 Bro. Ch. C., 451; *Godson on Pat.*, 339.

Considering then its form and substance, its design and use, my mind strongly inclines to the conclusion that the aim of Miss Edgerton in preparing the defendants' book was in truth what she describes it to be in her preface—to furnish original poetry on the sentiment of flowers, and to do it in such a form as to be much less expensive, and to circulate in hands which could not so well afford to purchase the existing and larger and more expensive treatises on that subject. In effecting this object she did not aspire to novelty in arrangement or discoveries in science as to botany, but in some respects copied from others, and among them from Mrs. Hale, as she had a right to do in some degree and to some extent, if it was not her main design to compile a like treatise with only colorable but not real differences. The copying of errors or mistakes in such cases is therefore not unusual, and only shows the fact more clearly of the actual copying in those particulars, but cannot affect the question whether they are enough in quantity and value to characterize the whole work or its main design to be a piracy. 12 Ves., 270; 17 id., 422; 1 East, 363; *Mawman v. Tegg*, 2 Russ., 385. That depends on other considerations.

Believing then the main design in the defendants' book to have been different in important respects from that of the plaintiffs', in regard to the production and publication of original rather than extracted poetry to illustrate the sentiment of flowers, and in several things varying in material details from the plaintiffs', with a view to make it less expensive and to circulate among a different class of readers rather than be a substitute with the same class, I see in this no infringement on the copyright of the plaintiffs, and do not consider this design and the execution of it to be void, because in carrying it out a use is made in its botanical descriptions of former works to some extent and their arrangements in part copied. *Wilkins v. Aiken*, 17 Ves., 422; *Godson on Patents*, 215; *Cary v. Kearsley*, 4 Es. C., 168.

More especially the plaintiffs cannot complain of this, when they have done the same as extensively in respect to others. The nature and value of the parts copied, being chiefly definitions and descriptive epithets, indicate no appropriation of much mental toil in others, any more than does the small quantity. White flowers must in all such books be described as "white," and red as of a "red hue," and those from India as belonging to the East; and it is so in like cases and of like character in several of the similarities here. 3 Mylne & Cr., 740; 4 Es. C., 168. They could not be described in any other way if described naturally and truly. But when these copyings or close resemblances have gone further, and beside the few lines of description and the few parts of others have encroached on one feature in the arrangement, new or peculiar in the plaintiffs' book, they do, thus combined, probably constitute a legal infringement of their copyright; but they hardly seem to furnish a sufficient ground for the extraordinary interposition of this court by a permanent injunction. I say, both combined; for in a work of this character, partaking so much of the nature of a dictionary, these copies of definitions, so few and unimportant in number and value compared with the whole work, are not, independent of following the plaintiffs' plan, to be regarded as a violation of the plaintiffs' copyright when the main design is of a new and different character. They are nothing compared with what is ordinary and almost inevitable in all new works on such a subject. Nothing compared with what is usual in reviews of a work, and is there allowable as being neither a rival nor substitute. *Bramwell v. Halcomb*, 3 Mylne & Cr., 738.

§ 286. *As to abridgments.*

Nothing improper in an abridgment. If the leading design is truly to abridge and cheapen the price, and that by mental labor is faithfully done, it is no ground for prosecution by the owner of a copyright of the principal work. *Godson on Pat.*, 238; 1 Story, R., 19. But it is otherwise, if the abridgment or similar work be colorable and a mere substitute. *Butterworth v. Robinson*, 5 Ves., 709.

One test of this is the quantity and value of the matter extracted. In 1 Camp. N. P., 97, a case is stated of seventy-five pages copied out of one hundred and eighteen. In 2 Rus., 388, the close imitation of copying was twenty pages out of forty-eight, or nearly one-half, and hence vitiated the work. 11 Lew., 31. And in 1 East, 363, twenty pages were copied *literatim et verbatim*. Here it is but parts of twenty or thirty lines out of near seven thousand. The former, so great a quantity, indicates theft, *animus furandi*. The latter, so small a quantity, indicates rather illustration, and comports with the preface acknowledging aid from the plaintiffs' work, but having some different and material purposes to accomplish, and not being a mere substitute with no essential changes. *Godson on Pat.*, 216; *Eden on Injunction*, 381, n.; *Roworth v. Wilkes*, 1 Camp. N. P., 97; 2 Kent's C., 382; 8 Ves., 225. Where nine-tenths were copied an injunction was clearly proper (1 East, 358), but not where only one-tenth was copied. *Ambler*, 403. See, also, *Folsom v. Marsh*, 2 Story, 100 (§§ 249-56, *supra*). Or, as here, not one two-hundredth.

§ 287. *Where the novelty in the arrangement of complainant's book has been copied, though only in part, an injunction will issue as against such part. But if the matter cannot be easily separated, the party will be left to his action at law.*

But the aspect of this case becomes somewhat different and more favorable to the complainant when we add to this the other circumstance that a small

part of the novelty in the arrangement has been imitated. Though small in value, such an imitation or appropriation of another's invention may be actionable; and the subject of an injunction, perhaps, if easily separated from the rest of the book. *Emerson v. Davies*, 3 Story, R., 768 (§§ 270-79, *supra*); *Lewis v. Fullarton*, 2 Beav., 6; *Barfield v. Nicholson*, 1 Sim. & Stuart, 1, 6; 16 Ves., 270; *Wilkins v. Aikin*, 17 Ves., 424; *Stockdale's Case*, 12 Ves., 270; *Gray v. Russell*, 1 Story, R., 11 (§§ 129-33, *supra*).

But it is doubtful whether this small transfer of matter to a new place is sufficient alone to sustain a copyright without some new and additional materials; and more doubtful still whether an injunction ought to issue, when the whole is pervaded or leavened by it, and the whole destroyed on account of it, rather than damages given only to the extent or value of the encroachment. But here the adoption of the new feature in the arrangement, however small it be, pervades the whole work, and no permanent injunction can issue against it without destroying the whole work as now compiled.

I think, therefore, that such a remedy, applied to a case situated like this, would be disproportionate, unsuited to the case, and hence unjust. Whatever damages the plaintiffs have thus sustained may, however, be obtained by a suit at law, without destroying the whole work; and that is therefore the more equitable relief in a state of facts like these. *Drewry on Inj.*, 199; *Bell v. Whitehead*, 17 Law Journal, 441; 9 *id.*, 323; 1 East, 385.

On the contrary, where the violation is clear, and the part copied can readily be separated, then an injunction is usually proper against that part. *London Lat. Comp. v. Bedells*, *Webster on Patents*, 140; 13 Rep. of Arts, 167; *Emerson v. Davies*, 3 Story, 768 (§§ 270-279, *supra*). So, where a party wilfully mixes or interweaves the property of another with his own with a bad motive, and so as not to be easily separated, he may be required at times to lose the whole. 2 Russ., 385; 2 Bro. Ch. C., 85. But here the motive does not seem to have been culpable, the plan cannot be separated from the work, and the plaintiffs can obtain ample redress at law in damages without destroying the whole.

Both parties have relied upon the opinion of the district judge in this case, being in their favor, when refusing a temporary injunction, but ordering an account of sales to be kept and the plates not sold. He thought more light would be flung on the case at the final hearing by the testimony of Miss Edgerton being particular as to the extent she used and meant to use the plaintiffs' book. But neither party has asked leave to offer it, and the inclination of his mind seems to have been that the part of the arrangement claimed to be original by the plaintiffs, and followed by the defendants, was hardly sufficient to justify an injunction. A novelty in arrangement, especially so trifling as this, without any new material connected with it, seemed to him, and still seems to him to be, of questionable sufficiency to be protected by a copyright.

The master seemed to be of the same opinion on the ground *de minimis non curat lex*. Slight changes, like the use of chapters and verses, where none existed before, as some hundreds of years ago in the Bible, or the introduction of punctuation, which is said not now to exist generally in acts of parliament, or the use of sections instead of pages, which in modern times is reviving only an ancient practice, would all have higher claims to novelty and usefulness than merely transferring the same material from one page at the end to another in the central part of a book, as here.

Some machines have been changed merely by inverting their position; but they are not deemed entitled to protection. But, however this may be suffi-

cient or not to claim legal protection (and I am inclined to think it is), my opinion, as before intimated, is that the use of it should not be enjoined against, when it runs through the whole book, and cannot be separated from the rest. It would generally be equitable and just to let the party, under such circumstances, seek redress for it by damages in a suit at law. It is not a suitable case for the exercise of a peremptory injunction, which is chiefly to aid legal rights, and in cases of copyrights runs against specific parts copied. It is usually done to work substantial justice between the parties rather than destroy the whole book of the defendants, for the small infringement in the arrangement, if otherwise it was novel and unexceptionable and useful to the community. See cases where a part may be enjoined against: 17 Ves., 422; 11 Sim., 31; 2 Russ., 385; 3 Mylne & Cr., 737.

This conclusion renders it unnecessary to decide on the point how far the conduct of the plaintiffs, in the purchase and sale of the work of the defendants, and in some delay to prosecute, should bar this application, though redress might perhaps be still had at law. On this, see Eden on Inj., 207; 7 Ves., 1; 19 id., 447; 3 Mylne & Cr., 711; *Rundell v. Murray*, Jacobs, 311; *Lewis v. Chapman*, 3 Vern., 133; 8 Ves., 224, n. And for the same reason the motion by the defendants to file a supplemental answer, in order to allege that matter more specifically, need not be acted on. On the necessity for this, see 2 Daniel's Ch. P., 814; 3 Story, R., 456, 700. Delay in this bill is also urged against it; but length of time so as to bar, by any statute of limitation, must be pleaded. 19 Ves., 447; 2 Jacobs, 311; cases cited in *Hunter v. Marlborough*, 2 Woodb. & M., 168; *Taylor v. Benham*, 5 How., 233. And if to bar, independent of the statute, a change of circumstances and injury by the delay must appear.

Another point made was the master's refusal to go into an inquiry as to the extent of colorable imitations. Though in the master's situation I should have been disposed to make the inquiry, there was some ground for his refusal, after the hearing was over, it not having been pressed before. It is pretty decisive, however, that such instances were not frequent, or they would earlier have been suggested, or could more readily be pointed out. And there is no pretense that they can exist in the great mass of the defendants' book, as it professes to be original matter, and no exception has been made that it is not truly original.

The intent not to be guilty of piracy, which has likewise been referred to in the argument, would not be material, if much had actually been copied, and the new work was a mere substitute. But if this be doubtful, the intent not to pilfer from another, colorably or otherwise, for the substantial portions of the new work, may be important. In fine, as, from all the evidence in this case, it seems quite clear that the main intent was to make a much cheaper work, and one with original poetry, rather than colorably to republish the plaintiffs' or any similar book, I think the prayer for an injunction must be refused.

FARMER *v.* CALVERT LITHOGRAPHING, ENGRAVING & PUBLISHING COMPANY.

(Circuit Court for Michigan: 1 Flippin, 228-241. 1872.)

Bill to enjoin infringement of copyright and for an account. Motion to dissolve injunction. The facts are stated in the opinion.

§ 288. *Where an injunction has been granted by consent, upon motion to dissolve nothing will be considered but the questions raised by the answer.*

Opinion by LONGYEAR, J.

The preliminary injunction in this case having been issued upon the bill of complaint, by consent the court, in the absence of any pretense of fraud or mistake in the obtaining or giving of the consent, will not, upon the motion to dissolve, consider any questions arising upon the bill alone, or the complainant's right to bring the suit; the parties, the subject-matter, and the writ, appearing as they do to be within the jurisdiction of the court. 16 Statutes at Large, 215, sec. 106. The motion seems in fact to be based upon this idea, it being founded expressly upon the answer and accompanying affidavit. The complainant may, as was argued, have inserted in his bill prayers for specific relief to which he is not entitled in a court of equity. But with that we have nothing to do here, although it is a proper matter for consideration upon the final hearing. The only question now is whether the injunction shall be continued until final hearing and decree. The right of the complainant to have the injunction issue upon the case as made by his bill having been, as we have seen, conceded, the motion to dissolve must be considered solely upon the questions raised by the answer.

On the hearing of the motion, complainant's counsel offered to read affidavits for the purpose of rebutting certain averments of the answer as to complainant's title. Defendant's counsel objected. The court allowed the affidavits to be read subject to the objection, to be finally received or rejected as the court should decide.

The question of the reception of affidavits on motion for or to dissolve an injunction in copyright cases, for the purpose of rebutting averments in the answer as to complainant's title, has undergone much discussion in the courts. In England it seems to be well settled that such affidavits will not be received, the complainant being left to depend upon the affidavits filed with his bill so far as the question of title is concerned. *Norway v. Roe*, 14 Ves. Jr., 144, 151, 156, and cases there cited; *Platt v. Button*, id., 447. In the United States, although a practice seems to have grown up in some localities to receive such affidavits, yet whenever the question has been raised and adjudicated the decisions of the courts, with scarcely an exception, seem to have been quite to the contrary, and in conformity with the English practice.

§ 289. *Affidavits in rebuttal of answer cannot be allowed on motion to dissolve.*

Counsel referred the court to numerous authorities on the question of allowing complainant to read affidavits in rebuttal of the answer in injunction cases generally (see cases cited in Hilliard on Injunctions, at page 107), but they failed to refer the court to any authority or adjudicated case upon this particular question of allowing such affidavits to be read after answer, in support of complainant's title, with perhaps the single exception of the case of *Poor v. Carleton*, 3 Sumn., 70 (EQUITY, §§ 1679-85), which upon the face of it appears to be exceptional. With the limited time I have had to spare amidst the discharge of other duties, I have been able to find but few decisions in this country upon the point.

Justice Grier, in 1850, in a patent case (*Parker v. Sears*, 1 Fish. Pat. Cas., 94), held that the United States circuit courts were bound to follow the settled rules of practice of the English courts of equity in this respect (there being no written rule of court to the contrary), and refused to allow such affidavits

to be read. In 1868, in another case (*Goodyear v. Mullee*, 3 Fish. Pat. Cas., 420), the same learned judge allowed affidavits by way of rebuttal to be read, but they in no manner related to the question of title.

In the case of the *United States v. Parrott*, 1 McAl., 271, 275, 276, the United States circuit court for California, McAllister, J., after an able review and full consideration of the authorities, English and American, including the case of *Poor v. Carleton*, *supra*, held that affidavits as to the title after answer could not be read on a motion for injunction to stay waste.

In *Brooks v. Bicknell*, 3 McL., 250, 255, Justice McLean quotes approvingly the language of the court in *Morphett v. Jones*, 19 Ves., 350, where it is said: "There are many cases of injunction where you may reply to the answer by affidavits, not on the question of title, but on mere facts, as in the instance of waste. On such questions of fact, though not on the title, affidavits in reply to the answer may be read." The learned judge then quotes from 1 Smith's Ch. Pr., where it is said: "If the plaintiff, instead of applying for the injunction upon affidavit, waits until the defendant has answered, he must rest his case upon the disclosures made by the answer, and he is not entitled, either for the purpose of obtaining or continuing an injunction, to read affidavits in support of his motion in opposition to the answer," and says: "But cases of waste, or of mischief analogous to waste, are an exception to this rule where the affidavits do not refer to title." That was a patent case, and, as the affidavits did not refer to title, they were allowed to be read.

§ 290. *Affidavits may be heard on the question of infringement.*

The current of authority seems to be all one way, and opposed to the reception of the affidavits. So far, therefore, as the affidavits offered refer to complainant's title, they must be rejected. They are received, however, and will be used so far as they bear upon the question of infringement. The motion to dissolve the injunction must, therefore, be decided upon the answer and accompanying affidavit, so far as questions relating to complainant's title are concerned.

§ 291. *Action at law not necessary to authorize relief in equity.*

There is a demurrer, by way of answer, to the bill as an injunction bill, which must be first disposed of. It is claimed that complainant is not entitled to an injunction for the reason that it does not appear by the bill that he has settled his right at law, and obtained a verdict of a jury in his favor touching the alleged infringement. Such, no doubt, was formerly the law, and now, in some cases, the court will, no doubt, require that to be done. But it is now well settled that both the right and the infringement may be set up and adjudicated in a court of equity without having been first determined at law. Phillips on Patents, chapters 20 to 24; Hill. on Inj., 391, 392; 2 Story's Eq., pp. 246-248; *Stevens v. Gladding*, 17 How., 447 (§§ 387-89, *infra*); *Motte v. Bennett*, 3 Fish. Pat. Cases, 642; *Ogle v. Ege*, 4 Wash., 584.

Suffice it to say, that under the authorities, and aside from the fact that the injunction was issued by consent, the present case is one in which the court will not send the parties to a court of law before proceeding to adjudicate upon the plaintiff's right to an injunction.

§ 292. *Waiver of penalties not necessary in bill for infringement. Omission of such waiver not good ground for demurrer.*

Another ground of demurrer is that the bill does not waive the forfeiture of the printed copies of defendant's map, and the penalty of \$1 for each copy, as provided by statute in such cases, but on the contrary prays that such for-

feiture and penalty may be inflicted in addition to the relief by injunction and an accounting for profits. The proposition here is, that equity will not grant its assistance by way of injunction and an accounting as to the profits, unless complainant, as a condition of his prayer for such assistance, shall expressly waive the forfeitures and penalty. No reason, based upon principle, is advanced in support of the proposition, neither can I see that any exists. It is claimed, however, that the proposition is supported by authority, and several English cases are cited. Some of the cases by their looseness of expression and generality of statement would seem to do so, especially the case of *Colburn v. Simms*, 2 Hare, 554. But it will be found upon scrutiny that the cases cited are all based upon the decision in the leading case upon this question of *Brand v. Cumming*, cited 22 Vin. Abr., 315, and that the rule deducible from them all goes to the following extent, and no further, viz.: That equity will not compel a discovery by a defendant when such discovery would subject him to forfeitures or penalties, unless such forfeitures or penalties are expressly waived by the bill; *provided*, the defendant takes the objection by demurrer to such discovery, or declines in his answer to make such discovery on that ground. *Brand v. Cumming*, 22 Vin. Abr., 315; *Williams v. Farrington*, 3 Brown's Ch., 38; *Mason v. Murray*, cited in last case, at page 40.

The defendant cannot submit to answer as to the discovery prayed, and at the same time insist upon the objection. In this case he has so submitted to answer. The objection, therefore, comes too late. The further objection that the statutory forfeitures and penalty can be enforced only at law does not concern the present motion, although it will be a proper matter for consideration in another stage of the case.

This brings us directly to the merits of the question upon the bill and answer. The question is, as has been already remarked, does the answer so far disprove the case made by the bill as to entitle the defendant to a dissolution of the injunction?

§ 293. *Denials or allegations on information and belief are not sufficient to dissolve an injunction.*

1st. As to complainant's title. This is set up in the bill with great particularity, and an undisturbed use and enjoyment of the same for a long period of time by complainant and those under whom he claims is alleged. The answer in the first paragraph ignores complainant's proprietorship of the copyrights of the twelve maps, as set up in the bill, and proceeds as follows: "But defendant says, as hereinafter particularly alleged, that complainant and his transferrers were never of right entitled to any such copyrights, and that the same, if existing, are null and void." What is referred to "as hereinafter particularly alleged" is found in paragraphs 50 and 51 of the answer, and consists in allegations wholly on information and belief, to the effect that complainant's maps were not themselves original, but were copies or piracies of the work and labors of other persons. The only other allegation or denial contained in the answer affecting complainant's title or right is the sixteenth paragraph, and is wholly on information and belief.

It is seen, therefore, that all the allegations and denials of the answer in any manner affecting complainant's title or right are founded on information and belief merely; and none of them are supported by affidavits of persons having any knowledge of the facts thus alleged. Denials and allegations merely on information and belief are not sufficient to entitle the defendant to a dissolution of an injunction. They must be upon personal knowledge or

supported by the affidavit of some person or persons having personal knowledge. *Poor v. Carleton*, 3 Sumn., 70, 78 (EQUITY, §§ 1679-85); *Nelson v. Robinson*, Hemp., 464; *United States v. Samperyac*, id., 118; *Conover v. Mers*, 3 Fish. Pat. Cas., 386.

For the purposes of this motion, therefore, the title of complainant must stand as set up in his bill.

2d. As to infringement. The bill sets up copyrights of twelve different maps, and contains a general charge of infringement of them all, and especially of the first six; and also special charges of infringement as to certain of the maps, particularly the first, second and fourth. The map first set up, and with which we have principally to do so far as this motion is concerned, is a map of Wisconsin, embracing parts of Illinois, Michigan and Minnesota, alleged to have been made and published in 1865, and to have been entered for copyright May 11th of the same year. Of this map, it is alleged in an amendment to the bill, editions were published and dated in the years 1866 and 1867. Copies of the said alleged edition of 1867, and of two others of complainant's maps, and of the defendant's map, alleged to be an infringement of the same, are filed with the bill as exhibits.

The answer, in general terms, denies the general charge, and also the special charges of infringement, but admits the taking of the boundaries of all the towns in Wisconsin, containing more than thirty-six square miles, from the complainant's map of 1867.

In addition to what is stated above, the bill contains voluminous references to instances of similarity and identity, gathered from examinations and comparisons, such as errors in complainant's maps, peculiarities of spelling and location of names, etc., as evidence of infringement; and the answer contains equally voluminous statements by way of explanation and avoidance of the same. These are merely matters of evidence. They were as fully before the court by means of the maps made exhibits as they could be by any statements in the bill, and, being made matters of evidence, the statement of them in the bill was not only unnecessary, but in violation of a well settled rule of equity pleading. See *Story's Equity Pleadings*, §§ 28, 252, note 1 to § 265a, and § 266. When it is necessary to bring such matters before the court for the purpose of moving for or of sustaining an injunction, or it is deemed important to call the attention of the court to them in some authentic form, it should be done by affidavit and not by allegations in the bill.

I allude to this subject in this connection, not so much because it is to materially affect the question now under consideration (the defendant having submitted to answer), but to call attention to the pernicious and growing practice of stuffing and overloading pleadings in equity with superfluous allegations and redundant and unnecessary statements; and also, as it is expressed in one of the ordinances of the English court of chancery, "to the end, the ancient brevity and succinctness of bills and other pleadings may be restored and observed."

§ 294. *New editions of maps are included in copyright acts of congress.*

In order to avoid the effect of the admission in the answer of the taking by defendant in the preparation of its map of certain township boundaries from complainant's map of 1867, it is contended, on behalf of defendant, that the said map of 1867 is not covered by the copyright of the map of 1865, as being a new edition thereof, because: 1. The copyright laws of the United States contemplate and cover new editions of books only, and not of maps. Section

4 of the supplemental act of March 3, 1865 (13 Stat. at Large, 540), is referred to in support of this proposition. But that section is definitive merely of the word "book" as used in the act, and in no manner affects maps or any subject of copyright other than books, affirmatively or negatively. It will be seen, however, by an examination of section 5 of the act of February 3, 1831 (4 Stat. at Large, 437), in force at the time, and section 97 of the act of July 8, 1870 (16 Stat. at Large, 214), now in force, that subsequent editions of maps, as well as books, were then, and continue to be, clearly contemplated. 2. It is also contended that the map of 1867 is not entitled to the protection of the copyright of the map of 1865 as a new edition, because it differs from the latter materially in respect to its title, and also in numerous additions and alterations. The title of the map of 1865, as set up in the bill, and that of the map of 1867, as printed upon its face, are identical, so far as they are descriptive of the map. Appended to the descriptive statement are the following words and figures: "Published by S. Farmer & Co., Detroit and Milwaukee, 1865," the figures "1865" being changed to "1867" on the map of that date, and this is the only difference alleged or that can be found in relation to the title. The clause quoted, and in which the difference of date occurs, is no part of the description of the map, and is entirely unnecessary to an understanding of that to which the title relates, and I think it constitutes no part of the title. It could not truthfully constitute a part of the title for the purpose of copyright, because by express enactment the title was, as it still is, required to be entered and recorded before publication. 4 Stat. at Large, 437, sec. 4; 16 id., 213, sec. 90. All that is required in connection with the fact of publication is the depositing of a copy or copies within certain specified times after publication. 4 Stat. at Large, 437, sec. 4; 16 id., 213, sec. 90. There is no time prescribed within which actual publication shall commence. That is left entirely to the option of the proprietor. The map of 1867 has, moreover, printed upon its face in a prominent position, and in plain type, the notice of entry for copyright required by law, showing clearly and plainly that the date of such entry was in the year 1865. I think this sufficiently indicated that the map of 1867 was intended for the map, or an edition of the map, which had been so entered as specified in the notice, so that the date at the bottom of the title, even if it could be considered a part of the title, would, in the light of the notice, indicate to any person of ordinary comprehension a map, or an edition of a map, which had been copyrighted in 1865 and published in 1867. This case is very different from the cases cited by defendant's counsel (*Baker v. Taylor*, 2 Blatch., 82; *King v. Force*, 2 Cr. C. C., 208), in which there had been an omission or erroneous statement of the year in which the copyright was obtained, in the notice; also from the English case cited by him (*Mathieson v. Harrod*, Eng. Ch., 1868, 1 Ch. Leg. N., 99), which arose under an English statute very different from ours, requiring the date of the first publication to be given. Those cases, therefore, have no application. As to the alterations and additions alleged in the answer to have been made to the map of 1865 in the map of 1867, there are none specified except as to the railroad system of Wisconsin, and that is not alleged except inferentially, at least, by reference to the map itself. The edition of 1865, not having been made an exhibit, and not being before me, I am unable to determine whether any and what alterations and additions were made, and, of course, whether such alterations and additions are of such a character in kind and extent as to make the map of 1867 an original map, and

so deprive it of the protection of the copyright of the map of 1865. This can be determined only after the proofs are all in. For the purposes of this motion, the map of 1867 must be deemed an edition of that of 1865, as alleged in the bill, and therefore protected by the copyright of the latter. 3. It is also contended that the notice of copyright is bad, because it describes the court in which the entry was made as "the district court for the eastern district of Michigan," instead of "the district court of the United States for," etc., as is the true title of the court. Suffice it to say that the statute prescribes the form of the notice (4 Stat. at Large, 437, sec. 5), and the notice in this case is in the exact form so prescribed. It must, therefore, be deemed sufficient.

§ 295. *Rights of a compiler, as in case of maps, etc.*

The courts, in the interest of learning and science, have at all times and in all countries recognized the right of subsequent authors, compilers and publishers to use the works of others to a certain extent, but the great difficulty has always been, and always must be, to determine where such use ceases to be legitimate, and becomes an invasion of the rights of others. The difficulty is greatest in cases of maps and the like, in which there is not, and cannot be, any originality in the facts or materials of which they are composed, and which facts and materials are equally open to all. The following rule laid down by Mr. Copinger — Copinger's Law of Copyright, 91 — comes as near to defining this right as anything I have been able to find or can invent. He says: "The rule appears now to be settled that the compiler of a work in which absolute originality is of necessity excluded is entitled, without exposing himself to a charge of piracy, to make use of preceding works upon the subject, where he bestows such mental labor upon what he has taken, and subjects it to such revision and correction, as to produce an original result; *provided*, that he does not deny the use made of such preceding works, and the alterations are not merely colorable."

To apply this rule to the present case: What mental labor did the defendant bestow upon those portions of the complainant's map, admitted to have been taken in the preparation of its own, viz.: the boundaries of the larger townships of Wisconsin? None whatever beyond the mere mechanical operation of reducing them from the larger scale of complainant's to the smaller scale of defendant's map. Neither does it appear that there was any revision whatever to ascertain if there were errors which needed correction, or for any other purpose. There is, in fact, nothing whatever to bring the case within the rule. So far as those boundaries are concerned, it is clearly a case of naked piracy.

§ 296. *Taking boundaries of townships from another map is an infringement of copyright.*

But it is contended that boundaries of townships are not a legitimate subject of copyright — that they are fixed and defined by statute law, and that the marking of them down upon paper is but a transcription in another form of the legal enactment. What is claimed in this regard is true in regard to all original materials from which maps are made, and that is that none of them are subjects of copyright — they are open to all. But no one has the right to avail himself of the enterprise, labor and expense of another in the ascertainment of those materials, and the combining and arrangement of them, and the representing them on paper. The defendant, no doubt, had the right to go to the common source of information, and having ascertained those boundaries,

to have drawn them upon its map, notwithstanding that in this respect it would have been precisely like complainant's map (which of course it would have been if they were both correct). But he had no right to avail himself of this very labor on the part of complainant in order to avoid it himself. As appears by complainant's affidavit, these boundaries were fixed by the boards of supervisors of the respective counties, and not by legislative enactment, thus showing that the labor must have been much greater than it would have been if such boundaries could have been ascertained from the statutes of the state.

§ 297. *Courts look at the value of the matter taken rather than at the quantity.*

It is said the court looks at value more than quantity in these cases, and that in this case the value of what was taken is so small in comparison with the whole that the court will disregard it. The rule of law is correctly stated; but how is it as to the fact? The townships of which the boundaries are admitted to have been taken comprise nearly, if not quite, one-half of the state of Wisconsin. Most of the smaller townships of the state, those comprising no more than thirty-six square miles, are rectangular — nearly all of them square — in form, and therefore easily projected on a map, while the townships in question are nearly all irregular in form, and therefore more difficult to represent correctly on paper, requiring more and a higher degree of mental labor and skill in the operation. Neither can it be said that this portion of the map is of less value because it represented the unsettled, or but sparsely settled, portions of the state. There might be some force in the suggestion if the region in question were a desert waste, uninhabited and uninhabitable, and valueless and unsought after for any purpose whatever. But here the facts are directly the opposite. These lands are among the most valuable in the state for agricultural purposes, for timber, and to some extent for minerals; are largely sought after for actual settlement and for speculation, and are rapidly filling up with a fixed and permanent population. It is to maps that persons desiring to settle or invest go to a very large extent for information as to locality, topography, markets, railroads, etc., and it certainly cannot be said that the part of a map representing this portion of the state is insignificant or of little value; nor, in my opinion, is it of any less value than that part of the map representing the settled portions of the state.

From these views it results that the injunction ought to be continued to the hearing without the necessity of entering into a particular consideration of other evidences of piracy gathered from a comparison of defendant's map with those of complainant, which were laid before me at the hearing. It must not be inferred from this, however, that that branch of the case has not received full consideration at my hands. Suffice it to say, that upon a careful and critical examination and comparison, I find evidence — some of which it has been attempted in the answer to explain and avoid, with what degree of success it is unnecessary to consider here, and all of which is open to such explanation as the defendant may hereafter offer — which strongly confirms me in the belief that defendant's piracy of complainant's copyrights extends far beyond what is admitted in the answer, thus placing it beyond all doubt, in my mind, that justice requires that the injunction should be continued to the hearing. The motion to dissolve is denied.

DALY v. PALMER.

(Circuit Court for New York: 6 Blatchford, 256-271. 1868.)

Opinion by BLATCHFORD, J.

STATEMENT OF FACTS.—The plaintiff is, by profession, a dramatic author, his business being to compose, write and produce on the theatrical stage, dramatic compositions, commonly called plays. The defendants are the managers of a public place of theatrical amusement in the city of New York, called Niblo's Garden. Before the 1st of August, 1867, the plaintiff composed and wrote a dramatic composition called "Under the Gaslight," and on that day he took the proper steps to secure to himself a copyright for the composition, under the provisions of the act of February 3, 1831 (4 U. S. Stat. at Large, 436), by depositing, before publication, a printed copy of the title of the composition, as author and proprietor, in the clerk's office of the district court of the southern district of New York, where he resided at the time. The composition was afterward printed and published, and, within three months from its publication, he caused a copy of it, as printed and published, to be delivered to said clerk. He also gave information of copyright being secured, by causing to be printed and inserted in the several copies published, the words prescribed by the fifth section of the act.

The act of 1831 confers upon the author and proprietor of a dramatic composition, duly copyrighted, the sole right and liberty of printing, reprinting, publishing and vending such composition, in whole or in part, for the term of twenty-eight years from the time of recording the title of such composition in the manner directed by the act. The act of August 18, 1856 (11 U. S. Stat. at Large, 138), provides that any copyright thereafter granted under the laws of the United States, "to the author or proprietor of any dramatic composition, designed or suited for public representation, shall be deemed and taken to confer upon the said author or proprietor, his heirs and assigns, along with the sole right to print and publish the said composition, the sole right also to act, perform, or represent the same, or cause it to be acted, performed or represented, on any stage or public place, during the whole period for which the copyright is obtained."

The bill alleges that the plaintiff's play was designed and suited for public representation; that it was represented for the first time on the 12th of August, 1867, under his direction and for his benefit, at the New York Theater, a public place of theatrical amusement in New York, and was thenceforward represented there for eight consecutive weeks; that it met with great success, attracted crowds of persons, and was pecuniarily profitable to the plaintiff to a large amount; that the particular cause of such success was what was commonly called, after such public performance, the "railroad scene," at the end of the third scene of the fourth act, in which one of the characters is represented as secured by another, and laid helpless upon the rails of a railroad track, in such manner, and with the presumed intent, that the railroad train, momentarily expected, shall run him down and kill him, and, just at the moment when such a fate seems inevitable, another of the characters contrives to reach the intended victim, and to drag him from the track as the train rushes in and passes over the spot; that this incident and scene was entirely novel, and unlike any dramatic incident known to have been theretofore represented on any stage, or invented by any author before the plaintiff so composed, produced and represented the same; that the playing of said com-

position and scene caused the same to become famous in all parts of the United States and Canada, and in England; that the chief value of the composition and its popularity depend upon said "railroad scene;" that it was repeatedly produced and represented by and for the advantage of the plaintiff, in many cities and towns of the United States and Canada, to the profit of the plaintiff; that, before learning of the alleged wrongs mentioned in the bill attempted by the defendants, the plaintiff had made arrangements for representing the play dramatically at New York, and in various places in the United States, during the present winter and the approaching spring; that he accordingly commenced to represent the play at the New York Theater, in the city of New York, on the 4th of November, 1868; that, soon after the production, representation and printing of the play in the United States, one Dion Boucicault, a dramatic author and actor and theatrical manager, a subject of Great Britain, residing in England, procured a copy of said play by some means, and, without the knowledge or consent of the plaintiff, prepared therefrom a play, which he called "After Dark," in which play he introduced several of the scenes and incidents of the plaintiff's play, varying them slightly, but following in them the invention and plan of the plaintiff's play in a manner which was intended to differ from it only slightly, so as colorably to be a different work, while substantially retaining the attractive features of the plaintiff's play, and which contained, with only colorable variations, the said "railroad scene" of the plaintiff's play, substituting for the surface railroad an underground railroad, for the rescuer of the victim to be killed on the railroad a man for a woman, for the railroad station in which the rescuer was confined a cellar, and for the breaking down a door to escape and rescue the victim the breaking down a wall or the door in a wall; that the work of Boucicault is a palpable imitation of the plaintiff's said "railroad scene," and is plagiarized therefrom, and put into the play called "After Dark" by Boucicault for the purpose of obtaining the pecuniary benefit which might otherwise result to the plaintiff from the representation of his play; that the play of "After Dark" was performed in England without the plaintiff's consent, to the great profit of Boucicault, and was indebted for its success and profit to such imitation of said "railroad scene;" that Boucicault has sent copies of his play containing such plagiarism of said "railroad scene" to the defendants in the United States for sale and performance for his own profit, and several copies of it are in the defendants' possession; that the defendants are intending and have announced their purpose to perform such play called "After Dark," publicly on the stage, at Niblo's Garden, in New York, on the 16th of November, 1868, and every night thereafter; till further notice, without the consent of the plaintiff; that such play, and the plagiarism of said "railroad scene," are being rehearsed at Niblo's Garden, under the direction of the defendants, with a view to such public performance thereof; and that the defendant Palmer, acting for Boucicault, is about to sell copies of the play called "After Dark," with said plagiarized scene, to other persons in the United States, to be publicly represented. The bill prays for an injunction to restrain the defendants from the public representation and from the sale for dramatic representation of the said "railroad scene" in "After Dark."

The defense to the application, on the facts, is confined to showing, by affidavits, that the following matters were known prior to the taking out by the plaintiff of his copyright, namely: the representation on a stage of a train of cars drawn by a locomotive engine on a railroad; a like representation wherein

the train appeared to run over a man lying on the track; and a like representation wherein the train appeared to run over a man lying on the track, who had been thrown thereon in a helpless condition by another of the characters, in order that he might be run over and killed. A story called "Captain Tom's Fright," in "The Galaxy" for March 15, 1867, is also adduced to affect the validity of the plaintiff's copyright. There is no answer to the bill, nor is there any denial of the allegations that Boucicault procured a copy of the plaintiff's play and prepared therefrom the "railroad scene" in the play of "After Dark," and intended that the latter should only be colorably different from the "railroad scene" in the plaintiff's play by making the substitutions before mentioned, and that the "railroad scene" in the play of "After Dark" was plagiarized by Boucicault from the "railroad scene" in the plaintiff's play.

In the plaintiff's play there is a surface railroad with a railroad station and a signal-station shed or store-room. A signal-man appears and a woman named Laura. At the request of Laura the signal-man locks her in the shed. There are some axes in it. One Snorkey then appears. The signal-man then goes off. One Byke then enters, with a coil of rope in his hand, and throws it over Snorkey, and tightens it around his arm, and coils it around his legs, and then lays him across the track and fastens him to the rails, and goes off, having, by language, given it to be understood that the intention is that Snorkey shall be run over by the train and killed. Laura, from a window in the shed, sees what is done. The steam whistle of the train is heard. She takes an ax and strikes the door. The whistle is heard again, with the rumble of the approaching train. She gives more blows on the door with the ax; it opens; she runs and unfastens Snorkey; the lights of the engine appear, and she moves Snorkey's head from the track as the train rushes past. This incident occupies the whole of the third scene of the fourth act. There is a good deal of conversation; first between the signal-man and Laura, and then between Snorkey and the signal-man, and then between Byke and Snorkey, and then between Laura and Snorkey. There are stage directions for Laura to go into the shed, for the signal-man to lock her in, for Snorkey to enter, for the signal-man to go off, for Byke to enter with the coil of rope, for Byke to throw the coil over Snorkey and tighten the rope around Snorkey's arm and coil it around his legs, for Byke to lay Snorkey across the track and fasten him to the rails, for Byke to go off, for the steam whistle to be heard, for blows at the door to be heard, for the steam whistle to be heard again with the rumble of the train, for more blows on the door to be heard, for the door to open, for Laura to appear with the ax in her hand, for her to run and unfasten Snorkey, for the lights of the engine to be seen, for Laura to take Snorkey's head from the track, and for the train to rush past. These stage directions are separate and apart from the conversation, and are in italics and in parentheses at the appropriate places in the progress of the scene. The substance and purport of the successive conversations in the scene are that Laura requests the signal-man to lock her in the shed, and he consents; that Snorkey requests the signal-man to stop by signal the expected train, and he refuses; that Byke gives Snorkey to understand that he is to be run over and killed by the train, and that Snorkey requests Laura to break down the door and release him. The idea is also conveyed, by the language in the scene, that Byke is about to commit robbery and murder at Laura's house, and that Snorkey is trying to give information of the fact.

In the play of "After Dark" the "railroad scene" is in the third act. In the first scene of that act one Gordon Chumley is rendered insensible by drugs, and one Old Tom is thrown by force into a wine vault. In the second scene of that act Old Tom is represented as in the vault. There is an orifice in the vault which opens upon the track of an underground railroad. The rumbling of cars is heard, and lights flash through the orifice. Old Tom, through a door into an adjoining vault, sees two of the characters carry Chumley, and break a hole through a wall and pass the body of Chumley through the hole, for concealment, as he supposes, in a well or vault. Old Tom then finds an iron bar and resolves to attempt escape by enlarging the orifice in the wall opening on the railroad. Then follows scene third. The railroad is seen, with a circular orifice which ventilates the cellar in which Old Tom is. The body of Chumley is seen lying across the rails, and the arm of Old Tom, and then his head, are passed through the orifice. For this much of the scene there are only stage directions, without spoken words. The following is a *verbatim* copy of the rest of the scene, the parts in parentheses being stage directions: "*Old Tom.* About four courses of bricks will leave one room to pass. What is that on the line? There is something, surely, there. (A distant telegraph alarm rings. The semaphore levers play, and the lamps revolve.) Great Heaven! 'tis Gordon. I see his pale, upturned face—he lives! Gordon! Gordon! I'm here. He does not answer me. (A whistle is heard, and distant train passes.) Ah! murderers. I see their plan. They have dragged his insensible body to that place, and left him there to be killed by a passing train. Demons! Wretches! (He works madly at the orifice. The bricks fall under his blows. The orifice increases. He tries to struggle through it.) Not yet. Not yet. (The alarm rings again. The levers in the front play. The red light burns, and a white light is turned to L. H. tunnel. The wheels of an approaching train are heard.) Oh, heaven! give me strength—down—down. One moment! (A large piece of wall falls in, and Old Tom comes with it.) See, it comes, the monster comes. (A loud rumbling and crashing sound is heard. He tries to move Gordon, but, seeing the locomotive close on him, he flings himself on the body, and, clasping it in his arms, rolls over with it forward. A locomotive, followed by a train of carriages, rushes over the place, and, as it disappears, Old Tom frees himself from Chumley and gazes after the train.)" The play of "After Dark" has never been published by Boucicault, although printed by him for private use.

§ 298. What is a "dramatic composition" within the terms of the copyright act.

The first inquiry is, what is meant, in the act of 1856, by a "dramatic composition," what is meant by the "public representation" of a dramatic composition, and what is meant by the right to "act, perform or represent" a dramatic composition on a "stage or public place?" The act of 1856 confers on the author or proprietor of a copyrighted "dramatic composition, designed or suited for public representation," the sole right of acting, performing or representing the same on a stage or public place, in addition to the sole right to print and publish such composition. The latter right must be considered as being conferred by the act of 1831, for, although that act only speaks of a copyright for a "book or books, map, chart, musical composition, print, cut or engraving," yet, under the language of the act of 1856, a "dramatic composition, designed or suited for public representation," must be regarded as embraced within the act of 1831.

§ 299. *A written play, consisting of directions for its representation by action only, is a dramatic composition.*

A composition, in the sense in which that word is used in the act of 1856, is a written or literary work invented and set in order. A dramatic composition is such a work in which the narrative is not related, but is represented by dialogue and action. When a dramatic composition is represented, in dialogue and action, by persons who represent it as real, by performing or going through with the various parts or characters assigned to them severally, the composition is acted, performed or represented; and, if the representation is in public, it is a public representation. To act, in the sense of the statute, is to represent as real, by countenance, voice or gesture, that which is not real. A character in a play who goes through with a series of events on the stage without speaking, if such be his part in the play, is none the less an actor in it than one who, in addition to motions and gestures, uses his voice. A pantomime is a species of theatrical entertainment in which the whole action is represented by gesticulation, without the use of words. A written work, consisting wholly of directions, set in order for conveying the ideas of the author on a stage or public place, by means of characters who represent the narrative wholly by action, is as much a dramatic composition designed or suited for public representation as if language or dialogue were used in it to convey some of the ideas. The "railroad scene," in the plaintiff's play, is undoubtedly a dramatic composition. Those parts of it represented by motion or gesture, without language, are quite as much a dramatic composition as those parts of it which are represented by voice. This is true, also, of the "railroad scene" in "After Dark." Indeed, on an analysis of the two scenes in the two plays, it is manifest that the most interesting and attractive dramatic effect in each is produced by what is done by movement and gesture, entirely irrespective of anything that is spoken. The important dramatic effect, in both plays, is produced by the movements and gestures which are prescribed and set in order so as to be read, and which are contained within parentheses. The spoken words in each are of but trifling consequence to the progress of the series of events represented and communicated to the intelligence of the spectator by those parts of the scene which are directed to be represented by movement and gesture. The series of events so represented and communicated by movement and gesture alone to the intelligence of the spectator, according to the directions contained in parentheses, in the two plays in question here, embraces the confinement of A. in a receptacle from which there seems to be no feasible means of egress; a railroad track, with the body of B. placed across it, in such manner as to involve the apparently certain destruction of his life by a passing train; the appearance of A. at an opening in the receptacle from which A. can see the body of B.; audible indications that the train is approaching; successful efforts by A., from within the receptacle, by means of an implement found within it, to obtain egress from it upon the track; and the moving of the body of B. by A. from the impending danger a moment before the train rushes by. In both of the plays the idea is conveyed that B. is placed intentionally on the track with the purpose of having him killed. Such idea is, in the plaintiff's play, conveyed by the joint medium of language uttered and of movements which are the result of prescribed directions, while, in Boucicault's play, it is conveyed solely by language uttered. The action, the narrative, the dramatic effect and impression, and the series of events in the two scenes are identical. Both are dramatic compositions, designed or suited for public

representation. It is true that in one A. is a woman, and in the other A. is a man; that in one A. is confined in a surface railroad station shed, and in the other A. is confined in a cellar abutting on the track; that in one A. uses an ax, and in the other A. uses an iron bar; that in one A. breaks down a door, and in the other A. enlarges a circular hole; that in one B. is conscious and is fastened to the rails by a rope, and in the other B. is insensible and is not fastened; and that in one there is a good deal of dialogue during the scene, and in the other only a soliloquy by A. and no dialogue. But the two scenes are identical in substance, as written dramatic compositions, in the particulars in which the plaintiff alleges that what he has invented and set in order in the scene has been appropriated by Boucicault.

Nor is this a case of first impression. An arrangement of musical notes, forming a tune or air, is a musical composition; and the author who has invented it, and sets it in order, and copyrighted it, is entitled to protection. The extent of that protection has been the subject of judicial interpretation. In the case of *D'Almaine v. Boosey*, 1 *Younge & Collyer's Exch. R.*, 288, the plaintiffs, proprietors of the copyright of an opera of Auber's, and also of another copyright of the overture of the same opera, and also of another copyright of the airs of the same opera, filed a bill in equity to restrain the defendant from infringing such copyrights. The defendant had published several of the airs, with some alterations, in the shape of quadrilles and waltzes. It was claimed, on the part of the defendant, that his work was merely an adaptation of the original, and, therefore, not a piracy. But the court (Lord Chief Baron Lyndhurst) held that if the defendant had published the original air, though with adaptations and harmonies, or for different instruments, it was a piracy, and that it was not like the case of an abridgment of a book, where the purpose of the abridgment was distinct from that of the work from which it was taken. On this subject the court says: "It is admitted that the defendant has published portions of the opera containing the melodious parts of it; that he has also published entire airs; and that, in one of his waltzes, he has introduced seventeen bars in succession, containing the whole of the original air, although he adds fifteen other bars which are not to be found in it. Now, it is said that this is not a piracy, first, because the whole of each air has not been taken; and, secondly, because what the plaintiffs purchased was the entire opera, and the opera consists, not merely of certain airs and melodies, but of the whole score. But, in the first place, piracy may be of part of an air, as well as of the whole; and, in the second place, admitting that the opera consists of the whole score, yet, if the plaintiffs were entitled to the whole, *a fortiori*, they were entitled to publish the melodies which form a part. Again, it is said that the present publication is adapted for dancing only, and that some degree of art is needed for the purpose of so adapting it, and that but a small part of the merit belongs to the original composer. That is a nice question. It is a nice question what shall be deemed such a modification of an original work as shall absorb the merit of the original in the new composition. No doubt such a modification may be allowed in some cases, as in that of an abridgment or a digest. Such publications are, in their nature, original. Their compiler intends to make of them a new use, and not that which the author proposed to make. Digests are of great use to practical men, though not so, comparatively speaking, to students. The same may be said of an abridgment of any study; but it must be a *bona fide* abridgment, because, if it contains many chapters of the original work, or such as made

that work most salable, the maker of the abridgment commits a piracy. Now, it will be said, that one author may treat the subject very differently from another who wrote before him. That observation is true in many cases. A man may write upon morals in a manner quite distinct from that of others who preceded him; but the subject of music is to be regarded upon very different principles. It is the air or melody which is the invention of the author, and which may, in such case, be the subject of piracy; and you commit a piracy, if, by taking, not a single bar, but several, you incorporate in the new work that in which the whole meritorious part of the invention consists. . . . Now, it appears to me, that if you take from the composition of an author all those bars consecutively which form the entire air or melody, without any material alteration, it is a piracy; though, on the other hand, you might take them in a different order, or broken by the intersection of others, like words, in such a manner as should not be a piracy. It must depend on whether the air taken is substantially the same with the original. Now, the most unlettered in music can distinguish one song from another, and the mere adaptation of the air, either by changing it to a dance, or by transferring it from one instrument to another, does not, even to common apprehensions, alter the original subject. The ear tells you that it is the same. The original air requires the aid of genius for its construction, but a mere mechanic in music can make the adaptation or accompaniment. Substantially, the piracy is, where the appropriated music, though adapted to a different purpose from that of the original, may still be recognized by the ear. The adding variations makes no difference in the principle." An injunction was granted. The views of Lord Lyndhurst, in that case, were cited and approved by Mr. Justice Nelson, in this court, in the case of *Jollie v. Jaques*, 1 Blatch., 618, 625. They are eminently sound and just, and are applicable to the case of a dramatic composition designed for public representation. Such a composition, when represented, excites emotions and imparts impressions not merely through the medium of the ear, as music does, but through the medium of the eye as well as the ear. Movement, gesture and facial expression, which address the eye only, are as much a part of the dramatic composition as is the spoken language which addresses the ear only; and that part of the written composition which gives direction for the movement and gesture is as much a part of the composition, and protected by the copyright, as is the language prescribed to be uttered by the characters. And this is entirely irrespective of the set of the stage, or of the machinery or mechanical appliances, or of what is called, in the language of the stage, scenery, or the work of the scene painter.

§ 300. *An author of a dramatic composition is entitled to protection against piracy of any part of his work.*

Now, in consonance with the principles laid down by Lord Lyndhurst, the plaintiff is as much entitled to protection in respect of a substantial and material original part of his "railroad scene" as he is in respect of the whole. Under the act of 1856, construed in connection with the act of 1831, he is entitled to be protected against piracy, in whole or in part, by representation as well as by printing, publishing and vending. Although the act of 1831 in regard to printing, publishing and vending uses the words "in whole or in part," and the act of 1856 in regard to representing does not use those words, yet the act of 1856, by referring, as it does, to the right conferred by the act of 1831 as the "sole right to print and publish" the copyrighted composition, when such right is, on the face of the act of 1831, the sole right to print and

publish "in whole or in part," and by then conferring "the sole right also to act, perform or represent the same, or cause it to be acted, performed or represented, on any stage or public place," must be held to confer the right to represent in whole or in part. All that is substantial and material in the plaintiff's "railroad scene" has been used by Boucicault in the same order and sequence of events, and in a manner to convey the same sensations and impressions to those who see it represented as in the plaintiff's play. Boucicault has, indeed, adapted the plaintiff's series of events to the story of his play, and in doing so has evinced skill and art; but the same use is made in both plays of the same series of events, to excite, by representation, the same emotions in the same sequence. There is no new use, in the sense of the law, in Boucicault's play, of what is found in the plaintiff's "railroad scene." The "railroad scene" in Boucicault's play contains everything which makes the "railroad scene" in the plaintiff's play attractive as a representation on the stage. As, in the case of the musical composition, the air is the invention of the author, and a piracy is committed if that in which the whole meritorious part of the invention consists is incorporated in another work, without any material alteration in sequence of bars, so, in the case of the dramatic composition, designed or suited for representation, the series of events directed in writing by the author, in any particular scene, is his invention, and a piracy is committed if that in which the whole merit of the scene consists is incorporated in another work, without any material alteration in the constituent parts of the series of events, or in the sequence of the events in the series. The adaptation of such series of events to different characters who use different language from the characters and language in the first play is like the adaptation of the musical air to a different instrument, or the addition to it of variations or of an accompaniment. The original subject of invention, that which required genius to construct it and set it in order, remains the same in the adaptation. A mere mechanic in dramatic composition can make such adaptation, and it is a piracy if the appropriated series of events, when represented on the stage, although performed by new and different characters, using different language, is recognized by the spectator through any of the senses to which the representation is addressed, as conveying substantially the same impressions to, and exciting the same emotions in, the mind, in the same sequence or order. Tested by these principles, the "railroad scene" in Boucicault's play is undoubtedly, when acted, performed or represented on a stage or public place, an invasion and infringement of the copyright of the plaintiff in the "railroad scene" in his play.

§ 301. *The test of piracy of a dramatic composition.*

The substantial identity between the two scenes would naturally lead to the conclusion that the later one had been adapted from the earlier one. The charge of actual plagiarism on the part of Boucicault, made in the bill, is not denied. It is hardly possible that the resemblances are accidental, and that the differences are not merely colorable, with a view to disguise the plagiarism. The true test of whether there is piracy or not is to ascertain whether there is a servile or evasive imitation of the plaintiff's work, or whether there is a *bona fide* original compilation, made up from common materials and common sources, with resemblances which are merely accidental, or result from the nature of the subject. *Emerson v. Davies*, 3 Story, 768, 793 (§§ 270-79, *supra*).

Nothing that has been adduced on the part of the defendants affects the

validity of the plaintiff's copyright, on the question of the originality and novelty of the "railroad scene" in his play.

§ 302. *The seller of a pirated work for representation by the vendee is liable for the violation of the copyright by the vendee.*

The sale of Boucicault's play to other persons, with a view to its public representation, makes the seller a participant in causing the play to be publicly represented.

An injunction must, therefore, issue, restraining the defendants from the public performance and representation, and from the sale, for public performance or representation, of the "railroad scene" in the play of "After Dark," or of any scene in substance the same as the "railroad scene" in either of the two plays as such scene is herein defined.

§ 303. **In general.**— In deciding the question of an infringement of a copyright the inquiry is not whether the one publication is a *fac-simile* of the other, but whether there is such a substantial identity as fairly to justify the inference that in preparing his work the subsequent author availed himself of the work of the first and substantially borrowed. *Drury v. Ewing*, 1 Bond, 540 (§§ 112-14).

§ 304. An author's property in his composition or copyright consists only in a right to multiply copies of his book and enjoy the profits therefrom, and he has no such property in his original conceptions that he alone can use them in a new work. *Stowe v. Thomas*,* 2 Wall. Jr., 547; 2 Am. L. Reg., 210.

§ 305. The "sole liberty" secured by the copyright acts of printing and selling a copyrighted work is inconsistent with a right in any other person to print and vend material and valuable portions of such work taken *verbatim* therefrom. So a key to a copyrighted work of instruction in English grammar containing an original system of diagrams, which reproduced the diagrams of the original work, and the lesson sentences of the original work, arranged according to the rules and diagrams of the original work, is an infringement of the copyright. *Reed v. Holliday*,* 19 Fed. R., 325.

§ 306. **Intent.**— Where an infringement of a copyright appears, the motives of the infringer are immaterial. *Ibid.*

§ 307. A party publishing copyrighted music is liable to the penalty therefor, though the publication was made in ignorance of the copyright. *Millett v. Snowden*,* 1 West. L. J., 240.

§ 308. **Limitations.**— Every printing and sale of an infringement of a copyrighted article is a new infringement, and the statute of limitations runs from such printing and sale and not from the time of the engraving from which the infringing article is printed. *Reed v. Carusi*,* Taney, 72.

§ 309. **The statutory penalty** for printing a copyrighted work imposed by the sixth section of the copyright act of February 3, 1831, is incurred only by printing the whole work, and not by printing a part which amounts to an infringement. *Rogers v. Jewett*,* 12 Law Rep. (N. S.), 839.

§ 310. **Books sold by subscription.**— In the absence of notice of the terms of the contract between the publishers of a book sold by subscription and their agents for the sale of such book, by which such agents were bound to sell only to subscribers and only for the full retail price, and in the absence of any solicitations on his part, a book-seller may contract to purchase such books from agents who have lawfully obtained the books from the owner or the publisher, and may advertise such books for sale at such prices as he may see fit. *Clemens v. Estes*,* 22 Fed. R., 899.

§ 311. **Agent.**— Under the copyright law, a principal is not liable to the penalty imposed by section 4965, Revised Statutes, for the infringement of a copyright, where such infringement is made by his agent without his knowledge or authority. *Taylor v. Gilman*,* 24 Fed. R., 632.

§ 312. **Purchase and resale.**— A person who has published a copyrighted work without authority, and who purchases and resells the books he has thus published, is liable to the owner of the copyright for the profits on the resale as well as on the original sale. *Myers v. Callaghan*,* 24 Fed. R., 636.

§ 313. **Abridgment.**— A fair and *bona fide* abridgment of a work, though it may somewhat affect the sale thereof, is not an infringement of the copyright thereof; but where, combined with what is properly an abridgment, there is a considerable part of the original work merely copied, the use of the copied portion will be enjoined. *Story v. Holcombe*,* 4 McL., 306.

§ 314. **Maps.**— Where a map is substantially a copy of a copyrighted map except in scale and color, there is an infringement of the copyright of the former map, and its owner is en-

titled to an injunction and an account of the profits realized from the sale of the infringing map. *Chapman v. Ferry*,* 9 Saw., 395; 18 Fed. R., 539.

§ 315. A copyrighted series of maps of one city is not infringed by the production of a series of maps of another city on the same plan; nor has the holder of the first copyright any exclusive right to the arbitrary signs used by him on his maps. *Perris v. Hexamer*,* 9 Otto, 674.

§ 316. Musical composition.—A person is not liable for an infringement of the copyright of a musical composition unless the composition alleged to be an infringement is the same as the copyrighted composition in its main design and important parts, or was colorably altered from it; nor is he liable though they are the same in some respects, provided it was not taken from the copyrighted composition, but was the effort of his own mind, or was taken from an air composed by some one not a plagiarist from the original author. *Reed v. Carusi*,* 8 Law Rep., 410.

§ 317. Slight omissions or alterations do not prevent a piece of music from being the same as another so far as copyright laws are concerned. *Millett v. Snowden*,* 1 West. L. J., 240.

§ 318. Where the words and music of a copyrighted ballad are republished without authority, the fact that the words are not original with the composer of the music is no defense to an action for infringement of the copyright of the music. *Ibid.*

§ 319. A person is not liable for an infringement of a copyrighted musical composition unless he caused it to be engraved either on the whole or by varying, adding to, or diminishing the main design, with the intent to evade the law, or he caused it to be printed for sale in such manner and for such purpose. But he is not liable unless the musical composition engraved or printed and for sale by him is the same as that which it is said to infringe in the main design, and in its material and important parts altered as above mentioned to evade the law. Nor is he liable although it is in some respects the same, provided it was not taken from the other, but was an effort of his own mind, or was taken from an air composed by some other person, who was not a plagiarist from the copyrighted production. *Reed v. Carusi*,* Taney, 72.

§ 320. Newspaper — Engravings.—It is not an infringement of the copyright of a newspaper to prepare and sell a plate from which a copy of an engraving published in the paper can be produced, where it does not appear that the plate was made or sold for the purpose of violating the rights of the publisher of the paper; and an intention to violate such rights will not be presumed from the making and sale of the plate. *Harper v. Shoppell*,* 26 Fed. R., 519.

§ 321. Pictures.—A person is not liable as for an infringement of a copyrighted picture if, in producing the picture alleged to be an infringement, he did not avail himself, either directly or indirectly, of the plaintiff's production. *Johnson v. Donaldson*,* 18 Blatch., 287; 3 Fed. R., 22; 10 Rep., 233.

§ 322. A person can acquire no exclusive copyright in a chromo of a design found in and copied from a foreign periodical. *Ibid.*

§ 323. Dramatic compositions.—It is a violation of section 4967, Revised Statutes, for a person to print and publish and offer to sell a dramatic composition, a large portion of which is copied without permission from a prior composition. *Boucicault v. Hart*, 13 Blatch., 47; 4 Am. L. Rec., 726; 8 Ch. Leg. N., 257 (§§ 22-29).

§ 324. Alterations in the language of a pirated play will not protect the unauthorized use thereof if there is a substantial use of the play. *Boucicault v. Wood*,* 2 Biss., 34; 7 Am. L. Reg. (N. S.), 539.

§ 325. In a suit to enjoin the unauthorized representation of a dramatic copyrighted composition, it is no defense that the defendants obtained the whole play by the aid of memory, where they so obtained it while engaged as actors of the play. *Shook v. Rankin*,* 3 Cent. L. J., 210.

§ 326. Where two plays, when acted, produce the impression that they are the same, it is fair to presume that one is a piracy of the other, and especially so when the name of one was Black Crook and of the other Black Rook. *Martinetti v. Maguire*,* Deady, 216; S. C., 1 Abb., 356.

§ 327. State reports.—In an action for an infringement of the copyright of certain volumes of the reports of judicial decisions, it was held, on a comparison of the infringing with the copyrighted volumes, and after considering the evidence, that the defendants in preparing the infringing volumes had so used the plaintiff's book as to interfere with his copyright. *Myers v. Callaghan*,* 10 Biss., 139; 5 Fed. R., 726; 20 Fed. R., 441.

§ 328. A translation of a copyrighted work into a foreign language is not an infringement of the copyright of the original. *Stowe v. Thomas*,* 2 Wall. Jr., 547; 2 Am. L. Reg., 210.

§ 329. Compilations.—One compilation does not infringe another, though the information imparted is in some instances almost identical, when each has been compiled by the author from original sources of information by labor and skill of his own, and is not transcribed from the other. *Bullinger v. Mackey*, 15 Blatch., 550 (§§ 124-26).

§ 330. The compiler of a work on a given subject has no monopoly of the subject of which the book treats. Any other person is permitted to make a similar work. But the subsequent author must investigate for himself from the original sources. He cannot use the labors of a previous compiler *animo furandi*, and save his own time by copying the results of the former compiler's labor, although the same results could have been attained by independent labor. *Banks v. McDivitt*,* 13 Blatch., 163.

§ 331. The question whether a compiled work is a violation of a previously copyrighted work of the same character is to be determined by considering whether the publishers of the work alleged to violate the copyright have used the plan, arrangements and illustrations of the complainant as the model of their own book, with colorable alterations and variations only to disguise the use thereof, or whether the work is the result of their own labor, skill and the use of common materials and common sources of knowledge, and whether the resemblances are not either accidental, or arise from the nature of the subject. *Lawrence v. Cupples*,* 9 O. G. 254.

§ 332. It is not sufficient evidence of an infringement of a copyright to show that a later compilation uses the same system of references as a former one. It must also appear that the system was new and original with the author of the first work. *Bullinger v. Mackey*, 15 Blatch., 550 (§§ 124-26).

VI. SUITS FOR INFRINGEMENT.

§ 333. Courts of equity possess jurisdiction to grant full relief in cases of violations of copyrights, though to some extent there may be a remedy at law. *Pierpont v. Fowle*,* 2 Woodb. & M., 22.

§ 334. A court of equity has full jurisdiction in copyright cases, though the title to the copyright is in dispute. *Ibid.*

§ 335. Concurrent remedies.—A suit to enjoin the infringement of a copyright may be maintained, though a *qui tam* action for a penalty is pending. *Schumacher v. Schwencke*,* 25 Fed. R., 466.

§ 336. Pleading.—In an action to recover for the infringement of a copyright, the declaration must aver the taking of the steps necessary to procure a copyright, and when the plaintiff alleges that he is the proprietor, and that the copyrighted work is the work of another person, he must set out his title from such author. *Chicago Music Co. v. J. W. Butler Paper Co.*,* 19 Fed. R., 758.

§ 337. Production of books.—In an action to recover the penalties for a violation of the copyright of a chromo, and to enforce the forfeiture of the plates from which it was printed, a defendant cannot be compelled by a subpoena *duces tecum* to produce his books of account and plates to be used as evidence in behalf of the plaintiff. *Johnson v. Donaldson*,* 18 Blatch., 287; 3 Fed. R., 22; 10 Rep., 233.

§ 338. Trial at law.—In copyright cases both the right and the infringement may be set up and adjudicated in a court of equity without having been first determined at law. *Farmer v. Calvert Lithographing, etc., Co.*, 1 Flip., 228; 5 Am. L. T. (U. S.), 168; 7 Am. L. Rev., 365 (§§ 288-97).

§ 339. Abatement.—A *qui tam* action brought under section 4965, Revised Statutes of the United States, to recover a penalty for the violation of a copyright, abates on the death of the defendant. *Scheiber v. Sharpless*,* 17 Fed. R., 589.

§ 340. Form of action.—An action of trespass is not a proper form of action for damages for an infringement of a copyright. It seems that the proper remedy is an action on the case. *Atwill v. Ferrett*, 2 Blatch., 39.

§ 341. Discovery.—Where a bill in equity claims a forfeiture for an infringement of a copyright, the defendants cannot be compelled to make discoveries in answer to the bill as to the number of their publications, the quantity on hand, or of the amount of the sales. *Ibid.*

§ 342. In a suit for an infringement of a map, the defendants may demur to the part of the complainant's bill which asks for a discovery of the number of copies on hand, because under the statute they would be liable to forfeiture. *Chapman v. Ferry*,* 12 Fed. R., 693; 8 Saw., 191.

§ 343. Penalty under act of 1831.—Under the sixth section of the copyright act of 1831, the penalty of fifty cents per sheet of infringing matter applies only to sheets in the possession of the defendants, and does not include those sold by them. *Backus v. Gould*,* 7 How., 798.

§ 344. Title of plaintiff.—A person cannot maintain a suit for an infringement of a copyright unless he shows an exclusive right derived from the author or inventor. It is not sufficient that he allege in general terms that he is the proprietor of the work in question. *Yuengling v. Schile*, 12 Fed. R., 97; 20 Blatch., 452 (§§ 141-44).

§ 345. A court of equity will not enjoin the publication and sale of a work alleged to be an infringement of a copyright, if it appears that the plaintiff has no copyright in the work of which he is the owner. *Ewer v. Coxe*,* 4 Wash., 487.

§ 346. In an action to recover the statutory penalty for the violation of a copyright, the defendant may show that the copyrighted music was not original, or that it was an alteration or abbreviation. *Millett v. Snowden*,* 1 West. L. J., 240.

§ 347. In cases of an infringement of a copyright, if the title is in the plaintiff, an injunction will be allowed and an accounting decreed. *Pierpont v. Fowle*,* 2 Woodb. & M., 22.

§ 348. **Forfeiture.**—A court of equity cannot decree a forfeiture in copyright cases, not being specially authorized to do so by statute. *Stevens v. Cady*,* 2 Curt., 200; *Chapman v. Ferry*,* 12 Fed. R., 693; 8 Saw., 191; *Stevens v. Gladding*, 17 How., 447 (§§ 387-89).

§ 349. **Evidence.**—The fact that a compilation was made by a person may be proven by other persons cognizant of the facts as well as by the author. *Bullinger v. Mackey*, 15 Blatch., 550 (§§ 124-26).

§ 350. In an action to recover for the infringement of a copyright of a dramatic composition, it is improper to ask a witness whether the incidents of the play are the same as those of a previously published book, where neither the play nor the book is produced, and no reason is shown for their non-production. Nor is it proper, on the production of the book, merely to ask the witness whether its scenes, incidents and language are not substantially those of the play. *Boucicault v. Fox*, 5 Blatch., 87 (§§ 35-39).

§ 351. **Accounting.**—Commissions received by a book-seller from the sales of a map which infringed a copyright must be accounted for as profits to the owner of the copyright. *Stevens v. Gladding*,* 2 Curt., 608.

§ 352. It seems that an accounting may be decreed in suits for the infringement of a copyright, though an injunction will not be allowed. *Blank v. Manufacturing Co.*,* 3 Wall. Jr., 196.

§ 353. Where the infringement of a copyright complained of is the licensing to others, by the defendant, of the right to produce the copyrighted work, the defendant will be compelled to account as the trustee or agent of the complainant. *Pierpont v. Fowle*,* 2 Woodb. & M., 22.

§ 354. After answering, the defendant in a suit for the infringement of a copyright cannot object that the complaint asks for an accounting, and at the same time asks a forfeiture under the statute. *Farmer v. Calvert Lithographing, etc., Co.*, 1 Flip., 228 (§§ 288-97).

§ 355. Where the bill in a suit for the infringement of a copyright prays simply for general relief, an accounting may be decreed, as it is an incident to the allowance of the injunction. *Stevens v. Gladding*, 17 How., 447 (§§ 387-89).

§ 356. Relief by an account, though an incident to an injunction, cannot be granted in a suit for an infringement of a copyright, if not prayed for, either specially or by a prayer for general relief. *Stevens v. Cady*,* 2 Curt., 200.

§ 357. **Damages.**—The measure of damages for the unauthorized production of a manuscript play is to be determined by the jury from the evidence. *Boucicault v. Wood*,* 2 Biss., 34; 7 Am. L. Reg. (N. S.), 539.

§ 358. The damages sustained by the complainants by reason of an infringement of a copyright cannot be recovered in a suit in equity. *Chapman v. Terry*,* 12 Fed. R., 693; 8 Saw., 191.

§ 359. In a *qui tam* action by the owner of a copyright against a book-seller who had imported several copies of a pirated edition, and sold some of them, it was held that the plaintiff might recover fifty cents for each sheet of the whole number of volumes found at any time within the period stated in the declaration to have been in the possession of the defendant. *Dwight v. Appleton*,* 1 N. Y. Leg. Obs., 195.

§ 360. C. republished without authority volumes 39 to 46 inclusive of the Illinois Reports, which were copyrighted by M. C. owned the copyright of volumes 1 to 31 inclusive, and F. the copyright of the volumes above 46. C. sold sets consisting of those copyrighted by him and by F. and pirated copies. He also sold many separate copies of the pirated volumes. *Held*, that the selling price was properly determined on an accounting by finding the mean between the average price of the single volumes sold, and one forty-sixth of the price at which the sets were sold after deducting the price paid F. for the volumes owned by him. *Myers v. Callaghan*,* 24 Fed. R., 636.

§ 361. **Profits.**—On an accounting by the infringer of a copyright for the profits derived from the pirated work, an allowance should be made for the expenses of carrying on the business, and, if the cost of selling the pirated work was only a part of the business, then such a proportion should be deducted from the gross proceeds as the cost of sale of all the works published by them bears to the gross proceeds thereof. *Ibid.*

§ 362. On an accounting by the infringer of a copyright for the profits derived from the sale of the pirated work, the cost of stereotyping should not be allowed as a part of the cost of production. Nor should the salaries of the partners in the infringing firm be included in the

expenses of carrying on the business. Nor will the sum paid for editing the infringing volumes be allowed as a part of the expense of production. *Ibid.*

§ 363. Where defendants, in an action for an infringement of a copyright, after a decision against them on the merits, retain the volumes of the infringing work unsold by them, the cost of the production of the unsold volumes cannot be credited to them and go to diminish the profits on the volumes sold, but the owners of the copyright are entitled to the full profits of the volumes sold, without any reduction by the cost of unsold volumes. *Ibid.*

§ 364. On an accounting by a person who has infringed a copyright, as the defendant has in his hand all the proof relating to the profits derived by him from the infringement, the complainant makes a *prima facie* case when he shows the selling price and the usual cost of manufacturing. *Ibid.*

§ 365. Reference to master.—Motion for a provisional injunction to restrain the publication and sale of a map. The court refused to refer the matter to a master for his opinion on the question of infringement, holding that such a motion must be disposed of on the moving papers of the plaintiff and the affidavits of defendant in opposition. *Smith v. Johnson*,* 4 Blatch., 252.

§ 366. Where the facts upon which the question of an infringement of a copyright is based are voluminous and intricate, the court will refer the matter to a master for a report, and such reference will usually be ordered before the final hearing; though when, by consent, the cause has been heard without it, it may be ordered afterward. *Lawrence v. Dana*, 4 Cliff., 1 (§§ 257-69).

§ 367. In a suit for an infringement of copyright and an injunction the case was referred to a master with special instructions. *Story v. Derby*,* 4 McL., 160.

§ 368. Injunction as to a part.—Where a portion of the novel part of a copyrighted compilation has been copied in a subsequent compilation on the same subject, the publication of such copyrighted portion will be enjoined if it can be readily separated from the rest of the work; but if the portion is small and is woven into all the other work, the injured party will be left to his action at law. *Webb v. Powers*, 2 Woodb. & M., 497 (§§ 280-87).

§ 369. Where, in a literary work, portions of a previously copyrighted work have been incorporated, the publication of the infringing parts will be enjoined; and where such infringing part is so mixed with original matter that it cannot be separated without destroying the whole, then the publication of the whole will be enjoined. *Lawrence v. Dana*, 4 Cliff., 1; 2 Am. L. T. (N. S.), 402 (§§ 257-69).

§ 370. Injunction not granted while there is doubt as to the existence of a copyright. *Miller v. McElroy*,* 1 Am. L. Reg. (O. S.), 198.

§ 371. In a case of doubt as to the infringement of a copyright an injunction will not be granted in the first instance, but the parties will be left to their action at law. *Blunt v. Patten*,* 2 Paine, 397.

§ 372. The granting of a preliminary injunction is within the discretion of the court, but it should issue only when the plaintiff's right and the defendant's violation of that right are clear, and the case exhibits no special facts which would render the use of the process unjust; this rule applies in patent and copyright cases. *Scribner v. Stoddart*,* 19 Am. L. Reg. (N. S.), 433.

§ 373. The rule as to granting injunctions in copyright cases is the same as in other equity cases. The right of the plaintiff must be clear, and the circumstances must be such that the remedy will not be unjust. *Lodge v. Stoddart*,* 9 Rep., 137.

§ 374. Where an infringement of a copyright is palpable, and a provisional injunction will not be attended with serious injury, it is not ordinarily refused as to so much of an infringing work as infringes the prior publication. *Banks v. McDivitt*,* 13 Blatch., 163.

§ 375. Where an infringement of a copyright is shown the court will grant an injunction without proof of actual damage. *Reed v. Holliday*,* 19 Fed. R., 325.

§ 376. A court of equity will not grant a preliminary injunction in a copyright case where it appears that the injury to the complainants will be much less if refused than would be the injury to the defendants if it was granted. *Lodge v. Stoddart*,* 9 Rep., 137.

§ 377. Where a bill in equity by the owner of a copyright seeks a discovery and prays that the further infringement of his copyright be enjoined, the injunction will be granted, if a proper case is made, though the bill fails to make a case for a discovery. *Atwill v. Ferrett*, 2 Blatch., 39.

§ 378. Where the plaintiff, in a suit to enjoin the unauthorized representation of a copyrighted dramatic representation has made out a *prima facie* case, an affidavit that the plaintiff was not the author, but that it was written by two foreigners, and that a play in all particulars like it was performed in London before it was alleged to have been written, in two theatres, is insufficient to prevent the issuing of the injunction, where such play is not produced. *Shook v. Rankin*,* 3 Cent. L. J., 210.

§ 379. It appearing that the plaintiff in a suit for an infringement of a copyright, claimed that he was the owner of the copyright under an assignment from the defendant; and that the defendant claimed that he had never assigned the work in question; that the plaintiff had not performed his part under the contract alleged by him to operate as an assignment; that the contract had been abrogated, and that there was no infringement, the court refused an injunction, but directed that the defendant give bond to answer any damages allowed against him, and to keep an account of books disposed of, and preserve an account of those previously sold which the plaintiff claimed to have infringed his copyright. *Hubbard v. Thompson*,* 14 Fed. R., 689.

§ 380. On an application for an injunction to restrain an infringement of a copyright, it is not necessary to the allowance of the injunction that it should appear that the violation of the copyrighted work is so extensive that the piratical work is a substitute for the original. *Reed v. Holliday*,* 19 Fed. R., 325.

§ 381. The owner of an uncopyrighted opera may have the unauthorized production thereof enjoined on giving proper security, and if such security is insufficient, and the counsel for the defendant was not present when it was given, it seems that the court may, on motion and notice, order additional security to be given as a condition of continuing the injunction. *Goldmark v. Kreling*,* 25 Fed. R., 349.

§ 382. The owner of an uncopyrighted opera obtained an order for an injunction on condition of filing a bond for \$10,000 on a certain day. The bond offered not being satisfactory to the court, the defendants offered to furnish an indemnifying bond in the same amount, on furnishing which the injunction was to be dissolved. Before the security was furnished, the complainants offered to deposit in court a certified check or the coin. *Held*, that they should be permitted to do so. *Ibid*.

§ 383. It seems that in a copyright case an injunction will not be granted against a person who has been led into publication by the encouragement and acquiescence of the author, or where the author suffers time to run on the violation of his right. *Cooper v. Mattheys*,* 8 Law Rep., 413.

§ 384. In copyright cases, affidavits for rebutting the averments of the answer as to the title of the complainants will not be received on motions for or to dissolve an injunction. *Farmer v. Calvert Lithographing, etc., Co.*, 1 Flip., 228; 5 Am. L. T. (U. S.), 168; 7 Am. L. Rev., 365 (§§ 288-97).

§ 385. It appearing that an injunction in a copyright case had been violated by the printing and publication of a chart violating the complainant's copyright, and the offender being a woman, it was ordered that all copies of the chart, within the respondent's control, and the plate from which they were printed, be delivered to the clerk of the court. *Drury v. Ewing*, 1 Bond, 540 (§§ 112-14).

VII. SALE ON EXECUTION.

SUMMARY — *Sale of copper-plate*, § 386.

§ 386. The sale on execution of the plate from which a copyrighted map is printed does not confer on the purchaser the right of printing and selling the map. *Stevens v. Gladding*, §§ 387-89.

STEVENS v. GLADDING.

(17 Howard, 447-455. 1854.)

Opinion by MR. JUSTICE CURTIS.

STATEMENT OF FACTS.—The appellant filed his bill in the circuit court of the United States for the district of Rhode Island, to restrain the defendants from printing and publishing a map of that state, whereof he claimed to be the exclusive proprietor, under the act of congress of February 3, 1831 (4 Stats. at Large, 438), concerning copyrights of maps, etc. The defendants admit that they have sold such maps, but allege that a copper-plate owned by the plaintiff was duly sold on an execution which issued on a judgment recovered against the plaintiff in the court of common pleas for the county of Bristol, in the state of Massachusetts, and that one Isaac H. Cady was the purchaser of the plate under that sale; that Cady has used the plate to print the said maps, and the defendants have sold them; and they insist that by the purchase of

the copper-plate Cady acquired the right to print maps therewith, and to publish and sell them; and that, therefore, the defendants have not infringed on any exclusive right of the complainants.

By reference to the case of *Stevens v. Cady*, reported in 14 How., 528, it will be seen that the same title, now asserted by these defendants, was tried on that case, between the complainant and Cady. But, as is stated in the report of that case, no counsel then appeared or was heard in support of Cady's title; and Mr. Justice Woodbury, who sat in the cause in the circuit court, having deceased, this court was not apprised of the grounds and reasons on which the decree of that court dismissing the bill rested; and when this cause was called, counsel having appeared and desired to be heard, though he frankly avowed that the question passed on in the former case was the only one which could be raised, the court readily assented, and, having now considered the argument of the respondent's counsel, the court directs me to state its opinion in the cause.

The positions assumed by the respondent's counsel are that copy and patent-rights are subject to seizure and sale on execution; and that whenever the owner of a copyright of a map causes a plate to be made which is capable of no beneficial use except to print his map, he thereby annexes to the plate the right to use it for printing that map, and also the right to publish and sell the copies when printed; and that when the plate is sold on execution, these rights pass with the plate, and as incidents or accessories thereto, though no mention is made of them in the sale.

§ 387. *By the sale on execution of a copper-plate of a map the right to print and publish or sell maps from it does not pass, but remains in the owner of the copyright. (a)*

There would certainly be great difficulty in assenting to the proposition that patent and copyrights, held under the laws of the United States, are subject to seizure and sale on execution. Not to repeat what is said on this subject in 14 How., 531, it may be added that these incorporeal rights do not exist in any particular state or district; they are co-extensive with the United States. There is nothing in any act of congress, or in the nature of the rights themselves, to give them locality anywhere, so as to subject them to the process of courts having jurisdiction limited by the lines of states and districts. That an execution out of the court of common pleas for the county of Bristol, in the state of Massachusetts, can be levied on an incorporeal right subsisting in Rhode Island or New York will hardly be pretended. That by the levy of such an execution the entire right could be divided, and so much of it as might be exercised within the county of Bristol sold, would be a position subject to much difficulty.

These are important questions, on which we do not find it necessary to ex-

(a) The copper-plate engraving, like any other tangible personal property, is the subject of seizure and sale on execution, and the title passes to the purchaser the same as if made at a private sale. But the incorporeal right, secured by the statute to the author, to multiply copies of the map by the use of the plate, being intangible, and resting altogether in grant, is not the subject of seizure or sale by means of this process — certainly not at common law. No doubt the property may be reached by a creditor's bill, and be applied to the payment of the debts of the author, the same as stock of the debtor is reached and applied, the court compelling a transfer and sale of the stock for the benefit of the creditors. 20 J. R., 554; 5 J. Ch., 280; S. C., 4 id., 687; 1 Paige, 637. But in case of such remedy, we suppose it would be necessary for the court to compel a transfer to the purchaser, in conformity with the requirements of the copyright act, in order to invest him with a complete title to the property. *Stevens v. Cady*,* 14 How., 528.

press an opinion, because, in this case, neither the copyright as such, nor any part of it, was attempted to be sold. The return of the officer on the execution is that he seized and sold "one copper-plate for the map of the state of Rhode Island." The defendants must, therefore, stand upon the second position assumed by their counsel, that the right to print and publish the map passed by the execution sale with the plate.

There are no special facts in this case to distinguish it from any case of a sale on execution of copper or stereotype plates. It appears that the plaintiff owned the plate; whether he made it, or caused it to be made, or purchased it after it had been made, does not appear.

Nor should the case be confounded with one where the owner of copper or stereotype plates sells them. What rights would pass by such a sale would depend on the intentions of its parties, to be gathered from their contract and its attendant circumstances. In this case, the owner of the copyright made no contract of sale, and necessarily had no intention respecting its subject-matter.

The sole question is whether the mere fact that the plaintiff owned the plate attached to it the right to print and publish the map, so that this right passed with the plate by a sale on execution.

And upon this question of the annexation of the copyright to the plate it is to be observed, first, that there is no necessary connection between them. They are distinct subjects of property, each capable of existing, and being owned and transferred, independent of the other. It was lawful for any one to make, own and sell this copper-plate. The manufacture of stereotype plates is an established business, and the ownership of the plates of a book under copyright may be, and doubtless in practice is, separated from the ownership of the copyright. If an execution against a stereotype founder were levied on such plates, which he had made for an author and not delivered, the title to those plates would be passed by the execution sale, and the purchaser might sell them, but clearly he could not print and publish a book for which they were made. The right to print and publish is therefore not necessarily annexed to the plate, nor parcel of it.

Neither is the plate the principal thing, and the right to print and publish an incident or accessory thereof. It might be more plausibly said that the plate is an incident or accessory of the right; because the sole object of the existence of the plate is as a means to exercise and enjoy the right to print and publish.

Nor does the rule that he who grants a thing grants impliedly what is essential to the beneficial use of that thing apply to this case. A press, and paper and ink, are essential to the beneficial use of a copper-plate. But it would hardly be contended that the sale of a copper-plate passed a press, and paper and ink, as incidents of the plate, because necessary to its enjoyment.

The sale of a copper-plate passes the right to such lawful use thereof as the purchaser can make, by reason of the ownership of the thing he has bought; but not the right to a use thereof, by reason of the ownership of something else which he has not bought, and which belongs to a third person. If he has not acquired a press, or paper, or ink, he cannot use his plate for printing, because each of these kinds of property is necessary to enable him to use it for that purpose. So, if he has not acquired the right to print the map he cannot use his plate for that purpose, because he has not made himself the owner of something as necessary to printing as paper and ink, and as clearly

a distinct species of property as either of those articles. He may make any other use of the plate of which it is susceptible. He may keep it till the expiration of the limited time during which the exclusive right exists, and then use it to print maps. He may sell it to another, who has the right to print and publish, but he can no more use that right of property than he can use a press, or paper, which belongs to a third person.

The cases mentioned at the bar, in which incorporeal rights have been held to pass with corporeal property, do not apply.

By the levy of an execution on a mill, the incorporeal rights actually annexed to the mill, and necessary to its use, pass with the mill. So does what is parcel of the mill, though temporarily removed from it — as a mill-stone, which has been taken from its place to be picked. These, and many other such cases, are collected in Broom's Legal Maxims, 198, 205.

But the right in question is not parcel of the plate levied on, nor a right merely appendant or appurtenant thereto; but a distinct and independent property, subsisting in grant from the government of the United States, not annexed to any other thing, either by the act of its owner or by operation of law.

For these reasons, as well as those stated in 14 How., our conclusion is, that the mere ownership of a copper-plate of a map, by the owner of the copyright, does not attach to the plate the exclusive right of printing and publishing the map, held under the act of congress, or any part thereof; but the incorporeal right subsists wholly separate from and independent of the plate, and does not pass with it by a sale thereof on execution.

The next question is, whether the complainant can have a decree in accordance with the prayer of his bill, for the penalties imposed by the seventh section of the act of February 3, 1831. The bill prays specifically for a decree for these penalties. We speak of the forfeiture of the printed copies, as well as of the sum of \$1 for each sheet unlawfully printed, as penalties; for, under the laws of the United States, it is clear that the complainant can have no title to either of them, except by way of penalty.

There being no common law of copyright in this country, whatever rights are possessed by the proprietor of the copyright must be derived from some grant thereof, in some act of congress, either *nominatim* or by a satisfactory implication; and, looking to the act of congress applicable to this subject-matter, it appears that the rights claimed by this bill are expressly conferred by way of forfeiture. Its language is: "Then such offender shall forfeit the plate or plates on which such map, etc., shall be copied, and also all and every sheet thereof so copied or printed as aforesaid, to the proprietor or proprietors of the copyright thereof; and shall further forfeit \$1 for every sheet of such map, etc., which may be found in his or their possession, printed, etc., contrary to the true intent and meaning of this act; the one moiety thereof to the proprietor or proprietors, and the other moiety to the use of the United States, to be recovered in any court having competent jurisdiction thereof."

In the case of *Colburn v. Simms*, 2 Hare, 554, Mr. Vice-chancellor Wigram came to the conclusion that, since the decision of the house of lords in the case of *Miller v. Taylor*, the right to a decree for the delivery up of copies must be rested by the complainant upon some statute provision; and that inasmuch as courts of equity do not enforce forfeitures by an exercise of their ordinary jurisdiction, such a jurisdiction also must be derived from an act of parliament. And though the eighth section of the act of 1 and 2 Vict., ch. 59, as

well as the preceding act of 54 Geo. III., ch. 156, § 4, allows the forfeited copies to be recovered in "any court of record in which an action at law, or a suit in equity, shall be commenced by such author or authors, or other proprietor or proprietors," etc., yet it was admitted, in *Colburn v. Simms*, that no such order had ever been made, *in invitum*, in a court of equity. It is a significant fact that congress, in legislating on this subject, though manifestly acquainted with the phraseology of the act of Geo. III., and though in some particulars it adopted that phraseology, yet omitted to confer upon courts of equity power to enforce either of the forfeitures provided for, but left them to be recovered "in any court having competent jurisdiction thereof." And the only equitable jurisdiction, as to copyright, conferred upon the courts of the United States, is by the act of February 15, 1819 (3 Stats. at Large, 481), which gives original cognizance to the courts of the United States, as well in equity as at law, of cases arising under any law of the United States granting to authors or inventors the exclusive right to their respective writings, inventions and discoveries; and, upon any bill in equity filed by any party aggrieved in any such case, shall have authority to grant injunctions according to the course and principles of courts of equity, to prevent the violation of the rights of any authors or inventors secured to them by any laws of the United States, on such terms as the said courts may deem fit and reasonable. Though the substance of this enactment is incorporated into the seventeenth section of the patent act of July 4, 1836, so far as it related to inventors, and so far as it related to the subject of patent-rights, is no longer in force, *proprio vigore*, yet, so far as it gave cognizance to the courts of the United States of cases of copyright, it still remains in force, and is the only law conferring equitable jurisdiction on those courts in such cases; for the ninth section of the act of February 3, 1831, protects manuscripts only.

§ 388. *Courts of equity have not power to enforce forfeitures for violation of copyright.*

There is nothing in this act of 1819 which extends the equity powers of the courts to the adjudication of forfeitures; it being manifestly intended that the jurisdiction therein conferred should be the usual and known jurisdiction exercised by courts of equity for the protection of analogous rights. The prayer of this bill for the penalties must therefore be rejected.

The remaining question is, whether there ought to be a decree for an account of the profits. The complainant has not prayed for such an account, nor have the defendants stated one in their answer; but the bill does pray for general relief.

§ 389. *Where a bill states a proper case for an account, one may be ordered under the prayer for general relief.*

The right to an account of profits is incident to the right to an injunction in copy and patent-right cases. *Colburn v. Simms*, 2 Hare, 554; 3 Dan. Ch. Pr., 1797. And this court has held, in *Watts v. Waddle*, 6 Pet., 389, that, where the bill states a case proper for an account, one may be ordered under the prayer for general relief. See, also, 2 Pet., 612; 14 id., 156; 16 id., 195; 9 How., 405.

The decree of the circuit court must be reversed and the cause remanded to the circuit court, with directions to award a perpetual injunction as prayed for in the bill, and to take an account of the profits received by the defendants from the sales of the map.

B. TRADE-MARKS.

I. IN GENERAL, §§ 390-406.	IV. POWERS OF CONGRESS, §§ 528-536.
II. WHAT MAY BE USED AS A TRADE-MARK, §§ 407-520.	V. RIGHT TO USE OF AN ESTABLISHED TRADE-MARK, §§ 537-564.
III. ADOPTION AND REGISTRATION, §§ 521-527.	VI. INFRINGEMENT, §§ 565-605.
	VII. SUITS FOR INFRINGEMENT, §§ 606-631.

I. IN GENERAL.

§ 390. **General principles.**—Trade-marks are protected on the ground of property, and not exclusively on the ground of fraud, and damages will be allowed for an unauthorized, though unintentional, use of a trade-mark. *Oakes v. Tousmierre*,* 4 Woods, 547.

§ 391. Equity gives relief for the infringement of a trade-mark upon the ground that one person is not allowed to offer his goods for sale representing them to be the manufacture of another. *Manhattan Medicine Co. v. Wood*, 4 Cliff., 461; 14 O. G., 519 (§§ 550-51).

§ 392. Where a person has appropriated a particular trade-mark to distinguish his goods from other similar goods, he has a right of property in it which entitles him to its exclusive use which equity will protect. *Hostetter v. Vowinkle*,* 1 Dill., 329.

§ 393. The basis of the action of a court of equity to restrain the infringement of the right to a trade-mark is fraud on the part of the defendant. *Delaware & Hudson Canal Co. v. Clark*,* 7 Blatch., 112.

§ 394. In suits against an infringer of a trade-mark, the question is not whether the complainant was the original inventor or proprietor of the article made by him, and on which he has put his trade-mark, nor whether the article made by the respondent is equal to his own in value or quantity, but the court proceeds on the ground that the complainant has a valuable interest in the good-will of his trade or business, and that, having adopted a particular label, sign or trade-mark, indicating to his customers that the article bearing it is made or sold by him or by his authority, or that he carries on business at a particular place, he is entitled to protection against one who attempts to deprive him of his trade or customers by using such labels, signs or trade-mark without his knowledge or consent. *McLean v. Fleming*, 6 Otto, 245; 10 Ch. Leg. N., 252 (§§ 431-40).

§ 395. **Rights of creditors.**—A court of equity will not direct the sale, for the benefit of creditors, of the interest of a debtor in a trade-mark, consisting of the name of the firm of which he is a member. *Taylor v. Bemis*,* 4 Biss., 406.

§ 396. An assignee of a trade-mark is not affected by a private and secret agreement between the original proprietors of the trade-mark of which he has no notice. *Oakes v. Tousmierre*,* 4 Woods, 547.

§ 397. **Quack medicines.**—A person whose business is imposition cannot invoke the aid of equity against a piracy of his trade-mark. So the unauthorized use of a trade-mark of a quack medicine will not be enjoined. *Fowle v. Spear*,* 7 Pa. L. J., 176; 4 Pa. L. J. Rep., 145; 11 Law Rep., 130; 1 Law Rep. (N. S.), 130.

§ 398. A court of equity will not interfere by injunction to prevent the use of a word as a trade-mark for a patent quack medicine. *Heath v. Wright*,* 3 Wall. Jr., 141.

§ 399. **Evidence of a custom** in England and elsewhere abroad to counterfeit the trade-marks of aliens with impunity is inadmissible as a defense in an action to recover damages for the unauthorized use of a trade-mark. Nor is it admissible to show acquiescence on the part of the plaintiff. *Taylor v. Carpenter*,* 2 Woodb. & M., 1; 10 Law Rep., 35.

§ 400. **Acquiescence** in the unauthorized use of a trade-mark will not bar an action for damages for such use unless continued for the period prescribed by the statute of limitations. *Ibid.*

§ 401. **No defense that others infringe.**—It is no defense to a suit for the infringement of a trade-mark that others are guilty of the same infringement, where there has been no surrender of rights by the plaintiffs to the public, or the infringers. *Taylor v. Carpenter*,* 3 Story, 458; 7 Law Rep., 437; 2 West. L. J., 187.

§ 402. **Aliens.**—The unauthorized use of a trade-mark of thread, and an imitation of spools and labels, will be enjoined even though the plaintiffs are aliens, and their thread is manufactured abroad. *Ibid.*

§ 403. An alien friend may maintain an action in the courts of this country to recover damages for an unauthorized use of his trade-mark, even though such right is not allowed our citizens in the country to which he belongs. *Taylor v. Carpenter*,* 2 Woodb. & M., 1; 10 Law Rep., 35.

§ 404. **Right to make and sell an article.**— A person does not, by the invention of an article not patented, secure to himself the exclusive right to manufacture and sell it. Any other person may make and sell it. *Coffeen v. Brunton*,* 4 McL., 516; 7 West. L. J., 59.

§ 405. **The right to use a trade-mark** depends upon its use. *William Rogers Manuf'g Co. v. Rogers & Spurr Manuf'g Co.*, 11 Fed. R., 495 (§§ 470-72).

§ 406. **A trade-mark will protect** only the particular kind of goods set forth in the statement filed. *Osgood v. Rockwood*,* 11 Blatch., 310.

II. WHAT MAY BE USED AS A TRADE-MARK.

SUMMARY— *Marks and brands*, § 407.— *Labeled packages of a peculiar shape*, § 408.— *Wrapper of a certain size, color and lettering*, § 409.— *Labels*, § 410.— *Barrel of a peculiar size and shape*, § 411.— *Shape and color of an article*, § 412.— *Words*, § 413.— *Name descriptive of article*, § 414.— *Geographical names*, §§ 415, 416, 417.— *Use of the word "Durham" in connection with the figure of a bull*, § 418.— *Expiration of patent*, §§ 419-422.— *Letters denoting quality*, § 423.— *Figures*, § 424.— *Symbols of a certain form, size and color*, § 425.— *Appropriation of good-will of another business*, § 426.— *Names of persons*, § 427.— *Right to use one's own name*, § 428.— *"Parabola," as applied to needles*, § 429.— *"Yankee,"* § 430.

§ 407. Where a person has been in the habit of stamping his goods with a particular mark or brand, so that the purchasers of his goods having that mark or brand know them to be of his manufacture, no other manufacturer has a right to adopt the same stamp. *McLean v. Fleming*, §§ 431-440.

§ 408. Whether a manufacturer has a trade-mark or not, if he was the first to put up his goods for sale in peculiarly shaped and labeled packages adopted by him, and his goods become known to purchasers and are purchased by them as his manufacture by reason of the peculiar shape, color and label of the packages, no person has the right to use the same form of package, color or label, or any imitation thereof, in such a manner as to deceive purchasers into believing that they are purchasing the goods of the original manufacturer, no matter whether they are better or worse in quality. *Sawyer v. Horn*, § 441.

§ 409. A wrapper used on a small bottle containing bluing, divided into compartments, in one of which are the words "Sawyer's Crystal Blue and Safety Box," other words in finer type, commendatory of the article and giving directions for its use, being printed in the other compartments, is infringed by a wrapper of the same size, color, type and general appearance, and containing in one of the compartments the words "Sawin's Soluble Blue and Pepper Box." *Sawyer v. Kellogg*, § 442.

§ 410. The use of a label made in imitation of a label in use for a long time upon an article of the same nature, and which is calculated to deceive purchasers, will be enjoined. *Ibid.*

§ 411. A barrel of peculiar size, shape and construction, without any marks, symbols or devices of any kind impressed upon or connected with it, cannot become a trade-mark or the substantive part of a trade-mark. *Moorman v. Hoge*, §§ 443, 444.

§ 412. The shape and color of an article cannot be claimed and protected as a trade-mark. These may be copied with exactness without inflicting any legal injury, unless the party attributes a false origin to that which he has made. *Fairbanks v. Jacobus*, §§ 461, 462.

§ 413. In order that mere words may be upheld as a trade-mark, they must be merely arbitrary, or they must indicate the origin or ownership of the article to which they are affixed. If they are expressive only of the name or quality of the article, and have acquired that significance in the market, their use cannot be exclusive. *Burton v. Stratton*, §§ 445-452.

§ 414. The question whether a term applied to an article has become so well known as to stand in the public eye as denoting its character and quality, and not its origin or ownership, as it did when first applied, is for the determination of the court from the term itself and the evidence. If manufactured and sold by a number of persons under a particular name, this would be conclusive against the exclusive right to use the name as a trade-mark, as the term would thereby become generic, or indicative of quality. But if the primary object of the trade-mark was to indicate origin or ownership, the mere fact that the article has obtained such a wide sale that the mark has also become indicative of quality is not sufficient of itself to debar the owner of protection. *Ibid.*

§ 415. The use of the words "Lackawanna coal," as applied to coal mined in the Lackawanna valley, will not be enjoined at the suit of the owners of the mine first operated in that locality, who first applied that term to the product of their mine. *Canal Co. v. Clark*, §§ 453-456.

§ 416. The name of a district of country cannot be applied to a well-known article of commerce in such a manner as to prevent others inhabiting the district or dealing in similar articles from truthfully using the same designation. It is only when the adoption or imitation of what is claimed to be a trade-mark amounts to a false representation that there is any title to relief against it. Purchasers may be mistaken, but they are not deceived, by false representations, and equity will not enjoin the telling of the truth. *Ibid.*

§ 417. Tobacco grown in the vicinity of Durham, North Carolina, having special and peculiar characteristics, and having acquired a reputation for special excellence, the use of the word "Durham" by manufacturers at other points would be enjoined as being a fraud on the public. *Blackwell v. Dibrell*, §§ 457-459.

§ 418. *Blackwell & Co.* have the exclusive right to the use of the word "Durham" and the side figure of a bull as a trade-mark for tobacco. *Ibid.*

§ 419. Where a machine has acquired a name which designates a mechanism or a peculiar construction, parts of which are protected by patents, other persons, after the expiration of the patents, have the right to construct the machine and call it by that name, because that only expresses the kind and quality of the machine; but such other persons will not be allowed to place upon their machines marks and devices which would lead the public to think they were made by the original manufacturers. *Singer Manuf'g Co. v. Larsen*, § 460.

§ 420. The words "Singer Sewing Machine" do not constitute a proper trade-mark. *Ibid.*

§ 421. After the expiration of the Fairbanks' scale patents the use of the words "Fairbanks' Patent" upon scales cannot be protected as a trade-mark, especially when the words are so used as to produce the belief that the scales are still protected by patents and there has been acquiescence in such infringement. *Fairbanks v. Jacobus*, §§ 461, 462.

§ 422. When, during the whole existence of a patent, articles embodying the principles of the patented article and called by the same name were manufactured and sold with the acquiescence of the patentee, he cannot claim, as against such manufacturer, an exclusive right to such name as a trade-mark for such articles after the expiration of the patent. *Filley v. Child*, § 463.

§ 423. Letters used by a manufacturer to denote merely the quality of the article to which they are affixed cannot be appropriated by him as an exclusive trade-mark. *Manufacturing Co. v. Trainer*, §§ 464-467.

§ 424. The court being in doubt whether the character $\frac{1}{2}$, stamped upon packages of cigarettes, was used merely as an arbitrary trade-mark, or as calculated in some sort to indicate the idea of half-and-half, refused a general injunction; but held that the complainant had the right to the exclusive use of the symbol in the form, size, color and style in which he had been accustomed to use it. *Kinney v. Allen*, §§ 468, 469.

§ 425. The use of a symbol which indicates but does not express an idea embodied in the articles to which it is attached will not be enjoined; but where such symbol is used in a certain form, size and color, it is a trade-mark in the use of which the owner will be protected. *Ibid.*

§ 426. A person cannot apply his name to articles of his manufacture in such a manner as to appropriate to himself the good-will of a business established by others of that name. *William Rogers Manuf'g Co. v. Rogers & Spurr Manuf'g Co.*, §§ 470-472.

§ 427. The names of persons may be used as a trade-mark by a corporation, and such use will be protected though the persons whose names are used are not connected with the manufacture of the goods upon which their names appear. *Ibid.*

§ 428. A person has not the right to the exclusive use of his name as a trade-mark, as against another person of the same name, unless such other person uses a form of stamp or label so like that used by him as to represent that the goods of the former are of the latter's manufacture. Nor will any other name, merely as such, confer any such exclusive right unless the name is printed in some particular manner in a label of some particular characteristics, so that it becomes to some extent identified with a particular kind of goods, or when the name is used by a person in connection with his place of business, in such a manner that it assumes the character of a trade-mark. *McLean v. Fleming*, §§ 431-440.

§ 429. The word "Parabola" is a proper trade-mark for needles, and its use as applied to needles will be enjoined, even though used in connection with the name of the defendant manufacturer. The claim of the defendant that the word is descriptive of the eyes of the needles is immaterial when no reference is made thereto on the label, and does not appear correctly to describe the shape of the eye. *Roberts v. Sheldon*, § 473.

§ 430. The word "Yankee" may be used as a trade-mark applied to soap. *Williams v. Adams*, §§ 474, 475.

[NOTES.—See §§ 476-520.]

MCLEAN *v.* FLEMING.

(6 Otto, 245-258. 1877.)

APPEAL from U. S. Circuit Court, Eastern District of Missouri.

The facts are stated in the opinion with sufficient fullness for an understanding of the questions decided.

Opinion by MR. JUSTICE CLIFFORD.

STATEMENT OF FACTS.—Protection for lawful trade-marks may be obtained by individuals, firms or corporations entitled to the same, if they comply with the requirements prescribed by the act of congress; and the provision is that a trade-mark, duly registered as required, shall remain in force thirty years from the date of such registration, subject to an exception not necessary to be noticed. 16 Stat., 210; R. S., secs. 4937, 4941.

Exclusive ownership of a certain medicinal manufacture, known as "Dr. C. McLane's Liver Pills," and of the trade-mark used in advertising and vending the same, is claimed by the complainant; and the record shows that he, on the 1st day of June, 1872, filed in the circuit court a bill of complaint against the respondent, charging that the respondent had unlawfully infringed the said trade-mark; and he prayed for a decree that the respondent shall render an account of the gains and profits made by the infringement, and for an injunction.

Service was made, and the respondent appeared and filed an answer. Proofs were taken; and, the parties having been heard, the court entered a decretal order in favor of the complainant, and sent the cause to a master, to compute the amount of the gains and profits. Due report was made by the master, to which the respondent excepted; and the court overruled the exception, confirmed the report of the master, and entered a final decree for the complainant, in the sum of \$7,399.35.

All matters in that court having been finally determined, the respondent appealed to this court, and assigns errors as follows: 1. That the court erred in finding that the labels L and K, or either of them, infringed Exhibit F, as set forth in the decretal order. 2. That the court erred in finding that the complainant was entitled to any damages, and in ordering the assessment thereof, and in allowing him costs. 3. That the court erred in ordering an account of the sales of Exhibits L and K, prior to the 16th of October, 1871, the date of the first use of Exhibit H by the complainant. 4. That the court erred in overruling the respondent's exception to the master's report.

Medicines of the kind described were first prepared and sold by the physician whose name the pills bear, by putting the same in wooden boxes, labeled with the name of the inventor. For ten years, or more, he used the pills in his practice; but the evidence shows that, on the 19th of June, 1844, he sold the right to use the same to Jonathan Kidd, who, for a year or more, prepared and sold the pills under that agreement, when he formed a partnership with John Fleming, under the style of "Jonathan Kidd & Co.;" which firm continued to prepare and sell the pills until March 29, 1853, when the senior partner died.

They (the firm) dealt largely in the business; and, as early as 1847, in order to designate the medicine as an article of their own manufacture, and to prevent imposition and fraud, they commenced putting the pills in wooden boxes, of uniform size, shape and appearance, each box containing twenty-two pills, with the name of the original inventor stamped in red wax under the cover of

each box, around which they placed the red label or wrapper described in the bill of complaint. Beyond doubt, that label, with its devices, and the red seal on the box, constituted the trade-mark by which the firm made known to their customers and the public the genuine pills which they prepared and sold; the firm being at the time the owners of the original recipe, and having the exclusive right to make and vend the pills.

Within a month subsequent to the death of the senior partner of the firm, his executors sold and conveyed all the interest of the decedent in the business to the surviving partner and the complainant, whereby they, under the firm name of "Fleming Brothers," acquired not only the title to the recipe and the right to make and vend the pills, but also the right to use the labels and trade-marks used by the former owners. Possessed of the whole interest, they (the firm, Fleming Brothers) prosecuted the business, with some changes in the individual partners, until July 1, 1865, when the present complainant sold out his whole interest to his brother, John Fleming, who, as sole proprietor of what the firm owned, continued the business until the 2d of November, 1870, when he died, leaving a last will and testament.

When that firm acquired the entire interest, they immediately enlarged the business, and in the year 1855 they adopted the dark label, Exhibit F, which is fully and minutely described in the bill of complaint; and the complainant avers that it has since been used in the business, with no other substantial alterations than what are shown in Exhibit H, mentioned in the decretal order. Both parties agree that the complainant, by the will of his deceased brother, acquired all the rights which the deceased had in the business; and the record shows that he has, since the probate of the will on the 9th of November, 1870, been preparing and vending said pills, and using the labels and trade-marks to designate their genuineness and to commend their value and utility.

Evidence was introduced by the respondent, whose name is James H. McLean, that he commenced in 1849, in St. Louis, to manufacture his own medicines; that in 1851 he began to manufacture and sell liver pills, under the name of "Dr. McLean's Universal Pills," using first a type-printed label in red letters, which was changed, in 1852, to a lithographed red label, called in the decretal order "Exhibit L," which was used down to 1866, except that about 1863 he added to his name the initials "J. H.," so that the label read "Dr. J. H. McLean's Universal Pills;" that in 1866 he changed his label to the one referred to in the decretal order as "Exhibit K," which he continued to use until May 21, 1872, when he adopted a new label, the use of which does not infringe the trade-mark of the complainant.

Governed by these facts as stated, the court will examine the first error assigned; which is, that the court erred in finding that the labels L and K infringed complainant's Exhibit H, as set forth in the decretal order. By the order, the respondent, James H. McLean, his agents, employees and servants, are perpetually enjoined and restrained from using, or causing to be used, the words "Dr. J. H. McLean's Universal Pills or Vegetable Liver Pills," or the words "Dr. McLean's Universal Pills," upon any label or wrapper for boxes or other packages of pills resembling or in imitation of the labels, wrappers or trade-mark of the complainant, described in his bill of complaint as "Exhibit H," whether in style of engraving, printing or lettering; and from vending or exposing for sale, or causing to be vended or exposed for sale, any article of pills having upon the boxes or other packages thereof any such labels or wrap-

pers so made in imitation of or resemblance to the said labels or wrappers of the complainant.

§ 431. *Where a manufacturer stamps his goods with a particular mark no other person has a right to use the same mark.*

Equity gives relief in such a case upon the ground that one man is not allowed to offer his goods for sale, representing them to be the manufacture of another trader in the same commodity. Suppose the latter has obtained celebrity in his manufacture, he is entitled to all the advantages of that celebrity, whether resulting from the greater demand for his goods or from the higher price the public are willing to give for the article, rather than for the goods of the other manufacturer, whose reputation is not so high as a manufacturer. Where, therefore, a party has been in the habit of stamping his goods with a particular mark or brand, so that the purchasers of his goods having that mark or brand know them to be of his manufacture, no other manufacturer has a right to adopt the same stamp; because, by doing so, he would be substantially representing the goods to be the manufacture of the person who first adopted the stamp, and so would or might be depriving him of the profit he might make by the sale of the goods which the purchaser intended to buy. *Seixo v. Provezende*, Law Rep., 1 Ch., 195.

§ 432. *What constitutes infringement.*

What degree of resemblance is necessary to constitute an infringement is incapable of exact definition, as applicable to all cases. All that courts of justice can do, in that regard, is to say that no trader can adopt a trade-mark so resembling that of another trader as that ordinary purchasers buying with ordinary caution are likely to be misled.

§ 433. *Delay as a ground for refusing relief.*

Unreasonable delay in bringing a suit is always a serious objection to relief in equity; but cases arise in litigations of the kind before the court where the complainant may be entitled to an injunction to restrain the future use of a trade-mark, even when it becomes the duty of the court to deny the prayer of the bill of complaint for an account of past gains and profits. *Harrison v. Taylor*, 11 Jur. (N. S.), 408.

§ 434. *The right to a trade-mark is based on the ground that the party has a valuable interest in the good-will of his trade of which the trade-mark is an important accessory.*

In such cases the question is not whether the complainant was the original inventor or proprietor of the article made by him, and on which he puts his trade-mark, nor whether the article made and sold under his trade-mark by the respondent is equal to his own in value or quality, but the court proceeds on the ground that the complainant has a valuable interest in the good-will of his trade or business, and, having adopted a particular label, sign or trade-mark, indicating to his customers that the article bearing it is made or sold by him or by his authority, or that he carries on business at a particular place, he is entitled to protection against one who attempts to deprive him of his trade or customers by using such labels, signs or trade-mark without his knowledge or consent. *Coats v. Holbrook*, 2 Sandf. (N. Y.) Ch., 586; *Partridge v. Menck*, 2 Barb. (N. Y.) Ch., 101.

Everywhere courts of justice proceed upon the ground that a party has a valuable interest in the good-will of his trade and in the labels or trade-mark which he adopts to enlarge and perpetuate it. Hence it is held that he, as proprietor, is entitled to protection as against one who attempts to deprive him

of the benefits resulting from the same by using his labels and trade-mark without his consent and authority. Decided cases to that effect are quite numerous, and it is doubtless correct to say that a person may have a right in his own name as a trade-mark as against a trader or dealer of a different name; but the better opinion is that such a party is not, in general, entitled to the exclusive use of a name, merely as such, without more. *Millington v. Fox*, 3 Myl. & C., 338; *Dent v. Turpin*, 2 J. & H., 139; *Meneely v. Meneely*, 62 N. Y., 427.

Instead of that he cannot have such a right, even in his own name, as against another person of the same name, unless such other person uses a form of stamp or label so like that used by the complaining party as to represent that the goods of the former are of the latter's manufacture. Nor will any other name, merely as such, confer any such exclusive right, unless the name is printed in some particular manner in a label of some peculiar characteristics, so that it becomes, to some extent, identified with a particular kind of goods, or when the name is used by the party, in connection with his place of business, in such a manner that it assumes the character of a trade-mark within the legal meaning of that term, and as such entitles the party to the protection of a court of equity, to prevent others from infringing the proprietor's exclusive right. *Gilman v. Hunnewell*, 122 Mass., 139; *Colladay v. Baird*, 4 Phil. (Pa.), 139; *Sykes v. Sykes*, 3 B. & C., 541; *Croft v. Day*, 7 Beav., 89; *Burgess v. Burgess*, 3 DeG., M. & G., 896; *Holloway v. Holloway*, 13 Beav., 209; *Rogers v. Taintor*, 97 Mass., 291.

§ 435. *What constitutes an infringement of a trade-mark. Positive proof of fraudulent intent is not required.*

Much must depend, in every case, upon the appearance and special characteristics of the entire device; but it is safe to declare, as a general rule, that exact similitude is not required to constitute an infringement or to entitle the complaining party to protection. If the form, marks, contents, words, or the special arrangement of the same, or the general appearance of the alleged infringer's device, is such as would be likely to mislead one in the ordinary course of purchasing the goods, and induce him to suppose that he was purchasing the genuine article, then the similitude is such as entitles the injured party to equitable protection, if he takes seasonable measures to assert his rights, and to prevent their continued invasion. *James v. James*, Law Rep., 13 Eq., 425; *Singleton v. Bolton*, 3 Doug., 293; *Morrison v. Salmon*, 2 Man. & G., 385; *Boardman v. Meriden Britannia Co.*, 35 Conn., 413.

Such a proprietor, if he owns or controls the goods which he exposes to sale, is entitled to the exclusive use of any trade-mark adopted and applied by him to the goods, to distinguish them as being of a particular manufacture and quality, even though he is not the manufacturer, and the name of the real manufacturer is used as part of the device. *Walton v. Crowley*, 3 Blatch., 440; *Emerson v. Badger*, 101 Mass., 82.

Equity courts will not, in general, refuse an injunction on account of delay in seeking relief, where the proof of infringement is clear, even though the delay may be such as to preclude the party from any right to an account for past profits. *Rodgers v. Rodgers*, 31 L. T., 285; *Blackwell v. Crabb*, 45 L. J., Pt. I., 505. Positive proof of fraudulent intent is not required where the proof of infringement is clear, as the liability of the infringer arises from the fact that he is enabled, through the unwarranted use of the trade-mark, to sell a simulated article as and for the one which is genuine. *Wotherspoon v. Currie*, Law Rep., 5 App. Cas., 512.

Nor is it necessary, in order to give a right to an injunction, that a specific trade-mark should be infringed; but it is sufficient that the court is satisfied that there was an intent on the part of the respondent to palm off his goods as the goods of the complainant, and that he persists in so doing after being requested to desist. *Woollam v. Ratcliff*, 1 Hem. & M., 259. Apply these rules to the case, and it is clear that the charge of infringement is satisfactorily proved in this case.

§ 436. *What may be used as a trade-mark.*

Words or devices, or even a name in certain cases, may be adopted as trade-marks which are not the original invention of the party who appropriates the same to that use; and courts of equity will protect the proprietor against any fraudulent use or imitation of the device by other dealers or manufacturers. Property in the use of a trade-mark, however, bears very little analogy to that which exists in copyrights or in patents for new inventions or discoveries, as they are not required to be new, and may not involve the least invention or skill in their discovery or application. Phrases, or even words in common use, may be adopted for the purpose, if, at the time of their adoption, they were not employed by another to designate the same or similar articles of production or sale. Stamps or trade-marks of the kind are employed to point out the origin, ownership, or place of manufacture or sale of the article to which it is affixed, or to give notice to the public who is the producer, or where it may be purchased. *Canal Company v. Clark*, 13 Wall., 311 (§§ 453-56, *infra*).

Subject to the qualification before explained, a trade-mark may consist of a name, symbol, figure, letter, form or device, if adopted and used by a manufacturer or merchant in order to designate the goods he manufactures or sells to distinguish the same from those manufactured or sold by another, to the end that the goods may be known in the market as his, and to enable him to secure such profits as result from his reputation for skill, industry and fidelity. *Upton*, Trade-marks, 9; *Taylor v. Carpenter*, 2 Sandf. (N. Y.) Ch., 603; *Coddington*, Dig., 9.

Complainant's pills have been in the market as a vendible article for more than forty years, and during that whole period have been sold under trade-marks of the form heretofore sufficiently described, and they are still sold under the trade-mark mentioned in the decretal order.

§ 437. *Colorable imitation of a trade-mark.*

Difficulty frequently arises in determining the question of infringement; but it is clear that exact similarity is not required, as that requirement would always enable the wrong-doer to evade responsibility for his wrongful acts. Colorable imitation, which requires careful inspection to distinguish the spurious trade-mark from the genuine, is sufficient to maintain the issue; but a court of equity will not interfere, when ordinary attention by the purchaser of the article would enable him at once to discriminate the one from the other. Where the similarity is sufficient to convey a false impression to the public mind, and is of a character to mislead and deceive the ordinary purchaser in the exercise of ordinary care and caution in such matters, it is sufficient to give the injured party a right to redress, if he has been guilty of no laches. *Amoskeag Manufacturing Co. v. Spear*, 2 Sandf. S. C., 599; *Coddington*, Dig., 109; *McAndrew v. Bassett*, 4 DeG., J. & S., 380.

Argument to show that the name of the pills, as given in the trade-mark of the respondent, was of a character to mislead and deceive, is scarcely necessary, as they are *idem sonans* in the usual pronunciation; nor can it be doubted

that the form of the box containing the pills, and the general appearance of the wrapper which surrounded it, were calculated to have the same effect. Mention may also be made of the fact that the color of the label, and the wax impression on the top of the box, are well suited to divert the attention of the unsuspecting buyer from any critical examination of the prepared article.

§ 438. *Ground on which a trade-mark is protected.*

Chancery protects trade-marks upon the ground that a party shall not be permitted to sell his own goods as the goods of another; and, therefore, he will not be allowed to use the names, marks, letters or other *indicia* of another, by which he may pass off his own goods to purchasers as the manufacture of another. *Croft v. Day*, 7 Beav., 84; *Perry v. Truefitt*, 6 id., 66; *Newman v. Alford*, 51 N. Y., 192.

Witnesses in great numbers were called by the complainant, who testified that the Exhibits L and K of the respondent were calculated to deceive purchasers; and the reasons given by them in support of the conclusion are both persuasive and convincing. Differences between those exhibits and Exhibits F and H of the complainant undoubtedly exist; and still it is manifest that the general appearance of the package in the respects mentioned, and others which might be suggested, is well calculated to mislead and deceive the unwary, and all others who purchase the article without opening the box and examining the label. *Caswell et al. v. Davis*, 58 N. Y., 223.

§ 439. *Trade-marks are substantially the same, when.*

Two trade-marks are substantially the same, in legal contemplation, if the resemblance is such as to deceive an ordinary purchaser giving such attention to the same as such a purchaser usually gives, and to cause him to purchase the one supposing it to be the other. *Gorham Company v. White*, 14 Wall., 511 (PATENTS, §§ 1910-12). Suffice it to say, without entering further into details, the court is of the opinion that the first assignment of error must be overruled, and that the injunction was properly granted to prevent infringement subsequent to the filing of the bill of complaint.

§ 440. *In case of delay and acquiescence, a decree for an account and for profits and damages is erroneous.*

Suppose that is so, still the respondent contends that the court erred, as alleged in the second assignment of errors, and that the complainant is not entitled to an account, nor to a decree for gains, profits or damages. Support to that proposition is attempted to be drawn from the long delay of the complainant, and those under whom he claims, to take any legal steps to protect their alleged rights. Opposed to that, it is insisted by the complainant that no such defense is open to the respondent, as it was not set up in the answer. Nothing of the kind is directly set up in the answer; but the respondent denies all intent to injure or defraud the complainant, and avers that he has been engaged during the last twenty years in perfecting his pills, and that he had no idea that his trade-marks infringed the trade-marks of the complainant.

Proofs were taken upon both sides upon the subject; and the respondent, in his petition for rehearing filed in the court below, expressly alleges that the immediate predecessor of the complainant was perfectly familiar with the pills manufactured by the respondent, and well knew that the respondent used the labels in question; that the agent of the complainant, May 20, 1872, called on the respondent and remonstrated with him for using the label Exhibit K, and that he on the following day adopted a different label, as therein fully explained. Examined in the light of these suggestions the court is of the opinion that the

question presented in the second assignment of error is open for re-examination. *Sullivan v. Portland, etc., Railroad Co.*, 94 U. S., 806 (Conn., §§ 1629-30).

Repetition of the facts is unnecessary, as it sufficiently appears that the respondent has been engaged in preparing and selling his pills for more than forty years; that during that period, or more than half of it, he has been using labels and trade-marks corresponding more or less to those used by the predecessors of the complainant, some of whom, during all or most of that time, knew what the labels and trade-marks were which were used by the respondent, the evidence to that effect being full and decisive. Negotiations took place at one time between the respondent and one of the predecessors of the complainant for an interchange of commodities, with a view that both commodities might be sold at each of their respective places of business.

Evidence of a decisive character is exhibited in the record to show that the complainant or his predecessor knew throughout what description of labels and trade-marks the respondent was using; and it does not appear that any objection was ever made, except as heretofore stated and explained. Once the respondent was requested to insert the initials of his christian name before his surname in the label, and it appears that he immediately complied with the request. Cases frequently arise where a court of equity will refuse the prayer of the complainant for an account of gains and profits, on the ground of delay in asserting his rights, even when the facts proved render it proper to grant an injunction to prevent future infringement. *Harrison v. Taylor*, 11 Jur. (N. S.), 408; *Cox*, Trade-marks, 541.

Relief of the kind is constantly refused, even where the right of the party to an injunction is acknowledged because of an infringement, as in case of acquiescence or want of fraudulent intent. *Moet v. Couston*, 33 Beav., 578; *Edelsten v. Edelsten*, 1 De G., J. & S., 185; *Millington v. Fox*, 3 Myl. & Cr., 398; *Wyeth v. Stone*, 3 Story, 284; *Beard v. Turner*, 13 Law Times (N. S.), 747; *Estcourt v. Estcourt*, Law Rep., 10 Ch., 276; *Coddington*, Dig., 162; *High*, Injunc., 405.

Acquiescence of long standing is proved in this case, and inexcusable laches in seeking redress, which show beyond all doubt that the complainant was not entitled to an account nor to a decree for gains or profits; but infringement having been proven, showing that the injunction was properly ordered, he is entitled to the costs in the circuit court; but the decree for an account and for the supposed gains and profits being erroneous, the respondent, as appellant, is entitled to costs in this court. *Browne*, Trade-marks, sec. 497.

Decree as to the injunction and costs in the circuit court will be affirmed, but it will be reversed as to the decree for an account and as to the allowance for gains and profits, with costs in this court for the appellant; and the cause will be remanded with direction to enter a decree in conformity with the opinion of this court; and it is so ordered.

SAWYER v. HORN.

(Circuit Court for Maryland: 4 Hughes, 239-253. 1880.)

Opinion by MORRIS, J.

STATEMENT OF FACTS.—The bill alleges that the complainant, Henry Sawyer, of the city of Boston, in the state of Massachusetts, has been for about twenty years engaged in the manufacture of bluing; that his bluing has an extended and desirable reputation in the markets of the United States, and especially in Baltimore, where it has been and now is regarded as an article of great excel-

lence, and has been sold in Baltimore and elsewhere in large quantities. That in order to identify the bluing made by him and distinguish it from all others, complainant devised and adopted, as a trade-mark, certain marks, symbols and devices, and a form of package, none of which had been before at any time applied or used in connection with bluing, and which have continually, ever since, been used by him to identify his bluing. That the marks so adopted were: 1. A red disk, applied on the top of the box, which had been first used by him in 1863, and had been registered by him, according to the statutes of the United States, as a trade-mark.

2. Certain pictorial representations of his boxes, which he used as a part of the labels, applied to the outside of the packing boxes, in which the small boxes containing the blue were packed for market.

3. An allocation or combination, consisting of words printed in bronze letters on blue paper constituting the label surrounding the small boxes containing the blue. And also a new and original and peculiar form of package or box to contain the blue, consisting of a cylinder, having a top of metal, perforated with holes, sealed with red sealing-wax. Also a packing-box with certain distinctive labels before mentioned, in which the cylindrical boxes were so packed and arranged that upon being opened nothing was exposed to sight but the red tops.

And the bill charges that the respondent Horn is engaged in Baltimore in the business of manufacturing blue, and knowing the high reputation of complainant's goods as identified by his said marks and labels and peculiar appearance, has for his own profit, and to the injury of the complainant, been selling bluing put up in boxes made in imitation of complainant's trade-marks. And that said respondent Horn had wilfully and fraudulently put up his bluing in packages substantially the same in every material respect and having substantially the same general appearance as those of complainant, and had packed the same in the precise form and manner originated and used by the complainant, and had sold the same as and for the bluing of the complainant.

The bill further alleges that the respondent's imitation of the complainant's peculiar form of packages, labels and manner of packing created confusion in the market, and misled and deceived purchasers who were familiar with and desired to obtain complainant's goods, and that respondent's goods were inferior and sold at a less price than complainant's.

The bill prays for an injunction and account. These are in substance the more important allegations of the bill.

The respondent's answer admits that the complainant is a manufacturer of bluing as alleged, but denies that prior to 1878 the complainant ever claimed any of the alleged symbols, marks or form of package as his trade-mark, or that he has ever attached to his bluing anything in the nature of a trade-mark except the *fac-simile* of his signature, the dates of the patent and reissue obtained by him, and the word "crystal;" and respondent alleges that the red top of the boxes, the blue color of the label, the lettering, type, phraseology, green box, and other matters claimed by complainant in his bill, are such as belong to commerce and the public in general, and are not susceptible of exclusive appropriation by any one. Respondent further alleges that complainant had, in the year 1864, obtained a patent for the said box containing his bluing, in which it was described as a package or case which, when made with distributing holes and filled, is cemented by wax or a wafer, which patent was afterwards held to be void.

That the red top was produced by the application of Venetian red, for the purpose of stopping the perforations in the top of the package until required to be opened for use, and that the claim of the red top as a trade-mark was an afterthought of the complainant suggested as a means of continuing his monopoly after his patent was annulled. That it was not a proper subject of registration as a trade-mark, had never been used or applied as described in the certificate of registration, and was but the ordinary use of a cheap and well known red material as a cement to close the perforations of the box, and when so applied became part of the box itself and not in any sense a trade-mark.

Respondent further claims that the pictures used by him on the lids of his larger packing boxes were simply pictures free to be used by any one, and alleges that the form of package, labels and other marks claimed by complainant are not original or peculiar, but had been long used by many persons in the same trade.

The respondent admits that he does put up and sell a bluing in boxes having a resemblance in form to those sold by the complainant, but denies that he has done so fraudulently, or that he has ever done so in imitation of the complainant's bluing, or ever done anything not warranted by a fair competition in business; and denies that he has ever offered to sell any of his goods as and for the goods of the complainant, or sold any goods bearing any marks belonging exclusively to complainant, or any false representations thereon calculated to create confusion and cause his goods to be purchased as and for the goods of the complainant.

He admits that he sells his goods cheaper than the complainant, but alleges that he gives as good an article for less money.

The case now comes on for final hearing, and we have been greatly assisted by the careful and thorough manner in which the facts have been presented, and by the able arguments of counsel, and the very numerous exhibits which have been brought to our attention illustrating and explaining the facts in this controversy and also many of the subjects of controversy passed upon in the cases cited in argument. It appears that the complainant, Sawyer, in 1863, began using the present form of box as a convenient method of putting up washing blue in a dry powder, and that he began to distinguish them by using a red colored top in 1866.

He used a box, which is a small cylinder of wood, about an inch in diameter and about two inches high. The box, when filled with the blue powder, is covered by a tin top with a flange fitting over the top of the box. The tin cover is perforated with five small holes, so that when needed for use the blue powder can be sifted out as from the ordinary pepper caster or dredging box. Until needed for use, the perforations are closed by something in the nature of sealing-wax, by pricking which the perforations can be opened.

This device was supposed by the complainant to be patentable, and he did obtain therefor a patent dated January 5, 1864, reissued October 1, 1867, but by a decree of the circuit court for the southern district of New York this patent was held to be void, and that decree upon appeal to the supreme court has, since the argument of this case, been affirmed. The bluing manufactured by the complainant and offered in packages of this form obtained great favor and became well known, and has been the source of large profits. It became well known not only in Massachusetts, where complainant's place of manufacturing is, but in Baltimore, where he has sold large quantities during the year 1871.

Upon the cylindrical box of the complainant he has, since 1866, used a label of dark blue paper, printed in silver letters, which completely envelops the box, and the metal top is covered entirely by a coating of Venetian red and varnish, so that the box, when standing upright, presents nothing but the blue label and the red top. The quantity of cement used is in excess of the quantity necessary to be applied simply to cover the five small perforations in the metal top, and not only completely covers all the top, but extends nearly a quarter of an inch down the sides of the box, enveloping the whole metal covering.

The box and label and top which the respondent uses is similar in size, shape and appearance, so that, except for the words on the label and the color of the printing, which is in gold bronze instead of silver, and a hardly observable difference in the shade of the red color on the top, there is nothing to distinguish them, and unless the two are side by side and attention has been freshly called to these differences, no one can discriminate between them. They both present the appearance at a little distance of a blue cylinder with printing in gilt letters with a red top of sealing-wax.

The respondent states that he was by trade a stone-cutter, and for a while kept a grocery store, and about 1873 began putting up bluing. That from the first he used the cylindrical box and blue label, but not the red top, and that about 1876, learning that Sawyer's patent had been held void, and supposing it was the red top which had been the subject of the patent, he then began to use the red top.

The labels, when compared, show that they are precisely of the same size and color. Both are divided by vertical lines into four sections of precisely the same sizes, but the words printed on them are different.

On Sawyer's label is printed horizontally:

Sawyer's
Crystal
Blue
and
Safety box:
Patent Jan. 5th, 1864;
re-issued Oct. 1st, 1867.

Then vertically and inclosed by the vertical lines:

The Standard Blue of America. This form is the best and cheapest method of using Bluing. The quality is unexcelled.

Directions:

Pierce the prints on the top with a pin, and shake a few grains into a cup of soft water; then stir in the rinsing water.

Prepared by H. Sawyer,
Boston, Mass.
H. Sawyer.
(fac-simile of signature.)

On Horn's label is printed, with exactly the same divisions by straight lines, and in almost the same type, horizontally:

Horn's
unexcelled Sifting box
Blue.
Baltimore.
The Standard Blue of the United States.
The quality is unequalled.

Directions:

Pierce the holes on the top with a pin, and sift a few grains in a bowl of water, stir until fully dissolved, then add to the rinsing water.

Prepared by
Jas. G. Horn,
Baltimore, Md.

No one, we think, having the two labels before him, could believe that the similarities were the result of accidental coincidence. And no one having before him the two boxes, with their similar blue labels and red tops, could fail to be convinced, we think, that there was an intentional similarity in their general appearance well calculated to deceive persons exercising ordinary caution into mistaking one for the other.

The name and place of manufacture on the labels are different and many of the words; but the color, size, type and arrangements and divisions are in such exact similitude in all respects as to divert attention from the differences and to produce the impression that they are the same. The labels, if pasted upon a flat surface, could with less difficulty be distinguished from each other, but when pasted around a small cylinder in such a way that only about a fourth of the surface can be seen at one time, it becomes a matter of painstaking comparison to detect the differences.

The proof and the exhibits also show that these cylindrical boxes are packed by Sawyer by putting four dozen of them into a square, green, paper box just deep enough to contain them when standing upright, and when the lid is taken off nothing is seen of the cylindrical boxes, as they pack very close to each other, but the red tops, and the appearance is that of an almost solid, square mass of red sealing-wax. And the proof and exhibits show that the respondent packs his cylindrical boxes in precisely the same way, presenting precisely the same appearance; the large boxes of Horn's being of the same color, and having on them labels very similar in designs and color to those of the complainant.

§ 441. *Where a manufacturer puts up his goods in a peculiar manner, so that they are known to purchasers chiefly by the appearance of the package, no other person has a right to imitate such packages to such a degree that unusual care is required to distinguish one from the other. What may be used as a trade-mark.*

We are satisfied, from an inspection of the exhibits, that the general similarity between the goods of the complainant and respondent in all these respects could not have resulted from accident, but must have been the result of intention, and that the general resemblance is so great as to lead to confusion; and that a purchaser who had been in the habit of getting Sawyer's goods would have to exercise unusual and peculiar care not to take the goods of Horn if they were offered to him.

And, as matter of fact, the depositions of a large number of persons who themselves use the blue for washing purposes in Baltimore were produced, who testified that they knew of Sawyer's blue only by the appearance of the box, and, having been in the habit of using Sawyer's blue, and expecting to get it, had taken Horn's blue when offered to them by retail dealers, supposing it was what they had been in the habit of using, knowing it only by the red top and blue box. Being satisfied that these are the facts as proved by the complainant, we are now to consider the law applicable to them, and what is the remedy, if any, to which the complainant is entitled.

As to the simple question of trade-mark, we think the respondent is sustained in the position taken by him. The red top being, as to its use, a covering for the perforations in the metal top, and as to its color and material one of the most common of all the cements used to close and seal the mouths of jars, bottles, cans and similar packages, and there being impressed on it no mark or design, it cannot, we think, be said to be a trade-mark, and cannot be exclusively appropriated by the complainant; nor can the form of his box, it

having been decided not to be a patentable contrivance, be monopolized by him; nor can the color of the label, nor the allocation of words thereon, nor the type, be exclusively appropriated. The word "crystal," as applied to bluing, may be his trade-mark if he first so applied it, and the *fac-simile* of his autograph signature, but these are all; so that it does not appear, as to anything which the complainant can call technically a trade-mark, that the respondent has been guilty of piracy or imitation.

But we do find that the respondent has been guilty of improper and inequitable conduct, to the injury of the complainant, in having designedly so put up, labeled and packed his goods that purchasers for whose use they are intended are misled and deceived, and do get Horn's blue when they desire and suppose they are getting Sawyer's. And that Sawyer, the complainant, having, after many years of manufacture, established a market and demand for his goods, as known by their peculiar and distinctive appearance, which he was the first to adopt, is now deprived of profits which he would otherwise obtain, by the fact that, after he had so established a reputation and demand for his goods, the defendant, with the intention of getting the benefit of that reputation and demand, has put his goods on the market prepared with such close imitation of the complainant's that they are mistaken for his.

The respondent, while he denied (and there is no evidence whatever to the contrary) that he ever represented, or authorized any one to represent, that his goods were Sawyer's, does, in his testimony, admit that he put up his goods with the appearance they now have because it was "fashionable," and because he found that a blue box with a red top made them more salable; and as he sells his goods to the grocers at fifty cents for four dozen, while Sawyer has been accustomed to sell his for eighty-five cents, it is easy to see that the grocers prefer to give their customers Horn's goods, if they will take them, as both retail at about the same price.

It has been said that the fundamental rule applicable to such cases is that one man has no right to put off his goods for sale as the goods of a rival dealer, and that "he cannot, therefore, be allowed to use names, marks, letters or other *indicia* by which he may induce purchasers to believe that the goods which he is selling are the manufacture of another person." *Perry v. Truefitt*, 6 Beav., 66-73. And this principle has been recognized as applicable in cases which were not strictly cases of technical trade-marks by many well considered decisions.

In *Williams v. Johnson*, 2 Bosw., 1, decided in 1857, by Chief Justice Duer and Associate Judges Hoffman and Woodruff, upon appeal to the general term of the supreme court of New York, without deciding whether or not the complainant was entitled to the use of the words "Genuine Yankee Soap," which he claimed as his trade-mark, the court held that the imitations of the size, shape, style, labels and substantial appearance of the complainant's goods by the defendant was a fraud, and that he was entitled to protection, and decreed that the defendant should be enjoined from using the labels, devices and hand-bills which he had been using, and from using any other similar ones calculated to deceive the public or create the belief that the soap sold by the defendant was the soap made and sold by the complainant.

Croft v. Day, decided in 1843 (7 Beav.), 84, was not a case of trade-mark strictly, but of the use by two persons, one named Day and the other named Martin, composing a new firm of Day & Martin, of boxes and labels for putting up blacking similar to those which had been for many years used by an

old firm of Day & Martin. In giving the reasons for his decision, Lord Langdale, the master of the rolls, said: "The accusation which is made against the defendant is this: that he is selling goods under forms and symbols of such a nature and character as will induce the public to believe that he is selling the goods which are manufactured at the manufactory which belonged to the testator in the cause. I stated on a former occasion that, in my opinion, the right which any person may have to the protection of this court does not depend upon any exclusive right which he may be supposed to have to a particular name or to a particular form of words. His right is to be protected against fraud. It is truly said that if any one takes upon himself to study these two labels he will find several marks of distinction. On the other hand the colors are of the same nature, the labels exactly the same size, the letters are arranged precisely in the same mode, and the very same name appears on the face of the jars. It appears to me that there is quite sufficient to mislead the ordinary run of persons, and that the object of the defendant is to persuade the public that this new establishment is in some way or other connected with the old firm, and at the same time to get purchasers to go to 90½ Holborn Hill, and not to 97 High Holborn. I think what has been done is quite calculated to effect that purpose, and the defendant must be restrained.

"My decision does not depend on any peculiar or exclusive rights the plaintiffs have to use the names Day & Martin, but upon the fact of the defendant using those names in connection with certain circumstances, and in a manner calculated to mislead the public, and to enable the defendant to obtain, at the expense of Day's estate, a benefit for himself to which he is not in fair and honest dealing entitled."

In the case of *Holloway v. Holloway* (1850), 13 Beav., 209, the plaintiff having established a reputation for preparations known as Holloway's pills and ointment, put up in similar boxes, and with labels and wrappers similar to plaintiff's. The master of the rolls said that, although the defendant had a right to constitute himself a vendor of Holloway's pills and ointment, he had no right to do so in such a way as to deceive the public, and make them believe he was selling the plaintiff's medicines, and that he could not be allowed to perpetrate such a fraud.

In the leading case of *The Leather Cloth Co. v. American Leather Co.*, 11 Jur. (N. S.), 513, upon appeal to the house of lords the case was finally disposed of upon the ground that the alleged trade-mark was simply an advertisement of the quality of the goods, and that it was in both cases printed in very large type, in a circle more than six inches in diameter, easily read and hardly to be mistaken one for the other; and Lord Cranworth, in dismissing the case, says: "I mention this because if, instead of occupying this large space, the whole had been engraved on a stamp of the size of a shilling, so as not to be capable of being read without close examination, the case would have been different."

In the case of *Dixon Crucible Co. v. Guggenheim*, decided by Judge Paxson in 1870 (2 Brewster, 321), although there was no technical trade-mark, to the exclusive right of which the plaintiffs were entitled, the fact that the defendant's packages of stove polish were in size, shape and labels obviously a fraudulent imitation of the complainant's, induced the court to grant relief; although it was shown that the wholesale dealers generally understood the difference, and only the consumers were likely to be deceived.

And in that case, although reference is made to a Pennsylvania statute in-

tending the counterfeiting of private stamps and labels, the reasons given by the learned judge for his decision are based entirely upon the general principle adduced from the authorities cited by him.

The case of *Enoch Morgan's Sons & Co. v. Schwakhofer*, in the supreme court of the city of New York, was decided upon the same principle. The plaintiffs adopted the name of "Sapolio" as a trade-mark for their goods, and it became known by that name, and by the peculiar and distinctive style of packages, labels and wrappers in which it was put up. The defendant began manufacturing the same kind of goods and adopted the name "Sophia" as his trade-mark, and adopted the same style of package, with labels and wrappers which, as a careful inspection disclosed, were different in almost every particular, and had the defendant's own name on them, yet the court, finding that the defendant's were in appearance so close an imitation of the plaintiff's that consumers of ordinary caution did receive one for the other, and finding that the imitation was designed to mislead purchasers, enjoined the defendant.

The case of *Stonebraker v. Stonebraker*, 33 Md., 252, is also a well considered case in which an injunction was affirmed by the court of appeals of Maryland, preventing the use of labels upon medicinal preparations similar to those used by the complainant.

The case of *McLean v. Fleming*, 96 U. S., 245, October term, 1877 (§§ 431-40, *supra*), is a late and authoritative decision by the United States supreme court of questions similar to those arising in the present case, and the principles announced in that decision are, it seems to us, conclusive on the point that the right to a technical trade-mark, in the strict sense of the word, is not necessary to entitle the complainant to relief. For, although the complainants had, in that case, registered their label as a trade-mark, under the act of congress (which has been declared unconstitutional since the case now under consideration was submitted for decision), it appears that their so-called trade-mark was in fact, more strictly speaking, only a label.

In *McLean v. Fleming* the complainants for many years had been selling preparations labeled "Dr. C. McLane's Liver Pills," and had put up the pills in wooden boxes of uniform size, shape and appearance, with the name of the original inventor stamped in red wax upon the cover of each box, around which they placed a label or wrapper printed in a distinctive style. About 1855 they adopted a black label with white lettering. The defendant, whose name was J. H. McLean, and who had also for many years been making and vending the same kind of pills, in boxes similar to complainants', also adopted a black label with white lettering, very similar to complainants', on which he put the words, "Dr. J. H. McLean's Universal Pills or Vegetable Liver Pills." It did not appear that the defendant entered upon the business expecting any advantage from the similarity of names, as the manufacture was begun by both in places far apart, one in Virginia, the other in Kentucky, upwards of twenty years before the filing of the bill.

The supreme court, by Mr. Justice Clifford, delivering its unanimous decision, said: "Positive proof of fraudulent intent is not required when proof of infringement is clear, as the liability of the infringer arises from the fact that he is enabled, through unwarranted use of the trade-mark, to sell a simulated article as and for the one which is genuine. Nor is it necessary, in order to give a right to an injunction, that a specific trade-mark should be infringed, but it is sufficient that the court is satisfied that there was an intent on the part of the respondent to palm off his goods as the goods of the complainant,

and that he persists in so doing after being requested to desist. Difficulty frequently arises in determining the question of infringement, but it is clear that exact similarity is not required, as that requirement would always enable the wrong-doer to evade responsibility for his wrongful acts. Colorable imitation, which requires careful inspection to distinguish the spurious trade-mark from the genuine, is sufficient to maintain the issue; but courts of equity will not interfere when ordinary attention by the purchaser would enable him at once to discriminate the one from the other. Where the similarity is sufficient to convey a false impression to the public mind, and is of a character to mislead and deceive the ordinary purchaser, in the exercise of ordinary care and caution in such matters, it is sufficient to give the injured party a right of redress if he has been guilty of no laches. Argument to show that the name of the pills, as given in the trade-mark of the respondent, was of a character to mislead and deceive, is scarcely necessary, as they are *idem sonans* in the usual pronunciation; nor can it be doubted that the form of the box containing the pills, and the general appearance of the wrapper which surrounded it, were calculated to have the same effect. Mention may also be made of the fact that the color of the label and the wax impression on the top of the box are well suited to divert the attention of the unsuspecting buyer from any critical examination of the prepared article. Chancery protects trade-marks upon the ground that a party shall not be permitted to sell his own goods as the goods of another, and therefore he will not be allowed to use the names, marks, letters or other *indicia* of another, by which he may palm off his own goods to purchasers as the manufacture of another. Difference between the exhibits undoubtedly exists, still it is manifest that the general appearance of the package, in the respects mentioned, and others which might be suggested, is well calculated to mislead and deceive the unwary, and all others who purchase the article without opening the box and examining the label."

The decree of the circuit court was affirmed, enjoining the respondent from using his own name upon any label or wrapper for boxes or packages of pills resembling or in imitation of the labels or wrappers or trade-mark of the complainant, whether in style of engraving, printing or lettering, but the decree for account was reversed upon the ground of inexcusable laches and delay in filing the bill.

We have come to the conclusion in the case before us that the respondent should be enjoined from putting up his goods in the manner in which he has been doing, as shown by the exhibits, or in any other manner so simulating the form, color, labels and appearance given by the complainant to his goods as to mislead purchasers into mistaking one for the other. What we decide is that whether the complainant has a trade-mark or not, as he was the first to put up bluing for sale in the peculiarly shaped and labeled boxes adopted by him, and as his goods have become known to purchasers, and are bought as the goods of the complainant by reason of their peculiar shape, color and label, no person has the right to use the complainant's form of package, color or label, or any imitation thereof, in such manner as to mislead purchasers into buying his goods for those of the complainant, whether they be better or worse in quality. And finding, from the exhibits and proof in the cause, that the bluing put up by the respondent is not only well calculated so to mislead purchasers, but has actually done so, to the injury of the complainant, we are of opinion that respondent should be perpetually enjoined, and that he should account to the complainant for the damages sustained by him.

SAWYER v. KELLOGG.

(Circuit Court for New Jersey: 7 Federal Reporter, 720-723. 1881.)

Opinion by BRADLEY, J.

STATEMENT OF FACTS.—This case, with its special circumstances, seems to us to be a very clear one. The complainant's label, which he alleges that the defendant has wrongfully imitated, had been in use substantially in the same form for a dozen or more years prior to the bringing of the suit. It consists of a blue wrapper, pasted around a small bottle holding the bluing, and containing, in separate compartments, various inscriptions in letters of silver bronze. The first compartment contains the general designation of the article, in the words: "Sawyer's Crystal Blue and Safety Box." The other compartments are in finer print, and contain commendations of the quality of the article, directions for use, and the name of the party by whom it was prepared.

§ 442. *Circumstances under which an imitation of a trade-mark is held to be so far complete as to authorize an injunction against its use. All who are parties to the infringement of a trade-mark are liable.*

The label complained of, and admitted to be prepared and used by the defendant, is of the same size, color and type, and of the same general appearance, as that of the complainant, being divided into compartments corresponding with those in his label. The inscriptions, although not identical, appear very like. The general designation is in these words: "Sawin's Soluble Blue and Pepper Box." Placing the two labels side by side it is easy to distinguish them. But ordinary persons, in the habit of buying the complainant's bottles, would be very easily deceived into buying the defendant's for them, the general appearance being so similar in every respect. That the defendant's label is a designed imitation of the complainant's scarcely admits of a doubt. Such perfect similarity could hardly have been the result of chance. We do not mean to say that it would be a justification if it were accidental. But it is apparent that it was designed. Sawin is not the defendant's name; why, then, did he use Sawin's name and not his own? It was evidently done for the purpose of making a closer imitation of Sawyer's label. The defendant, it is true, alleges that he does not put up the bluing for himself, but for a firm by the name of Barron & Co., who directed him to adopt the label in question. But this is no excuse for him unless Barron & Co. were entitled to use the label. The defendant attempts to show that they had such a title by having hired from Sawin the right to use his name. This pretext is too shallow. It is shown, indeed, that Sawin did manufacture bluing, and used a label of his own, but it was wholly unlike the label in question. The use of his name by Barron & Co., in the label complained of, was evidently obtained for the purpose of making it more closely resemble Sawyer's. Sawin's bluing had no such reputation in the community as to make it an object to hire his name. As the label stands it speaks a falsehood. The article covered by it is not "Sawin's Soluble Blue," and it is not "prepared by W. E. Sawin, Jr.," as stated at the foot of the label. It evidently speaks this falsehood for a purpose, and that purpose, we are satisfied, is to obtain a closer imitation of Sawyer's label. It is no excuse for the defendant that he does this work for other persons. He is just as guilty as if he did it for himself. All who are concerned in the commission of a tort are alike amenable to the party injured.

It is suggested, however, that the label complained of is the same in all respects which the defendant had used for several years prior to its adoption by

Barron & Co., with the exception of the caption, in which Sawin's name has been introduced instead of his own. This only goes to show that the adoption of Sawin's name was regarded as important in carrying out the plan of Barron & Co. The question readily suggests itself, Why did they prefer Sawin's name to Kellogg's in the caption of the label? No sufficient reason is shown except that it enabled them more closely to imitate the complainant's. No doubt Kellogg would have been perfectly willing, and glad, to have used his own name, and then the label would, at least, have told the truth. It is unnecessary to add that the argument assumes that Kellogg's label itself was free from objection as an imitation of that of the complainant. Whether it was so or not may be a question, but one which it is not necessary now to determine.

§ 442a. *Question of acquiescence.*

It is further suggested that the complainant has lain by for several years, whilst the defendant has been publicly using his own label, and has thus acquiesced in its use. To this suggestion it may be proper to reply that the complainant had a patent for the article of bluing, which he was prosecuting and endeavoring to substantiate, but in which he finally failed. His failure to establish his patent (which would have covered all his rights) ought not to preclude him from falling back on his right to the trade-mark. No essential delay has occurred since the termination of the proceedings on the patent. But at any rate an acquiescence in Kellogg's use of his own label was no acquiescence in his use of the new and altered label having Sawin's name in the caption.

We think the case is with the complainant, and that a decree should be made in his favor. Let a decree be made accordingly.

MOORMAN v. HOGE.

(Circuit Court for California: 2 Sawyer, 78-91. 1871.)

STATEMENT OF FACTS.—Bill in equity to restrain the infringement by the defendant of plaintiff's trade-mark. The infringement consisted altogether of using barrels of the unusual size, form and dimensions of those adopted by plaintiff, and which he claimed as a component part of his trade-mark. The barrels were used to contain whisky manufactured and sold by complainants.

Opinion by SAWYER, J.

The complainants do not claim that there is any infringement upon that part of what they claim to be their trade-mark, which consists of the words and devices stamped upon the barrel. The claim is that there is an infringement by the use of the barrel only.

Is the plaintiff entitled to the exclusive use of a barrel of this peculiar form, construction and capacity, without regard to any mark or device impressed upon or connected with it? Can a barrel of this description be appropriated as a trade-mark, or substantive part of a trade-mark, so as to exclude the rest of the world from using it in the same branch of business? If so, the complainants, in my judgment, are entitled to the relief sought, otherwise not.

Complainants invoke the act of congress of July 8, 1870, entitled "An act to revise, consolidate and amend the statutes relating to patents and copyrights." 16 Stat. at L., 198. The seventy-seventh section provides, "That any person or firm domiciled in the United States, . . . and who are entitled to the exclusive use of any lawful trade-mark, or who intend to adopt and use any trade-mark

for exclusive use within the United States, may obtain protection for such lawful trade-mark by complying with the following requirements, to wit:" stating the conditions.

The seventy-eighth section provides that the party or firm, performing the statutory conditions, shall be entitled to use the trade-mark for thirty years, and that "no other person shall lawfully use the same trade-mark, or substantially the same, or so nearly resembling it as to be calculated to deceive, upon substantially the same description of goods." The seventy-ninth section provides a remedy for violation of the right by imitation, etc., by an action for damages and injunction. It also provides that "the commissioner of patents shall not receive and record any proposed trade-mark which is not, and cannot become, a lawful trade-mark." The eightieth section makes the certificate of the commissioner, under seal of the patent office, "evidence in any suit in which such trade-mark shall be brought into controversy."

§ 443. *The certificate of the registry of a trade-mark is not conclusive evidence that the device claimed is or can be a lawful trade-mark.*

It is not denied that the complainants have performed all the acts required by the act of congress to secure the protection contemplated, and that the certificate of the commissioner of patents was in form regularly issued. This being so, complainants insist that the court can only look to the certificate, and the act of congress, to determine the question at issue; that the act of congress confers upon the commissioner jurisdiction to examine and determine whether the proposed trade-mark is, or can become, a lawful trade-mark; whether it was first used and appropriated by the claimant, or is not identical with a trade-mark appropriated to the same class of goods, and belonging to a different party, or already registered, or received for registration; and whether it does not so nearly resemble any trade-mark registered or filed for registry, as to be likely to deceive the public; and, that having jurisdiction to determine these matters, his determination is conclusive, and the questions are not open to examination in this court. *Rubber Co. v. Goodyear*, 9 Wall., 796, and *Eureka Co. v. Bailey Co.*, 11 id., 492, are cited as sustaining the proposition.

I cannot assent to this view. The cases cited only go to the point that a patent cannot be collaterally attacked on the ground that the extension and reissue of the patents in question had been procured by fraud. It was held that, if the patents themselves were to be avoided on the ground of fraud in their issue, the patents being otherwise good, it must be done by a direct proceeding in equity to vacate them. That is an entirely different question from the one now presented. The proceeding before the commissioner to obtain protection for a trade-mark under the act of congress is purely *ex parte*. Other parties have no notice, actual or constructive. They have no opportunity to be heard, and their rights cannot be thus conclusively determined in a proceeding to which they are in no sense parties. The certificate of the commissioner of patents, I take it, can have no more conclusive effect as to the rights of third persons, than a patent issued under the patent laws by the same commissioner of patents. The commissioner in such cases is required to investigate the claim to the patent, and to determine whether the subject of the application is patentable; whether the applicant is the inventor; whether it is new, and useful, etc. While the patent is held to be *prima facie* evidence that the machine is new and useful, it is nowhere held to be conclusive on these points, or upon the point whether the machine, or device, or

article, is the proper subject of a patent. On the contrary, in every-day practice in the courts in patent cases, the very questions most frequently considered and determined are, whether the thing patented is patentable; whether it is new or useful, etc.; and, in the very cases cited to sustain complainants' position, the court determined questions as to the patentability of the articles involved in the patent. If the principle contended for could be maintained, there is not a barrel or package of any kind in use in mercantile transactions which could not be appropriated as a trade-mark, no matter how long or how generally it had been in use, if a party could, in an *ex parte* application, by any representation, fraud or other means, once procure it to be registered, and the certificate issued; for this would be conclusive upon all the world upon the points that it could become a trade-mark, and that the applicant was the first to appropriate and use it for that purpose. This point, in my judgment, must be determined against the complainants.

§ 444. *A barrel of peculiar form, dimensions and capacity cannot, without more, become a lawful trade-mark or a substantive part of such trade-mark.*

This brings us to the great and highly important question, whether a barrel of peculiar form and dimensions, without any marks, symbols or devices of any kind impressed upon or connected with it, can, in fact and in law, become a trade-mark or a substantive part of a trade-mark, so as to invest the claimant with an exclusive right to use it. It will be observed that the statute under which the claim is made does not define the term "trade-mark," or say of what it shall consist. The term is used as though its signification was already known in the law. It speaks of it as an already existing thing, and protects it as such. The thing to be protected must be an existing lawful "trade-mark," or something that may then for the first time be adopted as a lawful trade-mark independent of the statute. There must be a lawful trade-mark adopted without reference to the statute, and then by taking the prescribed steps, that trade-mark so already created and existing may receive certain further protection under the statute. This is apparent from the language of the seventy-seventh section, which speaks of parties "who are entitled to the exclusive use of any lawful trade-mark, or who intend to adopt and use any trade-mark for exclusive use," etc.; and by the seventy-ninth section, which forbids the commissioner to receive and record any proposed trade-mark which is not, and cannot become, a lawful trade-mark. It does not say what shall constitute a lawful trade-mark. We must therefore go to the law of the land, outside this statute, to ascertain what is, or what may become, a lawful trade-mark; for the statute leaves the definition of a trade-mark to the law, as it before stood. The definition of a trade-mark given by Mr. Upton is as follows, to wit: "A trade-mark is the name, symbol, figure, letter, form or device adopted and used by a manufacturer or merchant, in order to designate the goods that he manufactures or sells, and distinguish them from those manufactured or sold by another; to the end that they may be known in the market as his, and thus enable him to secure such profits as result from a reputation for superior skill, industry or enterprise." Upton on Trade-marks, p. 9.

This is a good general definition, broad enough in its terms, probably, to cover every case to be found in the books, but it would not alone, perhaps, be sufficient as a test by which every individual claim of a device, as a proper trade-mark, can be tried and determined, without looking into the cases from which the definition is compiled, to see what names, symbols, figures, letters,

forms and devices have been recognized and protected as trade-marks. The words "form" and "device," for instance, are very broad terms, and they might, in a general and comprehensive sense, embrace the form of a barrel, or package, or of the article of merchandise itself sold. But the words of definition are all used in connection with the word "mark," and the word mark, in its first and usual signification, is defined by Webster to be "a visible sign made or left upon anything; a line, point, stamp, figure, or the like, drawn or impressed, so as to attract the attention, and carry some information or intimation; a token; a trace." And some such mark used in connection with, impressed, cut or stamped upon, or attached to the article manufactured or sold in the ordinary course of trade, embraces the usual and ordinary idea of a "trade-mark." The primary and the sole object of the trade-mark is to distinguish the goods as being a particular manufacture, or as belonging to a particular party. It is cut, stamped, engraved, impressed upon, attached, or in some way appended to the goods, the vessel containing them, or the covering wrapped around the goods for this sole purpose. The object of using a barrel, box, or other package, is to contain, carry, protect and preserve the goods, or for their convenient handling; and form of some kind and dimensions are essential in a box, barrel, or package, without which it can have no existence. But the size or shape of the barrel, box, or package can scarcely be considered a mark, nor can that be the sense in which the terms "form" or "device" are used when employed as a definition of a mark, used for purposes of trade. So general is the idea that the symbol, figure, letter, form, or device used for a trade-mark must be a mark impressed, cut, engraved, stamped, cast upon, or in some way wrapped around or appended to the article or the package, as something independent of the article itself, or the package used to contain it, that it is carried into the statutes of some states, where it is, doubtless, only intended to adopt the common law definition.

Thus, in the statute of California, the language used is, "any peculiar name, letter, mark, device, figure, or other trade-mark, or name, cut, stamped, cast, or engraved upon, or in any manner attached to or connected with any article or with the covering or wrapping thereof, manufactured or sold," etc. This indicates that it was not supposed that the barrel, package, covering or wrapping itself, which is used for another purpose, could properly be used as a trade-mark, but that the trade-mark must be some mark of the kind indicated in some way, impressed, cut, cast upon, or connected with such package, covering, etc., or the article itself.

The complainants in this case, prior to the passage of the act of congress in question, filed their trade-mark in the office of the secretary of state of California, and in so doing they omitted the barrel as a part of their trade-mark, although it had long before that time been adopted and used by them in their California trade. The reason assigned for this omission by their counsel, on the argument of this cause, in answer to the suggestion that the omission constituted an abandonment of the barrel, was, that under this statute of California they could not adopt the barrel as a trade-mark, for that the trade-mark, under the act, must be cut, engraved, stamped, impressed, cast, etc., on the barrel, package, etc., and this, I apprehend, is the true idea of a trade-mark at common law with respect to this point.

I have examined with care a large number of cases involving infringements of trade-marks, including all the recent cases, which I have been able to find, so far as they bear upon the question in hand. It would be an arduous and

unprofitable task to comment upon them all, and I shall content myself with stating briefly the result of my examination.

In every case there was a trade-mark proper, such as is indicated in this opinion, embracing some name, symbol, figure, letter, form or device, cut, stamped, cast, impressed or engraved upon, blown into, or in some manner attached to or connected with the article manufactured or sold, or the package containing it, or the covering or wrapping thereof. Where the vessel containing the article was of glass, iron or other metal, whether of peculiar shape and dimensions or not, the trade-mark proper was often blown, or cast in the vessel, sometimes on a shoulder, sometimes in the body of the vessel. There were various ways of impressing upon, or connecting with the vessel, package or article the mark; but there always was a mark in fact, other than the shape or size of the vessel or package. I find no case where the vessel, box, package, or whatever contained the article, has been held to constitute a trade-mark by reason of its peculiar form or dimensions, independent of any symbol, figure or device impressed upon or connected with it for a trade-mark. I find no case where the use of a package of peculiar form and dimensions has been restrained without having imprinted upon or connected with it some other symbol, word, letter, or form, adopted as a trade-mark. There are numerous cases where the use of a bottle, or other vessel, or package, having upon it the device adopted as a trade-mark has been enjoined, but I find none restraining the use of the bottle, vessel or package without the device impressed upon or connected with it.

A manuscript copy of a recent decree rendered by the court of chancery at Louisville, Kentucky, in the case of *Wilder v. Wilder*, has been furnished me by complainants' counsel, as a case in point. But in that case the defendants were restrained from selling "any preparation or compound under the name and style of 'J. B. Wilder & Co.'s Stomach Bitters,' printed, stamped, or engraved upon the bottles, labels, wrappers, covers, boxes or packages thereof. Also from using the bottle herein exhibited marked 'B. 2,' and from imitating or causing to be imitated in any manner, either the bottle or label of the plaintiff herein marked respectively 'A. and B.'"

This case does not appear to be in any respect inconsistent with the view indicated. Here was a trade-mark proper in connection with the bottle, and, as the court restrained defendants from selling the compound in connection with the trade-mark, "printed, stamped or engraved upon the bottle," doubtless the complainants' bottles referred to as exhibits in that case had the trade-mark impressed upon or blown into the bottles; and this being so, it would be impossible to use those bottles without their having the trade-mark on them, and, therefore, also using the trade-mark itself. The trade-mark, in such cases, constitutes a part of that particular bottle. If this is not the true state of facts, then the copy of the decree furnished me does not show what the exact case is. At all events, it does not appear to be an exception to the general rule before stated. There are numerous cases where the use of a particular bottle or package has been restrained, when the bottle or package had the trade-mark impressed upon or blown into its structure, making it a part of the package itself, and it was necessary to include the particular description of bottle in order to restrain the use of the trade-mark indelibly impressed upon it. But, as before stated, I find no instance where the use of a bottle, vessel or package of a peculiar form and size has been enjoined with the trade-mark of the complainant, or colorable imitation thereof, used upon or connected with it, omitted.

Doubtless a bottle, vessel or package of a peculiar form may be used as auxiliary to the trade-mark proper, and may be of use in solving a question of intent of a party in imitating or using an evasive simulation of another's trade-mark. As, for instance, a party may adopt a trade-mark, and imprint it upon, or connect it with, the package of peculiar shape containing the article of his manufacture. Another party might make a colorable simulation of the trade-mark so used, but so different as to render it doubtful, upon a mere inspection of the simulation of such mark alone, whether it was intended to be an imitation or not, or whether it would be likely to mislead the public. But if the imitator should, in addition to this, use the peculiar shaped package adopted by the party entitled to the trade-mark, and impress upon or connect with it the simulation of the trade-mark, all doubt as to the intention and the effect would at once vanish. In this view, a peculiar package might be a valuable auxiliary to the trade-mark, although it could not, of itself alone, constitute a lawful trade-mark, or a substantive part of a lawful trade-mark. But its use would be in aiding to determine the character and effect of a colorable imitation of the trade-mark proper, and the use of the imitation, or the simulated trade-mark, or the use of the package with such simulation connected with it, would be the thing restrained. In this case there is no pretense that there is any imitation, or colorable simulation, of the marks and brands upon the package or barrel. The use of the barrel with a simulation of the complainants' trade-mark impressed upon it would doubtless be restrained. But to extend the privilege of trade-mark to the barrel in question alone, without having impressed upon, or in any way connected with, it any of the other words, symbols or devices claimed and used by the complainants as a part of their trade-mark, or any colorable imitation of it, would, in my judgment, be to go further than any case heretofore decided, and extend the privileges of trade-marks to objects not recognized by any established legal principles applicable to the subject. After a careful examination of the question, my conclusion is, that the barrel in question, without any other marks or symbols, is not, and that it cannot become, a lawful trade-mark, or a substantive or integral part of a lawful trade-mark, and that complainants have no exclusive right to its use as such.

The result is, that complainants' bill must be dismissed with costs, and it is so ordered.

BURTON *v.* STRATTON.

(Circuit Court for Michigan: 12 Federal Reporter, 696-704. 1882.)

STATEMENT OF FACTS.—Plaintiff in this case claimed the right to use a trade-mark, in connection with the manufacture of yeast, by purchase from the Strattons. It seems that the trade-mark consisted of the figures of the heads of the Stratton brothers in an oval setting, in connection with the words "Twin Brothers' Improved Dry Hop Yeast," and "Twin Brothers;" that the yeast originated with the Strattons, and that plaintiff purchased the factory from one of them, and, as he claims, the right to the trade-mark. The defendants denied that the trade-mark was sold to the plaintiff.

Opinion by BROWN, J.

We think there is a decided preponderance of testimony in favor of the plaintiff's theory that at the time his partnership with the defendant Stratton was dissolved he purchased not only his interest in the business but also his moiety of the trade-mark. Indeed, the defendant seems to have had very little

else of any value to sell. Plaintiff had put but a thousand dollars into the venture. Defendant had contributed nothing but his attention and skill. The partnership lasted but eight or nine months, and the business done was very limited. They would get a little meal and make a small quantity of yeast; then they would shut up the factory and go out and sell it, get a little more meal, and start again. After conducting the business in this way about six months the demands of their creditors became so urgent that plaintiff was obliged to advance \$300 more to continue it. Soon after an investigation of the books showed their affairs to be in such a precarious condition that defendant Stratton wanted to go out of the business, and the plaintiff bought his interest and paid him \$4,000. At the time of the sale there appears to have been no stock on hand, and the factory had been shut down for some six weeks. Under these circumstances, it seems to us quite improbable that they could have made ten or twelve thousand dollars in nine months, or that there could have been debts due the firm to the amount of \$8,000. Add to this the testimony of several witnesses who swear that defendant stated to them repeatedly, and in a regretful manner, that he had sold his interest in the trade-mark, and had nothing else to sell to the plaintiff, and his subsequent conduct after he left plaintiff's employ in commencing to sell under the name of the "Standard Yeast," we can entertain but little doubt of the fact, notwithstanding the agreement was not in writing.

§ 445. *Questions as to trade-marks settled by the authorities.*

The principal question involved in this case is whether the words "Twin Brothers" are a trade-mark of such a character as entitles the plaintiff to be protected in his monopoly of them. The point is certainly not free from difficulty. There are few classes of cases in the whole domain of the law so difficult to reconcile as those wherein the validity of a trade-mark is discussed. The following propositions, however, may be considered as settled:

§ 446. — *appropriation of label or name enjoined.*

1. That a court of equity will enjoin unlawful competition in trade by means of a simulated label, or of the appropriation of a name; as where the defendant appropriates the name of a hotel conducted by the plaintiff, or imitates his label upon preparations. *Howard v. Henriques*, 3 Sandf., 725 (Irving House Case); *Woodward v. Lazar*, 21 Cal., 448 (What-Cheer House Case); *Howe v. Searing*, 10 Abb. Pr., 264 (Howe's Bakery Case); *McCardel v. Peck*, 28 How. Pr., 120 (McCardel House Case); *Williams v. Johnson*, 2 Bosw., 1 (Genuine Yankee Soap Case); *Day v. Croft*, 2 Beav., 488 (Day & Martin Blacking Case); *Davis v. Kendall*, 2 R. L., 566 (Pain-Killer Case); *Meriden Britannia Co. v. Parker*, 39 Conn., 450. The ground of interference in this class of cases is fraud; that is, the attempt to palm off the goods of the defendant as the goods of the plaintiff.

§ 447. — *the mark used must not express a falsehood.*

2. A court of equity will not protect a person in the exclusive use of a word which expresses a falsehood; as, if the article bears the word "patented" when in fact it is not patented, or exhibits an untruth as to the place of manufacture or composition of the article. *Leather Cloth Co. v. American Leather Cloth Co.*, 11 H. of L., 531; *Brown*, Trade-marks, § 72; *Flavel v. Harrison*, 10 Hare, 467; *Partridge v. Menck*, 2 Barb. Ch., 101; *Pidding v. How*, 8 Simons, 477 (Howqua Mixture Case); *Palmer v. Harris*, 60 Pa., 156, wherein the trade-mark indicated that certain cigars were made in Havana, when in fact they were made in New York; *Fetridge v. Wells*, 13 How. Pr.,

385 (Balm of Thousand Flowers Case); Phalon *v.* Wright, 5 Phila., 464 (Night-Blooming Cereus Case); Cocks *v.* Chandler, L. R., 11 Eq., 446 (Reading Sauce Case); Conwell *v.* Reed, 128 Mass., 477 (East Indian Remedy Case).

§ 448. — *expiration of patent.*

3. That no one can extend his monopoly of a patented trade-mark. By the expiration of the patent, the public acquires the right not only to make and sell the article, but to make and sell it under the name used by the patentee. Singer Manuf'g Co. *v.* Stanage, 6 Fed. R., 279; *In re* Richardson, 3 O. G., 120; Tucker Manuf'g Co. *v.* Boyington, 9 O. G., 455.

§ 448a. — *name of place cannot be used. As to numerals or letters, and name expressive of character of article.*

4. A person cannot, by means of a trade-mark, monopolize the name of the place where the article is manufactured. Canal Co. *v.* Clark, 13 Wall., 311 (Lackawanna Coal Case); Brooklyn White Lead Co. *v.* Masury, 25 Barb., 416. Nor the ordinary numerals or letters. Manuf'g Co. *v.* Trainer, 101 U. S., 51 (A. C. A. Case); Am. Manuf'g Co. *v.* Spear, 2 Sandf., 599; Avery *v.* Meikle, 23 Alb. Law J., 443. This proposition, however, has been disputed. See Gillott *v.* Estabrook, 48 N. Y. (The 303 Case); Boardman *v.* Meriden Britannia Co., 35 Conn., 402. Nor can a person monopolize a name expressive of the character or composition of an article. Caswell *v.* Davis, 35 N. Y., 281 (Ferro-Phosphorated Elixir of Calisaya Bark Case).

§ 449. — *words expressive of quality cannot be used.*

5. So where the words used are expressive only of the name or quality of the article, and have acquired that significance in the market. Am. Manuf'g Co. *v.* Spear, 2 Sandf., 599; Manuf'g Co. *v.* Trainer, 101 U. S., 51 (§§ 464-67, *infra*); Stokes *v.* Landgraff, 17 Barb., 608; Corwin *v.* Daly, 7 Bosw., 222 (Club House Gin Case); Ferguson *v.* Davol Mills, 2 Brewster, 314; Choynski *v.* Cohen, 39 Cal., 501 (Antiquarian Book Store Case); Phalon *v.* Wright, 5 Phila., 464; Singleton *v.* Bolton, 3 Doug., 293 (Case of Dr. Johnson's Yellow Ointment); Thomson *v.* Winchester, 19 Pick., 214 (Thomsonian Medicine Case); Benninger *v.* Wattles, 24 How. Pr., 204 (Old London Dock Gin Case); Raggett *v.* Friedlater, L. R., 17 Eq., 29 (The Nourishing Stout Case).

§ 450. *Words, to be a trade-mark, must be merely arbitrary.*

In order that mere words may be upheld as a trade-mark, they must be merely arbitrary, or they must indicate the origin or ownership of the article or fabric to which they are affixed. Am. Manuf'g Co. *v.* Spear, 2 Sandf., 597; Canal Co. *v.* Clark, 13 Wall., 322 (§§ 453-56, *infra*); Falkinburg *v.* Lucy, 35 Cal., 52; Brown, Trade-marks, § 216; Durham Tobacco Case, 3 Hughes, 157 (§§ 457-59, *infra*); Wotherspoon *v.* Currie, L. R., 5 E. & I. App., 508 (The Glenfield Starch Case); Ford *v.* Foster, L. R., 7 Ch. App., 611 (Eureka Shirt Case); Hier *v.* Abrahams, 82 N. Y., 519 (Pride Tobacco Case); McAndrew *v.* Bassett, 10 Jur. (N. S.), 550; S. C., 12 Week. R., 777 (Anatoleo Case); Lee *v.* Haley, L. R., 5 Ch., 155 (Grimes Coal Co. Case); Seixo *v.* Provezende, L. R., 1 Ch., 192 (Seixo Wine Case); Braham *v.* Bustard, 1 Hem. & M., 447 (Excelsior Soap Case).

There are cases which appear to differ from those above cited, but we think most if not all of them can be distinguished from them.

The defendant takes the ground in this case that the words "Twin Brothers' Yeast" is a generic name, and indicates, not the origin or ownership of the article, but its specific quality, and that it has acquired in the market a reputation under that name. This defense appears to be somewhat of an after-

thought, and it is doubtful whether it is properly before the court, since no allusion is made to it in the answer, and it was not until the case had been at issue a year and the proofs taken that defendant made an affidavit to the effect that "Twin Brothers' Yeast" was the generic name of a specific article of merchandise, and that he was the only person who ever was or ever could be able to manufacture it. The defense, too, seems to be somewhat inconsistent with the previous testimony. Upon being called as a witness Stratton swore that he made a discovery of a yeast compound, and that he did not get it patented because he considered it of more value to him as a secret than as a patent. He had imparted the secret to the employees of the plaintiff. He had also imparted it to the Judds, who manufactured "Judd Bros." yeast according to his formula; that he had also imparted the secret to one Hopper, who made the same yeast under the name of the "National Yeast;" that while a member of the firm of A. G. Smith & Co., he manufactured and sold the same yeast under the name of the "Standard" yeast; and that he manufactured the same yeast for a firm in Toledo, who sell it under the name of the "Lion Brand."

The difficulty is in distinguishing cases where the property has acquired a generic name, as indicating the quality of the article rather than its origin or ownership. One would say at once that Congress Water was an example of a generic name, since it is universally known by that name in the market; and yet the court of appeals in New York sustained it as a trade-mark, apparently upon the ground that complainants were the exclusive owners of the spring known as the Congress Spring, and that the right to use the name was passed as appurtenant to the property. The only satisfactory rule we have been able to gather from the authorities is that in each case it is a matter for the court to determine, not alone from the mark itself, but from the testimony, whether the words have become so well known as to stand in the public eye as denoting the character and quality of the article and not its origin or ownership. Thus, if it should appear that the article had been manufactured and sold by a number of dealers under a particular name, this would be decisive that the plaintiff had no right to the exclusive use of that name. Most if not all of these generic names were at first indicative of the origin, but finally, by constant use, ceased to subserve that purpose and have become indicative of the quality. An example of this is "Fowler's Solution of Arsenic," which clearly indicates origin, but the article is nevertheless put up by druggists all over the country, and this name has become public property. We think that most if not all the cases upon this subject, when carefully examined, will be found to have turned upon the extent to which the name is used, rather than upon the name itself. Thus, in the *A. C. A. Case*, 101 U. S., 51 (§§ 464-67, *infra*), it was said by the court that it was clear, from the history of the adoption of the letters as narrated by the complainant and the device itself, that they were only intended to represent the highest quality of ticking manufactured by the plaintiff, and not its origin. It appeared that other letters were used to indicate inferior grades of the same article.

In *Stokes v. Landgraff*, 17 Barb., 608, it appeared it was a practice of manufacturers of glass to designate the several qualities by names similar to those used by the parties to the action, and not by words or figures, in terms expressing the qualities. In *Corwin v. Daly*, 7 Bosw., 222, it appeared that the words "Club House" had been applied to articles of merchandise, including gin of a special quality, for a number of years. See, also, *Ferguson v. Davol Mills*,

2 Brewster, 314; Thomson v. Winchester, 19 Pick., 214; Wollfe v. Goulard, 18 How. Pr., 64 (Scheidam Schnapps Case).

§ 451. *What is not sufficient to debar the claimant of protection to his word trade-mark.*

But if the primary object of the trade-mark be to indicate the origin or ownership, the mere fact that the article has obtained such a wide sale that the mark has also become indicative of quality is not of itself sufficient to debar the owner of protection or make it the common property of the trade. To hold otherwise would be to deprive the owner of the exclusive use of his trade-mark just at the time when it had become most valuable to him and stood most in need of protection. But if the same be suffered to come into general use without objection from the original proprietor, it becomes merely generic, or indicative of quality.

Applying these principles to the case under consideration, it is pertinent to observe that no such defense is set up in either of the answers to the original bill, which was filed in December, 1880. In the answer of Orange Judd it is expressly averred that he is manufacturing Judd Brothers' yeast; that for a number of years he manufactured yeast for the complainant of precisely the same kind as he is now manufacturing, and which said complainant sold as Twin Brothers' yeast. He admits that he is selling to said Jackson B. Stratton and Asa Judd the yeast manufactured by this defendant, which, as before stated, is precisely the same kind of yeast he before manufactured for the plaintiff. He further avers that what Stratton and Asa Judd (his brother) do with said yeast this defendant does not know except from hearsay, but he denies that he is directly or indirectly using the "Twin Brothers'" trade-mark, or any mark except that owned by himself, to wit, the trade-mark of Judd Brothers; and further, that if Stratton and Asa Judd are using complainant's trade-mark, it is upon their own responsibility and without any agency or authority from him. He further, in paragraph 6, says that he is now and has been selling to the trade large quantities of the same kind of yeast which he has been selling said defendants Stratton and Asa Judd; that all said yeast sold by him is sold under the name of "Judd Brothers' Yeast." The testimony also shows, as heretofore stated, that the same yeast was sold under the name of Standard yeast and of the Lion yeast.

§ 452. *A trade-mark indicative of origin is assignable.*

The first intimation we have of the claim now set up is contained in the affidavit of Jackson B. Stratton, filed in December, 1881. His original defense was that he did not sell his interest in the trade-mark. It is true that in several of the contracts entered into between the plaintiff and defendant Stratton the yeast is spoken of as the Twin Brothers' yeast, and sometimes of the "kind and quality" known as Twin Brothers' yeast; and so it was undoubtedly known, as between the parties themselves, as representing the yeast of the compound of which Stratton possessed the secret; but this is no answer to the fact that it was manufactured and held out to the public under different names, such as were most convenient for Stratton. Upon the whole, it does not seem to us that the words "Twin Brothers," under the testimony, can be considered as indicating to the public the quality of the yeast, though it certainly does indicate origin and ownership in the persons whose likenesses appear on the trade-mark. The question whether this trade-mark was such a one as could be the subject of assignment to the plaintiff, and lawfully used by him, is not free from difficulty. He was not one of the Twin Brothers,

nor are either of the heads in the oval figure representations of himself or of any one now connected with him in business. But the cases are numerous in which it has been held that a party may lawfully assign and sell not only a trade-mark indicative of origin in himself, but even the right to use his own name in connection with a particular business. Several of these are cited in the recent opinion of Mr. Justice Matthews in the case of *Pepper v. Labrot*, 8 Fed. R., 29 (§§ 548-49, *infra*), in which the right to use the words "Old Oscar Pepper" were held to pass to an assignee in bankruptcy of the proprietor of a distillery and premises, even as against such former proprietor himself, who had set up a separate establishment in another county. The comments of Justice Field in this connection in *Kidd v. Johnson*, 100 U. S., 617 (§ 547, *infra*), are decisive of the right of a party to sell a trade-mark used in connection with a certain business, though it be indicative of origin in himself. In the case under consideration it seems to me clear that the Strattons could lawfully transfer to the complainant, in connection with their sale to him of their interest in the business, the exclusive right to use their trade-mark. Whether such trade-mark could be assigned separate from the business to which it was appurtenant, or whether it would pass by a sale of the business alone, we are not called upon to decide. Complainant paid a valuable consideration for this trade-mark, and we think he should be protected by injunction in his right to use it.

CANAL COMPANY *v.* CLARK.

(13 Wallace, 311-328. 1871.)

APPEAL from U. S. Circuit Court, Southern District of New York.

Opinion by MR. JUSTICE STRONG.

STATEMENT OF FACTS.—The first and leading question presented by this case is whether the complainants have an exclusive right to the use of the words "Lackawanna coal," as a distinctive name or trade-mark for the coal mined by them and transported over their railroad and canal to market.

The averments of the bill are supported by no inconsiderable evidence. The complainants were undoubtedly, if not the first, among the first producers of coal from the Lackawanna Valley, and the coal sent to market by them has been generally known and designated as Lackawanna coal. Whether the name "Lackawanna coal" was devised or adopted by them as a trade-mark before it came into common use is not so clearly established. On the contrary the evidence shows that long before the complainants commenced their operations and long before they had any existence as a corporation, the region of country in which their mines were situated was called "The Lackawanna Valley;" that it is a region of large dimensions extending along the Lackawanna river to its junction with the Susquehanna, embracing within its limits great bodies of coal lands, upon a portion of which are the mines of the complainants, and upon other portions of which are the mines of the Pennsylvania Coal Company, those of the Delaware, Lackawanna & Western Railroad Company, and those of other smaller operators. The word "Lackawanna," then, was not devised by the complainants. They found it a settled and known appellative of the district in which their coal deposits and those of others were situated. At the time when they began to use it, it was a recognized description of the region, and of course of the earths and minerals in the region.

The bill alleges, however, not only that the complainants devised, adopted and appropriated the word as a name or trade-mark for their coal, but that it had never before been used or applied in combination with the word "coal," as a name or trade-mark for any kind of coal, and it is the combination of the word Lackawanna with the word coal that constitutes the trade-mark to the exclusive use of which they assert a right.

It may be observed there is no averment that the other coal of the Lackawanna valley differs at all in character or quality from that mined on the complainants' lands. On the contrary, the bill alleges that it cannot easily be distinguished therefrom by inspection. The bill is therefore an attempt to secure to the complainants the exclusive use of the name "Lackawanna coal," as applied, not to any manufacture of theirs but to that portion of the coal of the Lackawanna valley which they mine and send to market, differing neither in nature or quality from all other coal of the same region.

§ 453. *The office and use of a trade-mark.*

Undoubtedly words or devices may be adopted as trade-marks which are not original inventions of him who adopts them, and courts of equity will protect him against any fraudulent appropriation or imitation of them by others. Property in a trade-mark, or rather in the use of a trade-mark or name, has very little analogy to that which exists in copyrights or in patents for inventions. Words in common use, with some exceptions, may be adopted if, at the time of their adoption, they were not employed to designate the same or like articles of production. The office of a trade-mark is to point out distinctively the origin or ownership of the article to which it is affixed; or, in other words, to give notice who was the producer. This may, in many cases, be done by a name, a mark or a device well known but not previously applied to the same article.

§ 454. *The essence of a charge of invading a trade-mark is the selling one person's goods as those of another.*

But though it is not necessary that the word adopted as a trade-name should be a new creation never before known or used, there are some limits to the right of selection. This will be manifest when it is considered that in all cases where rights to the exclusive use of a trade-mark are invaded, it is invariably held that the essence of the wrong consists in the sale of the goods of one manufacturer or vendor as those of another; and that it is only when this false representation is directly or indirectly made that the party who appeals to a court of equity can have relief. This is the doctrine of all the authorities. *Amoskeag Manufacturing Co. v. Spear*, 2 Sandf., 599; *Boardman v. Meriden Britannia Co.*, 35 Conn., 402; *Farina v. Silverlock*, 39 Eng. L. & Eq., 514. Hence the trade-mark must, either by itself or by association, point distinctively to the origin or ownership of the article to which it is applied. The reason of this is that unless it does, neither can he who first adopted it be injured by any appropriation or imitation of it by others, nor can the public be deceived. The first appropriator of a name or device pointing to his ownership, or which, by being associated with articles of trade, has acquired an understood reference to the originator or manufacturer of the articles, is injured whenever another adopts the same name or device for similar articles, because such adoption is in effect representing falsely that the productions of the latter are those of the former. Thus the custom and advantages to which the enterprise and skill of the first appropriator had given him a just right are abstracted for another's use, and this is done by deceiving the public, by induc-

ing the public to purchase the goods and manufactures of one person supposing them to be those of another. The trade-mark must therefore be distinctive in its original signification, pointing to the origin of the article, or it must have become such by association. And there are two rules which are not to be overlooked. No one can claim protection for the exclusive use of a trade-mark or trade-name which would practically give him a monopoly in the sale of any goods other than those produced or made by himself. If he could, the public would be injured rather than protected, for competition would be destroyed. Nor can a generic name, or a name merely descriptive of an article of trade, of its qualities, ingredients or characteristics, be employed as a trade-mark, and the exclusive use of it be entitled to legal protection. As we said in the well-considered case of *The Amoskeag Manufacturing Co. v. Spear*, 2 Sandf., 599, "the owner of an original trade-mark has an undoubted right to be protected in the exclusive use of all the marks, forms or symbols that were appropriated as designating the true origin or ownership of the article or fabric to which they are affixed; but he has no right to the exclusive use of any words, letters, figures or symbols which have no relation to the origin or ownership of the goods, but are only meant to indicate their names or quality. He has no right to appropriate a sign or a symbol, which, from the nature of the fact it is used to signify, others may employ with equal truth, and therefore have an equal right to employ for the same purpose." *Vide Wolfe v. Goulard*, 18 How. Pr., 64; *Fetridge v. Wells*, 4 Abb. Pr., 144; *Town v. Stetson*, 5 id. (N. S.), 218; *Phalon v. Wright*, 5 Phillips, 464; *Singleton v. Bolton*, 3 Doug., 293; *Perry v. Truefitt*, 6 Beav., 66; *Canham v. Jones*, 2 Ves. & B., 218; *Millington v. Fox*, 3 Mylne & C., 338.

§ 455. *A trade-mark cannot be made of a geographical name.*

And it is obvious that the same reasons which forbid the exclusive appropriation of generic names, or of those merely descriptive of the article manufactured and which can be employed with truth by other manufacturers, apply with equal force to the appropriation of geographical names, designating districts of country. Their nature is such that they cannot point to the origin (personal origin) or ownership of the articles of trade to which they may be applied. They point only at the place of production, not to the producer, and could they be appropriated exclusively, the appropriation would result in mischievous monopolies. Could such phrases as "Pennsylvania wheat," "Kentucky hemp," "Virginia tobacco" or "Sea Island cotton" be protected as trade-marks; could any one prevent all others from using them, or from selling articles produced in the districts they describe under those appellations, it would greatly embarrass trade, and secure exclusive rights to individuals in that which is the common right of many. It can be permitted only when the reasons that lie at the foundation of the protection given to trade-marks are entirely overlooked. It cannot be said that there is any attempt to deceive the public when one sells as Kentucky hemp, or as Lehigh coal, that which in truth is such, or that there is any attempt to appropriate the enterprise or business reputation of another who may have previously sold his goods with the same description. It is not selling one man's goods as and for those of another. Nothing is more common than that a manufacturer sends his products to market, designating them by the name of the place where they were made. But we think no case can be found in which other producers of similar products in the same place have been restrained from the use of the same name in describing their goods. It is true that in the case of *Brooklyn White Lead Com-*

pany *v. Masury*, 25 Barb., 416, where it appeared that the defendant (at first selling his product under the name "Brooklyn white lead") had added to the name the word "Company" or "Co.," which made it an imitation of the plaintiff's trade-mark, though he was not a company, he was enjoined against the use of the added word. It was a case of fraud. He had assumed a false name in imitation of a prior true one, and with the obvious design of leading the public to think his manufacture was that of the plaintiff. But the court said, as both the plaintiff and defendant dealt in the same article, and both manufactured it at Brooklyn, each had the same right to describe it as Brooklyn white lead.

We have been referred by the plaintiffs to three decisions which are supposed to justify the adoption of the name simply of a district or town, as a trade-mark. One of these is *Alvord v. Newman*. There it appeared that the complainants had been manufacturers of cement or water-lime at Akron, from beds in the neighborhood of that place, for about thirteen years, and that they had always designated and sold their products as "Akron cement" and "Akron water-lime." The defendants commenced a similar business twelve years later, and manufactured cement from quarries situated near Syracuse, in Onondaga county, and called their product "Onondaga *Akron* cement or water-lime." It was not in fact Akron cement (for Akron and Syracuse were a long distance from each other), and the purpose of calling it such was evidently to induce the public to believe that it was the article made by the plaintiffs. The act of the defendants was therefore an attempted fraud, and they were restrained from applying the word Akron to their manufacture. But the case does not rule that any other manufacturer at Akron might not have called his product "Akron cement" or "Akron water-lime." On the contrary, it substantially concedes that the plaintiffs, by their prior appropriation of the name of the town in connection with the words cement and lime, acquired no exclusive right to its use as against any one who could use it with truth.

McAndrews v. Bassett is another case cited by the complainants. The plaintiffs in that case were manufacturers of liquorice made from roots and juice imported from Anatolia and Spain, and they sent their goods to market stamped "Anatolia." Soon afterwards the defendants made to order from a sample of the plaintiffs' liquorice, other liquorice which they also stamped "Anatolia." It was a clear case of an attempt to imitate the mark previously existing, and to put upon the market the new manufacture as that of the first manufacturers. It does not appear, from the report of the case, that the juice or roots from which the defendants' article was made came from Anatolia. If not, their mark was false. Of course the lord chancellor enjoined them. In answer to the argument that the word Anatolia was in fact the geographical designation of a whole country, a word common to all, and that therefore there could be no property in it, he said: "Property in the word for all purposes cannot exist; but property in that word as applied by way of stamp upon a stick of liquorice does exist the moment a stick of liquorice goes into the market so stamped and obtains acceptance and reputation in the market." It was not merely the use of the word, but its application by way of stamp upon each stick of liquorice, that was protected. Nothing in this case determines that a right to use the name of a region of country as a trade-mark for an article may be acquired to the exclusion of others who produce or sell a similar article coming from the same region.

Nor is such a doctrine to be found in *Seixo v. Provezende*, the remaining case cited by the complainants. The case turned upon an imitation of the plaintiff's device, which was the figure of a coronet combined with the word *Seixo*, a word which can hardly be said to have been the name of a district of country. It means stony, and, although applied to two estates, it was also the name of the plaintiff. Yet nothing in the decision warrants the inference that the word *Seixo* could alone become a trade-mark for any article, much less that it could be protected as a trade-mark for any article to the exclusion of its use in describing other articles coming from the same estate.

§ 456. *It is only when the imitation of a trade-mark amounts to a false representation that there is any title to relief.*

It must then be considered as sound doctrine that no one can apply the name of a district of country to a well-known article of commerce and obtain thereby such an exclusive right to the application as to prevent others inhabiting the district or dealing in similar articles coming from the district from truthfully using the same designation. It is only when the adoption or imitation of what is claimed to be a trade-mark amounts to a false representation, express or implied, designed or accidental, that there is any title to relief against it. True it may be that the use by a second producer, in describing truthfully his product, of a name or a combination of words already in use by another, may have the effect of causing the public to mistake as to the origin or ownership of the product; but if it is just as true in its application to his goods as it is to those of another who first applied it and who therefore claims an exclusive right to use it, there is no legal or moral wrong done. Purchasers may be mistaken, but they are not deceived, by false representations, and equity will not enjoin against telling the truth.

These principles, founded alike on reason and authority, are decisive of the present case, and they relieve us from the consideration of much that was pressed upon us in the argument. The defendant has advertised for sale, and he is selling, coal not obtained from the plaintiffs, not mined or brought to market by them, but coal which he purchased from the Pennsylvania Coal Company, or from the Delaware, Lackawanna & Western Railroad Company. He has advertised and sold it as Lackawanna coal. It is in fact coal from the Lackawanna region. It is of the same quality and of the same general appearance as that mined by the complainants. It is taken from the same veins or strata. It is truly described by the term Lackawanna coal, as is the coal of plaintiffs. The description does not point to its origin or ownership, nor indicate in the slightest degree the person, natural or artificial, who mined the coal or brought it to market. All the coal taken from that region is known and has been known for years by the trade, and rated in public statistics, as Lackawanna coal. True the Delaware, Lackawanna & Western Railroad Company have sometimes called their coal Scranton coal, and sometimes Scranton coal from the Lackawanna, and the Pennsylvania Coal Company have called theirs Pittston coal, thus referring to the parts of the region in which they mine. But the generic name, the comprehensive name for it all, is Lackawanna coal. In all the coal regions there are numerous collieries, owned and operated by different proprietors, yet the product is truly and rightfully described as Schuylkill, Lehigh or Lackawanna coal, according to the region from which it comes. We are therefore of opinion that the defendant has invaded no right to which the plaintiffs can maintain a claim. By advertising and selling coal brought from the Lackawanna valley as Lackawanna coal he

has made no false representation, and we see no evidence that he has attempted to sell his coal as and for the coal of the plaintiffs. If the public are led into mistake it is by the truth, not by any false pretense. If the complainants' sales are diminished, it is because they are not the only producers of Lackawanna coal, and not because of any fraud of the defendant. The decree of the circuit court dismissing the bill must, therefore, be affirmed. (a)

BLACKWELL & CO. v. DIBRELL & CO.

(Circuit Court for Virginia: 3 Hughes, 151-163. 1878.)

STATEMENT OF FACTS.—Morris and Wright had a tobacco factory at Durham, North Carolina. Wright sold out to Morris and left the place; Green succeeded Morris, and the plaintiffs in this action succeeded Green, who, however, before his death had adopted the trade-mark in question in this case, to wit, the word "Durham" and the figure of a short-horn bull. This trade-mark was and still is kept up by his successors. Wright claimed a like trade-mark composed of the same word and the head and neck of a bull. It was alleged that he had and used this trade-mark while in business with Morris. Its use, however, it is conceded, was abandoned by him for about eight years. After he resumed it he transferred it, together with a flavoring compound, to one Armistead, who transferred his right to Blackwell & Co. The defendants claim the right to use a trade-mark substantially the same as that used by complainants, under authority from Wright. This bill is filed for an account and a perpetual injunction. There have been several other suits concerning this trade-mark which are sufficiently referred to in the opinion of the court.

Opinion by HUGHES, J.

It is useless to review all the points relied upon by counsel on each side in their able arguments in the cause. I shall consider only those questions upon which, in my judgment, the case really turns.

§ 457. *Upon what conditions the prosecution of one suit is an estoppel.*

I shall first deal with the objection of estoppel, or *res judicata*, urged by each party against the other. In order for one suit to constitute an estoppel upon any party to another suit, four conditions must co-exist, viz.: 1st. There must be an identity of the cause of action. 2d. There must be an identity of parties to the suit. 3d. There must be an identity in the character or quality of the respective parties; and 4th. There must be an identity of the thing in question. See *Smith v. Turner*, 1 Hughes, 375.

These conditions of identity do not exist between the present case and either of the cases of *Blackwell v. Wright* or *Blackwell v. Armistead*. Those cases, therefore, do not operate as estoppels. Nor do they at all affect the one now under consideration, except so far as they are precedents of authority upon the principles which were decided by them. In *Blackwell v. Wright* the decision was upon demurrer to the complaint; and, in technical effect, it was only that Blackwell had not traced his title to his trade-mark by proper allegations from Green; while, on the merits, the decision went only so far as to determine that the allegations of the complaint did not make a case of exclusive right to the trade-mark for the plaintiff. The complaint there did not charge that Wright's use of the trade-mark was a fraud upon the public, or pray for an injunction on that ground. None of these allegations can be made of the complainants' bill in this case.

(a) Affirming *Delaware & Hudson Canal Co. v. Clark*,* 7 Blatch., 112.

In *Blackwell v. Armistead* it is true that the decision was upon the principal questions raised in the present case; but owing to the character of the pleadings it was based upon grounds narrower and more technical than those upon which I propose to found the present decision. That suit was a trade-mark case. This is more, and involves the question of the fraudulent use of a trade-mark, to the injury of the public at large, as well as of the complainants. Therefore, neither of the two cases which have been urged in estoppel governs even as precedents the present one, which I shall now proceed to consider.

Two questions arise as to the pleadings and evidence: 1st. The first is, whether the defendants have any right at all to use a label in which the word Durham is used as descriptive of smoking tobacco, and in which the figure of a short-horn bull is used as a symbol of the word Durham; their right to the exclusive use of it not being claimed. 2d. The second question is, whether the complainants have a right to the exclusive use of such a label.

In considering the first question, I shall, for the sake of brevity, speak of the defendants' right to use the label described as Wright's, inasmuch as their title to use such a label could come, under the evidence in this cause, only from Wright. Has, then, Wright, or his assignees, now, or have they at any time since 1865, had any right at all to use a label having in it the word Durham, as descriptive of smoking tobacco, and having also in it the figure of a short-horn bull, or any part of that animal, as a symbol of the word Durham? Of course their title to use the word and the symbol stands on the same basis; if it falls as to the word it falls also as to the symbol of the word.

There can be no doubt of Green's original right to the exclusive use of the full figure of a short-horn bull as a trade-mark. That is virtually conceded by Wright himself in his testimony. As to the word Durham as descriptive of smoking tobacco, the right to use it is in this cause claimed by defendants, who do business in Richmond, Va., and who advertise and sell *as* Durham smoking tobacco, tobacco which they put up in Richmond and which they obtain from any source available to them other than Durham. Such a practice necessarily deceives every purchaser who, in purchasing this Durham smoking tobacco, believes that he is purchasing the fine tobacco put up in the place of that name in North Carolina. Dibrell & Co. claim solely from Wright. What, then, is Wright's title under which this deception comes about?

He claims that he did not, in 1861, sell his right in the label used by Morris & Wright to his partner, Morris, when he sold all his interest in the business. He claims that he derived the word Durham and the device of a short-horn bull from a Durham mustard box. He pretends that neither the word nor the device, as invented and used by him, was descriptive or geographical in purport, but that they were arbitrary symbols, and that having been so at the beginning, he and his assignees have still a right to use them.

§ 458. *The right to use a trade-mark is lost by the abandonment of its use for a term of eight years.*

The objection to this pretension lies not merely in the improbability of the origin of the use of the word Durham and its symbol which Wright recounts, or in the unsatisfactory character of the evidence on which his original right to use the word and its symbol is based, or in the presumption that when he sold in 1861 he sold all his interest to Morris; but it lies also in these two facts, viz.: 1st. That whatever title Wright had to the use of the word Durham after leaving Morris, in or about the year 1861, was lost by non-use, his disuse continuing through a period of eight or nine years after he left the vicinity of

Durham; and 2d. That during this long period of disuse the brand of Durham smoking tobacco acquired a definite and peculiar meaning with dealers and consumers; the word Durham ceasing to be (even if it ever was) a mere arbitrary term, and having obtained a geographical signification as to the place — Durham, and a commercial signification as to the article of tobacco manufactured at Durham. During the interval of disuse the phrase Durham tobacco had come to indicate that portion of the product of a particular region of country which was marketed at the place called Durham's or Durham. The phrase "Durham Smoking Tobacco" had come to indicate in all markets, and among all dealers and consumers, the smoking tobacco marketed and manufactured at this place of Durham, in North Carolina.

It was not until after this signification had attached to the phrase that Wright adopted (or, as he pretends, returned to) the use of the word Durham which he had abandoned. If, as he claims, the word Durham had in fact been used by him at first as an arbitrary trade-mark, and if, in addition, he had continued the use of it without interruption down to 1866 and on to the present time, that use by him would itself have prevented the other and local signification from attaching to the brand and word; for in that case Durham smoking tobacco would have described two tobaccos: first, those marked and manufactured at Durham, and, second, those sprinkled with Wright's "Durham" juice.

But he did abandon its use; he stood by for some eight years and allowed a peculiar commercial and local signification to attach to the word Durham as descriptive of smoking tobacco, and not until after that local and commercial signification had come to identify the tobacco labeled with the word all over the country as coming from a particular region and as having a particular quality, and not until after this brand had come to be worth thousands of dollars to the manufacturers of this particular tobacco at this particular place, did he begin or resume the use of the device, which he claims to have derived from the mustard can. To put that word now on tobaccos grown elsewhere than at Durham, even though sprinkled with his "Durham" decoction, is, in the light of the evidence in this case, to pass them off as tobaccos coming from Durham, and is to deceive and defraud all who deal in and purchase the commodity as smoking tobacco from Durham. It has so come to pass from Wright's non-use for eight years, that to manufacture and sell other tobaccos at all and brand them with the word Durham is to deceive the public, no matter what liquid may be used on them. Under existing circumstances, to manufacture even Durham tobaccos elsewhere than at Durham, and to sprinkle them with a foreign liquid, is to deceive the public generally, and those who put up the genuine article at that place particularly. The manufacture of these tobaccos at that place is the best guaranty which the public and the trade can have that the commercial article labeled Durham Smoking Tobacco, and sold in all markets, is genuine, and prepared under the fewest temptations to adulteration.

That the right to use a trade-mark may be lost by abandonment or disuse is too clear to need argument or the support of authority. The law of the subject is stated in the chapter on abandonment, sections 674 to 691, of Brown on Trade-marks. It cannot be pretended that in Green's first use of his label, in 1865 or 1866, he had any intention of taking up an old label at second hand, or had any knowledge or belief that Wright, or any one else, could claim the label which he then devised as entirely novel and peculiar. The field was

open to his enterprise and invention, for establishing his business and inventing his label and trade-mark just as he did.

Green's adoption in 1865 or '66 of the word Durham, as descriptive of the best tobacco of North Carolina put up by him, and of the bull as a symbol of the word, was naturally suggested by the facts of his business. If Wright had ever had such a label, which I do not feel that the evidence warrants us to believe, it was in 1865-66 unknown in Durham; had been abandoned even then for some four years; had never signified anything but tobacco sprinkled with Wright's decoction; and had never borne the valuable and creditable commercial signification which the climate and soil and good husbandry of North Carolina and the enterprise of a Durham manufacturer were about to give it.

By the several facts, of Wright's non-user of the label for eight years; of its never having, even as claimed by him, had any but an arbitrary significance as tobacco sprinkled with a species of artificial treacle; and of its having during a long period of disuse acquired a new, wholly different, and well and widely known geographical and commercial signification, Wright lost his right of using the label altogether. His use of it now operates necessarily to mislead and deceive the public as to the source of production and quality of the article bearing the label, thereby defrauding them; and the court will therefore make a decree of perpetual injunction against the further use of it.

§ 459. *The word "Durham" and the symbol of a bull constitute a valid trade-mark.*

As to the second question, whether Blackwell & Co. have an exclusive right to the use of the label described in the pleading, I think on the evidence submitted that they have. We have no hesitation in so deciding as against the defendant in this cause, and will incorporate in the decree of the court an order for an account of profits against the defendant as prayed for in the bill.

The label and trade-mark of complainants was established in 1865 by J. R. Green. His business and that of his successors built up the insignificant and obscure place, Durham's Station, into the flourishing town "Durham." The town grew up during the first four or five years of the use of the label, and owed its growth in chief part to the business indicated by the label. In that respect the case is similar to that of the trade-mark Cocoaïne (Burnett v. Phalon, 3 Keyes, 394). In respect to the commercial article bearing the geographical name, it is similar to that of the Akron cement (Newman v. Alwood, 51 N. Y., 189). The right of the complainants in this case has the double strength of that of the proprietors of the trade-mark Cocoaïne, and of that of the Akron cement. The use of the principal characteristics of their trade-mark by manufacturers not conducting their business at Durham is a deception put upon the public, and may be enjoined on that ground alone, irrespectively of the trade-mark right. The use of the trade-mark invented by Green under which he and his successors built up his trade, and built up the town of Durham, like the use of the word Akron to the proprietors of the commercial article bearing that name, belongs exclusively to the successors of Green, and the court should secure its exclusive use to them.

I had some doubt whether, in a litigation between Blackwell & Co. on the one hand, and defendants not doing business in the town of Durham on the other, it was competent for the court to decree that Blackwell & Co. have the exclusive right to the use of the word and symbol characterizing their trade-mark; but it is certainly competent for us to render a decree responsive

to the issues made up by the allegations and denials of the bill and answer, one of which is this right of exclusive use claimed by Blackwell & Co. As between the complainants and defendants in this suit, therefore, we may so decree, even though other persons than the defendants to this record be not bound by the decree.

BOND, J., concurred in the decree.

SINGER MANUFACTURING COMPANY v. LARSEN.

(Circuit Court for Illinois: 8 Bissell, 151-154. 1878.)

Opinion by DRUMMOND, J.

STATEMENT OF FACTS.—Under the evidence in this case, I think there can be no doubt that the plaintiff cannot claim the exclusive right to manufacture the “Singer Sewing Machine.” All that it can claim is to make a machine of its own peculiar manufacture, with a device in the nature of a trade-mark. Otherwise, after a patent has expired which has established the nomenclature of a sewing machine, as the Howe patent, or the Wilson patent, the patentee might go on and have the benefit of the patent indefinitely.

§ 460. *Rights of all persons to use the name of a machine the patent of which has expired. Under what circumstances this may be done. There can be no trade-mark in the name of an expired patent. (a)*

On a machine called “The Singer Sewing Machine” there were various patents. These patents have all expired, and nothing can, therefore, be claimed under them. Other persons cannot be prevented from manufacturing a machine like the Singer sewing machine, and which may be called, to distinguish it from other machines, “Singer’s Sewing Machine.” If a sewing machine has acquired a name which designates a mechanism or a peculiar construction, parts of which are protected by patents, other persons, after the expiration of the patents, have the right to construct the machine and call it by that name, because that only expresses the kind and quality of the machine. I have read the reports of the case of the Singer Manufacturing Company v. Wilson, originally decided by the master of the rolls in England, and afterwards, on appeal, in the chancery division of the high court of justice, and again on appeal from the latter court to the house of lords (Law Rep., Ch. Div., vol. 2, 1876, 434; Law Journal Reports, 1878, N. S., 47 Ch., 481), and I do not think it is necessary to controvert the general rule there laid down, that there must be something to indicate that the thing manufactured is not the same as that of the complainant; in other words, to show it is not manufactured by the plaintiff. That is, it is a question of manufacture, not of name. A person could not claim a right to construct a peculiar form of barrel as to dimensions and capacity merely, irrespective of any marks or brands impressed upon it. That of itself could not be a lawful trade-mark. The same rule would be applicable to the construction of a wagon or carriage, which, owing to some peculiarity, might possess a particular name, as that of the original manufacturer. A man might construct a wagon or carriage precisely like it, and he would not be liable if he did not claim in some form that it was constructed by the manufacturer. The only principle upon which an action can be sustained under such circumstances, as I understand, is through a trade-mark. If there were a valid

(a) To the same effect are *Singer Manuf’g Co. v. Stanage*,* 2 McC., 512; and *Same v. Riley*,* 11 Fed. R., 706.

trade-mark called a "Singer Machine," then there would be some force in the plaintiff's claim. Here the plaintiff and the defendant have a trade-mark somewhat similar, and if there is on the machine manufactured by the plaintiff a valid trade-mark to indicate that it is of the plaintiff's manufacture, no one else ought to be permitted to put anything on his machine to show that it has been manufactured by the plaintiff; that is, to use the same trade-mark. It may be the defendant has made his machine to imitate the plaintiff's, and to induce people to believe that it is the same. But as I have said, I do not think, under the circumstances of this case, there can be a trade-mark for the name "Singer Sewing Machine."

An illustration is furnished in the opinion of the lord chancellor in the house of lords in the case already referred to. A carriage called a "brougham" had been in very general use for many years. If that were devised by a man of the same name, so that, from its peculiarity of construction, it was generally known by that name, it certainly cannot be claimed that the man who devised it, or his assignees, would have a sole right to construct a "brougham" for all time to come. If no patent existed upon it or any of its parts, any one who has the requisite skill could construct just such a "brougham" as was originally constructed. There could, in such a case, be no trade-mark which the law would protect in the name "brougham;" and I therefore do not think that the opinion of the house of lords can be construed to mean what is claimed by the counsel of the plaintiff in this case. So that, while I hold that the defendant is not prevented from constructing a "Singer Sewing Machine," still he cannot be permitted to do any act the necessary effect of which will be to intimate, or to make any one believe, that the machine which he constructs and sells is manufactured by the plaintiff. Neither has he the right to use any device which may be properly considered a trade-mark, so as to induce the public to believe that his machine has been manufactured by the plaintiff; and, therefore, I shall modify the injunction in this case by simply requiring the defendant to refrain from selling any Singer sewing machines manufactured by any person or company other than the plaintiff, without indicating in some distinct manner that the said machines were not manufactured by the Singer Manufacturing Company.

FAIRBANKS v. JACOBUS.

(Circuit Court for New York: 14 Blatchford, 337-341. 1877.)

Opinion by JOHNSON, J.

STATEMENT OF FACTS.—This motion is made for a preliminary injunction to restrain the defendant from the use of the words "Fairbanks' patent" upon platform scales, and from making or selling an imitation of Fairbanks' scales. This preliminary relief is sought substantially upon the grounds of imitation of the article made and sold by the plaintiffs, and of violation of the plaintiffs' alleged trade-mark. No question of violation of patent-right is involved, for there is no claim by the plaintiffs that the scale complained of is, either in the whole or in any part, an invasion of any existing patent owned by the plaintiffs. Indeed, it is not claimed on the part of the plaintiffs that any part of their scale alleged to be imitated is protected by any existing patent, or that any existing patent owned by them applies to their own scale, except a small and unessential, though useful, addition to the scale frame, by which the oscillation of the weighing beam is prevented under certain circumstances. This

addition, which the scale complained of does not possess, is secured by an existing patent to the plaintiffs, and bears the proper words required by statute, "patented Feb. 11, 1862," cast upon it.

§ 461. *Colors or unessential forms cannot be adopted as trade-marks.*

The alleged imitation, as claimed by the plaintiffs, consists in this: that the scale complained of, as to the iron castings entering into its structure, was made by using the corresponding parts of a scale made by the plaintiffs, to form the moulds for those castings; and that the general shape and arrangement, as well as the color and external appearance, are imitated from the plaintiffs' scale so nearly that only an expert in scales could distinguish the difference between them. While, as matter of fact, I should, after an inspection of the two scales, not think the discrimination so very difficult, yet it may be taken to be not only difficult, but impossible, to discriminate between them. That fact does not give the plaintiffs any right. Their patents, while they existed (and those concerned terminated in or about 1845), protected them in the essential structure of their invention, but exterior form, painted color, and such non-essentials, were not, and could not be, the subject of the patents, and did not, and could not, secure these to the plaintiffs. Much less could these be secured as a trade-mark, for a trade-mark is always something indicative of origin or ownership, by adoption and repute, and is something different from the article itself which the mark designates. An invention of structure a patent for the invention secures; a design is secured by a patent for that. Apart from these, any one may make anything in any form, and may copy with exactness that which another has produced, without inflicting any legal injury, unless he attributes to that which he has made a false origin, by claiming it to be the manufacture of another person. Any other doctrine is impossible to be maintained; for, otherwise, all the colors, all the unessential forms, could be monopolized as trade-marks, and exclusive rights would be created, not limited in time, as patents are, founded upon no public utility, and subject to no control but the will of the adopter. I think there is no difference in the cases on this subject. *Amoskeag Co. v. Spear*, 2 Sandf., 599; *Gillott v. Esterbrook*, 47 Barb., 455; *Newman v. Alvord*, 49 Barb., 588. I conclude, therefore, that there is no invasion of the plaintiffs' rights, in the purposed and actual identity, both of structure and appearance, in the scales in respect to which the defendant is sued, with those which the plaintiffs manufacture.

§ 462. *The words "Fairbanks' patent" do not constitute a trade-mark.*

The case does not, however, rest here. On the base of the platform of what I may call the defendant's scale are cast the words, "Fairbanks' patent," with the number indicative of size, 11, and upon the weigh beam are stamped the words "Fairbanks' patent." These are all the words which appear upon these scales, which can be the foundation of a charge of invasion of trade-mark, and, indeed, are all the words or figures upon any part of the scale. The same words appear on corresponding parts of the plaintiffs' scale, and, if they constitute a legal trade-mark, I shall assume, for the present purpose, that the defendant's scales violate it. Are these words a name of origin, or a name of quality, indicating structure? Whatever they are in the one scale, they are, also, in the other. In some of the plaintiffs' scales their origin is signified by a quite different mark: "Fairbanks' Standard, made only by E. & T. Fairbanks & Co., St. Johnsbury, Vermont." This is a valid trade-mark of the plaintiffs, but does not appear upon their scale produced in court. The

other words must be understood as claiming that the thing on which it appears is protected by a patent. Especially is it thus localized and referred to the particular parts on which it appears, when, upon another part, is found the proper patent mark, which is necessary to support an action for an infringement, in the absence of notice, under section 4900 of the Revised Statutes. This gives significance to the use of the other marks, and makes the conclusion almost irresistible, that the purpose of the other words, on the beam and the frame, are to impress upon the incautious public that the scale is the subject of a patent, and, therefore, not open to competition in manufacture or sale. I agree, on this point, with the position of the plaintiffs' counsel, in his printed points, that "it is an error to suppose that even the patentee may so stamp his articles and deceive the public after the expiration of his patent" — citing *Leather Cloth Co. v. Am. Leather Cloth Co.* (Am. Trade-Mark Cases, 688, 713). And I add, in confirmation of this view, the decision of Judge Cadwalader, in the eastern district of Pennsylvania, October 4, 1875, in *Consol. Fruit Jar Co. v. Dorflinger*, 1 N. Y. Weekly Digest, 427, upon reasons which seem to me quite satisfactory, and by which, on a motion for a preliminary injunction, I ought to be guided. It is, of course, no answer that the defendant is, at least, guilty of the same fault, or even a greater. The plaintiffs fail to make these words out to be a lawful trade-mark, and, of course, cannot maintain upon them their claim for relief.

As to the charge that the defendant threatens various supposed wrongs to the plaintiffs, in imitating their manufacture, and that he represents his scales to be of the plaintiffs' make, the allegations are not so made out as to satisfy my mind of their substantial truth. *Byam v. Bullard*, 1 Curt., 100. I doubt whether the defendant meant anything beyond the assertion of a right to use the words on the scale, which had been for many years openly used by him and his predecessors, under claim of right, and for some time at least, and to some extent, with the knowledge of the plaintiffs or their predecessors.

Certainly, if the words "Fairbanks' patent" do not mean to assert the existence of a patent securing the scales, but only that they are made in conformity with, and embody the invention of, the expired Fairbanks' patent, they are free to all the world. What is not free is, to pretend that a scale is made by one person, which is, in fact, made by another.

In trade-mark cases, it is by no means of course to grant preliminary injunctions, even where the plaintiff's case seems to be made out; and I shall, therefore, leave the further consideration of the case to the final hearing, when the questions as to the defendant's claim of right to the use of the words "Fairbanks' patent," and the other questions of fact just referred to, and the unexplained circumstances and terms of the writing claimed to have extinguished the right of Chamberlain, can, if necessary, be further considered. The motion for an injunction must be denied, and the order heretofore made, granting an injunction till the decision of the motion, must be vacated.

FILLEY v. CHILD.

(Circuit Court for New York: 16 Blatchford, 376, 377. 1879.)

Opinion by BLATCHFORD, J.

STATEMENT OF FACTS.—The bill alleges that the plaintiff, in 1851, "conceived of applying" the name of "charter oak," as a trade-mark to cooking stoves embodying certain improvements in their internal construction, which

he had invented, for the purpose (1) of securing to himself more completely and exclusively the benefits to be derived from the manufacture and sale of such cooking stoves, and (2) of giving to the same a particular name, to enable the general public and purchasers to distinguish the same from all other cooking stoves. It is not alleged in the bill that the plaintiff has ever applied the name "charter oak" to any other cooking stove than the one embodying said improvements, nor that the cooking stoves sold by the defendant, bearing upon them the name of "charter oak" embodied said improvements, nor that the said improvements were patented to the plaintiff. It is shown that said improvements were patented to the plaintiff June 14, 1853; that the patent was reissued to him December 27, 1859; and that it was extended for seven years from the 14th of June, 1867. There is no evidence that any one, prior to the plaintiff, applied the name "charter oak" to a stove containing said improvements; and it is shown that all the stoves sold by the defendant have been stoves containing said improvements, and having upon them the name "charter oak." The suit is not brought upon the patent, for a violation thereof. The bill alleges that the use of said trade-mark by the defendant "is intended and designed and well calculated to deceive the public into the belief that the stove bearing it is the genuine stove" of the plaintiff, "since by said name 'charter oak' is alone the said stove bought, sold and known." There is no evidence that any person buying one of such stoves as the defendant has so sold would believe that he was buying a stove made by the plaintiff, although he would believe that he was buying a stove containing the improvements so patented to the plaintiff.

§ 463.. *As to the right to manufacture a patented article, after the patent has expired, and call it by the name by which it has been known.*

As the patent has expired, and the defendant has a right to sell cooking stoves embodying the patented improvements, the sole question is, whether the defendant has a right to sell them with the name "charter oak" upon them. The evidence satisfactorily shows that the plaintiff, during the entire twenty-one years' duration of the patent, knew of, and acquiesced in, the manufacture and sale by M. L. Filley and those under whom he claims, of cooking stoves containing the patented improvements, with the name "charter oak" upon them. M. L. Filley made the stoves now complained of. He has built up a business through such acquiescence, in the manufacture and sale of such cooking stoves, with such name. Under such circumstances, the plaintiff cannot, after his patent has expired, and when M. L. Filley has the right to make stoves containing said improvements, prevent him from calling them by the name of "charter oak," so long as he does not represent them as being made by the plaintiff, or induce others to believe that they are made by the plaintiff.

The bill is dismissed with costs.

MANUFACTURING COMPANY v. TRAINER.

(11 Otto, 51-67. 1879.)

APPEAL from U. S. Circuit Court, Eastern District of Pennsylvania.

Opinion by Mr. JUSTICE FIELD.

STATEMENT OF FACTS.—This is a suit in equity to restrain the defendants, D. Trainer & Sons, from using, on ticking manufactured and sold by them, the letters "A. C. A." in the sequence here named, alleged by the complainant to

be its trade-mark, by which it designates ticking of a particular quality of its own manufacture; and to compel the defendants to account for the profits made by them on sales of ticking thus marked.

It appears that the complainant, the Amoskeag Manufacturing Company, a corporation created under the laws of New Hampshire, commenced the manufacture of ticking at Amoskeag Falls, in that state, some time prior to 1834, and marked its products with a label or ticket consisting of a certain device, within which were printed, in red colors, the name of the company, its place of manufacture, the words "Power Loom," and in the center the single letter "A" or "B" or "C" or "D," according to the grade of excellence of the goods, the first quality being indicated by the first letter, and the decreasing quality from that grade by subsequent letters in the alphabet. The device, apart from the words mentioned, was a fancy border in red colors, square outside and elliptical within, and the words in the upper and lower lines of the label were printed in a line corresponding with the inside curve of the border.

In the year 1834, or about that time, the company introduced an improvement in its manufacture, by which it produced a grade or quality of ticking superior to any which it had previously manufactured. For goods of this quality it used in its label or ticket, in place of the single letter "A," the three letters "A. C. A." The original device with its colored border and printed words indicating the company by which and the place where the goods were manufactured was retained; the only alteration consisting in the substitution of the three letters "A. C. A." in place of the single letter "A." Subsequently the company changed its place of manufacture from Amoskeag Falls to Manchester, in the same state, and a corresponding change was then made in the label. The three letters mentioned were placed in the label or ticket on all goods of the very highest quality manufactured by the complainant, the single letter being retained in the labels placed on other goods to indicate a lower grade or quality. The combination of the three letters was probably suggested, as is stated, by the initials of the words in the company's name,—Amoskeag Company,—with the letter "A" previously used to denote the best quality of goods it manufactured. It is contended by the complainant that the combination was adopted and used to indicate not merely the quality of the goods, but also their origin as of the manufacture of the Amoskeag Company. It is upon the correctness of this position that it chiefly relies for a reversal of the decree dismissing the bill.

On the part of the defendants the contention is that the letters were designed and are used to indicate the quality of the goods manufactured and not their origin; that it was so adjudged many years ago in a case to which the company was a party in the superior court of the city of New York, which adjudication has been generally accepted as correct, and acted upon by manufacturers of similar goods throughout the country; and that the letters, as used by the defendants on a label or ticket having their own device, and in connection with words different from those used by the complainant, do not mislead or tend to mislead any one as to the origin of the goods upon which they are placed.

§ 464. *As to the doctrine of trade-marks.*

The general doctrines of the law as to trade-marks, the symbols or signs which may be used to designate products of a particular manufacture, and the protection which the courts will afford to those who originally appropriated them, are not controverted. Every one is at liberty to affix to a product of

his own manufacture any symbol or device, not previously appropriated, which will distinguish it from articles of the same general nature manufactured or sold by others, and thus secure to himself the benefits of increased sale by reason of any peculiar excellence he may have given to it. The symbol or device thus becomes a sign to the public of the origin of the goods to which it is attached, and an assurance that they are the genuine article of the original producer. In this way it often proves to be of great value to the manufacturer in preventing the substitution and sale of an inferior and different article for his products. It becomes his trade-mark, and the courts will protect him in its exclusive use, either by the imposition of damages for its wrongful appropriation or by restraining others from applying it to their goods and compelling them to account for profits made on a sale of goods marked with it.

§ 465. *The general law of trade-marks.*

The limitations upon the use of devices as trade-marks are well defined. The object of the trade-mark is to indicate, either by its own meaning or by association, the origin or ownership of the article to which it is applied. If it did not, it would serve no useful purpose either to the manufacturer or to the public; it would afford no protection to either against the sale of a spurious in place of the genuine article. This object of the trade-mark and the consequent limitations upon its use are stated with great clearness in the case of *Canal Company v. Clark*, 13 Wall., 311 (§§ 453-56, *supra*). There the court said, speaking through Mr. Justice Strong, that "no one can claim protection for the exclusive use of a trade-mark or trade-name which would practically give him a monopoly in the sale of any goods other than those produced or made by himself. If he could, the public would be injured rather than protected, for competition would be destroyed. Nor can a generic name or a name merely descriptive of an article of trade, of its qualities, ingredients or characteristics, be employed as a trade-mark, and the exclusive use of it be entitled to legal protection." And a citation is made from the opinion of the superior court of the city of New York in the case of the present complainant against Spear, reported in 2 Sandford, that "the owner of an original trade-mark has an undoubted right to be protected in the exclusive use of all the marks, forms or symbols that were appropriated as designating the true origin or ownership of the article or fabric to which they are affixed; but he has no right to the exclusive use of any words, letters, figures or symbols which have no relation to the origin or ownership of the goods, but are only meant to indicate their names or quality. He has no right to appropriate a sign or symbol which, from the nature of the fact it is used to signify, others may employ with equal truth, and therefore have an equal right to employ for the same purpose."

Many adjudications, both in England and in this country, might be cited in illustration of the doctrine here stated. For the purpose of this case, and in support of the position that a right to the exclusive use of words, letters or symbols to indicate merely the quality of the goods to which they are affixed cannot be acquired, it will be sufficient to refer, in addition to the decisions mentioned in Wallace and Sandford, to the judgment of the vice-chancellor in *Raggett v. Findlater*, where an injunction to restrain the use by the defendants upon their trade label of the term "nourishing stout," which the plaintiff had previously used, was refused on the ground that "nourishing" was a mere English word denoting quality. Law Rep., 17 Eq., 29. Upon the same prin-

ciple, letters or figures which, by the custom of traders, or the declaration of the manufacturer of the goods to which they are attached, are only used to denote quality, are incapable of exclusive appropriation; but are open to use by any one, like the adjectives of the language.

§ 466. *A device to indicate the quality of goods is not entitled to be considered a "trade-mark."*

If, now, we apply the views thus expressed to the case at bar, we shall find the question involved to be of easy solution. It is clear from the history of the adoption of the letters "A. C. A.," as narrated by the complainant, and the device within which they are used, that they were only designed to represent the highest quality of ticking which is manufactured by the complainant, and not its origin. The device previously and subsequently used stated the name of the manufacturer, and no purpose could have been subserved by any further declaration of that fact. And besides, the letters themselves do not suggest anything, and require explanation before any meaning can be attached to them. That explanation when made is that they are placed in the device of the company when it is affixed to the finest quality of its goods, while single letters are used in the same device when it is attached to goods of an inferior quality. They are never used by themselves, but merely as part of a device containing, in addition to the border in red, several printed terms. Alone the letters convey no meaning; they are only significant as part of the general device constituting the trade-mark. Used in that device to denote only quality, and so understood, they can be used by others for a similar purpose equally with the words "superior" or "superfine," or other words or letters or figures having a like signification.

We are aware that there is in the record the testimony of several witnesses to the effect that they understood that the letters were intended to indicate the origin as well as the quality of the goods to which they were attached, but it is entirely overborne by the patent fact that the label previously disclosed the name in full of the manufacturer and by the history of the adoption of the letters, as narrated by the complainant. As it was pertinently observed in the case in Sandford, if purchasers of the ticking read the name of the company, the letters can give no additional information, even if it be admitted that they are intended to indicate the name of the company. And if they do not read the name as printed, the letters are unintelligible. If an explanation be asked of their purpose in the label, the only reasonable answer which can be given is the one which corresponds with the fact that they are designed merely to indicate the quality of the goods.

§ 467. *A label that does not mislead is not an infringement of a trade-mark, and an injunction will not be granted.*

But there is another and equally conclusive answer to the suit. The label used by the defendants is not calculated to mislead purchasers as to the origin of the goods to which it is attached. It does not resemble the device of the complainant. Its border has a different figure; it is square outside and inside. It has within it the words "Omega" and "Ring Twist," as well as the letters "A. C. A." Neither the name of the complainant, nor of the place where its goods are manufactured, nor the words "Power Loom," are upon it. The two labels are so unlike in every particular, except in having the letters "A. C. A." in their center, that it is impossible that any one can be misled in supposing the goods, to which the label of the defendants is attached, are those manufactured by the complainant. The whole structure of the case thus

falls to the ground. There is no such imposition practiced upon the public and no such fraud perpetrated upon the manufacturers, in attempting to dispose of the goods of one as those of another, as to call for the interposition of a court of equity.

Decree affirmed. (a)

MR. JUSTICE CLIFFORD dissented.

(a) The Shaw Stocking Company, of Lowell, Massachusetts, were manufacturers of hosiery, and used upon their boxes labels in the following form:

	SHAWKNIT	
Style	SEAMLESS HALF-HOSE.	Size
830.	SHAW STOCKING Co., LOWELL, MASS.	11½.

Patent. B. F. Shaw, Apr. 23, 1867; Feb. 12, 1878.

The word *Shawknit* was printed in script, with a flourish underneath, and connected with the bottom of the *t*.

The central compartment of the label was the same in every instance, without reference to the contents of the boxes. The figures at either end differed according to the style and size of the hosiery, the numerals "830" having long been used by complainant to designate seamless half-hose of a mottled-drab color, manufactured by it. Half-hose of this particular variety had been advertised by these numerals, were known to the trade as "830's," and as such had become popular as the wares of complainant.

In May, 1881, complainant commenced selling to the defendants' firm at Albany large quantities of its goods. At the request and solicitation of defendants, complainant sent them several thousand circulars or price-lists, signed by the Shaw Stocking Company, and containing the announcement that the wares manufactured by that company and described in the circular could be obtained of "Mack & Co.," who would supply them to buyers at the prices indicated. These circulars were sent by the defendants extensively to their customers throughout the state, it being generally understood that the "Shawknit" goods could be obtained as favorably at Albany as at Lowell. The statements contained in the circular, emanating as it did directly from the company, taken in connection with the fact that the defendants advertised themselves on their bill-heads as "manufacturers and manufacturers' agents," caused it to be commonly supposed that Mack & Co. were the New York agents of the complainant, or at least conveyed information from which such an inference could reasonably and properly be drawn by the commercial world. In March, 1882, the defendants having maintained this connection with the complainant for nearly a year, and having a large quantity of its hosiery undisposed of, commenced putting up and selling, without previous notice, other goods, similar in color and texture, but inferior in many respects to its productions, as complainant insists, and lighter in weight and cheaper in price, as defendants admit. These goods were sold under labels of the following form:

	SEAMLESS	Style
	HALF-HOSE	830
	DOUBLE HEELS.	
M. & Co.	MACK & Co., - - - ALBANY, N. Y.	10½.

The lettering on the ends of this label was on a shield-shaped figure, the letters "M. & Co." being in the form of a monogram, while the word *Seamless* was printed in script, with a flourish underneath connecting with the last *s*, and resembling the word *Shawknit* in plaintiff's label in general appearance.

The wares so labeled and sold were not manufactured by the defendants, but were purchased of stocking makers at Birmingham, Connecticut, the labels on the boxes being removed by the defendants and the above labels substituted, not only on the Birmingham but also on the "Shawknit" boxes.

The question in the case was as to the right of plaintiff to be protected in the use of the figures 830, and the court, COXE, J., ruled as follows:

"The question to which the attention of counsel was chiefly devoted on the argument was whether the complainant had an exclusive right to the number '830' to designate and distinguish its hose of a particular variety. Broadly defined, a trade-mark is a mark by which the wares of the owner are known in trade. Its object is twofold: *First*, to protect the party using it from competition with inferior articles; and, *second*, to protect the public from imposition. There is hardly a limit to the devices that may be thus employed; the whole material universe is open to the enterprising merchant or manufacturer. Anything which can serve to distin-

KINNEY v. ALLEN.

(Circuit Court for Virginia: 1 Hughes, 106-114. 1877.)

Opinion by HUGHES, J.

STATEMENT OF FACTS.—The complainant is a manufacturer in New York of cigarettes of several varieties, which are in very popular use. On certain classes of the packages and boxes in which he makes them up for market he places, amongst other trade-marks, an eastern fez, surrounded by rays of light; and also the numerical symbol $\frac{1}{2}$, printed in bold characters, in red color, with the bar between the two figures oblique and nearly upright; with the figure 1 elevated on the left; with the figure 2 depressed on the right; the symbol as a whole being of such size that the circumference of a circle having a radius of five-eighths of an inch will just include all of its points. This character of $\frac{1}{2}$ as just described has been used by the complainant on certain of his cigarettes since 1873, and he applied for its registration in the patent office of the United States in May, 1875.

Shortly before this last-named date, that is to say, in April, 1875, the respondents began to manufacture cigarettes in Richmond, similar to those of the complainant, and to put some classes of them up for market in packages

guish one man's productions from those of another may be used. The trade-mark brands the goods as genuine, just as the signature to a letter stamps it as authentic. The trade-mark may consist of a token, letter, sign or seal. Names, ciphers, monograms, pictures and figures may be used. Why not numerals united? What consistency is there in allowing it in a combination of letters, but denying it in a combination of figures?

"A careful examination of the authorities cited by the learned counsel for the defendants leads to the conclusion that where the courts have refused protection to alleged trade-marks composed of letters or numerals, it has been because, on the facts of each case, it was determined that the figures or letters were intended solely to indicate quality, etc., and not because figures and letters in arbitrary combination are incapable of being used as trade-marks. It is very clear that no manufacturer would have the right exclusively to appropriate the figures 1, 2, 3 and 4, or the letters A, B, C and D, to distinguish the first, second, third and fourth quality of his goods respectively. Why? Because the general signification and common use of these letters and figures are such that no man is permitted to assign a personal and private meaning to that which has by long usage and universal acceptance acquired a public and generic meaning. It is equally clear, however, that if for a long period of time he had used the same figures in combination, as '3214,' to distinguish his own goods from those of others, so that the public had come to know them by these numerals, he would be protected. The courts of last resort in Connecticut, in Massachusetts, and in New York, have distinctly held that doctrine. Boardman v. Meriden, 35 Conn., 402; Lawrence Co. v. Lowell Mills, 129 Mass., 325, and Gillott v. Esterbrook, 48 N. Y., 374,—the numerals sustained being respectively '2340,' '523' and '303.' The defendants concede this, but insist that the case of Manufacturing Co. v. Trainer, 101 U. S., 51 (§§ 464-67, *supra*), affirms a contrary doctrine, and that it should be controlling. Undoubtedly the decisions of the supreme court should be followed, but I do not understand the doctrine enunciated by the court in this case as conflicting with the general principle contended for by the complainant. The case appears to have been decided upon the theory that the letters 'A, C, A' were simply used to denote quality and not origin, and turned mainly upon the question of fact as to whether or not they were so used. Upon this question the court was divided. Mr. Justice Field, who delivered the prevailing opinion, says, at page 54: 'The object of the trade-mark is to indicate, either by its own meaning or by association, the origin or ownership of the article to which it is applied.' And at page 55: 'It is clear from the history of the adoption of the letters "A, C, A," as narrated by the complainant, and the device within which they are used, that they were only designed to represent the highest quality of ticking which is manufactured by the complainant, and not its origin;'—hence Mr. Justice Field's decision. Mr. Justice Clifford, in an able opinion, dissented, and directly antagonizing the foregoing interpretation of the evidence, says, at page 59: 'Attempt is made in argument to show that the symbol of the complainants was not adopted by them for any other purpose than to designate the grade or quality of the fabric which they manufacture and sell in the market; but it is a sufficient answer to that proposition to say that it is wholly unsupported by evidence, and is decisively overthrown by the proof introduced by the complainants;'—hence

and boxes similar to those used by the complainant, and to stamp some of the boxes and packages, amongst other devices, with this same numerical character $\frac{1}{2}$ in broad, scarlet, red color, with the dividing bar oblique and nearly upright, and of size identical with the same character as used by the complainant.

The latter complains that this is an infringement of his right to the exclusive use of this trade-mark, and files his bill praying for a perpetual injunction forbidding the use of it by the respondents. It would seem that the original idea of the complainant in using this character $\frac{1}{2}$ on certain of his wares was to indicate that the cigarettes stamped with it were made up of two kinds of tobacco, in the proportion of half-and-half. The numerical character does not *express* such an idea; it is not the term which a person accustomed to the use of accurate language would employ for the purpose of expressing it; but yet it must be admitted that it does in some sort *indicate* the idea, and is not an absolutely arbitrary symbol. It is only because of the fact that the character does *indicate* the idea of half-and-half, but does not *express* it, that any confusion attends this case. If the use by the complainant of the numerical character $\frac{1}{2}$ was absolutely arbitrary, there could be no question of his exclusive right to

Mr. Justice Clifford's dissent. Had the evidence been understood by the two justices alike, there is no reason to believe that there would have been any disagreement as to the law.

"Subsequent to the decision of the supreme court in the Trainer case, and with full knowledge thereof, the case of the Lawrence Co. v. Lowell Mills, *supra*, was decided by the supreme court of Massachusetts. There is a striking resemblance between that case and the case at bar. Rarely is there such a similarity between the facts of two cases wholly separate and distinct. The trade-mark in the Massachusetts case consisted of an eagle surmounting a wreath formed of the branches of the cotton plant. Inside the wreath, and printed in a circle, were the words 'Lawrence Manufacturing Company;' underneath it the word 'trade-mark;' and below all the figures '523.' As in the case at bar, the word 'trade-mark' does not appear to have had any connection with the numerals. It was attached to and connected with the vignette. The figures were below and separated from it. This device had been used to designate hosiery of a certain grade for many years, and was known and recognized as indicating that the goods so marked were of the plaintiff's manufacture. Other numerals, and in fact another device, had, prior thereto, been used to indicate the same grade of hosiery. The wreath and eagle, without the figures '523' or any figures, had also been used on other grades of goods. Defendants' device was an eagle surmounting a double circle or garter, on which were the printed words 'extra-finish iron frame,' and beneath were the figures '523' in the same relative position. The eagle and garter were used by defendant before the eagle and wreath were used by plaintiff, and plaintiff made no claim to them disconnected from the figures. The court, after referring to and considering the Trainer Case and other cases, proceeds to say:

" 'These considerations would be decisive, if the plaintiff here claimed the exclusive right to the numerals "523," when used only to indicate the quality, and not with reference to the origin, of the goods. But such is not the plaintiff's position. Its claim is that the purpose of using these figures in connection with the other parts of its trade-mark was to aid the buyer in distinguishing its goods from similar goods made and sold by others.'

"This is precisely the position of the complainant here, and could hardly have been stated more tersely. In that case the goods were known and described as '523's;' in this as '830's.' Again the court says:

" 'The defendant's imitation was produced by using the same figures, printed in the same style, and placed as to the other parts of the device in the same relative position as the plaintiff's. These numerals constituted one of the most prominent features in the plaintiff's design, and, when used in connection with the rest of the defendant's mark, were calculated to aid in deceiving the public. It is not necessary that the resemblance produced should be such as would mislead an expert, nor such as would not be easily detected if the original and the spurious were seen together. It is not enough that such similitude exists as would lead an ordinary purchaser to suppose that he was buying the genuine article and not an imitation.'

"I understand this case as holding distinctly that a party who has adopted an arbitrary combination of figures to designate his wares, and to distinguish them from the productions

use it stamped in any form upon his goods. But where, on the other hand, a character or word is the one in general use for describing the quality or kind of goods on which it is placed, the books are full of authorities showing that such character or word ordinarily used cannot be appropriated by any one manufacturer, and that the most he can acquire by long usage, or by statutory registration, is the right of using the character or word printed or painted in some special form not in ordinary use. The cases reported on this head are so numerous and emphatic that it is needless to cite them.

§ 468. *A part of a trade-mark not expressing but indicating the idea is not entitled to the protection of a general injunction.*

There are, therefore, but two questions arising in the present case as to this numerical character $\frac{1}{2}$.

1. The first is, its use by the complainant being in a critical sense merely arbitrary, as only *indicating* but not *expressing* the idea of half-and-half, but not absolutely arbitrary in a popular sense,—whether or not complainant has a right to an injunction prohibiting the use by others of the character *in any form* on wares similar to his own. On the general principle that exclusive

of others, is entitled to protection in the use of those figures. I am unable to see any difference in principle between it and the case at bar, and, as the latest adjudication directly upon this subject, I think it should be controlling.

“That the facts in the case at bar bring it directly within the doctrine declared in the Massachusetts case, I have no doubt. The complainant, through its officers, explicitly states that the figures were adopted to distinguish its wares from those of other manufacturers, and it is difficult to perceive why such a number, ‘830,’ was chosen, unless some such object was in view. If the design had simply been what the defendants insist it was, the figures, 1, 2, 3, etc., would have suggested a more convenient and less perplexing method than the one actually adopted.

“It was the intention of the complainant to have its goods known in the market by these numerals; they were in reality so known. Not only is the fact sworn to in the complaint, but it is admitted in the answer at folio 22; the allegation being in the following language: ‘And these defendants, further answering, severally say that they have been informed, and believe it to be true, and therefore admit, that such “Shawknit” seamless half-hose of a mottled-drab color have been more generally known, called and spoken of as “830’s” by dealers in hosiery than by any other name, and that, under that designation, such hose have some times been ordered, purchased and sold.’

“A very persuasive piece of evidence is found in an order produced by defendants, forwarded to them by their agent, in which these goods are described simply as ‘830, 2 doz.,’ and in a bill, also produced by defendants, the same goods are charged to one of their customers as ‘2 doz. hose, 830, 2.40, \$4.80.’ The right to use a trade-mark is one depending upon use, and it appears that complainant had used these numerals long enough to convey to any one versed in the nomenclature of the trade a precise understanding of what goods were intended when the numerals were used alone, disconnected from any extrinsic information.

“I must hold, then, that the complainant has a right to the exclusive use on its labels of the numerals ‘830,’ as applied to hosiery of a mottled-drab color. Regarding the word ‘Shawknit,’ printed in script letters, there is no denial of complainant’s exclusive right.

“I am therefore compelled to say, after carefully examining the evidence and the elaborate briefs submitted, that, in my judgment, there is such a simulation as will probably deceive the complainant’s customers. Great damage might result to the complainant by the continuance of defendants’ label. I fail to see, however, how the defendants can be materially injured by its disuse. They are not manufacturers of hosiery, but are simply selling the productions of others. What legitimate profits can they lose by selling the goods as they come from the manufactory with the original labels attached?

“I think an injunction should issue restraining the defendants from using the numerals ‘830’ to designate mottled-drab hose not made by complainant, and from using on their labels the word ‘seamless,’ printed in script, with the flourish underneath in imitation of the word ‘Shawknit,’ as used by complainant. Motion granted.” *Shaw Stocking Co. v. Mack*,* 12 Fed. R., 707.

privilege, in prejudice of general right, ought not to be upheld in cases of nicety and doubt, I think it most proper not to grant a general injunction.

§ 469. *A symbol with the adjuncts of form, size, color and style will be protected as a valid trade-mark.*

2. The next question is, whether the complainant has a right to the exclusive use of this trade-mark *in the form, size, color and style* in which he has used it upon his wares since 1873, and in which he registered it in 1875. Upon the authority of cases numerously reported, and upon principles well established, I decide that he has such a right, and will so decree, and will insert in the decree an imprint of the character $\frac{1}{2}$ in the form, size, color and style in which an exclusive use upon his cigarettes is affirmed to the complainant.

WILLIAM ROGERS MANUFACTURING COMPANY v. ROGERS & SPURR MANUFACTURING COMPANY.

(Circuit Court for Massachusetts: 11 Federal Reporter, 495-500. 1882.)

Opinion by LOWELL, J.

STATEMENT OF FACTS.—The plaintiffs allege that one William Rogers, of Hartford, had been a skilful manufacturer of silver-plated ware long before 1865, and had acquired a high and valuable reputation; and in that year a co-partnership was formed between one Birch and one Pierce, who agreed with William Rogers that the firm should be called the William Rogers Manufacturing Company, and agreed with him and his son William Rogers, Jr., that they might adopt and use as trade-marks, “[*representation of an anchor*] Wm. Rogers & Son,” and “1865, Wm. Rogers Mfg. Co.,” and that they were so used until 1872, when the present corporation was formed, and bought all the stock, good-will, etc., of the firm; that the two companies, successively, have used these trade-marks, from 1865 to the time of filing the bill, by stamping them upon their goods, and have taken great pains with the manufacture of the plated spoons, forks and knives which they have put upon the market, and thus their goods have become favorably and extensively known as the “Rogers” and “Rogers & Son” goods, and are inquired for by these names; that both these names are of great value and distinguishing appellations in the trade, and the spoons, forks and knives so stamped have acquired and possess a special value; that on or about January 1, 1880, Lorenzo Spurr and George W. Spurr, associated as George W. Spurr & Co., manufacturers of silverware, at Greenfield, knowing the premises, combined and confederated with David C. Rogers and George E. Rogers, a son of said David, to cheat and defraud the complainants by stamping their spoons, forks and knives with the names, “Rogers” and “Rogers & Son” and “Rogers & Son [*representation of an arrow*] Greenfield, Mass.,” and that in February, 1881, the said George W. Spurr, David C. Rogers and George E. Rogers, with others, formed the defendant corporation, with the intent to make, and that said corporation has made and sold, spoons, forks and knives stamped Rogers & Son, Greenfield, Mass. (with an arrow); that those stamps are not distinguished by ordinary purchasers, using ordinary care, from the stamps of the plaintiff company; that they make and sell inferior goods; that they adopted their pretended trade-marks in order to deceive purchasers.

The prayer of the bill is for an account; an injunction against the use of the trade-marks set out in the bill, or any other stamp having the word “Rogers”

or "Rogers & Son" as the whole or part thereof upon silver-plated forks, knives and spoons; and for general relief.

The answer denies all the allegations of the bill as to the plaintiffs' title, and charges that the complainants deceived the public by pictures, advertisements, etc., representing their wares to be the veritable manufacture of William Rogers and William Rogers, Jr.; admits the use of the trade-mark Rogers & Son (with an arrow), but denies that it can deceive the public.

The evidence on both sides proves that there were three brothers Rogers in Connecticut, who were honest and skilful silver-platers,—among the first, if not the first, in this country to adopt the electrotyping process; that they failed in business and afterwards severally gave the use of their name, for value, to two or three different companies in Connecticut, and assisted them in the manufacture for a longer or shorter time. These companies are now friendly, as I understand, and have long used trade-marks, three of which still survive, viz.: "Rogers Bros.," "Rogers & Bro.," and "Wm. Rogers & Son," with an anchor, which are used by these several manufacturers respectively; the last by the plaintiffs only. The title of the Meriden Company to use one of them was established in *Meriden Britannia Co. v. Parker*, 39 Conn., 450.

§ 470. *The right to use a trade-mark depends upon use.*

The firm called the William Rogers Manufacturing Company, predecessors of the plaintiff corporation of the same name, had an arrangement with William Rogers (one of the three brothers) and his son for the use of the name, and William Rogers was a silent partner and had charge of the plating. This connection, which was to have lasted for a long time, was terminated in two years, for reasons not necessary to be considered here. The father and son then advertised and wrote letters and circulars declaring themselves the sole owners to the trade-mark, "Wm. Rogers & Son," and were restrained by the court from continuing such publications and announcements; and the son having violated the injunction was punished. The whole record of this case is in evidence. A part of it is reported in *William Rogers Manuf'g Co. v. Rogers*, 38 Conn., 121. Since that time no one has disturbed the plaintiffs in the use of their trade-marks; and for this reason it is immaterial to enter into the merits of that controversy. The right to use a trade-mark is, above all other rights, one which depends upon use.

All those companies whose trade-marks were originally derived from the brothers Rogers have maintained a remarkably good standard of merit in their manufactures, so that all plated spoons, etc., marked "Rogers," or known as "Rogers" goods, command a superior price. The plaintiffs' goods are not known as "anchor," but as "Rogers" and "Rogers & Son" goods.

There is no doubt that George W. Spurr, a silver-plater of Greenfield, intended to obtain some of the value of the Rogers name, and that with this object he paid a royalty of five cents a dozen to D. C. Rogers & Son for the use of their trade-mark from August, 1880, to January, 1881; then he organized the defendant company, who agreed to pay D. C. Rogers and E. C. Rogers at the rate of four cents a dozen for twenty-five thousand dozen, for the use of the trade-mark, but would make no final agreement until this suit should be decided. The history of this trade-mark is that D. C. Rogers and George E. Rogers applied in February, 1879, to the patent office to register under the act of congress a trade-mark consisting of the words "Rogers & Son," with an arrow. In the sworn application or "statement and declaration" required by law, they represented themselves as doing business at Greenfield, Massachu-

setts, under the firm name of Rogers & Son, and declared that they intended to use the trade-mark upon table cutlery, knives, forks, etc. Mr. Grinnell, of Greenfield, whom D. C. Rogers consulted upon the subject, asked him the pertinent question whether he intended to use this trade-mark himself or merely to trade upon; and he answered that he intended to use it in the manufacture of goods himself; and the application to the patent office conforms to this answer. But what the father and son did was to trade upon it; they let it out to George W. Spurr & Co. for a royalty, and afterwards to the defendants for a royalty. This royalty is paid for a falsehood. The names of these Rogerses is not of the slightest value in the silver-plating business, which they never learned or practiced; nor were they ever partners, as I read the evidence, except in hiring out this trade-mark. It is impossible that this royalty can be paid for anything but the chance of purchasers supposing it to represent some other Rogerses. A court of equity cannot be expected to look with much favor upon a trade-mark thus acquired and thus used.

The name of the defendant company was undoubtedly adopted by its originator and chief stockholder, George W. Spurr, with the same purpose. His letters make this clear. If it had been his own business and reputation alone which he intended to preserve and foster, the name would have been Spurr without the ROGERS, or SPURR first and ROGERS afterwards. Speaking for myself only, I should be much inclined to say that the use of such a corporate name might well be enjoined at the suit of those who had given the Rogers name its value, as in *Holmes v. Holmes, Booth & Atwood Manuf'g Co.*, 37 Conn., 278, for reasons which I shall give presently; but Gray, C. J., in *Gilman v. Hunnewell*, 122 Mass., 139, 152, has thrown some doubt upon the decision in that case; and in *Massam v. Thorley*, L. R., 14 Ch. D., 748, 763, the lords justices, in a case very like the present, refused to enjoin the use of the name entirely, if it could be so used as not to injure the plaintiff.

The defendants insist that the plaintiffs have made false and fraudulent statements to the public, to the effect that they are still manufacturing under the direction and management of William Rogers and William Rogers, Jr. Both parties have fallen into the mistake of supposing that it was important to have a Rogers and his son to authorize them to use the trade-mark Rogers & Son. The law is not so. Any one might use that trade-mark for the first time that it was used, and if there was no Rogers in the same business no Rogers could complain. *Levy v. Walker*, L. R., 10 Ch. D., 436; *Massam v. Thurley Co.*, L. R., 14 Ch. D., 748. It was unnecessary for the plaintiffs to send round pictures of William Rogers and his son, as they have done. Such a method of advertising is more appropriate to the trade in patent medicines. But I do not quite see the injury to the public in this course of action. I think there is little doubt, upon the facts proved, that the reputation which the goods marked Rogers & Son, and Rogers & Bro., and Rogers Bros. have now acquired depends upon the conduct of those who now use those names, and not upon any supposition in the minds of the purchasers that the persons who originated the business still conduct it. Under these circumstances it does not seem to me that the plaintiffs have disentitled themselves to relief.

§ 471. *The right of a man to use his own name in business. Limitation on that right.*

A great deal was said in argument about the natural right of a man to use his own name in any business that he chooses to adopt. This, however, as I have said, is the case of a defendant corporation which has adopted a name

to suit its business; and of persons having the name, who have adopted a trade-mark to let out for hire to other people.

Even if we grant all that has been said about the freedom to use names (and I grant upon that subject much more than has been argued, for I set no limits to that freedom, excepting interference with acquired rights), the books are full of cases in which defendants have been restrained from using their own names in a way to appropriate the good-will of a business already established by others of that name. *Croft v. Day*, 7 Beav., 84; *Metzler v. Wood*, L. R., 8 Ch. D., 606; *Fallwood v. Fallwood*, L. R., 9 Ch. D., 176; *Levy v. Walker*, L. R., 10 Ch. D., 436; *Massam v. Thorley*, L. R., 14 Ch. D., 748; *McLean v. Fleming*, 96 U. S., 245 (§§ 431-40, *supra*); *Devlin v. Devlin*, 69 N. Y., 212; *Filkins v. Blackman*, 13 Blatch., 440 (§§ 552-55, *infra*); *Stonebraker v. Stonebraker*, 33 Md., 252; *Shaver v. Shaver*, 54 Iowa, 208 [S. C., 6 N. W. Rep., 188]; *Churton v. Douglas, Johns.* (Eng.), 174. See 25 Albany Law J., 203.

All these cases in equity depend upon an appropriation by one person of the reputation of another, sometimes actually fraudulent and sometimes only constructively so. "It should never be forgotten in these cases that the sole right to restrain anybody from using any name that he likes in the course of any business that he chooses to carry on is a right in the nature of a trade-mark,—that is to say, a man has a right to say, 'You must not use a name, whether fictitious or real; you must not use a description, whether true or not, which is intended to represent, or calculated to represent, to the world that your business is my business, and so, by fraudulent misstatement, deprive me of the profits of the business which would otherwise come to me.'" Per James, L. J., *Levy v. Walker*, L. R., 10 Ch. D., 447-8.

The reason why artificial trade-marks are absolutely protected, without inquiry into motives, etc., is that the defendant has no natural right to such a symbol, and has the whole world of nature from which to choose his own. The same principle, in my judgment, applies to corporate names; but here I am met by authorities hesitating to take this ground, as I have said. The defendants insist that there is no sufficient evidence that purchasers would be misled. The purpose being what it was, it would not need a great deal of evidence to prove it successfully accomplished. There is evidence that buyers at retail would be very likely to be deceived.

§ 472. *Who may enjoin the use of a name as a trade-mark.*

But the defendants say, again, "Rogers" has become a mere designation of a particular kind of ware, like Thompsonian medicines or Singer sewing machines. *Thompson v. Winchester*, 19 Pick., 214; *Singer Co. v. Larsen, Cox, Dig.*, No. 659. But the evidence does not support this defense. The Rogers name does not express a certain sort of goods, but serves as a warranty of good workmanship, because all those persons who have used it have followed faithfully the excellent example of the original Rogerses, who insisted on honest work. It is further argued that the Rogerses are so many that the court cannot find an intent to appropriate the reputation of one of them more than another; and that, if any suit will lie, it must be by all those who use any trade-mark whose distinctive feature is the name Rogers. I believe it to be true that the Greenfield Rogerses did not inquire, nor did the defendants care, whose reputation they were making available; but I am of opinion that any one of those who rightly uses the name may enjoin its interfering use by others.

Profits stand on a different footing. As at present advised, I should say that the profits made from the name Rogers belong to all those who rightly use it. It is possible, however, that the plaintiffs may be able to prove facts which will give them special profits. They are entitled to, at least, an injunction, costs, and nominal damages, and if they choose to take the burden of going to a master, I am bound to permit them. Interlocutory decree for the complainants.

ROBERTS *v.* SHELDON.

(Circuit Court for Illinois: 8 Bissell, 398-403. 1879.)

Opinion by BLODGETT, J.

STATEMENT OF FACTS.—This case comes up on application by the plaintiff for an injunction against the defendants, and on the demurrer of one of the defendants, George W. Sheldon, to the bill. The bill states in substance that the complainant is a manufacturer of needles in England, and a subject of that country, but that he is domiciled in this country, and finds here a large market for his manufactured goods; that as early as 1866 he adopted as a trade-mark the word “Parabola,” which was printed on the outside of the packages containing his needles; that his goods have acquired a wide celebrity under the name, and an extensive sale; that he has expended large sums of money in advertising and introducing his goods, and that he is entitled, by virtue of having been the first to adopt this word as a trade-mark for needles, to the exclusive use of it. He also alleges that the firm of William Clark & Sons, who are also manufacturers of needles in England, and are competitors of his in the American market, have put upon the market packages of needles in imitation of the packages of complainant’s needles, and have used and are using the said word “Parabola” to designate their needles, and are now introducing their packages, marked with complainant’s trade-mark, upon the markets of this country, and especially of the city of Chicago, whereby they are impairing the trade of the complainant, and prays for an injunction.

The defendant makes two points in the demurrer to this bill. The first is, that the word “Parabola” is a description of the peculiar quality possessed by these needles, namely: that the eye of the needle is constructed in the form of two parabolic curves brought together at their open ends; and invokes, upon this statement of fact, the well known rule in the law of trade-marks, that a person will not be allowed to use or adopt as a trade-mark any word which expresses the quality of the goods; such, for instance, as “best,” “extra” or “superfine,” or any of these adjectives. There are a large number of cases sustaining this position, and the rule, as a principle of the law of trade-marks, is undoubtedly well established.

The second objection taken to the bill by the demurrer is, that the packages put up by Clark & Sons and sold by the defendant, Sheldon, here as their agent, while they use the word “Parabola,” at the same time are not calculated to deceive the public, because they say that the needles are manufactured by William Clark & Sons, and that the public are all notified that the needles made by the defendants, Clark & Sons, and sold by Sheldon, are “William Clark & Sons’ Parabola Needles,” and not the “Roberts’ Parabola Needles;” and upon this ground it is claimed there is no danger of the public being imposed upon or deceived by reason of the defendants’ use of the word.

§ 473. *A word descriptive of the article is not a valid trade-mark; one that is not descriptive may be.*

In answer to the first point, namely, that the eye of this needle has a parabolic form, it perhaps would be enough to say that there is nothing upon the package tending to show that the word "Parabola" has any reference to the eye of the needle. It might as well be said, if the needle was a little curved, that it was a section of a parabolic curve. But I think it is answer enough to this position to say that there is nothing on the envelope or label of the package which says or tends to show that the eye of the needle is claimed to be made in the shape of a double parabola, or two parabolic curves, and when inspected under the glass it would seem to me, as a question of fact, that the eye of this needle is elliptical rather than parabolic in shape. The word "Parabola," it seems to me, is, as stated by the complainant, an arbitrary term adopted by complainant to distinguish his needles from those of other manufacturers, and he had a right to so select and apply it.

It is frequently the case that by close analysis and ingenuity, you can find in almost any trade-mark a designation of some quality connected with the goods. An analogous case to this was before this court, and heard before the learned circuit judge and myself four or five years since, in regard to what is known as the "Cream Baking Powder." The firm of Steele & Price filed a bill against one Richards and his associates, stating that Steele & Price had adopted a trade-mark to designate a certain baking powder which they manufactured, called "Cream Baking Powder." The defendant had also commenced manufacturing baking powders and was putting upon the market a commodity under the name of "Star Cream Baking Powder," and the question was there made that the word "Cream" had reference to the quality of the baking powder; that is, that it was the best in the market—the *cream* of baking powders. The position was argued very strenuously by the defendant's counsel that it was a term of quality, not an arbitrary term; but in that case, which was decided by Judge Drummond, the court held that the defendants had no right to use the word "Cream," and that any prefix or suffix they used with it would not give them the right to use it in connection with the manufacture of goods similar to those made by the complainants; that the complainants had the exclusive right to use that term to designate goods of their manufacture.

It seems to me the case was, in all respects, analogous to this. I do not recollect that the case has ever been reported. An oral opinion was delivered by Judge Drummond immediately on the close of the argument, and I presume it never got into the reports.

In regard to the last point made, that by reason of the defendants using their own name upon the wrapper or envelope, the public are not deceived, it would perhaps be enough to say that, when goods acquire a specific name, the purchaser rarely looks to see who has manufactured the goods by that name. As, for instance, if, as a matter of fact, these needles have acquired, among the trade, and among consumers or users, the designation of "Parabola," to such an extent that the purchaser would simply ask for "Parabola needles," he might be supplied with the parabola needles manufactured by Clark & Sons, instead of those manufactured by the complainant, to the direct injury of the complainant and the abridging of his trade.

Another case very analogous to this, upon this point, was also before this court. A suit was brought by Proctor & Gamble against McBride & Co., of

this city, to enjoin the use of a trade-mark, which had been adopted by Proctor & Gamble, for a certain brand of soap which they manufactured. Proctor & Gamble claimed that they had introduced to the public, under a trade-mark of their own, a brand of soap under the term and designation of "Mottled German Soap," and they had adopted as a trade-mark upon their packages, those words with a circle, with a moon and stars in the middle. The defendants, McBride & Co., who were manufacturers in this city, had put upon the market a brand of soap which they termed "S. W. McBride's German Mottled Soap," and they had marked these words upon the outside of their packages in combination with a crescent within which was a single star instead of a number of stars. That, I think, was the distinction, so that it presented a stronger case for the defendants than this, because we find upon inspection that the defendants' and complainant's labels are almost identical to the eye; that is, the reading upon them is essentially the same. In one case it is "Roberts' Parabola gold burnished sharps." Upon the other label or package, upon the same colored paper, and with the same colored ink, is printed, "William Clark & Sons' Parabola gold burnished sharps," so that there is a similar use of terms or letters, and the same use of the word "Parabola," and the only distinction is that between "Roberts" and "William Clark & Sons." Now, in the case I mentioned, the defendants had departed much more widely from the complainant's trade-mark. They had changed the arrangement of the words so, instead of its being "Mottled German Soap," it was "German Mottled Soap," and instead of a circle containing several stars, it was a crescent containing a single star, prefixed by the name of each maker; and it was argued in that case, there could be no possibility of intelligent consumers being deceived. So strong was the case made before me on an application for an injunction, that I refused the injunction; but after the proofs were taken, and the case brought to hearing before Judge Drummond, he sustained the infringement, and ordered a perpetual injunction against the defendants. It was also shown in that case that "Mottled German Soap," or "Mottled Soap," had been in common use in the trade for nearly fifty years, and that "Mottled Soap" was a commodity well known to the trade; but Judge Drummond sustained that trade-mark as the exclusive property of the complainant, and held that the defendants infringed.

In the light of that case, which has never been questioned, it seems to me that the mere fact that the defendants in this case have used the words "William Clark & Sons," so as to designate them as the manufacturers, does not defeat the complainant's right to the exclusive use of this word "Parabola," as designating his manufacture, and that there is a liability to impose upon the trade and on the public, from which the complainant has the right to be protected.

With these views, I shall order an injunction on the complainant's filing a bond in the penal sum of \$5,000, conditioned for the payment of any damages which the defendant may sustain by reason of the issuing of the injunction, and also require complainant, as a condition of the granting of the injunction, to put in his proof within thirty days after the answer in this case is filed.

WILLIAMS v. ADAMS.

(Circuit Court for Illinois: 8 Bissell, 452-456. 1879.)

STATEMENT OF FACTS.— Bill to restrain the use of the word “Yankee” as a trade-mark, complainants claiming that they adopted that word as a trade-mark for shaving soap in 1846.

Opinion by BLODGETT, J.

I am satisfied that the complainants’ case is fairly made out. The proof shows that they did enter upon the manufacture of this class of soap, as the bill alleges, and adopted this word “Yankee” as the mark or designation of their goods, and have used it from the time of its adoption to the present.

The defendants, on the contrary, claim that the complainants have abandoned the use of this word as their trade-mark; that they have allowed other manufacturers to infringe upon it by putting their soaps upon the market under the designation of “Yankee,” as, for instance, “Yankee Jim,” “Yankee Sam,” and under other labels in which the word “Yankee” is the controlling or leading term, whereby complainants’ exclusive claim of right to the use of the word “Yankee” has been infringed; and that complainants have so acquiesced in these infringements as to have abandoned their exclusive right to the use of the word “Yankee.”

§ 474. *Abandonment of a trade-mark is not established by showing numerous infringements in which the owners of the trade-mark have not acquiesced.*

I do not find this position sustained by the testimony. The complainants seem to have been diligent in prosecuting all persons who infringed upon their rights within a reasonable time after they became aware of such infringement. It is true that the proof shows that quite a large number of manufacturers are putting shaving soaps upon the market under the term or description of “Yankee,” such as “Yankee Sam Soap,” “Yankee Jim Soap,” and the “Yankee Soap,” which last is precisely like the complainants’, and there are various other imitations of the complainants’ goods, shown in the proofs. But I do not understand the rule to be, that if a party infringes upon another’s trade-mark there is any fixed time in which he must bring suit in order to save his rights. Certainly, there is no such neglect on the part of the complainants proved here, as would show an intention to abandon their trade-mark.

The other point, that the word “Yankee” cannot be adopted by any person as a trade-mark, is presented with a good deal of vigor and ingenuity by defendants’ counsel, and with a show of authority. A Mr. Browne has written a book on trade-marks, which to some extent, I think, is accepted by the profession as an authority, in which he sums up his own conclusion as to the principle decided in a certain trade-mark case, and says: “It clearly appears from the foregoing case, that words designating localities, places or persons, such as London Dock Gin, Yankee Soap, etc., cannot be adopted or used as a trade-mark.” Browne on Trade-marks, secs. 119-125, 597.

It is sufficient to say in reference to this paragraph that Mr. Browne is not a court; that he was simply enforcing his own individual views or conclusions from certain adjudged cases. Now, it seems to me by all the analogies, that a manufacturer, especially a manufacturer thirty years ago, would have had the right to adopt the term “Yankee” as applicable to some specific kind of goods, and make it a valid trade-mark.

§ 475. *The word "Yankee" is a valid trade-mark.*

We must remember that the term was not as generally applied then as it is now. At that time, certainly, the term "Yankee" was applied to the inhabitants of but a small portion of the United States—to a small portion of the New England states. For instance, in western Massachusetts they would speak of the inhabitants of the eastern part of that state, and along the coast from Boston to Portland, Maine, as "Yankees." The eastern shore people were called "Yankees" in New England. In the southern, and perhaps some of the western, states, all people in the New England states were spoken of as "Yankees," and, since our unfortunate national rebellion, it has been quite common at the south to speak of all persons who remained loyal to the federal government as "Yankees." The term has been enlarged by use, undoubtedly, very much within the last fifteen or twenty years. In 1846, the time the complainants entered upon this manufacture, the term "Yankee" was restricted, and applied solely as a nickname or epithet to the inhabitants of some parts of the New England states, but it was not a term describing a specific locality or place or person. It is not a geographical term, nor a proper name, but a designation applied by the dwellers in one locality to the dwellers in another place. It was not the name of any *certain* locality, and it seems to me complainants had the right to adopt it as their trade-mark. If it has, since that time, by a more general use and definite application, come to designate any certain locality—which is not conceded,—such subsequent events cannot defeat complainants' right. The complainants have made such a case as entitles them to an injunction perpetually restraining defendants from using the word "Yankee" in any label or mark upon their soaps, and the case will be referred to the master to take proof as to the damages which the complainants have sustained.

§ 476. *In general.*—Anything which can serve to distinguish one person's productions from those of another, as tokens, letters, figures, signs, seals, names, ciphers, monograms or pictures, may be used for a trade-mark. *Shaw Stocking Co. v. Mack*,* 12 Fed. R., 707; 28 Int. Rev. Rec., 320; 21 Blatch., 1.

§ 477. *Mark used to deceive the public.*—A court of equity will extend no aid to sustain a claim to a trade-mark of an article which is put forth with a misrepresentation to the public as to the manufacturer of the article and as to the place where it is manufactured, both of which particulars were originally circumstances to guide the purchaser of the article. So, where a manufacturer of medicine falsely states in circulars accompanying each bottle that it is manufactured by the original manufacturer at the original place of manufacture in another state, he will not be protected in the exclusive use of certain words as a trade-mark for such medicine. *Manhattan Medicine Co. v. Woods*,* 108 U. S., 218; 23 O. G., 1925.

§ 478. Equity will not lend its aid to protect a person in the use of a trade-mark which, if it has become valuable, has become so by means of the false and deceptive language used in circulars advertising the article. *Seabury v. Grosvenor*,* 14 Blatch., 262; 14 O. G., 679.

§ 479. A trade-mark calculated to convey the impression that the article to which it is applied is protected by a patent, when it is not, is calculated to deceive the public and is invalid. Mason was the patentee of an improvement in fruit jars, but his patent was declared invalid. *Held*, that the use by him of the words "Mason's patent, November 30th, 1858," or "Mason's Improved," or "The Mason Jar of 1858," as a trade-mark was calculated to deceive the public, and that such use would not be protected. *The Consolidated Fruit Jar Co. v. Dorflinger*,* 2 Cent. L. J., 721; 2 Am. L. T. Rep. (N. S.), 511.

§ 480. Equity will not protect as a trade-mark the use of a name or term which is likely to deceive the public in reference to the components or nature of the article to which it is applied. Thus the words *straight cut*, when used merely as an arbitrary trade-mark, and not truly descriptive of the tobacco to which they are applied, will not be protected. *Ginter v. Kinney Tobacco Co.*,* 12 Fed. R., 782; 22 O. G., 770; 14 Rep., 138.

§ 481. *Words and figures.*—A dealer in homeopathic medicines put up a series of homeopathic remedies named by him "Homeopathic specifics," and numbered serially from 1 to 35,

each number being adapted for certain specified diseases. *Held*, that while the words "Homeopathic specifics" could not, when standing alone, constitute a trade-mark, yet that the medicines having become known by number, the use of such numbers in connection with the words constitutes a trade-mark, and the use of the same numbers when applied by another manufacturer to remedies for the same diseases would be enjoined. *Humphreys' Specific Homeopathic Medicine Co. v. Wenz*,* 14 Fed. R., 250; 15 Rep., 70.

§ 482. A person who has adopted an arbitrary combination of figures to designate his wares, and to distinguish them from the productions of others, is entitled to protection in the use of those figures as a trade-mark, when such figures have been so long in use as to convey to any one versed in the nomenclature of the trade a precise understanding of what goods are intended when the numerals are used alone, disconnected from any extrinsic information. *Shaw Stocking Co. v. Mack*,* 12 Fed. R., 707; 28 Int. Rev. Rec., 320; 21 Blatch., 1.

§ 483. Words.—The word "Centennial" is common property, and cannot be claimed for use as an exclusive trade-mark as applied to specific objects. *Hartwell v. Viney*,* 2 Weekly Notes, 602.

§ 484. A word may be used as a trade-mark, and such use protected, notwithstanding the fact that prior to the time of its adoption it was used in a distant place upon the same article, where such use was casual, fortuitous and only continued for a short time. *Holt v. Menendez*,* 23 Fed. R., 869.

§ 485. A purely arbitrary or fanciful appellation for the first time used to distinguish an article to which it has no natural or necessary relation, by virtue of such appropriation and subsequent use becomes a trade-mark. So the word "Eureka," applied to a fertilizer, becomes by use a trade-mark, and its application to another similar fertilizer is an infringement. It is not necessary that the entire trade-mark be copied, or that the verbal or physical resemblance of the marks should be complete. It is sufficient that the essential word is taken. *Alleghany Fertilizer Co. v. Woodside*,* 1 Hughes, 115.

§ 486. Geographical name.—The plaintiff, a manufacturer of beer in St. Louis, had acquired an export trade to Panama and South America, for his beer put up in bottles and labeled "St. Louis Lager Beer." The defendant, who was a shipper of beer from New York, also labeled his bottles prepared for the same trade with the same words. *Held*, that although the plaintiff could not have an exclusive property in the words "St. Louis," or an exclusive right to designate his beer "St. Louis Lager Beer," yet as he was the only exporter from St. Louis, and his beer had acquired a reputation in the places to which it was sent, and as his use of the words was legitimate, the use of the words by the defendant, being illegitimate and calculated to deceive the public, would be enjoined, as would any attempt by the defendant to divert the plaintiff's trade by simulating his labels, or in any manner of attempting to dispose of his beer as that of the plaintiff. *Anheuser-Busch Brewing Ass'n v. Piza*,* 24 Fed. R., 149.

§ 487. Though the complainants had used for many years the name "Lackawanna Coal" for coal mined by them, the use of that word by a dealer who for many years, with the knowledge and acquiescence of the complainants, had been so designating coal mined by other parties in the same valley, will not be enjoined, for such knowledge and acquiescence amount to a license. *Delaware & Hudson Canal Co. v. Clark*,* 7 Blatch., 112. Affirmed, *Canal Co. v. Clark*, 13 Wall., 311 (§§ 453-56).

§ 488. Application to a different article.—The registration of a trade-mark for "paints" by a plaintiff who has previously acquired exclusive use of such mark for particular kinds of paint only, does not give him the exclusive right to apply such trade-mark to paints of another kind as against a person who, prior to such registration, used that mark upon such other kinds. *Smith v. Reynolds*,* 13 Blatch., 458.

§ 489. A representation of a crown applied to vessels containing paint, and printed on the labels or wrappers of such vessels, and on other printed matter relating thereto, may be a valid trade-mark. *Smith v. Reynolds*,* 10 Blatch., 100.

§ 490. A label of a single color, apart from any name, figure or device with which it may be connected, cannot be the subject of a trade-mark, so that a person adopting the same color for his label may be charged with infringement. *Fleischmann v. Starkey*,* 25 Fed. R., 127.

§ 491. A tin pail used to contain paper collars cannot be claimed as a trade-mark. *Harrington v. Libby*,* 14 Blatch., 128.

§ 492. Dealers in flour who are not manufacturers, and who had adopted a trade-mark for flour selected and classified by them, where such selection and classification required skill, judgment and expert knowledge, and added value and reputation to the flour so selected, will be protected in the use of such trade-mark. *Holt v. Menendez*,* 23 Fed. R., 869.

§ 493. A corporation may acquire a property right to use another name as a trade-mark, or as incidental to the good-will of the business, as well as an individual, and if such a right has been acquired its enjoyment will be protected. The corporation cannot be deprived of

the right by the subsequent assumption of the name by another corporation, whether assumed by the incorporators or by the legislature incorporating it. *Goodyear Rubber Co. v. Goodyear's India Rubber Glove Mfg. Co.*,* 22 Blatch., 421; 21 Fed. R., 276.

§ 494. The corporate name of a corporation is a trade-mark, and a court of equity will enjoin the use of the same name by another corporation. The intention with which such name is adopted is immaterial. Neither is it material to the jurisdiction of a court of equity that the defendant corporation is insolvent. Nor is it an objection to maintaining the suit that the right of the corporation to use the name has not been first determined at law. Such suit may be brought by a bondholder of the corporation whose name has been unlawfully appropriated, and who is likely to be affected by such unlawful appropriation, and the corporation may be made a defendant. *Newby v. Oregon Central R. Co.*, 1 Dedy, 609.

§ 495. A court of equity will not enjoin the creation of a corporation with the same name as that of a corporation existing in another state, though it is obvious that there is an intention to secure by the use of such name a part of the patronage of the foreign corporation. *Lehigh Valley Coal Co. v. Hamblen*,* 23 Fed. R., 225.

§ 496. Name used to designate business.—The Goodyear Rubber Co., a corporation, had used the name "Goodyear's Rubber Mfg. Co.," to designate their business, and afterwards another corporation, Goodyear's India Rubber Glove Manufacturing Co., used the same name. *Held*, that as that name had been first used by the former company, its use by the latter would be enjoined, notwithstanding the fact that for some years a few correspondents had, contrary to the efforts of the officers to correct the error, addressed it as Goodyear's Rubber Mfg. Co. *Goodyear Rubber Co. v. Goodyear's India Rubber Glove Mfg. Co.*,* 22 Blatch., 421; 21 Fed. R., 276.

§ 497. C., a manufacturer of machinery, and among other things of a taper-sleeve pulley, at Erie, Penn., displayed on his factory the sign, "Taper-sleeve Pulley Works." His shop and machinery being sold on execution, W. became the purchaser and afterwards became the assignee of the patent for the taper-sleeve pulley owned by C. W. sold the factory to G., together with the exclusive right under the patent for the states east of the Mississippi, with an agreement that each could sell in the territory of the other on payment of certain royalties. G. and his associates, calling their establishment the Taper-sleeve Pulley Works, built up a large business, manufacturing various mechanical devices, and stamped all their goods "Taper-sleeve Pulley Works." The assigns of W. commenced the business of the manufacture of substantially the same goods as the Erie company, including the taper-sleeve pulley, at Dubuque, Iowa, under the name of F. & Co., and did business for some time as such manufacturers under that name, but afterwards adopted as their corporate name "Taper-sleeve Pulley Works," and proceeded to issue catalogues, price-lists and labels almost exactly like those of the Erie manufacturers, and stamped the goods of their manufacture "Taper-sleeve Pulley Works of Dubuque, Iowa." *Held*, that the Dubuque corporation would be enjoined from using the trade name of the Erie manufacturers. *Gray v. Taper-sleeve Pulley Works*,* 16 Fed. R., 436.

§ 498. A name for a publication may become a trade-mark though previously used by others, if the application was to publications essentially different. *Estes v. Wilson*,* 22 Blatch., 364; 21 Fed. R., 189.

§ 499. J., in England, produced a series of books called Chatterbox, and assigned to W. the right to use that name in this country. Afterwards E. commenced to produce books so near like J.'s that purchasers were likely to be deceived into thinking that they were getting J.'s books instead of E.'s. *Held*, that the use of that name would be protected as a trade-mark in this country at the suit of W. *Ibid*.

§ 500. Name descriptive of article.—Where it appears very doubtful whether a name claimed as a trade-mark does not describe the articles themselves and indicate that they are manufactured under certain patents instead of by a particular person, and it appears also that the label describes the reputation rather than the origin of the articles, a preliminary injunction will not be granted. *Leclancha Battery Co. v. Western Electric Co.*,* 21 Fed. R., 538.

§ 501. Although the name applied by a manufacturer to an article produced by him does not afford him protection as a trade-mark, yet an imitation of the label adopted by him will be enjoined. *Leclanche Battery Co. v. Western Electric Co.*, 23 Fed. R., 276.

§ 502. Where an article is made that was theretofore unknown, it must be christened by a name by which it can be recognized and dealt in, and the name thus given to it becomes public property, and all who deal in the article have the right to designate it by the name by which alone it is recognizable; and no person, neither the inventor nor his assignee, can have a trade-mark in such designation. *Ibid*.

§ 503. A name alone is not a trade-mark when it is applied to designate, not the article of a particular maker or seller, but the kind or description of thing sold. So the word "Pile-Leclanche," the French name of the battery invented by Leclanche, is not a trade-mark when

applied to such batteries, nor is the word "Disque" when applied thereto to designate a particular style thereof. *Ibid.*

§ 504. The natural or proper designation of an article can never become a trade-mark, because any one making the article has a right to call it by its proper name. *Alleghany Fertilizer Co. v. Woodside*,* 1 Hughes, 115.

§ 505. There can be no trade-mark in a word which is descriptive of the nature and qualities of the article to which it is affixed. *Carbolic Soap Co. v. Thompson*,* 25 Fed. R., 625.

§ 506. The words "anti-washboard," as applied to soap, are suggestive rather than descriptive, and may be claimed as a trade-mark. *O'Rourke v. Central City Soap Co.*,* 26 Fed. R., 576.

§ 507. A generic term, or a name merely descriptive of the ingredients, quality or characteristics of an article of trade, cannot be the subject of a trade-mark; *e. g.*, the words *straight cut*, as descriptive of tobacco. *Ginter v. Kinney Tobacco Co.*,* 12 Fed. R., 782; 22 O. G., 770; 14 Rep., 138.

§ 508. Where a device, in part arbitrary and having no necessary connection with the article to which it is affixed, has been applied to such article for some time, so that the article has become known to the trade by that designation, the unauthorized use of such label, or of an imitation thereof calculated to deceive, will be enjoined. *Morrison v. Case*,* 9 Blatch., 548; 2 O. G., 544.

§ 509. So the use of the words "The Star Shirt," or "The * Shirt," the device having been stamped by plaintiff upon shirts manufactured by him for a number of years, and was also registered under the act of congress, was protected by injunction. *Ibid.*

§ 510. It is only the actual use of a mark, device or symbol which entitles the person using it to its protection as a trade-mark. The mere fact that his goods have acquired a particular name by the public does not entitle him to claim the exclusive use of that name as a trade-mark. *Blackwell v. Armistead*,* 3 Hughes, 163.

§ 511. The term "Worcestershire" is a name which has long been applied to a certain kind of sauce; from its long application it has become a generic term for that kind of sauce, and the fact that a party manufactures the same kind of sauce at Worcestershire, England, does not give him the sole right to the use of the name as a trade-mark. *Lea v. Deakin*,* 18 Am. L. Reg. (N. S.), 322; 7 Rep., 261; 11 Biss., 23.

§ 512. And where it appeared that plaintiff had been for many years cognizant of the fact that sauce was manufactured to which the name was applied, and took no steps to prevent its manufacture, he was held to have acquiesced in a certain sense. *Ibid.*

§ 513. And where the suit is against an agent, to enjoin him, and for an account of profits, a decree, unappealed from, in favor of his principal in England, rendered by the master of the rolls, upon the same subject-matter, is a bar. *Ibid.*

§ 514. No pseudonym can give an author any rights which he would not have under his own name. Such pseudonym cannot be applied as a trade-mark to the use of which the author can claim the exclusive right. So a publisher who has collected uncopyrighted published writings of an author may publish them as the work of the author, and may apply the author's pseudonym thereto in the same manner that he might apply the author's name. *Clemens v. Belford*,* 11 Biss., 459; 14 Fed. R., 728; 27 Alb. L. J., 293; 29 Int. Rev. Rec., 53; 15 Rep., 227.

§ 515. Expiration of patent.—After the expiration of a patent a manufacturer of the article may use the name of the article and indicate that it is manufactured according to the patents, and may use labels to that effect, provided he does not represent that it is manufactured by the original manufacturers. *Tucker Mfg. Co. v. Boyington*,* 9 O. G., 455.

§ 516. After the expiration of a patent the former proprietors of the patent are not entitled to use the word applied to the patented article as a trade-mark. So, after the expiration of the Singer sewing machine patents, the former owners of the patent were not entitled to the exclusive use of the word "Singer," as applied to sewing machines of that construction. *Singer Manuf'g Co. v. Riley*,* 11 Fed. R., 706.

§ 517. Where the exclusive right to use a device as a frame for a sewing machine, in the shape of a letter G, has rested upon a patent, the exclusive use of such device as a trade-mark cannot be sustained after the expiration of the patent. *Wilcox & Gibbs Sewing Machine Co. v. Frame*,* 21 Blatch., 431; 17 Fed. R., 623; 24 O. G., 1272.

§ 518. A manufacturer of tobacco who originally employed and obtained a patent for a colored disk of tin upon plug tobacco, showing the brand and the name of the manufacturer, may, after such patent is declared void on surrender and reissue, still use such disks as a trade-mark, and no person, whether intentionally or otherwise, will be allowed to use disks of tin of such appearance that they might readily be mistaken by the public for those of the original manufacturer. *Lorillard v. Wight*,* 15 Fed. R., 383.

§ 519. When a patented article is known in the market by any specific designation, whether

of the name of the patentee or otherwise, every person, at the expiration of the patent, has the right to manufacture and vend the same under the designation thereof by which it was known to the public. *Singer Manufacturing Co. v. Stanage*,* 2 McC., 512; 6 Fed. R., 279; 11 Rep., 611.

§ 520. After the expiration of the Singer sewing machine patent the original company continued to manufacture the machine, and imprinted on the shield and arm of the machine the words "The Singer Manufacturing Company." The defendant manufactured the same machine, placing on its arm and shield the words "The Henry Stewart's Manufacturing Co.," with another device, and advertised his machine as the "Stewart," or "Stewart-Singer." *Held*, that the word "Singer" attached to the machines was common property, and that as the devices on each machine were so distinct that the manufacture of one company would not be mistaken for that of the other, the plaintiff had no right to have the manufacture and sale of the defendant's machines enjoined. *Ibid*.

III. ADOPTION AND REGISTRATION.

SUMMARY — *Proof of filing declaration*, § 521.

§ 521. Under the laws of congress relating to trade-marks, the certificate of the commissioner of patents of the deposit for registration and the filing of the statement, of which a copy is annexed, is not conclusive evidence in the absence thereof in the certificate that such a declaration was filed as was required by law, even though the certificate states that the holder has complied with the law, and that the trade-mark will remain in force for thirty years from a given date. *Smith v. Reynolds*, § 522.

[NOTES. — See §§ 523-527.]

SMITH v. REYNOLDS.

(Circuit Court for New York: 10 Blatchford, 85-88. 1872.)

Opinion by BLATCHFORD, J.

STATEMENT OF FACTS.—This bill is founded on a statutory right to a trade-mark, claimed under the provisions of sections 77 to 84 of the act of July 8, 1870 (16 U. S. Stat. at Large, 210 to 212). Section 77 provides that any firm domiciled in the United States, "and who are entitled to the exclusive use of any lawful trade-mark, or who intend to adopt and use any trade-mark for exclusive use within the United States, may obtain protection for such lawful trade-mark by complying with the following requirements." One of those requirements is, "the filing," in the patent office, "of a declaration, under the oath of . . . some member of the firm, to the effect that the party claiming protection for the trade-mark has a right to the use of the same, and that no other person, firm or corporation has the right to such use, either in the identical form, or having such near resemblance thereto as might be calculated to deceive, and that the description and *fac-similes* presented for record are true copies of the trade-mark sought to be protected." On complying with these requirements the trade-mark is to remain in force for thirty years from the date of the registration. The bill avers the filing of such declaration. The defendants, in their answer, put in issue this allegation, among others, and require proof of the same. No proof is given that such declaration was filed: A certificate is produced, signed by the commissioner of patents and under the seal of the patent office, setting forth that "J. Lee Smith & Co.," of New York (which is a firm composed of the plaintiffs), did, on the 30th of December, 1870, deposit in the patent office for registration, "a certain trade-mark for paints, of which a copy is hereto annexed; that they filed therewith the annexed statement, and, having paid into the treasury of the United States the sum of \$25, and otherwise complied with the act of congress in such case made and provided, the said trade-mark has been duly registered

and recorded in the said patent office, and will remain in force for thirty years from the 21st day of February, 1871." The statement annexed to the certificate does not contain any such declaration as that referred to. The declaration is required to be "filed." The only thing certified to have been "filed" is the "annexed statement."

§ 522. *The certificate of the commissioner of patents that an applicant for a trade-mark has filed "the annexed statement" and otherwise complied with the law is not evidence that he has filed a declaration under oath as to the right to the trade-mark, as required by the act of July 8, 1870, section 77.*

It is urged that the certificate that the parties have "otherwise complied with the act of congress in such case made and provided," and that the trade-mark "will remain in force for thirty years" from the day named, covers the point; and that, in analogy to letters patent for an invention, the certificate is evidence of a compliance with the requisite preliminary steps. But I do not think this position is a sound one. A patent, being authorized to be granted on evidence on which the commissioner of patents is to decide, the fact that he grants the patent is held to be *prima facie* evidence that the proper proofs were laid before him and were satisfactory, he being made, by the statute, the proper judge of the sufficiency and competency of the proofs. *Phil. & Trenton R. R. Co. v. Stimpson*, 14 Pet., 448, 458; *Seymour v. Osborne*, 11 Wall., 516, 540. But in respect to a trade-mark, the statute does not authorize the commissioner of patents to issue any letters patent therefor, or to issue any certificate containing a grant thereof. The only certificate he is authorized to issue in reference to the original registration of a trade-mark is that provided for by section 80, which enacts as follows: "The time of the receipt of any trade-mark at the patent office for registration shall be noted and recorded, and copies of the trade-mark, and of the date of the receipt thereof, and of the statement filed therewith, under the seal of the patent office, certified by the commissioner, shall be evidence in any suit in which such trade-mark shall be brought in controversy." A certified copy of the trade-mark, of the date of its receipt, and of the statement filed therewith (that is, a copy of everything filed and recorded, and of the memorandum of the date of the receipt thereof), is made evidence. But such copy is evidence only that what is shown by it to have been filed was filed. It is not evidence that anything required by the statute to be filed, and not shown by the certificate, or by the statement annexed to it, to have been filed, was filed. The certificate of the commissioner, that the parties "otherwise complied" with the act, cannot be substituted for the judgment which a court must pass as to whether there was a declaration filed, and one under oath, and complying, as to its contents, with the statute. The court is to judge, from the "statement," whether the requirement of recording "the class of merchandise and the particular description of goods comprised in such class, by which the trade-mark has been or is intended to be appropriated," was complied with, and whether the requirement of recording a description of the mode in which the trade-mark "has been or is intended to be applied and used," was complied with. So, it is equally for the court to judge whether the requirement as to the filing of the proper declaration was complied with. The general certificate of the commissioner cannot be taken as evidence on the subject.

The certificate that the trade-mark has been duly registered and recorded in the patent office, and will remain in force for thirty years from the day specified, adds no force to the effect of the certificate. The statute says that

the thirty years shall run from the date of the registration, that the time of the receipt for registration shall be recorded, and that the certificate shall cover a copy of the date of the receipt. The date given in the certificate, as the date from which the thirty years is to run, is to be regarded as intended for the date of registration; and the date previously named in the certificate is the date of the receipt for registration. In this view, the certificate intends to show when the trade-mark will expire; and the certificate that it has been registered and recorded, and will remain in force for thirty years from the day named, is only equivalent to saying that such day is to be taken as the date of the registration. The date given in the certificate as the date of deposit for registration is not regarded by the certificate as the date of registration and recording.

On these grounds alone, the motion for an injunction, now made, must be denied, without considering any of the other points raised.

§ 523. The registration of a trade-mark under the act of congress of March 3, 1881, is only *prima facie* evidence of the right of the party registering it to its use, and is no protection to him if it constitutes an infringement of a prior trade-mark. *Glen Cove Mfg. Co. v. Ludeling*,* 22 Fed. R., 823.

§ 524. The certificate of registration of a trade-mark is only *prima facie* and not conclusive evidence that the device is or can be a lawful trade-mark, or that it was first appropriated and used by the claimant. *Moorman v. Hoge*, 2 Saw., 78; 4 Am. L. T. (U. S.), 217; 14 Int. Rev. Rec., 155 (§§ 443-44).

§ 525. Under the act of congress of 1870, relating to the registration of trade-marks, the registration must stand or fall as a whole. So where a person had registered a crown as a trade-mark for paints, and it appeared that at the time of such registry another person had acquired the right to use the same mark on a particular kind of paint, it was held that the registration was inoperative. *Smith v. Reynolds*,* 10 Blatch., 100.

§ 526. Under the act of congress of 1870, relating to the registration of trade-marks, it is a sufficient statement of the class and description of goods to which the trade-mark is to be applied, to say that it is to be applied to paints generally, without specifying any particular description of paints. *Ibid.*

§ 527. Under section 77 of the act of congress of July 8, 1870, relating to the registration of trade-marks, it is not necessary to record the name of each individual of a firm and his place of residence; and the residence and place of business of a protected firm is sufficiently stated by giving the street and number of the place of business of the firm, and saying that it is engaged in a specified business in that city. *Ibid.*

IV. POWERS OF CONGRESS.

SUMMARY — *Act of 1870 unconstitutional*, § 528.

§ 528. The acts of congress providing for the registration of trade-marks (secs. 77-84 of the act of July 8, 1870), and punishing infringements of registered trade-marks (August 14, 1876), are unconstitutional, because power to legislate in relation to trade-marks was not conferred on congress by the constitution. *Trade-mark Cases*, §§ 529-533.

[NOTES.— See §§ 534-536.]

TRADE-MARK CASES.

UNITED STATES *v.* STEFFENS. SAME *v.* WITTEMANN. SAME *v.* JOHNSON.

(10 Otto, 82-99. 1879.)

CERTIFICATES OF DIVISION from the U. S. Circuit Court, Southern District of New York, and the U. S. Circuit Court, Southern District of Ohio.

Opinion by MR. JUSTICE MILLER.

STATEMENT OF FACTS.—The three cases whose titles stand at the head of this opinion are criminal prosecutions for violations of what is known as the trade

mark legislation of congress. The first two are indictments in the southern district of New York, and the last is an information in the southern district of Ohio. In all of them the judges of the circuit courts in which they are pending have certified to a difference of opinion on what is substantially the same question; namely, are the acts of congress on the subject of trade-marks founded on any rightful authority in the constitution of the United States?

The entire legislation of congress in regard to trade-marks is of very recent origin. It is first seen in sections 77-84, inclusive, of the act of July 8, 1870, entitled "An act to revise, consolidate and amend the statutes relating to patents and copyrights." 16 Stat., 198. The part of this act relating to trade-marks is embodied in chapter 2, title 60, sections 4937-4947, of the Revised Statutes.

It is sufficient at present to say that they provide for the registration in the patent office of any device in the nature of a trade-mark to which any person has by usage established an exclusive right, or which the person so registering intends to appropriate by that act to his exclusive use; and they make the wrongful use of a trade-mark, so registered by any other person without the owner's permission, a cause of action in a civil suit for damages. Six years later we have the act of August 14, 1876 (19 Stat., 141), punishing by fine and imprisonment the fraudulent use, sale and counterfeiting of trade-marks registered in pursuance of the statutes of the United States, on which the informations and indictments are founded in the cases before us.

The right to adopt and use a symbol or a device to distinguish the goods or property made or sold by the person whose mark it is, to the exclusion of use by all other persons, has been long recognized by the common law and the chancery courts of England and of this country, and by the statutes of some of the states. It is a property right for the violation of which damages may be recovered in an action at law, and the continued violation of it will be enjoined by a court of equity, with compensation for past infringement. This exclusive right was not created by the act of congress, and does not now depend upon it for its enforcement. The whole system of trade-mark property, and the civil remedies for its protection, existed long anterior to that act, and have remained in full force since its passage. These propositions are so well understood as to require neither the citation of authorities nor an elaborate argument to prove them.

§ 529. *The right in trade-marks depends on the laws of the states.*

As the property in trade-marks and the right to their exclusive use rest on the laws of the states, and, like the great body of the rights of person and of property, depend on them for security and protection, the power of congress to legislate on the subject, to establish the conditions on which these rights shall be enjoyed and exercised, the period of their duration, and the legal remedies for their enforcement, if such power exist at all, must be found in the constitution of the United States, which is the source of all the powers that congress can lawfully exercise. In the argument of these cases this seems to be conceded, and the advocates for the validity of the acts of congress on this subject point to two clauses of the constitution, in one or in both of which, as they assert, sufficient warrant may be found for this legislation.

The first of these is the eighth clause of section 8 of the first article. That section, manifestly intended to be an enumeration of the powers expressly granted to congress, and closing with the declaration of a rule for the ascertainment of such powers as are necessary, by way of implication, to carry into efficient operation those expressly given, authorizes congress, by the

clause referred to, "to promote the progress of science and useful arts by securing, for limited times, to authors and inventors, the exclusive right to their respective writings and discoveries."

§ 530. *Trade-marks are neither inventions nor writings, and are entitled to neither patent-right nor copyright.*

As the first and only attempt by congress to regulate the *right of trade-marks* is to be found in the act of July 8, 1870, to which we have referred, entitled "An act to revise, consolidate and amend the statutes relating to *patents* and *copyrights*," terms which have long since become technical, as referring, the one to inventions and the other to the writings of authors, it is a reasonable inference that this part of the statute also was, in the opinion of congress, an exercise of the power found in that clause of the constitution. It may also be safely assumed that until a critical examination of the subject in the courts became necessary, it was mainly, if not wholly, to this clause that the advocates of the law looked for its support.

Any attempt, however, to identify the essential characteristics of a trade-mark with inventions and discoveries in the arts and sciences, or with the writings of authors, will show that the effort is surrounded with insurmountable difficulties.

The ordinary trade-mark has no necessary relation to invention or discovery. The trade-mark recognized by the common law is generally the growth of a considerable period of use, rather than a sudden invention. It is often the result of accident rather than design, and when, under the act of congress, it is sought to establish it by registration, neither originality, invention, discovery, science nor art is in any way essential to the right conferred by that act. If we should endeavor to classify it under the head of writings of authors the objections are equally strong. In this, as in regard to inventions, originality is required. And while the word *writings* may be liberally construed, as it has been, to include original designs for engravings, prints, etc., it is only such as are *original* and are founded in the creative powers of the mind. The writings which are to be protected are *the fruits of intellectual labor*, embodied in the form of books, prints, engravings, and the like. The trade-mark may be, and generally is, the adoption of something already in existence as the distinctive symbol of the party using it. At common law the exclusive right to it grows out of its *use*, and not its mere adoption. By the act of congress this exclusive right attaches upon registration. But in neither case does it depend upon novelty, invention, discovery, or any work of the brain. It requires no fancy or imagination, no genius, no laborious thought. It is simply founded on priority of appropriation. We look in vain in the statute for any other qualification or condition. If the symbol, however plain, simple, old or well known, has been first appropriated by the claimant as his distinctive trade-mark, he may, by registration, secure the right to its exclusive use. While such legislation may be a judicious aid to the common law on the subject of trade-marks, and may be within the competency of legislatures whose general powers embrace that class of subjects, we are unable to see any such power in the constitutional provision concerning authors and inventors, and their writings and discoveries.

§ 531. *The jurisdiction of congress over trade-marks cannot be supported by its authority to regulate commerce.*

The other clause of the constitution supposed to confer the requisite authority on congress is the third of the same section, which, read in connection

with the granting clause, is as follows: "The congress shall have power to regulate commerce with foreign nations, and among the several states, and with the Indian tribes."

The argument is that the use of a trade-mark — that which alone gives it any value — is to identify a particular class or quality of goods as the manufacture, produce or property of the person who puts them in the general market for sale; that the sale of the article so distinguished is commerce; that the trade-mark is, therefore, a useful and valuable aid or instrument of commerce, and its regulation by virtue of the clause belongs to congress, and that the act in question is a lawful exercise of this power.

Every species of property which is the subject of commerce, or which is used or even essential in commerce, is not brought by this clause within the control of congress. The barrels and casks, the bottles and boxes in which alone certain articles of commerce are kept for safety and by which their contents are transferred from the seller to the buyer, do not thereby become subjects of congressional legislation more than other property. *Nathan v. Louisiana*, 8 How., 73 (CONST., §§ 1035–37). In *Paul v. Virginia*, 8 Wall., 168 (CONST., §§ 1052–59), this court held that a policy of insurance made by a corporation of one state on property situated in another was not an article of commerce, and did not come within the purview of the clause we are considering. "They are not," says the court, "commodities to be shipped or forwarded from one state to another, and then put up for sale." On the other hand, in *Almy v. State of California*, 24 How., 169 (CONST., § 1465), it was held, that a stamp duty imposed by the legislature of California on bills of lading for gold and silver transported from any place in that state to another out of the state, was forbidden by the constitution of the United States, because such instruments being a necessity to the transaction of commerce, the duty was a tax upon exports.

The question, therefore, whether the trade-mark bears such a relation to commerce in general terms as to bring it within congressional control, when used or applied to the classes of commerce which fall within that control, is one which, in the present case, we propose to leave undecided. We adopt this course because when this court is called on in the course of the administration of the law to consider whether an act of congress, or of any other department of the government, is within the constitutional authority of that department, a due respect for a co-ordinate branch of the government requires that we shall decide that it has transcended its powers only when that is so plain that we cannot avoid the duty.

In such cases it is manifestly the dictate of wisdom and judicial propriety to decide no more than is necessary to the case in hand. That such has been the uniform course of this court in regard to statutes passed by congress will readily appear to any one who will consider the vast amount of argument presented to us assailing them as unconstitutional, and he will count, as he may do on his fingers, the instances in which this court has declared an act of congress void for want of constitutional power.

Governed by this view of our duty, we proceed to remark that a glance at the commerce clause of the constitution discloses at once what has been often the subject of comment in this court and out of it, that the power of regulation there conferred on congress is limited to commerce with foreign nations, commerce among the states, and commerce with the Indian tribes. While bearing in mind the liberal construction, that commerce with foreign

nations means commerce between citizens of the United States and citizens and subjects of foreign nations, and commerce among the states means commerce between the individual citizens of different states, there still remains a very large amount of commerce, perhaps the largest, which, being trade or traffic between citizens of the same state, is beyond the control of congress.

When, therefore, congress undertakes to enact a law, which can only be valid as a regulation of commerce, it is reasonable to expect to find on the face of the law, or from its essential nature, that it is a regulation of commerce with foreign nations, or among the several states, or with the Indian tribes. If not so limited, it is in excess of the power of congress. If its main purpose be to establish a regulation applicable to all trade, to commerce at all points, especially if it be apparent that it is designed to govern the commerce wholly between citizens of the same state, it is obviously the exercise of a power not confided to congress.

§ 532. *Congressional legislation on trade-marks exceeding the jurisdiction of congress over commerce is void.*

We find no recognition of this principle in the chapter on trade-marks in the Revised Statutes. We would naturally look for this in the description of the class of persons who are entitled to register a trade-mark, or in reference to the goods to which it should be applied. If, for instance, the statute described persons engaged in a commerce between the different states, and related to the use of trade-marks in such commerce, it would be evident that congress believed it was acting under the clause of the constitution which authorizes it to regulate commerce among the states. So if, when the trade-mark has been registered, congress had protected its use on goods sold by a citizen of one state to another, or by a citizen of a foreign state to a citizen of the United States, it would be seen that congress was at least intending to exercise the power of regulation conferred by that clause of the constitution. But no such idea is found or suggested in this statute. Its language is: "Any person or firm domiciled in the United States, and any corporation created by the United States, or of any state or territory thereof," or any person residing in a foreign country which by treaty or convention affords similar privileges to our citizens, may by registration obtain protection for his trade-mark. Here is no requirement that such person shall be engaged in the kind of commerce which congress is authorized to regulate. It is a general declaration that anybody in the United States, and anybody in any other country which permits us to do the like, may, by registering a trade-mark, have it fully protected. So, while the person registering is required to furnish "a statement of the class of merchandise, and the particular description of the goods comprised in such class, by which the trade-mark has been or is intended to be appropriated," there is no hint that the goods are to be transported from one state to another, or between the United States and foreign countries. Section 4939 is intended to impose some restriction upon the commissioner of patents in the matter of registration, but no limitation is suggested in regard to persons or property engaged in the different classes of commerce mentioned in the constitution. The remedies provided by the act, when the right of the owner of the registered trade-mark is infringed, are not confined to the case of a trade-mark used in foreign or interstate commerce.

It is therefore manifest that no such distinction is found in the act, but that its broad purpose was to establish a universal system of trade-mark registration, for the benefit of all who had already used a trade-mark, or who wished

to adopt one in the future, without regard to the character of the trade to which it was to be applied or the residence of the owner, with the solitary exception that those who resided in foreign countries which extended no such privileges to us were excluded from them here.

It has been suggested that if congress has power to regulate trade-marks used in commerce with foreign nations and among the several states, these statutes shall be held valid in that class of cases, if no further. To this there are two objections: First, the indictments in these cases do not show that the trade-marks which are wrongfully used were trade-marks used in that kind of commerce. Secondly, while it may be true that when one part of a statute is valid and constitutional, and another part is unconstitutional and void, the court may enforce the valid part where they are distinctly separable so that each can stand alone, it is not within the judicial province to give to the words used by congress a narrower meaning than they are manifestly intended to bear in order that crimes may be punished which are not described in language that brings them within the constitutional power of that body. This precise point was decided in *United States v. Reese*, 92 U. S., 214 (CONST., §§ 1568-86). In that case congress had passed a statute punishing election officers who should refuse to any person lawfully entitled to do so the right to cast his vote at an election. This court was of the opinion that, as regarded the section of the statute then under consideration, congress could only punish such denial when it was on account of race, color or previous condition of servitude.

§ 533. *When it is not practicable to separate a part of a statute that is unconstitutional from that which is constitutional, the whole must be adjudged void.*

It was urged, however, that the general description of the offense included the more limited one, and that the section was valid where such was in fact the cause of denial. But the court said, through the chief justice: "We are not able to reject a part which is unconstitutional and retain the remainder, because it is not possible to separate that which is constitutional, if there be any such, from that which is not. The proposed effect is not to be attained by striking out or disregarding words that are in the section, but by inserting those that are not there now. Each of the sections must stand as a whole, or fall altogether. The language is plain. There is no room for construction, unless it be as to the effect of the constitution. The question, then, to be determined is whether we can introduce words of limitation into a penal statute so as to make it specific, when, as expressed, it is general only. . . . To limit this statute in the manner now asked for would be to make a new law, not to enforce an old one. This is no part of our duty." If we should, in the case before us, undertake to make, by judicial construction, a law which congress did not make, it is quite probable we should do what, if the matter were now before that body, it would be unwilling to do; namely, make a trade-mark law which is only partial in its operation, and which would complicate the rights which parties would hold, in some instances under the act of congress, and in others under state law. *Cooley, Const. Lim.*, 178, 179; *Commonwealth v. Hitchings*, 5 Gray, 482.

In what we have here said we wish to be understood as leaving untouched the whole question of the treaty-making power over trade-marks, and of the duty of congress to pass any laws necessary to carry treaties into effect.

While we have, in our references in this opinion to the trade-mark legislation of congress, had mainly in view the act of 1870, and the civil remedy which that act provides, it was because the criminal offenses described in the

act of 1876 are, by their express terms, solely referable to frauds, counterfeits, and unlawful use of trade-marks which were registered under the provisions of the former act. If that act is unconstitutional, so that the registration under it confers no lawful right, then the criminal enactment intended to protect that right falls with it.

The questions in each of these cases being an inquiry whether these statutes can be upheld, in whole or in part, as valid and constitutional, must be answered in the negative; and it will be so certified to the proper circuit courts.

§ 534. Constitutionality.—The act of congress (July 8, 1870) relating to the registration of trade-marks was unconstitutional and could not be upheld under the power of congress to legislate in favor of authors and inventors, or to regulate commerce. *Leidersdorf v. Flint*,* 8 Biss., 327; 7 Cent. L. J., 405; 18 Alb. L. J., 429; 18 Am. L. Reg. (N. S.), 37; 6 Rep., 739.

§ 535. A decree, based on common law principles, enjoining an infringement of a trade-mark, is in no way affected by the decision of the supreme court of the United States that the laws of congress relating to trade-marks are unconstitutional. *United States v. Roche*,* 1 McC., 385.

§ 536. An injunction will not be issued by a federal court to restrain the use of a trade-mark registered under the act of March 3, 1881, upon mineral water not put up for transportation to a foreign country, or for commerce with the Indian tribes, but for consumption in the same state, where the parties are citizens of that state. *Luyties v. Hollender*,* 22 Blatch., 413; 21 Fed. R., 281.

V. RIGHT TO USE OF AN ESTABLISHED TRADE-MARK.

SUMMARY—*Use by firm of which owner is a member*, § 537.—*Right to use not limited to any place*, § 538.—*Sale of establishment at which trade-mark is used*, §§ 539-541.—*Use at different places by different proprietors*, § 542.—*Right forfeited by assignor before transfer*, § 543.—*Forfeiture on account of deception*, § 544.—*Contract for use of a name*, § 545.—*Partnership*, § 546.

§ 537. The fact that the owner of a trade-mark permits the same to be used by a firm of which he is a member does not entitle the other members of the firm to any interest therein. *Kidd v. Thompson*, § 547.

§ 538. An unrestricted right to use a trade-mark is not limited to any place, city or state, but must be deemed to extend everywhere. *Ibid.*

§ 539. When a trade-mark is affixed to articles manufactured at a particular establishment, and acquires a special reputation in connection with the place of manufacture, and that establishment is transferred, either by contract or operation of law, to others, the right to use the trade-mark may be lawfully transferred with it. *Ibid.*

§ 540. When a trade-mark consists merely of the name of the establishment itself where the article is manufactured, and becomes attached to the manufactured article only as the product of that particular establishment, a sale of that establishment will carry with it to the purchaser, by operation of law, the exclusive right to use such trade-mark in connection with his own manufacture at the same place of a similar article. *Pepper v. Larbot*, §§ 548, 549.

§ 541. The complainant acquired by inheritance a distillery, operated by Oscar Pepper, his father. He commenced to manufacture whisky upon the same premises by the same process and branded his barrels "Old Oscar Pepper Distillery," and used the same term in advertisements and on letter-heads. *Held*, that this term, if a lawful trade-mark at all, was so only when applied to the distillery, and that it could not be used by the complainant, after the distillery had become the property of another, to designate whisky manufactured elsewhere; and, also, that as the words "Old Oscar Pepper Whisky" had become the known designation of whisky manufactured at that particular distillery, they could not be so used by the complainant to designate whisky manufactured elsewhere. *Ibid.*

§ 542. Trade-marks are an entirety, and are incapable of exclusive use at different places by more than one independent proprietor. *Manhattan Medicine Co. v. Wood*, §§ 550, 551.

§ 543. Persons will not be protected in the use of a trade-mark, the right to use which was forfeited by their assignors before the assignment to them. *Ibid.*

§ 544. The right to use a trade-mark may be forfeited by the licensee or assignee of the original proprietor, as when he makes it a means of deceiving the public, as by affixing it to a spurious article, or when he sells it outside the district to which he was limited by the license or assignment, or when he relinquishes it and adopts new labels and packages. *Ibid.*

§ 545. The exclusive use of the name of an inventor of certain medicine was granted by the proprietor for the term of ten years. The contract also provided that if the grantee performed the conditions of the contract he should have "all of the rights and privileges to use his (the grantor's) name in the manufacture of said medicine, without fee or reward, for fifty years." *Held*, that the grant for the fifty years additional was also exclusive. *Filkins v. Blackman*, §§ 552-555.

§ 546. When a partnership is formed in regard to the manufacture of the article to which a trade-mark is properly applied, the trade-mark of one partner, in the absence of special regulations, becomes part of the partnership property. *Ibid*.

[NOTES.— See §§ 556-564.]

KIDD v. JOHNSON.

(10 Otto, 617-620. 1879.)

APPEAL from U. S. Circuit Court, District of Louisiana.

Opinion by MR. JUSTICE FIELD.

STATEMENT OF FACTS.—The question presented in this case relates to the ownership of a trade-mark used by the complainants on packages and barrels containing whisky manufactured and sold by them in Cincinnati, and arises out of the following facts:

In 1849 one S. N. Pike, doing business in that city as a wholesale dealer in whisky, adopted as a trade-mark for his manufacture the words "S. N. Pike's Magnolia Whisky, Cincinnati, Ohio," inclosed in a circle, which he placed on packages and barrels containing the liquor. Between that date and 1863 he was in partnership with different persons doing business there under the name of S. N. Pike & Co. In 1863, having dissolved his connection with others, he took as partners two of his former clerks, Tilney and Kidd, continuing the original firm name, and soon afterwards opened a branch-house in New York city. The same trade-mark was used by the new firm as it had been by the preceding firm, without any change. At this time, and subsequently until its sale in 1868, the real property in Cincinnati, upon which the business was conducted, and the distillery, with its fixtures and appurtenances, belonged to Pike individually. In 1868 the firm removed its entire business to New York city and Pike sold the real property in Cincinnati, and the stills, tubs, engines, boilers, tubing and all apparatus in his distillery, for the consideration of \$125,000, to the firm of Mills, Johnson & Co., who were also engaged in the manufacture and sale of whisky at that place. At the same time Pike executed and delivered to the purchasers a separate instrument, stating that, having sold his premises to them, he extended to them and their successors the use of all his brands formerly used by him in his Cincinnati house.

Mills, Johnson & Co. continued for some years the manufacture and sale of whisky on the premises thus purchased, using, without objection from any one, the brands previously used by S. N. Pike & Co. They were succeeded in business by the complainants, who, it is admitted, are entitled to all the rights which they possessed in the trade-mark in question. S. N. Pike died in 1872, and his surviving partners formed a new partnership under the name of George W. Kidd & Co., which was subsequently dissolved, and to its business Kidd, the appellant in this case, succeeded.

The complainants finding that whisky bearing this trade-mark, manufactured by the firm of Tyra, Hill & Co., of St. Louis, was sold in large quantities by dealers in New Orleans, filed the present bill to enjoin the dealers from selling or trafficking in whisky contained in packages thus marked. By an amendment to the bill the defendant Kidd was made a party. He filed an

answer and cross-bill asserting title to the trade-mark as surviving partner of the firm of S. N. Pike & Co., and setting forth that Tyra, Hill & Co. were acting under a license from him.

§ 547. *The owner of a trade-mark may sell and transfer it with the establishment at which he used it.*

The principal question for determination is whether the complainants, claiming under the sale of Pike to their predecessors, or the defendant Kidd, claiming as survivor of S. N. Pike & Co., have the exclusive right to the trade-mark mentioned. The court below decided that the complainants possessed the exclusive right, and our judgment approves of the decision.

It is admitted that Pike was the owner of the trade-mark when he took two of his clerks into partnership and formed the firm of S. N. Pike & Co. He did not place his interest in the trade-mark in the concern as a part of its capital stock. He allowed the use of it on packages containing the whisky manufactured by them; but it no more became partnership property from that fact than did the realty itself, which he also owned, and on which their business was conducted. He was engaged in the same business before the partnership as afterwards, and taking his clerks into partnership changed in no respect, beyond its terms, their relation to his individual property. Their subsequent conduct, moreover, plainly shows that they claimed no interest in the trade-mark. They knew of his conveyance of its use to Mills, Johnson & Co. on the 1st of October, 1868, when they removed their own business to New York, and made no objection to the transfer. Their subsequent correspondence discloses beyond question their knowledge of the transfer and recognition of his power to make it. That transfer was plainly designed to confer whatever right Pike possessed. It, in terms, extends the use of the trade-mark to Mills, Johnson & Co. and their successors. Such use, to be of any value, must necessarily be exclusive. If others also could use it, the trade-mark would be of no service in distinguishing the whisky of the manufacture in Cincinnati; and thus the company would lose all the benefit arising from the reputation the whisky there manufactured had acquired in the market. The right to use the trade-mark is not limited to any place, city or state, and, therefore, must be deemed to extend everywhere. Such is the uniform construction of licenses to use patented inventions. If the owner imposes no limitation of place or time, the right to use is deemed co-extensive with the whole country, and perpetual.

The claim of Kidd to the trade-mark as survivor of the partners in the firm of S. N. Pike & Co. is without any merit. Pike, in his life-time, repudiated any ownership in the trade-mark after his sale, and Kidd knew that fact, and never even pretended that the firm had any such right until after Pike's death.

As to the right of Pike to dispose of his trade-mark in connection with the establishment where the liquor was manufactured, we do not think there can be any reasonable doubt. It is true, the primary object of a trade-mark is to indicate by its meaning or association the origin of the article to which it is affixed. As distinct property, separate from the article created by the original producer or manufacturer, it may not be the subject of sale. But when the trade-mark is affixed to articles manufactured at a particular establishment and acquires a special reputation in connection with the place of manufacture, and that establishment is transferred either by contract or operation of law to others, the right to the use of the trade-mark may be lawfully transferred with it. Its subsequent use by the person to whom the establishment

is transferred is considered as only indicating that the goods to which it is affixed are manufactured at the same place and are of the same character as those to which the mark was attached by its original designer. Such is the purport of the language of Lord Cranworth in the case of *Leather Cloth Company v. American Leather Cloth Company*, reported in 11th Jur. (N. S.). See, also, *Ainsworth v. Walmesley*, 44 L. J., 355, and *Hall v. Barrows*, 10 Jur. (N. S.), 55. The present case falls within this rule.

Decree affirmed.

PEPPER v. LABROT.

(Circuit Court for Kentucky: 8 Federal Reporter, 29-45. 1881.)

Opinion by MATTHEWS, J.

STATEMENT OF FACTS.—This is a bill in equity filed October 23, 1880, the complainant being a citizen of the state of New York and the defendants citizens of Kentucky.

It is alleged that both parties are, and have been, engaged in the manufacture and sale of whisky. The complainant claims to be the originator, inventor and owner of a certain trade-mark and brand for whisky made by him, consisting of the words "Old Oscar Pepper," and also of an abbreviation thereof, consisting of the letters "O. O. P." He alleges that the said words and letters were and are a fanciful and arbitrary title and trade-mark and brand intended to designate and identify whisky of his manufacture, the use of which he began in 1874, continued since by branding and marking the words on each barrel, and using the letters as an abbreviation in correspondence and contracts concerning the article; the whisky so designated having acquired that name, and being well and favorably known thereby. He says that the said words and trade-mark were made up in fact of the family name of the complainant, and embodied the name of his father, and had never before been so used. He avers that the whisky made by him, and so branded, marked and known, was very carefully manufactured, and of excellent quality, and of great reputation in the market, commanding a ready sale at profitable prices, and was identified by said trade-mark as of the complainant's make, whereby the said trade-mark has become of great value to him. He alleges that the trade-mark "Old Oscar Pepper" was used by him by burning the same upon and into the heads of barrels containing whisky made by him in a form set out as an exhibit to the bill. (a)

The same device on a smaller scale was printed upon the letter-heads and bill-heads and business cards used by him in correspondence and other business concerning his whisky; and was also attached to and pasted upon all small packages and samples of the whisky made by him, and was used to identify, and was universally recognized as identifying, the whisky made by him.

(a) [The device exhibited consisted of the following words printed within a circle, the first and last lines conforming to the curve of the circumference:

Old Oscar Pepper
Distillery.

Hand Made
Sour Mash.

Jas. E. Pepper,
Proprietor.

Woodford County, Ky.]

On November 13, 1877, the complainant procured a certificate of the registration of said trade-mark under the laws of the United States.

The bill charges that the defendants have sought to appropriate the complainant's trade-mark to their own use, and are using, upon barrels of whisky made by them, a similar device, a copy of which is exhibited. (a)

It is alleged that this is done by the defendants with the wrongful and fraudulent design to procure the custom and trade of persons who are or have been in the habit of buying, vending or using the genuine whisky made by the complainant, and of illegally and fraudulently promoting the introduction and sale of the defendants' own whisky, under the cover and reputation of the complainant's trade-mark, and of inducing unsuspecting persons to purchase the whiskies of defendants as and for the genuine "Old Oscar Pepper" whisky, manufactured by the complainant. It is charged, also, that with like intent the defendants are using the same device and trade-mark upon their letter-heads and business cards and other papers and advertisements and upon packages containing their whisky. It is also charged that this conduct of the defendants is injurious to the complainant in the sale of his whisky and in the profits thereof, and that, by reason of the inferior quality of the whisky sold by defendants under such trade-mark, the reputation of the complainant's whisky is greatly prejudiced and injured in the markets of the country, and a fraud and deception practiced upon the public, many of whom are induced to purchase the defendants' whisky, believing it to be the manufacture of the complainant.

The bill accordingly prays for an injunction and an account.

The defendants filed an answer in which they admit that they have been and are engaged in manufacturing and selling whisky, their distillery being in Woodford county, Kentucky, and long known and designated as the "Old Oscar Pepper Distillery." They deny that the complainant is the originator or owner of the trade-mark or brand for whisky made by him, as claimed, and deny that the words "Old Oscar Pepper," or the abbreviation of them, by the letters "O. O. P.," have ever been used as an arbitrary or fanciful title or trade-mark for whisky, or that they were ever so used by the complainant, and allege that they were never used by him except in connection with the word "distillery," and then only for the purpose of showing that the whisky in reference to which they were so used was manufactured at and was the product of the Old Oscar Pepper Distillery. The defendants claim that the use of the same by the complainant as a brand for their whisky, manufactured elsewhere, would be a fraud on the public, as well as on the defendants. They say that several years since the complainant became the owner of thirty-three acres of land in Woodford county, Kentucky, known as the land used by Oscar Pepper for distillery purposes, upon which there was a distillery and

(a) [The device exhibited was in the same form as the preceding, and was composed of the following words:

Old Oscar Pepper
Distillery.

—
Established
1838.

—
Hand Made Sour Mash.
Labrot & Graham,
Proprietors.
Woodford County, Ky.]

machinery, warehouse, and other improvements; that said distillery, during the life-time of Oscar Pepper, the father of the complainant, became famous because of the superior quality of the whisky there produced, which was attributed, by dealers in whisky, to the peculiar character and properties of the water used in the process of distillation; that in 1874 the complainant, in company with one E. J. Taylor, Jr., with whom he was associated in business, operated said distillery, and formally named it the "Old Oscar Pepper Distillery," and procured a large number of iron signs to be made and distributed throughout the country, containing a correct drawing of the distillery and warehouse building, and an accurate view of the Old Oscar Pepper homestead or dwelling, which drawing and view they surrounded with the words, in a circular form, above the same, "Old Oscar Pepper Distillery," and below, in a straight line, "Woodford Co., Kentucky," and thus as is claimed, fixed and determined the name of said distillery. They also procured an iron brand to be made, and with it burnt into the head of each barrel of whisky, manufactured in said distillery, the words,

Old Oscar Pepper
Distillery.
Hand-made Sour Mash.
James E. Pepper,
Proprietor.
Woodford County, Ky.,

for the purpose, as is alleged, of identifying it as the product of the Old Oscar Pepper Distillery. It is also alleged that the complainant advertised his business in a circular, as follows:

"Having put in the most thorough running order the old distillery premises of my father, the late Oscar Pepper (now owned by me), I offer to the first-class trade of this country a hand-made, sour-mash, pure copper whisky of perfect excellence. The celebrity attained by the whisky made by my father was ascribable to the excellent water used (a very superior spring), and the grain grown on the farm adjoining by himself, and to the process observed by James Crow, after his death by William F. Mitchell, his distillers. I am now running the distillery with the same distiller, the same water, the same formulas, and grain grown upon the same farm."

He also circulated a similar certificate from his distiller, Mitchell, who said:

"I am employed by James E. Pepper as distiller, and the whisky I now make is from the same formula as the celebrated Crow whisky manufactured by James Crow and myself for his father (the late Oscar Pepper), at the same place, and is of the same excellence, being identical in quality. I use the same water, the same grain, the same still."

It is also alleged that the complainant, in March, 1877, was declared a bankrupt, and that among other assets the tract of land and the distillery thereon, with all the appurtenances and fixtures, were sold by the assignee, and by mesne conveyances became vested in the defendants, who have since operated the same by the manufacture of whisky; and that the complainant in the meantime has been, and is now, operating a distillery in Fayette county, Kentucky, as the sole place of the manufacture of his whisky, and that consequently he cannot use the brand formerly used by him while operating the "Old Oscar Pepper Distillery," without making a false and fraudulent representation as to the place of manufacture:

The defendants admit that since they have owned and operated the Old

Oscar Pepper Distillery, they have used the brand set out in the pleadings, but merely for the purpose of identifying their whisky as the product of that distillery, as follows:

Old Oscar Pepper
Distillery.
Established 1838.
Hand-made Sour Mash.
Labrot & Graham,
Proprietors,
Woodford County, Kentucky.

They claim the right so to do by virtue of their ownership of the distillery, of which they say that is the proper name.

On November 23, 1880, the defendants also filed their cross-bill, setting up in substance the same facts, and claiming that they are entitled to the exclusive use as a trade-mark of the brand described in the pleadings as used by them, and praying to be protected therein by a perpetual injunction.

To this cross-bill the complainant filed his answer, insisting upon his claims to the injunction and right to the exclusive use of the trade-mark, "Old Oscar Pepper," and the abbreviation "O. O. P." as applied to whisky. He alleges that his father, during his life-time, Oscar Pepper, operated a distillery on the premises mentioned, and manufactured an article which became well and favorably known to the trade as "Crow" or "Old Crow" whisky, from the name of the distiller, and that in consequence the distillery became known as the "Old Crow Distillery;" that after his father's death, the distillery tract having come into his possession, he leased it to W. A. Gaines & Co., who continued the manufacture of whisky under the same trade-name and mark of "Crow" or "Old Crow," but that afterwards the complainant, having gone into the business himself, built on the same site an entirely new distillery, and manufactured whisky which he called by the name of "Old Oscar Pepper," and so marked and branded the packages, and thereby originated and adopted it as his trade-mark to identify and distinguish the whisky made by him, and it became well and favorably known as such. He says that in the manufacture of his whisky he used neither the same distillery building at which the "Crow" whisky was manufactured, nor the identical spring of water which had been used in connection with it, but another spring in the same vicinity of the same quality; all the springs of water in the same geological formation throughout the counties of Woodford, Fayette, Bourbon, Harrison and the blue-grass section of Kentucky being substantially alike in quality, and the whisky made from one indistinguishable from that made, with equal care and skill and by the same process, at any other.

And the complainant insists that the name "Old Oscar Pepper" was never applied to the distillery premises until after he had adopted it as the name of whisky made by him, and then only as indicating the place where he made his "Old Oscar Pepper" whisky; and that it was not the name of the distillery which was applied to designate the whisky made there, but the name of the whisky which was applied to designate the distillery at which it was made, so far as it was ever so known or called. He charges that the use by the defendants of the words "Old Oscar Pepper Distillery," as descriptive of the locality, is a subterfuge and evasion, their real intent being to use the words as describing their make of whisky, and thereby wrongfully to use complainant's trade-mark and pirate his trade.

General replications perfect the issue arising both on the original and cross-bills, and the cause has been submitted on final hearing upon the pleadings and proofs.

It is manifest that the controversy between the parties, in the first instance, is one of fact.

The construction of the complainant is, that the words "Old Oscar Pepper" and the abbreviation of them, "O. O. P.," constitute a brand or mark originally adopted by him to designate whisky as made by him, without reference to the place of manufacture; and that by use and recognition it has become associated in the minds of dealers and the public with the article manufactured by him, so as to constitute its name in the trade, whereby to distinguish it from a similar article made by any and all others.

On the other hand the defendants claim that the words in question were originally used, and their use subsequently continued, merely to designate the fact that the whisky contained in the packages so marked or spoken of in advertisements, circulars, signs, etc., on which the mark was burned or printed, was made at the distillery so designated; and that that was done because the distillery, or its predecessor on the same site, had acquired a reputation in connection with the manufacture of whisky which was sufficient to recommend any article made at the same place.

Undoubtedly the inference, from the plain meaning of the words themselves, supports strongly the claim on the part of the defendants.

The complainant's brand or mark, as claimed and used by him, is "Old Oscar Pepper Distillery, Woodford Co., Ky.," James E. Pepper, proprietor; the words "hand-made sour mash" describe the quality of the whisky; and as to the rest, the plain and unequivocal meaning is that it is the product of the "Old Oscar Pepper Distillery," of which James E. Pepper is proprietor.

The complainant in his testimony endeavors to explain his use of the word "distillery" in this connection, so as to make its use consistent with his claim that the words "Old Oscar Pepper" were intended to designate the whisky and not the distillery. He says: "In branding the ends of my barrels I put the word 'distillery' to show that the 'Old Oscar Pepper' whisky was a straight whisky made by me, and at my own distillery, and not a compounded whisky; and the use of the word 'distillery' on the heads of the barrels following the trade-mark, indicated a straight whisky as distinguished from a compounded whisky."

But the explanation does not seem sufficient. The use of the word "distillery" does, indeed, seem to advertise the fact that the whisky is distilled, and not rectified, but it does so by designating the spirits contained in the package as the product, not merely of a distillery, but of the particular distillery known as the "Old Oscar Pepper Distillery," of which James E. Pepper is proprietor.

It is true that Beecher, one of the firm of Ives, Beecher & Co., the merchants who sold the complainant's whisky in New York, testifies that the whisky acquired its reputation under the name of "Old Oscar Pepper," or "O. O. P." whisky, and known by that name, and inquired after and bought and sold by that designation. He says my firm buy whisky under the name of "Old Oscar Pepper." But he immediately explains that "we buy as 'Old Oscar Pepper,' whisky to be made at the distillery where James E. Pepper first made the whisky known to the trade by that name." (Answer to the

twenty-third interrogatory.) And in answer to the seventh cross-interrogatory he says:

“At the time my firm commenced dealing in ‘Old Oscar Pepper’ whisky that name added to the reputation and salability of the whisky, for the reason that that was the name of James E. Pepper’s father, and his father had made good whisky at that very distillery for several years previous to the making of any by James E. Pepper.”

It is beyond dispute that Ives, Beecher & Co. introduced the complainant’s manufacture of whisky to the trade under the name of Old Oscar Pepper whiskies, upon the credit of the old distillery of Oscar Pepper, and recommended them as of superior excellence because they were the product of that distillery. This was done by advertisements in circulars, containing certificates and affidavits, one from James E. Pepper himself, that he had put in the most thorough running order “the old distillery of my father, the late Oscar Pepper, now owned by me;” that “the celebrity attained by the whisky made by my father was ascribable to the excellent water used (a very superior spring) and the grain grown on the farm adjoining by himself, and to the process observed by James Crow, after his death by W. F. Mitchell, his distillers;” that “I am now running the distillery with the same distiller, the same water, the same formula, and grain grown upon the same farm, consequently my product being of the same quality and excellence.” Another certificate and affidavit so published was from his mother, in which she stated that her son, James E. Pepper, is the owner of the old distillery property situated in the county of Woodford, state of Kentucky, formerly owned by her deceased husband, Oscar Pepper, and known as the “Old Crow Distillery.”

“The buildings have been thoroughly improved. Mr. W. F. Mitchell, who distilled for the late Oscar Pepper, succeeding James Crow, is employed by my son, and the product is of the highest excellence, and recognized as fully up to the standard of the celebrated old product from the same stills.”

And the distiller, Mitchell, also certifies: “I use the same water, the same grain, and the same STILL.”

It does not avail the complainant now to repudiate these representations, or to insist that they are altogether immaterial. It may be true, as he now says, that in point of fact his distillery was altogether distinct as a building and machinery from that so long operated by his father, and that he did not use the same spring of water and the same stills; and it may be equally true that, so far as the intrinsic quality of the whisky is concerned, the circumstances referred to were altogether unimportant, for the reason that the product of equally good materials, made in the same geological region, in the best manner known to those engaged then in the manufacture, could not be distinguished from the favorite article known by the name of any particular distillery. Nevertheless it remains quite certain, from the proofs in this case, that the complainant succeeded in establishing a market for his manufacture, upon the special belief of the public that it must be like that made by his father, because made at the same locality and with all the advantages it was thought to confer. In other words, he sought and obtained for his own manufacture, by the use of the name of his father’s distillery, the reputation established by Oscar Pepper for his own.

Oscar Pepper manufactured at his distillery for many years previous to his death in 1865, probably as early as 1838, and the distillery was known in the

neighborhood, as some witnesses testify, as Oscar Pepper's distillery. This, indeed, would be most natural. Afterwards the whisky distilled there under the management of James Crow became extensively and favorably known as "Old Crow" whisky, and the distillery acquired the name of the Old Crow distillery; and that name was used after the death of Oscar Pepper, by successive lessees of the establishment, as a trade-mark to designate its production; but during that period the name of Oscar Pepper, as formerly connected with it, appeared in the brands and marks used by Gaines, Berry & Co. while they were carrying it on. They styled themselves on business cards "Lessees of Oscar Pepper's 'Old Crow' Distillery." In 1874 the trade-mark of "Old Crow" having previously, by Gaines, been transferred to the product of another distillery owned or operated by him or his firm, the complainant came into possession of his own distillery, and it became known as the "Old Oscar Pepper Distillery." The deed directly to the complainant of the distillery premises, made by a commissioner in pursuance of a decree for partition, refers to an accompanying plat in which the "Old Crow Distillery" is designated; but early in 1875 an agreement was made by the complainant with one E. H. Taylor, Jr., reciting that the former was owner of the premises upon which is situate the old distillery which was operated and run by the said Oscar Pepper in his life-time, and providing means for a thorough reparation of said old distillery, and of operating the same for the purpose of manufacturing copper whisky of the grade, character and description of that which was made by the said Oscar Pepper in his life-time, when James Crow and W. F. Mitchell were his distillers. The complainant having, upon his own petition, been declared a bankrupt, filed the required schedule of his assets and liabilities, in which he described the tract of land inherited from his brother as including the "Old Oscar Pepper Distillery;" and as such it was known at the time the title became vested in the defendants.

The clear result of the whole evidence seems, in our opinion, to be that the complainant adopted the name of "Old Oscar Pepper Distillery" as the name of his distillery in order that the whisky manufactured by him there might have the reputation and whatever other advantages were to result from that association.

That distillery having now become the property of the defendants by purchase from the complainants, can they be denied the right of using the name by which it was previously known in the prosecution of the business of operating it, and of describing the whisky made by them as its product?

Can the complainant be permitted to use the brand or mark formerly employed by him to represent whisky made by him elsewhere as the actual product of this distillery?

Both these questions, in our opinion, must be answered in the negative.

§ 548. *Principles upon which the right of trade-mark is founded. Cases cited.*

The most recent statement of the law applicable to this subject by the supreme court of the United States is found in the case of *The Amoskeag Manuf'g Co. v. Trainer*, 101 U. S., 51 (§§ 464-67, *supra*). In that case Mr. Justice Field said:

"The general doctrines of the law as to trade-marks, the symbols or signs which may be used to designate products of a particular manufacture, and the protection which the courts will afford to those who originally appropriated them, are not controverted. Every one is at liberty to affix to a product of

his own manufacture any symbol or device not previously appropriated which will distinguish it from articles of the same general nature manufactured or sold by others, and thus secure to himself the benefit of increased sales by reason of any peculiar excellence he may have given to it. The symbol or device thus becomes a sign to the public of the origin of the goods to which it is attached, and an assurance that they are the genuine article of the original producer. In this way it often proves to be of great value to the manufacturer in preventing the substitution and sale of an inferior and different article for his products. It becomes his trade-mark, and the courts will protect him in its exclusive use, either by the imposition of damages for its wrongful appropriation, or by restraining others from applying it to their goods, and compelling them to account for profits made on a sale of goods marked with it. The limitations upon the use of devices as trade-marks are well defined. The object of the trade-mark is to indicate, *either by its own meaning or by association*, the origin or ownership of the article to which it is applied. If it did not, it would serve no useful purpose either to the manufacturer or to the public. It would afford no protection to either against the sale of a spurious in place of the genuine article. This object of the trade-mark, and the consequent limitations upon its use, are stated with great clearness in the case of *Canal Co. v. Clark*, 13 Wall., 311 (§§ 453-56, *supra*). There the court said, speaking through Mr. Justice Strong, that no one can claim protection for the exclusive use of a trade-mark or trade-name which would practically give him a monopoly in the sale of any goods *other than those produced or made by himself*. If he could, the public would be injured rather than protected, for competition would be destroyed. Nor can a generic name, or a name merely descriptive of an article of trade, of its qualities, ingredients or characteristics, be employed as a trade-mark, and the exclusive use of it be entitled to legal protection."

In the case of *Canal Co. v. Clark*, 13 Wall., 322 (§§ 453-56, *supra*), it is stated that the

"Office of a trade-mark is to point out distinctively the origin or ownership of the article to which it is affixed; or, in other words, *to give notice who was the producer.*"

And that there are some limits to the right of selection will be manifest. It is further said in that case:

"When it is considered that, in all cases where rights to the exclusive use of a trade-mark are invaded, it is invariably held that the essence of the wrong consists in the sale of the goods of one manufacturer or vendor as those of another; and that it is only when this false representation is directly or indirectly made that the party who appeals to a court of equity can have relief. This is the doctrine of all the authorities."

"And it is obvious that the same reasons," continues the opinion in that case, "which forbid the exclusive appropriation of generic names, or of those merely descriptive of the article manufactured, *and which can be employed with truth by other manufacturers*, apply with equal force to the appropriation of geographical names designating districts of country. Their nature is such *that they cannot point to the origin (personal origin)* or ownership of the article of trade to which they may be applied. They point *only at the place of production, not to the producer*, and could they be appropriated exclusively the appropriation would result in mischievous monopolies."

In the same opinion Mr. Justice Strong quoted, with approval, an extract

from the opinion in the case of *The Amoskeag Manuf'g Co. v. Spear*, 2 Sandford, Sup. Ct., 509, as follows:

"The owner of an original trade-mark has an undoubted right to be protected in the exclusive use of all the marks, forms or symbols that were appropriated as designating the time, origin or ownership of the article or fabric to which they are affixed; but he has no right to the exclusive use of any words, letters, figures or symbols which have no relation to the origin or ownership of the goods, but are only meant to indicate their names or quality. *He has no right to appropriate a sign or a symbol which, from the nature of the fact it is used to signify, others may employ with equal truth, and therefore have an equal right to employ for the same purpose.*"

Following and applying the principle expressed in the last sentence of this extract, Mr. Justice Strong, in the opinion from which we are still quoting, says:

"It is only when the adoption or imitation of what is claimed to be a trade-mark amounts to a false representation, express or implied, designed or accidental, that there is any title to relief against it. True, it may be, that the use by a second producer, in describing truthfully his product, of a name or a combination of words already in use by another, may have the effect of causing the public to mistake as to the origin or ownership of the product; but if it is just as true in its application to his goods as it is to those of another who first applied it, and who, therefore, claims an exclusive right to use it, there is no legal or moral wrong done. Purchasers may be mistaken, but they are not deceived by false representations, and equity will not enjoin against telling the truth."

Tried by these principles, it would seem that the trade-mark claimed by the complainant cannot be sustained as a designation of whisky manufactured by him without reference to the place of its production, and that it is not, therefore, a lawful trade-mark at all, in the proper sense of that term. It is rather the trade-name of the distillery itself, of which he was at one time the proprietor, but which now is the property of the defendants. Neither by its own meaning, nor by association, does it indicate the personal origin or ownership of the article to which it is affixed. It does not seem to give notice who was the producer. It could be applied by him, with truth, to his goods only while he was the owner of the distillery named, and then only, not to all whisky of his manufacture, but only to that actually produced at that distillery. It can now be used without practicing a deception upon the public only by the defendants. It points only at the place of production, not to the produce. If a trade-mark at all, in any lawful sense, it is only in its use in connection with the article which it truthfully describes; that is, whisky which is actually manufactured at the Old Oscar Pepper Distillery, in Woodford county.

In the case of *Hall v. Barrows*, 4 De Gex, Jones & Smith, 157, there was a trade-mark altogether distinct from the name of the works, being the initials of the names of two of the original firms which owned the works, stamped upon the iron produced at the works. The question was whether, in a sale of the works and business to a surviving partner, the trade-marks should be valued as passing in the sale. The lord chancellor, Westbury, said:

"There is nothing in the answer or evidence to show that the iron marked with these initials has, or ever had, a reputation in the market because it was believed to be the actual manufacture of one of the two original firms. Now, if I adopted the distinction drawn by the master of the rolls between local

and personal trade-marks, I should be more inclined to treat this mark as incident to the possession of the Bloomfield Iron Works, for it has been used by successive owners of such works, and seems to have been used by the last partnership in no other right. In this respect the case resembles that of *Motley v. Downman*, 3 Myl. & Cr., 1.

“But it is unnecessary to pursue this further, for I am of opinion that these initial letters, surmounted by a crown, have become and are a trade-mark, properly so called — that is, a brand which has reputation and currency in the market, as a well-known sign or quality; and that as such the trade-mark is a valuable property of the partnership, as an addition to the Bloomfield Works, and may be properly sold with the works, and therefore properly included as a distinct subject of value in the valuation to the surviving partners.

“It must be recollected that the question before me is simply whether the right to use the trade-mark can be sold along with the business and iron works, so as to deprive the surviving partner of any right to use the mark in case he should set up a similar business. Nothing that I have said is intended to lead to the conclusion that the business and iron works might be put up for sale by the court in one lot, and that the right to use the trade-mark might be put up as a separate lot, and that one lot might be sold and transferred to one person, and the other lot sold and transferred to another; the case requiring only that I should decide that the exclusive right to this trade-mark belongs to the partnership as part of its property, and might be sold with the business and work and as a valuable right, and if it might be so sold, it must be included in the valuation to the surviving partner.”

It will be observed with what pains the lord chancellor guards against the conclusion that, even in such a case, the title to the trade-mark could be separated from that of the establishment upon the product of which it had always been used, even when the trade-mark was not the mere name of the place of manufacture, but a trade-mark proper, denoting the personal origin of the manufactured article.

The case of *Kidd v. Johnson*, 100 U. S., 617 (§ 547, *supra*), is to the like effect. The trade-mark in that case — “S. N. Pike’s Magnolia Whisky, Cincinnati, Ohio” — was a trade-mark proper; that is, indicated the personal origin of the manufacture, and was not the mere name of the place of manufacture. Pike sold his establishment to be carried on for the same business by his successors, and with it the right to use his brands. The court said in deciding the case (p. 620):

“As to the right of Pike to dispose of his trade-mark in connection with the establishment where the liquor was manufactured, we do not think there can be any reasonable doubt.

“It is true, the primary object of a trade-mark is to indicate by its meaning or association the origin of the article to which it is affixed. As distinct property, separate from the article created by the original producer or manufacturer, it may not be the subject of sale. But when the trade-mark is affixed to articles manufactured at a particular establishment, and acquires a special reputation in connection with the place of manufacture, and that establishment is transferred either by contract or operation of law to others, the right to the use of the trade-mark may be lawfully transferred with it.

“Its subsequent use by the person to whom the establishment is transferred is considered as only indicating that the goods to which it is affixed are manufactured at the same place, and are of the same character as those to which

the mark was attached by its original designer. Such is the purport of the language of Lord Cranworth in the case of *Leather Cloth Co. v. American Leather Cloth Co.*, reported in 11 Jur. (N. S.), 513. See, also, *Ainsworth v. Walmesley*, 44 L. J., 355, and *Hall v. Burrows*, 10 Jur. (N. S.), 55."

The observations of Lord Cranworth in the *Leather Cloth Case*, referred to in this citation, are as follows:

"But I further think that the right to a trade-mark may, in general, treating it as property, or as an accessory of property, be sold and transferred upon a sale and transfer of the manufactory of the goods on which the mark has been used to be affixed, and may be lawfully used by the purchaser. Difficulties, however, may arise where the trade-mark consists merely of the name of the manufacturer. When he dies those who succeed him (grand-children or married daughters, for instance), though they may not bear the same name, yet ordinarily continue to use the original name as a trade-mark, and they would be protected against any infringement of the exclusive right to that mark. They would be so protected, because, according to the usages of trade, they would be understood as meaning no more by the use of their grandfather's or father's name than that they were carrying on the manufacture formerly carried on by him. Nor would the case be necessarily different if, instead of passing into other hands by devolution of law, the manufactory was sold and assigned to a purchaser.

"The question in every such case must be, whether the purchaser, in continuing the use of the original trade-mark, would, according to the ordinary usages of trade, be understood as saying more than that he was carrying on the same business as had been formerly carried on by the person whose name constituted the trade-mark. In such a case I see nothing to make it improper for the purchaser to use the old trade-mark, as the mark would, in such a case, indicate only that the goods so marked were made at the manufactory which he had purchased."

In the foregoing cases, the trade-mark consisted either in some arbitrary and fanciful name given to the product, or in the name or initials of the original producer, and it was held, even in respect to them, that the exclusive right to continue their use might pass to a purchaser of the place of production, carrying on the business of producing the same article.

§ 549. *Rule of law as to trade-marks which are descriptive of places or depend upon locality for their significance.*

It is a fair inference from these authorities that when, as in the present case, the trade-mark consists merely in the name of the establishment itself where the manufacture is carried on, and becomes attached to the manufactured article only as the product of that particular establishment, a sale of the establishment will carry with it to the purchaser the exclusive right to the use of the name it had previously acquired, in connection with his own manufacture at the same place of a similar article, by operation of law. For that proposition the case of the *Congress Spring*, Cox's *American Trade-mark Cases*, 599, is a direct authority. The court of appeal, per Folger, J., p. 630, said:

"The plaintiff purchased of the former proprietors the spring. They took the whole property in it. They thus obtained that which was the prime value of it, the exclusive right to preserve its waters in bottles, as an article of merchandise, and the exclusive right to sell it when bottled. Thus they acquired the business of their predecessors, for, the plaintiff owning the spring, no one else could carry on the business. And, under the rules above stated, they

acquired by assignment, or operation of law, the right to the trade-mark, before that time in use, to designate the article upon which this business was carried on."

It is true, as observed by counsel in argument, that in that case the article of merchandise was a natural, and not, as in the present, an artificial production. That circumstance was observed upon, in the argument of that case, as a reason for refusing the protection claimed for the trade-mark by the purchaser. The court said in reply (p. 625):

"It is true that, in most of the cases which have been the occasion of the rules laid down on this subject, the article in question has been artificial. But it will be difficult to show a reason for any of these rules which does not apply to the proprietorship of an unique product of nature, as well as to that of an unique product of art."

The following cases are cited without comment as sustaining the same proposition: *G. & H. Manuf'g Co. v. Hall*, 61 N. Y., 229; *Carmichael v. Lattimer*, 11 R. I., 407; and *Booth v. Jarrett*, 52 How. Pr., 169.

The cases cited and relied upon by counsel for complainant do not seem to us to affect the question in the view which we have taken of the facts. The only one upon which we think it important to submit a comment is that of *Wotherspoon v. Currie*, L. R., 5 Eng. & Ir. Ap., 521, and that, only because it seems to be urged as inconsistent with the view we have been compelled to adopt. In that case the controversy turned upon the exclusive right to the word "Glenfield," as applied to starch originally made at a village of that name, the manufacture of which was subsequently removed to another place, as against the defendant subsequently manufacturing at the original place — Glenfield — and claiming on that account the right to use the name in connection with the starch made by him. Lord Westbury stated the point on which the final decision in favor of the complainant was rested with clearness. He said:

"I take it to be clear from the evidence that long antecedently to the operations of the respondent the word 'Glenfield' had acquired a secondary signification or meaning in connection with a particular manufacture; in short, it had become the trade denomination of the starch made by the appellant. It was wholly taken out of its ordinary meaning, and in connection with starch had acquired that peculiar secondary signification to which I have referred. The word 'Glenfield,' therefore, as a denomination of starch, had become the property of the appellants. It was their right and title in connection with the starch."

We do not find in the present case any state of facts corresponding with this. The words "Old Oscar Pepper Distillery" never lost their primary signification, and never acquired any secondary meaning; and, as applied to the whisky made by the complainant, the words "Old Oscar Pepper," and their abbreviation, "O. O. P.," never came to mean more than whisky that had been made at that particular distillery. They did not become a denomination of whisky as the manufacture of the complainant or of any person, but characterized it only as entitled to public favor by reason of the reputation of the particular distillery at which it purported to have been made.

For these reasons we are of opinion that the equity of the case, both upon the original and cross-bills, is with the defendants. A decree may be entered accordingly.

BARR, D. J., concurred.

MANHATTAN MEDICINE COMPANY v. WOOD.

(Circuit Court for Maine: 4 Clifford, 461-489. 1878.)

§ 550. *Ground of relief against infringement of trade-mark. Resemblance, what sufficient to constitute infringement.*

Opinion by CLIFFORD, J.

Equity gives relief for the infringement of a trade-mark, upon the ground that one man is not allowed to offer his goods for sale, representing the goods to be the manufacture of another in the same commodity. *Seixo v. Provezende*, L. R., 1 Ch., 195. What degree of resemblance is necessary to constitute an infringement is incapable of exact definition; but the rule is that no trader can adopt a trade-mark so resembling that of another as that ordinary purchasers, buying with ordinary caution, are likely to be misled. *McLean v. Fleming*, 6 Otto, 245 (§§ 431-40, *supra*). Two trade-marks are substantially the same in legal contemplation if the resemblance is such as to deceive ordinary purchasers, giving such attention to the same as such purchasers usually give, and to cause them to purchase the one manufacture supposing it to be the other. *Gorham Co. v. White*, 14 Wall., 528 (PATENTS, §§ 1910-12).

Relief is claimed in this case upon the special grounds set forth in the bill of complaint. They are, in substance and effect, as follows:

1. That the corporation complainants for a long time have been and now are the manufacturers and vendors of an article of medicine called and known as "Atwood's Vegetable Physical Jaundice Bitters," taken internally, for the cure of jaundice and other diseases; that during all the time they have been engaged in making and selling the article, it has been put up and sold in the same manner, and with the same trade-marks, labels and wrappers affixed thereto, in glass bottles, with twelve panel-shaped sides, having on five of the sides the raised words and letters, "Atwood's Genuine Physical Jaundice Bitters, Georgetown, Mass.," blown in the glass on each bottle, each bottle containing about a pint of the medicine in liquid form, labeled with a light-yellow printed label, pasted on the outside, as fully set forth in the bill of complaint.

2. That the said medicine was first invented and put up for sale about twenty-five years ago by one Dr. Moses Atwood, formerly of Georgetown, Mass., by whom, his assigns and successors, the same has been ever since made and sold by the same name, in the same manner, and with the same trade-marks and description.

3. That the complainants, long prior to the alleged infringement, became the lawful, sole and exclusive owners of the formula or recipe for making said medicine, and of the sole and exclusive right to use said name or designation therefor, together with all said trade-marks, labels, and good-will of the business of making and selling said medicine.

4. That the respondents, prior to the filing of the bill of complaint, at Portland, and at divers other places unknown to the complainants, have manufactured and sold, and are still manufacturing and selling, large quantities of medicine, of an inferior quality, in imitation of the article manufactured and sold by the complainants, and without their consent.

5. That during all that time the respondents have made, put up and sold, and still make, put up and sell, their said imitation and counterfeit article as and for the genuine article of the complainants, so put up, marked and labeled, that it is very difficult to be distinguished from the complainants' genuine article.

6. Based on these allegations, the complainants pray for an account and for an injunction, restraining the respondents from affixing or applying to any article of medicine manufactured, sold, shipped or supplied by them, or to the bottles or packages in which the same is put up, the complainants' trade-mark words, to wit, "Atwood's Vegetable Physical Jaundice Bitters," or either of said words, or any imitation thereof.

Service was made, and the respondents appeared and filed an answer, setting up several defenses to the following effect:

1. They admit that complainants purchased all the right, which the parties named in the answer owned, to prepare the Atwood Bitters, but they deny that those parties held or possessed the exclusive right to manufacture the same, or any exclusive right whatever to the same, or any exclusive right to any trade-mark, label or wrapper, consisting of a glass bottle with panel-shaped sides, and with the raised words and letters, "Atwood's Genuine Physical Jaundice Bitters, Georgetown, Mass.," blown in the glass; nor did they possess any exclusive right to the preparation of the medicine in a liquid form, or to the light-yellow printed label pasted to said bottle, upon which were the words, "Atwood's Vegetable Physical Jaundice Bitters." Nor did they possess any exclusive right to the residue of what is printed upon the label, and set forth in the bill of complaint.

2. That the twelve-panel bottle, the yellow label, the words "Atwood's Bitters," together with the other words alleged to be printed on said label, were in public and common use by a large number of manufacturers.

3. That the complainants did not purchase and do not now own the exclusive right, nor the entire right, to said bottle, label and words, or either of them, as alleged, because their said assignors were not the exclusive proprietors of the same, and therefore could not sell and dispose of what they did not own.

4. They deny that Moses Atwood first invented and put up the said medicine for sale, and allege that it was first put up by Moses F. Atwood, of Georgetown, Mass., in connection with L. H. Bateman, not in a paneled bottle, but in a smooth, round bottle, without panels; that the round bottle used by Bateman had no words blown in the glass, and that the bottles which contained words blown in the glass were rectangular in form and without panels, and that Moses Atwood first used a white label and a round bottle having no panels or blown letters.

5. That Moses F. Atwood, and not Moses Atwood, first obtained the formula for the medicine from some physician to these respondents unknown, and prepared the same according to the formula, and not according to any invention of himself or of said Moses Atwood; and that subsequently thereto the medicine put up by him and Batemen began to be called "Atwood's Bitters."

6. That the respondent first named in May, 1861, purchased the recipe for the medicine, and the right of using the bottle and label, that he has a right to use the same, and that no person has ever pretended to interrupt him in such use prior to the present suit.

7. That L. F. Atwood, the brother of Moses Atwood, also had a right to use the said label and bottle, and that he sold such a right to H. H. Hay, of Portland, who uses the same on the bottles containing the medicine.

8. That they have been in the practice of preparing the medicine under the recipe bought of Moses F. Atwood, for the period of fourteen years, and that they have spent large sums of money in advertising the medicine and in creating a market for the same.

Proofs were taken on both sides and the evidence is voluminous and somewhat conflicting. Any discussion of the legal questions arising in the case would not be of much advantage until the facts are ascertained, which will be best accomplished by distinct findings.

Pursuant to that view the court finds as follows:

1. That Moses Atwood, Georgetown, Mass., commenced preparing the medicine in question nearly forty years ago; that for a time the formula of the ingredients was a secret, and that he soon began to designate the preparation as his medicine more frequently than otherwise, designating it as Moses Atwood's Bitters or as Moses Atwood's Jaundice Bitters, and sometimes as Atwood's Vegetable Jaundice Bitters. There is no direct proof that he ever adopted any distinct trade-mark, but the evidence of use is such as to warrant the conclusion that he considered the latter designation as representing the article which he manufactured and put up for sale. For a time no other person had any interest in the business, and throughout all that period he put the article up in round, smooth bottles without panels or raised words or letters of any kind. Others subsequently acquired an interest in the business with him, among whom were his brother and L. H. Bateman, and the person who subsequently joined with him in the conveyance to Carter and Dodge. His son, Moses F. Atwood, had worked with him and Bateman at Georgetown in preparing the medicine under the recipe and knew the ingredients of which it was compounded. He, the son, went to work with Bateman in 1860, and he states that they used a fluted bottle containing the name of the medicine and that of his father and his place of residence blown into it.

2. That large rights in respect to the business remained in Moses Atwood, notwithstanding the interest in the same acquired by others; that January 1, 1848, he entered into a written contract with Moses Carter by which he sold to the latter bills against local agents in many places in Massachusetts, Rhode Island, Connecticut and New York, and the right to sell the medicine in those places under the terms and conditions following: that he, the manufacturer, should not sell the medicine in those places so long as the other party supplied customers there; that he, the proprietor, agreed to make the bitters during ten years for \$17 per barrel, to be delivered in the state where the same were made, three-quarters of the money to be advanced by the other contracting party.

3. Carter and Benjamin S. Dodge, February 2, 1852, formed a copartnership, which, of course, consisted of two parts; but they subsequently took into the firm C. L. Carter, and by interlineations made the articles consist of three parts. They formed the copartnership for making and vending Atwood's vegetable medicines and essences. Enough appears to afford an inference that a prior agreement between Moses Carter and Dodge of the one part and Moses Atwood of the other had been made, as the record shows that Atwood and Bingham and Carter and Dodge, September 29, 1852, entered into a contract to settle doubts and supply omissions in the supposed antecedent agreement, which was not introduced in evidence.

4. By the contract introduced Moses Atwood and his partner conveyed to Carter & Dodge the right to use said Atwood's name on the labels and circulars, and to manufacture and sell "Atwood's Vegetable Jaundice Bitters," and certain other articles, on the ground hereinafter described, and not to sell by themselves or their agents in any other portion of the world, or sell to others to sell, except on the ground hereinafter described. Massachusetts is named,

with numerous excepted towns and parts of towns. Towns and places are also excepted from New York. Seven towns are also excepted from New Hampshire; and all of the state of Maine except the towns of Kittery, South Berwick and Lebanon. Other exceptions are made in the same instrument, not necessary to be noticed in this investigation. Attempt was made to prove by parol the prior agreement referred to in the contract, and with that view reference was made in argument to the cross-examination of Luther F. Carter, who states that there were papers executed to Carter & Dodge, giving them the right to manufacture the bitters, using Moses Atwood's name, but that he knew nothing about the bottle. When asked if those papers came into his possession he answered that he didn't know that they ever did. He was then asked, "If they were ever in your hands, to whom did you deliver them?" and his answer was, "If they were ever in my hands I delivered them to Eli B. Johnson," the record showing that the person named was the agent of the complainants. Taken as a whole, the court is of the opinion that the evidence was not sufficient to admit parol testimony of the contents of the instrument, nor would it benefit the complainants if the rule was otherwise, as the witness states that he does not know that the paper or papers conveyed anything more to Carter & Dodge than the right to put up the medicine and use Atwood's name; nor does the record contain any evidence tending to show that the original proprietor ever gave them the right to sell the medicines in any of the places excepted out of the contract introduced in evidence.

5. That parol evidence was introduced, tending to show that Carter & Dodge owned, at the time of their dissolution of copartnership, all the right in Atwood's Bitters to manufacture and sell the same, except what Atwood had reserved; but there is no evidence that he ever conveyed to them any right to put up or sell the same in the places reserved, nor is there any evidence tending to show how, if ever, he acquired the interest in the same at one time held by his brother and Bateman.

6. Suggestions were made in argument that Moses Atwood, in the year 1855, conveyed to Carter & Dodge, or Carter, Dodge & Co., his entire interest in the business, except his right to sell the medicine beyond Illinois. What a party does not own of course he cannot sell, and that is a sufficient answer to the proposition, so far as respects the interests which had become vested in others; but the supposed sale might apply to some of the excepted places, not to all, as the same witness admits that Carter & Dodge did not own what Mr. Atwood had reserved, but he says that he once saw the agreement last referred to, and, when asked if he had made search for it, stated that he had made diligent search for it among his father's old papers. It was about the time that Carter, Dodge & Co. brought the suit against Bateman that he saw the paper, and he says he has not seen it since that time. According to his statement the paper was from Moses Atwood to Carter, Dodge & Co. Carter & Dodge sued Bateman for putting up and selling the medicine and using the trade-mark, and he prevailed in the suit; and yet no search was made among the papers of Mr. Dodge. For aught that appears to the contrary, it may be among his papers, or in the hands of the attorneys in that suit, or in the files of the clerk's office.

Two objections are taken to the evidence, both of which may be sustained:

First. That sufficient search is not shown to admit it.

Second. That, if it is admitted, it has no tendency to show that the convey-

ance included Maine, or any other of the excepted places; nor does it appear that the grantor re-acquired the interests previously vested in other persons.

Localities almost without number were excepted out of the general grant, and the uncontradicted proof is that the original proprietor made reservations in favor of his father, Levi Atwood, and his brother, Levi F. Atwood, of Maine and part of New Hampshire.

7. Viewed in the light of these suggestions, the court finds that Carter & Dodge never acquired the right to put up and sell the medicine in Maine, or in any of the places excepted out of the grant from the original proprietor, nor did they ever acquire the right or title to any of the same reservations in favor of other parties. Trade-marks are an entirety, and are incapable of exclusive use at different places by more than one independent proprietor, for the reason that the party seeking redress, in order to establish an exclusive right to the trade-mark, must show that he had an exclusive right in the commodity to which it is attached. Upton, Trade-marks, 24; *Canham v. Jones*, 2 Ves. & B., 218. Throughout the largest portion of the period since 1842, Bateman, or his son, who succeeded him, put up and sold Atwood's Bitters in the same town with the original proprietor, and the proofs show that he put the medicine up in half-pint glass bottles, with the words "Atwood's Jaundice Bitters, Moses Atwood, Georgetown, Mass.," blown upon the bottles; that when the proprietor removed, in 1855, he left with Bateman his original recipe for the manufacture of Atwood's Bitters, with all the medicines which he manufactured and sold. Little or nothing was made in the business during the life-time of Bateman, and when he died his son succeeded to and continued in the business until the heirs transferred the same to the complainants. For a few years Carter & Dodge put up and sold the medicine in accordance with the course pursued by the original proprietor, when they took into the firm the son of the senior partner, C. L. Carter, and continued to transact the business, under the name of Carter, Dodge & Co., two or three years longer. When they dissolved and Dodge went out, the new firm, called Carter & Son, consisting of Moses Carter and C. L. Carter, took control of the business, and they continued the same for about five years. Subsequently another son of the senior partner joined the firm, and they continued the business for two or three years under the firm name of Carter & Sons. Lastly the father and the elder son went out, and Luther F. Carter took the firm name of Carter & Son, and continued the business until he sold to the complainants. After Carter & Dodge dissolved in 1855, Dodge went to Rowley, and put up and sold the medicine there for five years, using the Atwood labels. On the 4th of September, 1867, he sold and conveyed the right to manufacture and sell Atwood's Bitters to William B. Dorman for the term of five years from the date of the agreement, with the right to use the trade-marks he had previously used in the sale of the same. Before that period expired the same party sold the same right to Noyes & Manning, now of Mystic, Conn., with authority to use the same labels.

8. That Carter & Son had two kinds of labels used on the bottles which they put up for sale. On the top of one of the labels the words "Carter's are the only genuine" were printed, and below the directions the words "Manufactured by M. Carter & Son, successors to Moses Atwood, Georgetown, Mass.," were also printed. At the bottom of the label were also printed the words "Caution.—Observe that our name is blown in the bottle and on the

revenue stamp. None others are genuine." The label also bore the words "Atwood's Vegetable Physical Jaundice Bitters." Two kinds of bitters were put up at their place. One kind, under the label described, which was the genuine "Atwood's Vegetable Physical Jaundice Bitters," sold in the market at wholesale for \$27 per gross; the other kind was an inferior article, an imitation of the genuine, sold in the market at \$15 per gross, bearing the genuine original label of Atwood's Bitters, with the "e" left out in the word "the," preceding the words "United States." Carter's traveling agents never sold any but the genuine article, the imitation being disposed of by Carter alone. In most instances the two kinds were retailed at the same price; but when both kinds were known the genuine brought a higher price.

9. That Bateman had the original recipe, and that Moses F. Atwood, the son of the original proprietor, when in the employment of Bateman as a selling agent, sold the recipe for compounding and preparing the Atwood Bitters in the state of Maine to Nathan Wood, in 1861. When asked whether the conveyance was in writing, he said it was, and that each party had a copy, and that he sold to the respondent the right to manufacture the bitters and sell the same in the state of Maine and elsewhere. Proof that the grantor had authority from the actual proprietor to execute the conveyance is not shown in the record; but it is shown that the purchaser, with his partner, has continued to prepare, put up and sell the medicine from the date of the purchase of the recipe to the date of the bill of complaint, without hindrance or interruption, with the exception of the two instances mentioned in the second answer, since the organization of the complainant corporation. None of the grantors of the complainants ever disputed their right to compound, put up and sell the bitters in question, nor is there any evidence tending to show that the bitters which they sold were not the genuine Atwood Bitters. Their grantor possessed the genuine recipe, and the proofs are full to the point that it was the genuine recipe which he sold to the respondent, Nathan Wood. Beyond all doubt the respondent, Nathan Wood, acquired the recipe, which, not being the subject of a patent, might lawfully be used by any one who possessed the secret; and it is equally certain that he supposed that he had acquired the right to use the labels, as he purchased the right to use the same of the son of the original proprietor, and of the selling agent of Bateman, whose title to put up the medicine and use the labels was subsequently established by judicial determination.

10. Unlike what is usual in controversies respecting trade-marks, the complainants in this case, instead of using a trade-mark of their own adoption, allege and attempt to prove that the trade-mark in question was adopted by the original proprietor of the medicine, and that they have acquired the title to the same by certain mesne conveyances set forth in the record; and the court finds upon that subject as follows:

1. That they, or their predecessors, January 1, 1875, acquired, by assignment, whatever right in the same belonged to the heirs and representatives of L. H. Bateman.

2. Also, March 18th, in the same year, whatever right belonged to the firm of Noyes & Manning.

3. Also, March 30th, in the same year, whatever right belonged to Benjamin C. Dodge.

4. Also, March 30th, in the same year, whatever right belonged to William B. Dorman.

5. Also, April 12th and 19th, in the same year, whatever right belonged to the Carters in the said trade-mark.

None of these instruments of conveyance, however, convey, or profess to convey, any greater rights to the complainants than those which were previously held by Carter & Dodge; and it is clear that Carter & Dodge never acquired from the original proprietor any right to put up or sell the medicine in Maine, or to use the labels of the original proprietor in that state, out of the three towns specified in the written agreement, which constitutes the evidence of their title.

§ 551. *Conclusions from the findings.*

Nothing remains to be done in the case of much importance, except to state the conclusions of law and fact resulting from the findings of the court:

1. Examined in the light of the findings, as the case must be, it is clear to a demonstration that the complainants have no exclusive right to put up and sell the medicine, nor any exclusive right or title to the labels, which belonged to the original proprietor.

2. That all they claim in respect either to the medicine or the labels is the right to the same which was held by Carter & Dodge, who never possessed the right to put up the medicine or to use the labels in any part of Maine, except the three towns named in the said written agreement.

3. That the rights of certain of the assignors of the complainants, if any they ever had, were forfeited long before the supposed transfer under which the complainants claim, by the use of the trade-mark as a means of misrepresentation and deception to the public, by putting up a spurious article, and using the genuine trade-mark to promote the sale of the spurious article. Misrepresentation and deceit of the kind divest the guilty party of all title to the same, and it follows that a party who has forfeited his property in the same cannot convey any title to another. *Phalon v. Wright*, Am. Tr. Cas., 311; *Same Case*, 5 Phil., 464; *Perry v. Truefitt*, 6 Beav., 66; *Pidding v. How*, 8 Sim., 477; *Hobbs v. Francais*, 19 How. Pr., 567; *Partridge v. Menck*, 1 How. App. Cas., 547; *Fetridge v. Wells*, 4 Abb. Pr., 144; *Flavell v. Harrison*, 19 Eng. L. & Eq., 15. Equity will not decree for an account of past gains and profits where there has been laches in bringing the suit and long acquiescence in the use of the trade-mark by others, and especially not where the acquiescence covers a period of fourteen years. *McLean v. Fleming*, 6 Otto, 245 (§§ 431-40, *supra*); *Harrison v. Taylor*, 11 Jur. (N. S.), 408; *Moet v. Couston*, 10 L. T. R. (N. S.); *Edelsten v. Edelsten*, 1 De G., J. & S., 185; *Estcourt v. Estcourt*, 1 L. R., 10 Ch., 276.

4. That the assignors of the complainants forfeited all their property, if any, in the trade-mark belonging to the original proprietor, by a disregard, among themselves, of their several allotted districts, after the grant or license from the original proprietor, by trespassing upon each other, and misuse of the trade-mark.

5. That the grantees or licensees of the original proprietor, and their successors, forfeited the right to the original trade-mark of their grantor or licensor by the voluntary relinquishment of the bottle, label and directions, which he used before the transfer, and by the adoption of new and different labels, etc., of their own substitution, one or more of whom put up and sold a spurious article of medicine under the genuine label, and used a different label of his own invention on bottles containing the genuine medicine. Cases arise where the title is complete, when a party, though not entitled to a decree for

an account, may still be entitled to a decree to prevent future infringements; but the difficulty in the way of the complainants in this case is incurable, as the evidence shows that the respondents have the genuine recipe, which is not protected by any patent, and the complainants have not any exclusive right to the use of the label, and no right at all to the use of it in the state of Maine. Bill of complaint dismissed, with costs.

FILKINS *v.* BLACKMAN.

(Circuit Court for Connecticut: 13 Blatchford, 440-447. 1876.)

Opinion by SHIPMAN, J.

STATEMENT OF FACTS.—In the bill in equity which was originally filed by the plaintiffs, they averred that they were residents of the city of Albany, and citizens of the state of New York, and were, as copartners, manufacturers and dealers in proprietary medicines; that they had long manufactured and sold a well-known article of medicine, called “Dr. J. Blackman’s Genuine Healing Balsam,” which had gone into extensive use, and obtained a high reputation; that they had acquired an exclusive right to the use of that name as a trade-mark, and had also a right to the use of certain labels, which had been devised by one of the plaintiffs, upon the bottles containing the medicine; and that the defendant, a resident and citizen of Danbury, in Connecticut, was using upon bottles of medicine of his own manufacture, said trade-mark, and labels which were close imitations of the plaintiffs’ labels. The bill prayed for an injunction. Upon the hearing of a motion for preliminary injunction, the plaintiffs asked and obtained leave to amend their bill, by the averment that, on October 14, 1875, they deposited in the patent office, for registration, a label, of which the following is the title, viz., “Dr. J. Blackman’s Genuine Healing Balsam,” the right to the use of which they claimed as sole proprietors, and that said trade-mark was then duly registered in the patent office, and a certificate thereof was duly issued to the plaintiffs. The motion was tried upon the affidavits which were presented by the parties, no answer having been filed at the time of said hearing. The affidavits of the defendant deny the right of the plaintiffs to any exclusive use of such name or title, and assert the right of the defendant to manufacture said medicine, and to use said name, and assert that the plaintiffs do not manufacture the medicine according to the original formula, and have abandoned the use of the name “J. Blackman” in their trade-mark.

From the affidavits which are on file, it appears that Jonas Blackman is the father-in-law of Morgan L. Filkins, one of the plaintiffs, and was, about the year 1840, the inventor of the article which was called, at the time of the discovery, “Dr. J. Blackman’s Genuine Healing Balsam.” It was at first sold under said name from house to house, until Dr. Filkins made a contract with Dr. Blackman, by which the former obtained a right to manufacture, or assist in the manufacture and sale of, said medicine. He subsequently entered into the business somewhat extensively, and placed the medicine upon the market. Two or three contracts were made between these parties, which expired by lapse of time or by mutual agreement. The final contract was as follows: “This agreement made and entered into this 28th day of November, A. D. 1865, between Jonas Blackman, of the town of Brookfield, and county of Fairfield, state of Connecticut, of the first part, and Morgan L. Filkins, of the city and county of Albany, and state of New York, of the second part, wit-

nesseth, that, in consideration of the covenants and agreements hereinafter contained, to be performed by the party of the second part, the said party of the first part hereby sells and conveys unto the said party of the second part, his heirs or assigns, the exclusive right to use his name in the manufacture, putting up and sale of certain medicines, known as Dr. J. Blackman's Genuine Healing Balsam, Dr. J. Blackman's Valuable Red Salve, and Dr. J. Blackman's Valuable Strengthening Plasters, for the term of ten years from the 1st day of January, A. D. 1866; and the party of the first part hereby agrees not to manufacture, or cause to be manufactured, either himself or by his agents, or authorize any other person or persons to use his name in the manufacture of, said medicines, or any other medicine recommended to cure diseases said medicines are said to cure; and the party of the second part agrees, in consideration of the covenants and agreements hereinbefore stated, to pay unto the party of the first part, or his assigns, the sum of \$365 annually, lawful money, at Brookfield, in the state of Connecticut, in manner following, to wit: \$91.25 on the first day of each of the following months of April, July, October and January of each year, up to and including the 1st day of January, A. D. 1876; and it is further agreed by the party of the first part, provided always that the party of the second part does well and truly perform the covenants and agreements to be by him kept and performed for the full term of ten years from the 1st day of January, A. D. 1866, thereafter the party of the first part gives and grants to the party of the second part all of the rights and privileges to use his name in the manufacture, putting up and sale of said medicines, without fee or reward to the party of the first part, his heirs or assigns, for the full term of fifty years or more; and it is mutually agreed by and between the parties to these presents, that in case either party shall fail to perform the covenants and agreements by such party to be kept and performed, the party so failing to perform shall pay unto the other party the sum of \$50,000, which sum of \$50,000 the parties hereto have agreed to fix and liquidate as the damages in case of non-performance."

The medicine has become well known, mainly through the efforts of Dr. Filkins to introduce it to the public, has quite a large sale among druggists, and has been a source of profit. It is now made by the plaintiffs substantially according to the original formula which was furnished by Dr. Blackman, and the plaintiffs have never abandoned the use of the original name. The name of the inventor, "J. Blackman," is the distinctive part of the name or title of the medicine, and gives to the title its peculiar value. Newton M. Blackman, who is the son of Jonas Blackman, has engaged in the manufacture of the same medicine, which is put up in bottles encircled with labels closely resembling those which are used by the plaintiffs, and containing the same title or name—"Dr. J. Blackman's Genuine Healing Balsam." The defendant states, in his affidavit, that his father has sold him the formula, and the right to manufacture the medicine, and to use the father's name.

The question in the case is, whether or not the plaintiffs now have a clear and exclusive continuing right, under the contract which was entered into between Jonas Blackman and Morgan L. Filkins, to the use of the name which was originally given to the medicine by the inventor, and whether or not, therefore, the plaintiffs held the right, at the time of the registration of the trade-mark, to its exclusive use after January 1, 1876.

§ 552. *General principles as to assignment of trade-marks.*

The following general principles in regard to the assignment of the exclu-

sive use of trade-marks are applicable to this case. The name "Dr. J. Blackman's Genuine Healing Balsam," which was originally given to the medicine by the inventor, "points out distinctly the origin or ownership of the article to which it is affixed," and the words "were appropriated as designating the true origin or ownership of the article or fabric to which they are attached." *Canal Co. v. Clark*, 13 Wall., 311 (§§ 453-56, *supra*). The name, as a whole, was his trade-mark, which he had the exclusive right to use, and the exclusive use of which would pass by assignment to any one who had lawfully obtained from the inventor the exclusive right, also, to manufacture and sell, and who did sell, that particular article compounded according to the original formula. "The property or right to a trade-mark may pass, by an assignment, or by operation of law, to any one who takes, at the same time, the right to manufacture or sell the particular merchandise to which said trade-mark has been attached. As a mere abstract right, having no reference to any particular person or property, it is conceded that it cannot exist, and so cannot pass by an assignment or descend to a man's legal representatives." *Dixon Crucible Co. v. Guggenheim*, Am. Trade-mark Cases, 559. If the assignee should make a different article he would not derive, by purchase from Jonas Blackman, a right, which a court of equity would enforce, to use the name which the inventor had given to his own article, because such a use of the name would deceive the public. The right to the use of a trade-mark cannot be so enjoyed by an assignee that he shall have the right to affix the mark to goods differing in character or species from the article to which it was originally attached. It is not, however, necessary that an article to which a trade-mark, personal in its inception, was originally affixed, should always be manufactured at the same place where it was originally made. This particular trade-mark, being the name of the inventor, was personal to Dr. Blackman in its inception, but has been permitted by him to be applied and to be appropriated to the same article when manufactured by Filkins Bros.

§ 553. *The rights of an assignee, and upon what they are founded.*

Under the circumstances in which the medicine has been manufactured and sold, the use of the trade-mark does not imply that the medicine was manufactured by Jonas Blackman, but that it is the same article which he originally invented and manufactured. *Bury v. Bedford*, 10 Jurist (N. S.), part 1, 503; *Leather Cloth Co. v. American Cloth Co.*, 11 Jurist (N. S.), part 1, 513. It is also to be noticed, that an assignee of a trade-mark does not obtain a right to restrain copyists of his mark, merely by virtue of his assignment, but he must also show that it has actually been used and applied upon an article, so that the public have come to understand that "the article to which it is attached is the manufacture or production which is generally known in market under that denomination." *Walton v. Crowley*, 3 Blatch., 440.

§ 554. *Construction of an agreement for the use of a trade-mark.*

In this case, an agreement was made on November 28, 1865, between Jonas Blackman and Morgan L. Filkins, by which, in consideration of the agreement of the latter to pay specified royalties, Blackman sold and conveyed to Filkins, his heirs or assigns, the exclusive right to use the name of the inventor, in the manufacture and sale of certain medicines, for the term of ten years from January 1, 1866. Blackman further agreed not to manufacture, or cause to be manufactured, and not to authorize any person to use his name in the manufacture of, said medicines; and, in case the said Filkins performed his

covenants for the term of ten years, Blackman further granted "all of the rights and privileges to use his name in the manufacture, putting up and sale of said medicines, without fee or reward, for the term of fifty years or more." There is no question that an exclusive right was granted for the ten years ending January 1, 1876; but it is claimed that thereafter a bare right or privilege was granted, in common with Jonas Blackman, to use his name and to manufacture said medicines. The determination of this question depends upon the construction which shall be given to the grant of "all of the rights and privileges to use my name." An exclusive right had been given for ten years, upon the payment of royalty, and thereafter, "all of the rights and privileges" to use the name of the grantor were given, without royalty, for the term of fifty years. The terms "an exclusive privilege," and "all of the rights and privileges," as used in this contract, are synonymous, and by the words "all of the rights and privileges" are meant all the rights, or the entire right, which the grantor had at the expiration of the term of ten years. Each word in the phrase "all of the rights" is to have the force which naturally belongs to such word, and by construing the words to mean a conveyance of a bare right, the same effect is given to the language as if it had been "I convey the right, or a right, to use my name," which construction leaves the word "all" without any significance. If the grantor retained the right in common with Filkins to use the name of the inventor, he did not convey all of his rights, but retained as much as he granted. The grantor intended to convey, in a certain contingency, all the rights, for fifty years, which he had previously conveyed for the term of ten years. If the same language which is used in this entire contract had been used in an assignment of a patent or of a copyright, although it is true that "property in a trade-mark, or in the use of a trade-mark, has very little analogy to that which exists in copyrights or in patents for inventions" (Canal Co. v. Clark, 13 Wall., 311), the assignment would, it is believed, convey the exclusive right for a specified term. The grant is unlike a grant of an easement, for there the title to the land is retained, and in this case the grantor parts with his entire right to the thing which is the subject-matter of the conveyance — the use of the trade-mark. I am of opinion that Filkins obtained, by the contract, an exclusive right to use this name in the manufacture of the medicine, for the term of fifty years from January 1, 1876.

§ 555. *The trade-mark of one partner used in the partnership business becomes part of the partnership property.*

The contract was made by Blackman with Morgan L. Filkins alone, and it is suggested that, inasmuch as the bill is brought by Filkins Brothers, and as Welcome L. Filkins was not a party to the contract, or to the grant, the firm has no legal right to the use of the mark. When a partnership is formed in regard to the manufacture of the article to which the trade-mark is properly applied, "the trade-mark of one partner, in the absence of special regulations, becomes part of the partnership property." *Bury v. Bedford*, 10 Jurist (N. S.), part 1, 503.

In regard to the propriety of granting a preliminary injunction, it is obvious that the plaintiffs have expended a good deal of money in advertising and in bringing this medicine into public use. They have made its manufacture profitable, and have invested their property in the business. The defendant has but recently, and not extensively, engaged in the manufacture, but is seeking to take advantage of the reputation which the efforts of others have given

to the article. The contest between the parties is plainly the result of a family quarrel, in which, I think, the defendant is seeking to obtain a position to which the previous contract and business relations between his father and brother-in-law have given him no right.

Let a preliminary injunction issue restraining the defendant from the use of the trade-mark "Dr. J. Blackman's Genuine Healing Balsam," and from the use of any label containing that name, or the name of Dr. J. Blackman.

§ 556. *Non-user*.—The right to use a trade-mark may be lost by a non-user for eight or nine years, and when lost it cannot be resumed if in the meantime another person has acquired the right to use it. *Blackwell v. Dibrell*, 3 Hughes, 151; 17 Am. L. Rep. (N. S.), 516 (§§ 457-459).

§ 557. *Assignee*.—To entitle a purchaser or assignee of a trade-mark to be protected he must, in the use thereof, indicate that he is such assignee or purchaser. *Stachelberg v. Ponce*,* 23 Fed. R., 430.

§ 558. *Abandonment by original owner*.—A person who improperly appropriates the trade-mark of another does not get a title to such trade-mark and an exclusive right to use the same on its abandonment by the original proprietor, and this may be set up by a third party in defense of a suit by the appropriator for an infringement. *O'Rourke v. Central City Soap Co.*,* 26 Fed. R., 576.

§ 559. *No written assignment*.—Persons who have used a trade-mark for many years are entitled to an injunction as against a person wrongfully using such trade-mark, though no written assignment to them by the original proprietor, who was formerly their partner, is shown. *Hostetter v. Vowinkle*,* 1 Dill., 329.

§ 560. *Partners*.—In the absence of express stipulation at the time of the dissolution of a partnership each partner may continue to use the trade-mark of the firm. The right does not pass inferentially under a general assignment, but, like a person's skill in any pursuit, remains in him. *Young v. Jones*,* 3 Hughes, 274.

§ 561. Where a name of an article has been adopted by two persons who are engaged in the business of making and selling it, that name, when they dissolve their business connection, may be used by each; and the fact that one, without the knowledge of the other, has procured the name to be registered as a trade-mark, representing that no one else had any interest therein, gives him no exclusive right. *Taylor v. Bothin*,* 5 Saw., 584; 8 Rep., 516.

§ 562. *Sale of business*.—A person may lawfully assign and sell not only a trade-mark indicative of origin in himself, but even the right to use his own name in connection with a particular business, and the assignee will thereby become entitled to the exclusive use of the trade-mark, even as against the assignor. So the assignee of the business of manufacturing a certain kind of yeast and trade-mark of "Twin Brothers" may use that trade-mark exclusively, even as against one of the Twin Brothers who sought to use the term in connection with his own yeast. *Burton v. Stratton*, 12 Fed. R., 696; 28 Int. Rev. Rec., 321; 14 Rep., 421 (§§ 445-52).

§ 563. The firm of Probasco & Oakes, manufacturers of candies, adopted the name "Excelsior" for their candies, but finding that name unsuitable used the word "Oakes," calling their candies "Oakes' Candies." Oakes sold out the business, including the right to use the name, to his partner, who devised a trade-mark for his candies consisting of two oaks and certain words. Probasco sold to H., who in turn sold to S. *He'd*, that as the word Oakes was not adopted because the candies were made by Oakes, and was not understood by the public as indicating that Oakes was the manufacturer, its use by other persons was not calculated to deceive the public, and, consequently, it might be transferred to and used by Probasco and his successors. *Oakes v. Tousmierre*,* 4 Woods, 547.

§ 564. The right to the exclusive use of a word or symbol as a trade-mark is inseparable from the right to make and sell the commodity which it has been appropriated to designate as the production or article of the proprietor. It may be abandoned if the business of the proprietor is abandoned. It may become identified with the establishment where the article is manufactured or sold, to which it has been applied so as to designate and characterize the article as the production of that place or establishment rather than of the proprietor. Such a trade-mark would seem to be an incident to the business of the establishment to which it owes its origin, and without which it can have no independent existence, and will be deemed to pass with the transfer of the business, because such an implication is consistent with the character of the transaction and the presumed intent of the parties. So the word "Champion," which was applied to a brand of flour produced at a certain mill, by the originator and successive owners of the same mill, was held to be entitled to protection as the trade-mark of the owner of the mill, though he held no written assignment of the right to use such word from the originator. *Atlantic Milling Co. v. Robinson*,* 20 Fed. R., 217.

VI. INFRINGEMENT.

§ 565. **Intent.**—It seems that an infringement of a trade-mark will be restrained though there is no fraudulent intent on the part of the infringer. *Coffeen v. Brunton*,* 4 McL., 516; 7 West. L. J., 59.

§ 566. Positive proof of a fraudulent intent is not required where the proof of the infringement is clear, in order to entitle the proprietor of a trade-mark to relief. *McLean v. Fleming*, 6 Otto, 245; 10 Ch. Leg. N., 252 (§§ 431-40).

§ 567. **In cases of nicety and doubt** as regards the use of a device as a trade-mark, the alleged infringement will not be enjoined. *Kinney v. Allen*, 1 Hughes, 106; 4 Am. L. T. (N. S.), 258 (§§ 468-69).

§ 568. **Who liable.**—If goods are put up by a manufacturer in such a way as to infringe a trade-mark, the fact that they are thus put up according to orders of the persons for whom they are manufactured will not relieve him from liability for the infringement. *Sawyer v. Kellogg*, 7 Fed. R., 720; 19 O. G., 1627; 12 Rep., 228 (§ 442).

§ 569. One who prepares and puts up an article for another, in such a manner as to infringe an established trade-mark, is liable to the proprietor of the trade-mark, and will be compelled to account for the profits and damages. *Sawyer v. Kellogg*,* 9 Fed. R., 601.

§ 570. **Wrappers and labels.**—Upon a consideration of the evidence, it was held that a certain wrapper for stove-polish, in use by the complainant, was afterwards imitated and used by the defendant, and such use was enjoined and an accounting decreed, the only question in the case being as to priority in the use of the wrapper in question. *Joseph Dixon Crucible Co. v. Benham*,* 4 Fed. R., 527.

§ 571. Where a particular form and character of label has become known and recognized by dealers and the public as designating articles produced by a given person, the use of a label by another person, which is hardly distinguishable from the other, unless they are placed side by side, and which is calculated to lead the public and purchasers to suppose they are getting the articles produced by the first person, will be enjoined. *Landreth v. Landreth*,* 22 Fed. R., 41.

§ 572. Similarity of style and color of label, and of size, shape and color of packages, and the notice and directions for use, does not constitute an infringement when the article is naturally packed in such a shape, and the packages contain the quantity usually purchased, and the label contains printed matter entirely and distinctly different. *Frese v. Bachoff*,* 13 Blatch., 234.

§ 573. Although a package and label do not technically constitute a trade-mark, their use or imitation by another, in such a way as to mislead purchasers, will be enjoined, and the infringer will be required to respond in damages. *Sawyer v. Horn*,* 1 Fed. R., 24.

§ 574. The use of a label for goods will be enjoined when it appears that such label is calculated to lead purchasers to suppose that they are buying a known article upon which a similar and well-known label has for some time previously been used. *Shaw Stocking Co. v. Mack*,* 12 Fed. R., 707; 28 Int. Rev. Rec., 320; 21 Blatch., 1.

§ 575. A person will be enjoined from putting up a medicine of a particular kind, with bottles and labels in imitation of those of an established and well known manufacturer, if such imitation is such that an ordinary observer or purchaser would be deceived. *Hostetter v. Adams*,* 10 Fed. R., 838; 20 Blatch., 326; 22 O. G., 943; 13 Rep., 454.

§ 576. The use of labels, directions, advertisements or hand-bills, or parts thereof, by means of which it is represented to the public that a certain liniment is equal to another liniment of established reputation, and which leads the public to suppose that it contains the same ingredients as the other, will be enjoined. *Coffeen v. Brunton*,* 4 McL., 516; 7 West. L. J., 59.

§ 577. The distinguishing and prominent part of a label of smoking tobacco cannot be adopted by another manufacturer and applied either to smoking tobacco or cigarettes, though the rest of the label is different. *Carroll v. Ertheiler*,* 1 Fed. R., 688; 28 Int. Rev. Rec., 133; 9 Rep., 737.

§ 578. Where a manufacturer has employed a peculiar and distinctive label to designate his goods, and has so used it that his goods are identified by it, a court of equity will restrain another party from adopting and using one so similar that its use is likely to lead to confusion by purchasers exercising the ordinary degree of caution which purchasers are in the habit of exercising with respect to such goods. *Anheuser-Busch Brewing Ass'n v. Clarke*,* 26 Fed. R., 410.

§ 579. The printing and selling of labels in imitation of a valid trade-mark, with the intention to enable others to palm off their goods on the public by the use of such labels as those of the owners of the trade-mark, will be enjoined. *De Kuyper v. Witteman*,* 23 Fed. R., 871.

§ 580. Equity will enjoin the use of a label upon spurious medicine which is calculated to

deceive the public to the injury of the owner of the genuine medicine. *Scoville v. Toland*,* 6 West. L. J., 84.

§ 581. Though a complainant may not be entitled to a trade-mark in a name applied by him to a compound manufactured by him, yet he will be protected from the imitation of his packages so far as they are peculiarly designed and shaped for the purpose of distinguishing his goods, and from the imitation in color, design, style and lettering combined, of the labels of such packages. *Carbolic Soap Co. v. Thompson*,* 25 Fed. R., 625.

§ 582. A firm had for a long time been accustomed to put up a certain compound in packages of a peculiar shape, and with labels of such colors and styles that their compound became known by such form and labels, and another person used the same form and labels for the same compound put up by him. He afterwards discontinued the use of the firm name and location, and substituted his own, but made no further changes. *Held*, that he was liable for an infringement of the trade-mark of the firm. *Frese v. Bachof*,* 14 Blatch., 432.

§ 583. Imitations calculated to deceive.—A person has no right to imitate the trade-mark of another by copying from it prominent and distinguishing words which are well calculated to deceive even the cautious and careful purchaser. *United States v. Roche*,* 1 McC., 385.

§ 584. A court of equity will, at the suit of the owner of a trade-mark, enjoin the use of a device which has such a similarity to the trade-mark as would deceive the ordinary purchaser. Actual intention to deceive purchasers is not necessary, but will be inferred from the fact of similarity. *Liggett, etc., Tobacco Co. v. Hynes*,* 20 Fed. R., 883.

§ 585. A device which is not calculated to mislead purchasers as to the origin of the goods to which it is attached is not an infringement of a trade-mark. *Manufacturing Co. v. Trainer*, 11 Otto, 51 (§§ 464-67).

§ 586. No person can adopt or use a trade-mark so resembling that of another that ordinary purchasers buying with ordinary caution would be likely to be misled. *Manhattan Medicine Co. v. Wood*, 4 Cliff., 461; 14 O. G., 519 (§§ 550-51).

§ 587. It is not necessary, in order to constitute an infringement of a trade-mark, that it be copied in every particular. It is sufficient if it is copied to an extent calculated to deceive purchasers. *Atlantic Milling Co. v. Robinson*,* 20 Fed. R., 217.

§ 588. If, by representation, an article be so assimilated as to be taken in market for an article of established manufacture, or compound of another, the injured person is entitled to an injunction. *Coffeen v. Brunton*,* 5 McL., 256.

§ 589. To enable the proprietor of a trade-mark to relief against an illegal appropriation, it is not necessary that the imitation be so close as to deceive persons seeing the two marks side by side. It is sufficient if there is such a degree of resemblance that ordinary purchasers using ordinary caution are likely to be deceived. But the question whether the defendant has colorably imitated the complainant's trade-mark is not to be solved by merely considering the resemblance between the words themselves, and where the defendant has artfully garbed and draped the word used by him, and bearing a close resemblance to the complainant's word, so that the difference is rendered less distinguishable, that fact will be considered. *Glen Cove Mfg. Co. v. Ludeling*,* 22 Fed. R., 823.

§ 590. Exact similitude is not required to constitute an infringement of a trade-mark. If the form, marks, contents, words, or the special arrangement of the same, or the general appearance of the alleged infringer's device, is such as would be likely to mislead one in the ordinary course of purchasing the goods and induce him to believe that he was purchasing the genuine article, then there is an infringement. *McLean v. Fleming*, 6 Otto, 245; 10 Ch. Leg. N., 252 (§§ 431-40).

§ 591. In order to constitute an infringement of a trade-mark it is not necessary that the imitation should amount to a forgery or be so close as to deceive a wholesale dealer. It is sufficient if it is calculated to deceive the unpracticed and unwary customer. *Blackwell v. Armistead*,* 3 Hughes, 163.

§ 592. The imitation of an established trade-mark will be enjoined though it is not exactly copied in every particular. It is enough that the representations employed bear such a resemblance to the genuine as to be calculated to deceive the public and make the articles to which it is affixed pass for the genuine. *Walton v. Crowley*,* 3 Blatch., 440.

§ 593. To entitle the proprietor of a trade-mark to relief, or to establish a case of infringement, it is not necessary to show that the imitation is exact in all particulars. If the resemblance is such as not only to plainly suggest an intention to deceive, but is calculated to mislead the public and thus injure the sale of the goods of the proprietor of the original device, the injured party is entitled to redress. So where a dealer in medicines put up and sold medicines called "Humphreys' Homeopathic Specifics," and numbered serially from 1 to 35, each number being designated as for use in a certain class of diseases, and the medicines came to be known and ordered by number, it was held to be an infringement for another dealer to put up medicines in similarly shaped bottles labeled Reeve's Improved Homeopathic Specifics,

and numbered serially from 1 to 40, so far as the numbers used by the latter to indicate remedies for certain diseases corresponded with the numbers used by the former for the same diseases. *Humphrey's Specific Homeopathic Medicine Co. v. Wenz*,* 14 Fed. R., 250; 15 Rep., 70.

§ 594. **Instances of infringement.**—The use of “Holsteter & Smythe” in place of “Hostetter & Smith,” and a substitution of Pittsburg for New York as the place of manufacture, retaining an exact imitation of label, devices, bottles and mode of packing, *held* an infringement. *Hostetter v. Vowinkle*,* 1 Dill., 329.

§ 595. Though the words “Coral Baking Powder” are not in themselves an infringement of the words “Royal Baking Powder,” yet their use in connection with cans and labels of the same general appearance as those used by the manufacturers of the latter article will be enjoined. *Carbolic Soap Co. v. Thompson*,* 26 Fed. R., 293.

§ 596. A trade-mark exclusively applied to dry white oxide of zinc is not infringed by the manufacture and sale of a paint containing white oxide of zinc ground in oil, though it is falsely represented that the oxide used is that made by the proprietor of the trade-mark. *La Société, etc., v. Baxter*,* 14 Blatch., 261.

§ 597. The plaintiff's trade-mark, consisting of the words “Lone Jack” in connection with other words and devices, and used on smoking tobacco, *held* infringed by the application of the words “Lone Jack” to packages of cigarettes, though the accompanying devices were different. *Carroll v. Ertheiler*,* 1 Fed. R., 688; 28 Int. Rev. Rec., 133; 9 Rep., 737.

§ 598. The use on packages of Hamburg tea of the name “J. C. Frese & Co.,” and the trade-mark or label “J. C. Frese & Co., Hopfensack, 6, Hamburg,” enjoined. *Frese v. Bachof*,* 13 Blatch., 234.

§ 599. Where a trade-mark consists of a combination of a picture, a monogram and certain words, there is no infringement unless the whole combination is used. *Tucker Mfg. Co. v. Boyington*,* 9 O. G., 455.

§ 600. A registered trade-mark for plug tobacco, consisting of a line printed or stamped on the plug, dividing it longitudinally into two equal parts, with lines crossing it at right angles at equal distances, as guides for cutting or dividing it into equal pieces, is not infringed by stamping a series of Greek crosses along the center of the plugs, with a series of half crosses along the margin opposite as guides for dividing it, as every manufacturer has a right to indicate on his goods suitable points or lines of division. *Dousman, etc., Tobacco Co. v. Ruffner*,* 15 O. G., 559.

§ 601. The use on labels and bottles of the word “Appolinis,” in connection with a bow and arrow and anchor, was restrained on account of their similarity to the word “Apollinaris” and the representation of an anchor, previously used by the plaintiffs, and because it appeared designed and calculated to deceive the purchasers and consumers of the waters thus marked into the belief that they were buying the waters of the plaintiff. But the allowance of such injunction was made conditional upon the plaintiff's executing a bond to the defendant to pay all damages sustained by the defendant if it should finally be determined that the plaintiff was not entitled to the injunction. *Actien-Gesellschaft Apollinaris Brunnen v. Somborn*,* 14 Blatch., 380.

§ 602. The complainant, who had used for some years the word “Maiziena,” and a representation of Indians cultivating corn and preparing flour, as a label for packages of corn flour put up by him for sale, registered the same under the act of congress of March 3, 1881. The defendants afterward adopted the word “Maizharina,” accompanied by a picture of a man carrying a quantity of maize in his arms, and registered them. The form, size, color and other characteristics of the packages put up by the defendants were the same as those put up by the complainant, and it appeared that the defendants colorably imitated the label and style of the packages of the complainant to such an extent as to be likely to deceive purchasers. *Held*, that the use by the defendants of the complainant's trade-mark would be enjoined. *Glen Cove Mfg. Co. v. Ludeling*,* 22 Fed. R., 823.

§ 603. A manufacturer of plug tobacco had used a star impressed on each plug as a trade-mark. *Held*, that the use of a somewhat similar though not identical device by another party on plug tobacco made in the same shape and size, and of the same appearance, would be enjoined where such device so used was calculated to deceive a purchaser of such tobacco into the belief that he was buying the genuine. *Liggett, etc., Tobacco Co. v. Hynes*,* 20 Fed. R., 883.

§ 604. Landreth & Co. adopted the name “Landreth's Extra Early Peas” for certain peas sold by them. The defendant, by the same name, afterwards commenced to sell what he called “Landreth's Extra Early Peas.” *Held*, that it did not appear that he had not the right to use the same words, provided he did so in such a manner as to inform the public that the peas to which he affixed such label were his own growth and production. But the use of a label substantially the same as the plaintiffs', and calculated to deceive purchasers into the

belief that they were buying the plaintiffs' peas, was enjoined. *Landreth v. Landreth*,* 23 Fed. R., 41.

§ 605. The plaintiffs, who possessed the exclusive right to use the words "Dr. J. Hostetter's Stomach Bitters" in connection with certain bottles, labels and devices, alleged that the defendants were making and selling an extract which would produce an imitation of their bitters, which they were disposing of to persons who would put the compound into the plaintiffs' bottles and sell it as genuine. *Held*, that, as it did not appear that the defendants were doing more than selling the extract with directions for its use, such sale would not be enjoined. *Hostetter v. Fries*,* 21 Blatch., 339; 17 Fed. R., 620; 16 Rep., 6.

VII. SUITS FOR INFRINGEMENT.

§ 606. **Jurisdiction.**—Where the parties are citizens of the same state a federal court has no jurisdiction of a suit for an infringement of a trade-mark, unless such trade-mark is used by the defendants in foreign commerce. *Schumacher v. Schwencke*,* 26 Fed. R., 818.

§ 607. Courts of the United States have jurisdiction to enjoin the unauthorized use of trade-marks registered according to the act of congress of July 8, 1870, irrespective of the citizenship of the parties. *Duwel v. Bohmer*,* 14 O. G., 270.

§ 608. **Parties.**—Where a suit for an infringement of a copyright is brought in a firm name by a person representing himself to be sole partner, and it appears that there is another member, he may be brought in by amendment if the suit is a meritorious one. *Frese v. Bachof*,* 14 Blatch., 432.

§ 609. The person for whom goods are manufactured has the same legal right to affix and maintain a special trade-mark as the manufacturer himself, and he need not join the manufacturer in a suit against an infringer. *Walton v. Crowley*,* 3 Blatch., 440.

§ 610. **Evidence.**—In an action to recover damages for the unlawful use of a trade-mark, evidence may be given of the sales of goods bearing such trade-mark on any day under a count charging such sales on a certain day and on divers days between that time and the commencement of the action. *Taylor v. Carpenter*,* 2 Woodb. & M., 1; 10 Law Rep., 35.

§ 611. **Question of title.**—In a suit for the infringement of a trade-mark, the question whether the complainant is the original inventor and proprietor of the article in question, or whether the article sold by the respondent is equal to that sold by the complainant, is immaterial. *McLean v. Fleming*, 6 Otto, 245; 10 Ch. Leg. N., 252 (§§ 431-40).

§ 612. **Delay in suing.**—There is no fixed time within which the owner of a trade-mark must proceed against a party infringing it, where there is no such delay as would show an intention to abandon it. *Williams v. Adams*, 8 Biss., 452 (§§ 474-75).

§ 613. Where there has been an unreasonable delay in bringing a suit for an unauthorized use of a trade-mark, an injunction will be allowed, but an accounting will not be decreed. *Holt v. Menendez*,* 23 Fed. R., 869.

§ 614. A long lapse of time will not deprive the owner of a trade-mark of an injunction against an infringer, but reasonable diligence is required, or an accounting of the rents and profits will not be decreed. Acquiescence must be after knowledge of the infringement. *Sawyer v. Kellogg*,* 9 Fed. Rep., 601.

§ 615. The use of an infringing trade-mark will be enjoined, though, owing to the delay in bringing suit, an accounting will not be decreed. *McLean v. Fleming*, 6 Otto, 245; 10 Ch. Leg. N., 252 (§§ 431-40).

§ 616. Equity will not decree for an account of past gains and profits where there has been laches in bringing the suit and long acquiescence in the use of a trade-mark by others. *Manhattan Medicine Co. v. Wood*, 4 Cliff., 461; 14 O. G., 519 (§§ 550-51).

§ 617. Where the delay of the owner of a trade-mark to prosecute infringers has been of a tendency to mislead the public, or the defendant sought to be enjoined, into a false security, and a sudden injunction would result injuriously, it will not be granted summarily, but the complainant will be left to his relief on the final hearing. So where the extensive use of a trade-mark by others, with the implied acquiescence of the owner, has contributed to give a reputation and create a demand for the article to which it has been applied which it would not otherwise have acquired, equity will not by any stringent intervention assist the owner to secure these fruits. *Estes v. Worthington*,* 22 Fed. R., 822.

§ 618. **Injunction.**—It is not necessary, in order to give a party a right to an injunction, that a specific trade-mark should be infringed, but it is sufficient that the court is satisfied that there was an intent on the part of the respondent to palm off his goods as the goods of the complainant, and that he persists in doing so after being requested to desist. *McLean v. Fleming*, 6 Otto, 245; 10 Ch. Leg. N., 252 (§§ 431-40).

§ 619. Equity will enjoin an infringement of an established trade-mark. *Frese v. Bachoff*,* 13 Blatch., 234.

§ 620. The granting of an injunction in a trade-mark suit is a matter in the discretion of the court. *Tucker Mfg. Co. v. Boyington*,* 9 O. G., 455.

§ 621. The right of a party whose trade-mark has been infringed to an injunction is not affected by the fact that the appropriation has been a limited one merely. *Atlantic Milling Co. v. Robinson*,* 20 Fed. R., 217.

§ 622. A court of equity refused to interfere by injunction in a trade-mark case, because the right was doubtful, before the plaintiff had made out his title at law. *Hartwell v. Viney*,* 2 Weekly Notes, 602.

§ 623. A complainant who has refused to recognize the rights of a foreign proprietor of a trade-mark until it appeared to him that it would be more profitable to purchase his rights in this country and obtain a monopoly of such trade-mark here will be left to his rights, as against an infringer, until final hearing, and an injunction will be refused. *Estes v. Worthington*,* 22 Fed. R., 822.

§ 624. Where the right to manufacture an article is contested between the parties, chancery will not interfere and enjoin a party from using labels or marks to recommend his article, though it may, to some extent, be substituted for that of the plaintiff. *Coffeen v. Brunton*,* 5 McL., 256.

§ 625. In trade-mark cases, it is by no means of course to grant preliminary injunctions, even where the plaintiff's case seems to be made out. *Fairbanks v. Jacobus*, 14 Blatch., 337 (§§ 461, 462).

§ 626. The complainant in a trade-mark suit is entitled to an injunction when it appears that the mark used by the defendants sufficiently resembles the complainant's to be mistaken for it, and that the defendants adopted such mark for the purpose of selling their goods as those of the complainant, or for the purpose of enabling retailers to do so, and that the complainant has been or is likely to be injured thereby. *Southern White Lead Co. v. Cary*,* 25 Fed. R., 125.

§ 627. **Quality of article sold.**—An action will lie to recover damages for an unauthorized use of a trade-mark, though the article sold by the defendant was not inferior to that sold by the plaintiff. *Taylor v. Carpenter*,* 2 Woodb. & M., 1; 10 Law Rep., 35.

§ 628. **Costs.**—In trade-mark case a decree of infringement and for an injunction carries the costs. *Sawyer v. Kellogg*,* 9 Fed. R., 601.

§ 629. **Damages.**—An infringer is liable to the person whose trade-mark he has infringed, and the damage will ordinarily be the loss of profits caused by the infringements. Where the sales of the genuine article have fallen off in a certain place to a greater extent than the sales of the spurious in the same time, the measure of damages will be the profits on the quantity of the spurious article sold there. *Hostetter v. Vowinkle*,* 1 Dill., 329.

§ 630. The damages for the unlawful use of a trade-mark are measured by the extent to which the unlawful use of the trade-mark has interfered with the sale of the genuine article. *Atlantic Milling Co. v. Robinson*,* 20 Fed. R., 217.

§ 631. An action to recover damages for an unauthorized use of a trade-mark was held not to be a case for punitive or vindictive damages. *Taylor v. Carpenter*,* 2 Woodb. & M., 1; 10 Law Rep., 35.
